Acknowledgements

Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences.

Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (<http://zacat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

1.2 Content

1.2.1 Abstract

This round of Eurobarometer surveys diverged from the Standard Eurobarometer measures and queried respondents on the following major areas of focus: (1) social reality, (2) e-communications, (3) Common Agricultural Policy, (4) discrimination and the media, and (5) medical research. For the first area of focus, a sequence of questions covered a broad spectrum in terms of social reality, asking the respondents to evaluate their life and job satisfaction, work environment, confidence in their job skills, ability to keep or find a job, and what they expected would happen to their jobs in the near future, e.g., promotion, job loss, relocation, and pensions. Respondents were then asked their opinions on the effectiveness of social welfare, which social issues they considered most important, whether they had or wanted children, how the presence of minority groups affect their countries in a cultural and economic sense, and what necessities are required in order to get ahead in life. The next major focus called for respondents to provide information on the availability, or lack thereof, of each of these communication systems: television, fixed telephone, mobile phones, and Internet in their household. Respondents were asked to share reasons why they owned or did not own certain systems, including telecommunication bundles, and to explain how accessible the systems were to their household. Respondents also were asked to assess the performance of each system, to share their expectations as consumers, and to rate the effectiveness of their service providers and the available features (e.g., personal data protection, costs, tariffs, and flexibility with account changes). Respondents indicated, from lists of service providers included in the survey, the specific provider they used for each communication system they used. Respondents answered additional questions about viruses and/or spam, and how they dealt with such issues, as well as their knowledge of the phone numbers to contact in case of emergencies. Only one question was asked in the next topic as respondents were shown a European label and asked what it symbolized. For the next major area of focus, the survey asked respondents about their knowledge of and their interest in learning about the Common Agricultural Policy (CAP). Respondents also were asked their opinions on the importance of agriculture and rural development in their countries, what the European Union's (EU) main priorities should be in terms of CAP, and the effectiveness of its role in policy development. Respondents were further asked if the EU's reduction of the subsidy for farmers was justified if farmers failed to attend to their responsibilities and rules of policy, and whether the current amount of budgeting for agriculture was adequate. The next major topic focused on people's opinions about discrimination and the media. Respondents were requested to assess the importance of the media's role in combatting discrimination and the particular actions the media may use to do this. The survey further asked respondents how they felt about viewing people of different ethnic origins on television, and the media's use of ethnic origin or religious affiliation when discussing people. Also, respondents shared whether they believed the media contributed to the creation of ethnic tensions between different communities. For the final topic, the survey queried respondents about their knowledge of and interest in scientific research, their access to information on science and/or subjects of interest (e.g., exhibitions, lectures, professors, doctors, family, and periodicals), and whether they were aware of the projects funded by the EU. Demographic and other background information include respondent's age, gender, nationality, origin of birth (personal and parental), marital status, left-to-right political self-placement, occupation, age when stopped full-time education, household composition, and ownership of a fixed or a mobile telephone and other durable goods. In addition, country-specific data include the type and size of locality, region of residence, and language of interview.

1.2.2 Topic classification

- International Institutions, Relations
- Work and Industry
- Income
- Family
- Society, Culture
- Patterns of Consumption

1.3 Universe

In all, Eurobarometer 66.3 interviewed 29.260 citizens of the 25 countries in the European Union after the 2004 enlargement, in the remaining Accession Countries (AC) Bulgaria and Romania and Candidate Countries (CC) Croatia and Turkey and among the Turkish Cypriote Community (TCC). All respondents were residents in the respective country, nationals and non-nationals but EU-citizens, and aged 15 and over. They were supposed to have sufficient command of one of the respective national language(s) to answer the questionnaire. Separate samples were drawn for Northern Ireland and East Germany.

1.4 Sampling procedure

A multi-stage, random (probability) sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regional units in every country (Statistical

Office of the European Community, EUROSTAT NUTS 2 or equivalent). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of starting addresses was selected from each sampled PSU, at random. Further addresses were chosen systematically using standard random route procedures as every Nth address from the initial address. In each household, a respondent was drawn, at random, following the closest birthday rule. No more than one interview was conducted in each household.

The regular sample size (in the sense of completed interviews) is 1000 respondents per country, except the United Kingdom with separate samples for Great Britain (1000) and Northern Ireland (300), Germany with separate samples for the Eastern (500) and the Western part (1000), and Luxembourg, Cyprus (Republic), Malta, and Cyprus (TCC) with 500 interviews each. The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

From November 17 to December 19, 2006, the TNS Opinion & Social, a consortium created between Taylor Nelson Sofres and EOS Gallup Europe, carried out the fieldwork for this Eurobarometer, at the request of the European Commission, Directorate General Press and Communication, Opinion Polls. TNS Opinion & Social is based at Avenue Herrmann Debroux, 40, 1160 Brussels, Belgium. TNS Opinion & Social coordinates the fieldwork carried out through its network of national institutes.

1.6 Mode of data collection

In all countries, fieldwork was conducted on the basis of detailed and uniform instructions prepared by TNS Opinion Social. Interviews were conducted face-to-face in people's home in the appropriate national language. As far as the data capture is concerned, CAPI (Computer Assisted Personal Interview) was used in those countries where this technique was available.

Equivalent French and English basic questionnaires were developed for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country. Backtranslation procedures were applied for controlling semantic equivalence.

1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factor corrects for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country as well as each lower level sample (Great Britain and Northern Ireland, East and West Germany) are represented in proportion to its population size within different groupings, or according to the historical states of European unification (e.g. founder members, new members, Euro zone) in the case of the EUROPEAN WEIGHTS, or for the United Kingdom (WEIGHT SPECIAL UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31) and for Germany as a whole (WEIGHT SPECIAL GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general

all samples which do not belong to the respective group of samples under consideration are excluded from calculation.

The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 4) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

Eurobarometer 66.3 provides three (post-stratification) NATION WEIGHTS: W1 (WEIGHT RESULT FROM TARGET) for separate analysis or comparison of individual samples (countries or regions on sub-national level), W4 (WEIGHT SPECIAL UNITED KINGDOM) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole, and W3 (WEIGHT SPECIAL GERMANY), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. W3 and W4 exclude all other countries from calculation, but include the post-stratification factors for the United Kingdom and Germany respectively.

The EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries, of accession or candidate countries, and of Euro zone countries, representing different historical states of European integration (e.g. EU6 = six founder members) . All post-stratification factors are included.

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criteria was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices. The total household figures for input in this post-weighting procedure are listed in the technical description annexed to the basic bilingual questionnaire. All weights described in the following are available in the STANDARD and in the HOUSEHOLD version (W31 to W53, WEX_HH).

Table 2: Overview of population size weights

European Weights in Eurobarometer 66.3	Function
W5 to W9, W11, W14; HH: W35-W39, W41, W44	grouping EU member countries
W10, W13; HH: W40, W43	grouping new member countries
W15, W18, W19; HH: W45, W48, W49	grouping candidate/accession countries
W16, W22, W23; HH: W46, W52, W53	grouping member + candidate/accession countries
W12; HH: W42	grouping (non-)Eurozone countries

For more detailed information on the individual weights please see the corresponding variable description.

1.8 Data preparation

The data received by GESIS from TNS Opinion & Social were checked for completeness, missing and duplicate records, for illegal (wild) codes and for (formal) consistency of response patterns and question routing. Errors discovered by these procedures are documented or corrected, as a general rule after consulting related additional documentation (e.g. tabular reports) or the data provider. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable DDI-XML compliant documentation was created for this dataset by GESIS.

GESIS added 'Inappropriate' (INAP) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the original questionnaire was adhered to for (almost) every respondent. An additional INAP category was defined whenever a question or group of questions were not surveyed in one or more countries, or if variables refer to country specific items (e.g. regions).

Users should note that answers to multiple-response questions are (originally) represented by a series of binary 'dummy' variables (i.e. variables which take on values of one and zero only), creating separate 'dummy' variables also to explicitly represent 'Don't know', 'No answer/refusal' or other residual responses, such as 'None of the above'. The archive has recoded these residual responses in the case of uncommon minor inconsistencies with respect to and in favour of the series of substantial answers.

GESIS has recoded the missing answers (NA) represented in the original data set by blanks (system missing) to standard values. Their practically complete absence suggests that eventual cases of any not explicitly coded item non-response, might be collapsed with the DK (don't know) category.

Question text and contingency text appearing in the variable description is taken from English language version of the basic (bilingual) questionnaire (master questionnaire). Coding schemes and other documentation are based on the English language version of the basic questionnaire or on the respective SPSS data definition statements as provided by TNS Opinion & Social. In case of any discrepancy between questionnaires, SPSS definitions and data regarding the coding scheme of a variable, the archive, as a general rule, carried out any correction in agreement with the data provider.

If the documentation for country-specific questions or answer categories is provided in another languages than English, the archive documents the original language wording and supplies the English translation in brackets. Specific information on data preparation or inconsistencies is noted on variable level.

1.9 Further remarks

This wave does not include the standard Eurobarometer and trend questions.

The module on EUROPEAN SOCIAL REALITY (QA) was not interviewed in Croatia, Turkey and Northern Cyprus (TCC).

The module on E-COMMUNICATIONS (QB) replicates questions asked in the framework of Eurobarometer 64.4 (ZA4416). For this part of the questionnaire where respondents are asked to answer for their household, the 'number of individuals in each household' was introduced as additional weighting criterion (W31 to W53), and the representative samples of individuals aged 15 and more converted into household samples. For more details, see the technical specifications annexed to the basic bilingual questionnaire.

The module on BIOLOGICAL AND MEDICAL RESEARCH (QF) was only surveyed in Croatia and Turkey. The EU 27 member and accession countries have been interviewed identical questions in the framework of Eurobarometer 65.4 (ZA4508).

2 Eurobarometer Series Description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brêthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001–2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

Table 3: EU enlargement and countries covered by Standard and Special Eurobarometer

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 4: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.20VR, 55.10VR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.30VR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.20VR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 5) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 5: Overview of Eurobarometer surveys with standard EU and trend question modules

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

3 Dataset structure and standards

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 6: ZEUS Party Family Code (slightly modified)

Category		Party Family
0	(001-099)	not affiliated / electoral alliances across "families"
1	(100-199)	Communists
2	(200-299)	Socialists
3	(300-399)	Liberals
4	(400-499)	Christian Democrats
5	(500-599)	Conservatives
6	(600-699)	Extreme Rights / Nationalists
7	(700-799)	Regionalists / Ethnic
8	(800-899)	Environmental parties
9	(900-949)	Agricultural parties
9	(950-989)	other special issue parties (e.g. Eurosceptics) and independents
	990	other (spontaneous)
	994	not voting age
	995	empty ballot (blank) or invalid vote
	996	not voted / would not vote
	997	Refused
	998	DK / DK+NA if NA not coded separately
	999	INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable

description. Due to general changes in party systems and to the ideological development of individual political parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION – ALL SAMPLES ISO 3166).

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (~1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded "real" values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission's official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

CROSS-TABULATION: The absolute frequencies of the occurrence of values (<i>absolute values</i>) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies (<i>row percent</i>) refer to the valid cases (<i>n valid sum</i>), i.e. the total number of cases (<i>n sum</i>) reduced by the number of cases defined as missing data (<i>M</i>). For display and place saving reasons excluded countries or areas may be completely dropped from the table.																																																																																																																																																																																																																																																																																																																																																					
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (<i>M</i>), i.e. <i>percent</i> on the basis of all cases (<i>sum</i>) and <i>valid percent</i> on the basis of the <i>valid cases</i> .																																																																																																																																																																																																																																																																																																																																																					

5 Variable Documentation

Variable, Label

Question Text (English Language)

v1 - STUDY NUMBER DISTRIBUTOR

ARCHIVE STUDY NUMBER DISTRIBUTOR

Study Number of the distributing data archive.

v1

Value	Label	Missing	Count	Percent	Valid Percent
4528			29260	100.0	100.0
	Sum		29260	100.0	100.0
	Valid Cases		29260		

v2 - STUDY NUMBER PRODUCER

ARCHIVE STUDY NUMBER PRODUCER

Study number of the producer of this data set edition.

v2

Value	Label	Missing	Count	Percent	Valid Percent
4528			29260	100.0	100.0
	Sum		29260	100.0	100.0
	Valid Cases		29260		

v3 - GESIS ARCHIVE VERSION**VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET**

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

v3

Value	Label	Missing	Count	Percent	Valid Percent
2.0.1 (2012-07-02)			29260	100.0	100.0
	Sum		29260	100.0	100.0
	Valid Cases		29260		

v4 - EUROBAROMETER NUMBER

EUROBAROMETER SURVEY NUMBER

The number identifying the Eurobarometer survey.

