## Acknowledgements

---

Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences.

## Introduction and preliminary remarks

---

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

### Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (<http://zacat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

### Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

### Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

## 1.2 Content

### 1.2.1 Abstract

This round of Eurobarometer surveys diverged from standard trend questions and queried respondents on (1) media exposure and information behavior, (2) European Union (EU) enlargement and its expected effects, and (3) support for European integration and decision-making in the EU. For the first topic, media exposure, respondents from each EU member country were asked to identify the specific types of media they accessed regularly (among a variety of television channels, daily and weekly newspapers, magazines, and radio stations) and the types of television programs they watched most frequently. In regard to information behavior, respondents were asked to identify what sources of media they used to obtain information about the EU, as well as which topics they preferred to find out about through television or daily newspapers. The survey also queried respondents about their opinion of how informatively, objectively, or favorably television or daily newspapers presented news about the EU. In addition, respondents were asked about the extent of their interest in certain topics and their desire to obtain more information. Such topics include issues pertaining to the EU, facts about EU candidate countries, the opinions of people residing in other EU countries, and the contents of the respondent's national constitution and the treaties of the EU. Respondents were also polled about their knowledge and use of information services provided by the EU, their satisfaction with information received from these types of services, and how they preferred to communicate suggestions to the EU. For respondents who use the Internet, the survey asked them to identify their Internet access location, how often and why they visit the EU Web site (Europa), and topics they would like to find on the Internet, while all respondents were asked whether they would communicate with EU decision-makers online. For the second topic, EU enlargement and its expected effects, the survey polled respondents about their knowledge of EU candidate countries, whether they had visited or plan on visiting these countries, and with which countries they have connections. Respondents were asked about their views regarding how well-informed they felt about EU enlargement, which member countries would benefit from enlargement, criteria for membership, the positive and negative effects of the inclusion of new countries and the immigration of citizens, satisfaction with life in the future, and their participation in political debate about enlargement. For the final topic, support for European integration and decision-making in the EU, respondents were asked to identify the two most positive and negative aspects of the EU, as well as evaluate their favor towards the EU, the EU's priorities and effectiveness as a government, and the influence individuals, groups, and EU member nations have upon decision-making within the EU. In addition, the survey polled respondents about their attachment towards their community, region, country and the EU, and whether an advantage or disadvantage exists for their country, as an EU member, in defending its own interests. The survey also asked respondents other questions, including whether they support or oppose particular EU proposals or policies, whether politicians should express their views more often through the media, and to identify a responsible communications representative for the EU. Demographic and other background information includes respondent age, gender, nationality, marital status, left-right political self-placement, age when stopped full-time education, voting preferences for a "General Election" and referendum on the euro, household income, occupation, type and size of community, region of residence, and language of interview.

### 1.2.2 Topic classification

- International Institutions, Relations
- Communication, Public Opinion

### 1.2.3 Related publications

- EUROBAROMETER 56.3 "SPECIAL BUREAUX" (2002). Getting information on Europe, the enlargement of the E.U. & support for European integration: European public opinion takes the floor. Survey carried out by: THE EUROPEAN OPINION RESEARCH GROUP (EORG). For: THE EUROPEAN COMMISSION, DIRECTORATE-GENERAL PRESS AND COMMUNICATION, UNIT «OPINION POLLS». Brussels 2002.

## 1.3 Universe

In all, Eurobarometer 56.3 interviewed 16.038 citizens of the 15 countries in the European Union (nationals and non-nationals but EU-citizens). Respondents were aged 15 and over. Separate samples were drawn for Northern Ireland and East Germany.

## 1.4 Sampling procedure

A multi-stage sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regions in every country (i.e., Statistical Office of the European Community, EUROSTAT regions). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of addresses was selected from each sampled PSU. Addresses were chosen systematically using standard random route procedures, beginning with an initial address selected at random. In each household, a respondent was selected, by a random procedure. Up to three recalls were made to obtain an interview with the selected respondent. No more than one interview was conducted in each household.

The regular sample size (in the sense of completed interviews) is 1000 respondents per country, except the United Kingdom with separate samples for Great Britain (1000) and Northern Ireland (300), Luxembourg (600) and Germany with separate samples for the Eastern and the Western part (1000 each). The effective number of realized interviews in this round is indicated in table 1.

## 1.5 Fieldwork

From January 22 to February 28, 2002, the European Opinion Research Group, a consortium made out of INRA (Europe) and GfK Worldwide, carried out the fieldwork for this Eurobarometer, at the request of the European Commission, DG Communication – Public Opinion Analysis Sector. [http://europa.eu.int/comm/public\\_opinion/index\\_en.htm](http://europa.eu.int/comm/public_opinion/index_en.htm) The European Opinion Research Group E.E.I.G. consortium of European market and public opinion research agencies is based at INRA (Europe), Avenue R.Vandendriessche 18, B-1150 Brussels.

## 1.6 Mode of data collection

In all member states, fieldwork was conducted on the basis of detailed and uniform instructions prepared by the European Opinion Research Group. Interviews were conducted face-to-face in respondents' homes in the appropriate national language.

Equivalent French and English basic questionnaires were developed for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country. Backtranslation procedures were applied for controlling semantic equivalence.

## 1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factor corrects for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country as well as each lower level sample (Great Britain and Northern Ireland, East and West Germany) are represented in proportion to its population size within different groupings, or according to the historical states of European unification (e.g. founder members, new members, Euro zone) in the case of the EUROPEAN WEIGHTS, or for the United Kingdom (WEIGHT SPECIAL UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31) and for Germany as a whole (WEIGHT SPECIAL GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general all samples which do not belong to the respective group of samples under consideration are excluded from

calculation.

The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 4) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

**Eurobarometer 56.3** provides four (post-stratification) NATION WEIGHTS: NATION WEIGHT IIa (WEIGHT RESULT FROM TARGET) for separate analysis or comparison of individual samples (countries or regions on sub-national level), NATION WEIGHT I (WEIGHT SPECIAL UNITED KINGDOM) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole, NATION WEIGHT III (WEIGHT SPECIAL GERMANY), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. NATION WEIGHT IV (WEIGHT SPECIAL GERMANY & UNITED KINGDOM) combines NATION WEIGHT I and NATION WEIGHT III. All other samples (nations) are included, likewise all post-stratification factors.

The different EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries representing different historical states of European integration (e.g. EURO6 = six founder members). All post-stratification factors are included.

For more detailed information on the individual weights please see the corresponding variable description.

## 1.8 Data preparation

The data received by ZA from EORG/INRA (EUROPE) were checked for missing and duplicate records, for illegal (wild) codes and for consistency of response patterns. Errors discovered by these procedures were corrected or documented. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable documentation was created for this dataset by ZA.

To facilitate analyses of the data, ZA created new variables which consolidate information in the original EORG dataset. Four variables containing condensed information were created by ZA for this Eurobarometer: NATION I, NATION III, NATION IV, and REGION II.

ZA also added "Inappropriate" (Inap.) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the EORG questionnaire was adhered to for (almost) every respondent.

Users should note that EORG has occasionally represented answers to a question by a series of binary "dummy" variables (i.e. variables which take on values of one and zero only) creating separate "dummy" variables to explicitly represent "Don't know", "No answer" or other residual responses, such as "None of the above". ZA has recoded these residual responses in the case of inconsistencies with respect to the series of substantial answers.

