Acknowledgements

Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences.

Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (<http://zacat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

1.2 Content

1.2.1 Abstract

This round of Eurobarometer surveys queried respondents on the standard Eurobarometer measures as well as agricultural policy, development aid, social capital, and information and communication technology. To start the interview, standard trend questions were asked regarding support for membership of the European Union, trust in three specific institutions (the Parliament, the Commission, and the Council), support for the European Constitution, and the international political situation. Next, questions were asked regarding agriculture policy. Respondents gave their views on the role of the agriculture policy of the European Union (EU), whether the policy was playing its role well or badly, and whether the EU should subsidize agricultural products or grant more funds to the overall rural economy and to direct support for farmers. The third portion of the interview collected information on respondents' views on development aid. Questions were asked pertaining to the importance of helping people in impoverished countries, providing aid to those countries, how much of the nation's and the European Commission's budget should be spent on aid to other countries, whether the respondent had heard about the Millennium Development Goals, and which three actions would be the most important for their government to undertake in order to help developing countries achieve the Millennium Development Goals. Another major focus of the survey was social capital. A series of questions addressed satisfaction with life, the importance of different aspects of life, personal networks, political and social commitment, and discrimination experience. The last topic of the survey was information and communication technology at the workplace. Respondents were asked what technological devices were most prevalent in their daily lives (both professional and personal), to what extent they made use of computers and the Internet, whether they had received information and communication technology training, and whether they were able to telecommute (telework). Background information includes respondent's age, gender, nationality, origin of birth (personal and parental), marital status, left-to-right political self-placement, occupation, age when they stopped full-time education, household composition, and region of residence.

1.3 Universe

In all, Eurobarometer 62.2 interviewed 27.008 citizens of the 25 countries in the European Union (nationals and non-nationals but EU-citizens) after the 2004 enlargement. All respondents were residents in the respective country and aged 15 and over. They were supposed to have sufficient command of one of the respective national language(s) to answer the questionnaire. Separate samples were drawn for Northern Ireland and East Germany. This wave was also conducted in the remaining Accession Countries (AC) Bulgaria and Romania.

1.4 Sampling procedure

A multi-stage, random (probability) sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regional units in every country (Statistical Office of the European Community, EUROSTAT NUTS 2 or equivalent). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of starting addresses was selected from each sampled PSU, at random. Further addresses were chosen systematically using standard random route procedures as every Nth address from the initial address. In each household, a respondent was drawn, at random, following the closest birthday rule. No more than one interview was conducted in each household.

The regular sample size (in the sense of completed interviews) is 1000 respondents per country, except the United Kingdom with separate samples for Great Britain (1000) and Northern Ireland (300), Germany with separate samples for the Eastern (500) and the Western part (1000), and Luxembourg, Cyprus (Republic), and Malta with 500 interviews each. The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

From November 22 to December 19, 2004, the TNS Opinion & Social, a consortium created between Taylor Nelson Sofres and EOS Gallup Europe, carried out the fieldwork for this Eurobarometer, at the request of the European Commission, Directorate General Press and Communication, Opinion Polls. TNS Opinion & Social is based at Avenue Herrmann Debroux, 40, 1160 Brussels, Belgium. TNS Opinion & Social coordinates the fieldwork carried out through its network of national institutes.

1.6 Mode of data collection

In all countries, fieldwork was conducted on the basis of detailed and uniform instructions prepared by TNS Opinion Social. Interviews were conducted face-to-face in people's home in the appropriate national language. As far as the data capture is concerned, CAPI (Computer Assisted Personal Interview) was used in those countries where this technique was available.

Equivalent French and English basic questionnaires were developed for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country. Backtranslation procedures were applied for controlling semantic equivalence.

1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as

redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factor corrects for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country as well as each lower level sample (Great Britain and Northern Ireland, East and West Germany) are represented in proportion to its population size within different groupings, or according to the historical states of European unification (e.g. founder members, new members, Euro zone) in the case of the EUROPEAN WEIGHTS, or for the United Kingdom (WEIGHT SPECIAL UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31) and for Germany as a whole (WEIGHT SPECIAL GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general all samples which do not belong to the respective group of samples under consideration are excluded from calculation.

The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 4) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

Eurobarometer 62.2 provides three (post-stratification) NATION WEIGHTS: W1 (WEIGHT RESULT FROM TARGET) for separate analysis or comparison of individual samples (countries or regions on sub-national level), W4 (WEIGHT SPECIAL UNITED KINGDOM) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole, and W3 (WEIGHT SPECIAL GERMANY), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a

whole. W3 and W4 exclude all other countries from calculation, but include the post-stratification factors for the United Kingdom and Germany respectively.

The EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries, of accession or candidate countries, and of Euro zone countries, representing different historical states of European integration (e.g. EU6 = six founder members) . All post-stratification factors are included.

Table 2: Overview of population size weights

European Weights in Eurobarometer 62.2	Function
W5 to W9, W11, W14	grouping EU member countries
W10, W13	grouping new member countries
W15	grouping candidate/accession countries
W16	grouping member + candidate/accession countries
W12	grouping (non-)Eurozone countries

For more detailed information on the individual weights please see the corresponding variable description.

1.8 Data preparation

The data received by GESIS-ZA from TNS Opinion & Social were checked for completeness, missing and duplicate records, for illegal (wild) codes and for (formal) consistency of response patterns and question routing. Errors discovered by these procedures are documented or corrected, as a general rule after consulting the data provider. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable DDI-XML compliant documentation was created for this dataset by GESIS-ZA.