663 Eurobarometer 66.3, 11-12 2006

v4

Value	Label	Missing	Count	Percent	Valid Percent
663	Eurobarometer 66.3, 11-12 2006		29260	100.0	100.0
	Sum		29260	100.0	100.0
	Valid Cases		29260		

v5 - ID SERIAL NUMBER

ID SERIAL NUMBER

Sequential respondent identification number assigned by the archive.

v6 - NATION - ALL SAMPLES

NATION - ALL SAMPLES

All samples including separate samples for East and West Germany and for Great Britain and Northern Ireland.

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany West
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 Germany East
- 15 Norway (not included)
- 16 Finland
- 17 Sweden
- 18 Austria
- 19 Cyprus (Republic)
- 20 Czech Republic
- 21 Estonia
- 22 Hungary
- 23 Latvia
- 24 Lithuania

v7 - NATION - ALL SAMPLES ISO 3166

NATION - ALL SAMPLES ISO 3166

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

Note:

Use of weighting factor W1 (V8) is optional.

v8 - W1 WEIGHT RESULT FROM TARGET

W1 WEIGHT RESULT FROM TARGET

This POST-STRATIFICATION WEIGHT is based on a comparison for each sample with the respective universe description. As such in all countries, gender, age, region and size of locality are introduced in the iteration procedure carried out by the fieldwork institutes.

British and Northern Irish as well as East and West German samples are weighted separately. The weight reproduces the real number of cases for each country. In terms of its general function it corresponds to former NATION WEIGHT II (until EUROBAROMETER 31).

v9 - NATION - UNITED KINGDOM

NATION - UNITED KINGDOM

Great Britain and Northern Ireland are coded together.

0 Not United Kingdom

1 United Kingdom

Note:

Use of weighting factor W4 (V10) is mandatory.

v10 - W4 WEIGHT SPECIAL UNITED KINGDOM

W4 WEIGHT SPECIAL UNITED KINGDOM

This POPULATION SIZE WEIGHT adjusts the British and the Northern Irish (sub-national) samples to their share in the total population aged 15 and over in the United Kingdom. It must be applied whenever the United Kingdom is to be analyzed as a whole. The post-stratification weighting factors are included for both samples. All other samples are excluded from analysis. In terms of its general function the weight corresponds to former NATION WEIGHT I (until EUROBAROMETER 31).

v11 - NATION - UNITED GERMANY

NATION - UNITED GERMANY

East and West Germany are coded together.

0 Not Germany

1 Germany

Note:

Use of weighting factor W3 (V12) is mandatory.

v14 - W5 WEIGHT EURO 6

W5 WEIGHT EUROPE 6

This POPULATION SIZE WEIGHT refers to the six EC founder members: France, Belgium, Netherlands, West Germany, Italy, and Luxembourg. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EURO 6 must be applied whenever these six EC founder countries are to be analyzed altogether as a group.

v15 - NATION GROUP EURO 9

NATION GROUP EURO 9

NATION GROUP EURO 9 adds Denmark, Ireland, Great Britain and Northern Ireland to the EURO 6 countries.

0 Not EURO 9

1 EURO 9

Note:

Use of weighting factor W6 (V16) is mandatory.

v22 - W9 WEIGHT EURO 12 + EAST GERMANY

W9 WEIGHT EURO 12+ EAST GERMANY

This POPULATION SIZE WEIGHT equals WEIGHT EURO 12 but in addition including East Germany (former German Democratic Republic) after the unification of Germany on October 3, 1990 (Eurobarometer 34). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EURO 12+ must be applied whenever these twelve member countries are to be analyzed altogether as a group including the Eastern part of Germany (new German federal states).

v23 - NATION GROUP EURO NEW 3 (1995)

NATION GROUP EURO NEW 3 (1995)

NATION GROUP EURO NEW 3 only refers to the three new members as of January 1995: Finland, Sweden and Austria.

0 Not EURO NEW 3 (1995)

1 EURO NEW 3 (1995)

Note:

Use of weighting factor W10 (V24) is mandatory.

v28 - W12 WEIGHT SPECIAL EURO ZONE (2002)

W12 WEIGHT SPECIAL EURO ZONE (2002)

This POPULATION SIZE WEIGHT separates the group of 12 countries which introduced the EURO as of January 1, 2002 (Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT SPECIAL EURO ZONE must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

v29 - NATION GROUP EURO NEW 10 (2004)

NATION GROUP EURO NEW 10 (2004)

NATION GROUP EURO NEW 10 refers to the group of the ten new members of the enlargement in 2004.

0 Not EURO NEW 10 (2004)

v36 - W16 WEIGHT EURO 29 (EURO 25 + AC2/CC2)

W16 WEIGHT EURO 29 (EURO 25 + AC/CC)

This POPULATION SIZE WEIGHT includes all 25 member countries after the 2004 enlargement, plus the remaining Accession (AC: Bulgaria and Romania) and Candidate Countries (CC: Croatia and Turkey). The post-stratification weighting factors are included. Northern Cyprus (Turkish Cypriote Community=TCC) is excluded from calculation. WEIGHT EURO 29 must be applied whenever these 29 countries are to be analyzed altogether as a group.

v37 - NATION GROUP ACCESSION COUNTRIES (BG RO)

NATION GROUP EU ACCESSION COUNTRIES (BG/RO)

NATION GROUP EU ACCESSION COUNTRIES refers to Bulgaria and Romania.

