Acknowledgements

Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences.

Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (<http://zacat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

1.2 Content

1.2.1 Abstract

This round of Eurobarometer surveys queried respondents on standard Eurobarometer measures, such as how satisfied they were with their present life, whether they attempted to persuade others close to them to share their views on subjects they held strong opinions about, whether they discussed political matters, and what the European Union's priorities should be. Additional questions focused on the respondents' knowledge of and opinions about the European Union (EU), including sources of information about the EU and whether their country had benefited from being an EU member. Respondents were also asked how informed they were about EU enlargement, their preferred option for the immediate future of the EU as it concerned the enlargement (i.e., whether the EU should include all, some, or none of the countries wishing to join), and whether they agreed or disagreed with statements regarding the EU enlargement (e.g., whether having more countries in the EU would mean more guaranteed peace and security in Europe, whether the EU should financially help future member countries before they join, and whether the EU should reform the way its institutions work before welcoming new members). In addition to the selected standard trend variables (which included additional questions about the perception of and attitudes toward the European Parliament, the European Convention, and the United States of America), the survey also elicited respondents' opinions about the euro and its introduction as the common European currency. Respondents were asked a series of questions about dual pricing (prices in both the euro and their own respective national currency), its usefulness and necessity, whether they felt handling eight coins was complicated, the usefulness of 1- and 2-cent coins, and whether some of the coins should be replaced by notes. General attitudes regarding the euro replacing their national currency and whether the euro made the respondent feel more European were also assessed. Finally, respondents were asked questions about parental leave, more specifically about the attitudes of men toward taking time off from the workforce for parental leave. Questions addressed the main reasons that would encourage or discourage fathers from taking parental leave. Demographic variables include gender, age, marital status, occupation, and household income.

1.2.2 Topic classification

- International Institutions, Relations
- Political Attitudes and Behavior
- Family

1.2.3 Related publications

- European Commission: Eurobarometer 59. Public Opinion in the European Union. Brussels. July 2003.
- THE EUROPEAN OPINION RESEARCH GROUP (EORG): Special Eurobarometer 189 / Wave 59.1. Europeans' attitudes to parental leave. Requested by Directorate General Employment and Social Affairs and coordinated by Directorate General Press and Communication. May 2004.

1.3 Universe

In all, Eurobarometer 59.1 interviewed 16.307 citizens of the 15 countries in the European Union (nationals and non-nationals but EU-citizens). All respondents were aged 15 and over. Separate samples were drawn for Northern Ireland and East Germany.

1.4 Sampling procedure

A multi-stage sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regions in every country (i.e., Statistical Office of the European Community, EUROSTAT regions). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of addresses was selected from each sampled PSU. Addresses were chosen systematically using standard random route procedures, beginning with an initial address selected at random. In each household, a respondent was selected, by a random procedure. Up to three recalls were made to obtain an interview with the selected respondent. No more than one interview was conducted in each household.

The regular sample size (in the sense of completed interviews) is 1000 respondents per country, except the United Kingdom with separate samples for Great Britain (1000) and Northern Ireland (300), Luxembourg (600) and Germany with separate samples for the Eastern and the Western part (1000 each). The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

From March 18 to April 30, 2003, the European Opinion Research Group, a consortium made out of INRA (Europe) and GfK Worldwide, carried out the fieldwork for this Eurobarometer, at the request of the European Commission, DG Communication – Public Opinion Analysis Sector. The European Opinion Research Group E.E.I.G. consortium of European market and public opinion research agencies is based at INRA (Europe), Avenue R.Vandendriessche 18, B-1150 Brussels.

1.6 Mode of data collection

In all member states, fieldwork was conducted on the basis of detailed and uniform instructions prepared by the European Opinion Research Group. Interviews were conducted face-to-face in respondents' homes in the appropriate national language.

Equivalent French and English basic questionnaires were developed for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country. Backtranslation procedures were applied for controlling semantic equivalence.