GESIS-ZA added "Inappropriate" (Inap.) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the original questionnaire was adhered to for (almost) every respondent.

All questions or single question items referring to respondents which are currently working (coded 5–18 in D15a) are filtered accordingly, also if not explicitly indicated in the questionnaire (SPSS SYSMIS in the original data set).

Users should note that answers to multiple-response questions are (originally) represented by a series of binary "dummy" variables (i.e. variables which take on values of one and zero only), creating separate "dummy" variables to explicitly represent "Don't know", "No answer" or other residual responses, such as "None of the above". GESIS-ZA has recoded these residual responses in the case of inconsistencies with respect to the series of substantial answers.

GESIS-ZA has recoded the missing answers (NA) represented in the original data set by blanks (system missing) to standard values. Their practically complete absence suggests that eventual cases of not explicitly coded item non-response, might be collapsed with the DK (don't know) category.

Question text and contingency text appearing in the variable description is taken from English language version of the basic (bilingual) questionnaire. Coding schemes and other documentation are based on the English

language version of the basic (bilingual) questionnaire or on the respective SPSS data definition statements as provided by TNS Opinion & Social. In case of any discrepancy between questionnaires, SPSS definitions and data regarding the coding scheme of a variable, GESIS-ZA as a general rule carried out any correction in agreement with the data provider.

If the documentation for country-specific questions or answer categories is provided in another languages than English, GESIS-ZA documents the original language wording and supplies the English translation in brackets.

Please notice, that categories and scales for protocol variables P6 (SIZE OF COMMUNITY) and P7 (REGION) may have changed compared to former Eurobarometer waves up to survey 61.

1.9 Further remarks

The topical modules CAP (QB1 to QB4) and DEVELOPMENT AID (QC1 to QC13) are not surveyed in Bulgaria and Romania.

The topical module INFORMATION TECHNOLOGY (QE1 to QE12) is only surveyed in Bulgaria and Romania. In the 25 European Union member countries identical questions were asked in the framework of Eurobarometer 62.1 (ZA4230).

2 Eurobarometer Series Description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 4: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.2OVR, 55.1OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.2OVR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 5) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 5: Overview of Eurobarometer surveys with standard EU and trend question modules

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

3 Dataset structure and standards

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 6: ZEUS Party Family Code (slightly modified)

Category		Party Family
0	(001-099)	not affiliated / electoral alliances across "families"
1	(100-199)	Communists
2	(200-299)	Socialists
3	(300-399)	Liberals
4	(400-499)	Christian Democrats
5	(500-599)	Conservatives
6	(600-699)	Extreme Rights / Nationalists
7	(700-799)	Regionalists / Ethnic
8	(800-899)	Environmental parties
9	(900-949)	Agricultural parties
9	(950-989)	other special issue parties (e.g. Eurosceptics) and independents
	990	other (spontaneous)
	994	not voting age
	995	empty ballot (blank) or invalid vote
	996	not voted / would not vote
	997	Refused
	998	DK / DK+NA if NA not coded separately
	999	INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION – ALL SAMPLES ISO 3166).

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (–1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded "real" values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission's official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

CROSS-TABULATION: The absolute frequencies of the occurrence of values (<i>absolute values</i>) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies (<i>row percent</i>) refer to the valid cases (<i>n valid sum</i>), i.e. the total number of cases (<i>n sum</i>) reduced by the number of cases defined as missing data (<i>M</i>). For display and place saving reasons excluded countries or areas may be completely dropped from the table.																																																																																																																																																																																																																																																																																																																																																					
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (<i>M</i>), i.e. <i>percent</i> on the basis of all cases (<i>sum</i>) and <i>valid percent</i> on the basis of the <i>valid cases</i> .																																																																																																																																																																																																																																																																																																																																																					

5 Variable Documentation

Variable, Label

Question Text (English Language)

v1 - STUDY NUMBER DISTRIBUTOR

Distributor Archive Study Number

Study Number of the distributing archive.

v1

Value	Label	Missing	Count	Percent	Valid Percent
4231			27008	100.0	100.0
	Sum		27008	100.0	100.0
	Valid Cases		27008		

v2 - STUDY NUMBER PRODUCER

ZA Study Number

Study number of the data set producer.

v2

Value	Label	Missing	Count	Percent	Valid Percent
4231			27008	100.0	100.0
	Sum		27008	100.0	100.0
	Valid Cases		27008		

v3 - EDITION NUMBER

ZA / ICPSR Edition Number

The number identifying the release edition of this data set.

1 1st za edition as of 24-11-2007

Note:

Please see variable VERSION ("GESIS ARCHIVE VERSION") for further information on the version number of this data set and the corresponding release date.

v3

Value	Label	Missing	Count	Percent	Valid Percent
1	1st za edition as of 24-11-2007		27008	100.0	100.0
	Sum		27008	100.0	100.0
	Valid Cases		27008		

version - GESIS ARCHIVE VERSION

VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

On occasion of the implementation of this versioning scheme (2010-04-13), the default version number 1.0.0 has been created automatically for this Eurobarometer.

Version 1.1.0 adds the VERSION variable and makes minor errata corrections which are documented on variable level, if applicable.