0 Not AC (BG RO)

1 AC (BG RO)

v42 - W22 WEIGHT EURO 27 (EURO 25 + AC2)

W22 WEIGHT EURO 27 (EURO 25 + AC)

WEIGHT EURO 27 includes all 25 member countries after the 2004 enlargement, plus the remaining Accession Countries (AC) Bulgaria and Romania.

This POPULATION SIZE WEIGHT adjusts each national sample in proportion to its share in the total population aged 15 and over, of the European Union plus Bulgaria and Romania. It should be used whenever all 27 countries participating in this wave are to be analysed as a group (V41: NATION GROUP EURO27). The post-stratification weighting factors for all samples/countries are included.

v43 - NATION GROUP EURO 28 (EURO 27 + HR)

NATION GROUP EURO 28 (EURO 27 + HR)

NATION GROUP EURO 28 includes all 25 member countries after the 2004 enlargement, plus the remaining Accession Countries Bulgaria and Romania (AC) and the Candidate Country Croatia (CC). Northern Cyprus (Turkish Cypriote Community=TCC) is excluded.

v44 - W23 WEIGHT EURO 28 (EURO 27 + HR)

W23 WEIGHT GROUP EURO 28 (EURO 27 + HR)

WEIGHT EURO 28 includes all 25 member countries after the 2004 enlargement, plus the remaining Accession Countries Bulgaria and Romania (AC) and the Candidate Country Croatia (CC). Northern Cyprus (Turkish Cypriote Community=TCC) is excluded from calculation.

This POPULATION SIZE WEIGHT adjusts each national sample in proportion to its share in the total population aged 15 and over, of NATION GROUP EURO 28 (V43). The post-stratification weighting factors are included.

v45 - WEX WEIGHT EXTRA POPULATION 15+

WEX WEIGHT EXTRA POPULATION 15+

WEIGHT EXTRA extrapolates the actual universe (population aged 15 or more) for each country (sample), i.e. this weight variable integrates all other available weights, but does not reproduce the number of cases in the data set.

v46 - W31 HH WEIGHT RESULT FROM TARGET

W31 WEIGHT RESULT FROM TARGET - HOUSEHOLD WEIGHT

W31 WEIGHT RESULT FROM TARGET is for use in separate analyses of individual countries (=samples). It reproduces the real number of cases for each sample. British and Northern Irish as well as East and West German samples are weighted separately. Use NATION variable V6 or V7.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

Weight ID differs from Eurobarometer 64.4

v47 - W34 HH WEIGHT SPECIAL UNITED KINGDOM

W34 WEIGHT SPECIAL UNITED KINGDOM - HOUSEHOLD WEIGHT

W34 WEIGHT SPECIAL UNITED KINGDOM adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom and should be used whenever the United Kingdom is to be analyzed as a whole. The national weights are included. This weight in its function partly corresponds to former NATION WEIGHT I (until EUROBAROMETER 31). All other samples are excluded from calculation.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

Weight ID differs from Eurobarometer 64.4

v48 - W33 HH WEIGHT SPECIAL GERMANY

W33 WEIGHT SPECIAL GERMANY - HOUSEHOLD WEIGHT

W33 WEIGHT SPECIAL GERMANY adjusts the East and the West German samples to their respective proportions in the united Germany. The national weights are included. This weight should be used whenever the united Germany is to be analyzed as a whole. All other samples are excluded from calculation.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

Weight ID differs from Eurobarometer 64.4

v49 - W35 HH WEIGHT EURO 6

W35 WEIGHT EURO 6 - HOUSEHOLD WEIGHT

W35 WEIGHT EURO 6 only refers to the six EC founder-members (France, Belgium, the Netherlands, West Germany, Italy and Luxembourg).

This variable contains weights that adjust each national sample to its nation's share in the population of the above mentioned countries and should be used whenever these six countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

Weight ID differs from Eurobarometer 64.4

v50 - W36 HH WEIGHT EURO 9

W36 WEIGHT EURO 9 - HOUSEHOLD WEIGHT

W36 WEIGHT EURO 9 adds Denmark, Ireland, Great Britain and Northern Ireland to the EURO 6 countries.

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

Weight ID differs from Eurobarometer 64.4

v51 - W37 HH WEIGHT EURO 10

W37 WEIGHT EURO 10 - HOUSEHOLD WEIGHT

W37 WEIGHT EURO 10 adds Greece to the EURO 9 countries (new member as of January 1981).

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

Weight ID differs from Eurobarometer 64.4

v52 - W38 HH WEIGHT EURO 12

W38 WEIGHT EURO 12 - HOUSEHOLD WEIGHT

W38 WEIGHT EURO 12 adds Spain and Portugal to the EURO 10 countries (new member as of January 1986).

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

Weight ID differs from Eurobarometer 64.4

v53 - W39 HH WEIGHT EURO 12 + EAST GERMANY

W39 WEIGHT EURO 12+ EAST GERMANY - HOUSEHOLD WEIGHT

W39 WEIGHT EURO 12+ equals EURO 12 but including East Germany after the unification of Germany on October 3, 1990.

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

Weight ID differs from Eurobarometer 64.4

v54 - W40 HH WEIGHT EURO NEW 3 (1995)

W40 WEIGHT EURO NEW 3 (1995) - HOUSEHOLD WEIGHT

W40 WEIGHT EURO NEW 3 only refers to the three new members as of January 1995: Finland, Sweden and Austria.

This variable contains weights that adjust each national sample to its nation's share in the total population of these three countries and should be used whenever these three countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

Weight ID differs from Eurobarometer 64.4

v55 - W41 HH WEIGHT EURO 15

W41 WEIGHT EURO 15 - HOUSEHOLD WEIGHT

W41 WEIGHT EURO 15 adds Austria, Finland and Sweden to the EURO 12+ countries, new members as of January 1995.