1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factor corrects for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country as well as each lower level sample (Great Britain and Northern Ireland, East and West Germany) are represented in proportion to its population size within different groupings, or according to the historical states of European unification (e.g. founder members, new members, Euro zone) in the case of the EUROPEAN WEIGHTS, or for the United Kingdom (WEIGHT SPECIAL UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31) and for Germany as a whole (WEIGHT SPECIAL GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general all samples which do not belong to the respective group of samples under consideration are excluded from calculation.

The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 4) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

Eurobarometer 59.1 provides four (post-stratification) NATION WEIGHTS: W1 (WEIGHT RESULT FROM TARGET) for separate analysis or comparison of individual samples (countries or regions on sub-national level), W4 (WEIGHT SPECIAL UNITED KINGDOM) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole, and W3 (WEIGHT SPECIAL GERMANY), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. W14 (WEIGHT SPECIAL GERMANY & UNITED KINGDOM) combines W3 and W4. All other samples (nations) are included, likewise all post-stratification factors.

The EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries, of accession or candidate countries, and of Euro zone countries, representing different historical states of European integration (e.g. EU6 = six founder members) . All post-stratification factors are included.

Table 2: Overview of population size weights

European Weights in Eurobarometer 59.1	Function
W5 to W9, W11	grouping EU member countries
W10, W13	grouping new member countries
W15, W16, W18	grouping (non-)Eurozone countries

For more detailed information on the individual weights please see the corresponding variable description.

1.8 Data preparation

The data received by ZA from EORG/INRA (EUROPE) were checked for missing and duplicate records, for illegal (wild) codes and for consistency of response patterns. Errors discovered by these procedures were corrected or documented. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable documentation was created for this dataset by ZA.

To facilitate analyses of the data, ZA created new variables which consolidate information in the original EORG dataset. Four variables containing condensed information were created by ZA for this Eurobarometer: NATION I, NATION III, NATION IV, and REGION II.

ZA also added "Inappropriate" (Inap.) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the EORG questionnaire was adhered to for (almost) every respondent.

Users should note that EORG has occasionally represented answers to a question by a series of binary "dummy" variables (i.e. variables which take on values of one and zero only) creating separate "dummy" variables to explicitly represent "Don't know", "No answer" or other residual responses, such as "None of the above". ZA has recoded these residual responses in the case of inconsistencies with respect to the series of substantial answers.

ZA has recoded the missing answers (NA) represented in the INRA data set by blanks (system missing) to standard values.

Question text and contingency text appearing in the variable description is taken from EORG's English language version of the basic bilingual questionnaire. Coding schemes and other documentation are based on EORG's English language version of the basic bilingual questionnaire, EORG's original codebook and EORG's SPSS data definition statements as received by ZA. Whenever a discrepancy occurs between EORG's codebook, questionnaires, SPSS setup and dataset with respect to the coding scheme of a variable, ZA has carried out any correction in agreement with INRA.

If the documentation for country-specific questions or answer categories is provided by EORG in other languages than English, ZA documents the original language wording and supplies the English translation in brackets.

Please see the respective variable documentation (variable notes) for specific remarks on data inconsistencies or processing.

1.9 Further remarks

Comparable data on EU items are available in the context of Candidate Countries Eurobarometer 2003.3 (ZA3984).

2 Eurobarometer Series Description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brêthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001–2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 4: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.2OVR, 55.1OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.2OVR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 5) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 5: Overview of Eurobarometer surveys with standard EU and trend question modules

Standard and trend surveys	Fieldwork Dates	GESIS ID	Standard Report	Special topic	Subset
Eurobarometer 34.0	Oct-Nov 1990	ZA1960	X

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

3 Dataset structure and standards

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 6: ZEUS Party Family Code (slightly modified)

Category		Party Family
0	(001-099)	not affiliated / electoral alliances across "families"
1	(100-199)	Communists
2	(200-299)	Socialists
3	(300-399)	Liberals
4	(400-499)	Christian Democrats
5	(500-599)	Conservatives
6	(600-699)	Extreme Rights / Nationalists
7	(700-799)	Regionalists / Ethnic
8	(800-899)	Environmental parties
9	(900-949)	Agricultural parties
9	(950-989)	other special issue parties (e.g. Eurosceptics) and independents
	990	other (spontaneous)
	994	not voting age
	995	empty ballot (blank) or invalid vote
	996	not voted / would not vote
	997	Refused
	998	DK / DK+NA if NA not coded separately
	999	INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION – ALL SAMPLES ISO 3166).

