EVS 2008 Method Report Country Report – Czech Republic

Documentation of the full data release 30/11/10

Related to the national dataset

Archive-Study-No. ZA4770, doi:10.4232/1.10165

*European Values Study and
GESIS Data Archive for the Social Sciences*

Acknowledgements

The fieldwork of the 2008 European Values Study (EVS) was financially supported by universities and research institutes, national science foundations, charitable trusts and foundations, companies and church organizations in the EVS member countries.

A major sponsor of the surveys in several Central and Eastern European countries was Renovabis.

Renovabis - Solidarity initiative of the German Catholics with the people in Central and Eastern Europe: Project No. MOE016847 <http://www.renovabis.de/>.

An overview of all national sponsors of the 2008 survey is provided in the "EVS 2008 Method Report" in section funding agency/sponsor, the "EVS 2008 Guidelines and Recommendations", and on the website of the European Values Study <http://www.europeanvaluesstudy.eu/evs/sponsoring.html>.

The project would not have been possible without the National Program Directors in the EVS member countries and their local teams.

Gallup Europe developed a special questionnaire translation system WebTrans, which appeared to be very valuable and enhanced the quality of the project.

Special thanks also go to the teams at Tilburg University, CEPS/INSTEAD Luxembourg, and GESIS Data Archive for the Social Sciences Cologne.

Introduction

The present paper is an excerpt from the "EVS 2008 Method Report" on the Integrated Dataset published in volume 17 of series GESIS-Technical Reports in December 2010.

The EVS 2008 Method Report provides standardised information on the survey implementation and fieldwork procedures in the EVS member countries. Metadata includes all information given in the methodological questionnaires completed by each national team or the fieldwork organization.

After the EVS reviewed the fieldwork information it was archived in a database designed by the GESIS Data Archive. The outcome of the database was reviewed by the national teams and/or fieldwork organization before making them publicly available.

The structure of the database corresponds to DDI/XML V.2 standards and ensures different output formats. This allows users to choose between several approaches to the standardized information: the "EVS 2008 Method Report" on the Integrated Dataset (PDF), a HTML surface that offers an extended Study Description, and the GESIS retrieval and analysis systems Online Study Catalogue ZACAT and Data Catalogue.

The Method Report consists of three sections providing metadata on the Integrated Dataset and the 47 national datasets:

Section one provides brief information on the EVS including an overview of all data and documentation available for EVS 2008 and refers to an easy way to get data access.

The study description of the Integrated Dataset in section two contains more general information and summarized country-specific information on study scope, principal investigator, funding agency, data depositor, data access and version, etc.

The third section includes the current country report on the national dataset providing comprehensive country-specific information on sampling procedure, mode of data collection, fieldwork procedure, and additional country-specific information on harmonized variables (electoral systems, political parties, education, occupation, and region).

1 European Values Study

Where is Europe heading? This is one of the main questions of the European Values Study (EVS) – the most comprehensive research project on human values in Europe. The EVS is a large-scale, cross-national, and longitudinal survey research program on how Europeans think about family, work, religion, politics and society. Repeated every nine years in an increasing number of countries, the survey provides insights into the ideas, beliefs, preferences, attitudes, values, and opinions of citizens all over Europe.

The research program was initiated by the European Value System Study Group (EVSSG) in the late 1970s and has emerged as a well-established network of social and political scientists aiming at high standards in data creation and processing. The data is being intensively used in social science research and teaching. It may also be of interest to policymakers, politicians, journalists, and others interested in getting to know and understand the societies which they are part of.

Four waves of surveys were executed from 1981 to 2008. These surveys explore value differences, similarities, and value changes. Representative national samples were drawn from the population of citizens over 18 years of age and face-to-face interviews were carried out. Standardized questionnaires with comparable questions across waves were then administered.

- The first wave was conducted in 1981, when citizens of the European Member States of that time were interviewed. The national datasets were combined into an international dataset including a total of 16 countries.
- The second wave was launched in 1990 to explore the dynamics of value change. It covered almost the same themes as the first wave. Surveys were carried out in 29 European, as well as other countries.
- The wave in 1999/2000 was administered in 33 countries. Several new issues, such as questions on solidarity, social capital, democracy, and work ethics were added to the questionnaire of this wave.
- The fourth wave was carried out in 2008 and included a total of 47 European countries/regions. Again, the questions in this wave are highly comparable across waves and across countries. In addition, this wave has a strong focus on region, both within and across countries.