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

Weight ID differs from Eurobarometer 64.4

v56 - W42 HH WEIGHT SPECIAL EURO ZONE (2002)

W42 WEIGHT SPECIAL EURO ZONE (2002) - HOUSEHOLD WEIGHT

W42 WEIGHT SPECIAL EURO ZONE separates the group of 12 countries which introduced the EURO as of January 1, 2002 (Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland).

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

Weight ID differs from Eurobarometer 64.4

v57 - W43 HH WEIGHT EURO NEW 10 (2004)

W43 WEIGHT EURO NEW 10 (2004) - HOUSEHOLD WEIGHT

W43 WEIGHT EURO NEW 10 refers to the group of the ten new members of the enlargement in 2004.

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

Weight ID differs from Eurobarometer 64.4

v58 - W44 HH WEIGHT EURO 25

W44 WEIGHT EURO 25 - HOUSEHOLD WEIGHT

W44 WEIGHT EURO 25 refers to the EU member countries after the enlargement in 2004.

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

Weight ID differs from Eurobarometer 64.4

v59 - W45 HH WEIGHT SPECIAL AC/CC

W45 WEIGHT SPECIAL AC2/CC2 - HOUSEHOLD WEIGHT

W45 WEIGHT SPECIAL AC2/CC2 refers to the group of the two Accession (Bulgaria, Romania) and the two remaining Candidate Countries (Croatia, Turkey) as of 2004.

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

Weight ID differs from Eurobarometer 64.4

v60 - W46 HH WEIGHT EURO 29 (EURO 25 + AC/CC)

W46 WEIGHT EURO 29 (EURO 25 + AC2/CC2) - HOUSEHOLD WEIGHT

W46 WEIGHT EURO 29 includes all 25 member countries after the 2004 enlargement, plus the remaining Accession and Candidate Countries (AC2/CC2). Northern Cyprus (Turkish Cypriote Community=TCC) is excluded from calculation.

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. The national weights for each sample are included.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

Weight ID differs from Eurobarometer 64.4

v61 - W48 HH WEIGHT ACCESSION COUNTRIES (BG RO)

W48 WEIGHT ACCESSION COUNTRIES (BG/RO) - HOUSEHOLD WEIGHT

W48 WEIGHT ACCESSION COUNTRIES refers to Bulgaria and Romania.

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. The national weights for each sample are included. All other countries are excluded from calculation.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

Weight ID differs from Eurobarometer 64.4

v62 - W49 HH WEIGHT CANDIDATE COUNTRIES (TR HR)

W49 WEIGHT CANDIDATE COUNTRIES (TR/HR) - HOUSEHOLD WEIGHT

W49 WEIGHT CANDIDATE COUNTRIES refers to Turkey and Croatia.

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. The national weights for each sample are included. All other countries are excluded from calculation.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

Weight ID differs from Eurobarometer 64.4

v63 - W52 HH WEIGHT EURO 27 (EURO 25 + AC)

W52 WEIGHT EURO 27 (EURO 25 + AC) - HOUSEHOLD WEIGHT

W52 HH WEIGHT EURO 27 includes all 25 member countries after the 2004 enlargement, plus the remaining Accession Countries (AC) Bulgaria and Romania. All other samples are excluded from calculation.

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. The national weights for each sample are included.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v64 - W53 HH WEIGHT EURO 28 (EURO 27 + HR)

W53 WEIGHT EURO 28 (EURO 27 + HR) - HOUSEHOLD WEIGHT

W53 HH WEIGHT EURO 28 includes all 25 member countries after the 2004 enlargement, plus the remaining Accession Countries (AC) Bulgaria and Romania, plus the remaining Candidate Country (CC) Croatia. All other samples are excluded from calculation.

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. The national weights for each sample are included.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v65 - WEX HH WEIGHT EXTRA POPULATION 15+

WEX WEIGHT EXTRA POPULATION 15+ - HOUSEHOLD WEIGHT

WEIGHT EXTRA extrapolates the actual universe (population aged 15 or more) for each country (sample), i.e. this weight variable integrates all other available weights, but does not reproduce the number of cases in the data set.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v141 - QA9 JOB SITUATION: BORING WORK

ASK Q.A ONLY IN EU25 + BG + RO

Q.A9

ASK Q.A9 TO Q.A11 IF "CURRENTLY WORK", CODE 5 to 18 in D.15A - OTHERS GO TO Q.A12

How much do you agree or disagree with the following statements describing positive and negative aspects of your job?

(SHOW CARD WITH SCALE - ONE ANSWER PER LINE)

(READ OUT - ROTATE)

Q.A9_3 My work is dull and boring

- 1 Strongly agree
- 2 Agree
- 3 Neither agree nor disagree
- 4 Disagree
- 5 Strongly disagree
- 6 DK
- 9 Inap. not currently working (not coded 5 to 18 in V97)
- 99 Inap. not EU27 (not coded 1 to 30 in V6)

v243 - QB1 TELECOM DEV IN HH: MOB PHONE PRE-PAID

Q.B1

For each of the following please tell me how many of them are available in your household.

(SHOW CARD - ONE ANSWER PER LINE)

(READ OUT)

Q.B1_4 Mobile phone access on a pre-paid arrangement (pre-paid cards)

- 0 None
- 1 One
- 2 Two
- 3 Three
- 4 Four or more
- 5 DK

Note:

Last trend: EB64.4, Q.B1

Categories '4' to '9' were summarized in category 4 by the original data producer. Questionnaire category 11 (DK) is coded 5.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V46 to V65.

v246 - QB1 TELECOM DEV IN HH: ISDN LINE

Q.B1

For each of the following please tell me how many of them are available in your household.

(SHOW CARD - ONE ANSWER PER LINE)

(READ OUT)

Q.B1_7 ISDN line (an ISDN line which allows two simultaneous communications counts as 1)

- 0 None
- 1 One
- 2 Two
- 3 Three
- 4 Four or more
- 5 DK

Note:

Last trend: EB64.4, Q.B1

Categories '4' to '9' were summarized in category 4 by the original data producer. Questionnaire category 11 (DK) is coded 5.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V46 to V65.

v250 - QB1 TELECOM DEV IN HH: WIRELESS INTERNET

Q.B1

ONLY IF ACCESS IN ITEM 10

For each of the following please tell me how many of them are available in your household.

