Acknowledgements

Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences.

Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (<http://zacat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

1.2 Content

1.2.1 Abstract

This round of Eurobarometer surveys diverged from the Standard Eurobarometer measures and queried respondents on (1) discrimination in the European Union (EU), (2) fighting against organized crime, (3) science and research, (4) justice, freedom, and security policies, (5) intelligent systems in vehicles, and (6) EU Humanitarian Aid (ECHO). For the first topic, discrimination in the EU, respondents were asked to identify to what extent different types of discrimination or nondiscrimination occurs, factors which may affect employment, the need for diversity in the workplace and government, and the advantages of membership to a particular social group. In addition, respondents were asked about combating discrimination through the role of organizations or as an individual, and about laws prohibiting discrimination. Secondly, the survey queried respondents about fighting organized crime. Respondents provided their opinions about the implementation of witness protection, frequency and prevention of identity and tax fraud, and the involvement of the EU in developing policy on witness protection. In regard to the third topic, science and research, respondents were asked to identify their interests, their knowledge of collaborative research projects, information sources accessed and trusted pertaining to scientific research, and personal association with individuals who have a chronic or life-threatening disease. For the fourth topic, respondents were asked questions about justice, freedom and security policies including their views in regard to EU decision-making and priorities in enacting or developing policies pertaining to social issues. For the next topic, intelligent systems in vehicles, the survey asked respondents about their driving habits and automobiles, as well as the distance they traveled per year. In addition, they provided their opinion about selecting or not selecting a particular car safety system such as an anti-lock breaking system or an electronic stability system, the development of these systems, and the implementation of systems that collect driver information. Finally, the survey collected information on respondents' views regarding the role of countries in providing aid to victims of natural disasters or conflicts outside of the EU, their knowledge of organizations that fund humanitarian aid, including the European Commission and its Humanitarian Aid Department (ECHO), and the disbursement of aid. Demographic and other background information includes age, gender, origin of birth (personal and parental), marital status, left-right political self-placement, occupation, age at completion of full-time education, household composition, religious affiliation, ownership of a fixed or a mobile telephone, social contacts, and quality of life pertaining to health. In addition, country-specific data include type and size of locality, region of residence, and language of interview.

1.3 Universe

In all, Eurobarometer 65.4 interviewed 26.822 citizens of the 25 countries in the European Union after the 2004 enlargement and in the Accession Countries (AC) Bulgaria and Romania. All respondents were residents in the respective country, nationals and non-nationals but EU-citizens, and aged 15 and over. They were supposed to have sufficient command of one of the respective national language(s) to answer the questionnaire. Separate samples were drawn for Northern Ireland and East Germany.

1.4 Sampling procedure

A multi-stage, random (probability) sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regional units in every country (Statistical Office of the European Community, EUROSTAT NUTS 2 or equivalent). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of starting addresses was selected from each sampled PSU, at random. Further addresses were chosen systematically using standard random route procedures as every Nth address from the initial address. In each household, a respondent was drawn, at random, following the closest birthday rule. No more than one interview was conducted in each household.

The regular sample size (in the sense of completed interviews) is 1000 respondents per country, except the United Kingdom with separate samples for Great Britain (1000) and Northern Ireland (300), Germany with separate samples for the Eastern (500) and the Western part (1000), and Luxembourg, Cyprus (Republic) and Malta with 500 interviews each. The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

From June 7 to July 15, 2006, the TNS Opinion & Social, a consortium created between Taylor Nelson Sofres and EOS Gallup Europe, carried out the fieldwork for this Eurobarometer, at the request of the European Commission, Directorate General Press and Communication, Opinion Polls. TNS Opinion & Social is based at Avenue Herrmann Debroux, 40, 1160 Brussels, Belgium. TNS Opinion & Social coordinates the fieldwork carried out through its network of national institutes.

1.6 Mode of data collection

In all countries, fieldwork was conducted on the basis of detailed and uniform instructions prepared by TNS Opinion Social. Interviews were conducted face-to-face in people's home in the appropriate national language. As far as the data capture is concerned, CAPI (Computer Assisted Personal Interview) was used in those countries where this technique was available.

Equivalent French and English basic questionnaires were developed for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country. Backtranslation procedures were applied for controlling semantic equivalence.

