Acknowledgements

Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences.

Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (http://zacat.gesis.org), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

1.2 Content

1.2.1 Abstract

This round of Eurobarometer surveys diverged from standard trend questions, instead focusing on information and communication technologies, financial services, and cultural activities. Respondents were questioned about how important it was to use a computer in their daily lives, whether and where they used a computer, for which uses a computer or the Internet was important, and which other communication products they used, such as cable TV and mobile phones. They were asked what type of computer training they had received, whether they worked remotely (telecommuted), whether communication technologies had been introduced at their workplace, if so, what the outcome had been, and how using a computer, e-mail, or the Internet had changed the way they worked. Respondents were further queried on financial services, governmental legislation of financial services, whether consumer protection standards should be harmonized within the European Union (EU), and what obstacles were preventing consumers from using financial services in the EU. They were asked about their preferred method of paying for significant purchases and the reasons for that preference, whether they used cards with a confidential code, and the types of financial accounts or loans they had. A final section focused on cultural activities and asked respondents which type of television programs they watched, whether they watched videos or DVDs, listened to the radio, or owned a computer, how often they used the Internet and for what purpose, how many books they had read in the past year, whether they read newspapers or magazines, and what types of music they listened to. They were asked to describe cultural activities they engaged in, types of media they had access to at home (such as a television set, records, CDs, video game player, books), and how many television sets, encyclopedias, and books they owned. Demographic and other background information provided includes respondent´s age, gender, nationality, marital status, left-right political self-placement, occupation, age at completion of education, household income, region of residence, and subjective size of community.

1.3 Universe

In all, Eurobarometer 56.0 interviewed 16.200 citizens of the 15 countries in the European Union (nationals and non-nationals but EU-citizens). Respondents were aged 15 and over. Separate samples were drawn for Northern Ireland and East Germany.

1.4 Sampling procedure

A multi-stage sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regions in every country (i.e., Statistical Office of the European Community, EUROSTAT regions). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of addresses was selected from each sampled PSU. Addresses were chosen systematically using standard random route procedures, beginning with an initial address selected at random. In each household, a respondent was selected, by a random procedure. Up to three recalls were made to obtain an interview with the selected respondent. No more than one interview was conducted in each household.

The regular sample size (in the sense of completed interviews) is 1000 respondents per country, except the United Kingdom with separate samples for Great Britain (1000) and Northern Ireland (300), Luxembourg (600) and Germany with separate samples for the Eastern and the Western part (1000 each). The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

From August 22 to September 27, 2001, the European Opinion Research Group, a consortium made out of INRA (Europe) and GfK Worldwide, carried out the fieldwork for this Eurobarometer, at the request of the European Commission, DG Communication - Public Opinion Analysis Sector. The European Opinion Research Group E.E.I.G. consortium of European market and public opinion research agencies is based at INRA (Europe), Avenue R.Vandendriessche 18, B-1150 Brussels.

1.6 Mode of data collection

In all member states, fieldwork was conducted on the basis of detailed and uniform instructions prepared by the European Opinion Research Group. Interviews were conducted face-to-face in respondents´ homes in the appropriate national language.

Equivalent French and English basic questionnaires were developed for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country. Backtranslation procedures were applied for controlling semantic equivalence.

1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting

procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factor corrects for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country as well as each lower level sample (Great Britain and Northern Ireland, East and West Germany) are represented in proportion to its population size within different groupings, or according to the historical states of European unification (e.g. founder members, new members, Euro zone) in the case of the EUROPEAN WEIGHTS, or for the United Kingdom (WEIGHT SPECIAL UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31) and for Germany as a whole (WEIGHT SPECIAL GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTs adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general all samples which do not belong to the respective group of samples under consideration are excluded from calculation.

The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 3) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

Eurobarometer 56.0 provides four (post-stratification) NATION WEIGHTS: NATION WEIGHT IIa (WEIGHT RESULT FROM TARGET) for separate analysis or comparison of individual samples (countries or regions on sub-national level), NATION WEIGHT I (WEIGHT SPECIAL UNITED KINGDOM) which in addition adjusts the British and the

Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole, NATION WEIGHT III (WEIGHT SPECIAL GERMANY), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. NATION WEIGHT IV (WEIGHT SPECIAL GERMANY & UNITED KINGDOM) combines NATION WEIGHT I and NATION WEIGHT III. All other samples (nations) are included, likewise all post-stratification factors.

The different EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries representing different historical states of European integration (e.g. EURO6 = six founder members). All post-stratification factors are included.

On request of EUROSTAT a second set of weights has been provided by EORG, each equivalent to the corresponding standard weight, but based on a different kind of education figures. The intention was to make descriptive results for questions Q.34 to Q.50 (CULTURAL ACTIVITIES) better comparable to previous EUROSTAT surveys.

For more detailed information on the individual weights please see the corresponding variable description.