Former version or edition identification variables are maintained unchanged as a reference to former releases.

version

Value	Label	Missing	Count	Percent	Valid Percent
1.1.0 (2012-03-30)			27008	100.0	100.0
	Sum		27008	100.0	100.0
	Valid Cases		27008		

v4 - EUROBAROMETER NUMBER

ZA / ICPSR Part Number

The number identifying the Eurobarometer sample.

1 Eurobarometer 62.2

v4

Value	Label	Missing	Count	Percent	Valid Percent
1	Eurobarometer 62.2		27008	100.0	100.0
	Sum		27008	100.0	100.0
	Valid Cases		27008		

v5 - ID SERIAL NUMBER

Sequential respondent identification number assigned by ZA

A unique serial number is assigned to each respondent.

v6 - NATION - ALL SAMPLES

NATION - ALL SAMPLES

All samples including separate samples for East and West Germany and for Great Britain and Northern Ireland.

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany West
- 5 Italy
- 6 Luxembourg
- 7 Denmark

v7 - NATION - ALL SAMPLES ISO 3166

NATION - ALL SAMPLES ISO 3166

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

v8 - W1 WEIGHT RESULT FROM TARGET

W1 WEIGHT RESULT FROM TARGET

W1 WEIGHT RESULT FROM TARGET is for use in separate analyses of individual countries (=samples). It reproduces the real number of cases for each sample. British and Northern Irish as well as East and West German samples are weighted separately. This weight corresponds to former NATION WEIGHT II (up to EUROBAROMETER 31). Use NATION variable V6 or V7.

v9 - NATION - UNITED KINGDOM

NATION - UNITED KINGDOM

Great Britain and Northern Ireland are coded together.

0 Not United Kingdom

1 United Kingdom

v10 - W4 WEIGHT SPECIAL UNITED KINGDOM

W4 WEIGHT SPECIAL UNITED KINGDOM

W4 WEIGHT SPECIAL UNITED KINGDOM adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom and should be used whenever the United Kingdom is to be analyzed as a whole. The national weights are included. This weight in its function partly corresponds to former NATION WEIGHT I (until EUROBAROMETER 31). All other samples are excluded from calculation.

v11 - NATION - UNITED GERMANY

NATION - UNITED GERMANY

East and West Germany are coded together.

0 Not Germany

1 Germany

v65 - D15B OCCUPATION OF RESPONDENT - LAST JOB

D.15B

ASK D.15B ONLY IF NOT DOING ANY PAID WORK CURRENTLY, CODE 1 TO 4 IN D.15A

Did you do any paid work in the past? What was your last occupation?

SELF-EMPLOYED

- 1 Farmer
- 2 Fisherman
- 3 Professional (lawyer, medical practitioner, accountant, architect, ...)
- 4 Owner of a shop, craftsmen, other self-employed person
- 5 Business proprietors, owner (full or partner) of a company

EMPLOYED

- 6 Employed professional (employed doctor, lawyer, accountant, architect)
- 7 General management, director or top management (managing directors, director general, other director)
- 8 Middle management, other management (department head, junior manager, teacher, technician)
- 9 Employed position, working mainly at a desk
- 10 Employed position, not at a desk, but travelling (salesmen, driver, ...)
- 11 Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, ...)
- 12 Supervisor
- 13 Skilled manual worker
- 14 Other (unskilled) manual worker, servant

0 NA

15 Never did any paid work

99 Inap. (not coded 1 to 4 in V64)

Note:

Please notice that numeration differs from questionnaire.

Please notice high numbers of Bulgarian cases and to a lesser extent in Romania coded "NA".

Last trend: EB62.1, D.15B

v150 - QB4 EU CAP - GRANT DEVELOPM FUNDS

Q.B4

DO NOT ASK Q.B1 TO Q.C13 IN BULGARIA AND ROMENIA

The European Union is subsidising agricultural products less and less. However, it is granting more funds for the protection and development of the overall rural economy and for direct support to farmers. Do you think that this development is ...?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

v155 - QC3 DEVELOPM GOALS: PROM GENDER EQUALITY

Q.C3

DO NOT ASK Q.B1 TO Q.C13 IN BULGARIA AND ROMANIA

In the year 2000, heads of State and Government representing all countries in the world agreed to achieve a number of goals to improve the lives of people in developing countries by the year 2015. These are called the Millennium Development Goals. I am now going to read you these goals. For each goal, please tell me how likely you think that it will be achieved by 2015.

v160 - QC3 DEVELOPM GOALS: FAIR ACCESS TO MARKETS

Q.C3

DO NOT ASK Q.B1 TO Q.C13 IN BULGARIA AND ROMANIA

In the year 2000, heads of State and Government representing all countries in the world agreed to achieve a number of goals to improve the lives of people in developing countries by the year 2015. These are called the Millennium Development Goals. I am now going to read you these goals. For each goal, please tell me how likely you think that it will be achieved by 2015.

v163 - QC4A DEVELOPM GOVERNMENT ACTION - 1ST

Q.C4A

DO NOT ASK Q.B1 TO Q.C13 IN BULGARIA AND ROMENIA

Here is a list of possible actions which our Government could undertake to help developing countries achieve the Millennium Development Goals. Please tell me, which of these actions is, in your opinion, the most important ?

