Acknowledgements

Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences.

Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (<http://zacat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

1.2 Content

1.2.1 Abstract

This round of Eurobarometer surveys diverged from the Standard Eurobarometer measures and queried respondents on the following major areas of focus: (1) European Union policy and decision-making, (2) corruption, (3) civil justice, (4) e-communications, (5) agriculture, and (6) environmental protection. For the first major focus, European Union (EU) policy and decision-making, respondents were queried about whether more or less decision-making should take place at the EU level in regards to the following topics: asylum and migration policy, exchange of police and judicial information between member states, the fight against drug abuse, the control of external borders of the EU, the fight against terrorism, and the promotion and protection of fundamental rights, including children's rights. Of these, respondents were asked which topics they thought should be the three priorities of the EU, which topics they felt well informed on, and which topics they would like to be better informed. For the second major focus, corruption, respondents were asked whether they agreed that corruption is a major problem in their country and a major problem in local, regional, national, and EU institutions. They also answered questions regarding how widespread they thought bribery and abuse of power were, if in the last 12 months they had been asked or expected to pay a bribe for services, whether they agreed that most corruption is caused by organized crime, and whose responsibility it is to prevent and fight corruption. For the third major focus, civil justice, respondents were asked if they had ever been involved in civil justice procedures in another EU member state, and what their opinion was about the ease of accessing civil justice outside of their own country. Respondents were also asked if additional measures should be taken to assist in access to civil justice in another EU member state, what their main concerns were about the procedures, and their preference for contract terms in purchasing products in other EU member states. In addition, respondents were queried about whether there should be uniform procedures in the EU for civil and commercial claims, if rulings made in one member state should freely apply in another member state, the main difficulties in enforcing rulings in another member state, if the EU should intervene in the enforcement of civil court rulings between member states, and the usefulness of having access to civil justice in another member state via the Internet. For the fourth major focus, e-communications, respondents provided information on the availability within their own households of each of the following communication systems: television, fixed telephone, mobile phones, and the Internet. Respondents were asked to identify reasons why they owned or did not own certain systems, including television, fixed/mobile phones, and telecommunication bundles, the accessibility of these systems in their household, their use of public payphones and telephone directories, and their knowledge of emergency service numbers. In addition, respondents assessed the performance of each system, shared their expectations as consumers, and rated the effectiveness of their service providers and available features of the systems (e.g., costs, tariffs, and flexibility with account changes). For the fifth major focus, agriculture, respondents shared their opinions about the importance of agriculture in the EU, their knowledge of the Common Agricultural Policy (CAP), whether they wanted more information about CAP, and from what sources they would gather that information. The survey also asked what should be the main priorities of the EU in terms of CAP, how well CAP fulfills its role, and what the main responsibilities of farmers should be. Respondents were further questioned in regard to the EU's reduction of the subsidy for farmers, what their opinions were about trade barriers, and whether the current amount of budgeting for agriculture was adequate. For the sixth major focus, environmental protection, queries included how important environmental protection was, what was meant by "the environment," what were the main environmental issues that worried them, how informed they felt about the environment, what issues they would like more information on, their main sources of environmental information, and who they trusted the most for information on environmental issues. In addition, respondents were queried about the best way to evaluate progress in environmental protection, the comparison of environmental protection versus economic competitiveness, personal efforts to protect the environment, what should be the

priorities of citizens in daily life, and how environmental decisions should be made by government and by public authorities. Further questions included what the most effective way to tackle environmental problems should be, whether an EU civil protection force should be set up, and their opinions about the labeling of environmentally friendly products and the use of genetically modified organisms (GMOs). Demographic and other background information includes age, gender, nationality, origin of birth (personal and parental), marital status, left-right political self-placement, occupation, age when stopped full-time education, household composition, ownership of other durable goods, Internet use, type and size of locality, region of residence, and language of interview (in select countries).

1.3 Universe

In all, Eurobarometer 68.2 interviewed 26.730 citizens of the 25 countries in the European Union after the 2004 enlargement and in the remaining Accession Countries (AC) Bulgaria and Romania. All respondents were residents in the respective country, nationals and non-nationals but EU-citizens, and aged 15 and over. They were supposed to have sufficient command of one of the respective national language(s) to answer the questionnaire. Separate samples were drawn for Northern Ireland and East Germany.

1.4 Sampling procedure

A multi-stage, random (probability) sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regional units in every country (Statistical Office of the European Community, EUROSTAT NUTS 2 or equivalent). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of starting addresses was selected from each sampled PSU, at random. Further addresses were chosen systematically using standard random route procedures as every Nth address from the initial address. In each household, a respondent was drawn, at random, following the closest birthday rule. No more than one interview was conducted in each household.

The regular sample size (in the sense of completed interviews) is 1000 respondents per country, except the United Kingdom with separate samples for Great Britain (1000) and Northern Ireland (300), Germany with separate samples for the Eastern (500) and the Western part (1000), and Luxembourg, Cyprus (Republic) and Malta with 500 interviews each. The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

From November 09 (2007) to January 16, 2008, the TNS Opinion & Social, a consortium created between Taylor Nelson Sofres and EOS Gallup Europe, carried out the fieldwork for this Eurobarometer, at the request of the European Commission, Directorate General Press and Communication, Opinion Polls. TNS Opinion & Social is based at Avenue Herrmann Debroux, 40, 1160 Brussels, Belgium. TNS Opinion & Social coordinates the fieldwork carried out through its network of national institutes.

1.6 Mode of data collection

In all countries, fieldwork was conducted on the basis of detailed and uniform instructions prepared by TNS Opinion Social. Interviews were conducted face-to-face in people's home in the appropriate national language. As far as the data capture is concerned, CAPI (Computer Assisted Personal Interview) was used in those countries where this technique was available.

Equivalent French and English basic questionnaires were developed for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country. Backtranslation procedures were applied for controlling semantic equivalence.

1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factor corrects for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country as well as each lower level sample (Great Britain and Northern Ireland, East and West Germany) are represented in proportion to its population size within different groupings, or according to the historical states of European unification (e.g. founder members, new members, Euro zone) in the case of the EUROPEAN WEIGHTS, or for the United Kingdom (WEIGHT SPECIAL UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31) and for Germany as a whole (WEIGHT SPECIAL GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTs adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general all samples which do not belong to the respective group of samples under consideration are excluded from calculation.

The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 4) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

Eurobarometer 68.2 provides three (post-stratification) NATION WEIGHTS: W1 (WEIGHT RESULT FROM TARGET) for separate analysis or comparison of individual samples (countries or regions on sub-national level), W4 (WEIGHT SPECIAL UNITED KINGDOM) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole, and W3 (WEIGHT SPECIAL GERMANY), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole.

The EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries, of accession or candidate countries, and of Euro zone countries, representing different historical states of European integration (e.g. EU6 = six founder members) . All post-stratification factors are included.

For the parts of the questionnaire for which respondents were asked to answer for their household (QD), an additional national weighting criteria was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices. The total household figures for input in this post-weighting procedure are listed in the technical description annexed to the basic bilingual questionnaire. All weights described in the following are available in the STANDARD and in the HOUSEHOLD version (W31 to W58, WEX_HH).

Table 2: Overview of population size weights

European Weights in Eurobarometer 68.2	Function
W5 to W9, W11, W14, W22; HH: W35 to W39, W41, W44, W52	grouping EU member countries
W10, W13, W24; HH: W40, W43, W54	grouping new member countries
W15; HH: W45	grouping candidate/accession countries
W12, W28; HH: W42, W58	grouping (non-)Eurozone countries

For more detailed information on the individual weights please see the corresponding variable description.