(SHOW CARD - ONE ANSWER PER LINE)

(READ OUT)

Q.B1_11 Wi-fi modem or Wi-fi router for wireless Internet

- 0 None
- 1 One
- 2 Two
- 3 Three
- 4 Four
- 5 DK
- 9 Inap. no internet access (not coded 1-4 in V249)

Note:

Last trend: EB64.4, Q.B1

Categories '4' to '9' were summarized in category 4 by the original data producer. Questionnaire category 11 (DK) is coded 5.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V46 to V65.

v974 - QB7 FX PHONE: CAN VERIFY CONSUMPTION

ASK Q.B4 TO Q.B7 IF "FIXED TELEPHONY OR ISDN IN THE HOUSEHOLD", CODE 1-9 IN Q.B1 ITEM 6 OR ITEM 7

Q.B7

For each of the following, please tell me whether you totally agree, tend to agree, tend to disagree or totally disagree.

(SHOW CARD WITH SCALE - ONE ANSWER PER LINE)

(READ OUT)

Q.B7_2 You are able to verify your fixed telephone service consumption in a simple and consumer friendly way

- 1 Totally agree
- 2 Tend to agree
- 3 Tend to disagree
- 4 Totally disagree
- 5 Not applicable (SPONTANEOUS)
- 6 DK
- 9 Inap. no fixed phone or ISDN (not coded any 1-4 in V245 and V246)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V46 to V65.

v977 - QB7 FX PHONE: READ TARIFF COMPARISONS

ASK Q.B4 TO Q.B7 IF "FIXED TELEPHONY OR ISDN IN THE HOUSEHOLD", CODE 1-9 IN Q.B1 ITEM 6 OR ITEM 7

Q.B7

For each of the following, please tell me whether you totally agree, tend to agree, tend to disagree or totally disagree.

(SHOW CARD WITH SCALE - ONE ANSWER PER LINE)

(READ OUT)

Q.B7_5 You regularly read comparisons of fixed telephone service tariffs between operators published by third parties

- 1 Totally agree
- 2 Tend to agree
- 3 Tend to disagree
- 4 Totally disagree
- 5 Not applicable (SPONTANEOUS)
- 6 DK
- 9 Inap. no fixed phone or ISDN (not coded any 1-4 in V245 and V246)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V46 to V65.

v1755 - QB24 INTERNET: SPEED REMAINS CONSTANT

ASK Q.B20 TO Q.B28 IF "INTERNET ACCESS AT HOME", CODE 1-9 IN Q.B1 ITEM 10 OR ITEM 11

Q.B24

For each of the following, please tell me whether you totally agree, tend to agree, tend to disagree or totally disagree.

(SHOW CARD WITH SCALE - ONE ANSWER PER LINE)

(READ OUT)

Q.B24_2 The speed of your Internet connection\ time to download remains constant

- 1 Totally agree
- 2 Tend to agree
- 3 Tend to disagree
- 4 Totally disagree
- 5 Not Applicable (SPONTANEOUS)
- 6 DK
- 9 Inap. no internet access at home (not coded 1-4 in V249 and V250)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V46 to V65.

v1758 - QB24 INTERNET: SUPPORT SITE IS HELPFUL

ASK Q.B20 TO Q.B28 IF "INTERNET ACCESS AT HOME", CODE 1-9 IN Q.B1 ITEM 10 OR ITEM 11

Q.B24

For each of the following, please tell me whether you totally agree, tend to agree, tend to disagree or totally disagree.

(SHOW CARD WITH SCALE - ONE ANSWER PER LINE)

(READ OUT)

Q.B24_5 The response you receive from helpline staff or support site in case of problems is helpful

- 1 Totally agree
- 2 Tend to agree
- 3 Tend to disagree
- 4 Totally disagree
- 5 Not Applicable (SPONTANEOUS)
- 6 DK
- 9 Inap. no internet access at home (not coded 1-4 in V249 and V250)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V46 to V65.

v1761 - QB24 INTERNET: BLOCK HARMFUL WEBSITES

ASK Q.B20 TO Q.B28 IF "INTERNET ACCESS AT HOME", CODE 1-9 IN Q.B1 ITEM 10 OR ITEM 11

Q.B24

For each of the following, please tell me whether you totally agree, tend to agree, tend to disagree or totally disagree.

(SHOW CARD WITH SCALE - ONE ANSWER PER LINE)

(READ OUT)

Q.B24_8 You can restrict access to websites with harmful content

- 1 Totally agree
- 2 Tend to agree
- 3 Tend to disagree
- 4 Totally disagree
- 5 Not Applicable (SPONTANEOUS)
- 6 DK
- 9 Inap. no internet access at home (not coded 1-4 in V249 and V250)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V46 to V65.

v1795 - QB32 INTERNET SUBSCR IF DROP FX PHONE

ASK Q.B31 AND Q.B32 IF "NO INTERNET ACCESS AT HOME", CODE 10 IN Q.B1 ITEM 10 AND ITEM 11

Q.B32

Would you be willing to subscribe to the Internet if...?

(ONE ANSWER PER LINE)

(READ OUT)

Q.B32_2 You could drop the fixed telephony service and subscribe to the Internet services

- 1 Yes
- 2 No
- 3 DK
- 9 Inap. internet access at home (not coded 0 in V249 or V250)

Note:

Question based on EB64.4, Q.B38

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V46 to V65.

v1800 - QB35 COMMUNICTN PACKAGE HH: TV CHANNELS

Q.B35

By bundle, we understand a combined package offering more than one communication services from the same provider at a single price. Does your household buy two or more of the following services as part of a bundle?