1.8 Data preparation

The data received by ZA from EORG/INRA (EUROPE) were checked for missing and duplicate records, for illegal (wild) codes and for consistency of response patterns. Errors discovered by these procedures were corrected or documented. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable documentation was created for this dataset by ZA.

To facilitate analyses of the data, ZA created new variables which consolidate information in the original EORG dataset. Four variables containing condensed information were created by ZA for this Eurobarometer: NATION I, NATION III, NATION IV, and REGION II.

ZA also added "Inappropriate" (Inap.) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the EORG questionnaire was adhered to for (almost) every respondent.

Users should note that EORG has occasionally represented answers to a question by a series of binary "dummy" variables (i.e. variables which take on values of one and zero only) creating separate "dummy" variables to explicitly represent "Don´t know", "No answer" or other residual responses, such as "None of the above". ZA has recoded these residual responses in the case of inconsistencies with respect to the series of substantial answers.

ZA has recoded the missing answers (NA) represented in the INRA data set by blanks (system missing) to standard values.

Question text and contingency text appearing in the variable description is taken from EORG´s English language version of the basic bilingual questionnaire. Coding schemes and other documentation are based on EORG´s English language version of the basic bilingual questionnaire, EORG´s original codebook and EORG´s SPSS data definition statements as received by ZA. Whenever a discrepancy occurs between EORG´s codebook,

questionnaires, SPSS setup and dataset with respect to the coding scheme of a variable, ZA has carried out any correction in agreement with INRA.

If the documentation for country-specific questions or answer categories is provided by EORG in other languages than English, ZA documents the original language wording and supplies the English translation in brackets.

Please see the respective variable documentation (variable notes) for specific remarks on data inconsistencies or processing.

2 Eurobarometer Series Description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens´ Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

Table 2: EU enlargement and countries covered by Standard and Special Eurobarometer

		Norway	*NO*	*1000*	

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 3: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.2OVR, 55.1OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.2OVR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 3).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 4) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 4: Overview of Eurobarometer surveys with standard EU and trend question modules

Standard and trend surveys	Fieldwork Dates	GESIS ID	Standard Report	Special topic	Subset
Eurobarometer 34.0	Oct-Nov 1990	ZA1960	X

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: http://www.gesis.org/eurobarometer

3 Dataset structure and standards

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 5: ZEUS Party Family Code (slightly modified)

Category		Party Family
0	(001-099)	not affiliated / electoral alliances across "families"
1	(100-199)	Communists
2	(200-299)	Socialists
3	(300-399)	Liberals
4	(400-499)	Christian Democrats
5	(500-599)	Conservatives
6	(600-699)	Extreme Rights / Nationalists
7	(700-799)	Regionalists / Ethnic
8	(800-899)	Environmental parties
9	(900-949)	Agricultural parties
9	(950-989)	other special issue parties (e.g. Eurosceptics) and independents
	990	other (spontaneous)
	994	not voting age
	995	empty ballot (blank) or invalid vote
	996	not voted / would not vote
	997	Refused
	998	DK / DK+NA if NA not coded separately
	999	INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION - ALL SAMPLES ISO 3166).

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (-1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded "real" values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission's official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

Header with DIGITAL OBJECT IDENTIFIER (DOI) linked to the Study Description in the GESIS Data Catalogue.

VARIABLE NAME (serial number assigned by the archive) and VARIABLE LABEL as defined in the dataset.

QUESTION NUMBER and full QUESTION TEXT from the basic questionnaire, including interviewer instructions. The numbers or letters that may appear together with the original question number, reflect the item order (multiple item or multiple response questions) or indicate if a question was recoded (R) or summarized (T), or if asked only in a single country (country abbreviation).

CODE VALUES occurring in the data for this variable and complete ANSWER TEXT from the basic questionnaire. Code values may differ from the questionnaire specification due to standardization. Abbreviations commonly used in the code definitions are DK (don't know), NA (not ascertained) and INAP (inappropriate).

DERIVATION information refers to the construction principle of indices or other derived variables (not in the example). NOTE delineates additional explanatory text subsuming trend information (last appearance of the question) or archive remarks on data processing and other issues relevant for the understanding or application of the variable.

CROSS-TABULATION: The absolute frequencies of the occurrence of values (*absolute values*) refer to the number of cases in the weighted dataset as indicated, in this case *weighted by V8*. The relative frequencies (*row percent*) refer to the valid cases (*n valid sum*), i.e. the total number of cases (*n sum*) reduced by the number of cases defined as missing data (*M*). For display and place saving reasons excluded countries or areas may be completely dropped from the table.

FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (*M*), i.e. *percent* on the basis of all cases (*sum*) and *valid percent* on the basis of the *valid cases*.