1.8 Data preparation

The data received by GESIS from TNS Opinion & Social were checked for completeness, missing and duplicate records, for illegal (wild) codes and for (formal) consistency of response patterns and question routing. Errors discovered by these procedures are documented or corrected, as a general rule after consulting related additional documentation (e.g. tabular reports) or the data provider. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable DDI-XML compliant documentation was created for this dataset by GESIS.

GESIS added 'Inappropriate' (INAP) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the original questionnaire was adhered to for (almost) every respondent. An additional INAP category was defined whenever a question or group of questions were not surveyed in one or more countries, or if variables refer to country specific items (e.g. regions).

Users should note that answers to multiple-response questions are (originally) represented by a series of binary 'dummy' variables (i.e. variables which take on values of one and zero only), creating separate 'dummy' variables also to explicitly represent 'Don't know', 'No answer/refusal' or other residual responses, such as 'None of the above'. The archive has recoded these residual responses in the case of uncommon minor inconsistencies with respect to and in favour of the series of substantial answers.

GESIS has recoded the missing answers (NA) represented in the original data set by blanks (system missing) to standard values. Their practically complete absence suggests that eventual cases of any not explicitly coded item non-response, might be collapsed with the DK (don't know) category.

Question text and contingency text appearing in the variable description is taken from English language version of the basic (bilingual) questionnaire (master questionnaire). Coding schemes and other documentation are based on the English language version of the basic questionnaire or on the respective SPSS data definition statements as provided by TNS Opinion & Social. In case of any discrepancy between questionnaires, SPSS definitions and data regarding the coding scheme of a variable, the archive, as a general rule, carried out any correction in agreement with the data provider.

If the documentation for country-specific questions or answer categories is provided in another languages than English, the archive documents the original language wording and supplies the English translation in brackets.

Please see the respective variable documentation (variable notes) for specific remarks on data inconsistencies or processing.

1.9 Further remarks

This wave does not include the standard Eurobarometer and trend questions.

The module on E-COMMUNICATIONS (QD) replicates questions asked in the framework of Eurobarometer 64.4 (ZA4416) and 66.3 (ZA4528). For this part of the questionnaire where respondents are asked to answer for their household, the 'number of individuals in each household' was introduced as additional weighting criterion (W31 to W58), and the representative samples of individuals aged 15 and more converted into household samples. For more details, see the technical specifications annexed to the basic bilingual questionnaire.

2 Eurobarometer Series Description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brêthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

Table 3: EU enlargement and countries covered by Standard and Special Eurobarometer

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 4: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.2OVR, 55.1OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.2OVR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 5) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 5: Overview of Eurobarometer surveys with standard EU and trend question modules

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

3 Dataset structure and standards

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 6: ZEUS Party Family Code (slightly modified)

Category		Party Family
0	(001-099)	not affiliated / electoral alliances across "families"
1	(100-199)	Communists
2	(200-299)	Socialists
3	(300-399)	Liberals
4	(400-499)	Christian Democrats
5	(500-599)	Conservatives
6	(600-699)	Extreme Rights / Nationalists
7	(700-799)	Regionalists / Ethnic
8	(800-899)	Environmental parties
9	(900-949)	Agricultural parties
9	(950-989)	other special issue parties (e.g. Eurosceptics) and independents
	990	other (spontaneous)
	994	not voting age
	995	empty ballot (blank) or invalid vote
	996	not voted / would not vote
	997	Refused
	998	DK / DK+NA if NA not coded separately
	999	INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION – ALL SAMPLES ISO 3166).

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (–1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded “real” values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission’s official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

CROSS-TABULATION: The absolute frequencies of the occurrence of values (<i>absolute values</i>) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies (<i>row percent</i>) refer to the valid cases (<i>n valid sum</i>), i.e. the total number of cases (<i>n sum</i>) reduced by the number of cases defined as missing data (<i>M</i>). For display and place saving reasons excluded countries or areas may be completely dropped from the table.																																																																																																																																																																																																																																																																																																																						
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (<i>M</i>), i.e. <i>percent</i> on the basis of all cases (<i>sum</i>) and <i>valid percent</i> on the basis of the <i>valid cases</i> .																																																																																																																																																																																																																																																																																																																						

5 Variable Documentation

Variable, Label
Question Text (English Language)

v1 - ARCHIVE STUDY NUMBER - DISTRIBUTOR
ARCHIVE STUDY NUMBER - DISTRIBUTOR

Study number of the distributing data archive.

v1

Value	Label	Missing	Count	Percent	Valid Percent
4742			26730	100.0	100.0
	Sum		26730	100.0	100.0
	Valid Cases		26730		

v2 - ARCHIVE STUDY NUMBER - PUBLISHER

ARCHIVE STUDY NUMBER - PUBLISHER

Study number of the data archive which is publishing this data set version.

v2

Value	Label	Missing	Count	Percent	Valid Percent
4742			26730	100.0	100.0
	Sum		26730	100.0	100.0
	Valid Cases		26730		

v3 - GESIS ARCHIVE VERSION**VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET**

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

v3

Value	Label	Missing	Count	Percent	Valid Percent
4.0.1 (2012-07-02)			26730	100.0	100.0
	Sum		26730	100.0	100.0
	Valid Cases		26730		

v4 - EUROBAROMETER NUMBER

EUROBAROMETER SURVEY NUMBER

The number identifying the Eurobarometer survey.

682 Eurobarometer 68.2

v4

Value	Label	Missing	Count	Percent	Valid Percent
682	Eurobarometer 68.2		26730	100.0	100.0
	Sum		26730	100.0	100.0
	Valid Cases		26730		

v5 - UNIQUE CASE ID (TNS COUNTRY ID + INTERVIEW ID)

UNIQUE CASE ID (TNS COUNTRY ID + TNS INTERVIEW ID)

This unique respondent identification is composed of the original TNS country code and the original TNS interview number. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 04: Greece; 05: Spain; 06: Finland; 07: France; 08: Ireland; 09: Italy; 10: Luxembourg; 11: Netherlands; 12: Austria; 13: Portugal; 14: Sweden; 20: Germany West; 21: Germany East; 22: Great Britain; 23: Northern Ireland; 31: Bulgaria; 32: Cyprus (Republic); 33: Czech Republic; 34: Estonia; 35: Hungary; 36: Latvia; 37: Lithuania; 38: Malta; 39: Poland; 40: Romania; 41: Slovakia; 42: Slovenia). The remaining digits contain the country-specific questionnaire numbers.

Note:

Actual number is coded.

v6 - NATION - ALL SAMPLES

NATION - ALL SAMPLES

All samples including separate samples for East and West Germany and for Great Britain and Northern Ireland.

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany West
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 Germany East
- 15 Norway (not included)
- 16 Finland
- 17 Sweden
- 18 Austria
- 19 Cyprus (Republic)
- 20 Czech Republic
- 21 Estonia
- 22 Hungary
- 23 Latvia
- 24 Lithuania
- 25 Malta
- 26 Poland
- 27 Slovakia
- 28 Slovenia
- 29 Bulgaria
- 30 Romania

Note:

Use of weighting factor W1 (V8) is optional.

v6

	Sum		26730	100.0	100.0
	Valid Cases		26730		

v7 - NATION - ALL SAMPLES ISO 3166

NATION - ALL SAMPLES ISO 3166

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

Note:

Use of weighting factor W1 (V8) is optional.

v8 - W1 WEIGHT RESULT FROM TARGET

W1 WEIGHT RESULT FROM TARGET

This POST-STRATIFICATION WEIGHT is based on a comparison for each sample with the respective universe description. As such in all countries, gender, age, region and size of locality are introduced in the iteration procedure carried out by the fieldwork institutes.