1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factor corrects for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country as well as each lower level sample (Great Britain and Northern Ireland, East and West Germany) are represented in proportion to its population size within different groupings, or according to the historical states of European unification (e.g. founder members, new members, Euro zone) in the case of the EUROPEAN WEIGHTS, or for the United Kingdom (WEIGHT SPECIAL UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31) and for Germany as a whole (WEIGHT SPECIAL GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general all samples which do not belong to the respective group of samples under consideration are excluded from calculation.

The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 4) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

Eurobarometer 65.4 provides three (post-stratification) NATION WEIGHTS: W1 (WEIGHT RESULT FROM TARGET) for separate analysis or comparison of individual samples (countries or regions on sub-national level), W4 (WEIGHT SPECIAL UNITED KINGDOM) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole, and W3 (WEIGHT SPECIAL GERMANY), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. W3 and W4 exclude all other countries from calculation, but include the post-stratification factors for the United Kingdom and Germany respectively.

The EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries, of accession or candidate countries, and of Euro zone countries, representing different historical states of European integration (e.g. EU6 = six founder members) . All post-stratification factors are included.

Table 2: Overview of population size weights

European Weights in Eurobarometer 65.4	Function
W5 to W9, W11, W14	grouping EU member countries
W10, W13	grouping new member countries
W18	grouping candidate/accession countries
W22	grouping member + candidate/accession countries
W12	grouping (non-)Eurozone countries

For more detailed information on the individual weights please see the corresponding variable description.

1.8 Data preparation

The data received by GESIS from TNS Opinion & Social were checked for completeness, missing and duplicate records, for illegal (wild) codes and for (formal) consistency of response patterns and question routing. Errors discovered by these procedures are documented or corrected, as a general rule after consulting related additional documentation (e.g. tabular reports) or the data provider. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable DDI-XML compliant documentation was created for this dataset by GESIS.

GESIS added "Inappropriate" (INAP) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the original questionnaire was adhered to for (almost) every respondent. An additional INAP category was defined whenever a question or group of questions were not surveyed in one or more countries, or if variables refer to country specific items (e.g. regions).

Users should note that answers to multiple-response questions are (originally) represented by a series of binary

"dummy" variables (i.e. variables which take on values of one and zero only), creating separate "dummy" variables also to explicitly represent "Don't know", "No answer/refusal" or other residual responses, such as "None of the above". The archive has recoded these residual responses in the case of uncommon minor inconsistencies with respect to and in favour of the series of substantial answers.

GESIS has recoded the missing answers (NA) represented in the original data set by blanks (system missing) to standard values. Their practically complete absence suggests that eventual cases of any not explicitly coded item non-response, might be collapsed with the DK (don't know) category.

Question text and contingency text appearing in the variable description is taken from English language version of the basic (bilingual) questionnaire (master questionnaire). Coding schemes and other documentation are based on the English language version of the basic questionnaire or on the respective SPSS data definition statements as provided by TNS Opinion & Social. In case of any discrepancy between questionnaires, SPSS definitions and data regarding the coding scheme of a variable, the archive, as a general rule, carried out any correction in agreement with the data provider.

If the documentation for country-specific questions or answer categories is provided in another languages than English, the archive documents the original language wording and supplies the English translation in brackets.

Please see the respective variable documentation (variable notes) for specific remarks on data inconsistencies or processing.

1.9 Further remarks

Question modules QB on FIGHTING AGAINST ORGANIZED CRIME, QD on JUSTICE, FREEDOM AND SECURITY POLICY, and QE on INTELLIGENT SYSTEMS IN VEHICLES were only surveyed in the EU 25 member countries.

2 Eurobarometer Series Description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brêthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 4: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.2OVR, 55.1OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.2OVR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 5) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 5: Overview of Eurobarometer surveys with standard EU and trend question modules

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

3 Dataset structure and standards

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 6: ZEUS Party Family Code (slightly modified)

Category		Party Family
0	(001-099)	not affiliated / electoral alliances across "families"
1	(100-199)	Communists
2	(200-299)	Socialists
3	(300-399)	Liberals
4	(400-499)	Christian Democrats
5	(500-599)	Conservatives
6	(600-699)	Extreme Rights / Nationalists
7	(700-799)	Regionalists / Ethnic
8	(800-899)	Environmental parties
9	(900-949)	Agricultural parties
9	(950-989)	other special issue parties (e.g. Eurosceptics) and independents
	990	other (spontaneous)
	994	not voting age
	995	empty ballot (blank) or invalid vote
	996	not voted / would not vote
	997	Refused
	998	DK / DK+NA if NA not coded separately
	999	INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION – ALL SAMPLES ISO 3166).