Eurobarometer 67.1 - February-March 2007

5 Variable Documentation

Variable, Label

Question Text (English Language)

v1 - STUDY NUMBER DISTRIBUTOR

Distributor Archive Study Number

Study Number of the distributing archive.

v1

Value	Label	Missing	Count	Percent	Valid Percent
3625			16200	100.0	100.0
	Sum		16200	100.0	100.0
	Valid Cases		16200		

v2 - STUDY NUMBER PRODUCER

ZA Study Number

Study number of the data set producer.

v2

Value	Label	Missing	Count	Percent	Valid Percent
3625			16200	100.0	100.0
	Sum		16200	100.0	100.0
	Valid Cases		16200		

v3 - EDITION NUMBER

ZA / ICPSR Edition Number

The number identifying the release edition of this data set.

1 1st za edition - January 13, 2006

2 2nd za edition - November 21, 2006

Note:

Please see variable VERSION ("GESIS ARCHIVE VERSION") for further information on the version number of this data set and the corresponding release date.

v3

Value	Label	Missing	Count	Percent	Valid Percent
2	2nd edition - November 21, 2006		16200	100.0	100.0
	Sum		16200	100.0	100.0
	Valid Cases		16200		

version - GESIS ARCHIVE VERSION

VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).
On occasion of the implementation of this versioning scheme (2010-04-13), the default version number 1.0.0 has been created automatically for this Eurobarometer.
Version 1.0.1 adds the crosstabulation variable ISOCNTRY and the VERSION variable to the otherwise unchanged data set.
Former version or edition identification variables are maintained unchanged as a reference to former releases.

version

Value	Label	Missing	Count	Percent	Valid Percent
1.0.1 (2012-03-30)			16200	100.0	100.0
	Sum		16200	100.0	100.0
	Valid Cases		16200		

v4 - EUROBAROMETER NUMBER

ZA / ICPSR Part Number

The number identifying the Eurobarometer sample.

1 Eurobarometer 56.0

v4

Value	Label	Missing	Count	Percent	Valid Percent
1	Eurobarometer 56.0		16200	100.0	100.0
	Sum		16200	100.0	100.0
	Valid Cases		16200		

v5 - ID SERIAL NUMBER

Sequential respondent identification number assigned by ZA

A unique serial number is assigned to each respondent.

isocntry - NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the “historical” East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized “Turkish Republic of Northern Cyprus”.

isocntry

v6 - NATION I (UNITED KINGDOM)

Nation of Interview I

15 EC countries including separate samples for East and West Germany.

1 France
2 Belgium
3 The Netherlands
4 Germany (West)
5 Italy
6 Luxembourg
7 Denmark
8 Ireland
9 United Kingdom
10 Greece
11 Spain
12 Portugal
13 Germany (East)
14 Norway (not included)
15 Finland
16 Sweden
17 Austria

v6

Value	Label	Missing	Count	Percent	Valid Percent
1	France		1002	6.2	6.2
2	Belgium		1031	6.4	6.4
3	The Netherlands		1047	6.5	6.5

	Sum		16200	100.0	100.0
	Valid Cases		16200		

v7 - WEIGHT SPECIAL UNITED KINGDOM

Nation Weight I (WEIGHT SPECIAL UNITED KINGDOM)

This variable adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom and should be used whenever the United Kingdom is to be analyzed as a whole. All national weights are included. This weight should be used with NATION I.

v8 - NATION II (GB AND NORTHERN IRELAND)

Nation of interview II

The two samples for the United Kingdom - Great Britain and Northern Ireland - are coded separately.

1 France
2 Belgium
3 The Netherlands
4 Germany (West)
5 Italy
6 Luxembourg
7 Denmark
8 Ireland
9 Great Britain
10 Northern Ireland
11 Greece
12 Spain
13 Portugal
14 Germany (East)
15 Norway (not included)
16 Finland
17 Sweden
18 Austria

v8

Value	Label	Missing	Count	Percent	Valid Percent
1	France		1002	6.2	6.2
2	Belgium		1031	6.4	6.4
3	The Netherlands		1047	6.5	6.5
4	Germany (West)		1023	6.3	6.3

17	Sweden		1000	6.2	6.2
18	Austria		1093	6.7	6.7
	Sum		16200	100.0	100.0
	Valid Cases		16200		

v9 - WEIGHT RESULT FROM TARGET

Nation Weight IIa (WEIGHT RESULT FROM TARGET)

This variable contains weights that adjust the weighted samples to make them representative for the countries from which they were drawn. It reproduces the real number of cases for each country. Great Britain and Northern Ireland as well as East and West Germany are treated as independent samples. This weight should be used together with NATION II.

Note:
This weight corresponds to "NATION WEIGHT II" in earlier Eurobarometer up to 31.

v10 - NATION III (UNITED GERMANY)

Nation of interview III

East and West Germany are coded together: United Germany.