British and Northern Irish as well as East and West German samples are weighted separately. The weight reproduces the real number of cases for each country. In terms of its general function it corresponds to former NATION WEIGHT II (until EUROBAROMETER 31).

v9 - NATION - UNITED KINGDOM

NATION - UNITED KINGDOM

Great Britain and Northern Ireland are coded together.

0 Other

1 United Kingdom

Note:

Use of weighting factor W4 (V10) is mandatory.

v10 - W4 WEIGHT UNITED KINGDOM

W4 WEIGHT UNITED KINGDOM

This POPULATION SIZE WEIGHT adjusts the British and the Northern Irish (sub-national) samples to their share in the total population aged 15 and over in the United Kingdom. It must be applied whenever the United Kingdom is to be analyzed as a whole. The post-stratification weighting factors are included for both samples. All other samples are excluded from analysis. In terms of its general function the weight corresponds to former NATION WEIGHT I (until EUROBAROMETER 31).

v11 - NATION - UNITED GERMANY

NATION - UNITED GERMANY

East and West Germany are coded together.

0 Other

1 Germany

Note:

Use of weighting factor W3 (V12) is mandatory.

v24 - W10 WEIGHT EU NMS 3

W10 WEIGHT EU NMS 3

This POPULATION SIZE WEIGHT only refers to the three new members as of January 1995: Finland, Sweden and Austria. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EU NMS 3 must be applied whenever these three countries are to be analyzed altogether as a group.

v25 - NATION GROUP EU15

NATION GROUP EU15

NATION GROUP EU15 adds Austria, Finland and Sweden to the EURO 12+ countries, new members as of January 1995.

0 Other

1 EU15

Note:

Use of weighting factor W11 (V26) is mandatory.

v26 - W11 WEIGHT EU15

W11 WEIGHT EU15

This POPULATION SIZE WEIGHT adds Austria, Finland and Sweden to the EU12+ countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EU15 must be applied whenever these 15 countries as of the 1995 enlargement are to be analyzed altogether as a group.

v27 - NATION GROUP EURO ZONE 2007

NATION GROUP EURO ZONE 2007

NATION GROUP EURO ZONE 2007 separates the group of 12 countries which introduced the EURO as of January 1, 2002 (Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland) plus Slovenia which introduced the EURO as of January 1, 2007.

0 Other

v40 - W28 WEIGHT NON EURO ZONE 2007

W28 WEIGHT NON EURO ZONE 2007

This POPULATION SIZE WEIGHT separates the group of countries (Denmark, United Kingdom, Sweden, Cyprus (Republic), Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Bulgaria, Romania) which did not introduce the EURO up to January 1, 2007 . It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT NON EURO ZONE 2007 must be applied whenever these countries are to be analyzed altogether as a group.

v41 - WEX WEIGHT EXTRA POPULATION 15+

WEX WEIGHT EXTRA POPULATION 15+

WEIGHT EXTRA extrapolates the actual universe (population aged 15 or more) for each country (sample), i.e. this weight variable integrates all other available weights, but does not reproduce the number of cases in the data set.

v42 - W31 HH WEIGHT RESULT FROM TARGET

W31 HH WEIGHT RESULT FROM TARGET - HOUSEHOLD WEIGHT

This POST-STRATIFICATION WEIGHT is based on a comparison for each sample with the respective universe description. British and Northern Irish as well as East and West German samples are weighted separately.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.D), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v43 - W34 HH WEIGHT UNITED KINGDOM

W34 HH WEIGHT UNITED KINGDOM - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT adjusts the British and the Northern Irish (sub-national) samples to their share in the total population aged 15 and over in the United Kingdom. It must be applied whenever the United Kingdom is to be analyzed as a whole. All other samples are excluded from analysis.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.D), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v44 - W33 HH WEIGHT GERMANY

W33 HH WEIGHT GERMANY - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT adjusts the East and the West German (sub-national) samples to their share in the total population aged 15 and over, of the united Germany. It must be applied whenever Germany is to be analyzed as a whole. All other samples are excluded from analysis.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.D), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v45 - W35 HH WEIGHT EU6

W35 HH WEIGHT EU6 - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT refers to the six EC founder members: France, Belgium, Netherlands, West Germany, Italy, and Luxembourg. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. WEIGHT EU6 must be applied whenever these six EC founder countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.D), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v46 - W36 HH WEIGHT EU9

W36 HH WEIGHT EU9 - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT adds Denmark, Ireland, Great Britain and Northern Ireland to the EU6 countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. WEIGHT EU9 must be applied whenever these nine countries as of the 1973 enlargement are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.D), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v47 - W37 HH WEIGHT EU10

W37 HH WEIGHT EU10 - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT adds Greece to the EU9 countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. WEIGHT EU10 must be applied whenever these ten countries as of the 1981 enlargement are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.D), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v48 - W38 HH WEIGHT EU12

W38 HH WEIGHT EU12 - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT adds Spain and Portugal to the EU10 countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. WEIGHT EU12 must be applied whenever these twelve countries as of the 1986 enlargement are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.D), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v49 - W39 HH WEIGHT EURO12+

W39 HH WEIGHT EU12+ - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT equals WEIGHT EU12 but in addition including East Germany (former German Democratic Republic) after the unification of Germany on October 3, 1990 (Eurobarometer 34). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. WEIGHT EU12+ must be applied whenever these twelve member countries are to be analyzed altogether as a group including the Eastern part of Germany (new German federal states).

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.D), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v50 - W40 HH WEIGHT EU NMS 3

W40 HH WEIGHT EU NMS 3 - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT only refers to the three new members as of January 1995: Finland, Sweden and Austria. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. All other samples are excluded from calculation. WEIGHT EU NMS 3 must be applied whenever these three countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.D), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v51 - W41 HH WEIGHT EU15

W41 HH WEIGHT EU15 - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT adds Austria, Finland and Sweden to the EU12+ countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. WEIGHT EU15 must be applied whenever these 15 countries as of the 1995 enlargement are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.D), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v52 - W42 HH WEIGHT EURO ZONE 2007

W42 HH WEIGHT EURO ZONE 2007 - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT separates the group of 12 countries which introduced the EURO as of January 1, 2002 (Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland) plus Slovenia which introduced the EURO as of January 1, 2007. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. WEIGHT EURO ZONE 2007 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.D), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v53 - W43 HH WEIGHT EU NMS 10

W43 HH WEIGHT EU NMS 10 - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT only refers to the group of the ten new members as of the enlargement in 2004: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia and Slovenia. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. All other samples are excluded from calculation. WEIGHT EU NMS 10 must be applied whenever these ten countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.D), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v54 - W44 HH WEIGHT EU25

W44 HH WEIGHT EU25 - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT adds Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia and Slovenia to the EU15 countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) group of countries. All other samples are excluded from calculation. WEIGHT EU25 must be applied whenever these 25 countries as of the 2004 enlargement are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.D), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v55 - W45 HH WEIGHT AC (BG RO)

W45 WEIGHT AC (BG RO) - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT refers to Bulgaria and Romania. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of future EU accession countries. All other countries are excluded from calculation. WEIGHT AC must be applied whenever these two countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.D), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v56 - W52 HH WEIGHT EU27

W52 HH WEIGHT EU27 - HOUSEHOLD WEIGHT

WEIGHT EU27 includes all 25 member countries after the 2004 enlargement, plus the remaining Accession Countries Bulgaria and Romania. This POPULATION SIZE WEIGHT adjusts each national sample in proportion to its share in the total population aged 15 and over, of the European Union plus Bulgaria and Romania. It should be used whenever all 27 countries participating in this wave are to be analysed as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.D), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v57 - W54 HH WEIGHT EU NMS 12

W54 HH WEIGHT EU NMS 12 - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT refers to the group of the 12 new member countries as of the enlargement in January 2007: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia, Bulgaria and Romania. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. All other samples are excluded from calculation. WEIGHT EU NMS 12 must be applied whenever these 12 countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.D), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v58 - W58 HH WEIGHT NON EURO ZONE 2007

