Acknowledgements

Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences.

Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (<http://zacat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

1.2 Content

1.2.1 Abstract

This round of Eurobarometer surveys diverged from the standard Eurobarometer measures and queried respondents on their opinions regarding labor and residential mobility, risk issues regarding food, smoking habits and passive smoking, AIDS prevention, and medical errors. Respondents' attitudes toward labor and residential mobility included what was most important for their quality of life, the main reasons they had for moving, what improved and what got worse after the last time they moved to another region or European Union country, whether they intended to move to another member state in the near future, their reasons for changing their place of residence, and the most important difficulties they would have to face. Respondents were also asked for their current job and previous job, their title, the reason for changing jobs, as well as their satisfaction with their current job and professional life. Respondents were asked additional questions about whether they took any training courses to improve their professional skills in the last 12 months, and the main reason why they did or did not. The second topic covered was risk issues regarding food. Respondents were asked questions such as: (1) what came to mind when thinking about possible problems or risks associated with food, (2) when going shopping for food, what were the most important factors that influenced their choices, (3) compared to ten years ago, had food safety improved, (4) if a serious food risk were found in fish or chicken, who would they trust the most to inform them about the risk, and (5) whether they had heard any European Union regulations about food safety, consumers' rights, or quality standards for hospitals. The third topic was about smoking habits and passive smoking. Respondents answered questions such as: (1) if they smoked every day, how many cigarettes a day they smoked, (2) if they were in favor of smoking bans in the public space, (3) how often they were bothered by exposure to tobacco smoke in daily life, and (4) why this exposure to tobacco bothered them. Another topic covered was AIDS prevention. Respondents' opinions were sought regarding how AIDS can be caught, whether the measures currently being undertaken in their country (such as an information campaign on the types of behavior that expose people to infection by the AIDS virus, and research funding to find an AIDS vaccine) were very effective and useful. The final topic, medical errors, asked how often respondents read or heard about medical errors in their country, how important a problem they thought medical errors were in their country, whether they or a family member suffered a serious medical error, and how likely it was that a hospital patient could avoid a serious medical error. Background information includes respondent's age, gender, nationality, origin of birth (personal and parental), marital status, left-to-right political self-placement, occupation, age when they stopped full-time education, household composition, region of residence, and use of a fixed or a mobile telephone.

1.3 Universe

In all, Eurobarometer 64.1 interviewed 24.643 citizens of the 25 countries in the European Union. All respondents were residents in the respective country, nationals and non-nationals but EU-citizens, and aged 15 and over. They were supposed to have sufficient command of one of the respective national language(s) to answer the questionnaire. Separate samples were drawn for Northern Ireland and East Germany.

1.4 Sampling procedure

A multi-stage, random (probability) sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regional units in every country (Statistical Office of the European Community, EUROSTAT NUTS 2 or equivalent). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of starting addresses was selected from each sampled PSU, at random. Further addresses were chosen systematically using standard random route procedures as every Nth address from the initial address. In each household, a respondent was drawn, at random, following the closest birthday rule. No more than one interview was conducted in each household.

The regular sample size (in the sense of completed interviews) is 1000 respondents per country, except the United Kingdom with separate samples for Great Britain (1000) and Northern Ireland (300), Germany with separate samples for the Eastern (500) and the Western part (1000), and Luxembourg, Cyprus (Republic), and Malta with 500 interviews each. The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

From September 2 to October 6, 2005, the TNS Opinion & Social, a consortium created between Taylor Nelson Sofres and EOS Gallup Europe, carried out the fieldwork for this Eurobarometer, at the request of the European Commission, Directorate General Press and Communication, Opinion Polls. TNS Opinion & Social is based at Avenue Herrmann Debroux, 40, 1160 Brussels, Belgium. TNS Opinion & Social coordinates the fieldwork carried out through its network of national institutes.

1.6 Mode of data collection

In all countries, fieldwork was conducted on the basis of detailed and uniform instructions prepared by TNS Opinion Social. Interviews were conducted face-to-face in people's home in the appropriate national language. As far as the data capture is concerned, CAPI (Computer Assisted Personal Interview) was used in those countries where this technique was available.

Equivalent French and English basic questionnaires were developed for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country. Backtranslation procedures were applied for controlling semantic equivalence.

1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factor corrects for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country as well as each lower level sample (Great Britain and Northern Ireland, East and West Germany) are represented in proportion to its population size within different groupings, or according to the historical states of European unification (e.g. founder members, new members, Euro zone) in the case of the EUROPEAN WEIGHTS, or for the United Kingdom (WEIGHT SPECIAL UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31) and for Germany as a whole (WEIGHT SPECIAL GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general all samples which do not belong to the respective group of samples under consideration are excluded from calculation.

The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 4) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

Eurobarometer 64.1 provides three (post-stratification) NATION WEIGHTS: W1 (WEIGHT RESULT FROM TARGET) for separate analysis or comparison of individual samples (countries or regions on sub-national level), W4 (WEIGHT SPECIAL UNITED KINGDOM) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole, and W3 (WEIGHT SPECIAL GERMANY), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. W3 and W4 exclude all other countries from calculation, but include the post-stratification factors for the United Kingdom and Germany respectively.

The EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries, of accession or candidate countries, and of Euro zone countries, representing different historical states of European integration (e.g. EU6 = six founder members) . All post-stratification factors are included.

Table 2: Overview of population size weights

European Weights in Eurobarometer 64.1	Function
W5 to W9, W11, W14	grouping EU member countries
W10, W13	grouping new member countries
W12	grouping (non-)Eurozone countries

For more detailed information on the individual weights please see the corresponding variable description.

1.8 Data preparation

The data received by GESIS-ZA from TNS Opinion & Social were checked for completeness, missing and duplicate records, for illegal (wild) codes and for (formal) consistency of response patterns and question routing. Errors discovered by these procedures are documented or corrected, as a general rule after consulting the data provider. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable DDI-XML compliant documentation was created for this dataset by GESIS-ZA.

GESIS-ZA added "Inappropriate" (Inap.) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the original questionnaire was adhered to for (almost) every respondent.

Users should note that answers to multiple-response questions are (originally) represented by a series of binary "dummy" variables (i.e. variables which take on values of one and zero only), creating separate "dummy" variables to explicitly represent "Don't know", "No answer" or other residual responses, such as "None of the above". GESIS-ZA has recoded these residual responses in the case of inconsistencies with respect to the series of substantial answers.