1.1 EVS 1981–2008: Participating countries

Specific information on country surveys and integrated data of single waves is available at the GESIS [Data Catalogue](#). The Study Descriptions include notes about Version History & Errata along with the information on the origin and context of the data.

1.2 EVS 2008

The fourth wave has a persistent focus on a broad range of values. Questions with respect to family, work, religious, political and societal values are highly comparable with those in earlier waves (1981, 1990 and 1999/2000). This longitudinal scope of the study makes it possible to study trends in time. EVS draws random probability samples with a net sample size 1500 which again differs in countries regarding their population size. Usually citizens were interviewed personally (face-to-face).

The EVS 2008 has an increasing international and regional coverage. It covers almost all countries of Europe. In total, the fieldwork is administered in 47 countries/regions:

Albania, Armenia, Austria, Azerbaijan, Belarus, Belgium, Bosnia-Herzegovina, Bulgaria, Croatia, Cyprus, Cyprus (North), Czech Republic, Denmark, Estonia, Finland, France, Georgia, Germany, Great-Britain, Greece, Hungary, Iceland, Ireland, Italy, Kosovo, Latvia, Lithuania, Luxembourg, Republic of Macedonia, Malta, Republic of Moldova, Republic of Montenegro, The Netherlands, Northern Ireland, Norway, Poland, Portugal, Romania, Russian Federation, Serbia, Slovak Republic, Slovenia, Spain, Sweden, Switzerland, Turkey, Ukraine.

The full data release (Version 2.0.0, 2010-11-30) includes data and documentation of all participating countries/regions in EVS 2008.

Large efforts were taken to guarantee high scientific standards in developing and translating the Master Questionnaire and the field questionnaires, high quality fieldwork, and standardized data processing and documentation.

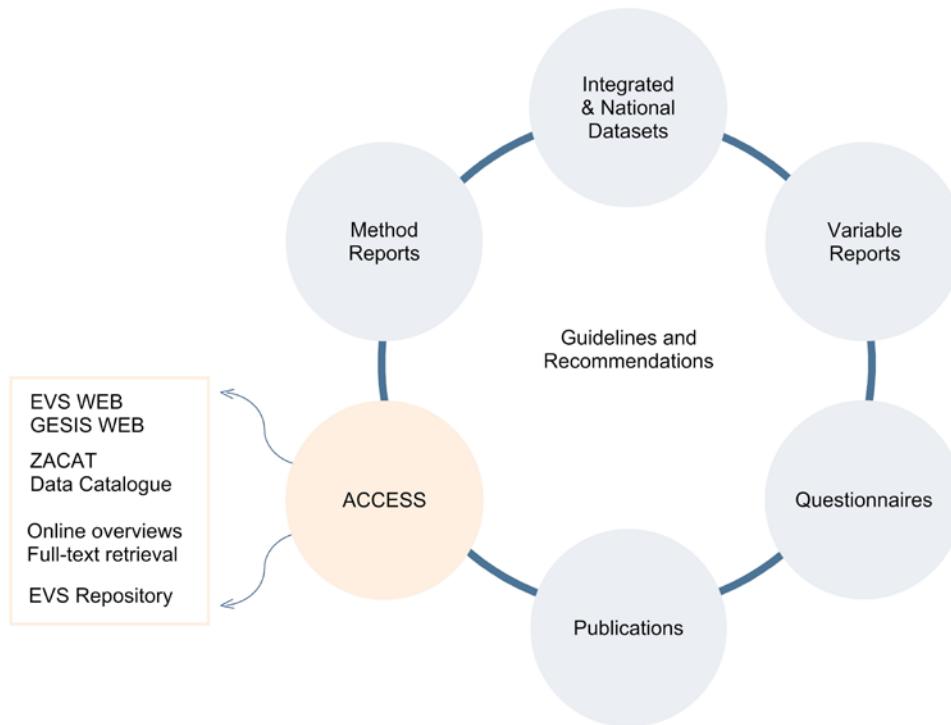

A set of guidelines and recommendations was set up and the whole process of data creation and processing was guided and monitored by the EVS advisory groups.