1 France
2 Belgium
3 The Netherlands
4 Germany (West+East)
5 Italy
6 Luxembourg
7 Denmark
8 Ireland
9 Great Britain
10 Northern Ireland
11 Greece
12 Spain
13 Portugal
14 Norway (not included)
15 Finland
16 Sweden
17 Austria

v10

Value	Label	Missing	Count	Percent	Valid Percent
1	France		1002	6.2	6.2
2	Belgium		1031	6.4	6.4
3	The Netherlands		1047	6.5	6.5
4	Germany (West+East)		2047	12.6	12.6
5	Italy		998	6.2	6.2
6	Luxembourg		609	3.8	3.8
7	Denmark		1001	6.2	6.2
8	Ireland		1002	6.2	6.2
9	Great Britain		1041	6.4	6.4
10	Northern Ireland		305	1.9	1.9
11	Greece		1001	6.2	6.2

13	Portugal		1000	6.2	6.2
15	Finland		1023	6.3	6.3
16	Sweden		1000	6.2	6.2
17	Austria		1093	6.7	6.7
	Sum		16200	100.0	100.0
	Valid Cases		16200		

v11 - WEIGHT SPECIAL GERMANY

Nation Weight III (WEIGHT SPECIAL GERMANY)

This variable adjusts the East and the West German samples to their respective proportions in the united Germany. All national weights are included. This weight should be used whenever the united Germany is to be analyzed as a whole (NATION III).

v12 - NATION IV (UK + UNITED GERMANY)

Nation of interview IV

United Germany (East+West) and United Kingdom

1 France
2 Belgium
3 The Netherlands
4 Germany (West+East)
5 Italy
6 Luxembourg
7 Denmark
8 Ireland
9 United Kingdom
10 Greece
11 Spain
12 Portugal
13 Norway (not included)
14 Finland
15 Sweden
16 Austria

v12

Value	Label	Missing	Count	Percent	Valid Percent
1	France		1002	6.2	6.2
2	Belgium		1031	6.4	6.4
3	The Netherlands		1047	6.5	6.5
4	Germany (West+East)		2047	12.6	12.6
5	Italy		998	6.2	6.2
6	Luxembourg		609	3.8	3.8
7	Denmark		1001	6.2	6.2
8	Ireland		1002	6.2	6.2
9	United Kingdom		1346	8.3	8.3
10	Greece		1001	6.2	6.2
11	Spain		1000	6.2	6.2
12	Portugal		1000	6.2	6.2
14	Finland		1023	6.3	6.3
15	Sweden		1000	6.2	6.2
16	Austria		1093	6.7	6.7
	Sum		16200	100.0	100.0
	Valid Cases		16200		

v13 - WEIGHT SPECIAL GERMANY & UNITED KINGDOM

Nation Weight IV (WEIGHT SPECIAL GERMANY & UNITED KINGDOM)

This variable adjusts the East and the West German samples to their respective proportions in the united Germany, and the British and Northern Irish samples to their respective proportions in the United Kingdom. All national weights are included. This weight should be used whenever both, the united Germany and the United Kingdom, are to be analyzed as a whole (NATION IV).

v14 - WEIGHT EURO 6

European Weight I (WEIGHT EURO 6)

WEIGHT EURO 6 refers to the six EC founder-members (France, Belgium, the Netherlands, West Germany, Italy and Luxembourg).

This variable contains weights that adjust each national sample to its nation's share in the population of the above mentioned countries and should be used whenever these six countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

v15 - WEIGHT EURO 9

European Weight IIa (WEIGHT EURO 9)

WEIGHT EURO 9 adds Denmark, Ireland, Great Britain and Northern Ireland to the EURO 6 countries.

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

v16 - WEIGHT EURO 10

European Weight IIb (WEIGHT EURO 10)

WEIGHT EURO 10 adds Greece to the EURO 9 countries (new member as of January 1981).

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

v17 - WEIGHT EURO 12

European Weight III (WEIGHT EURO 12)

WEIGHT EURO 12 adds Spain and Portugal to the EURO 10 countries (new member as of January 1986).

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

v18 - WEIGHT EURO 12 +

European Weight IV (WEIGHT EURO 12+)

WEIGHT EURO 12+ equals EURO 12 but including East Germany after the unification of Germany on October 3, 1990.

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

v19 - WEIGHT EURO 15

European Weight Va (WEIGHT EURO 15)

WEIGHT EURO 15 adds Austria, Finland and Sweden to the EURO 12+ countries, new members as of January 1995.

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

v20 - WEIGHT EURO + 3

European Weight Vb (WEIGHT EURO +3)

WEIGHT EURO +3 only refers to the three new members as of January 1995: Finland, Sweden and Austria. (All other countries are excluded and weighted by "zero".)

This variable contains weights that adjust each national sample to its nation's share in the total population of these three countries and should be used whenever these three countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

v21 - WEIGHT SPECIAL EURO/NON-EURO (GREECE NON-EURO)

Weight Special Euro/Non-Euro (GREECE NON-EURO)

Starting with Eurobarometer 49 this variable separates the group of 11 countries which accepted to introduce the EURO, as of 01/01/99 (Belgium, Germany, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland). This weight should be used together with the corresponding EURO/NON-EURO SPLIT VARIABLE V469.