GESIS-ZA has recoded the missing answers (NA) represented in the original data set by blanks (system missing) to standard values. Their practically complete absence suggests that eventual cases of not explicitly coded item non-response, might be collapsed with the DK (don't know) category.

Question text and contingency text appearing in the variable description is taken from English language version of the basic (bilingual) questionnaire. Coding schemes and other documentation are based on the English language version of the basic (bilingual) questionnaire or on the respective SPSS data definition statements as provided by TNS Opinion & Social. In case of any discrepancy between questionnaires, SPSS definitions and data regarding the coding scheme of a variable, GESIS-ZA as a general rule carried out any correction in agreement with the data provider.

If the documentation for country-specific questions or answer categories is provided in another languages than English, GESIS-ZA documents the original language wording and supplies the English translation in brackets. Specific information on data preparation or inconsistencies is noted on variable level.

1.9 Further remarks

The topical modules on SMOKING HABITS (QC1 to QC14), AIDS PREVENTION (QD1 to QD4), and MEDICAL ERRORS (QE1 to QE8) were also surveyed in Romania, Bulgaria, Turkey, Croatia, and Northern Cyprus (TCC) in the framework of Eurobarometer 64.3 (ZA4415).

2 Eurobarometer Series Description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 4: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.2OVR, 55.1OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.2OVR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 5) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 5: Overview of Eurobarometer surveys with standard EU and trend question modules

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

3 Dataset structure and standards

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 6: ZEUS Party Family Code (slightly modified)

Category		Party Family
0	(001-099)	not affiliated / electoral alliances across "families"
1	(100-199)	Communists
2	(200-299)	Socialists
3	(300-399)	Liberals
4	(400-499)	Christian Democrats
5	(500-599)	Conservatives
6	(600-699)	Extreme Rights / Nationalists
7	(700-799)	Regionalists / Ethnic
8	(800-899)	Environmental parties
9	(900-949)	Agricultural parties
9	(950-989)	other special issue parties (e.g. Eurosceptics) and independents
	990	other (spontaneous)
	994	not voting age
	995	empty ballot (blank) or invalid vote
	996	not voted / would not vote
	997	Refused
	998	DK / DK+NA if NA not coded separately
	999	INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION – ALL SAMPLES ISO 3166).

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (–1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded “real” values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission’s official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

Header with DIGITAL OBJECT IDENTIFIER (DOI) linked to the Study Description in the GESIS Data Catalogue.	Eurobarometer 67.1 - February-March 2007 GESIS Study No. 4529 (v3.0.1, http://dx.doi.org/doi:10.4232/1.10983)																																																																																																																																																																																																																																																																																																																					
VARIABLE NAME (serial number assigned by the archive) and VARIABLE LABEL as defined in the dataset.	<div>v77 - QA1 FEELING FULFILLED: PROFESSIONAL LIFE</div> <div>Q.A1 ASK Q.A IN EU27 To what extent would you say that the life you live allows you to feel fulfilled in...? (SHOW CARD WITH SCALE - ONE ANSWER PER LINE) (READ OUT) Q.A1_2 Your professional life 1 Totally fulfilled 2 Fairly fulfilled 3 Not very fulfilled 4 Not at all fulfilled 5 Not applicable (SPONTANEOUS) 6 DK 9 Inap. not EU27 (not coded 1 to 31 in V6) Derivation: ... Note: Last trend: EB ... , Q. ...</div>																																																																																																																																																																																																																																																																																																																					
QUESTION NUMBER and full QUESTION TEXT from the basic questionnaire, including interviewer instructions. The numbers or letters that may appear together with the original question number, reflect the item order (multiple item or multiple response questions) or indicate if a question was recoded (R) or summarized (T), or if asked only in a single country (country abbreviation).																																																																																																																																																																																																																																																																																																																						
CODE VALUES occurring in the data for this variable and complete ANSWER TEXT from the basic questionnaire. Code values may differ from the questionnaire specification due to standardization. Abbreviations commonly used in the code definitions are DK (don't know), NA (not ascertained) and INAP (inappropriate).																																																																																																																																																																																																																																																																																																																						
DERIVATION information refers to the construction principle of indices or other derived variables (not in the example). NOTE delineates additional explanatory text subsuming trend information (last appearance of the question) or archive remarks on data processing and other issues relevant for the understanding or application of the variable.																																																																																																																																																																																																																																																																																																																						
CROSS-TABULATION: The absolute frequencies of the occurrence of values (<i>absolute values</i>) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies (<i>row percent</i>) refer to the valid cases (<i>n valid sum</i>), i.e. the total number of cases (<i>n sum</i>) reduced by the number of cases defined as missing data (<i>M</i>). For display and place saving reasons excluded countries or areas may be completely dropped from the table.																																																																																																																																																																																																																																																																																																																						
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (<i>M</i>), i.e. <i>percent</i> on the basis of all cases (<i>sum</i>) and <i>valid percent</i> on the basis of the <i>valid cases</i> .

5 Variable Documentation

Variable, Label

Question Text (English Language)

v1 - STUDY NUMBER DISTRIBUTOR

Distributor Archive Study Number

Study Number of the distributing archive.

v1

Value	Label	Missing	Count	Percent	Valid Percent
4413			24643	100.0	100.0
	Sum		24643	100.0	100.0
	Valid Cases		24643		

v2 - STUDY NUMBER PRODUCER

ZA Study Number

Study number of the data set producer.

v2

Value	Label	Missing	Count	Percent	Valid Percent
4413			24643	100.0	100.0
	Sum		24643	100.0	100.0
	Valid Cases		24643		

v3 - EDITION NUMBER

ZA / ICPSR Edition Number

The number identifying the release edition of this data set.

1 1st GESIS-ZA edition as of March 12, 2008

Note:

Please see variable VERSION ("GESIS ARCHIVE VERSION") for further information on the version number of this data set and the corresponding release date.

v3

Value	Label	Missing	Count	Percent	Valid Percent
1	1st GESIS-ZA edition as of March 12, 2008		24643	100.0	100.0
	Sum		24643	100.0	100.0
	Valid Cases		24643		

version - GESIS ARCHIVE VERSION

VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

On occasion of the implementation of this versioning scheme (2010-04-13), the default version number 1.0.0 has been created automatically for this Eurobarometer.