For more information, see the report "EVS 2008 Guidelines and Recommendations" provided on EVS website and additionally via GESIS Online Study Catalogue - ZACAT and Data Catalogue.

1.3 Overview of data and documentation of EVS 2008

The documentation created for the fourth EVS wave includes both the guidelines and standards developed to produce comparable data and detailed information on peculiarities of the national datasets on study and variable level.

Figure 1: Overview of available data and documentation

Data

Beside the Integrated Dataset the national datasets, including additional country-specific variables, are provided through ZACAT for national rather than multinational use.

Reports

Standards and recommendations designed by the EVS advisory groups for all countries are compiled in the report "EVS 2008 Guidelines and Recommendations". The information is mainly related to the questionnaire development and translation process, fieldwork, and data processing.

The "EVS 2008 Method Report" includes both summarized information on the Integrated Dataset and country reports with country-specific information on the origin of the national datasets. It is based on the methodological questionnaires submitted by all EVS member countries.

The English variable documentation on the Integrated Dataset and the bilingual variable report on each national dataset are available as "EVS 2008 - Variable Reports".

Questionnaires

The English Master Questionnaire and the field questionnaires in all languages fielded in participating countries are downloadable.

Publications

The EVS repository is an easy way to find relevant publications based on EVS data. Moreover, it contains enhanced publications with direct links to the dataset, variables, and syntax codes of the concepts used.

1.4 Access to data and documentation

The data and documentation of the four EVS waves is publicly available at the EVS and GESIS websites.

General study information

The EVS website (<http://www.europeanvaluesstudy.eu/>) covers information on the origin of the project, and the master questionnaires as well as field questionnaires in different language versions. Additionally, method reports and original language variable reports of integrated and/or national datasets are offered for the third and fourth EVS wave.

Data and documentation

ZACAT - GESIS Online Study Catalogue provides data of all EVS waves for retrieval purposes, data exploration and free download. It supports full access to datasets and documentation and assists users in identifying trend variables of all four waves. Furthermore, ZACAT enables comparisons of original questions in survey languages of the third and fourth wave.

Version History & Errata

GESIS Data Catalogue provides an overview on version history and errata. It contains study descriptions for all EVS datasets with information about updates, errors, and error corrections.

Online study and variable information

Online study description and variable overview offer comprehensive metadata on the EVS datasets and variables.

The **extended study description** of the EVS 2008 provides country-specific information on the origin and outcomes of the national surveys.

The **variable overview** is available for the four EVS waves 1981- 2008. It allows identification of country-specific deviations in the question wording within and across the waves.

Full-text retrieval

Qbase-retrieval system is a facility for word/phrase searches in EVS text documents.

Method report retrieval supports full-text searches in EVS 2008 guidelines and method reports of both integrated and national datasets.

Question text retrieval serves for full-text searches in the Master Questionnaire and variable reports of integrated datasets of all EVS waves 1981-2008 and in bilingual variable reports of national datasets.

Publication

EVS Repository contains publications based on the data of the EVS. These publications are mostly enhanced with direct links to datasets, variables, and syntax codes of concepts used. The EVS Repository can be found at <http://www.europeanvaluesstudy.eu/evs/publications/>.

Secondary education

In cooperation with Fontys University of Applied Sciences Netherlands, a special EVS website for educational use has been established (<http://www.atlasofeuropeanvalues.eu/>). By means of maps, teachers and pupils can make assignments and gain a better understanding of European values.

The Atlas of European Values

Published in 2005, the Atlas of European Values unlocks the results of the EVS project for the general public. It presents values, beliefs, attitudes, and opinions through graphs, charts, and maps (<http://www.europeanvaluesstudy.eu/evs/evsatlas.html>).

1.5 Bibliographic Citation

Publications based on EVS data should acknowledge this by means of bibliographic citations. To ensure that such source attributions are captured for social science bibliographic utilities, citations must appear in the footnotes or in the reference section of publications.

How to cite the data:

EVS (2010): European Values Study 2008, 4th wave, Czech Republic. GESIS Data Archive, Cologne, Germany, ZA4770 Data File Version 1.1.0 (2010-11-30), [doi:10.4232/1.10165](https://doi.org/10.4232/1.10165).