(READ OUT - MINIMUM 2 ANSWERS)

Q.B35_1 Television channels

0 Not mentioned

1 Mentioned

Note:

Last trend modified: EB64.4, Q.B39

Most respondents (n=23956) do not give the required minimum of two answers.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V46 to V65.

v1803 - QB35 COMMUNICTN PACKAGE HH: INTERNET

Q.B35

By bundle, we understand a combined package offering more than one communication services from the same provider at a single price. Does your household buy two or more of the following services as part of a bundle?

(READ OUT - MINIMUM 2 ANSWERS)

Q.B35_4 Internet access

0 Not mentioned

1 Mentioned

Note:

Last trend modified: EB64.4, Q.B39

Most respondents (n=23956) do not give the required minimum of two answers.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V46 to V65.

v1821 - QD1 EUROP AGRICULTURAL/RURAL AREAS - IMPORTANCE

Let's move on to another topic

Q.D1

ASK Q.D AND Q.E ONLY in EU25, BG and RO - TR AND HR GO TO Q.F - CY(TCC) GO TO DEMOGRAPHICS

Not everybody shares the same point of view concerning the importance of European agriculture and the rural areas for our future. Personally, do you think that subject is ... for our future?

(READ OUT)

- 1 Very important
- 2 Important
- 3 Not very important
- 4 Of very little importance
- 5 DK
- 9 Inap. not EU27 (not coded 1 to 30 in V6)

v1826 - QD4A CAP PRIORITIES - FIRST

ASK Q.D AND Q.E ONLY in EU25, BG and RO

Q.D4A

In your opinion, which of the following should be the main priorities of the European Union in terms of agriculture policy? First priority?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

- 1 Ensuring fair standard of living for farmers
- 2 Improving competitiveness of European agriculture
- 3 Helping farmers to adapt their production to consumer's expectations
- 4 Enhancing rural areas
- 5 Ensuring reasonable food prices for consumers
- 6 Ensuring availability of supplies of agricultural products
- 7 Stabilising the markets of agricultural products
- 8 Promoting sustainable agricultural practices
- 9 Favouring methods of organic production
- 10 Protecting family type farms
- 11 Promoting respect for the environment
- 12 Ensuring that agricultural products are healthy and safe
- 13 Ensuring that farm animals are well treated
- 14 Ensuring that you have enough information about where the food comes from and how the food was produced and processed
- 15 Encouraging quality production
- 16 Others (SPONTANEOUS - SPECIFY)
- 17 DK
- 99 Inap. not EU27 (not coded 1 to 30 in V6)

v1847 - QD4AB CAP PRIORITIES: ENHANCING RURAL AREAS

Q.D4AB_T Priority in EU agriculture policy in total

Q.D4AB_4 Enhancing rural areas

0 Not mentioned

1 Mentioned

9 Inap. not EU27 (not coded 1 to 30 in V6)

Derivation:

This variable summarizes responses to this item in Q.D4A to Q.D4B.

Note:

See Q.D4A to Q.D4B for complete question text.

Variables summarize answers to Q.D4A (V1826) and Q.D4B (V1827 TO V1843), except for category '17' (DK).

v1860 - QD4AB CAP PRIORITIES: DK (QD4A ONLY)

Q.D4AB_T Priority in EU agriculture policy in total

Q.D4AB_17 DK

0 Not mentioned

1 Mentioned

9 Inap. not EU27 (not coded 1 to 30 in V6)

Derivation:

This variable summarizes responses to this item in Q.D4A to Q.D4B.

Note:

See Q.D4A to Q.D4B for complete question text.

Variable repeats answers to category '17' (DK) in Q.D4A (V1826), while all other answers to Q.D4A are summarized with Q.D4B (V1827 TO V1843) in variables V1844 to V1859.

v1886 - QD8 FARMER PAYMENT PROVISIO: ENVIRONM STANDARD

ASK Q.D AND Q.E ONLY in EU25, BG and RO

Q.D8

Following new rules introduced in 2003, farmers' payments are now linked to the requirement to comply with certain rules (Cross compliance) regarding environment, food safety and animal welfare. To what extent do you personally think that it is justified or unjustified to reduce the subsidy payments to farmers who do not respect...?

v1932 - QF3A BIO-MEDICAL EU PROJECTS - INFO WAY

The European Union gives money to groups of people from different countries who want to work together on research projects, at the European level, in the objective to combat major diseases, to design new treatments or diagnoses or to better understand how our genes and body function. In the next questions, we will refer to this large domain (to combat major diseases, to design new treatments, etc.) as biological and medical research.

ASK Q.F ONLY in HR and TR

Q.F3A

ASK Q.F3A and Q.F4A IF "AWARE OF PROJECTS FUNDED BY THE EU", CODE 1 in Q.F2B - OTHERS GO TO Q.F3B

Could you please tell me the most common way you heard about these European Union funded projects in the field of biological and medical research?

v2010 - D8 AGE EDUCATION

D.8

How old were you when you stopped full-time education?

(IF "STILL STUDYING", CODE '00')

5 5 years

71 71 years

97 No full-time education

98 Still studying

99 DK

Note:

Last trend: EB66.2, D.8

Actual number coded

Original code "00" recoded to "98"

Outlier (< 7) for SPAIN (n=5) and the NETHERLANDS (n=1). ALL cases < 15 have been recoded to "up to 14" in V2011.

v2011 - D8 AGE EDUCATION - RECODED

D.8R Age when finished full-time education - RECODED

- 1 Up to 14 years
- 2 15 years
- 3 16 years
- 4 17 years
- 5 18 years
- 6 19 years
- 7 20 years
- 8 21 years
- 9 22 years and older
- 10 Still studying
- 11 No full-time education
- 12 DK

Note:

See D.8 for complete question text.

ALL cases < 15 have been recoded to "up to 14", including outliers (< 7) for France (n=1), the Netherlands (n=2), Denmark (n=1), Spain (n=4), and Lithuania (n=1) in V2011 (=D8).

v2013 - D11 AGE EXACT

D.11

How old are you?

15 15 years

98 98 years

Note:

Last trend: EB66.2, D.11

Actual number is coded.

v2014 - D11 AGE RECODED - FOUR GROUPS

D.11R1 AGE - RECODED IN FOUR GROUPS

- 1 15 - 24 years
- 2 25 - 39 years
- 3 40 - 54 years
- 4 55 years and older

Derivation:

This variable collapses answers to D.11 into four categories.