This variable contains weights that adjust each national sample to its nation's share in the total population of each group and should be used whenever both groups are to be analyzed for the purpose of comparison. The national weights for each sample are included.

v22 - WEIGHT SPECIAL EURO/NON-EURO (GREECE EURO)

Weight Special Euro/Non-Euro (GREECE EURO)

Starting with Eurobarometer 54.0 this variable includes Greece into the group of EURO countries which accepted to introduce the EURO, as of 01/01/99 (Belgium, Germany, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland). This weight should be used together with the corresponding EURO/NON-EURO SPLIT VARIABLE V470.

This variable contains weights that adjust each national sample to its nation's share in the total population of each group and should be used whenever both groups are to be analyzed for the purpose of comparison. The national weights for each sample are included.

v23 - WEIGHT SPECIAL UNITED KINGDOM - EDUC

WEIGHT SPECIAL UNITED KINGDOM - EDUC

This weighting variable equals "Nation Weight I (WEIGHT SPECIAL UNITED KINGDOM)" but is based on a different kind of education figures.

This additional weighting variable is provided by EORG on behalf of EUROSTAT for questions Q.34 to Q.50 (CULTURAL ACTIVITIES) in order to have a better comparison with previous EUROSTAT surveys.

v24 - WEIGHT RESULT FROM TARGET - EDUC

WEIGHT RESULT FROM TARGET - EDUC

This weighting variable equals "Nation Weight IIa (WEIGHT RESULT FROM TARGET)" but is based on a different kind of education figures.

This additional weighting variable is provided by EORG on behalf of EUROSTAT for questions Q.34 to Q.50 (CULTURAL ACTIVITIES) in order to have a better comparison with previous EUROSTAT surveys.

v25 - WEIGHT SPECIAL GERMANY - EDUC

WEIGHT SPECIAL GERMANY - EDUC

This weighting variable equals "Nation Weight III (WEIGHT SPECIAL GERMANY)" but is based on a different kind of education figures.

This additional weighting variable is provided by EORG on behalf of EUROSTAT for questions Q.34 to Q.50 (CULTURAL ACTIVITIES) in order to have a better comparison with previous EUROSTAT surveys.

v26 - WEIGHT SPECIAL GERMANY & UNITED KINGDOM - EDUC

WEIGHT SPECIAL GERMANY & UNITED KINGDOM - EDUC

This weighting variable equals "Nation Weight IV (WEIGHT SPECIAL GERMANY & UNITED KINGDOM)" but is based on a different kind of education figures.

This additional weighting variable is provided by EORG on behalf of EUROSTAT for questions Q.34 to Q.50 (CULTURAL ACTIVITIES) in order to have a better comparison with previous EUROSTAT surveys.

v27 - WEIGHT EURO 6 - EDUC

WEIGHT EURO 6 - EDUC

This weighting variable equals "European Weight I (WEIGHT EURO 6)" but is based on a different kind of education figures.

This additional weighting variable is provided by EORG on behalf of EUROSTAT for questions Q.34 to Q.50 (CULTURAL ACTIVITIES) in order to have a better comparison with previous EUROSTAT surveys.

v28 - WEIGHT EURO 9 - EDUC

WEIGHT EURO 9 - EDUC

This weighting variable equals "European Weight IIa (WEIGHT EURO 9)" but is based on a different kind of education figures.

This additional weighting variable is provided by EORG on behalf of EUROSTAT for questions Q.34 to Q.50 (CULTURAL ACTIVITIES) in order to have a better comparison with previous EUROSTAT surveys.

v29 - WEIGHT EURO 10 - EDUC

WEIGHT EURO 10 - EDUC

This weighting variable equals "European Weight IIb (WEIGHT EURO 10)" but is based on a different kind of education figures.

This additional weighting variable is provided by EORG on behalf of EUROSTAT for questions Q.34 to Q.50 (CULTURAL ACTIVITIES) in order to have a better comparison with previous EUROSTAT surveys.

v30 - WEIGHT EURO 12 - EDUC

WEIGHT EURO 12 - EDUC

This weighting variable equals "European Weight III (WEIGHT EURO 12)" but is based on a different kind of education figures.

This additional weighting variable is provided by EORG on behalf of EUROSTAT for questions Q.34 to Q.50 (CULTURAL ACTIVITIES) in order to have a better comparison with previous EUROSTAT surveys.

v31 - WEIGHT EURO 12 + - EDUC

WEIGHT EURO 12 + - EDUC

This weighting variable equals "European Weight IV (WEIGHT EURO 12+)" but is based on a different kind of education figures.