Version 1.1.0 adds the VERSION variable and makes minor errata corrections which are documented on variable level, if applicable.

Former version or edition identification variables are maintained unchanged as a reference to former releases.

version

Value	Label	Missing	Count	Percent	Valid Percent
1.1.0 (2012-03-30)			24643	100.0	100.0
	Sum		24643	100.0	100.0
	Valid Cases		24643		

v4 - EUROBAROMETER NUMBER

ZA / ICPSR Part Number

The number identifying the Eurobarometer sample.

1 Eurobarometer 64.1

v4

Value	Label	Missing	Count	Percent	Valid Percent
1	Eurobarometer 64.1		24643	100.0	100.0
	Sum		24643	100.0	100.0
	Valid Cases		24643		

v5 - ID SERIAL NUMBER

Sequential respondent identification number assigned by ZA

A unique serial number is assigned to each respondent.

v6 - NATION - ALL SAMPLES

NATION - ALL SAMPLES

All samples including separate samples for East and West Germany and for Great Britain and Northern Ireland.

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany West
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland

v7 - NATION - ALL SAMPLES ISO 3166

NATION - ALL SAMPLES ISO 3166

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

v8 - W1 WEIGHT RESULT FROM TARGET

W1 WEIGHT RESULT FROM TARGET

W1 WEIGHT RESULT FROM TARGET is for use in separate analyses of individual countries (=samples). It reproduces the real number of cases for each sample. British and Northern Irish as well as East and West German samples are weighted separately. This weight corresponds to former NATION WEIGHT II (up to EUROBAROMETER 31). Use NATION variable V6 or V7.

v9 - NATION - UNITED KINGDOM

NATION - UNITED KINGDOM

Great Britain and Northern Ireland are coded together.

0 Not United Kingdom

1 United Kingdom

v28 - W12 WEIGHT SPECIAL EURO ZONE (2002)

W12 WEIGHT SPECIAL EURO ZONE (2002)

W12 WEIGHT SPECIAL EURO ZONE separates the group of 12 countries which introduced the EURO as of January 1, 2002 (Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland).

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

v29 - NATION GROUP EURO NEW 10 (2004)

NATION GROUP EURO NEW 10 (2004)

NATION GROUP EURO NEW 10 refers to the group of the ten new members of the enlargement in 2004.

0 Not EURO NEW 10 (2004)

v59 - D15B OCCUPATION OF RESPONDENT - LAST JOB

D.15B

ASK D.15B ONLY IF NOT DOING ANY PAID WORK CURRENTLY, CODE 1 TO 4 IN D.15A

Did you do any paid work in the past? What was your last occupation?

SELF-EMPLOYED

- 1 Farmer
- 2 Fisherman
- 3 Professional (lawyer, medical practitioner, accountant, architect, ...)
- 4 Owner of a shop, craftsmen, other self-employed person
- 5 Business proprietors, owner (full or partner) of a company

EMPLOYED

- 6 Employed professional (employed doctor, lawyer, accountant, architect)
- 7 General management, director or top management (managing directors, director general, other director)
- 8 Middle management, other management (department head, junior manager, teacher, technician)
- 9 Employed position, working mainly at a desk
- 10 Employed position, not at a desk, but travelling (salesmen, driver, ...)
- 11 Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, ...)
- 12 Supervisor
- 13 Skilled manual worker
- 14 Other (unskilled) manual worker, servant

0 NA

15 Never did any paid work

99 Inap. (not coded 1 to 4 in V58)

Note:

Please notice that numeration differs from questionnaire.

v84 - QA6 MOVING - HOW MANY TIMES MOVED

Q.A6

IF "HAVE LEFT PARENTAL HOME", NOT CODE '98' IN Q.A5

How many times have you moved since then?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

- 1 Never since
- 2 Once
- 3 2-4 times
- 4 5-9 times
- 5 10 times or more
- 6 DK
- 9 Inap. (coded 98 in V82)

9 Inap. (coded 98 in V82; not coded 2-5 in V84; not coded 1 in V85 and V86)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Please notice that the variable order in the SPSS data set differs from the item order in the basic questionnaire in the cases of items 3 and 4. Data are consistent with official reports.

v96 - QA8 MOVED SAME REGION: SCHOOL/CHILDCARE

[Q.A6

IF "HAVE LEFT PARENTAL HOME", NOT CODE '98' IN Q.A5

How many times have you moved since then?

Q.A7

IF "HAVE MOVED AT LEAST ONCE SINCE HAVE LEFT PARENTAL HOME", CODE 2, 3, 4 OR 5 IN Q.A6

And since that first move, have you moved ...?]

Q.A8

IF "MOVED IN THE SAME CITY/TOWN/VILLAGE" OR "MOVED TO ANOTHER CITY/TOWN/VILLAGE BUT IN THE SAME REGION", CODE 1 OR 2 IN Q.A7 - OTHERS GO TO Q.A11

The last time you moved within the same city/town/village or region, what were the main reasons you had for moving?

(SHOW CARD - READ OUT - MAX. 3 ANSWERS)

Q.A8_5 Family related reasons:

Better school or care facilities for children or other dependants

0 Not mentioned

1 Mentioned

9 Inap. (coded 98 in V82; not coded 2-5 in V84; not coded 1 in V85 and V86)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix.

As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Please notice that the variable order in the SPSS data set differs from the item order in the basic questionnaire in the cases of items 3 and 4. Data are consistent with official reports.

v102 - QA8 MOVED SAME REGION: BETTER HOUSING

[Q.A6

IF "HAVE LEFT PARENTAL HOME", NOT CODE '98' IN Q.A5

How many times have you moved since then?

Q.A7

IF "HAVE MOVED AT LEAST ONCE SINCE HAVE LEFT PARENTAL HOME", CODE 2, 3, 4 OR 5 IN Q.A6

And since that first move, have you moved ...?]

Q.A8

IF "MOVED IN THE SAME CITY/TOWN/VILLAGE" OR "MOVED TO ANOTHER CITY/TOWN/VILLAGE BUT IN THE SAME REGION", CODE 1 OR 2 IN Q.A7 - OTHERS GO TO Q.A11

The last time you moved within the same city/town/village or region, what were the main reasons you had for moving?