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (–1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded "real" values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission's official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

5 Variable Documentation

Variable, Label

Question Text (English Language)

v1 - STUDY NUMBER DISTRIBUTOR

Distributor Archive Study Number

Study Number of the distributing archive.

v1

Value	Label	Missing	Count	Percent	Valid Percent
3904			16307	100.0	100.0
	Sum		16307	100.0	100.0
	Valid Cases		16307		

v2 - STUDY NUMBER PRODUCER

ZA Study Number

Study number of the data set producer.

v2

Value	Label	Missing	Count	Percent	Valid Percent
3904			16307	100.0	100.0
	Sum		16307	100.0	100.0
	Valid Cases		16307		

v3 - EDITION NUMBER

ZA / ICPSR Edition Number

The number identifying the release edition of this data set.

1 1st GESIS-ZA edition as of August 18, 2008

Note:

Please see variable VERSION ("GESIS ARCHIVE VERSION") for further information on the version number of this data set and the corresponding release date.

v3

Value	Label	Missing	Count	Percent	Valid Percent
1	1st GESIS-ZA edition as of August 18 , 2008		16307	100.0	100.0
	Sum		16307	100.0	100.0
	Valid Cases		16307		

version - GESIS ARCHIVE VERSION**VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET**

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

On occasion of the implementation of this versioning scheme (2010-04-13), the default version number 1.0.0 has been created automatically for this Eurobarometer.

Version 1.0.1 adds the VERSION variable to the otherwise unchanged data set.

Former version or edition identification variables are maintained unchanged as a reference to former releases.

version

Value	Label	Missing	Count	Percent	Valid Percent
1.0.1 (2012-03-30)			16307	100.0	100.0
	Sum		16307	100.0	100.0
	Valid Cases		16307		

v4 - EUROBAROMETER NUMBER

ZA / ICPSR Part Number

The number identifying the Eurobarometer sample.

1 Eurobarometer 59.1

v4

Value	Label	Missing	Count	Percent	Valid Percent
1	Eurobarometer 59.1		16307	100.0	100.0
	Sum		16307	100.0	100.0
	Valid Cases		16307		

v5 - ID SERIAL NUMBER

Sequential respondent identification number assigned by ZA

A unique serial number is assigned to each respondent.

v6 - NATION - ALL SAMPLES

NATION - ALL SAMPLES

All samples including separate samples for East and West Germany and for Great Britain and Northern Ireland.

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany West
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 Germany East
- 15 Norway (not included)
- 16 Finland
- 17 Sweden
- 18 Austria

v6

Value	Label	Missing	Count	Percent	Valid Percent
1	France		1075	6.6	6.6
2	Belgium		1112	6.8	6.8
3	The Netherlands		1008	6.2	6.2
4	Germany West		1050	6.4	6.4
5	Italy		1027	6.3	6.3
6	Luxembourg		600	3.7	3.7
7	Denmark		1000	6.1	6.1

14	Germany East		1021	6.3	6.3
16	Finland		1046	6.4	6.4
17	Sweden		1000	6.1	6.1
18	Austria		1021	6.3	6.3
	Sum		16307	100.0	100.0
	Valid Cases		16307		

v7 - NATION - ALL SAMPLES ISO 3166

NATION - ALL SAMPLES ISO 3166

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

v7

Value	Label	Missing	Count	Percent	Valid Percent

	Sum		16307	100.0	100.0
	Valid Cases		16307		

v8 - W1 WEIGHT RESULT FROM TARGET

W1 WEIGHT RESULT FROM TARGET

W1 WEIGHT RESULT FROM TARGET is for use in separate analyses of individual countries (=samples). It reproduces the real number of cases for each sample. British and Northern Irish as well as East and West German samples are weighted separately. Use NATION variable V6 or V7.