ZA has recoded the missing answers (NA) represented in the INRA data set by blanks (system missing) to standard values.

Question text and contingency text appearing in the variable description is taken from EORG's English language version of the basic bilingual questionnaire. Coding schemes and other documentation are based on EORG's English language version of the basic bilingual questionnaire, EORG's original codebook and EORG's SPSS data definition statements as received by ZA. Whenever a discrepancy occurs between EORG's codebook, questionnaires, SPSS setup and dataset with respect to the coding scheme of a variable, ZA has carried out any correction in agreement with INRA.

If the documentation for country-specific questions or answer categories is provided by EORG in other languages than English, ZA documents the original language wording and supplies the English translation in brackets.

Please see the respective variable documentation (variable notes) for specific remarks on data inconsistencies or processing.

## 2 Eurobarometer Series Description

---

### 2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

### 2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

### 2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

### 2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

		<i>Norway</i>	<i>NO</i>	<i>1000</i>	

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 3: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.20VR, 55.10VR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.30VR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.20VR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

## 2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 3).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 4) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 4: Overview of Eurobarometer surveys with standard EU and trend question modules

Standard and trend surveys	Fieldwork Dates	GESIS ID	Standard Report	Special topic	Subset
Eurobarometer 34.0	Oct-Nov 1990	ZA1960	X

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

## 3 Dataset structure and standards

---

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

### 3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

### 3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

#### 3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 6: ZEUS Party Family Code (slightly modified)

Category		Party Family
0	(001-099)	not affiliated / electoral alliances across "families"
1	(100-199)	Communists
2	(200-299)	Socialists
3	(300-399)	Liberals
4	(400-499)	Christian Democrats
5	(500-599)	Conservatives
6	(600-699)	Extreme Rights / Nationalists
7	(700-799)	Regionalists / Ethnic
8	(800-899)	Environmental parties
9	(900-949)	Agricultural parties
9	(950-989)	other special issue parties (e.g. Eurosceptics) and independents
	990	other (spontaneous)
	994	not voting age
	995	empty ballot (blank) or invalid vote
	996	not voted / would not vote
	997	Refused
	998	DK / DK+NA if NA not coded separately
	999	INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable

description. Due to general changes in party systems and to the ideological development of individual political parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

### 3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

### 3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

## 4 Explanation of the variable documentation

---

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION - ALL SAMPLES ISO 3166).

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (-1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded "real" values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission's official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

CROSS-TABULATION: The absolute frequencies of the occurrence of values ( <i>absolute values</i> ) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies ( <i>row percent</i> ) refer to the valid cases ( <i>n valid sum</i> ), i.e. the total number of cases ( <i>n sum</i> ) reduced by the number of cases defined as missing data ( <i>M</i> ). For display and place saving reasons excluded countries or areas may be completely dropped from the table.																																																																																																																																																																																																																																																																																																																																																					
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data ( <i>M</i> ), i.e. <i>percent</i> on the basis of all cases ( <i>sum</i> ) and <i>valid percent</i> on the basis of the <i>valid cases</i> .																																																																																																																																																																																																																																																																																																																																																					

## **5 Variable Documentation**

**Variable, Label**

**Question Text (English Language)**

**v1 - STUDY NUMBER DISTRIBUTOR**

Distributor Archive Study Number

Study Number of the distributing archive.

v1

Value	Label	Missing	Count	Percent	Valid Percent
3635			16038	100.0	100.0
	Sum		16038	100.0	100.0
	Valid Cases		16038		

v2 - STUDY NUMBER PRODUCER

ZA Study Number

Study number of the data set producer.

v2

Value	Label	Missing	Count	Percent	Valid Percent
3635			16038	100.0	100.0
	Sum		16038	100.0	100.0
	Valid Cases		16038		

v3 - EDITION NUMBER

ZA / ICPSR Edition Number

The number identifying the release edition of this data set.

- 1 1st za edition as of Feb 24, 2006
- 2 2nd za edition as of March 07, 2007

Note:

Please see variable VERSION ("GESIS ARCHIVE VERSION") for further information on the version number of this data set and the corresponding release date.

v3

Value	Label	Missing	Count	Percent	Valid Percent
2	2nd za edition as of Mar 07, 2007		16038	100.0	100.0
	Sum		16038	100.0	100.0
	Valid Cases		16038		

version - GESIS ARCHIVE VERSION

VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

On occasion of the implementation of this versioning scheme (2010-04-13), the default version number 1.0.0 has been created automatically for this Eurobarometer.

Version 1.0.1 adds the crosstabulation variable ISOCNTRY and the VERSION variable to the otherwise unchanged data set. Former version or edition identification variables are maintained unchanged as a reference to former releases.

version

Value	Label	Missing	Count	Percent	Valid Percent
1.0.1 (2012-03-30)			16038	100.0	100.0
	Sum		16038	100.0	100.0
	Valid Cases		16038		

v4 - EUROBAROMETER NUMBER

ZA / ICPSR Part Number

The number identifying the Eurobarometer sample.

1 Eurobarometer 56.3

v4

Value	Label	Missing	Count	Percent	Valid Percent
1	Eurobarometer 56.3		16038	100.0	100.0
	Sum		16038	100.0	100.0
	Valid Cases		16038		

v5 - ID SERIAL NUMBER

Sequential respondent identification number assigned by ZA

A unique serial number is assigned to each respondent.

isocntry - NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

v6 - NATION I (UNITED KINGDOM)

Nation of Interview I

15 EC countries including separate samples for East and West Germany.

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany (West)
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 United Kingdom
- 10 Greece
- 11 Spain
- 12 Portugal
- 13 Germany (East)
- 14 Norway (not included)
- 15 Finland
- 16 Sweden
- 17 Austria

v6

Value	Label	Missing	Count	Percent	Valid Percent
1	France		1007	6.3	6.3

	Sum		16038	100.0	100.0
	Valid Cases		16038		

v7 - WEIGHT SPECIAL UNITED KINGDOM

Nation Weight I (WEIGHT SPECIAL UNITED KINGDOM)

This variable adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom and should be used whenever the United Kingdom is to be analyzed as a whole. All national weights are included. This weight should be used with NATION I.

v8 - NATION II (GB AND NORTHERN IRELAND)

Nation of interview II

The two samples for the United Kingdom - Great Britain and Northern Ireland - are coded separately.

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany (West)
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 Germany (East)
- 15 Norway (not included)
- 16 Finland
- 17 Sweden
- 18 Austria

v8

Value	Label	Missing	Count	Percent	Valid Percent
1	France		1007	6.3	6.3
2	Belgium		1043	6.5	6.5
3	The Netherlands		1000	6.2	6.2
4	Germany (West)		1000	6.2	6.2
5	Italy		1001	6.2	6.2
6	Luxembourg		592	3.7	3.7
7	Denmark		1000	6.2	6.2
8	Ireland		1007	6.3	6.3
9	Great Britain		981	6.1	6.1
10	Northern Ireland		306	1.9	1.9
11	Greece		1004	6.3	6.3
12	Spain		1000	6.2	6.2
13	Portugal		1001	6.2	6.2
14	Germany (East)		1008	6.3	6.3
16	Finland		1053	6.6	6.6
17	Sweden		1000	6.2	6.2
18	Austria		1035	6.5	6.5
	Sum		16038	100.0	100.0
	Valid Cases		16038		

v9 - WEIGHT RESULT FROM TARGET

Nation Weight IIa (WEIGHT RESULT FROM TARGET)

This variable contains weights that adjust the weighted samples to make them representative for the countries from which they were drawn. It reproduces the real number of cases for each country. Great Britain and Northern Ireland as well as East and West Germany are treated as independent samples. This weight should be used together with NATION II.