The country report is an excerpt from the EVS 2008 Method Report on Integrated Dataset published in volume 17 of series GESIS-Technical Reports. This paper should be cited as the following publication:

EVS, GESIS (2010): EVS 2008 Method Report. GESIS-Technical Reports 2010/17. Retrieved from <http://www.europeanvaluesstudy.eu/>.

In addition to data files a study comprises further data depositor's original documents and materials processed by the Data Archive: for example code sheets, questionnaires or reports. It is recommended to acknowledge respective documents from the archive holdings in publications by means of bibliographic citations including Archive-Study-No.

Disclaimer

EVS, GESIS, and the producers bear no responsibility for the uses of the EVS data, or for interpretations or inferences based on these uses. EVS, GESIS, and the producers accept no liability for indirect, consequential or incidental damages or losses arising from use of the data collection, or from the unavailability of, or break in access to the service for whatever reason.

II. STUDY SCOPE

TOPIC CLASSIFICATION

Moral, religious, societal, political, work, and family values of Europeans.

Study Description

ABSTRACT

Topics: 1. Perceptions of life: importance of work, family, friends and acquaintances, leisure time, politics and religion; frequency of political discussions with friends; happiness; self-assessment of own health; memberships and unpaid work (volunteering) in: social welfare services, religious or church organisations, education, or cultural activities, labour unions, political parties, local political actions, human rights, environmental or peace movement, professional associations, youth work, sports clubs, women's groups, voluntary associations concerned with health or other groups; tolerance towards minorities (people with a criminal record, of a different race, left/right wing extremists, alcohol addicts, large families, emotionally unstable people, Muslims, immigrants, AIDS sufferers, drug addicts, homosexuals, Jews, gypsies and Christians - social distance); trust in people; estimation of people's fair and helpful behaviour; internal or external control; satisfaction with life.

2. Work: reasons for people to live in need; importance of selected aspects of occupational work; employment status; general work satisfaction; freedom of decision-taking in the job; importance of work (work ethics, scale); important aspects of leisure time; attitude towards following instructions at work without criticism (obedience work); give priority to nationals over foreigners as well as men over women in jobs.

3. Religion: Individual or general clear guidelines for good and evil; religious denomination; current and former religious denomination; current frequency of church attendance and at the age of 12; importance of religious celebration at birth, marriage, and funeral; self-assessment of religiousness; churches give adequate answers to moral questions, problems of family life, spiritual needs and social problems of the country; belief in God, life after death, hell, heaven, sin and re-incarnation; personal God versus spirit or life force; own way of connecting with the divine; interest in the sacred or the supernatural; attitude towards the existence of one true religion; importance of God in one's life (10-point-scale); experience of comfort and strength from religion and belief; moments of prayer and meditation; frequency of prayers; belief in lucky charms or a talisman (10-point-scale); attitude towards the separation of church and state.

4. Family and marriage: most important criteria for a successful marriage (scale); attitude towards childcare (a child needs a home with father and mother, a woman has to have children to be fulfilled, marriage is an out-dated institution, woman as a single-parent); attitude towards marriage, children, and traditional family structure (scale); attitude towards traditional understanding of one's role of man and woman in occupation and family (scale); attitude towards: respect and love for parents, parent's responsibilities for their children and the responsibility of adult children for their parents when they are in need of long-term care; importance of educational goals; attitude towards abortion.

5. Politics and society: political interest; political participation; preference for individual freedom or social equality; self-assessment on a left-right continuum (10-point-scale); self-responsibility or governmental provision; free decision of job-taking of the unemployed or no permission to refuse a job; advantage or harmfulness of competition; liberty of firms or governmental control; equal incomes or incentives for individual efforts; attitude concerning capitalism versus government ownership; postmaterialism (scale); expectation of future development (less emphasis on money and material possessions, greater respect for authority); trust in institutions; satisfaction with democracy; assessment of the political system of the country as good or bad (10-point-scale); preferred type of political system (strong leader, expert decisions, army should rule the country, or democracy); attitude towards democracy (scale).

