

## Appendix

### Comparative Tables

In the following all items of the questionnaires are documented:

- indexes of confirmands and workers (i\_)
- questionnaires of the confirmands (t<sub>1</sub>: C\_; t<sub>2</sub>: K\_)
- questionnaires of the workers (t<sub>1</sub>: W\_; t<sub>2</sub>: V\_).

For all items with a rating scale, the mean values are reported. Most of the items had a seven-point scale; here also the number of respondents agreeing to the statement is given (percentage yes = percentage of answers 5, 6, and 7). The few items without a scaled answering format are documented at the end of each section without the results (due to limitation of space). The layout and order of the items are not equivalent to those of the questionnaires that were given to the interviewees. An exemplary questionnaire is printed on page 333.

The items printed in the appendix were asked in all (or most of) the countries involved. Additional country-specific items are not reported.

In order to facilitate comparisons between the countries, the country mean values with a deviation of  $\geq 0.4$  above total mean are marked with a light grey background; those with a deviation of  $\leq -0.4$  are marked with a dark grey background. These indications are only given for items with the seven-point scale as well as for the indexes based on them.

The country results are reported in the following order: Germany (DE), Austria (AT), Switzerland (CH), Denmark (DK), Finland (FI), Norway (NO), Sweden (SE).