(SHOW CARD - READ OUT - MAX. 3 ANSWERS)

Q.A8_11 Housing related reasons:

Wanted new or better housing

0 Not mentioned

1 Mentioned

9 Inap. (coded 98 in V82; not coded 2-5 in V84; not coded 1 in V85 and V86)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Please notice that the variable order in the SPSS data set differs from the item order in the basic questionnaire in the cases of items 3 and 4. Data are consistent with official reports.

v107 - QA8 MOVED SAME REGION: DK

[Q.A6

IF "HAVE LEFT PARENTAL HOME", NOT CODE '98' IN Q.A5

How many times have you moved since then?

Q.A7

IF "HAVE MOVED AT LEAST ONCE SINCE HAVE LEFT PARENTAL HOME", CODE 2, 3, 4 OR 5 IN Q.A6

And since that first move, have you moved ...?]

Q.A8

IF "MOVED IN THE SAME CITY/TOWN/VILLAGE" OR "MOVED TO ANOTHER CITY/TOWN/VILLAGE BUT IN THE SAME REGION", CODE 1 OR 2 IN Q.A7 - OTHERS GO TO Q.A11

The last time you moved within the same city/town/village or region, what were the main reasons you had for moving?

(SHOW CARD - READ OUT - MAX. 3 ANSWERS)

Q.A8_16 Other reasons:

DK

0 Not mentioned

1 Mentioned

9 Inap. (coded 98 in V82; not coded 2-5 in V84; not coded 1 in V85 and V86)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Please notice that the variable order in the SPSS data set differs from the item order in the basic questionnaire in the cases of items 3 and 4. Data are consistent with official reports.

1 Mentioned

9 Inap. (coded 98 in V82; not coded 2-5 in V84; not coded 1 in V85 and V86)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

9 Inap. (coded 98 in V82; not coded 2-5 in V84; not coded 1 in V85 and V86)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

9 Inap. (coded 98 in V82; not coded 2-5 in V84; not coded 1 in V85 and V86)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

9 Inap. (coded 98 in V82; not coded 2-5 in V84; not coded 1 in V85 and V86)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v141 - QA12 MOVED OTHER REGION: PARTNERSH CHANGE

[Q.A6

IF "HAVE LEFT PARENTAL HOME", NOT CODE '98' IN Q.A5

How many times have you moved since then?

Q.A7

IF "HAVE MOVED AT LEAST ONCE SINCE HAVE LEFT PARENTAL HOME", CODE 2, 3, 4 OR 5 IN Q.A6

And since that first move, have you moved ...?]

Q.A12

IF "MOVED TO ANOTHER REGION BUT IN THE SAME COUNTRY" OR "MOVED TO ANOTHER COUNTRY IN THE EUROPEAN UNION" OR "MOVED TO ANOTHER COUNTRY OUTSIDE THE EUROPEAN UNION", CODE 3, 4 OR 5 IN Q.A7

The last time you moved to another region or European Union country, what were the main reasons you had for moving?

(SHOW CARD - READ OUT - MAX. 3 ANSWERS)

Q.A12_1 Family related reasons:

Change of partnership/marital situation (move in together/break up)

0 Not mentioned

1 Mentioned

9 Inap. (coded 98 in V82; not coded 2-5 in V84; not coded any 1 in V87 to V89)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix.

As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Please notice that the variable order in the SPSS data set differs from the item order in the basic questionnaire in the cases of items 3 and 4. Data are consistent with official reports.

v142 - QA12 MOVED OTHER REGION: LIVE ON Y OWN

[Q.A6

IF "HAVE LEFT PARENTAL HOME", NOT CODE '98' IN Q.A5

How many times have you moved since then?

Q.A7

IF "HAVE MOVED AT LEAST ONCE SINCE HAVE LEFT PARENTAL HOME", CODE 2, 3, 4 OR 5 IN Q.A6

And since that first move, have you moved ...?]

Q.A12

IF "MOVED TO ANOTHER REGION BUT IN THE SAME COUNTRY" OR "MOVED TO ANOTHER COUNTRY IN THE EUROPEAN UNION" OR "MOVED TO ANOTHER COUNTRY OUTSIDE THE EUROPEAN UNION", CODE 3, 4 OR 5 IN Q.A7

The last time you moved to another region or European Union country, what were the main reasons you had for moving?

(SHOW CARD - READ OUT - MAX. 3 ANSWERS)

Q.A12_2 Family related reasons:

To live on your own

0 Not mentioned

1 Mentioned

9 Inap. (coded 98 in V82; not coded 2-5 in V84; not coded any 1 in V87 to V89)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Please notice that the variable order in the SPSS data set differs from the item order in the basic questionnaire in the cases of items 3 and 4. Data are consistent with official reports.

v148 - QA12 MOVED OTHER REGION: CLOSER TO WORK

[Q.A6

IF "HAVE LEFT PARENTAL HOME", NOT CODE '98' IN Q.A5

How many times have you moved since then?

Q.A7

IF "HAVE MOVED AT LEAST ONCE SINCE HAVE LEFT PARENTAL HOME", CODE 2, 3, 4 OR 5 IN Q.A6

And since that first move, have you moved ...?]

Q.A12

IF "MOVED TO ANOTHER REGION BUT IN THE SAME COUNTRY" OR "MOVED TO ANOTHER COUNTRY IN THE EUROPEAN UNION" OR "MOVED TO ANOTHER COUNTRY OUTSIDE THE EUROPEAN UNION", CODE 3, 4 OR 5 IN Q.A7

The last time you moved to another region or European Union country, what were the main reasons you had for moving?

(SHOW CARD - READ OUT - MAX. 3 ANSWERS)

Q.A12_8 Personal employment related reasons:

To be closer to work/easier to commute

0 Not mentioned

1 Mentioned

9 Inap. (coded 98 in V82; not coded 2-5 in V84; not coded any 1 in V87 to V89)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix.

As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Please notice that the variable order in the SPSS data set differs from the item order in the basic questionnaire in the cases of items 3 and 4. Data are consistent with official reports.

9 Inap. (coded 98 in V82; not coded 2-5 in V84; not coded any 1 in V87 to V89)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Please notice that the variable order in the SPSS data set differs from the item order in the basic questionnaire in the cases of items 3 and 4. Data are consistent with official reports.