Note:

This weight corresponds to "NATION WEIGHT II" in earlier Eurobarometer up to 31.

v10 - NATION III (UNITED GERMANY)

Nation of interview III

East and West Germany are coded together: United Germany.

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany (West+East)
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 Norway (not included)
- 15 Finland
- 16 Sweden
- 17 Austria

v10

Value	Label	Missing	Count	Percent	Valid Percent
1	France		1007	6.3	6.3
2	Belgium		1043	6.5	6.5
3	The Netherlands		1000	6.2	6.2
4	Germany (West+East)		2008	12.5	12.5
5	Italy		1001	6.2	6.2
6	Luxembourg		592	3.7	3.7
7	Denmark		1000	6.2	6.2
8	Ireland		1007	6.3	6.3
9	Great Britain		981	6.1	6.1
10	Northern Ireland		306	1.9	1.9
11	Greece		1004	6.3	6.3
12	Spain		1000	6.2	6.2
13	Portugal		1001	6.2	6.2
15	Finland		1053	6.6	6.6
16	Sweden		1000	6.2	6.2
17	Austria		1035	6.5	6.5
	Sum		16038	100.0	100.0
	Valid Cases		16038		

v11 - WEIGHT SPECIAL GERMANY

Nation Weight III (WEIGHT SPECIAL GERMANY)

This variable adjusts the East and the West German samples to their respective proportions in the united Germany. All national weights are included. This weight should be used whenever the united Germany is to be analyzed as a whole (NATION III).

v12 - NATION IV (UK + UNITED GERMANY)

Nation of interview IV

United Germany (East+West) and United Kingdom

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany (West+East)
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 United Kingdom
- 10 Greece
- 11 Spain
- 12 Portugal
- 13 Norway (not included)
- 14 Finland
- 15 Sweden
- 16 Austria

v12

Value	Label	Missing	Count	Percent	Valid Percent
1	France		1007	6.3	6.3
2	Belgium		1043	6.5	6.5

v13 - WEIGHT SPECIAL GERMANY & UNITED KINGDOM

Nation Weight IV (WEIGHT SPECIAL GERMANY & UNITED KINGDOM)

This variable adjusts the East and the West German samples to their respective proportions in the united Germany, and the British and Northern Irish samples to their respective proportions in the United Kingdom. All national weights are included. This weight should be used whenever both, the united Germany and the United Kingdom, are to be analyzed as a whole (NATION IV).

v14 - WEIGHT EURO 6

European Weight I (WEIGHT EURO 6)

WEIGHT EURO 6 refers to the six EC founder-members (France, Belgium, the Netherlands, West Germany, Italy and Luxembourg).

This variable contains weights that adjust each national sample to its nation's share in the population of the above mentioned countries and should be used whenever these six countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

#### v15 - WEIGHT EURO 9

European Weight IIa (WEIGHT EURO 9)

WEIGHT EURO 9 adds Denmark, Ireland, Great Britain and Northern Ireland to the EURO 6 countries.

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

v16 - WEIGHT EURO 10

European Weight IIb (WEIGHT EURO 10)

WEIGHT EURO 10 adds Greece to the EURO 9 countries (new member as of January 1981).

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

v17 - WEIGHT EURO 12

European Weight III (WEIGHT EURO 12)

WEIGHT EURO 12 adds Spain and Portugal to the EURO 10 countries (new member as of January 1986).

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

v18 - WEIGHT EURO 12 +

European Weight IV (WEIGHT EURO 12+)

WEIGHT EURO 12+ equals EURO 12 but including East Germany after the unification of Germany on October 3, 1990.

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

v19 - WEIGHT EURO 15

European Weight Va (WEIGHT EURO 15)

WEIGHT EURO 15 adds Austria, Finland and Sweden to the EURO 12+ countries, new members as of January 1995.

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

v20 - WEIGHT EURO + 3

European Weight Vb (WEIGHT EURO +3)

WEIGHT EURO +3 only refers to the three new members as of January 1995: Finland, Sweden and Austria. (All other countries are excluded and weighted by "zero".)

This variable contains weights that adjust each national sample to its nation's share in the total population of these three countries and should be used whenever these three countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

v21 - WEIGHT SPECIAL EURO/NON-EURO (GREECE NON-EURO)

Weight Special Euro/Non-Euro (GREECE NON-EURO)

Starting with Eurobarometer 49 this variable separates the group of 11 countries which accepted to introduce the EURO, as of 01/01/99 (Belgium, Germany, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland). This weight should be used together with the corresponding EURO/NON-EURO SPLIT VARIABLE V1955.

This variable contains weights that adjust each national sample to its nation's share in the total population of each group and should be used whenever both groups are to be analyzed for the purpose of comparison. The national weights for each sample are included.

v22 - WEIGHT SPECIAL EURO/NON-EURO (GREECE EURO)

Weight Special Euro/Non-Euro (GREECE EURO)

Starting with Eurobarometer 54.0 this variable includes Greece into the group of EURO countries which accepted to introduce the EURO, as of 01/01/99 (Belgium, Germany, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland). This weight should be used together with the corresponding EURO/NON-EURO SPLIT VARIABLE V1956.

This variable contains weights that adjust each national sample to its nation's share in the total population of each group and should be used whenever both groups are to be analyzed for the purpose of comparison. The national weights for each sample are included.

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix.

As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

## v1005 - Q2F TV PROGR WATCH: FILMS/MOVIES

## Q.2F

IF "WATCH TELEVISION ON A REGULAR BASIS", CODE 1 TO 12 IN Q.2A

What types of television programmes do you watch most frequently?

(SHOW CARD - READ OUT - MULTIPLE ANSWERS POSSIBLE)

## Q.2F\_5 Films/movies

0 Not mentioned

1 Mentioned

9 Inap. (NONE, DK or NA in Q2A)

## Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix.

As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v1013 - Q3A EU MOST POSITIVE - FIRST

Q.3A\_1

ASK ALL

In your opinion, what are the two most positive aspects of the European Union today?

(PLEASE NOTE DOWN VERBATIM, CODING AT THE OFFICE - PROMPT TO HAVE A SECOND ASPECT)

(FIRST MENTION)

- 1 One single currency, the euro, no exchange needed, easier payments
- 2 Free movement of people for travelling
- 3 Free movement of people for working/studying
- 4 A stronger, united Europe, many countries, all countries involved
- 5 Legal, fiscal/tax and social harmonisation
- 6 More say for the European Union at the international level
- 7 More cooperation, better communication between Member States
- 8 Life is cheaper, better prices
- 9 More European Union funds allocated to our country
- 10 More security and stability in Europe, peace
- 11 Common fight against terrorism, crime, drug trafficking
- 12 Economic growth/stronger economy, free market, easier to trade, development of tourism
- 13 More possibilities for employment, more jobs, easier to find work in the European Union
- 14 Diversity/ inter-cultural exchange
- 15 Better protection of the environment
- 16 Enlargement to include new countries
- 17 I'm not interested in Europe (SPONTANEOUS)
- 18 Other (SPONTANEOUS)
- 19 No positive aspects (SPONTANEOUS)
- 20 DK

Note:

Some cases coded "DK" for the first most positive aspect, are coded with a substantial answer for the second aspect (55 cases).

v1014 - Q3A EU MOST POSITIVE - SECOND

Q.3A\_2

In your opinion, what are the two most positive aspects of the European Union today?