Note:

This weight corresponds to former NATION WEIGHT II (up to EUROBAROMETER 31).

v9 - NATION - UNITED KINGDOM

NATION - UNITED KINGDOM

Great Britain and Northern Ireland are coded together.

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany (West)
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 United Kingdom
- 10 Greece
- 11 Spain
- 12 Portugal
- 13 Germany (East)
- 14 Norway (not included)
- 15 Finland
- 16 Sweden
- 17 Austria

v10 - W4 WEIGHT SPECIAL UNITED KINGDOM

W4 WEIGHT SPECIAL UNITED KINGDOM

W4 WEIGHT SPECIAL UNITED KINGDOM adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom and should be used whenever the United Kingdom is to be analyzed as a whole. All national weights are included.

v11 - NATION - UNITED GERMANY

NATION - UNITED GERMANY

East and West Germany are coded together.

v34 - W18 WEIGHT SPECIAL EURO (EXCL BE IT IE GB)

W18 WEIGHT SPECIAL EURO ZONE (EXCL BE IT IE GB)

W18 WEIGHT SPECIAL EURO ZONE (EXCL BE IT IE GB) excludes Belgium, Italy, Ireland and United Kingdom from calculation.

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

Note:

For use with question Q.45 / V326.

v35 - Q1 NATIONALITY BELGIUM

Q.1

What is your nationality? Please tell me the country(ies) that applies(y).

v222 - Q24 EUROP FOREIGN POL: COM ASYLUM POL

Q.24

The European Union already has a Common Security and Foreign Policy and a European Security and Defence Policy. There is now a debate about how much further these should be developed. Do you tend to agree or tend to disagree with each of the following statements?

(READ OUT - ROTATE)

Q.24_11 The European Union should have a common asylum policy towards asylum seekers

- 1 Tend to agree
- 2 Tend to disagree
- 3 DK

v275 - Q35 EUROP COUNCIL PERIOD - PREFERENCE

Q.35

The European Council is composed of Heads of State or Heads of Government of member states and the President of the Commission. The presidency of the European Council is taken by each country in turn, for a period of six months. Do you think that ...?

(READ OUT - ONE ANSWER ONLY)

- 1 The six-month period should be retained because it gives each member state a chance to hold the Presidency of the European Union on a regular basis
- 2 The period of the Presidency should be extended because six months is too short to achieve significant results
- 3 DK

v276 - Q36 EU MEMBER STATE VETO - PREFERENCE

Q.36

Currently, each member state has the right of veto in certain areas. In the future, should a right of veto ...?

- 1 Be retained in order to preserve essential national interests
- 2 Be limited to a very few essential areas
- 3 Be given up for all decisions in order to make the European Union more efficient
- 4 DK

v447 - Q74 EURO I NON-EURO ZONE - INTRODUCTION

Q.74

ONLY IN GB, DK AND SE

Would you like the euro to replace the (NATIONAL CURRENCY)?

- 1 Yes
- 2 No
- 3 I am not interested in the euro (SPONTANEOUS)
- 4 DK
- 9 Inap., Euro zone (coded 1-6, 8, 10-14, 16 in V13)

Note:

NO QUESTIONS Q.75 TO Q.78

v449 - D11 AGE EXACT

D.11

How old are you?

15 15 years

99 99 years

Note:

Actual number is coded.

Last trend: EB59.0, D.11

v450 - D11 AGE RECODED - FOUR GROUPS

D.11R1 R'S age - four collapsed categories

- 1 15 - 24 years
- 2 25 - 39 years
- 3 40 - 54 years
- 4 55 years and older

Derivation:

This variable collapses answers to D.11 into four categories.