9 Inap. (coded 98 in V82; not coded 2-5 in V84; not coded any 1 in V87 to V89)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

9 Inap. (coded 98 in V82; not coded 2-5 in V84; not coded any 1 in V87 to V89)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

9 Inap. (coded 98 in V82; not coded 2-5 in V84; not coded any 1 in V87 to V89)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

9 Inap. (coded 98 in V82; not coded 2-5 in V84; not coded any 1 in V87 to V89)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

9 Inap. (coded 98 in V82; not coded 2-5 in V84; not coded any 1 in V87 to V89)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v189 - QA15 REASON FOR NOT HAVING MOVED SINCE

Q.A15

IF "HAVE LEFT PARENTAL HOME", NOT CODE '98' IN Q.A5 / IF "HAVE NOT MOVED SINCE HAVE LEFT PARENTAL HOME",
CODE 1 IN Q.A6

What was the main reason for not having moved since then?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

- 1 You are satisfied with where you live
- 2 For work reasons
- 3 For family reasons
- 4 For personal reasons
- 5 For financial reasons
- 6 None - No particular reason (SPONTANEOUS)
- 7 Other (SPONTANEOUS)
- 8 DK
- 9 Inap. (coded 98 in V82; not coded 1 in V84)

v256 - QA24 FIRST JOB STARTED - YEAR

Q.A24

IF "HAVE FINISH FULL-TIME EDUCATION", NOT CODE 2 IN D.15A

In which year did you start your first job (after you finished full- time education)?

(IF "HAVE NEVER WORKED", CODE '9998' - IF "DK/DO NOT REMEMBER", CODE '9999')

(INCLUDING CASUAL WORK, PART-TIME, ETC.)

1921 1921

2005 2005

9997 Have never worked

9998 DK

9999 Inap. (coded 2 in V58)

Note:

Original code "9998" recoded to "9997"

Original code "9999" recoded to "9998"

Actual number is coded.

v257 - QA24 FIRST JOB STARTED - YEAR (REC)

Q.A24 FIRST JOB STARTED - YEAR RECODED

- 1 2004-2005
- 2 2002-2003
- 3 2000-2001
- 4 1995-1999
- 5 1990-1994
- 6 1985-1989
- 7 1980-1984
- 8 Before 1980
- 9 Have never worked
- 10 DK
- 99 Inap. (coded 2 in V58)

Derivation:

This variable groups answers to V256 into eight categories.

Note:

See V256 for complete question text.

v259 - QA26 FIRST JOB - ACTIVITY SECTOR (NACE)

Q.A26

IF "HAVE FINISH FULL-TIME EDUCATION", NOT CODE 2 IN D.15A / "HAVE WORKED", NOT CODE 9997 IN Q.A24

What was the main sector of activity of the company or organization that you worked for at that time?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

- 1 Agriculture, hunting and forestry; Fishing
- 2 Mining and quarrying
- 3 Manufacturing
- 4 Electricity, gas and water supply
- 5 Construction
- 6 Wholesale and retail trade
- 7 Hotels and restaurants
- 8 Transport, storage and communication
- 9 Financial services
- 10 Real estate, renting and business activities
- 11 Public administration and defence
- 12 Education
- 13 Health and social work
- 14 Other community, social and personal service activities
- 15 Other (SPONTANEOUS)
- 16 DK
- 99 Inap. (coded 9997 in V256)

Note:

Please notice that answer category 16 (DK) is not part of the basic and national field questionnaires, but included in the original data set.

v285 - QA35 CURRENT EMPLOYER - YEAR JOINED

Q.A35

IF "IS CURRENTLY EMPLOYED", CODE 5 TO 18 IN D.15A - OTHERS GO TO Q.A39

In which year did you join your current employer?

(IF "DK/DO NOT REMEMBER", CODE '9999')

(INCLUDING CASUAL WORK, PART-TIME, ETC.)

1937 1937

2005 2005

9998 DK

9999 Inap. (not coded 5 to 18 in V58)

Note:

Original code "9999" recoded to "9998"

Actual number is coded.

v286 - QA35 CURRENT EMPLOYER - YEAR JOINED (REC)

Q.A35 CURRENT EMPLOYER - YEAR JOINED RECODED

- 1 2005
- 2 2003-2004
- 3 2001-2002
- 4 1996-2000
- 5 1990-1995
- 6 Before 1990
- 7 DK
- 9 Inap. (not coded 5 to 18 in V58)

Derivation:

This variable groups answers to V285 into six categories.

Note:

See V285 for complete question text.

v287 - QA36 CURRENT JOB - OCCUPATION (ISCO-88)

Q.36

IF "IS CURRENTLY EMPLOYED", CODE 5 TO 18 IN D.15A

What is the title of your job?

(ASK FOR DETAILS THEN CODE IN THE LIST - DO NOT SHOW CARD - DO NOT READ OUT - ONE ANSWER ONLY)

Legislators, senior officials and managers

- 1 Legislators and senior officials
- 2 Corporate managers
- 3 General managers

Professionals

- 4 Physical, mathematical and engineering science professionals
- 5 Life science and health professionals
- 6 Teaching professionals
- 7 Other professionals

Technicians and associate professionals

- 8 Physical and engineering science associate professionals
- 9 Life science and health associate professionals
- 10 Teaching associate professionals
- 11 Other associate professionals

Clerks

- 12 Office clerks
- 13 Customer service clerks

Service workers and shop and market sales workers

- 14 Personal and protective services workers
- 15 Models, salespersons and demonstrators

Skilled agricultural and fishery workers

- 16 Market-oriented skilled agricultural and fishery workers
- 17 Subsistence agricultural and fishery workers

Craft and related trades workers

- 18 Extraction and building trades workers
- 19 Metal, machinery and related trades workers
- 20 Precision, handicraft, printing and related trades workers
- 21 Other craft and related trades workers

Plant and machine operators and assemblers

- 22 Stationery plant and related operators
- 23 Machine operators and assemblers
- 24 Drivers and mobile plant operators

Elementary occupations

- 25 Sales and services elementary occupations
- 26 Agricultural, fishery and related labourers
- 27 Labourers in mining, construction, manufacturing, transport

Armed forces

- 28 Armed forces

29 Other

30 DK

v291 - QA40 CURRENT JOB - HOURS PER WEEK

Q.A40

IF "IS CURRENTLY EMPLOYED", CODE 5 TO 18 IN D.15A - OTHERS GO TO Q.A44

How many hours per week do you usually work?