(PLEASE NOTE DOWN VERBATIM, CODING AT THE OFFICE - PROMPT TO HAVE A SECOND ASPECT)

(SECOND MENTION)

- 1 One single currency, the euro, no exchange needed, easier payments
- 2 Free movement of people for travelling
- 3 Free movement of people for working/studying
- 4 A stronger, united Europe, many countries, all countries involved
- 5 Legal, fiscal/tax and social harmonisation
- 6 More say for the European Union at the international level
- 7 More cooperation, better communication between Member States
- 8 Life is cheaper, better prices
- 9 More European Union funds allocated to our country
- 10 More security and stability in Europe, peace
- 11 Common fight against terrorism, crime, drug trafficking
- 12 Economic growth/stronger economy, free market, easier to trade, development of tourism
- 13 More possibilities for employment, more jobs, easier to find work in the European Union
- 14 Diversity/ inter-cultural exchange
- 15 Better protection of the environment
- 16 Enlargement to include new countries
- 17 I'm not interested in Europe (SPONTANEOUS)
- 18 Other (SPONTANEOUS)
- 19 No positive aspects (SPONTANEOUS)
- 20 DK

Note:

Some cases coded "DK" for the first most positive aspect, are coded with a substantial answer for the second aspect (55 cases).

v1035 - Q3B EU MOST NEGATIVE - FIRST

Q.3B\_1

And what are the two most negative aspects of the European Union today?

(PLEASE NOTE DOWN VERBATIM, CODING AT THE OFFICE - PROMPT TO HAVE A SECOND ASPECT)

(FIRST MENTION)

- 1 End of national currency
- 2 Loss of independent decision-making for our country
- 3 Lack of citizens' involvement
- 4 Slower decision-making, too much bureaucracy, remote decision-making centre (Brussels., too much centralisation, minor authority)
- 5 Lack of transparency of European Union institutions, lack of democratic controls
- 6 European Union rules and regulations not in accordance with our country's interest
- 7 Domination of bigger countries
- 8 Loss of national identity
- 9 Too many differences between countries, quarrels, increased tension between member states, too many states/member states
- 10 Our country is subsidising poorer countries
- 11 Rising prices, risk of inflation
- 12 Higher taxes
- 13 Weakening economy, increased competition
- 14 Contributing to globalisation, delocalisation of companies
- 15 More unemployment, less jobs for (NATIONALITY)
- 16 Increasing racism, facism
- 17 More foreigners, more illegal immigrants, more asylum seekers, black market workers
- 18 Increasing crime, insecurity, drug trafficking and abuse, etc.
- 19 Enlargement to include new countries
- 20 Less European Union funds for our country
- 21 Decreasing social rights, increasing poverty and inequality between people
- 22 Lack of legal, fiscal/tax and social harmonisation
- 23 Lower health standards
- 24 Lack of common security and defence policy
- 25 Issue of diversity of languages, lack of common European language
- 26 High costs for payments of officials buildings and other administrative costs
- 27 European Union will become like USA, a super state, too large and powerful and we must avoid this
- 28 Too much support given to certain industries (e.g. agriculture, fishery, tobacco industry)
- 29 Difficulties with euro, euro is complicated
- 30 Less border controls
- 31 A few countries are not 100% European in everything
- 32 Better off without it
- 33 Agricultural policy (in general)
- 34 No negative aspects (SPONTANEOUS)
- 35 Other (SPONTANEOUS)
- 36 DK

## Note:

Some cases coded "DK" for the first most negative aspect, are coded with a substantial answer for the second aspect (210 cases).

v1073 - Q4A EU INFO NEWSP LIKE: HISTORY

Q.4A

IF "READ DAILY NEWSPAPERS ON A REGULAR BASIS", CODE 1 TO 12 IN Q.2B

What kind of information would you like to find about the European Union in the daily newspaper(s) you read?

Information about...

(SHOW CARD - MULTIPLE ANSWERS POSSIBLE)

(READ OUT)

Q.4A\_1 The history of the European Union

0 Not mentioned

1 Mentioned

9 Inap. (NONE, DK or NA in Q2B)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v1079 - Q4A EU INFO NEWSP LIKE: HOW TO FIND

Q.4A

IF "READ DAILY NEWSPAPERS ON A REGULAR BASIS", CODE 1 TO 12 IN Q.2B

What kind of information would you like to find about the European Union in the daily newspaper(s) you read?

Information about...

(SHOW CARD - MULTIPLE ANSWERS POSSIBLE)

(READ OUT)

Q.4A\_7 How to find out more about the European Union

0 Not mentioned

1 Mentioned

9 Inap. (NONE, DK or NA in Q2B)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Q.4B\_6 Other European Union policies

0 Not mentioned

1 Mentioned

9 Inap. (NONE, DK or NA in Q2B)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Q.4C\_5 Enlargement of the European Union to include new countries

0 Not mentioned

1 Mentioned

9 Inap. (NONE, DK or NA in Q2A)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

9 Inap. (NONE, DK or NA in Q2A)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Q.6

DO NOT ASK THOSE WHO ANSWERED "NEVER LOOK FOR SUCH INFORMATION, NOT INTERESTED" CODE 17 IN Q.5

In general, how would you prefer to get information about the European Union?

(SHOW CARD - READ OUT - MULTIPLE ANSWERS POSSIBLE)

Q.6\_1 A short leaflet, that just gives an overview

0 Not mentioned

1 Mentioned

9 Inap. (coded 1 in V1129)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix.

As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v1135 - Q6 EU INFO PREFERENCE: INTERNET

Q.6

DO NOT ASK THOSE WHO ANSWERED "NEVER LOOK FOR SUCH INFORMATION, NOT INTERESTED" CODE 17 IN Q.5

In general, how would you prefer to get information about the European Union?

(SHOW CARD - READ OUT - MULTIPLE ANSWERS POSSIBLE)

Q.6\_5 On the Internet

0 Not mentioned

1 Mentioned

9 Inap. (coded 1 in V1129)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix.

As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

## v1144 - Q6 EU INFO PREFERENCE: DK

## Q.6

DO NOT ASK THOSE WHO ANSWERED "NEVER LOOK FOR SUCH INFORMATION, NOT INTERESTED" CODE 17 IN Q.5

In general, how would you prefer to get information about the European Union?

(SHOW CARD - READ OUT - MULTIPLE ANSWERS POSSIBLE)

## Q.6\_14 DK

0 Not mentioned

1 Mentioned

9 Inap. (coded 1 in V1129)

## Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix.

As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Last trend: EB55.1, Q.14

v1163 - Q8A EU INFO ON TELEVISION - INFORMATIVE

Q.8A

IF "TELEVISION", CODE 5 IN Q.7

Do you think that the news about the European Union presented on television are very informative, fairly informative, not very informative or not at all informative?