W58 HH WEIGHT NON EURO ZONE 2007 - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT separates the group of countries (Denmark, United Kingdom, Sweden, Cyprus (Republic), Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Bulgaria, Romania) which did not introduce the EURO up to January 1, 2007 . It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. All other samples are excluded from calculation. WEIGHT NON EURO ZONE 2007 must be applied whenever these countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.D), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v59 - WEX HH WEIGHT EXTRA POPULATION 15+

WEX HH WEIGHT EXTRA POPULATION 15+ - HOUSEHOLD WEIGHT

WEIGHT EXTRA extrapolates the actual universe (population aged 15 or more) for each country (sample), i.e. this weight variable integrates all other available weights, but does not reproduce the number of cases in the data set.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.D), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v183 - QC1 CIV JUSTICE - EVER BEEN INVOLVED

Let's now talk about civil justice that refers to issues such as family law and contract law. The objective of the European area of civil justice is to ensure that citizens and companies in one

Member State can exercise their rights in another Member State, if there is a dispute that crosses national borders. We are not talking here about criminal justice.

Q.C1

ASK ALL

Have you ever been involved in civil justice procedures in a European Union Member State other than (OUR COUNTRY)?

(READ OUT)

- 1 Yes, you have been personally involved
- 2 No, you have not been personally involved but it is possible that this could happen in the future
- 3 No, you have not been personally involved and it is unlikely that this could happen in the future
- 4 DK

v185 - QC3 CIV JUSTICE - ACCESS HELP MEASURES

Q.C3

In your opinion, should additional measures be taken to help citizens' access to civil justice in a European Union Member State other than their country of residence?

(SHOW CARD – READ OUT – ONE ANSWER ONLY)

- 1 Yes, preferably at an EU level through common rules
- 2 Yes, preferably at a national level through bilateral agreements between the Member States
- 3 No, there is no need for additional measures
- 4 DK

v195 - QC4 CIV JUSTICE ACCESS CONCERN: WHICH OTHERS

[Q.C4

If you needed to have access to civil justice in a country other than (OUR COUNTRY), which of the following, if any, would be your main concerns about the procedures?]

Q.C4O

ASK Q.C4O ONLY IF "OTHER" IN Q.C4 - OTHERS GO TO Q.C5

Which other(s)?

(WRITE DOWN - CODE AT THE OFFICE - MULTIPLE ANSWERS POSSIBLE)

999 Inap. not any others in Q.C4 (not coded 1 in V193)

in France (FR):

- 1 Item not specified
- 2 Item not specified
- 3 Item not specified
- 6 Item not specified

in Netherlands (NL):

- 1 Depends on the country you live in
- 2 Lack of knowledge in general
- 3 Difficulty with the Dutch embassy

in Germany (DE):

- 1 To consult a lawyer

in Italy (IT):

99 That rules which are valid in one country are not considered valid in another country

in Luxembourg (LU):

- 1 To found a competent lawyer
- 2 Worries about the health
- 3 None, because my lawyer is carrying everything
- 4 Mentality differences

in Spain (ES):

- 3 Lack of trust in the procedures
- 10 Discrimination
- 11 Everything

in Austria (AT):

- 1 High costs - high risk

in Estonia (EE):

- 1 All things mentioned above

in Hungary (HU):

- 1 Lawyer who is competent in this

in Latvia (LV):

- 1 Age
- 2 The fact that this kind of case even exists

in Malta (MT):

- 1 How to find a lawyer

in Poland (PL):

- 10 Health

in Slovakia (SK):

- 1 Difference in approach to foreign citizens (not stated)
- 2 Incompetent advocate
- 3 Distance of the consulate
- 4 Corruption
- 5 Finding the right advocate

in Slovenia (SI):

- 1 Our jurisdiction / do not want to go elsewhere
- 2 Everything a little
- 3 I hope we will never need it
- 4 We are too old to prosecute
- 5 Fair judging according to the rules
- 6 Relation between this two countries
- 7 Good lawyer

Note:

France: Specified responses for OTHERS are coded in the data set, but no corresponding documentation has been made available by the data producer.

v233 - QD1 TELECOM DEV IN HH: MOBILE DATA COM

Q.D1

ONLY IF MOBILE PHONE IN ITEM 2 OR 3

For each of the following, please tell me how many of them are available in your household.

(SHOW CARD - ONE ANSWER PER LINE - READ OUT)

Q.D1_4 Mobile phone giving access to advanced mobile data communications services. By this we mean those allowing you to access websites for downloading audio/video content, sending and receiving e-mails

- 0 None
- 1 Box 1
- 2 Box 2
- 3 Box 3
- 4 4 and more
- 5 DK
- 9 Inap. no mobile phone (not coded 1 to 4 in V231 and V232)

Note:

Categories '4' to '9' were summarized in category 4 by the original data producer. Questionnaire category 11 (DK) is coded 5.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V42 to V59.

[Q.D8

How does your household access the Internet from home?]

Q.D8O

ASK Q.D8O IF "OTHER" IN Q.D8 - OTHERS GO TO Q.D9

Which other(s)?

(WRITE DOWN - CODE AT THE OFFICE - MULTIPLE ANSWERS POSSIBLE)

999 Inap. not any others in Q.D8 (not coded 1 in V279)

in France (FR):

- 3 Item not specified
- 5 Item not specified
- 8 No internet

in Netherlands (NL):

- 1 Glas fibre
- 2 Wireless
- 3 Internet/telephony through KPN
- 4 Internet/telephony through UPC
- 5 Through telephonenumber
- 6 Wifi

in Germany (DE):

- 1 Wireless LAN

in Italy (IT):

- 99 Optic fiber

in Denmark (DK):

- 8 Others

in Ireland (IE):

- 1 Broadband
- 2 Wireless Connection
- 3 Fibre optic cable
- 4 Not specified

in United Kingdom (GB):

- 1 Wireless

in Spain (ES):

10 Wifi

in Finland (FI):

- 1 Wireless broad band

in Sweden (SE):

- 1 Fibre optic
- 2 Wireless via Nossebro Energi
- 3 Fixed broadband with own socket

in Austria (AT):

- 1 Wireless connection
- 2 Silver server

in Czech Republic (CZ):

- 1 Wi-fi
- 2 Microwave
- 3 Optical net

in Estonia (EE):

- 1 Wireless internet
- 2 Wireless internet (CDMA connection, radio frequency)

in Hungary (HU):

- 1 LAN system
- 2 Ultra-high

in Latvia (LV):

- 1 Knows just the name of the internet provider, not the way of access
- 2 LAN (local area network)

in Lithuania (LT):

- 1 Meganet
- 2 Lanas
- 3 TEO optical
- 4 Erdvės
- 5 Viasat
- 6 Omni Connect
- 7 Optical connection
- 8 Skynet
- 9 Skype
- 10 B4net

in Poland (PL):

- 10 Via a radio connection
- 11 Via housing estate network
- 12 Not relevant answer

in Slovakia (SK):

- 1 Microwave
- 2 Optical net
- 3 Wifi
- 4 Wi-max
- 5 LAN

in Slovenia (SI):

- 1 T2 (the name of provider)
- 2 Wireless internet
- 3 Optical cable
- 4 AMIS (the name of the provider)
- 5 Vdsl
- 6 Cable internet
- 7 Has access over modem

in Romania (RO):

- 1 FTTP
- 2 Neighborhood network
- 3 Wireless
- 4 BroadBand Lan

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V42 to V59.