Note:

See D.11 for complete question text.

v459 - Q80 PARENTAL LEAVE FOR MEN - KNOWN

Q.80

ONLY ASK TO MEN (CODE 1 IN D.10) / AND IF 18 YEARS OLD OR MORE IN D.11 / AND IF NO CODE 4 (RETIRED) IN D.15A /
IF "ONE CHILD" OR "MORE" OR "WHOSE WIFE/PARTNER IS EXPECTING A BABY" CODES 2 TO 5 IN Q.79

Did you know that men can take parental leave?

1 Yes

2 No

9 Inap. (not coded 1 in V455 to V458)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

v461 - Q81 PARENTAL LEAVE: YES BABY TO COME

Q.81

ONLY ASK TO MEN (CODE 1 IN D.10) / AND IF 18 YEARS OLD OR MORE IN D.11 / AND IF NO CODE 4 (RETIRED) IN D.15A / IF "ONE CHILD" OR "MORE" OR "WHOSE WIFE/PARTNER IS EXPECTING A BABY" CODES 2 TO 5 IN Q.79 / IF "YES", CODE 1 IN Q.80, OTHERS GO TO Q.83A

Did you take, or are you thinking of taking up parental leave?

(SHOW CARD - READ OUT - MULTIPLE ANSWERS POSSIBLE)

Q.81_2 Yes, for the child we are expecting

0 Not mentioned

1 Mentioned

9 Inap. (coded 2 or 9 in V459)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

9 Inap. (coded 2 or 9 in V459)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

1 Mentioned

9 Inap. (not coded 1 in V460)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

v503 - D1 LEFT-RIGHT PLACEMENT - RECODED 5 CAT

D.1R2 Left - right scale (RECODED)

- 1 (1 - 2) Left
- 2 (3 - 4)
- 3 (5 - 6) Centre
- 4 (7 - 8)
- 5 (9 -10) Right
- 6 DK/Refusal

Derivation:

This variable collapses answers to D.1 into five categories.

Note:

See D.1 for complete question text.

v505 - D8 AGE EDUCATION

D.8

How old were you when you stopped full-time education?

(IF "STILL STUDYING", CODE "00")

0 NA

6 6 years

39 39 years

98 Still studying

Note:

Original code "00" recoded to "98"

According to the Portuguese field questionnaire the high number of Portuguese respondents coded "6" "Up to 6 years" are supposed to include illiterates.

7 MISSING CASES which are coded "2" (STUDENT) in D15A/V542 have been recoded to '98' (STILL STUDYING).

Actual number is coded.

Last trend: EB59.0, D.8

v506 - D8 AGE EDUCATION - RECODED

D.8R Age when finished full-time education - RECODED

- 0 NA
- 1 Up to 14 years
- 2 15 years
- 3 16 years
- 4 17 years
- 5 18 years
- 6 19 years
- 7 20 years
- 8 21 years
- 9 22 years and older
- 10 Still studying

Note:

See D.8 for complete question text.

According to the Portuguese field questionnaire the high number of Portuguese respondents coded "6" "Up to 6 years" are supposed to include illiterates.

7 MISSING CASES which are coded "2" (STUDENT) in D15A/V542 have been recoded to '10' (STILL STUDYING).

v511 - D29 INCOME HH - FRANCE

D.29

We also need some information about the income of this household to be able to analyse the survey results for different types of households. Here is a list of income groups.

(SHOW CARD)

Please count the total wages and salaries per month of all members of this household; all pensions and all social insurance benefits; child allowances and any other income like rents, etc... Of course, your answer as all other replies in this interview will be treated confidentially and referring back to you or your household will be impossible. Please give me the letter of the income group your household falls into before tax and other deductions.

v523 - D29 INCOME HH - PORTUGAL

D.29

We also need some information about the income of this household to be able to analyse the survey results for different types of households. Here is a list of income groups.

