## Introduction

The bilingual variable documentation is a supplement to the English Variable Report published along with the EVS 2008 national dataset. The English Variable Report includes an extensive description of the data on study and variable level and frequency counts for almost all variables.

The variable documentation at hand offers a direct comparison of master questions as in English Master Questionnaire on one side, and original questions as in field questionnaire on the other. What is more, for comparative analyses users can easily access this type of documentation provided for all countries participating in EVS 2008. By this, exploration of communalities and differences in question wording across countries/cultural contexts is supported.

An overview of available documentation accessible for all countries can be found on the EVS website, Survey 2008 (<http://www.europeanvaluesstudy.eu/evs/surveys/survey-2008/participatingcountries/>).

The graphic below shows countries sharing one or more languages in the blue boxes. Languages marked red show shared languages.

*Languages fielded in EVS 2008*

Serbia Serbian	Slovak Republic Slovak Hungarian	Slovenia Slovenian	Spain Spanish	Sweden Swedish	Switzerland German French Italian	Turkey Turkish	Ukraine Ukrainian Russian

Comparisons of original questions can be extended to the 1999 wave. An overview of bilingual variable documentation provided for all participating countries can be found on the EVS website, Survey 1999 (<http://www.europeanvaluesstudy.eu/evs/surveys/survey-1999-2000/participatingcountries/>).

Additionally, the Online Variable Overview (<http://info1.gesis.org/EVS/Variables/>) allows for identification of trend variables across EVS waves (1981, 1990, 1999, and 2008).

The data and documentation of the national surveys can be accessed through the GESIS Data Catalogue and ZACAT-Online Study Catalogue<sup>1</sup>.

## Explanation of bilingual variable documentation

In the following pages, the English/original variable documentation is provided.

The left part of the page in the example below depicts the variable documentation according to the English Master Questionnaire. It displays question number and text, response categories, and missing values. Additional notes refer to data, applied standards, and information on coding and harmonized variables.

On the right-hand side, variables are documented in the language fielded in given country. Question number and text, as well as response categories and missing values are displayed in original (fielded) language. Notes on this side refer to deviations between master and field questionnaire, translation problems, typing errors, and cover references to original country-specific variables. Besides, a standard note is added concerning the recoding and documentation of missing values in the national datasets.

Remarks on original question in the field questionnaire:

Additional interviewer instruction (description on main duties, qualification required, materials working on, provided goods or services ) .

Additional country-specific question (Q112s ) - no data available.

Note:

Standardized variable on the basis of two open-ended questions on occupation and kind of activity

(Q112 and Q112a ) post-coded according to 4-digit ISCO88.

Data for original string variable is not available in this dataset.

Derivation:

Despite correct filter in v338, 25 respondents who 'never had a paid job' (code 3 ) have valid ISCO codes instead of -3 'not applicable'.