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (–1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded "real" values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission's official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

CROSS-TABULATION: The absolute frequencies of the occurrence of values (<i>absolute values</i>) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies (<i>row percent</i>) refer to the valid cases (<i>n valid sum</i>), i.e. the total number of cases (<i>n sum</i>) reduced by the number of cases defined as missing data (<i>M</i>). For display and place saving reasons excluded countries or areas may be completely dropped from the table.																																																																																																																																																																																																																																																																																																																						
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (<i>M</i>), i.e. <i>percent</i> on the basis of all cases (<i>sum</i>) and <i>valid percent</i> on the basis of the <i>valid cases</i> .																																																																																																																																																																																																																																																																																																																						

5 Variable Documentation

Variable, Label

Question Text (English Language)

v1 - STUDY NUMBER DISTRIBUTOR

ARCHIVE STUDY NUMBER DISTRIBUTOR

Study Number of the distributing data archive.

v1

Value	Label	Missing	Count	Percent	Valid Percent
4508			26822	100.0	100.0
	Sum		26822	100.0	100.0
	Valid Cases		26822		

v2 - STUDY NUMBER PRODUCER

ARCHIVE STUDY NUMBER PRODUCER

Study number of the producer of this data set edition.

v2

Value	Label	Missing	Count	Percent	Valid Percent
4508			26822	100.0	100.0
	Sum		26822	100.0	100.0
	Valid Cases		26822		

v3 - GESIS ARCHIVE VERSION**VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET**

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

v3

Value	Label	Missing	Count	Percent	Valid Percent
1.1.2 (2012-03-30)			26822	100.0	100.0
	Sum		26822	100.0	100.0
	Valid Cases		26822		

v4 - EUROBAROMETER NUMBER

EUROBAROMETER SURVEY NUMBER

The number identifying the Eurobarometer survey.

654 Eurobarometer 65.4 (June-July 2006)

v4

Value	Label	Missing	Count	Percent	Valid Percent
654	Eurobarometer 65.4 (June-July 2006)		26822	100.0	100.0
	Sum		26822	100.0	100.0
	Valid Cases		26822		

v5 - ID SERIAL NUMBER

ID SERIAL NUMBER

Sequential respondent identification number assigned by the archive.

v6 - NATION - ALL SAMPLES

NATION - ALL SAMPLES

All samples including separate samples for East and West Germany and for Great Britain and Northern Ireland.

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany West
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 Germany East
- 15 Norway (not included)
- 16 Finland
- 17 Sweden
- 18 Austria
- 19 Cyprus (Republic)
- 20 Czech Republic
- 21 Estonia
- 22 Hungary
- 23 Latvia
- 24 Lithuania
- 25 Malta
- 26 Poland
- 27 Slovakia
- 28 Slovenia
- 29 Bulgaria
- 30 Romania

Note:

Use of weighting factor W1 (V8) is optional.

	Sum		26822	100.0	100.0
	Valid Cases		26822		

v7 - NATION - ALL SAMPLES ISO 3166

NATION - ALL SAMPLES ISO 3166

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

Note:

Use of weighting factor W1 (V8) is optional.

v8 - W1 WEIGHT RESULT FROM TARGET

W1 WEIGHT RESULT FROM TARGET

This POST-STRATIFICATION WEIGHT is based on a comparison for each sample with the respective universe description. As such in all countries, gender, age, region and size of locality are introduced in the iteration procedure carried out by the fieldwork institutes.

British and Northern Irish as well as East and West German samples are weighted separately. The weight reproduces the real number of cases for each country. In terms of its general function it corresponds to former NATION WEIGHT II (until EUROBAROMETER 31).

v9 - NATION - UNITED KINGDOM

NATION - UNITED KINGDOM

Great Britain and Northern Ireland are coded together.