(SHOW CARD - ONLY ONE ANSWER PER COLUMN - READ OUT)

- 1 Cancel developing countries' debts to (OUR COUNTRY)
- 2 Promote more private investments in developing countries
- 3 Reduce the possibility of armed conflict and war
- 4 Increase development aid to countries committed to poverty reduction to meet internationally agreed aid targets
- 5 Provide training and technical expertise to developing countries
- 6 Make sure that developing countries get fairer access to European markets for their agricultural, fishery and textile products
- 7 Implement international environment agreements
- 8 None of these (SPONTANEOUS)
- 9 DK

v175 - QC5 DEVELOPMENT AID BY GOVERNMENT

Q.C5

ASK ALL EXCEPT IN BULGARIA AND ROMANIA

Do you think the (NATIONALITY) Government helps poor people in Africa, Latin America, Asia, etc. to develop? We are not talking here about humanitarian aid (that is assistance provided in emergency situations like war, famine, etc.), but about development aid.

(ONE ANSWER ONLY)

- 1 Yes
- 2 No
- 3 DK
- 9 Inap. (coded 29 or 30 in V6)

v324 - QD10 VOLONTARY ACT COMMUNIC: INTERNET

Q.D10

IF "DO VOLONTARY WORK", CODE 1 TO 14 IN Q.D9C

When participating in or collaborating with voluntary activities, would you say that the use of the following communication tools is very important, fairly important, not very important, or not at all important?

(READ OUT)

Q.D10_1 The Internet

- 1 Very important
- 2 Fairly important
- 3 Not very important
- 4 Not at all important
- 5 DK
- 9 Inap. (not any coded 1 in V308 to V321)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v329 - QD12 ELDERLY PARENTS - BEST CARE

Q.D12

Imagine an elderly father or mother who lives alone. In your opinion, what do you think would be best if this person could no longer manage to live on his/her own?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

- 1 He/she should come live with one of his/her children
- 2 One of his/her children should move into their house in order to provide him/her with the necessary care
- 3 One of his/her children should regularly visit their home, in order to provide him/her with the necessary care
- 4 Public or private service providers should visit their home and provide him/her with appropriate health care and services
- 5 He/she should move to an old people's home or a nursing home
- 6 It depends (SPONTANEOUS)
- 7 DK

0 Not mentioned

1 Mentioned

9 Inap. (not any 1 in V366-V369 and 379-V382)

99 Inap. (coded 1 to 28 in V6)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v465 - D1 LEFT-RIGHT PLACEMENT - RECODED 3 CAT

D.1R1 Left - right scale (RECODED)

- 1 (1 - 4) Left
- 2 (5 - 6) Centre
- 3 (7 -10) Right
- 4 DK/Refusal

Derivation:

This variable collapses answers to D.1 into three categories.

Note:

See D.1 for complete question text.

v467 - D7 MARITAL STATUS

D.7

Could you give me the letter which corresponds best to your own current situation?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

- 1 Married
- 2 Remarried
- 3 Unmarried, currently living with partner
- 4 Unmarried, having never lived with a partner
- 5 Unmarried, having previously lived with a partner, but now on my own
- 6 Divorced
- 7 Separated
- 8 Widowed
- 9 Other (SPONTANEOUS)
- 97 Refusal (SPONTANEOUS)

v468 - D8 AGE EDUCATION

D.8

How old were you when you stopped full-time education?

(IF "STILL STUDYING", CODE "00" - IF "NO FULL-TIME EDUCATION", CODE "98" - IF "DK", CODE "99")

- 0 NA
- 5 5 years
- 70 70 years
- 97 No full-time education
- 98 Still studying
- 99 DK

Note:

Original code "00" recoded to "98"

Original code "98" recoded to "97"

Actual number is coded.

Last trend: EB62.1, D.8

v469 - D8 AGE EDUCATION - RECODED

D.8R Age when finished full-time education - RECODED

- 0 NA
- 1 Up to 14 years
- 2 15 years
- 3 16 years
- 4 17 years
- 5 18 years
- 6 19 years
- 7 20 years
- 8 21 years
- 9 22 years and older
- 10 Still studying
- 11 DK
- 12 No full-time education

Note:

See D.8 for complete question text.

v471 - D11 AGE EXACT

D.11

How old are you?

0 NA

15 15 years

96 96 years

Note:

Last trend: EB62.1, D.11

Actual number is coded.

v472 - D11 AGE RECODED - FOUR GROUPS

D.11R1 R'S age - four collapsed categories

- 0 NA
- 1 15 - 24 years
- 2 25 - 39 years
- 3 40 - 54 years
- 4 55 years and older

Derivation:

This variable collapses answers to D.11 into four categories.

Note:

See D.11 for complete question text.

v482 - D40A HOUSEHOLD COMPOSITION: AGED 15+ RECODED

D.40A HOUSEHOLD COMPOSITION: AGED 15+ RECODED

- 1 One
- 2 Two
- 3 Three
- 4 Four or more

Derivation:

This variable groups the summarized variable V481.

Note:

See V475, V477 and V479 for complete question text.

Generated by the archive.

v485 - D40C HOUSEHOLD COMPOSITION: AGED 10-14

D.40C

Could you tell me how many children aged 10 to 14 years old live in your household?

(READ OUT - WRITE DOWN - IF "NONE", PLEASE CODE "00")

- 0 None
- 1 One
- 2 Two
- 3 Three
- 4 Four
- 5 Five
- 6 Six
- 7 Seven
- 9 Nine
- 10 Ten
- 11 Eleven

Note:

v494 - P2 TIME OF INTERVIEW

P.2 Time of the beginning of the interview

Note:

Ambiguous time specifications in V494 have been recoded to '0' in V495 (NA (ambiguous)).