6. Moral attitudes (scale: claiming state benefits without entitlement, cheating on taxes, joyriding, taking soft drugs, lying, adultery, bribe money, homosexuality, abortion, divorce, euthanasia, suicide, corruption, paying cash, casual sex, avoiding fare on public transport, prostitution, experiments with human embryos, genetic manipulation of food, insemination or in-vitro fertilization and death penalty).

7. National identity: geographical group the respondent feels belonging to (town, region of country, country, Europe, the world); citizenship; national pride; fears associated with the European Union (the loss of social security and national identity, growing expenditure of the own country, the loss of power in the world for one's own country and the loss of jobs); attitude towards the enlargement of the European Union (10-point-scale); voting intentions in the next election and party preference; party that appeals most; preferred immigrant policy; opinion on terrorism; attitude towards immigrants and their customs and traditions (take jobs away, undermine a country's cultural life, make crime problems

Study Description

worse, strain on country's welfare system, threat to society, maintain distinct customs and traditions); feeling like a stranger in one's own country; too many immigrants; important aspects of national identity (being born in the country, to respect country's political institutions and laws, to have country's ancestry, to speak the national language, to have lived for a long time in the country); interest in politics in the media; give authorities information to help justice versus stick to own affairs; closeness to family, neighbourhood, the people in the region, countrymen, Europeans and mankind; concerned about the living conditions of elderly people, unemployed, immigrants and sick or disabled people.

8. Environment: attitude towards the environment (scale: readiness to give part of own income for the environment, overpopulation, disastrous consequences from human interference with nature, human ingenuity remains earth fit to live in, the balance of nature is strong enough to cope with the impacts of modern industrial nations, humans were meant to rule over the rest of nature, an ecological catastrophe is inevitable).

Demography: sex; age (year of birth); born in the country of interview; country of birth; year of immigration into the country; father and mother born in the country; country of birth of father and mother; current legal marital status; living together with the partner before marriage or before the registration of partnership; living together with a partner and living with a partner before; steady relationship; married to previous partner; living together with previous partner before marriage; end of relationship; number of children; year of birth of the first child; size and composition of household; experienced events: the death of a child, of father or mother, the divorce of a child, of the parents or of another relative; age of respondent when these events took place; age at completion of education; highest educational level attained; employment status; employed or self-employed in the last job; profession (ISCO-88) and occupational position; supervising function and span of control; size of company.

Social origin and partner: respondent's partner or spouse: partner was born in the country and partner's country of birth; highest educational level; employment status of the partner; employment or self-employment of the partner in his/her last job; partner's profession (ISCO-88) and occupational position; supervising function of the partner and span of control; unemployment and dependence on social-security of the respondent and his partner longer than three months in the last five years; scale of household income; living together with parents when the respondent was 14 years old; highest educational level of father/mother; employment status of father/mother when the respondent was 14 years old; profession of father/mother (ISCO-88) and kind of work; number of employees (size of business); supervising function and span of control of father and mother; characterization of the parents when respondent was 14 years old (scale: liked to read books, discussed politics at home with their child, liked to follow the news, had problems making ends meet, had problems replacing broken things); region the respondent lived at the age of 14, present place of residence (postal code); size of town; region.

Interviewer rating: respondent's interest in the interview.

Additionally encoded: interviewer number; date of the interview; total length of the interview; time of the interview (start hour and start minute, end hour and end minute); language in which the interview was conducted.

Additional country specific variables are included in the national datasets.

UNIT OF ANALYSIS

Individuals

UNIVERSE

Persons 18 years or older who are resident within private households, regardless of nationality and citizenship or language.

GEOGRAPHIC UNITS

Study Description

Was there any regional categories changed since EVS 1999?	
Yes	X
No	
Country having not participated to EVS 1999	

Please list the categories in the variable Region in the data set

EVS 1999

- Praha
- Středočeský kraj
- Západoceský kraj
- Jihočeský kraj
- Severočeský kraj
- Východočeský kraj
- Jihomoravský kraj
- Severomoravský kraj

EVS 2008

- CZ01 Prague
- CZ02 Central Bohemian Region
- CZ031 South Bohemian Region
- CZ032 Plzen Region
- CZ041 Karlovy Vary Region
- CZ042 Ústí nad Labem Region
- CZ051 Liberec Region
- CZ052 Hradec Králové Region
- CZ053 Pardubice Region
- CZ061 Vysočina Region
- CZ062 South Moravian Region
- CZ071 Olomouc Region
- CZ072 Zlín Region
- CZ081 Moravian-Silesian Region

Correspondence with NUTS classification

- Classification from EVS 1999 is approximately corresponding with NUTS2, but not full.
- Classification from EVS 2008 is approximately corresponding with NUTS3.