- 1 Very informative
- 2 Fairly informative
- 3 Not very informative
- 4 Not at all informative
- 5 DK
- 6 It depends on the programme (SPONTANEOUS)
- 9 Inap. (not coded 1 in V1149)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v1164 - Q8B EU INFO IN NEWSPAPERS - INFORMATIVE

Q.8B

IF "DAILY NEWSPAPERS", CODE 3 IN Q.7

Do you think that the news about the European Union presented in the daily newspaper(s) you read are very informative, fairly informative, not very informative or not at all informative?

- 1 Very informative
- 2 Fairly informative
- 3 Not very informative
- 4 Not at all informative
- 5 DK
- 6 It depends on the newspaper (SPONTANEOUS)
- 9 Inap. (not coded 1 in V1147)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

## v1171 - Q13 EU INFO SERVICES - REQUESTED FREQ

Q.13

IF "YES", CODE 1 IN Q.11 / IF "YES", CODE 1 IN Q.12

How many times have you requested information from an information service of the European Union in (OUR COUNTRY)?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

- 1 Only once
- 2 Twice
- 3 Between 3 and 5 times
- 4 Between 6 and 9 times
- 5 10 times or more
- 6 DK
- 9 Inap. (not coded 1 in V1170)

Note:

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

v1248 - Q21B EU INTERNET ITEMS: INFORMATION

Q.21B

IF "USES THE INTERNET", CODE 2 TO 9 IN Q.21A

Which of the following items about Europe would you like to find on the Internet?

(SHOW CARD - READ OUT - MULTIPLE ANSWERS POSSIBLE)

Q.21B\_1 Information about the European Union

0 Not mentioned

1 Mentioned

9 Inap. (none coded 1 in V1239 to V1246)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix.

As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v1256 - Q21D EU WEBSITE: FOR WORK

Q.21C

IF "USES THE INTERNET", CODE 2 TO 9 IN Q.21A

Have you ever been on Europa, the website of the European Union?

(IF YES)

Do you visit this site everyday, several times a week, once a week, 1 to 3 times a month or less often?

Q.21D

IF "YES", CODE 2 TO 6 IN Q.21C

Why do you need the information you are looking for on this site?

(SHOW CARD - READ OUT - MULTIPLE ANSWERS POSSIBLE)

Q.21D\_1 For work

0 Not mentioned

1 Mentioned

9 Inap. (not coded 2 to 6 in V1255)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

v1264 - Q21E EU WEBSITE TOPICS: CITIZ RIGHTS

Q.21E

IF "USES THE INTERNET", CODE 2 TO 9 IN Q.21A

What type of information would you like to find on Europa, the website of the European Union?

(SHOW CARD - READ OUT - MULTIPLE ANSWERS POSSIBLE)

Q.21E\_4 Citizens' rights

0 Not mentioned

1 Mentioned

9 Inap. (none coded 1 in V1239 to V1246)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix.

As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v1271 - Q21E EU WEBSITE TOPICS: EVENTS

Q.21E

IF "USES THE INTERNET", CODE 2 TO 9 IN Q.21A

What type of information would you like to find on Europa, the website of the European Union?

(SHOW CARD - READ OUT - MULTIPLE ANSWERS POSSIBLE)

Q.21E\_11 Upcoming events

0 Not mentioned

1 Mentioned

9 Inap. (none coded 1 in V1239 to V1246)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix.

As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v1275 - Q21E EU WEBSITE TOPICS: DK

Q.21E

IF "USES THE INTERNET", CODE 2 TO 9 IN Q.21A

What type of information would you like to find on Europa, the website of the European Union?

(SHOW CARD - READ OUT - MULTIPLE ANSWERS POSSIBLE)

Q.21E\_15 DK

0 Not mentioned

1 Mentioned

9 Inap. (none coded 1 in V1239 to V1246)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix.

As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v1557 - Q36A EU ENLARGEM INFO: NOT ANYTHING

Q.36A

Have you recently read, seen or been told about the enlargement?

(IF YES)

From which sources?

(SHOW CARD - READ OUT - MULTIPLE ANSWERS POSSIBLE)

Q.36A\_1 No, not read, seen nor been told anything

0 Not mentioned

1 Mentioned

9 GB: ambiguous answers (see note)

Note:

For GREAT BRITAIN the filter conditions as defined in the question routing were not consistently applied in the original data set as provided by the principal investigator. 595 respondents stating that they have "not read, seen or told about the EU enlargement" in V1557, did state related information sources in follow up variables V1558 to V1573. These cases have been recoded to '9' ("GB: ambiguous answers") in variable V1557.

v1559 - Q36A EU ENLARGEM INFO: DISCUSSIONS

Q.36A

Have you recently read, seen or been told about the enlargement?

(IF YES)

From which sources?

(SHOW CARD - READ OUT - MULTIPLE ANSWERS POSSIBLE)

Q.36A\_3 Yes, discussions with relatives, friends, colleagues

0 Not mentioned

1 Mentioned

9 Inap. (coded 1 in V1557)

Note:

For GREAT BRITAIN the filter conditions as defined in the question routing were not consistently applied in the original data set as provided by the principal investigator. 595 respondents stating that they have "not read, seen or told about the EU enlargement" in V1557, did state related information sources in follow up variables V1558 to V1573. These cases have been recoded to '9' ("GB: ambiguous answers") in variable V1557.

9 Inap. (coded 1 in V1557)

Note:

For GREAT BRITAIN the filter conditions as defined in the question routing were not consistently applied in the original data set as provided by the principal investigator. 595 respondents stating that they have "not read, seen or told about the EU enlargement" in V1557, did state related information sources in follow up variables V1558 to V1573. These cases have been recoded to '9' ("GB: ambiguous answers") in variable V1557.

v1575 - Q36B EU ENLARGEM INFO PREF: MEETINGS

Q.36B

IF "YES, HAVE READ, SEEN OR BEEN TOLD ABOUT THE ENLARGEMENT", CODE 2 TO 17 IN Q.36A

How do you prefer to get information about enlargement?

(SHOW CARD - READ OUT - MULTIPLE ANSWERS POSSIBLE)

Q.36B\_1 Meetings

- 0 Not mentioned
- 1 Mentioned
- 8 NA (GB)
- 9 Inap. (coded 1 or 9 in V1557 or 1 in V1574)

Note:

For GREAT BRITAIN the filter conditions as defined in the question routing were not consistently applied in the original data set as provided by the principal investigator. 595 respondents stating that they have "not read, seen or told about the EU enlargement" in V1557, did state related information sources in follow up variables V1558 to V1573. These cases have been recoded to '9' ("GB: ambiguous answers") in variable V1557.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v1576 - Q36B EU ENLARGEM INFO PREF: DISCUSSIONS

Q.36B

IF "YES, HAVE READ, SEEN OR BEEN TOLD ABOUT THE ENLARGEMENT", CODE 2 TO 17 IN Q.36A

How do you prefer to get information about enlargement?

(SHOW CARD - READ OUT - MULTIPLE ANSWERS POSSIBLE)

Q.36B\_2 Discussions with relatives, friends, colleagues

- 0 Not mentioned
- 1 Mentioned
- 8 NA (GB)
- 9 Inap. (coded 1 or 9 in V1557 or 1 in V1574)

Note:

For GREAT BRITAIN the filter conditions as defined in the question routing were not consistently applied in the original data set as provided by the principal investigator. 595 respondents stating that they have "not read, seen or told about the EU enlargement" in V1557, did state related information sources in follow up variables V1558 to V1573. These cases have been recoded to '9' ("GB: ambiguous answers") in variable V1557.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v1584 - Q36B EU ENLARGEM INFO PREF: EU BOARDS

Q.36B

IF "YES, HAVE READ, SEEN OR BEEN TOLD ABOUT THE ENLARGEMENT", CODE 2 TO 17 IN Q.36A

How do you prefer to get information about enlargement?