(SHOW CARD)

Please count the total wages and salaries per month of all members of this household; all pensions and all social insurance benefits; child allowances and any other income like rents, etc... Of course, your answer as all other replies in this interview will be treated confidentially and referring back to you or your household will be impossible. Please give me the letter of the income group your household falls into before tax and other deductions.

- 3 10.001 - 15.000 SEK
- 4 15.001 - 20.000 SEK
- 5 20.001 - 25.000 SEK
- 6 25.001 - 30.000 SEK
- 7 30.001 - 35.000 SEK
- 8 35.001 - 40.000 SEK
- 9 40.001 - 45.000 SEK
- 10 45.001 - 50.000 SEK
- 11 50.001 - 55.000 SEK
- 12 55.001 SEK or more

in Austria (AT):

EURO per month

- 1 Less than 546 EURO
- 2 546 - 690 EURO
- 3 691 - 945 EURO
- 4 946 - 1.165 EURO
- 5 1.166 - 1.420 EURO
- 6 1.421 - 1.670 EURO
- 7 1.671 - 2.180 EURO

- 8 2.181 - 2.690 EURO
- 9 2.691 - 3.270 EURO
- 10 3.271 - 3.850 EURO
- 11 3.851 - 4.360 EURO
- 12 4.361 EURO or more

Note:

This variable integrates all countries in accordance with other Eurobarometer codebooks up to survey 48.

Weighting required for united Germany (East+West) - see V12

Weighting required for United Kingdom (Great Britain and Northern Ireland) - see V10

Last trend: EB59.0, D.29

v529 - D29 INCOME HH QUARTILES

D.29R HOUSEHOLD INCOME (HARMONISED)

- 1 - - (Lowest income quartile)
- 2 - (Next to lowest income quartile)
- 3 + (Next to highest income quartile)
- 4 ++ (Highest income quartile)
- 5 DK/Refusal

Derivation:

This variable collapses answers to D.29 into four groups representing approximate quartiles.

Note:

See D.29 for complete question text

Please notice that the income quartiles are produced for comparison purposes and are retained as provided by the principal investigator. They are based on categorised income question as coded in the country specific variables V511 to V527.

143 Leipzig
151 Dessau
152 Halle
153 Magdeburg
160 Thüringen

999 Inap. (not coded 4 or 14 in V6)

Note:

Starting with Eurobarometer 44.2bis the Eurobarometer are considering the new East German regional units as resulting from the regional reforms 1992-94. The new regional units on NUTS II level (Regierungsbezirke) for Sachsen-Anhalt are Dessau, Halle and Magdeburg; the new units for Sachsen (Chemnitz, Dresden, Leipzig) are only considered starting with Eurobarometer 48. REGION I categories used in former surveys up to number 44.1 are based on ex-GDR administrative units (Bezirke) and are not comparable to the new categories even if identical names are used. The almost unchanged NUTS I unit (Bundesland) Sachsen-Anhalt in Eurobarometer Region II for example was formerly only composed of Halle and Magdeburg. PLEASE NOTICE that EAST GERMAN regional units (Brandenburg, Mecklenburg-Vorpommern and Thüringen) on NUTS II level have not been supplied for EUROBAROMETER 59.1.

Weighting required for united Germany (East+West) - see V12

v586 - C1 OPINION LEADERSHIP INDEX

C.1 OPINION LEADERSHIP INDEX

0 DK/NA (coded 5 for V51 and 4 for V50)

1 - - low (coded 3, 4 or 5 for V51 and 3 for V50; or coded 3 or 4 for V51 and 3 or 4 for V50)

2 - (coded 3, 4 or 5 for V51 and 2 for V50; or coded 1 or 2 for V51 and 3 or 4 for V50)

3 + (coded 3, 4 or 5 for V51 and 1 for V50; or coded 1 or 2 for V51 and 2 for V50)

4 ++ high (coded 1 or 2 for V51 and 1 for V50)

Derivation:

This index is based on the answers to the following two questions: "When you hold a strong opinion, do you ever find yourself persuading your friends, relatives or fellow workers to share your views? Does this happen ...?" (Q.3/V51) and "When you get together with friends, would you say you discuss political matters frequently, occasionally or never?" (Q.2/V50). Interviewees giving affirmative answers to both questions are labelled ++. Interviewees giving negative answers to both questions are labelled - -. Middle categories (+ and -) are constituted correspondingly.