Unfortunately, it's impossible to make transfer between this regional category now. To create such a transfer it is necessary to have older classification at the low level "okres", but it isn't available.

Please see " Other documentation" for NUTS1, NUTS2, and NUTS3.

Study Description

CLEANING / VERIFICATION OF DATA AND QUESTIONNAIRE

	A. CHECKING OF DATA	
a.	Were data checked for consistency?	
	Yes	X
	No	
b.	If yes, were the data edited?	
	Yes, data corrected individually	
	Yes, data corrected automatically	
	Yes, data corrected both individually and automatically	X
	No, no correction was done	
c.	Were data corrected always according to filter instructions?	
	Yes	X
	No	
d.	Who did the data corrections?	
	The fieldwork agency	X
	The Programme Director or its team	
	Any other person (please specify):	
	B. VERIFICATION OF THE QUESTIONNAIRE - CAPI	
a.	How was the CAPI questionnaire programme checked?	
	The CAPI questionnaire programme was checked by 8 people.	
b.	Who did the CAPI questionnaire checking?	
	The fieldwork agency	X
	The Programme Director or its team	X
	Any other person (please specify):	
	C. VERIFICATION OF THE QUESTIONNAIRE - PAPI	NAP
a.	Was the scanning of optical or keying questionnaire checked?	
	Yes	
	No	
b.	Who did the PAPI questionnaire checking?	
	The fieldwork agency	
	The Programme Director or its team	
	Any other person (please specify):	
c.	Approximate proportion of questionnaires checked?	

SAMPLING PROCEDURE

Sample type: Stratified probability sample

Target Population: The population of Czech Republic - 18 years old

Sample universe: All households with at least one Czech nationality member born in 1990 or earlier, living in the Czech Republic.

- BASE OF POPULATION FIGURES: 8 522.012 habitants 18years and old (2007)

- SOURCE OF POPULATION FIGURES: Czech statistical office, 2001 - 2008 www.czso.cz

Definition of PSU, SSU, TSU:

- PSU: Stage 1 - Selection of localities (election districts)
- Stage 2 - Selection of Households
- Stage 3 - Selection of Respondent

Study Description

Selection procedure of PSU, SSU, HH and respondent:

- PSU: Election districts were stratified by 21 strata (combination of 8 regions and 3 types of municipalities size). The election districts into each stratum were arranged according to factor score (We prepared factor analysis for each district that included all available and relevant socio-political information. Our target was a good representation of all social types of Czech households). We applied systematic selection with step k. The probability of a district selection is the number of selected districts (in concrete stratum) to all districts in concrete stratum.

- HH: Completed list of households is made in each selected district. The selection method was simple random sampling (by SPSS Complex Sample) in each selected district. The source of addresses were the interviewers, collection of addresses carried out 2008 year.

- Respondent: The interviewers used the Kish tables for selecting of respondent.

Stratification: The definition of stratification in Czech Republic according to 8 regions (NUTS 2) and locality size (three levels - regional center, middle town, and small locality). There are 21 strata altogether (region Prague is only in one size level and Central Bohemia lacks regional center). Sampling is realized independently in each stratum and proportionately to the stratum size. The selection is made by professional software (SPSS Complex Sample).

- Please see "Other documentation" for the country specific tables.

CHARACTERISTIC OF SAMPLE

Response and non response (numbers)	
A. Total number of issued sample units (addresses, households or individuals):	2995
B. Refusal by respondent:	342
C. Refusal by proxy (or household or address refusal):	444
D. No contact (after at least 4 visits):	144
E. Language barrier:	9
F. Respondent mentally or physically unable to co-operate throughout fieldwork period:	21
G. Respondent unavailable throughout the fieldwork period for other reasons:	100
H. Address not residential (institution, business/industrial purpose):	4
I. Address not occupied (not occupied, demolished, not yet built):	32
J. Address not traceable:	5
K. Other ineligible address:	13
L. Respondent moved abroad/unknown destination:	1
M. Respondent deceased:	6
Y. Invalid interviews:	3
Z. Number of valid interviews:	1821
X. Number of units not accounted for (A-[sum of B to M,Y,Z]): if all sample units are accounted for, X will=0:	50

Did your sample have a panel component (either from the earlier EVS-survey or otherwise)?