0 Not United Kingdom

1 United Kingdom

Note:

Use of weighting factor W4 (V10) is mandatory.

v10 - W4 WEIGHT SPECIAL UNITED KINGDOM

W4 WEIGHT SPECIAL UNITED KINGDOM

This POPULATION SIZE WEIGHT adjusts the British and the Northern Irish (sub-national) samples to their share in the total population aged 15 and over in the United Kingdom. It must be applied whenever the United Kingdom is to be analyzed as a whole. The post-stratification weighting factors are included for both samples. All other samples are excluded from analysis. In terms of its general function the weight corresponds to former NATION WEIGHT I (until EUROBAROMETER 31).

v11 - NATION - UNITED GERMANY

NATION - UNITED GERMANY

East and West Germany are coded together.

0 Not Germany

1 Germany

Note:

Use of weighting factor W3 (V12) is mandatory.

v26 - W11 WEIGHT EURO 15

W11 WEIGHT EURO 15

This POPULATION SIZE WEIGHT adds Austria, Finland and Sweden to the EURO 12+ countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EURO 15 must be applied whenever these 15 countries as of the 1995 enlargement are to be analyzed altogether as a group.

v27 - NATION GROUP EURO ZONE (2002)

NATION GROUP EURO ZONE (2002)

NATION GROUP EURO ZONE separates the group of 12 countries which introduced the EURO as of January 1, 2002 (Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland).

0 Not EURO ZONE (2002)

1 EURO ZONE (2002)

Note:

Use of weighting factor W12 (V28) is mandatory.

v28 - W12 WEIGHT SPECIAL EURO ZONE (2002)

W12 WEIGHT SPECIAL EURO ZONE (2002)

This POPULATION SIZE WEIGHT separates the group of 12 countries which introduced the EURO as of January 1, 2002 (Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT SPECIAL EURO ZONE must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

v29 - NATION GROUP EURO NEW 10 (2004)

NATION GROUP EURO NEW 10 (2004)

NATION GROUP EURO NEW 10 refers to the group of the ten new members of the enlargement in 2004.

0 Not EURO NEW 10 (2004)

1 EURO NEW 10 (2004)

Note:

Use of weighting factor W13 (V30) is mandatory.

v167 - QB1 WITNESS PROTECTION - SHOULD BE GRANTED

Let's move on to another topic.

Q.B1

ASK Q.B ONLY IN EU25 - BG and RO GO TO Q.C1

Most European Union Member States offer protection for people who have witnessed a crime, and who feel threatened as a result of that experience. Do you feel that witness protection should be granted...?

(READ OUT - ONE ANSWER ONLY)

- 1 For all kinds of crime
- 2 Only in certain cases like organised crime or terrorism
- 3 Not in any circumstances
- 4 DK
- 9 Inap. BG, RO (coded 29 and 28 in V6)

v191 - QC2A BIO-MED RESEARCH EU WIDE - AWARENESS

Q.C2A

In (OUR COUNTRY), there are researchers specialized in biology or the medical sciences. Have you ever heard of any of them working on collaborative research projects with colleagues from other European countries, or having the possibility to do so?

1 Yes

2 No

v193 - QC3A BIO-MEDICAL EU PROJECTS - INFO WAY

The European Union gives money to groups of people from different countries who want to work together on research projects, at the European level, in the objective to combat major diseases, to design new treatments or diagnoses or to better understand how our genes and body function. In the next questions, we will refer to this large domain (to combat major diseases, to design new treatments, etc.) as biological and medical research.

Q.C3A

ASK Q.C3A and Q.C4A IF "AWARE OF PROJECTS FUNDED BY THE EU", CODE 1 in Q.C2B - OTHERS GO TO Q.C3B

Could you please tell me the most common way you heard about these European Union funded projects in the field of biological and medical research?

(READ OUT - ONE ANSWER ONLY)

- 1 You were given this information explicitly
- 2 You deduced this yourself from other information you received
- 3 You came across this information when searching for information on sciences, research or medicine
- 4 None (SPONTANEOUS)
- 5 Others (SPONTANEOUS)
- 6 DK
- 9 Inap. unaware of EU projects (not coded 1 in V192)

v295 - QE5 DRIVING - NEW OR SECOND HAND CAR

ASK Q.E ONLY IN EU25

ASK Q.E2 to Q.E6 IF "DRIVE", CODE 1 to 3 in Q.E1

Q.E5

Did you get the car you usually use new or second hand?

