ISCO88 – R: Occupation ISCO 1988

Please give the text of the source question(s) on the respondent's occupation used in your field questionnaire. If ISCO88-codes are not coded directly from the responses, but derived from a country-specific occupation coding scheme, please provide a table of correspondence between country-specific and ISCO88 codes *attached as a separate file*. Please report which kind of ISCO code you apply. The most common ones are the code developed by the International Labour Organisation (ILO) and the variant developed for the European Union (EU), ISCO-COM. If you apply another variant such as ISCO88-CIS developed by the Statistical Committee of the Commonwealth of Independent States, then please specify.

Please do **not** enter **standard** ISCO88 codes here. But please report if your country **adds** or **changes** codes compared to ISCO88, if any.

SPISCO88 – S-P: Occupation ISCO

Please give the text of the source question(s) on the spouse's occupation used in your field questionnaire. If ISCO88-codes are not coded directly from the responses, but derived from a country-specific occupation coding scheme, please provide a table of correspondence between country-specific and ISCO88 codes *attached as a separate file*. Please report which kind of ISCO code you apply. The most common ones are the code developed by the International Labour Organisation (ILO) and the variant developed for the European Union (EU), ISCO-COM. If you apply another variant such as ISCO88-CIS developed by the Statistical Committee of the Commonwealth of Independent States, then please specify.

Please do **not** enter **standard** ISCO88 codes here. But please report if your country **adds** or **changes** codes compared to ISCO88, if any.

A coding frame has been established according to the median and the distribution of personal income categories in order to compute a global household income variable, considering also households composed of one person (d18=1). The following recoding has been applied:

F32p Personal earnings answer categories (amount by month)	Recoding into	F32 family income 's answer categories

Some minor errors are likely for a small number of respondents, specially those in categories 9 (n=26) and 10 living in a household of one person (N=17). 15 individuals living alone with children said they were living alone. Therefore they were not asked about household income. Not knowing if they have included all incomes, a code NA has been assigned for those 15 cases.

WEIGHT – Weighting factor

Please report on whether you calculate any weighting variables. If you adjust for non-response bias, please enter the variable(s) on which the sample's distribution(s) is (are) adjusted to the population distribution(s). Please, also report if you apply any kind of rescaling.

<i>Design weight to adjust for unequal selection probabilities</i>	No <input type="checkbox"/> <u>Yes</u>	<input type="checkbox"/> The design weight is defined according to three probabilities of selection: 1. Probability for the localities to be selected in the country 2. Probability for the sample points to be respondent (selected and cooperate) in the localities 3.