Please specify:

- No panel component

REPRESENTATIVITY

 Study Description

	Country level	Regional level
Age * Gender	X	X
Educational distribution	X	X
Degree of urbanisation	X	X
Gender * Age * Education	X	
... (any other than the above mentioned-see Appendix A; please specify)		

- Please see "Other documentation" for the country specific tables.

 WEIGHTS AND CHARACTERISTIC OF NATIONAL POPULATION

a. National weights variables included in the data set:	
Yes	
No	X
b. If Yes, please specify very precisely and with as much details as possible what type of weights. Document as much as possible:	NAP
c. Provide all information necessary for the Methodology Group to compute weights (what is the selection probability for each potential respondent?)	
Number of inhabitants over 18 year in your country at the time of interviewing (ideally number of residential people that are not institutionalised = sample frame):	8 522 012
The population size (ideally over 18, residential and not institutionalised) of the areas/strata at each step in the sample:	see table below
The actual number of interviewed respondent at each step of the sample for each area/stratum:	see table below

Study Description

Weighting Variables

Weight: gender by age

The variable "weight" was computed by the EVS for all national datasets on the basis of information and population statistics provided by the EVS countries. The weight is constructed on the basis of gender and age categories (-24; 25-34; ... ; 65-74; 75 and over). Value '0' implies that year of birth information was missing in the data.

The weight adjusts the socio-structural characteristic in the samples to the distribution of gender and age of the universe-population. In a future release, the weight variable will be developed further (also taking at least region into account). The current weight variable should be used with caution. Especially when the weights are "big", say outside the 0.50-2.00 range.

For some national datasets (AT HR FR KOS RO SK SE CH) country specific original weight variables are provided additionally as delivered by the countries. For country-specific information, see Country Reports on national datasets.

IV. DATA ACCESS

USAGE REGULATIONS

Data and documents are released for academic research and teaching - Access category A.

ANONYMISED DATA

According to data regulations in participating countries, only anonymised data are made available to users. Before depositing data, each national team was responsible for checking their data confidentiality.

CITATION REQUIREMENTS

Publications based on EVS data should acknowledge this by means of a bibliographic citations as listed under item "Bibliographic Citation". To ensure that such source attributions are captured for social science bibliographic utilities, citations must appear in the footnotes or in the reference section of publications.

How to cite the data:

EVS (2010): European Values Study 2008, 4th wave, Czech Republic. GESIS Data Archive, Cologne, Germany, ZA4770 Data File Version 1.1.0 (2010-11-30) doi:10.4232/1.10165 (<http://dx.doi.org/10.4232/1.10165>).

How to cite this publication:

EVS, GESIS (2010): EVS 2008 Method Report. GESIS-Technical Reports 2010/17. Retrieved from <http://www.europeanvaluesstudy.eu/>).

DEPOSIT REQUIREMENTS

To provide funding agencies with essential information about the use of EVS data and to facilitate the exchange of information about the EVS, users of EVS data are required to send to bibliographic citations and/or electronic copies of each completed report, article, conference paper or thesis abstract using EVS data. These will be included in the EVS repository. For more information, see www.europeanvaluesstudy.eu/evs/publications.

DISCLAIMER

EVS, GESIS, and the producers bear no responsibility for the uses of the EVS data, or for interpretations or inferences based on these uses. EVS, GESIS, and the producers accept no liability for indirect, consequential or incidental damages or losses arising from use of the data collection, or from the unavailability of, or break in access to the service for whatever reason.

PUBLICATIONS

Publications using EVS data can be found in the EVS Repository. The repository is an easy way to find relevant publications in the field of value studies. Moreover, it contains enhanced publications with direct links to the dataset, variables, and syntax codes of the concepts used.

The EVS Repository can be found at www.europeanvaluesstudy.eu/evs/publications.