Note:

See D.11 for complete question text

v2018 - D40A HOUSEHOLD COMPOSITION: AGED 15+ (REC)

D.40AR HOUSEHOLD COMPOSITION: AGED 15+ (RECODED)

- 1 One
- 2 Two
- 3 Three
- 4 Four or more

Derivation:

This variable collapses answers to D.40A into four categories.

Note:

See D.40A for complete question text.

v2023 - D40 HOUSEHOLD COMPOSITION: SIZE A+B+C

D.40 HOUSEHOLD COMPOSITION: SIZE (A+B+C)

- 1 One
- 2 Two
- 3 Three
- 4 Four
- 5 Five
- 6 Six
- 7 Seven
- 8 Eight
- 9 Nine
- 10 Ten
- 11 Eleven
- 12 Twelve
- 13 Thirteen
- 14 Fourteen
- 15 Fifteen
- 16 Sixteen
- 18 Eighteen
- 20 Twenty

Note:

See D.40A, D.40B and D.40C for complete question texts.

Variable is generated by the Archive in accordance with former waves.

v2024 - D40 HOUSEHOLD COMPOSITION: SIZE A+B+C (REC)

D.40R HOUSEHOLD COMPOSITION: SIZE (A+B+C) RECODED

- 1 One
- 2 Two
- 3 Three
- 4 Four
- 5 Five
- 6 Six
- 7 Seven or more

Derivation:

This variable collapses answers to D.40 into seven categories.

Note:

See D.40A, D.40B and D.40C for complete question texts.

Generated by the Archive in accordance with former surveys.

v2025 - D41 NATIONAL BACKGROUND: RESPONDENT

D.41

DO NOT ASK D.41 IN CY (TCC)

You personally, were you born...?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

- 1 In (OUR COUNTRY)
- 2 In another Member Country of the European Union
- 3 In Europe, but not in a Member Country of the European Union
- 4 In Asia, in Africa or in Latin America
- 5 In Northern America, in Japan or in Oceania
- 7 Refusal (SPONTANEOUS)
- 9 Inap. CY_TR (coded 33 in V6)

Note:

Last trend: EB66.2, D.41

Data for the Turkish Cypriot Community are recorded separately in V2026.

v2026 - D41BIS NATIONAL BACKGROUND CY_TR: RESPONDENT

D.41bis

ASK D.41bis ONLY IN CY (TCC)

You personally, were you born...?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

- 1 In Turkish Cypriot Community
- 2 In Turkey
- 3 In another EU state
- 4 Europe, but not EU
- 5 Asia, Africa, Latin America
- 6 Northern America, Japan, Oceania (not mentioned)
- 7 Refusal (SPONTANEOUS) (not mentioned)
- 9 Inap. EU29 (coded 1 to 32 in V6)

Note:

Separate variable for Cyprus TCC created by the archive because of off-design answer categories in the corresponding field questionnaire. Translation is provided by the archive.

v2026, weighted by v8

Value	Label	Missing	Count	Percent	Valid Percent
1	In Turkish Cypriot Community		394	1.3	78.8

v2054 - P6 SIZE OF COMMUNITY - UNITED KINGDOM

P.6 (Objective) Size of community

in United Kingdom (UK):

- 1 Rural
- 2 Urban
- 3 Metropolitan (GB_GBN only)
- 99 Inap. not UK (not coded 9 or 10 in V6)

Note:

Last trend: EB66.2, P.6

The original variable integrated data for Northern Ireland (codes 1-2) and Great Britain (codes 3-5). The original categories (value label) were corrected after consultation with TNS OPINION & SOCIAL. In order to facilitate the analysis for the United Kingdom as a whole, identical categories have been coded together (matched).

For meaningful results this variable needs to be weighted by W4 WEIGHT SPECIAL UNITED KINGDOM (V10) or be used for Great Britain and Northern Ireland separately (select if '9' OR '10' in V6).

v2054, weighted by v10

Value	Label	Missing	Count	Percent	Valid Percent

v2121 - P13 LANGUAGE OF INTERVIEW - BELGIUM

P.13 Language of questionnaire

in Belgium (BE):

- 1 French
- 2 Dutch
- 9 Inap. not BE (not coded 2 in V6)

Note:

Last trend: EB66.2, P.13

Compared to former surveys up to EB 61.0 categories "French" and "Luxembourgish" seem to be inversed given the average frequency distributions before and after this date.

Category "German" not used.

v2121

Value	Label	Missing	Count	Percent	Valid Percent
1	French		400	1.4	39.6
2	Dutch		609	2.1	60.4
9	Inap. (not 2 in V6)	M	28251	96.6	
	Sum		29260	100.0	100.0
	Valid Cases		1009		

v2122 - P13 LANGUAGE OF INTERVIEW - LUXEMBOURG

P.13 Language of questionnaire

in Luxembourg (LU):

- 1 Luxembourgish
- 2 French
- 3 German (not mentioned)
- 9 Inap. not LU (not coded 6 in V6)

Note:

Last trend: EB66.2, P.13

Starting with Eurobarometer 62 and with the change of fieldwork responsibility to TNS, the relation between average frequencies for language categories "French" and "Luxembourgish" appears to be inversed. The majority of respondents in Luxembourg are now coded as being interviewed in French and not in Luxembourgish as former Eurobarometer surveys indicate. It could not be ascertained if TNS (intermittently) changed the fieldwork strategy regarding languages. Starting with Eurobarometer 69 the former proportion is recovered, again representing the actual proportion between Luxembourgish and French as mother languages in Luxembourg. This is probably also true for Eurobarometer 68.1 and 68.2 where the labelling in the data set (value label) is shifted compared to the field questionnaire.

Category '3' ("German") was not mentioned by any respondent.

v2122

Value	Label	Missing	Count	Percent	Valid Percent
1	Luxembourgish		88	0.3	17.5
2	French		414	1.4	82.5