Actual number is coded.

v495 - P2 TIME OF INTERVIEW - RECODED

P.2 Time of the beginning of the interview - RECODED

- 0 NA (ambiguous)
- 1 Before 8 h
- 2 8 - 12 h
- 3 13 - 16 h
- 4 17 - 19 h
- 5 20 - 22 h
- 6 23 h +

Derivation:

This variable collapses specifications in V494.

Note:

Ambiguous time specifications in V494 have been recoded to '0' in V495 (NA (ambiguous)).

v496 - P3 DURATION OF INTERVIEW

P.3 Number of minutes the interview lasted

1 One minute
361 361 minutes

Note:
Actual number is coded.

v497 - P3 DURATION OF INTERVIEW - RECODED

P.3 Number of minutes the interview lasted - RECODED 7 CAT

- 1 Less than 14 minutes
- 2 15 - 29 minutes
- 3 30 - 44 minutes
- 4 45 - 59 minutes
- 5 60 - 74 minutes
- 6 75 - 89 minutes
- 7 More than 90 minutes

Derivation:

This variable collapses specifications in V496.

v500 - P6 SIZE OF COMMUNITY - FRANCE

P.6_FR (Objective) Size of community: France

- 1 Less than 2.000 inhabitants
- 2 2.000 - 20.000 inhabitants
- 3 20.001 - 100.000 inhabitants
- 4 100.001 and more inhabitants
- 5 Paris (Agglomeration parisienne)
- 99 Inap. (not coded 1 in V6)

v500, weighted by v8

Value	Label	Missing	Count	Percent	Valid Percent
1	Less than 2.000		257	1.0	25.6
2	2.000 - 20.000		173	0.6	17.2
3	20.001 - 100.000		134	0.5	13.3
4	100.001 and more		289	1.1	28.8
5	Paris (Agglomeration parisienne)		152	0.6	15.1
99	Inap. (not 1 in V6)	M	26004	96.3	
	Sum		27008	100.0	100.0
	Valid Cases		1004		

v501 - P6 SIZE OF COMMUNITY - BELGIUM

P.6_BE (Objective) Size of community: Belgium

- 1 Other communities
- 2 Secondary communities
- 3 Urban communities
- 4 Big conglomerations
- 99 Inap. (not coded 2 in V6)

Note:

Starting with Eurobarometer 62 the classification scheme has been changed: Labelling for category '4' changed replacing "5 grands centres" by "big conglomerations"; frequency patterns unchanged.

v501, weighted by v8

Value	Label	Missing	Count	Percent	Valid Percent
1	Other communities		258	1.0	25.5
2	Secondary communities		235	0.9	23.2
3	Urban communities		224	0.8	22.2
4	Big conglomerations		294	1.1	29.1
99	Inap. (not 2 in V6)	M	25997	96.3	
	Sum		27008	100.0	100.0
	Valid Cases		1011		

v502 - P6 SIZE OF COMMUNITY - NETHERLANDS

P.6_NL (Objective) Size of community: The Netherlands

- 1 < 5.000 inhabitants (category not used)
- 2 5.000 to 10.000 inhabitants
- 3 10.001 to 20.000 inhabitants
- 4 20.001 to 50.000 inhabitants
- 5 50.001 to 100.000 inhabitants
- 6 100.001 to 150.000 inhabitants
- 7 150.001 to 250.000 inhabitants
- 8 More than 250.000 inhabitants
- 99 Inap. (not coded 3 in V6)

Note:

Starting with Eurobarometer 62 the classification scheme has been changed: Switched from seven to eight categories; categories '1' to '5' (up to 100.000) unchanged; new categories are '6' (100.001 to 150.000), '7' (150.001 to 250.000), and '8' (more than 250.000); mapping to former categories by collapsing concerned categories.

v502, weighted by v8

Value	Label	Missing	Count	Percent	Valid Percent
2	5.000 to 10.000		36	0.1	3.5
3	10.001 to 20.000		157	0.6	15.4
4	20.001 to 50.000		331	1.2	32.5
5	50.001 to 100.000		167	0.6	16.4
6	100.001 to 150.000		102	0.4	10.0
7	150.001 to 250.000		86	0.3	8.5
8	More than 250.000		138	0.5	13.6
99	Inap. (not 3 in V6)	M	25992	96.2	
	Sum		27008	100.0	100.0
	Valid Cases		1016		

v503 - P6 SIZE OF COMMUNITY - GERMANY

P.6_DE (Objective) Size of community: Germany

- 1 Less than 2.000 inhabitants
- 2 2.000 - less than 5.000 inhabitants
- 3 5.000 - less than 20.000 inhabitants
- 4 20.000 - less than 50.000 inhabitants
- 5 50.000 - less than 100.000 inhabitants
- 6 100.000 - less than 500.000 inhabitants
- 7 500.000 and more inhabitants
- 99 Inap. (not coded 4 or 14 in V6)

Note:

Starting with Eurobarometer 62 the classification scheme has been changed: East and West integrated; classification scheme unchanged.