This additional weighting variable is provided by EORG on behalf of EUROSTAT for questions Q.34 to Q.50 (CULTURAL ACTIVITIES) in order to have a better comparison with previous EUROSTAT surveys.

v32 - WEIGHT EURO 15 - EDUC

WEIGHT EURO 15 - EDUC

This weighting variable equals "European Weight Va (WEIGHT EURO 15)" but is based on a different kind of education figures.

This additional weighting variable is provided by EORG on behalf of EUROSTAT for questions Q.34 to Q.50 (CULTURAL ACTIVITIES) in order to have a better comparison with previous EUROSTAT surveys.

v33 - WEIGHT EURO + 3 - EDUC

WEIGHT EURO + 3 - EDUC

This weighting variable equals European Weight Vb (WEIGHT EURO +3)" but is based on a different kind of education figures.

This additional weighting variable is provided by EORG on behalf of EUROSTAT for questions Q.34 to Q.50 (CULTURAL ACTIVITIES) in order to have a better comparison with previous EUROSTAT surveys.

v34 - WEIGHT SPECIAL EURO/NON-EURO (GREECE NON-EURO) - EDUC

WEIGHT SPECIAL EURO/NON-EURO (GREECE NON-EURO) - EDUC

This weighting variable equals "Weight Special Euro/Non-Euro (GREECE NON-EURO)" but is based on a different kind of education figures.

This additional weighting variable is provided by EORG on behalf of EUROSTAT for questions Q.34 to Q.50 (CULTURAL ACTIVITIES) in order to have a better comparison with previous EUROSTAT surveys.

v35 - WEIGHT SPECIAL EURO/NON-EURO (GREECE EURO) - EDUC

WEIGHT SPECIAL EURO/NON-EURO (GREECE EURO) - EDUC

This weighting variable equals "Weight Special Euro/Non-Euro (GREECE EURO)" but is based on a different kind of education figures.

This additional weighting variable is provided by EORG on behalf of EUROSTAT for questions Q.34 to Q.50 (CULTURAL ACTIVITIES) in order to have a better comparison with previous EUROSTAT surveys.

v36 - Q1 NATIONALITY BELGIUM

Q.1

What is your nationality? Please tell me the country (or countries) that apply.

v53 - D15B OCCUPATION OF RESPONDENT - LAST JOB

D.15B

IF NOT DOING ANY PAID WORK CURRENTLY - CODES 1 TO 4 IN D.15A

Did you do any paid work in the past ? What was your last occupation?

SELF-EMPLOYED

1 Farmer

2 Fisherman

3 Professional (lawyer, medical practitioner, accountant, architect, ...)

4 Owner of a shop, craftsmen, other self employed person

5 Business proprietors, owner (full or partner) of a company

EMPLOYED

6 Employed professional (employed doctor, lawyer, accountant, architect)

7 General management, director or top management (managing directors, director general, other director)

8 Middle management, other management (department head, junior manager, teacher, technician)

9 Employed position, working mainly at a desk

10 Employed position, not at a desk, but travelling (salesmen, driver, ...)

11 Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, ...)

12 Supervisor

13 Skilled manual worker

14 Other (unskilled) manual worker, servant

15 Never did any paid work

99 Inap. (not coded 1 to 4 in V52)

Filter routing was not consistently applied in the original data set. Some respondents, who did not state the use of a TV (V63) did state the use of cable (V64), satellite (V65) or digital TV (V66). These cases have been recoded to 1 ("Mentioned") in V63. Furthermore please notice that the field questionnaires for Germany and the Netherlands do not indicate any question routing in respect.

v66 - Q4 INFO TECHNOLOGY USE: DIGITAL TV

Q.4
IF AT LEAST ONCE "YES", CODE 1 IN Q.3_A OR Q.3_B OR Q.3_C OR Q.3_D OR Q.3_E OR Q.3_F / IF "USE TV", CODE 1 IN Q.4_4
Which of the following do you use?
(READ OUT - MULTIPLE ANSWERS POSSIBLE)

Q.4_7 Digital TV

0 Not mentioned
1 Mentioned
8 NA
9 Inap. (not coded 1 in V63)

Note:
Last trend modified: EB 55.2, Q.55A

Filter routing was not consistently applied in the original data set. Some respondents, who did not state the use of a TV (V63) did state the use of cable (V64), satellite (V65) or digital TV (V66). These cases have been recoded to 1 ("Mentioned") in V63. Furthermore please notice that the field questionnaires for Germany and the Netherlands do not indicate any question routing in respect.