This variable forms an indicator of the individual's potential to take an active role in the political process. For a complete discussion of this

variable and its correlates see Ronald Inglehart, *The Silent Revolution: Changing Values and Political Styles among Western Publics* (Princeton University Press, 1977).

v587 - C4 SOCIO PROFESSIONAL STATUS

C.4 SOCIO PROFESSIONAL STATUS

- 0 Other answers
- 1 Farmer & fisher
- 2 Professional (lawyer, medical practitioner, accountant, architect, ...)
- 3 Owner of a shop, craftsmen, other self-employed person
- 4 Business proprietors, owner (full or partner) of a company
- 5 Employed professional (employed doctor, lawyer, accountant, architect)
- 6 General management, director or top management (managing directors, director general, other director)
- 7 Middle management, other management (department head, junior manager, teacher, technician)
- 8 Employed position, working mainly at a desk
- 9 Employed position, not at a desk, but travelling (salesmen, driver, ...)
- 10 Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, ...)
- 11 Supervisors
- 12 Skilled manual workers
- 13 Other (unskilled) manual worker, servant

Derivation:

Roughly half of the representative sample of the European Community public was without paid work. Basing cross-analyses on "occupation" (D.15A) would exclude half of the respondents from analysis. An alternative is to base analyses on (non-marxist) concept of "objective social class" using "occupation of the head of household" as reference. In order to classify as many respondents as possible with respect to their socio-professional setting, a new classification was created called "socio-professional status" of the main income earner (MIE) ("Yes" in D.19). The following standard was used if the respondent is the MIE: For those in paid work it is based on the respondents' own present occupation (D.15A). For those not in paid work, "former occupation" (D.15B) was used, if applicable. If the respondent is not the MIE, the occupation of the "person who contributes most to the household income" (D.21A) was used and if the head of household was not performing paid works at the time of the interview, his or her "former occupation" (D.21B) was used, if applicable.

Consequently, socio-professional status is a classification "that comes as close to the respondent himself/herself as possible" but that draws upon additional background information to the extent necessary and available, in order to avoid a single measure of interviewees' socio-professional setting and to include the maximum number of respondents in the respective analyses. See also standard report EUROBAROMETER 48, March 1998, Brussels, C.5.

v589 - ORIGINAL RESPONDENT ID

Original Respondent Identification Number

This is the original respondent identification number as supplied by INRA. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 03: West Germany; 04: Greece; 05: Italy; 06: Spain; 07: France; 08: Ireland; 09: Northern Ireland; 10: Luxembourg; 11: Netherlands; 12: Portugal; 13: Great Britain; 14: East Germany; 16: Finland; 17: Sweden; 18: Austria). The remaining digits contain the country-specific questionnaire numbers.

Note:

8 non-unique respondent ID numbers have been identified; none of these are real duplicate cases, (France: '7000057', '700159', '700434', '70479', '701036'; Sweden: '1600100', '1600452', '1600540'; (digits 1-2: COUNTRY ID; digits 3-7: RESPONDENT ID).

Actual number is coded.

v590 - INTERVIEWER ID

Original Interviewer Identification Number

This is the original interviewer identification number as supplied by INRA. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 03: West Germany; 04: Greece; 05: Italy; 06: Spain; 07: France; 08: Ireland; 09: Northern Ireland; 10: Luxembourg; 11: Netherlands; 12: Portugal; 13: Great Britain; 14: East Germany; 16: Finland; 17: Sweden; 18: Austria). The remaining digits contain the country-specific interviewer numbers.

Note:

Actual number is coded.