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

France, Ireland: Specified responses for OTHERS are coded in the data set, but no corresponding documentation has been made available by the data producer.

v283 - QD10 INTERNET: SATISFIED W PERFORMANCE

ASK Q.D9 TO Q.D11 IF "INTERNET ACCESS AT HOME", CODES 1-4 IN Q.D1 ITEM 7 OR ITEM 8

Q.D10

For each of the following, please tell me whether you totally agree, tend to agree, tend to disagree or totally disagree.

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE - READ OUT)

Q.D10_1 You are satisfied with the performance of your Internet connection

- 1 Totally agree
- 2 Tend to agree
- 3 Tend to disagree
- 4 Totally disagree
- 5 Not applicable (SPONTANEOUS)
- 6 DK
- 9 Inap. no internet access at home or DK (not coded 1 to 4 in V236 and V237)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V42 to V59.

v287 - QD10 INTERNET: EASILY COMPARE TARIFFS

ASK Q.D9 TO Q.D11 IF "INTERNET ACCESS AT HOME", CODES 1-4 IN Q.D1 ITEM 7 OR ITEM 8

Q.D10

For each of the following, please tell me whether you totally agree, tend to agree, tend to disagree or totally disagree.

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE - READ OUT)

Q.D10_5 You can easily compare your current Internet tariff scheme with other offers

- 1 Totally agree
- 2 Tend to agree
- 3 Tend to disagree
- 4 Totally disagree
- 5 Not applicable (SPONTANEOUS)
- 6 DK
- 9 Inap. no internet access at home or DK (not coded 1 to 4 in V236 and V237)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V42 to V59.

v292 - QD11 INTERNET BROADBAND: INSTALLATION COSTS

ASK Q.D9 TO Q.D11 IF "INTERNET ACCESS AT HOME", CODES 1-4 IN Q.D1 ITEM 7 OR ITEM 8

Q.D11

ASK Q.D11 IF "NARROWBAND INTERNET ACCESS", CODE 1 OR 2 IN Q.D8 - OTHERS GO TO Q.D12

Why does your household not have broadband Internet access?

(SHOW CARD – READ OUT – MULTIPLE ANSWERS POSSIBLE)

Q.D11_4 The initial installation cost for the broadband connection is too high

0 Not mentioned

1 Mentioned

9 Inap. no dial-up connection (not coded 1 in V272 and V273)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V42 to V59.

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

Last trend: EB66.3, Q.B25

9 Inap. not any others in Q.D12 (not coded 1 in V306)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V42 to V59.

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

France, Cyprus Republic: Specified responses for OTHERS are coded in the data set, but no corresponding documentation has been

made available by the data producer.

v328 - QD12 INTERNET NO ACCESS: OTHER REASONS 21

ASK Q.D12 IF "NO INTERNET ACCESS AT HOME", CODE 0 IN Q.D1 ITEM 7

[Q.D12

You said you do not have Internet access at home. Among the following list, which ones best explain why your household does not have access to the Internet?]

Q.D12O

ASK Q.D12O IF "OTHER" IN Q.D12

Which other(s)?

(WRITE DOWN - CODE AT THE OFFICE - MULTIPLE ANSWERS POSSIBLE)

in France (FR):

Q.D12O_21 Under-equipped server

0 Not mentioned

1 Mentioned

9 Inap. not any others in Q.D12 (not coded 1 in V306)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V42 to V59.

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

v338 - QD14 COMMUNICTN PACKAGE HH: DK

Q.D14

By bundle, we mean a combined package offering more than one communication service from the same provider at a single price.

Does your household buy two or more of the following services as part of a bundle?

(READ OUT – MIN. 2 ANSWERS)

Q.D14_6 DK

0 Not mentioned

1 Mentioned

Note:

22 cases underrun the minimum number of answers required (all cases from Ireland).

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V42 to V59.

v346 - QE1 EUROP AGRICULT/RURAL AREAS - IMPORTANCE

Let's talk about another topic.

Q.E1

Not everybody shares the same point of view concerning the importance of European agriculture and the rural areas for our future.

Personally, do you think that subject is ... for our
future?

(READ OUT)

- 1 Very important
- 2 Important
- 3 Not very important
- 4 Of very little importance

v351 - QE4A CAP PRIORITIES - FIRST

Q.E4A

In your opinion, which of the following should be the main priorities of the European Union in terms of agriculture and rural development policy? First priority?

(SHOW CARD – READ OUT – ONE ANSWER ONLY)

- 1 Ensuring a fair standard of living for farmers
- 2 Improving the competitiveness of European agriculture
- 3 Helping farmers to adapt their production to consumer's expectations
- 4 Enhancing rural areas by stimulating their economic growth and creating new jobs
- 5 Ensuring reasonable food prices for consumers
- 6 Ensuring availability of supplies of agricultural products
- 7 Stabilising the markets of agricultural products
- 8 Promoting sustainable agricultural practices
- 9 Favouring methods of organic production
- 10 Protecting family type farms
- 11 Promoting respect for the environment
- 12 Ensuring that agricultural products are healthy and safe
- 13 Ensuring that farm animals are well treated
- 14 Ensuring that you have enough information about where the food comes from and how the food was produced and processed
- 15 Encouraging quality production
- 16 Others (SPONTANEOUS - SPECIFY)
- 17 DK

v352 - QE4A CAP PRIORITIES - WHICH OTHER

[Q.E4A

In your opinion, which of the following should be the main priorities of the European Union in terms of agriculture and rural development policy? First priority?]

Q.E4AO

ASK Q.E4AO IF "OTHER" IN Q.E4A - OTHERS GO TO Q.E4B

Which other?

(WRITE DOWN - CODE AT THE OFFICE - ONE ANSWER ONLY)

99 DK

999 Inap. not any others in Q.E4A (not coded 16 in V351)

in France (FR):

- 1 Item not specified
- 3 Item not specified
- 16 To remove intermediates
- 17 To develop bio fuels
- 18 No advice

in Belgium (BE):

- 18 Stop subsidising third world countries
- 19 Guarantee farming grounds
- 20 Lift import barriers

in Netherlands (NL):

- 1 Guarantee viability of farms
- 2 Provide in own needs, before exporting
- 3 An independent EU
- 4 Agriculture is being oversubsidized by the EU
- 5 Equally important
- 6 Global care for farms
- 7 Moving the expensive Dutch agriculture to cheaper European countries
- 8 Prevent overproduction
- 9 Aim for a limitation of costs
- 10 Cultivation of corn

in Germany (DE):

- 1 All points are important
- 2 No more subsidies for agriculture
- 3 To keep farmers from destroying their land in order to produce organic fuel

in Luxembourg (LU):

- 1 To detach from the USA/came back to european ideal
- 2 Not distribute subsidies, better prices for wheat

- 3 To limit negative suites for developopment countries and envrionnement
- 4 To assure autonomous EU products
- 5 To forbid the practice and promotion of techniques which are bad for the environment and the health

in Denmark (DK):

- 16 Others

in United Kingdom (GB):

- 1 Nothing
- 2 Fair trade

in Spain (ES):

- 4 Enhacing rural areas by stimulating their economic growth and creating new jobs
- 18 Eliminate or reduce the intermediaries
- 19 It isn't efficient

in Finland (FI):

- 1 Everthing is equally important
- 2 Sufficiency of food
- 3 Self-sufficiency

in Sweden (SE):

- 1 Prioritize in equal conditions/same terms for all farmers in EU
- 2 Abolish subsidy to farmers
- 3 Counteract surplus production

in Austria (AT):

- 1 No CAP negotiations for Europe always has disadvantages

in Cyprus Republic (CY):

- 1 Buying new (more) live-stock
- 2 Give to people of rural areas money
- 3 Item not specified

in Czech Republic (CZ):

- 1 Ensuring the same conditions for farmers through the whole EU

in Estonia (EE):

- 1 Supporting agriculture

in Hungary (HU):

- 1 1 . 4 , 5 , 7
- 2 The buying up should be at a good price and the product offer too
- 3 The support of the stock raising

in Latvia (LV):

- 1 To provide the support for purchasing agriculture technique

- 2 Everything is just going down in rural areas and agriculture
- 3 To support with subsidies
- 4 To make structural funds with certain goals, which are changing according to the projects
- 5 Not to close sugar-refineries
- 6 To provide good conditions for agriculture business

in Poland (PL):

- 18 The European Union should not be involved in agriculture and rural development
- 19 All of them are important

in Slovenia (SI):

- 1 Prohibition of import of genetically modified food/ products
- 2 Agriculture

in Bulgaria (BG):

- 1 Consolidation of the agricultural lands
- 2 Providing modern agricultural machinery

in Romania (RO):

- 1 Subsidies for agriculture

Note:

France, Cyprus Republic: Specified responses for OTHERS are coded in the data set, but no corresponding documentation has been made available by the data producer

v370 - QE4B CAP PRIORITIES - WHICH ANY OTHER

[Q.E4A

In your opinion, which of the following should be the main priorities of the European Union in terms of agriculture and rural development policy? First priority?