Weighting required for united Germany (East+West) - see V12

v503, weighted by v12

Value	Label	Missing	Count	Percent	Valid Percent
1	Less than 2.000		114	7.4	7.4
2	2.000 - less than 5.000		152	9.9	9.9

99	Inap. (not 4 or 14 in V6)	M	0	0.0	
	Sum		1533	99.9	100.0
	Valid Cases		1533		

v504 - P6 SIZE OF COMMUNITY - ITALY

P.6_IT (Objective) Size of community: Italy

- 1 Up to 10.000 inhabitants
- 2 10.001 to 30.000 inhabitants
- 3 30.001 to 100.000 inhabitants
- 4 100.001 to 250.000 inhabitants
- 5 More than 250.000 inhabitants
- 99 Inap. (not coded 5 in V6)

Note:

Starting with Eurobarometer 62 the classification scheme has been changed: Switched from four to five categories; categories '1', '4' (formerly '3') and '5' (formerly '4') unchanged; former category '2' split up into '2' (10.001 to 30.000) and '3' (30.001 to 100.000).

v504, weighted by v8

Value	Label	Missing	Count	Percent	Valid Percent
1	Up to 10.000		332	1.2	33.0
2	10.001 to 30.000		231	0.9	23.0
3	30.001 to 100.000		211	0.8	21.0
4	100.001 to 250.000		70	0.3	7.0
5	More than 250.000		161	0.6	16.0
99	Inap. (not 5 in V6)	M	26003	96.3	
	Sum		27008	100.0	100.0
	Valid Cases		1005		

v505 - P6 SIZE OF COMMUNITY - LUXEMBOURG

P.6_LU (Objective) Size of community: Luxembourg

- 1 Up to 2.999 inhabitants
- 2 3.000 to 4.999 inhabitants
- 3 5.000 to 9.999 inhabitants
- 4 10.000 to 19.999 inhabitants (Dudelange, Differdange)
- 5 20.000 to 50.000 inhabitants (Esch Alzette)
- 6 More than 50.000 inhabitants (Luxembourg - Ville)
- 99 Inap. (not coded 6 in V6)

Note:

Starting with Eurobarometer 62 the classification schemes has been changed: Categories modified: '1' (up to 2.999, formerly up to 2.500), '2' (3.000 to 4.999, formerly 2.501 to 5.000); categories '4' and '5' now specify cities.

v505, weighted by v8

Value	Label	Missing	Count	Percent	Valid Percent
1	Up to 2.999		107	0.4	20.9
2	3.000 to 4.999		93	0.3	18.2
3	5.000 to 9.999		107	0.4	20.9
4	10.000 to 19.999 (Dudelange, Differdange)		85	0.3	16.6
5	20.000 to 50.000 (Esch Alzette)		32	0.1	6.3
6	More than 50.000 (Luxembourg - Ville)		87	0.3	17.0
99	Inap. (not 6 in V6)	M	26498	98.1	
	Sum		27008	100.0	100.0
	Valid Cases		510		

v506 - P6 SIZE OF COMMUNITY - DENMARK

P.6_DK (Objective) Size of community: Denmark

- 1 Municip. without built-up area
- 2 Municip. with less than 33% of inhabitants in built-up area
- 3 Municip. with 33-50% of inhabitants in built-up area
- 4 Municip. with at least 50% of inhabitants in built-up area
- 5 Municip. (10.000 - 19.999 inhabitants)
- 6 Municip. (20.000 - 39.999 inhabitants)
- 7 Municip. (40.000 - 99.999 inhabitants)
- 8 Municip. (more than 100.000 inhabitants)
- 9 Remaining groups in metropolitan area
- 10 Other municip. in metrop. area - minimum 10.000 of inhabitants
- 11 Metropolitan suburbs
- 12 The capital
- 99 Inap. (not coded 7 in V6)

Note:

Starting with Eurobarometer 62 the classification scheme has been changed: Switched from seven to twelve categories; new classification; no mapping.

v506, weighted by v8

Value	Label	Missing	Count	Percent	Valid Percent
1	Municip. without built-up area		50	0.2	4.9
2	Municip. with less than 33% in built-up area		59	0.2	5.8
3	Municip. with 33-50% in built-up area		132	0.5	13.1
4	Municip. with at least 50% in built-up area		89	0.3	8.8
5	Municip. (10.000 - 19.999)		97	0.4	9.6
6	Municip. (20.000 - 39.999)		80	0.3	7.9
7	Municip. (40.000 - 99.999)		51	0.2	5.0
8	Municip. (more than 100.000)		109	0.4	10.8
9	Remaining groups in metropolitan area		44	0.2	4.4
10	Other municip. in metrop. area - min. 10.000		50	0.2	4.9
11	Metropolitan suburbs		119	0.4	11.8
12	The capital		131	0.5	13.0
99	Inap. (not 7 in V6)	M	25997	96.3	
	Sum		27008	100.0	100.0
	Valid Cases		1011		

v507 - P6 SIZE OF COMMUNITY - IRELAND

P.6_IE (Objective) Size of community: Ireland

- 1 Less than 1.500 inhabitants
- 2 1.500 to 4.999 inhabitants
- 3 5.000 to 10.000 inhabitants
- 4 More than 10.000 inhabitants
- 5 Cities/County Boroughs
- 99 Inap. (not coded 8 in V6)

Note:

Starting with Eurobarometer 62 the classification scheme has changed: Switched from four to five categories; new classification; no mapping.

v507, weighted by v8

Value	Label	Missing	Count	Percent	Valid Percent
1	Less than 1.500		398	1.5	39.8
2	1.500 to 4.999		52	0.2	5.2
3	5.000 to 10.000		54	0.2	5.4
4	More than 10.000		111	0.4	11.1
5	Cities/County Boroughs		385	1.4	38.5
99	Inap. (not 8 in V6)	M	26008	96.3	
	Sum		27008	100.0	100.0
	Valid Cases		1000		

v508 - P6 SIZE OF COMMUNITY - UNITED KINGDOM

P.6_GB (Objective) Size of community: United Kingdom

- 1 Rural
- 2 Urban
- 3 Metropolitan (Great Britain)
- 99 Inap. (not coded 9 or 10 in V6)

Note:

Starting with Eurobarometer 62 the classification scheme has been changed: Integrated variable; category "Suburban" dropped for Great Britain; new classification for Northern Ireland; no clear mapping.