(IF "DK", CODE '99')

1 One hour

98 98 hours

99 DK

999 Inap. (not coded 5 to 18 in V58)

Note:

Actual number is coded.

v292 - QA40 CURRENT JOB - HOURS PER WEEK (REC)

Q.A40 CURRENT JOB - HOURS PER WEEK RECODED

- 1 20 hours a week or less
- 2 21 to 30 hours a week
- 3 31 to 40 hours a week
- 4 More than 40 hours a week
- 5 DK
- 9 Inap. (not coded 5 to 18 in V58)

Derivation:

This variable groups answers to V291 into four categories.

Note:

See V291 for complete question text.

v293 - QA41 COMMUTING - MINUTES PER DAY

Q.A41

IF "IS CURRENTLY EMPLOYED", CODE 5 TO 18 IN D.15A

In total, how many minutes per day do you normally spend travelling from home to work and back?

(IF "DK", CODE '999')

(COUNT BOTH JOURNEYS)

0 0 minute

300 300 minutes

998 DK

999 Inap. (not coded 5 to 18 in V58)

Note:

Original code "999" recoded to "998"

8 cases currently not employed (code 3 in V58) were erroneously coded 15 "15 minutes" or set to SYSMIS in V293. These respondents have been recoded to 999 "Inap. (not coded 5 to 18 in V58)".

Actual number is coded.

v294 - QA41 COMMUTING - MINUTES PER DAY (REC)

Q.A41 COMMUTING - MINUTES PER DAY RECODED

- 1 0 minute
- 2 15 minutes a day or less
- 3 16 to 30 minutes a day
- 4 31 to 60 minutes a day
- 5 More than 60 minutes a day
- 6 DK
- 9 Inap. (not coded 5 to 18 in V58)

Derivation:

This variable groups answers to V293 into five categories.

Note:

See V293 for complete question text.

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v311 - QA44 NOT CHANGE CUR JOB: OTHER

Q.A44

IF "IS CURRENTLY EMPLOYED", CODE 5 TO 18 IN D.15A / IF "DO NOT THINK WILL CHANGE JOB", CODE 1 IN Q.A43 AND IF "HAVE NEVER CHANGED EMPLOYER", CODE 00 IN Q.A28

What is the main reason for you not to envisage a change in your job in the next five years?

(SHOW CARD - READ OUT - MULTIPLE ANSWERS POSSIBLE)

You do not envisage a change in your job ...

Q.A44_7 Other (SPONTANEOUS)

0 Not mentioned

1 Mentioned

9 Inap. (not coded 5 to 18 in V58; not coded 0 in V261; not coded 1 in V296)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v336 - QA49 UNEMPLOYMENT - SINCE FIRST JOB

Q.A49

IF "HAVE WORKED", NOT CODE 9997 IN Q.A24

Since you left your first job, how many times have you been without a job for more than three months? (Please do not include periods of paid or unpaid leave)

(IF "DK", CODE '99')

0 Never

1 Once

58 58 times

97 Students who never worked

98 DK

99 Inap. (coded 9997 in V256)

Note:

Original code "99" recoded to "98"

Actual number coded.

v337 - QA49 UNEMPLOYMENT - SINCE FIRST JOB (REC)

Q.A49 UNEMPLOYMENT - TIMES SINCE FIRST JOB RECODED

- 0 Never
- 1 Once
- 2 2 times
- 3 3 times
- 4 4 times
- 5 5 times
- 6 More than 5 times
- 7 NA (students who never worked)
- 8 DK
- 9 Inap. (coded 9997 in V256)

Note:

See V336 for complete question text.

v471 - QC2 SMOKING HABITS - REGULARITY

Q.C2

IF "SMOKERS", CODE 1, 2 OR 3 IN Q.C1

Do you smoke regularly, or occasionally?

- 1 Regularly
- 2 Occasionally
- 3 DK
- 9 Inap. (not coded any 1 in V463 to V465)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v472 - QC3 SMOKING CIGARETTES - N PER DAY

Q.C3

IF "CIGARETTE SMOKERS, INCLUDING ROLL-UP", CODES 1 OR 2 IN Q.C1

Do you smoke every day?

(IF YES)

How many cigarettes a day do you smoke?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

- 1 Yes, less than 5 cigarettes a day
- 2 Yes, 5 to 9 cigarettes a day
- 3 Yes, 10 to 14 cigarettes a day
- 4 Yes, 15 to 19 cigarettes a day
- 5 Yes, 20 to 24 cigarettes a day
- 6 Yes, 25 to 29 cigarettes a day
- 7 Yes, 30 to 34 cigarettes a day
- 8 Yes, 35 to 39 cigarettes a day
- 9 Yes, 40 or more cigarettes a day
- 10 No, do not smoke every day
- 11 DK
- 99 Inap. (not coded 1 in V463 or V464)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v475 - QC6 SMOKING AT HOME

Q.C6

IF "SMOKERS", CODE 1, 2 OR 3 IN Q.C1 - OTHERS GO TO Q.C8

Do you smoke at home?

- 1 Yes
- 2 No
- 3 DK
- 9 Inap. (not coded any 1 in V463 to V465)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v476 - QC7 SMOKING IN A CAR: ALONE

Q.C7

IF "SMOKERS", CODE 1, 2 OR 3 IN Q.C1

Do you smoke when you are in a car ...?

(ONE ANSWER PER LINE - READ OUT)

Q.C7_1 When you are alone

- 1 Yes
- 2 No
- 3 It depends (SPONTANEOUS)
- 4 DK
- 9 Inap. (not coded any 1 in V463 to V465)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v484 - QC10 PASSIVE SMOKING BOTHERED - REASON

Q.C10

IF "VERY OFTEN" OR "SOMETIMES", CODE 1 OR 2 IN Q.C9

Why does this exposure to tobacco bother you?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

- 1 You find it annoying because it makes your clothes and hair smell but it causes no particular physical symptoms (e.g. stinging eyes, coughing etc.)
- 2 You have never been diagnosed with a health condition (e.g. asthma, or other respiratory disease) but tobacco smoke causes some physical symptoms (e.g. stinging eyes, coughing etc.)
- 3 You have a recognised health condition (e.g. asthma, or other respiratory disease) and tobacco smoke makes the symptoms worse
- 4 Other (SPONTANEOUS)
- 5 DK
- 9 Inap. (not coded 1 or 2 in V483)

v485 - QC11 SMOKING HABITS: COMBINED W ALCOHOL

Q.C11

IF "SMOKERS", CODE 1, 2 OR 3 IN Q.C1

How often do you combine tobacco with ...?