(IF RESPONDENT DOES NOT OWN THE CAR ASK IF OWNER GOT IT NEW)

- 1 New
- 2 Second hand
- 3 DK
- 9 Inap. not driving a car (not coded 1 in V285, V286 or V287)
- 99 Inap. BG, RO (coded 29 and 28 in V6)

v297 - QE7A CAR PURCHASE FACTORS: FIRST

Q.E7

ASK ALL IN EU25

Suppose you were to buy a car today, be it new or second hand, which factors, apart from the price, would make you lean towards one model over another?

(SHOW CARD - ONE ANSWER PER COLUMN)

(READ OUT)

Q.E7A Firstly?

- 1 Engine performance
- 2 Aesthetics
- 3 Space inside
- 4 Comfort
- 5 Safety
- 6 Durability/robustness
- 7 Fuel consumption
- 8 Level and availability of equipment
- 9 Reputation of mark\ brand
- 10 Environmentally clean
- 11 Number of seats
- 12 Resale value
- 13 Servicing cost
- 14 Not applicable (SPONTANEOUS)
- 15 Other (SPONTANEOUS)
- 16 DK
- 99 Inap. BG, RO (coded 29 and 28 in V6)

v300 - QE8 CAR SAFETY SYST: ABS

ASK Q.E ONLY IN EU25

Q.E8

I will read out a list of car safety systems, some of which already exist and others which are currently under development. For each of these systems, please tell me which of the following statements best corresponds to your opinion.

(SHOW CARD WITH ITEMS AND DEFINITIONS AND SHOW CARD WITH SCALE - ONE ANSWER PER LINE)

(READ OUT - TOP BOTTOM ROTATION)

Q.E8_1 ABS, Anti-Lock Breaking System: system preventing the blocking of the wheels when breaking and thus allowing the car to stay on track

- 1 It is not a useful system and you would not like to have it on your next car
- 2 It is not a useful system but you would like to have it on your next car
- 3 It is a useful system but you would not like to have it on you next car
- 4 It is a useful system and you would like to have it on your next car
- 5 Not applicable (SPONTANEOUS)
- 6 DK
- 9 Inap. BG, RO (coded 29 and 28 in V6)

v308 - QE8 CAR SAFETY SYST: SPEED ALERT

ASK Q.E ONLY IN EU25

Q.E8

I will read out a list of car safety systems, some of which already exist and others which are currently under development. For each of these systems, please tell me which of the following statements best corresponds to your opinion.

(SHOW CARD WITH ITEMS AND DEFINITIONS AND SHOW CARD WITH SCALE - ONE ANSWER PER LINE)

(READ OUT - TOP BOTTOM ROTATION)

Q.E8_9 Speed Alert: system detecting local speed limits on all types of roads and warning driver if they exceed these

- 1 It is not a useful system and you would not like to have it on your next car
- 2 It is not a useful system but you would like to have it on your next car
- 3 It is a useful system but you would not like to have it on your next car
- 4 It is a useful system and you would like to have it on your next car
- 5 Not applicable (SPONTANEOUS)
- 6 DK

v310 - QE9A CAR SAFETY SYSTEMS PUT OFF - FIRST

ASK Q.E ONLY IN EU25

Q.E9

Which of the following factors would most put you off having these kind of safety systems in your car?

(SHOW CARD - ONE ANSWER PER COLUMN)

(READ OUT)

Q.E9A Firstly?

- 1 Undermines driver's freedom
- 2 Reduces driver's responsiveness and alertness by creating an artificial feeling of being protected
- 3 Fear of excessive visual and sound warnings
- 4 Fear of unreliable electronic systems
- 5 It's difficult to understand how these safety systems work
- 6 It's too expensive to buy
- 7 It's too expensive to service
- 8 Cars are already safe enough
- 9 Other (SPONTANEOUS)
- 10 DK

v311 - QE9B CAR SAFETY SYSTEMS PUT OFF - SECOND

ASK Q.E ONLY IN EU25

Q.E9

Which of the following factors would most put you off having these kind of safety systems in your car?

(SHOW CARD - ONE ANSWER PER COLUMN)

(READ OUT)

Q.E9B And secondly?