The original variable integrated data for Northern Ireland (codes 1-2) and Great Britain (codes 3-5). The original categories (value label) were corrected after consultation with TNS OPINION & SOCIAL. In order to facilitate the analysis for the United Kingdom as a whole, identical categories have been coded together (matched).

Within United Kingdom NUTS 1 region (P7UK/V533) NORTH WEST the distribution for Size of Community (P6UK) differs considerably compared to later surveys.

Weighting required for United Kingdom (Great Britain and Northern Ireland) - see V10

v508, weighted by v10

Value	Label	Missing	Count	Percent	Valid Percent
1	Rural		191	14.0	14.0
2	Urban		470	34.4	34.4
3	Metropolitan (Great Britain)		705	51.6	51.6
99	Inap. (not 9 or 10 in V6)	M	0	0.0	
	Sum		1366	100.0	100.0
	Valid Cases		1366		

v509 - P6 SIZE OF COMMUNITY - GREECE

P.6_GR (Objective) Size of community: Greece

- 1 Rural
- 2 Semi-urban
- 3 Urban
- 4 Thessaloniki
- 5 Athens
- 99 Inap. (not coded 11 in V6)

Note:

Starting with Eurobarometer 62 the classification scheme has been changed: New classification, no clear mapping.

v509, weighted by v8

Value	Label	Missing	Count	Percent	Valid Percent
1	Rural		272	1.0	27.2
2	Semi-urban		132	0.5	13.2
3	Urban		233	0.9	23.3
4	Thessaloniki		72	0.3	7.2
5	Athens		291	1.1	29.1
99	Inap. (not 11 in V6)	M	26008	96.3	
	Sum		27008	100.0	100.0
	Valid Cases		1000		

v510 - P6 SIZE OF COMMUNITY - SPAIN

P.6_ES (Objective) Size of community: Spain

- 1 Up to 2.000 inhabitants
- 2 2.001 - 10.000 inhabitants
- 3 10.001 - 50.000 inhabitants
- 4 50.001 - 100.000 inhabitants
- 5 100.001 - 500.000 inhabitants
- 6 500.001 - 1.000.000 inhabitants
- 7 More than 1.000.000 inhabitants
- 99 Inap. (not coded 12 in V6)

Note:

Starting with Eurobarometer 62 the classification scheme has been changed: Reduced from eight to seven categories; former categories '5' and '6' collapsed (100.001 to 500.000).

v510, weighted by v8

Value	Label	Missing	Count	Percent	Valid Percent
1	Up to 2.000		74	0.3	7.1
2	2.001 - 10.000		163	0.6	15.6
3	10.001 - 50.000		263	1.0	25.2
4	50.001 - 100.000		107	0.4	10.2
5	100.001 - 500.000		250	0.9	23.9
6	500.001 - 1.000.000		68	0.3	6.5
7	More than 1.000.000		120	0.4	11.5
99	Inap. (not 12 in V6)	M	25963	96.1	
	Sum		27008	100.0	100.0
	Valid Cases		1045		

v511 - P6 SIZE OF COMMUNITY - PORTUGAL

P.6_PT (Objective) Size of community: Portugal

- 1 Less than 2.000 inhabitants
- 2 2.000 to 10.000 inhabitants
- 3 10.001 to 20.000 inhabitants
- 4 20.001 to 100.000 inhabitants
- 5 More than 100.000 inhabitants
- 99 Inap. (not coded 13 in V6)

Note:

Starting with Eurobarometer 62 the classification scheme has been changed: Reduced from eleven to five categories; collapsing former categories '1' to '5' (less than 2.000), '6' and '7' (2.000 to 10.000), '10' and '11' (more than 100.000).

v511, weighted by v8

Value	Label	Missing	Count	Percent	Valid Percent
1	Less than 2.000		431	1.6	43.1
2	2.000 to 10.000		174	0.6	17.4
3	10.001 to 20.000		100	0.4	10.0
4	20.001 to 100.000		164	0.6	16.4
5	More than 100.000		131	0.5	13.1
99	Inap. (not 13 in V6)	M	26008	96.3	
	Sum		27008	100.0	100.0
	Valid Cases		1000		

v512 - P6 SIZE OF COMMUNITY - FINLAND

P.6_FI (Objective) Size of community: Finland

- 1 Countryside (sparsely populated communes)
- 2 Rural population center (densely populated communes)
- 3 Other town / city (urban communes)
- 4 Capital area
- 99 Inap. (not coded 16 in V6)

Note:

Starting with Eurobarometer 62 the classification scheme has been changed: Categories modified (except for capital area); no well defined mapping; similar frequency patterns.