Q.E4B

ASK ONLY IF CODE 1-16 IN V351

Any others?]

Q.E4BO

ASK Q.E4BO IF "OTHER" IN Q.E4B - OTHERS GO TO Q.E5

Which other(s)?

(WRITE DOWN - CODE AT THE OFFICE - MULTIPLE ANSWERS POSSIBLE)

99 Inap. not any others in Q.E4B (not coded 1 in V368)

in France (FR):

- 9 Item not specified
- 11 Item not specified
- 16 Charges
- 17 Our pensions
- 18 No advice

in Belgium (BE):

- 21 Stimulate purchase of local agricultural products
- 22 To not discourage young farmers with complex legislation

in Netherlands (NL):

- 1 Equally important
- 2 Equilibrium between shortage of space as a result of agriculture and scenic areas
- 3 The unnecessary clearing of possible infected animals
- 4 Don't know
- 5 A more justable distribution of food

in Germany (DE):

- 1 All of these points
- 2 None of these points

in Luxembourg (LU):

- 1 Guarantee correct paid prices for farmers
- 2 Less interfering
- 3 No genetic modified organism

in Denmark (DK):

- 16 Others

in Greece (GR):

- 1 Ensuring profit for farmers

in Spain (ES):

- 4 Enhancing rural areas by stimulating their economic growth and creating new jobs
- 18 Eliminate or reduce the intermediaries

in Finland (FI):

- 1 Self-sufficiency
- 2 Equal treatment of farmers in different countries

in Sweden (SE):

- 1 More economical subsidy
- 2 Control subsidy, decrease level to match necessary production in case of catastrophe

in Cyprus Republic (CY):

- 1 Give a lot of money & having the government dispose of it as it sees fit
- 2 ALL are priorities
- 3 Farmers' pensions

in Czech Republic (CZ):

- 1 Ensuring the same conditions for farmers through the whole EU
- 2 Reducing subsidy payments as much as possible

in Latvia (LV):

- 1 To support private investments in rural areas, e.g. tourism
- 2 Not to close sugar-refineries

in Slovenia (SI):

- 1 Dolenjski cviček (a sort of wine from one region) - to protect certain products
- 2 To consider customers when making the price

in Romania (RO):

- 1 Subsidies for agriculture

Note:

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

France: Specified responses for OTHERS are coded in the data set, but no corresponding documentation has been made available by the data producer.

v372 - QE4AB CAP PRIOR: IMPROVE COMPETITIVENESS

Q.E4AB Priority in EU agriculture and rural development policy in total

Q.E4AB_2 Improving the competitiveness of European
agriculture

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes responses to this item in Q.E4A (V351) and Q.E4B (V353 TO V368).

Note:

See Q.E4A to Q.E4B for complete question text. Variables summarize answers to Q.E4A (V351) and Q.E4B (V353 TO V368), except for category '17' (DK) (V387).

v385 - QE4AB CAP PRIOR: QUALITY PRODUCTION

Q.E4AB Priority in EU agriculture and rural development policy in total

Q.E4AB_15 Encouraging quality production

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes responses to this item in Q.E4A (V351) and Q.E4B (V353 TO V368).

Note:

See Q.E4A to Q.E4B for complete question text. Variables summarize answers to Q.E4A (V351) and Q.E4B (V353 TO V368), except for category '17' (DK) (V387).

v413 - QE8 FARMER PAYMENT PROVISIO: ENVIRONM STANDARD

Q.E8

Following new rules introduced in 2003, farmers' payments are now linked to the requirement to comply with certain rules (Cross compliance) regarding environment, food safety and animal welfare. To what extent do you personally think that it is justified or unjustified to reduce the subsidy payments to farmers who do not respect...?

v417 - QE9 AGRIC PROD TRADE: DEVELOPING COUNTRIES

Now I would like to ask you a question about international trade in agricultural products.

Q.E9

I am going to read you some statements about the European Union and trade barriers to imports of agricultural products. For each, please tell me whether you strongly agree, somewhat agree, somewhat disagree or strongly disagree.

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE - READ OUT – ROTATE)

Q.E9_2 The EU should have trade barriers to imports of agricultural products with the exception of imports from developing countries

- 1 Totally agree
- 2 Tend to agree
- 3 Tend to disagree
- 4 Totally disagree
- 5 DK

[Q.E13

On which of the following topics would you wish to have more information?]

Q.E13O

ASK Q.E13O IF "OTHER" IN Q.E13 - OTHERS GO TO Q.E14

Which other(s)?

(WRITE DOWN - CODE AT THE OFFICE - MULTIPLE ANSWERS POSSIBLE)

in Netherlands (NL):

Q.E13O_1 Quality of food production

in Germany (DE):

Q.E13O_1 Why the farmers are producing too much corn and rapeseed in order to produce fuel instead of rotating the plants they grow

in Luxembourg (LU):

Q.E13O_1 Self-government of EU products

in Ireland (IE):

Q.E13O_1 Well informed

in United Kingdom (GB):

Q.E13O_1 Don't need anymore information on these topics

in Greece (GR):

Q.E13O_1 Item not specified

in Finland (FI):

Q.E13O_1 How much is the share of cap budget for different countries

in Sweden (SE):

Q.E13O_1 Want to know how important EU has been to the work with different specific questions

in Austria (AT):

Q.E13O_1 Any other information on this issue

in Czech Republic (CZ):

Q.E13O_1 Rather about nothing because our destroyed agriculture makes me vexed

in Estonia (EE):

Q.E13O_1 How strictly other member states follow the regulations and directives; how regulations are enforces

in Hungary (HU):

Q.E13O_1 Where does the money from the EU get into

in Latvia (LV):

Q.E13O_1 Agriculture technique

in Slovakia (SK):

Q.E13O_1 Prospects of viniculture

in Slovenia (SI):

Q.E13O_1 Statistics

in Romania (RO):

Q.E13O_1 Agriculture development

v475 - QF2 ENVIRONMENT - MAIN CONCEPT

Q.F2

When people talk about "the environment", which of the following do you think of first?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

- 1 Pollution in towns and cities
- 2 Green and pleasant landscapes
- 3 Earthquakes, floods and other natural disasters
- 4 Man-made disasters such as oil spills, industrial accidents
- 5 Climate change
- 6 Protecting nature
- 7 The state of the environment our children will inherit
- 8 The quality of life where you live
- 9 Using up natural resources
- 10 None of these (SPONTANEOUS)
- 11 Others (SPONTANEOUS - SPECIFY)
- 12 DK

Note:

v476 - QF2 ENVIRONMENT - MAIN CONCEPT ELSE

[Q.F2

When people talk about "the environment", which of the following do you think of first?]