Approximately how many books in the last 12 months have you read for...
(SHOW CARD WITH SCALE - READ OUT - ONE
ANSWER ONLY)
(READ OUT)

Q.42B_1 Work

1 1-3 books
2 4-7 books
3 8-12 books
4 13 and more
5 DK
9 Inap. (not coded 1 in V270)

Note:
Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v279 - Q42B READ BOOKS FOR OTHER REASONS

Q.42B
IF "HAVE READ BOOKS IN THE LAST 12 MONTHS", CODE 1 TO 4 IN Q.42A, OTHERS GO TO Q.43
Approximately how many books in the last 12 months have you read for...
(SHOW CARD WITH SCALE - READ OUT - ONE
ANSWER ONLY)
(READ OUT)

Q.42B_4 Other reasons

1 1-3 books
2 4-7 books
3 8-12 books
4 13 and more
5 DK
9 Inap. (not coded 1 in V273)

Note:
Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v374 - Q50B TELEVISION SETS IN HH

Q.50B
IF "HAS TELEVISION SET", CODE 1 IN Q.50A
How many television sets do you have at home?
(WRITE DOWN NUMBER - IF "DK", CODE '99')

1 1 television set
2 2
3 3
4 4
5 5
6 6
7 7
8 8
9 9
22 22 television sets
98 DK
99 Inap. (not coded 1 in V353)

Note:
Original code "99" recoded to "98"

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v376 - Q50C ENCYCLOP (PAPER) IN HH

Q.50C
IF "HAS ENCYCLOPAEDIA (PAPER)", CODE 16 IN Q.50A
How many encyclopaedia (paper) do you have at home?
(WRITE DOWN NUMBER - IF "DK", CODE '99')

1 1 encyclopaedia (paper)
60 60 encyclopaedias (paper)
98 DK
99 Inap. (not coded 1 in V368)

Note:
Original code "99" recoded to "98"

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v385 - D8 AGE EDUCATION

D.8
How old were you when you stopped full-time education?
(IF STILL STUDYING : CODE 00 - GO TO D.10)

0 NA (see note)
6 6 years
39 39 years
98 Still studying (see note)

Note:
Original code "00" redoded to "98"

For 5 respondents the indicated age "When stopped full-time education" was too high for their actual age (D.11/V388). These cases were recoded to "0" (NA).

87 missing cases which are coded "2" (Student) in D.15A/V52 have been recoded to "98" (Still studying).

Last trend: EB55.2, D.8

v386 - D8 AGE EDUCATION - RECODED

D.8R Age when finished full-time education - RECODED

0 NA (see note)
1 Up to 14 years
2 15 years
3 16 years
4 17 years
5 18 years
6 19 years
7 20 years
8 21 years
9 22 years and older
10 Still studying (see note)

Note:
See D.8 for complete question text

For 5 respondents the indicated age "When stopped full-time education" was too high for their actual age (D.11/V388). These cases were recoded to "0" (NA).

87 missing cases which are coded "2" (Student) in D15A/V52 have been recoded to "10" (Still studying).

v388 - D11 AGE EXACT

D.11
How old are you?

0 NA (GB: including age of 99)
15 15 years
99 99 years

Note:
7 cases for Great Britain indicate an age of 99. They were considered outliers and for plausibility considerations recoded to NA (code 0).

Actual number is coded

Last trend: EB 55.2, D.11

v389 - D11 AGE RECODED - FOUR GROUPS

D.11R1 R'S age - four collapsed categories

0 NA (GB: including age of 99)
1 15 - 24 years
2 25 - 39 years
3 40 - 54 years
4 55 years and older

Derivation:
This variable collapses answers to D.11 into four categories.

Note:
7 cases for Great Britain indicate an age of 99. They were considered outliers and for plausibility considerations recoded to NA (code 0).

See D.11 for complete question text

v393 - D21B OCCUPATION OF HEAD OF HH - LAST JOB

D.21B
IF CODE 2 IN D.19 / IF NOT DOING ANY PAID WORK CURRENTLY - CODE 1 TO 4 IN D.21A
Did she/he do any paid work in the past? What was her/his last occupation?

SELF-EMPLOYED
1 Farmer
2 Fisherman
3 Professional (lawyer, medical practitioner, accountant, architect, ...)
4 Owner of a shop, craftsmen, other self employed person
5 Business proprietors, owner (full or partner) of a company

EMPLOYED
6 Employed professional (employed doctor, lawyer, accountant, architect)
7 General management, director or top management (managing directors, director general, other director)
8 Middle management, other management (department head, junior manager, teacher, technician)
9 Employed position, working mainly at a desk
10 Employed position, not at a desk, but travelling (salesmen, driver, ...)
11 Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, ...)
12 Supervisor
13 Skilled manual worker
14 Other (unskilled) manual worker, servant

15 Never did any paid work
99 Inap. (not coded 1 to 4 in V392)

Note:

v395 - D29 INCOME HH - FRANCE

D.29

We also need some information about the income of this household to be able to analyse the survey results for different types of households. Here is a list of income groups.

(SHOW CARD)

Please count the total wages and salaries per month of all members of this household; all pensions and all social insurance benefits; child allowances and any other income like rents, etc... Of course, your answer as all other replies in this interview will be treated confidentially and referring back to you or your household will be impossible. Please give me the letter of the income group your household falls into before tax and other deductions.