(SHOW CARD - READ OUT - MULTIPLE ANSWERS POSSIBLE)

Q.36B\_10 European Union information on notice boards in libraries, town halls, railway stations, post offices

- 0 Not mentioned
- 1 Mentioned
- 8 NA (GB)
- 9 Inap. (coded 1 or 9 in V1557 or 1 in V1574)

Note:

For GREAT BRITAIN the filter conditions as defined in the question routing were not consistently applied in the original data set as provided by the principal investigator. 595 respondents stating that they have "not read, seen or told about the EU enlargement" in V1557, did state related information sources in follow up variables V1558 to V1573. These cases have been recoded to '9' ("GB: ambiguous answers") in variable V1557.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Note:

For GREAT BRITAIN the filter conditions as defined in the question routing were not consistently applied in the original data set as provided by the principal investigator. 595 respondents stating that they have "not read, seen or told about the EU enlargement" in V1557, did state related information sources in follow up variables V1558 to V1573. These cases have been recoded to '9' ("GB: ambiguous answers") in variable V1557.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

## v1597 - Q40A EU ENLARGEMENT EFFECT - DAILY LIFE

Q.40A

ASK ALL

After new countries have joined the European Union, do you think that, generally speaking, your day to day life will be better, worse or about the same as it is today?

(IF CODE 1: GO TO Q.40B;

IF CODE 2: GO TO Q.40C;

IF CODE 3 OR 4: GO TO Q.40D;)

- 1 Better
- 2 Worse
- 3 About the same
- 4 DK

## v1781 - Q53 EU FAVOUR - 10 POINT SCALE

Q.53

Using this scale from 1 to 10, how favourable would you say you are towards the European Union?

If you are not at all favourable, you give a score of 1. If you are extremely favourable, you give a score of 10. The scores in between allow you to say how close to either side you are.

(SHOW CARD WITH SCALE)

- 1 Box 1 - Not at all favourable
- 2 Box 2
- 3 Box 3
- 4 Box 4
- 5 Box 5
- 6 Box 6
- 7 Box 7
- 8 Box 8
- 9 Box 9
- 10 Box 10 - Extremely favourable
- 11 DK

v1799 - Q58B EU DECISION MAKING - INFLUENCE 2ND

Q.58A

Which one of the following do you think has most influence on decision-making within the European Union?

(SHOW CARD - ONE ANSWER ONLY)

(READ OUT)

Q.58B

And the second?

- 1 Citizens
- 2 National governments
- 3 European Commission
- 4 European Parliament
- 5 Businesses
- 6 Trade unions
- 7 Pressure groups, lobbies
- 8 Other (SPONTANEOUS)
- 9 DK

Note:

Overlaps for 1ST, 2ND, an 3RD most influence on decision making in the European Union.

- 90 Other party
- 95 Would vote blank/would spoil your vote
- 96 Would not vote
- 98 DK
- 99 Inap. (not coded 1 in V8)

Note:

Starting with EB2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Users may modify these codings or part of these codings in order to suit their special needs.

v1856 - D4 VOTE INTENTION - NORTHERN IRELAND

D.4

If there were a "general Election" tomorrow (SAY IF CONTACT UNDER 18 YEARS: and you had a vote) which party would you vote for?

D.4\_GB\_NIR

Vote intention: Northern Ireland

- 0 NA
- 15 (S.D.L.P.) Social Democratic Labour Party
- 20 Labour Party
- 51 The Green Party
- 55 (NIWC) Northern Ireland Women's Coalition
- 60 Conservatives
- 61 (UUP) Ulster Unionist Party
- 62 (DUP) Democratic Unionist Party
- 63 (PUP) Progressive Unionist
- 64 Other Unionist
- 65 (APNI) Alliance Party of Northern Ireland (liberals)
- 67 (UKUP) UK Unionist Party (Nationalist)
- 80 (WP) The Workers' Party
- 81 (SF) Sinn Fein (Political Wing of Irish Republican Army)
- 96 Would not vote
- 98 DK
- 99 Inap. (not coded 10 in V8)

Note:

Starting with EB2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Users may modify these codings or part of these codings in order to suit their special needs.

Last trend: EB54.1, D.4

20 (SPÖ) Sozialdemokratische Partei Österreichs (Social Democratic Party of Austria)

50 (GAL) Die Grünen (Greens)

60 (ÖVP) Österreichische Volkspartei (Austrian People's Party)

80 (FPÖ) Freiheitliche Partei Österreichs (Die Freiheitlichen) (Freedom Party of Austria)

90 Other party

95 Would vote blank/would spoil your vote

Note:

Starting with EB2 the coding of this variable has been standardized following an approximate ordering of each country's political

parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Users may modify these codings or part of these codings in order to suit their special needs.

This variable integrates all countries in accordance with other Eurobarometer codebooks up to survey 48.

V1858 (Spain): Please notice that regional political parties ICV and BNG were exchanged in the first data set edition and are now corrected in accordance with the respective regional attribution. ICV is represented only in Catalunya, BNG only in Galicia.

Weighting required for united Germany (East+West) - see V11

Last trend: EB54.1, D.4

NO QUESTIONS D.5 AND D.6

v1864 - D7 MARITAL STATUS

D.7

Could you give me the letter which corresponds best to your own current situation?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

- 1 Married
- 2 Remarried
- 3 Unmarried, currently living with partner
- 4 Unmarried, having never lived with partner
- 5 Unmarried, having previously lived with a partner, but now on my own
- 6 Divorced
- 7 Separated
- 8 Widowed
- 9 Other (SPONTANEOUS)
- 97 Refusal

v1866 - D8 AGE EDUCATION - RECODED

D.8R Age when finished full-time education - RECODED

- 0 NA (see note)
- 1 Up to 14 years
- 2 15 years
- 3 16 years
- 4 17 years
- 5 18 years
- 6 19 years
- 7 20 years
- 8 21 years
- 9 22 years and older
- 10 Still studying (see note)

Note:

See D.8 for complete question text

68 missing cases which are coded "2" (Student) in D15A/V1871 have been recoded to "10" (Still studying).

NO QUESTION D.9

v1868 - D11 AGE EXACT

D.11

How old are you?

0 NA (see note)

15 15 years

94 94 years

Note:

2 cases coded "2 years" and "14 years" were recoded to "0" (NA).

Last trend: EB56.2, D.11

Actual number is coded

v1869 - D11 AGE RECODED - FOUR GROUPS

D.11R1 R'S age - four collapsed categories

- 0 NA (see note)
- 1 15 - 24 years
- 2 25 - 39 years
- 3 40 - 54 years
- 4 55 years and older

Derivation:

This variable collapses answers to D.11 into four categories.

Note:

2 cases coded "2 years" and "14 years" were recoded to "0" (NA).

See D.11 for complete question text

v1877 - D29 INCOME HH - FRANCE

D.29

We also need some information about the income of this household to be able to analyse the survey results for different types of households. Here is a list of income groups.