Q.F20

ASK Q.F20 IF "OTHER" IN Q.F2 - OTHERS GO TO Q.F3

What else?

(WRITE DOWN - CODE AT THE OFFICE - ONE ANSWER ONLY)

999 Inap. not any others in Q.F2 (not coded 11 in V475)

in France (FR):

- 1 Item not specified
- 7 Item not specified
- 8 Item not specified
- 11 Man in nature, interactions
- 12 Life, nature

in Belgium (BE):

- 13 The non-respect of people
- 14 Nuclear power plants
- 15 Given too much money without improving the problem
- 16 Air
- 17 Good nutritional value
- 18 Air pollution, water shortage
- 19 My life

in Netherlands (NL):

- 1 The future
- 2 Emission of carbon dioxide
- 3 That we're being fooled
- 4 Government should take its responsibility towards polluting companies
- 5 Healthy living environment
- 6 Climate change
- 7 Pollution
- 8 The immediate environment
- 9 Separate waste
- 10 Health
- 11 That the environment is costing people money
- 12 Greenpeace actions
- 13 Don't trust it
- 14 Depends on conversation partner
- 15 Complaining/nagging
- 16 Air pollution
- 17 Intimidation

- 18 Soil pollution
- 19 Water pollution
- 20 Overpopulation
- 21 Ozone
- 22 Clean air
- 23 Food
- 24 Your own contribution

in Germany (DE):

- 1 Waste
- 2 It is a sacrilege on environment if you produce fuel out of things that are originally meant to be food (such as cereals)

in Italy (IT):

- 99 Animal and vegetable species which are dying

in Luxembourg (LU):

- 1 Air pollution (industrie, cars)
- 2 Sustainable development
- 3 To much traffic
- 4 To pay more and more taxes
- 5 Garbage in the nature
- 6 Problematic with the garbage

in Denmark (DK):

- 11 Others

in Ireland (IE):

- 1 Litter
- 2 Dumping of waste
- 3 Air pollution / sprays / aerosols
- 4 Renewable energy
- 5 Protection of wild life
- 6 Global warming
- 7 Water/water pollution
- 8 Land pollution
- 9 Ozone layer

in United Kingdom (GB):

- 1 Recycling
- 2 The ozone

in Greece (GR):

- 1 Environmental destruction
- 2 Ecologist movement
- 3 Unconcern for the environment
- 4 Planet earth in danger
- 5 Health problems related to environmental pollution

in Spain (ES):

- 1 Pollution in towns and cities
- 2 Green and pleasant landscapes
- 3 Earthquakes, floods and other natural disasters
- 5 Climate change
- 13 In Fertiberia
- 14 In the future
- 15 Everything is bad
- 16 Everything

in Portugal (PT):

- 1 Recycling
- 2 Hole in the Ozone layer
- 3 Health

in Finland (FI):

- 1 Forests
- 2 Watervays
- 3 Cleanliness of environment
- 4 Recycling
- 5 The Earth
- 6 Immediate surroundings
- 7 Climate change
- 8 Building licence

in Sweden (SE):

- 1 Environmental criminals in Africa

in Austria (AT):

- 1 All of them taken together
- 2 Planet earth

in Cyprus Republic (CY):

- 1 Water
- 2 Must have a clean environment
- 3 My village, my fields that we used to cultivate

in Czech Republic (CZ):

- 1 Factories
- 2 Nature will help itself

in Estonia (EE):

- 1 Pollution in general
- 2 Producing waste, garbage; throwing the garbage down
- 3 Everything around us
- 4 Air pollution

- 5 Industrial waste
- 6 Planet earth
- 7 Rural life
- 8 Cutting down forests
- 9 Pointless wasting of money
- 10 Polluted water
- 11 Excessive waste everywhere
- 12 Forest

in Hungary (HU):

- 1 Towns/ green areas
- 2 Precincts
- 3 Environmental pollution
- 4 The foods are not healthy
- 5 Air
- 6 Drinking water
- 7 Slashings
- 8 Cleanliness
- 9 Chemical/ spraying

in Latvia (LV):

- 1 Fresh air
- 2 Amount of the waste in the environment
- 3 Taking care of the land (soil)
- 4 Ecology of the whole planet
- 5 Nothing
- 6 Runabout animals
- 7 Bad quality of the water
- 8 Pollution in the atmosphere
- 9 Separating of the waste
- 10 Isn't interested in that, doesn't know, doesn't have any information

in Lithuania (LT):

- 1 Scrapheap, dump

in Malta (MT):

- 1 Clean environment in villages and towns
- 2 Dirty streets
- 3 Vandalism
- 5 High number of construction sites
- 6 Cleaner environment better health

in Poland (PL):

- 13 Healthy food

in Slovakia (SK):

- 13 Everything around us

in Slovenia (SI):

- 1 A problem of public dumping ground
- 2 The price of our local communal service (that takes care of garbage in the city)
- 3 Flowers, pleasant surroundings around the house
- 4 Home and garden
- 5 It will be the problem in the future
- 6 It's nicer to live outside the cities
- 7 I think of everything

in Bulgaria (BG):

- 1 Unpunished and high-handed hewing of forests
- 2 Indiscriminately and illegal construction activities
- 3 The ozone gap
- 4 About the air and the water

in Romania (RO):

- 1 Citizens health

Note:

France: Specified responses for OTHERS are coded in the data set, but no corresponding documentation has been made available by the data producer.

v561 - QF13 ENVIRONM DONE FOR: ELSE

[Q.F13

Have you done any of the following during the past month for environmental reasons?]

Q.F13O

ASK Q.F13O IF "OTHER" IN Q.F13 - OTHERS GO TO Q.F14

What else?

(WRITE DOWN - CODE AT THE OFFICE - MULTIPLE ANSWERS POSSIBLE)

99 Inap. not any others in Q.F13 (not coded 1 in V559)

in France (FR):

- 1 Item not specified
- 3 Item not specified
- 5 Item not specified
- 10 Fair trade
- 11 Nature cleaning with children
- 12 Speed on the road

in Belgium (BE):

- 12 Cultivate my vegetables myself
- 13 Convert the car to ride with gas

in Netherlands (NL):

- 1 Do not own a car
- 2 Low-energy light bulbs

in Germany (DE):

- 1 I did not buy the car

in Luxembourg (LU):

- 1 Eco-friendly radiator system

in Denmark (DK):

- 10 Others

in Ireland (IE):

- 1 Not specified

in United Kingdom (GB):

- 1 Stopped smoking
- 2 Planted trees

in Spain (ES):

- 3 Separated most of your waste for recycling

12 We have to take care more

13 The bigger conaminators should act

in Portugal (PT):

1 Driving slowly

in Finland (FI):

1 Environmental friendly car

2 Do these things anyway

3 Forestry

in Sweden (SE):

1 Cancelled the telephone dictionary

2 Bought fewer bottle with water

in Cyprus Republic (CY):

2 Planting of trees

in Czech Republic (CZ):

1 Used LPG for his car

2 Took care of water animals (he is a fisher)

in Hungary (HU):

1 Grooming the environment

2 Composting the plant waste

3 Adequate green card

4 Cap gathering for charity scope

5 Preparation of bio food

in Latvia (LV):

1 Used organic fertilizers for the garden

2 Collecting garbage, besoming the streets

in Lithuania (LT):

1 Used to clear the grove, strand

2 Feeding stray cats

in Poland (PL):

12 Cultivated plants

13 Feeding animals

14 Burned the garbage in the tiled stove

15 All of them

in Slovakia (SK):

1 Cleaning of the local brook

2 Youth enlightenment

3 He didn't burn his garden waste

in Slovenia (SI):

- 1 I was using chemical detergents less
- 2 I bought a car that spends less fuel
- 3 I was cleaning environment in whole Vipava valley

in Bulgaria (BG):

- 1 Participation in campaign for collecting scrap
- 2 Participation in campaign for cleaning up the neighborhood area

Note:

France, Ireland: Specified responses for OTHERS are coded in the data set, but no corresponding documentation has been made available by the data producer.

v595 - QF16 ENVIRONMENT AND PUBL BUDGET SPENDING

Q.F16

Thinking about the budget of public authorities in (OUR COUNTRY), which of the following two statements comes closest to your view.