Note:

This variable integrates all countries in accordance with other Eurobarometer codebooks up to survey 48.

Weighting required for united Germany (East+West) - see V11

Weighting required for United Kingdom (Great Britain and Northern Ireland) - see V7

Last trend: EB 55.2, D.29

v413 - D29 INCOME HH QUARTILES

D.29R HOUSEHOLD INCOME (HARMONISED)

1 -- (Lowest income quartile)
2 - (Next to lowest income quartile)
3 + (Next to highest income quartile)
4 ++ (Highest income quartile)
5 DK/Refusal

Derivation:
This variable collapses answers to D.29 into four groups representing approximate quartiles.

Note:
See D.29 for complete question text

Please notice that the income quartiles are produced for comparison purposes and are retained as provided by the principal investigator. They are based on categorised income question as coded in the country specific variables V395 to V411.

143 Leipzig
151 Dessau
152 Halle
153 Magdeburg
160 Thüringen

999 Inap. (not coded 4 or 14 in V8)

Note:
Starting with Eurobarometer 44.2bis the Eurobarometer are considering the new East German regional units as resulting from the regional reforms 1992-94. The new regional units on NUTS II level (Regierungsbezirke) for Sachsen-Anhalt are Dessau, Halle and Magdeburg; the new units for Sachsen (Chemnitz, Dresden, Leipzig) are only considered starting with Eurobarometer 48. REGION I categories used in former surveys up to number 44.1 are based on ex-GDR administrative units (Bezirke) and are not comparable to the new categories even if identical names are used. The almost unchanged NUTS I unit (Bundesland) Sachsen-Anhalt in Eurobarometer Region II for example was formerly only composed of Halle and Magdeburg. PLEASE NOTICE that EAST GERMAN regional units (Brandenburg, Mecklenburg-Vorpommern and Thüringen) on NUTS II level have not been supplied for EUROBAROMETER 56.0.

Weighting required for united Germany (East+West) - see V11

v457 - P7 REGION II - UNITED KINGDOM

P.7R_GB Region II

United Kingdom (EUROSTAT NUTS I LEVEL - modified) - Standard Regions

1 Scotland
2 North, Yorks, Humberside and North West
3 East and West Midlands, East Anglia
4 Wales
5 South East
6 South West
7 Northern Ireland
99 Inap. (not coded 9 or 10 in V8)

Note:
Please notice erroneous coding for basic British regions in V444 and accordingly in derived variable V457. At least GREATER LONDON (16) and KENT (18) seem to be exchanged. Data have been corrected by the Archive. This variable should only be used with caution.

Weighting required for United Kingdom (Great Britain and Northern Ireland) - see V7

v467 - C4 SOCIO PROFESSIONAL STATUS

C.4 SOCIO PROFESSIONAL STATUS

0 Other answers (never any paid work, NA)
1 Farmer & fisher
2 Professionals
3 Owner of a shop, craftsmen, other self employed position
4 Business proprietors, owner of a company
5 Employed professional
6 General management
7 Middle management
8 Employed position, working mainly at a desk
9 Employed position, not at a desk but travelling
10 Employed position, not at a desk but in a service job
11 Supervisors
12 Skilled manual workers
13 Other (unskilled) manual worker

Derivation:
Roughly half of the representative sample of the European Community public was without paid work. Basing cross-analyses on "occupation" (D.15A) would exclude half of the respondents from analysis. An alternative is to base analyses on (non-marxist) concept of "objective social class" using "occupation of the head of household" as reference. In order to classify as many respondents as possible with respect to their socio-professional setting, a new classification was created called "socio-professional status" of the main income earner (MIE) ("Yes" in D.19). The following standard was used if the respondent is the MIE: For those in paid work it is based on the respondents' own present occupation (D.15A). For those not in paid work, "former occupation" (D.15B) was used, if applicable. If the respondent is not the MIE, the occupation of the "person who contributes most to the household income" (D.21A) was used and if the head of household was not performing paid works at the time of the interview, his or her "former occupation" (D.21B) was used, if applicable.

Consequently, socio-professional status is a classification "that comes as close to the respondent himself/herself as possible" but that draws upon additional background information to the extent necessary and available, in order to avoid a single measure of interviewees' socio-professional setting and to include the maximum number of respondents in the respective analyses. See also standard report EUROBAROMETER 48, March 1998, Brussels, C.5.

v471 - ORIGINAL RESPONDENT ID

Original Respondent Identification Number

This is the original respondent identification number as supplied by INRA. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 03: West Germany; 04: Greece; 05: Italy; 06: Spain; 07: France; 08: Ireland; 09: Northern Ireland; 10: Luxembourg; 11: Netherlands; 12: Portugal; 13: Great Britain; 14: East Germany; 16: Finland; 17: Sweden; 18: Austria). The remaining four digits contain the country-specific questionnaire numbers.

Note:
Actual number is coded