(SHOW CARD)

Please count the total wages and salaries per month of all members of this household; all pensions and all social insurance benefits; child allowances and any other income like rents, etc... Of course, your answer as all other replies in this interview will be treated confidentially and referring back to you or your household will be impossible. Please give me the letter of the income group your household falls into before tax and other deductions.

- 8 20.001 - 25.000 ATS
- 9 25.001 - 30.000 ATS
- 10 30.001 - 35.000 ATS
- 11 35.001 - 40.000 ATS
- 12 More than 40.000 ATS

Note:

This variable integrates all countries in accordance with other Eurobarometer codebooks up to survey 48.

Starting with EB56.3 income for Germany, Luxembourg and Finland is declared in the common currency (EURO).

Last trend: EB 56.2, D.29

Weighting required for united Germany (East+West) - see V11

Weighting required for United Kingdom (Great Britain and Northern Ireland) - see V7

v1895 - D29 INCOME HH QUARTILES

D.29R HOUSEHOLD INCOME (HARMONISED)

- 1 - - (Lowest income quartile)
- 2 - (Next to lowest income quartile)
- 3 + (Next to highest income quartile)
- 4 ++ (Highest income quartile)
- 5 DK/Refusal

Derivation:

This variable collapses answers to D.29 into four groups representing approximate quartiles.

Note:

See D.29 for complete question text

Please notice that the income quartiles are produced for comparison purposes and are retained as provided by the principal investigator. They are based on categorised income question as coded in the country specific variables V1877 to V1893.

## v1906 - P6 SIZE OF COMMUNITY - GERMANY WEST

P.6\_DE\_W (Objective) Size of locality: West Germany

- 1 Less than 2.000 inhabitants
- 2 2.000 - less than 5.000 inhabitants
- 3 5.000 - less than 20.000 inhabitants
- 4 20.000 - less than 50.000 inhabitants
- 5 50.000 - less than 100.000 inhabitants
- 6 100.000 - less than 500.000 inhabitants
- 7 500.000 and more inhabitants
- 99 Inap. (not coded 4 in V8)

v1906, weighted by v9

Value	Label	Missing	Count	Percent	Valid Percent
1	Less than 2.000 inhabitants		45	0.3	4.5
2	2.000 - less than 5.000 inhabitants		75	0.5	7.5
3	5.000 - less than 20.000 inhabitants		159	1.0	15.9
4	20.000 - less than 50.000 inhabitants		96	0.6	9.6
5	50.000 - less than 100.000 inhabitants		29	0.2	2.9
6	100.000 - less than 500.000 inhabitants		163	1.0	16.3
7	500.000 and more inhabitants		433	2.7	43.3
99	Inap. (not coded 4 in V8)	M	15038	93.8	
	Sum		16038	100.0	100.0
	Valid Cases		1000		

v1907 - P6 SIZE OF COMMUNITY - ITALY

P.6\_IT (Objective) Size of locality: Italy

- 1 Up to 10.000 inhabitants
- 2 10.001 - 100.000 inhabitants
- 3 100.001 - 250.000 inhabitants
- 4 More than 250.000 inhabitants
- 99 Inap. (not coded 5 in V8)

v1907, weighted by v9

Value	Label	Missing	Count	Percent	Valid Percent
1	Up to 10.000 inhabitants		331	2.1	33.1
2	10.001 - 100.000 inhabitants		388	2.4	38.8
3	100.001 - 250.000 inhabitants		87	0.5	8.7
4	More than 250.000 inhabitants		195	1.2	19.5
99	Inap. (not coded 5 in V8)	M	15037	93.8	
	Sum		16038	100.0	100.0
	Valid Cases		1001		

v1908 - P6 SIZE OF COMMUNITY - LUXEMBOURG

P.6\_LU (Objective) Size of locality: Luxembourg

- 1 Up to 2.500 inhabitants
- 2 2.501 - 5.000 inhabitants
- 3 5.001 - 10.000 inhabitants
- 4 10.001 - 20.000 inhabitants
- 5 20.001 - 50.000 inhabitants
- 6 More than 50.000 (Luxembourg ville)
- 99 Inap. (not coded 6 in V8)

v1908, weighted by v9

Value	Label	Missing	Count	Percent	Valid Percent
1	Up to 2.500 inhabitants		157	1.0	26.5
2	2.501 - 5.000 inhabitants		115	0.7	19.4
3	5.001 - 10.000 inhabitants		89	0.6	15.0
4	10.001 - 20.000 inhabitants		79	0.5	13.3
5	20.001 - 50.000 inhabitants		49	0.3	8.3
6	More than 50.000 (Luxembourg ville)		103	0.6	17.4
99	Inap. (not coded 6 in V8)	M	15446	96.3	
	Sum		16038	100.0	100.0
	Valid Cases		592		

## v1909 - P6 SIZE OF COMMUNITY - DENMARK

P.6\_DK (Objective) Size of locality: Denmark

- 1 Less than 2.000 inhabitants
- 2 2.000 - 4.999 inhabitants
- 3 5.000 - 9.999 inhabitants
- 4 10.000 - 19.999 inhabitants
- 5 20.000 - 49.999 inhabitants
- 6 50.000 - 99.999 inhabitants
- 7 100.000 and more inhabitants
- 99 Inap. (not coded 7 in V8)

v1909, weighted by v9

Value	Label	Missing	Count	Percent	Valid Percent
1	Less than 2.000 inhabitants		167	1.0	16.7
2	2.000 - 4.999 inhabitants		98	0.6	9.8
3	5.000 - 9.999 inhabitants		117	0.7	11.7
4	10.000 - 19.999 inhabitants		161	1.0	16.1
5	20.000 - 49.999 inhabitants		146	0.9	14.6
6	50.000 - 99.999 inhabitants		96	0.6	9.6
7	100.000 and more inhabitants		214	1.3	21.4
99	Inap. (not coded 7 in V8)	M	15038	93.8	
	Sum		16038	100.0	100.0
	Valid Cases		1000		

v1910 - P6 SIZE OF COMMUNITY - IRELAND

P.6\_IE (Objective) Size of locality: Ireland

- 1 Up to 2.000 inhabitants
- 2 2.001 - 20.000 inhabitants
- 3 20.001 - 100.000 inhabitants
- 4 More than 100.000 inhabitants
- 99 Inap. (not coded 8 in V8)

v1910, weighted by v9

Value	Label	Missing	Count	Percent	Valid Percent
1	Up to 2.000 inhabitants		444	2.8	44.1
2	2.001 - 20.000 inhabitants		167	1.0	16.6
3	20.001 - 100.000 inhabitants		90	0.6	8.9
4	More than 100.000 inhabitants		306	1.9	30.4
99	Inap. (not coded 8 in V8)	M	15031	93.7	
	Sum		16038	100.0	100.0
	Valid Cases		1007		

v1911 - P6 SIZE OF COMMUNITY - GREAT BRITAIN

P.6\_GB\_GBN (Objective) Size of locality: Great Britain

- 1 Metropolitan
- 2 Urban
- 3 Suburban
- 4 Rural
- 99 Inap. (not coded 9 in V8)

Note:

Please notice that for GREAT BRITAIN the cross-tabulation of the objective size of community (P6) by the subjective type of community (D.25) shows an extremely opposite classification starting with EB56.3 and up to survey EB58.0 in comparison to other waves. These data should be used with caution.