(SHOW CARD - ONE ANSWER PER LINE - READ OUT)

Q.C11_1 Alcohol

- 1 Very often
- 2 Sometimes
- 3 Rarely
- 4 Never
- 5 DK
- 9 Inap. (not coded any 1 in V463 to V465)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v490 - QC13 ANTI-SMOKING CAMPAIGN - HEARD/SEEN

Q.C13

IF "SMOKERS" OR "FORMER SMOKERS", CODE 1, 2, 3, 4 or 5 IN Q.C1

Do you remember hearing or seeing any tobacco campaign encouraging people to quit smoking?

1 Yes

2 No

9 Inap. (not coded any 1 in V463 to V467)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix.

As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v491 - QC14 ANTI-SMOKING CAMPAIGN - MADE WANT QUIT

Q.C14

IF "SMOKERS" OR "FORMER SMOKERS", CODE 1, 2, 3, 4 or 5 IN Q.C1 / IF "YES", CODE 1 IN Q.C13

Did any of these tobacco campaigns make you want to quit smoking?

(READ OUT - ONE ANSWER ONLY)

- 1 Yes, very much so
- 2 Yes, to some extent
- 3 No, not really
- 4 No, not at all
- 5 DK
- 9 Inap. (not coded any 1 in V463-467; not 1 in V490)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v496 - QD1 AIDS TRANSMISSION: INJECTION NEEDLE

Now moving on another topic.

Q.D1

ASK ALL

In your opinion, can AIDS be caught by each of the following ways?

(SHOW CARD - ONE ANSWER PER LINE - READ OUT - ROTATE)

Q.D1_5 Being injected with a needle which has been used by someone who has AIDS or who is HIV positive

- 1 Yes
- 2 Possibly
- 3 No
- 4 DK

v502 - QD1 AIDS TRANSMISSION: GIVING BLOOD

Now moving on another topic.

Q.D1

ASK ALL

In your opinion, can AIDS be caught by each of the following ways?
(SHOW CARD - ONE ANSWER PER LINE - READ OUT - ROTATE)

Q.D1_11 Giving blood

- 1 Yes
- 2 Possibly
- 3 No
- 4 DK

Note:

v508 - QD3 AIDS MEASURES: INFORMATION CAMPAIGN

Q.D3

For each of these options, do you feel that the measures currently being undertaken in (OUR COUNTRY) are very effective, fairly effective, not very effective or not at all effective?

(SHOW CARD - ONE ANSWER PER LINE - READ OUT - ROTATE)

Q.D3_1 An information campaign on the types of behaviour which expose people to infection by the AIDS virus

- 1 Very effective
- 2 Fairly effective
- 3 Not very effective
- 4 Not at all effective
- 5 DK

Note:

v517 - QD4 AIDS MEASURES EU: FUNDING RESEARCH

Q.D4

Let us look at this same list of possible measures. For each of them do you think it is useful or not to collaborate and to harmonise efforts within the European Union?

(SHOW CARD - ONE ANSWER PER LINE - READ OUT - ROTATE)

Q.D4_5 Funding research to find an AIDS vaccine

- 1 Very useful
- 2 Fairly useful
- 3 Not very useful
- 4 Not at all useful
- 5 DK

v528 - QE8 MEDIC ERROR WORRY - HOSPITAL PATIENTS

Q.E8

How worried should hospital patients be about serious medical errors?

(READ OUT - ONE ANSWER ONLY)

- 1 Very worried
- 2 Fairly worried
- 3 Not very worried
- 4 Not at all worried
- 5 DK

v529 - D1 LEFT-RIGHT PLACEMENT

D.1

ASK ALL

In political matters people talk of "the left" and "the right". How would you place your views on this scale?

(SHOW CARD - DO NOT PROMPT - IF CONTACT HESITATES, TRY AGAIN)

- 1 Box 1 - left
- 2 Box 2
- 3 Box 3
- 4 Box 4
- 5 Box 5
- 6 Box 6
- 7 Box 7
- 8 Box 8
- 9 Box 9
- 10 Box 10 - right
- 97 Refusal
- 98 DK

Note:

Last trend: EB63.4, D.1

v530 - D1 LEFT-RIGHT PLACEMENT - RECODED 3 CAT

D.1R1 Left - right scale (RECODED)

- 1 (1 - 4) Left
- 2 (5 - 6) Centre
- 3 (7 -10) Right
- 4 DK/Refusal

Derivation:

This variable collapses answers to D.1 into three categories.

Note:

See D.1 for complete question text.

v532 - D7 MARITAL STATUS

D.7

Could you give me the letter which corresponds best to your own current situation?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

- 1 Married
- 2 Remarried
- 3 Unmarried, currently living with partner
- 4 Unmarried, having never lived with a partner
- 5 Unmarried, having previously lived with a partner, but now on my own
- 6 Divorced
- 7 Separated
- 8 Widowed
- 9 Other (SPONTANEOUS)
- 97 Refusal (SPONTANEOUS)

v533 - D8 AGE EDUCATION

D.8

How old were you when you stopped full-time education?

(IF "STILL STUDYING", CODE "00")

4 4 years

61 61 years

97 No full-time education

98 Still studying

99 DK

Note:

Original code "00" recoded to "98"

Actual number is coded.

Last trend: EB63.4, D.8

v534 - D8 AGE EDUCATION - RECODED

D.8R Age when finished full-time education - RECODED

- 1 Up to 14 years
- 2 15 years
- 3 16 years
- 4 17 years
- 5 18 years
- 6 19 years
- 7 20 years
- 8 21 years
- 9 22 years and older
- 10 Still studying
- 11 No full-time education
- 12 DK

v536 - D11 AGE EXACT

D.11

How old are you?

15 15 years

98 98 years

Note:

Actual number is coded.