- 1 Undermines driver's freedom
- 2 Reduces driver's responsiveness and alertness by creating an artificial feeling of being protected
- 3 Fear of excessive visual and sound warnings
- 4 Fear of unreliable electronic systems
- 5 It's difficult to understand how these safety systems work
- 6 It's too expensive to buy
- 7 It's too expensive to service
- 8 Cars are already safe enough
- 9 Other (SPONTANEOUS)
- 10 DK
- 99 Inap. BG, RO (coded 29 and 28 in V6)

v326 - QE12A EMERGENCY CALL SYST - PRIVACY INTRUS

ASK Q.E ONLY IN EU25

Q.E12A

ASK Q.E12A ONLY TO SPLIT A

Cars can be equipped with an emergency call system which automatically calls the local emergency authorities when the vehicle is involved in a serious accident. This system instantly transfers to them accurate vehicle position and other accident related data and thereby reduces the time for the rescue services to arrive. Some people might consider this system as an intrusion on driver's privacy. Do you personally regard this as...?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

- 1 A real risk of intrusion that would deter you from having such a system
- 2 A minor inconvenience compared with the usefulness of the system
- 3 You do not consider it as an inconvenience as far as you are concerned
- 4 None of these (SPONTANEOUS)
- 5 DK
- 9 Inap. split ballot B (coded 2 in v461)
- 99 Inap. BG, RO (coded 29 and 28 in V6)

v328 - QF1 HUMANITARIAN AID OUTSIDE EU - JUSTIFIED

Let's move on to another topic.

Q.F1

ASK ALL

Do you think it is justified or not to help victims of natural disasters or conflicts outside the European Union territory by providing them with humanitarian aid?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

- 1 Totally justified
- 2 Fairly justified
- 3 Fairly unjustified
- 4 Totally unjustified
- 5 It depends on the country (SPONTANEOUS)
- 6 DK

v340 - QF6 HUMANITARIAN AID - NATIONAL OR EU LEVEL

Q.F6

Would you say that humanitarian aid is more efficient if provided by each Member State separately or if it is provided by the European Union through the European Commission?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

- 1 More efficient if provided by each Member State separately
- 2 More efficient if provided by the European Union through the European Commission
- 3 Neither one, nor the other (SPONTANEOUS)
- 4 DK

v343 - QF7 HUMANITARIAN AID: TREAT VICTIMS EQUALLY

Q.F7

Using a scale from 1 to 10, how would you judge the importance of each of the following potential actions that developed countries could undertake in the field of humanitarian aid. '1' means that this action is, in your opinion, "not at all essential" and '10' means that it is "essential". What about the decision to...

v345 - QF7 HUMANITARIAN AID: FOCUS ON PREPAREDNESS

Q.F7

Using a scale from 1 to 10, how would you judge the importance of each of the following potential actions that developed countries could undertake in the field of humanitarian aid. '1' means that this action is, in your opinion, "not at all essential" and '10' means that it is "essential". What about the decision to...

(SHOW CARD WITH SCALE - ONE ANSWER PER LINE)

(READ OUT)

Q.F7_5 Focus more on risk reduction and disaster preparedness

v346 - D1 LEFT-RIGHT PLACEMENT

DEMOGRAPHICS

D.1

In political matters people talk of "the left" and "the right". How would you place your views on this scale?

(SHOW CARD)

v347 - D1 LEFT-RIGHT PLACEMENT - RECODED 3 CAT

D.1R1 Left - right scale - RECODED

- 1 (1 - 4) Left
- 2 (5 - 6) Centre
- 3 (7 -10) Right
- 4 DK/Refusal

Derivation:

This variable collapses answers to D.1 into four categories.

Note:

See D.1 for complete question text.

v350 - D8 AGE EDUCATION

D.8

How old were you when you stopped full-time education?

(IF "STILL STUDYING", CODE '00' - IF "NEVER HAD FULL-TIME EDUCATION", CODE '98' - IF "DON'T KNOW\ DON'T REMEMBER, CODE '99')

2 2 years

65 65 years

97 No full-time education

98 Still studying

99 DK

Note:

Last trend: EB65.3, D.8

Actual number coded

Original code "00" recoded to "98"

Original code "98" recoded to "97"

Outlier (< 7) for France (n=1) and Spain (n=2). ALL cases < 15 have been recoded to "up to 14" in V351.

v351 - D8 AGE EDUCATION - RECODED

D.8R Age when finished full-time education - RECODED

- 1 Up to 14 years
- 2 15 years
- 3 16 years
- 4 17 years
- 5 18 years
- 6 19 years
- 7 20 years
- 8 21 years
- 9 22 years and older
- 10 Still studying
- 11 No full-time education
- 12 DK

Note:

See D.8 for complete question text.

v353 - D11 AGE EXACT

D.11

How old are you?