v512, weighted by v8

Value	Label	Missing	Count	Percent	Valid Percent
1	Countryside (sparsely pop. comm.)		216	0.8	21.0
2	Rural population center (densely pop. comm.)		171	0.6	16.6
3	Other town / city (urban comm.)		448	1.7	43.6
4	Capital area		193	0.7	18.8
99	Inap. (not 16 in V6)	M	25980	96.2	
	Sum		27008	100.0	100.0
	Valid Cases		1028		

v513 - P6 SIZE OF COMMUNITY - SWEDEN

P.6_SE (Objective) Size of community: Sweden

- 1 Countryside
- 2 Small town/populated area
- 3 Big city
- 99 Inap. (not coded 17 in V6)

Note:

Starting with Eurobarometer 62 the classification scheme has been changed: New classification scheme, replacing seven categories based on population figures by (three) types of community.

v513, weighted by v8

Value	Label	Missing	Count	Percent	Valid Percent
1	Countryside		117	0.4	11.6
2	Small town/populated area		535	2.0	53.0
3	Big city		358	1.3	35.4
99	Inap. (not 17 in V6)	M	25999	96.3	
	Sum		27008	100.0	100.0
	Valid Cases		1009		

v514 - P6 SIZE OF COMMUNITY - AUSTRIA

P.6_AT (Objective) Size of community: Austria

- 1 Up to 5.000 inhabitants
- 2 5.001 to 50.000 inhabitants
- 3 50.001 and more inhabitants
- 4 Wien (Vienna)
- 99 Inap. (not coded 18 in V6)

Note:

Starting with Eurobarometer 62 the classification scheme has been changed: Categories modified, replacing types of community by population figures for categories '2' and '3'; no well defined mapping; similar frequency patterns.

v514, weighted by v8

Value	Label	Missing	Count	Percent	Valid Percent
1	Up to 5.000		459	1.7	44.6
2	5.001 to 50.000		250	0.9	24.3
3	50.001 and more		112	0.4	10.9
4	Vienna		208	0.8	20.2

v568 - P13 LANGUAGE OF INTERVIEW - BELGIUM

P.13_BE Language of questionnaire: Belgium

- 1 French
- 2 Dutch
- 9 Inap. (not coded 2 in V6)

v568

Value	Label	Missing	Count	Percent	Valid Percent
1	French		457	1.7	45.2
2	Dutch		554	2.1	54.8
9	Inap. (not 2 in V6)	M	25997	96.3	
	Sum		27008	100.0	100.0
	Valid Cases		1011		

v569 - P13 LANGUAGE OF INTERVIEW - LUXEMBOURG

P.13_LU Language of questionnaire: Luxembourg

- 1 Luxembourgish
- 2 French
- 3 German
- 9 Inap. (not coded 6 in V6)

Note:

Starting with EB62.0 new category "German".

Starting with Eurobarometer 62 and with the change of fieldwork responsibility to TNS, the relation between average frequencies for language categories "French" and "Luxembourgish" appears to be inverted. The majority of respondents in Luxembourg are now coded as being interviewed in French and not in Luxembourgish as former Eurobarometer surveys indicate. It could not be ascertained if TNS (intermittently) changed the fieldwork strategy regarding languages. Starting with Eurobarometer 69 the former proportion is recovered, again representing the actual proportion between Luxembourgish and French as mother languages in Luxembourg. This is probably also true for Eurobarometer 68.1 and 68.2 where the labelling in the data set (value label) is shifted compared to the field questionnaire.

v569

Value	Label	Missing	Count	Percent	Valid Percent
1	Luxembourgish		79	0.3	15.5
2	French		423	1.6	82.9
3	German		8	0.0	1.6
9	Inap. (not 6 in V6)	M	26498	98.1	
Sum			27008	100.0	100.0
Valid Cases			510

v576 - ORIGINAL RESPONDENT ID

Original Respondent Identification Number

This is the original respondent identification number as supplied by TNS OPINION & SOCIAL. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 03: West Germany; 04: East Germany; 05: Greece; 06: Spain; 07: Finland; 08: France; 09: Ireland; 10: Italy; 11: Luxembourg; 12: Netherlands; 13: Austria; 14: Portugal; 15: Sweden; 16: Great Britain; 17: Northern Ireland; 18: Cyprus (Republic); 19: Czech Republic; 20: Estonia; 21: Hungary; 22: Latvia; 23: Lithuania; 24: Malta; 25: Poland; 26: Slovakia; 27: Slovenia; 28: Bulgaria; 29: Romania). The remaining digits contain the country-specific questionnaire numbers.

Note:

Actual number is coded.

v577 - INTERVIEWER ID

Original Interviewer Identification Number

This is the original interviewer identification number as supplied by TNS OPINION & SOCIAL. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 03: West Germany; 04: East Germany; 05: Greece; 06: Spain; 07: Finland; 08: France; 09: Ireland; 10: Italy; 11: Luxembourg; 12: Netherlands; 13: Austria; 14: Portugal; 15: Sweden; 16: Great Britain; 17: Northern Ireland; 18: Cyprus (Republic); 19: Czech Republic; 20: Estonia; 21: Hungary; 22: Latvia; 23: Lithuania; 24: Malta; 25: Poland; 26: Slovakia; 27: Slovenia; 28: Bulgaria; 29: Romania). The remaining digits contain the country-specific interviewer id number.

9999999999 Inap. (no data for France)

Note:

Actual number is coded.