(READ OUT)

- 1 Public authorities should purchase more environmentally friendly products, even if they are more expensive, because doing so would help to protect the environment
- 2 Public authorities should always choose the least expensive products, regardless of whether they are produced in an environmentally friendly way or not
- 3 Neither (SPONTANEOUS)
- 4 DK

v611 - QF22 GENETIC MOD ORGANISMS - FAVOUR/OPPOSE

Q.F22

There is an ongoing debate about the use of genetically modified organisms (GMO). Are you personally in favour of or opposed to the use of GMOs?

(READ OUT – ROTATE – ONE ANSWER ONLY)

- 1 Totally in favour
- 2 Fairly in favour
- 3 Fairly opposed
- 4 Totally opposed
- 5 I have never heard of GMOs (SPONTANEOUS)
- 6 DK

v613 - D1 LEFT-RIGHT PLACEMENT - RECODED 3 CAT

D.1R1 Left - right scale (RECODED)

- 1 (1 - 4) Left
- 2 (5 - 6) Centre
- 3 (7 -10) Right
- 9 DK/Refusal

Derivation:

This variable collapses answers to D.1 into three categories.

Note:

See D.1 for complete question text.

v614 - D1 LEFT-RIGHT PLACEMENT - RECODED 5 CAT

D.1R2 Left - right scale (RECODED)

- 1 (1 - 2) Left
- 2 (3 - 4)
- 3 (5 - 6) Centre
- 4 (7 - 8)
- 5 (9 -10) Right
- 9 DK/Refusal

Derivation:

This variable collapses answers to D.1 into five categories.

Note:

See D.1 for complete question text.

NO QUESTIONS D.2 TO D.6

v615 - D7 MARITAL STATUS

D.7

Could you give me the letter which corresponds best to your own current situation?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

- 1 Married
- 2 Remarried
- 3 Unmarried, currently living with partner
- 4 Unmarried, having never lived with a partner
- 5 Unmarried, having previously lived with a partner, but now on my own
- 6 Divorced
- 7 Separated
- 8 Widowed
- 9 Other (SPONTANEOUS)
- 97 Refusal (SPONTANEOUS)

Note:

Original code "10" recoded to "97".

Last trend: EB68.1, D.7

v616 - D8 AGE EDUCATION

D.8

How old were you when you stopped full-time education?

(IF "STILL STUDYING", CODE '00' - IF "NO EDUCATION" CODE '01' - IF "REFUSAL" CODE '98' - IF "DK" CODE '99')

0 Refusal

2 2 years

65 65 years

97 No full-time education

98 Still studying

99 DK

Note:

Original code "00" recoded to "98".

Original code "01" recoded to "97".

Original code "98" recoded to "0".

Please notice that starting with Eurobarometer 67.2 data for SPAIN, PORTUGAL and BULGARIA show noticeable high frequencies for REFUSAL (newly introduced category) and not any response for NO FULL-TIME EDUCATION. This is not plausible if comparing with results from former waves. Data for both categories have probably been collapsed. Inconsistent specifications for residual categories (no full-time education, DK, refusal) in the national field questionnaires over time and across countries support this argument. Relevant data should be analysed with caution.

For Portugal: Original code "00" recoded to "97".

Last trend: EB68.1, D.8

v617 - D8 AGE EDUCATION - RECODED

D.8R Age when finished full-time education - RECODED

- 1 Up to 14 years
- 2 15 years
- 3 16 years
- 4 17 years
- 5 18 years
- 6 19 years
- 7 20 years
- 8 21 years
- 9 22 years and older
- 10 Still studying
- 11 No full-time education
- 97 Refusal
- 98 DK

Note:

See D.8 for complete question text.

Please notice that starting with Eurobarometer 67.2 data for SPAIN, PORTUGAL and BULGARIA show noticeable high frequencies for REFUSAL (newly introduced category) and not any response for NO FULL-TIME EDUCATION. This is not plausible if comparing with results from former waves. Data for both categories have probably been collapsed. Inconsistent specifications for residual categories (no full-time education, DK, refusal) in the national field questionnaires over time and across countries support this argument. Relevant data should be analysed with caution.

For Portugal: Original code "97" recoded to "11".

v619 - D11 AGE EXACT

D.11

How old are you?

15 15 years

97 97 years

Note:

Actual number is coded.

Last trend: EB68.1, D.11

v620 - D11 AGE RECODED - FOUR GROUPS

D.11R1 AGE - RECODED IN FOUR GROUPS

- 1 15 - 24 years
- 2 25 - 39 years
- 3 40 - 54 years
- 4 55 years and older

Derivation:

This variable collapses answers to D.11 into four categories.

Note:

See D.11 for complete question text.

v632 - D40 HOUSEHOLD COMPOSITION: SIZE A+B+C (REC)

D.40 HOUSEHOLD COMPOSITION: SIZE (A+B+C)

- 1 One
- 2 Two
- 3 Three
- 4 Four
- 5 Five
- 6 Six
- 7 Seven or more

Derivation:

This variable groups the summarized variable V631.

Note:

See V625, V627 and V629 for complete question text.

Generated by the Archive in accordance with former surveys.

v666 - P6 SIZE OF COMMUNITY - UNITED KINGDOM

P.6_GB (Objective) Size of community: United Kingdom

- 1 Rural
- 2 Urban
- 3 Metropolitan
- 99 Inap. not GB (not coded 9 or 10 in V6)

Note:

The original variable integrated data for Northern Ireland (codes 1-2, 6) and Great Britain (codes 3-5). The original categories (value label) were corrected after consultation with TNS OPINION & SOCIAL. In order to facilitate the analysis for the United Kingdom as a whole, identical categories have been combined. For Northern Ireland code 3 ("Metropolitan") has been recoded from code 6 (DK) in accordance with P7 Region I for the United Kingdom (if coded 1 = "Belfast"). In Eurobarometer 62 to 66 "Belfast" is coded as "Urban" together with other communities; former Eurobarometer have different categories for community size in Northern Ireland.

For meaningful results this variable needs to be weighted by W4 WEIGHT UNITED KINGDOM (V10) or be used for Great Britain and Northern Ireland separately (select if '9' OR '10' in V6).

v727 - P13 LANGUAGE OF INTERVIEW - LUXEMBOURG

P.13_LU Language of questionnaire: Luxembourg

- 1 Luxembourgish
- 2 French
- 3 German
- 9 Inap. not LU (not coded 6 in V6)

Note:

Starting with Eurobarometer 62 and with the change of fieldwork responsibility to TNS, the relation between average frequencies for language categories "French" and "Luxembourgish" appears to be inversed. The majority of respondents in Luxembourg are now coded as being interviewed in French and not in Luxembourgish as former Eurobarometer surveys indicate. It could not be ascertained if TNS (intermittently) changed the fieldwork strategy regarding languages. Starting with Eurobarometer 69 the former proportion is recovered, again representing the actual proportion between Luxembourgish and French as mother languages in Luxembourg. This is probably also true for Eurobarometer 68.2 where the labelling in the data set (value label) is shifted compared to the field questionnaire.

Last trend: EB68.1, P.13

v727

Value	Label	Missing	Count	Percent	Valid Percent
1	Luxembourgish		115	0.4	23.0