15 15 years

98 98 years

Note:

Last trend: EB65.3, D.11

v354 - D11 AGE RECODED - FOUR GROUPS

D.11R1 AGE - RECODED IN FOUR GROUPS

- 1 15 - 24 years
- 2 25 - 39 years
- 3 40 - 54 years
- 4 55 years and older

Derivation:

This variable collapses answers to D.11 into four categories.

Note:

See D.11 for complete question text

v360 - D40A HOUSEHOLD COMPOSITION: AGED 15+ (REC)

D.40AR HOUSEHOLD COMPOSITION: AGED 15+ (RECODED)

- 1 One
- 2 Two
- 3 Three
- 4 Four or more

Derivation:

This variable collapses answers to D.40A into four categories.

Note:

See D.40A for complete question text.

v366 - D40 HOUSEHOLD COMPOSITION: SIZE A+B+C (REC)

D.40R HOUSEHOLD COMPOSITION: SIZE (A+B+C) RECODED

- 1 One
- 2 Two
- 3 Three
- 4 Four
- 5 Five
- 6 Six
- 7 Seven or more

Derivation:

This variable collapses answers to D.40 into seven categories.

Note:

See D.40A, D.40B and D.40C for complete question texts.

Generated by the Archive in accordance with former surveys.

v454 - P13 LANGUAGE OF INTERVIEW - LUXEMBOURG

P.13_LU Language of questionnaire: Luxembourg

- 1 Luxembourgish
- 2 French
- 3 German
- 9 Inap. not LU (not coded 6 in V6)

Note:

Starting with Eurobarometer 62 and with the change of fieldwork responsibility to TNS, the relation between average frequencies for language categories "French" and "Luxembourgish" appears to be inversed. The majority of respondents in Luxembourg are now coded as being interviewed in French and not in Luxembourgish as former Eurobarometer surveys indicate. It could not be ascertained if TNS (intermittently) changed the fieldwork strategy regarding languages. Starting with Eurobarometer 69 the former proportion is recovered, again representing the actual proportion between Luxembourgish and French as mother languages in Luxembourg. This is probably also true for Eurobarometer 68.1 and 68.2 where the labelling in the data set (value label) is shifted compared to the field questionnaire.

Last trend: EB65.3, P.13

v454

Value	Label	Missing	Count	Percent	Valid Percent
1	Luxembourgish		184	0.7	36.4

v462 - ORIGINAL RESPONDENT ID

Original Respondent Identification Number

This is the original respondent identification number as supplied by TNS OPINION & SOCIAL. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 03: West Germany; 04: East Germany; 05: Greece; 06: Spain; 07: Finland; 08: France; 09: Ireland; 10: Italy; 11: Luxembourg; 12: Netherlands; 13: Austria; 14: Portugal; 15: Sweden; 16: Great Britain; 17: Northern Ireland; 18: Cyprus (Republic); 19: Czech Republic; 20: Estonia; 21: Hungary; 22: Latvia; 23: Lithuania; 24: Malta; 25: Poland; 26: Slovakia; 27: Slovenia; 28: Bulgaria; 29: Romania). The remaining digits contain the country-specific questionnaire numbers.

Note:

Actual number is coded.

v463 - INTERVIEWER ID

Original Interviewer Identification Number

This is the original interviewer identification number as supplied by TNS OPINION & SOCIAL. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 03: West Germany; 04: East Germany; 05: Greece; 06: Spain; 07: Finland; 08: France; 09: Ireland; 10: Italy; 11: Luxembourg; 12: Netherlands; 13: Austria; 14: Portugal; 15: Sweden; 16: Great Britain; 17: Northern Ireland; 18: Cyprus (Republic); 19: Czech Republic; 20: Estonia; 21: Hungary; 22: Latvia; 23: Lithuania; 24: Malta; 25: Poland; 26: Slovakia; 27: Slovenia; 28: Bulgaria; 29: Romania). The remaining digits contain the country-specific interviewer id number.

999999999 Inap. FR (coded 1 in V6)

Note:

No interviewer id provided for France.

Actual number is coded.
