

GESIS Archive Study ID: ZA4986
Flash Eurobarometer 260
February 2009

Students and Higher Education Reform - Survey among students in higher education institutions, in the EU Member States, Croatia, Iceland, Norway and Turkey

Conducted by The Gallup Organisation, Hungary, upon the request of EC Directorate-General Education and Culture and co-ordinated by EC Directorate General Communication

ARCHIVE INFORMATION AND ERRATA

- **CASEID:** Original case identification is not unique. A duplicate case id number has been identified for Bulgaria. A unique serial id was appointed by the archive (UNIQID).
- **REGION:** Official NUTS classification in this variable has been completed by the archive in accordance with the corresponding official NUTS classification and former Flash EB waves. The 13 categories for GREECE could not be clearly specified in accordance with NUTS 2. The four NUTS1 categories were reconstructed by the archive in accordance with former Flash EB waves. Frequencies could not be checked against the technical report. Variable NUTS1 also recodes NUTS1 levels for the Netherlands. 350 cases for Belgium are collapsed to '1000', i.e. do not identify any specific region. This special target group survey does not cover all regions which usually are available in the FLASH Eurobarometer series. For example there are not data for Bremen, Baden-Württemberg, Brandenburg, Sachsen-Anhalt and Thüringen for Germany.
- No weighting variables provided for this special target survey.