EDUCATION

Please specify the educational variable:

Study Description

0.	Uneducated	ISCED0
1.	Incomplete basic education (First level of basic education, First level of Special and assisted schools)	ISCED1
2.	Basic education (First and second level of basic education, First level of eight-year or six-year grammar schools)	ISCED2A
3.	Basic education (Special and assisted schools, School with modify/teaching plan)	ISCED2C
4.	Secondary education with a leaving examination (Secondary apprentice training centers)	ISCED3A
5.	Secondary education with a leaving examination (Grammar schools, Secondary vocation schools)	ISCED3A
6.	Secondary education – Conservatory	ISCED3B
7.	Secondary education with certificate of apprenticeship (Secondary apprentice training centers)	ISCED3C
8.	Secondary education with vocational certificate or final exam (Secondary vocation schools)	ISCED3C
9.	Graduate of secondary education with a leaving examination following the secondary education (extension course, higher qualification after leaving examination)	ISCED4A
10.	Graduate of secondary education with vocational certificate or final exam following the secondary education (apprentice training, retraining study, study of languages, etc.)	ISCED4C
11.	University education - Bachelor's (Bc., Bc.A., Higher vocational education - DiS., specialization after leaving examination)	ISCED5B
12.	University education - Master's or Engineering (Honorary degree - Mgr., Ing., Ing. arch., MUDr., MDDr., MVDr., PhDr., RNDr., JUDr., PharmDr., ThLc., ThDr., PaedDr., RSDr.)	ISCED5A
13.	University education - Doctoral programs (Ph.D., Th.D., CSc., DrSc.)	ISCED6

Description of educational system:

Compulsory school attendance from the age of six years

Basic school (základní škola) has two levels: common school (=first level = 1st to 5th grade), second level (6th - 9th grade). At the second level, the child can study either at basic school or at grammar school. = category 2 in EVS variable = 9 years at school

Secondary school:

- For manually skilled worker - vocational schools, "střední odborné u?ilišt?" SOÚ - 3 or 4 years long (categories 3 and 4 in EVS variable)
- Branch secondary school - "střední odborná škola" (commercial academy, technical school etc.) - 4 years (categories 5 and 6 in EVS variable) - School Leaving Examination
- Grammar school ("gymnasium"): 4 years (categories 6 in EVS variable) - School Leaving Examination
- College / university: three levels - bachelor's level, master's level, doctor's level
 - bachelor: 3 - 4 years (in average) - category 7 in EVS variable
 - master: 2 - 3 years (in average) - category 8 in EVS variable
 - doctor (Ph.D.): 3-4 years (in average) - category 8 in EVS variable

Please indicate the correspondence between the national educational categories and ISCED standard classification.

- Already provided in the specification of educational variable

OCCUPATION

Occupation should be measured by ISCO88 as supplied; please specify any deviations:

Study Description

- See "Other documents", for corrections of values from ISCO-88-CS to ISCO-88-INT (international).

POLITICAL PARTIES

Please give a short description of each political party in the data set.

- Please see "Other documentation" for the country specific tables.

Please indicate the position of political parties in relation to each other on a 10 point left-right scale:

- Please see "Other documentation" for the country specific tables.

Please indicate the party size for each political party, by providing each party's share of the vote in the last national legislative election.

Nr.	Name of political party	Valid votes	
		total	%
1	Strana zdravého rozumu	24 828	0.46
2	Ceské hnutí za národní jednotu	216	0.00
3	Balbinova poetická strana	6 897	0.12
4	Liberální reformní strana	253	0.00
5	Právo a Spravedlnost	12 756	0.23

26	STRANA RODNOST SANCI	10 879	0.20

Date of the last national legislative elections:

Study Description

- 02-06-2006 - 03-06-2006

ELECTORAL SYSTEM

Please indicate the number of votes registered in the national elections.

Please indicate the number of votes registered in the national elections.

- Only one single vote registered

Description of the electoral system with details and precision:

Elections to the Czech Parliament (Chamber of Deputies)

- proportional electoral system
- 1 vote
- 14 districts
- 5% threshold for parties, for 2-party coalition 10%, 3-party coalition 15% etc.
- d'Hondt method
- closed lists (2 preferential votes - 7% threshold for winning seat)

Other documentation: Czech Republic