v1911, weighted by v9

Value	Label	Missing	Count	Percent	Valid Percent
1	Metropolitan		349	2.2	35.6
2	Urban		221	1.4	22.5
3	Suburban		220	1.4	22.4
4	Rural		191	1.2	19.5
99	Inap. (not coded 9 in V8)	M	15057	93.9	
	Sum		16038	100.0	100.0
	Valid Cases		981		

v1912 - P6 SIZE OF COMMUNITY - NORTHERN IRELAND

P.6\_GB\_NIR (Objective) Size of locality: Northern Ireland

- 1 Up to 2.000 inhabitants
- 2 2.001 - 20.000 inhabitants
- 3 20.001 - 100.000 inhabitants
- 4 More than 100.000 inhabitants
- 99 Inap. (not coded 10 in V8)

v1912, weighted by v9

Value	Label	Missing	Count	Percent	Valid Percent
1	Up to 2.000 inhabitants		52	0.3	17.0
2	2.001 - 20.000 inhabitants		104	0.6	34.0
3	20.001 - 100.000 inhabitants		67	0.4	21.9
4	More than 100.000 inhabitants		83	0.5	27.1

153 Magdeburg  
160 Thüringen

999 Inap. (not coded 4 or 14 in V8)

Note:

Starting with Eurobarometer 44.2bis the Eurobarometer are considering the new East German regional units as resulting from the regional reforms 1992-94. The new regional units on NUTS II level (Regierungsbezirke) for Sachsen-Anhalt are Dessau, Halle and Magdeburg; the new units for Sachsen (Chemnitz, Dresden, Leipzig) are only considered starting with Eurobarometer 48. REGION I categories used in former surveys up to number 44.1 are based on ex-GDR administrative units (Bezirke) and are not comparable to the new categories even if identical names are used. The almost unchanged NUTS I unit (Bundesland) Sachsen-Anhalt in Eurobarometer Region II for example was formerly only composed of Halle and Magdeburg. PLEASE NOTICE that EAST GERMAN regional units (Brandenburg, Mecklenburg-Vorpommern and Thüringen) on NUTS II level have not been supplied for EUROBAROMETER 56.3.

Weighting required for united Germany (East+West) - see V11

v1951 - C4 SOCIO PROFESSIONAL STATUS

C.4 SOCIO PROFESSIONAL STATUS

- 0 Other answers (never any paid work, NA)
- 1 Farmer & fisher
- 2 Professionals
- 3 Owner of a shop, craftsmen, other self employed position
- 4 Business proprietors, owner of a company
- 5 Employed professional
- 6 General management
- 7 Middle management
- 8 Employed position, working mainly at a desk
- 9 Employed position , not at a desk but travelling
- 10 Employed position, not at a desk but in a service job
- 11 Supervisors
- 12 Skilled manual workers
- 13 Other (unskilled) manual worker

Derivation:

Roughly half of the representative sample of the European Community public was without paid work. Basing cross-analyses on "occupation" (D.15A) would exclude half of the respondents from analysis. An alternative is to base analyses on (non-marxist) concept of "objective social class" using "occupation of the head of household" as reference. In order to classify as many respondents as possible with respect to their socio-professional setting, a new classification was created called "socio-professional status" of the main income earner (MIE) ("Yes" in D.19). The following standard was used if the respondent is the MIE: For those in paid work it is based on the respondents' own present occupation (D.15A). For those not in paid work, "former occupation" (D.15B) was used, if applicable. If the respondent is not the MIE, the occupation of the "person who contributes most to the household income" (D.21A) was used and if the head of household was not performing paid works at the time of the interview, his or her "former occupation" (D.21B) was used, if applicable.

Consequently, socio-professional status is a classification "that comes as close to the respondent himself/herself as possible" but that draws upon additional background information to the extent necessary and available, in order to avoid a single measure of interviewees' socio-professional setting and to include the maximum number of respondents in the respective analyses. See also standard report EUROBAROMETER 48, March 1998, Brussels, C.5.

v1952 - C5 EUROPEAN POLITICAL PARTY PREFERENCE

C.5 EUROPEAN PARTY PARLIAMENTARY PREFERENCE INDEX

- 0 Other answers/NA
- 1 (PSE) Group of the Party of European Socialists
- 2 (PPE) Group of the European People's Party/Christian-Democratic Group
- 3 (ELDR) Group of the European Liberal, Democrat and Reform Party
- 4 (UPE) Group Union for Europe
- 5 (GUE-NGL) Confederal Group of the European United Left/Nordic Green Left
- 6 (V) The Green Group in the European Parliament
- 7 (ARE) Group of the European radical Alliance
- 8 (I-EDN) Group of Independents for a Europe of Nations
- 9 (N.I.) Non-attached
- 10 No clear attribution
- 11 Not represented (other parties)

Derivation:

This index is based upon the vote intention question D.4: "If there were a "General Election" tomorrow (SAY IF CONTACT UNDER 18 YEARS: and you had a vote), which party would you vote for?"

Answers are grouped according to the affiliation of the representatives of the respective party to a group in the European Parliament.

If a party was not represented in the European Parliament at the time the survey was carried out but had been represented before, its supporters are included in the European Parliament group their party has previously been affiliated with. Supporters of parties represented in the European Parliament whose members (of the European Parliament) are not affiliated with any group are labelled N.I. ("non-attached"), supporters of parties not represented in the European Parliament are labelled "other parties". In some cases "no clear attribution" may be possible.

This variable is constructed by the Central Archive mapping the country specific variables V1847 to V1862 to the party group structure of the 5th EU-Parliament period (1999-2004). Spanish regional parties, combined coded '57' in V1858, are attributed separately to its corresponding group in the EU-Parliament. Different internet resources were used for information on the respective party affiliations:

[www.europarl.europa.eu/election/def\\_nig.htm](http://www.europarl.europa.eu/election/def_nig.htm) (official website of the EP);  
[www.parties-and-elections.de](http://www.parties-and-elections.de) (including election results and links to related websites);  
<http://en.wikipedia.org/wiki/User:Electionworld/Electionworld> (former "Electionworld").

v1953 - C14 RESPONDENT OCCUPATION SCALE

C.14 Respondent Occupation Scale

- 1 Self-employed (coded 5 to 9 in V1871)
- 2 Managers (coded 10 to 12 in V1871)
- 3 Other white collars (coded 13 or 14 in V1871)
- 4 Manual workers (coded 15 to 18 in V1871)
- 5 House persons (coded 1 in V1871)
- 6 Unemployed (coded 3 in V1871)
- 7 Retired (coded 4 in V1871)
- 8 Students (coded 2 in V1871)

Derivation:

This scale is based on a combination / selection of the current respondent occupation variable D.15A/V1871.

v1957 - ORIGINAL RESPONDENT ID

Original Respondent Identification Number

This is the original respondent identification number as supplied by INRA. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 03: West Germany; 04: Greece; 05: Italy; 06: Spain; 07: France; 08: Ireland; 09: Northern Ireland; 10: Luxembourg; 11: Netherlands; 12: Portugal; 13: Great Britain; 14: East Germany; 16: Finland; 17: Sweden; 18: Austria). The remaining four digits contain the country-specific questionnaire numbers.

Note:

Actual number is coded