Last trend: EB63.4, D.11

v537 - D11 AGE RECODED - FOUR GROUPS

D.11R1 R'S age - four collapsed categories

- 1 15 - 24 years
- 2 25 - 39 years
- 3 40 - 54 years
- 4 55 years and older

Derivation:

This variable collapses answers to D.11 into four categories.

Note:

See D.11 for complete question text.

v546 - D40 HOUSEHOLD COMPOSIT: SIZE A+B+C

D.40 HOUSEHOLD COMPOSITION: SIZE (A+B+C)

- 1 One
- 2 Two
- 3 Three
- 4 Four
- 5 Five
- 6 Six
- 7 Seven
- 8 Eight
- 9 Nine
- 10 Ten
- 11 Eleven
- 12 Twelve
- 13 Thirteen
- 14 Fourteen
- 15 Fifteen
- 16 Sixteen
- 17 Seventeen
- 18 DK

Derivation:

This variable summarizes V540, V542 and V544.

Note:

See V540, V542 and V544 for complete question text.

Generated by the archive in accordance with former surveys.

v553 - P2 TIME OF INTERVIEW

P.2 Time of the beginning of the interview

Note:

Ambiguous time specifications in V553 have been recoded to '0' in V554 (NA (ambiguous)).

Actual number is coded.

v554 - P2 TIME OF INTERVIEW - RECODED

P.2 Time of the beginning of the interview - RECODED

- 0 NA (ambiguous)
- 1 Before 8 h
- 2 8 - 12 h
- 3 13 - 16 h
- 4 17 - 19 h
- 5 20 - 22 h
- 6 23 h +

Derivation:

This variable collapses specifications in V553.

Note:

Ambiguous time specifications in V553 have been recoded to '0' in V554 (NA (ambiguous)).

v567 - P6 SIZE OF COMMUNITY - UNITED KINGDOM

P.6_GB (Objective) Size of community: United Kingdom

- 1 Rural
- 2 Urban
- 3 Metropolitan (Great Britain only)
- 99 Inap. (not coded 9 or 10 in V6)

Note:

The original variable integrated data for Northern Ireland (codes 1-2) and Great Britain (codes 3-5). The original categories (value label) were corrected after consultation with TNS OPINION & SOCIAL. In order to facilitate the analysis for the United Kingdom as a whole, identical categories have been coded together (matched).

Weighting required for United Kingdom (Great Britain and Northern Ireland) - see V10

v567, weighted by v10

Value	Label	Missing	Count	Percent	Valid Percent
1	Rural		186	13.9	13.9
2	Urban		459	34.4	34.4
3	Metropolitan (GB_GBN only)		689	51.6	51.6
99	Inap. (not 9 or 10 in V6)	M	0	0.0	
	Sum		1334	100.0	100.0
	Valid Cases		1334		

v568 - P6 SIZE OF COMMUNITY - GREECE

P.6_GR (Objective) Size of community: Greece

- 1 Rural
- 2 Semi-urban
- 3 Urban
- 4 Thessaloniki
- 5 Athens
- 99 Inap. (not coded 11 in V6)

v568, weighted by v8

Value	Label	Missing	Count	Percent	Valid Percent
1	Rural		272	1.1	27.2
2	Semi-urban		132	0.5	13.2
3	Urban		233	0.9	23.3

v621 - P13 LANGUAGE OF INTERVIEW - BELGIUM

P.13_BE Language of questionnaire: Belgium

- 1 Francophone
- 2 Nederlandstalig
- 9 Inap. (not coded 2 in V6)

v621

Value	Label	Missing	Count	Percent	Valid Percent
1	French		408	1.7	39.0
2	Dutch		639	2.6	61.0
9	Inap. (not 2 in V6)	M	23596	95.8	
	Sum		24643	100.0	100.0
	Valid Cases		1047		

v622 - P13 LANGUAGE OF INTERVIEW - LUXEMBOURG

P.13_LU Language of questionnaire: Luxembourg

- 1 Luxembourgish
- 2 French
- 3 German (not mentioned)
- 9 Inap. (not coded 6 in V6)

Note:

Starting with Eurobarometer 62 and with the change of fieldwork responsibility to TNS, the relation between average frequencies for language categories "French" and "Luxembourgish" appears to be inversed. The majority of respondents in Luxembourg are now coded as being interviewed in French and not in Luxembourgish as former Eurobarometer surveys indicate. It could not be ascertained if TNS (intermittently) changed the fieldwork strategy regarding languages. Starting with Eurobarometer 69 the former proportion is recovered, again representing the actual proportion between Luxembourgish and French as mother languages in Luxembourg. This is probably also true for Eurobarometer 68.1 and 68.2 where the labelling in the data set (value label) is shifted compared to the field questionnaire.

v622

Value	Label	Missing	Count	Percent	Valid Percent
1	Luxembourgish		88	0.4	17.6
2	French		412	1.7	82.4

v629 - ORIGINAL RESPONDENT ID

Original Respondent Identification Number

This is the original respondent identification number as supplied by TNS OPINION & SOCIAL. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 03: West Germany; 04: East Germany; 05: Greece; 06: Spain; 07: Finland; 08: France; 09: Ireland; 10: Italy; 11: Luxembourg; 12: Netherlands; 13: Austria; 14: Portugal; 15: Sweden; 16: Great Britain; 17: Northern Ireland; 18: Cyprus Republic; 19: Czech Republic; 20: Estonia; 21: Hungary; 22: Latvia; 23: Lithuania; 24: Malta; 25: Poland; 26: Slovakia; 27: Slovenia). The remaining digits contain the country-specific questionnaire numbers.

Note:

Actual number is coded.

v630 - INTERVIEWER ID

Original Interviewer Identification Number

This is the original interviewer identification number as supplied by TNS OPINION & SOCIAL. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 03: West Germany; 04: East Germany; 05: Greece; 06: Spain; 07: Finland; 08: France; 09: Ireland; 10: Italy; 11: Luxembourg; 12: Netherlands; 13: Austria; 14: Portugal; 15: Sweden; 16: Great Britain; 17: Northern Ireland; 18: Cyprus Republic; 19: Czech Republic; 20: Estonia; 21: Hungary; 22: Latvia; 23: Lithuania; 24: Malta; 25: Poland; 26: Slovakia; 27: Slovenia). The remaining digits contain the country-specific interviewer id number.

999999999 Inap. (no data for France)

Note:

No data have been supplied for France.

Actual number is coded.
