Acknowledgements

Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences.

Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (<http://zacat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

1.2 Content

1.2.1 Abstract

This round of Eurobarometer surveys queried respondents on standard Eurobarometer measures, such as whether they discussed political matters, how satisfied they were with their present life, and their view on the current economic and/or employment situation in their household and country, in the European Union (EU), and in the world. Additionally, respondents were asked what expectations they had for the next 12 months and what important issues were being faced personally and in their country. Additional questions focused on the respondents' opinions on the EU, including whether their country had benefited from being an EU member, as well as the overall direction of their country, the EU, and the United States, and their trust in certain institutions. The survey queried respondents on their personal financial situation, their views of the life of children today, views of being socially excluded or becoming homeless, and their trust in the information media. Finally, respondents were asked about their voting behavior in the last parliamentary election in their country and their political party attachment. A second major focus of the surveys was the European Parliament and elections. Respondents were asked about their knowledge and impression of the European Parliament, and their opinions on its role, its policies, and its values. In addition, respondents identified the date of the next European elections, their interest and the likelihood of voting in the June 2009 elections, their decision-making criteria when choosing a candidate, their reasons for not voting in the elections, and the main themes on which the campaign for the next elections should concentrate. A third major focus was the economic crisis. The survey queried respondents about the present and future repercussions of the economic crisis, which type of government or other entity is most capable of dealing most effectively with the crisis, the role of the EU and member states in the crisis, whether the adoption or non-adoption of the euro positively or negatively affected the economy of their country, and their opinion of the policies aimed at alleviating the crisis. A fourth major focus was climate change. Respondents indicated their views on how climate change ranked in importance among the world's problems, the seriousness of climate change, and how well-informed they felt about this matter. In addition, respondents were asked about their knowledge of climate change, and the actions aimed to fight it. A fifth and final major focus was chemical products. The survey asked respondents to identify which consumer products contain chemicals that pose a risk to the user, the extent of risk and worry in using certain products, and who they trusted for protection against health and environmental hazards. In addition, respondents were queried on their knowledge of chemical substance exposure, which information sources they preferred and trusted for safety and safe use information about chemical products, the labeling of chemical substances in consumer products, and whether the producer of a chemical product should be held legally responsible for any harm caused by it. Respondents were also asked about reading product instructions, product usage of sunscreen and hair dyes, and the potential health risks and effects of certain chemical substances. Demographic and other background information includes age, gender, nationality, origin of birth (personal and parental), marital status, age when stopped full-time education, occupation, left-right political self-placement, household composition, ownership of a fixed or mobile telephone and other durable goods, type and size of locality, region of residence, and language of interview.

1.2.2 Topic classification

- International Institutions, Relations
- Political Attitudes and Behaviour
- Economic Policy, National Economic Situation
- Society, Culture

- Income

1.3 Universe

In all, Eurobarometer 71.1 interviewed 30.232 citizens in the 27 countries of the European Union after the 2004/2007 enlargement (i.e. including the Accession Countries Romania and Bulgaria), in the remaining Candidate Countries (CC) Croatia and Turkey, as well as among the Turkish Cypriote Community (TCC) and in the Former Yugoslav Republic of Macedonia (FYROM). All respondents were residents in the respective country, nationals and non-nationals but EU-citizens, and aged 15 and over. They were supposed to have sufficient command of one of the respective national language(s) to answer the questionnaire. Separate samples were drawn for Northern Ireland and East Germany.

1.4 Sampling procedure

A multi-stage, random (probability) sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regional units in every country (Statistical Office of the European Community, EUROSTAT NUTS 2 or equivalent). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of starting addresses was selected from each sampled PSU, at random. Further addresses were chosen systematically using standard random route procedures as every Nth address from the initial address. In each household, a respondent was drawn, at random, following the closest birthday rule. No more than one interview was conducted in each household.

The regular sample size (in the sense of completed interviews) is 1000 respondents per country, except the United Kingdom with separate samples for Great Britain (1000) and Northern Ireland (300), Germany with separate samples for the Eastern (500) and the Western part (1000), and Luxembourg, Cyprus (Republic), Malta, and Cyprus (TCC) with 500 interviews each.. The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

From January 16 to February 21, 2009, the TNS Opinion & Social, a consortium created between Taylor Nelson Sofres and EOS Gallup Europe, carried out the fieldwork for this Eurobarometer, at the request of the European Commission, Directorate General Press and Communication, Opinion Polls. TNS Opinion & Social is based at Avenue Herrmann Debroux, 40, 1160 Brussels, Belgium. TNS Opinion & Social coordinates the fieldwork carried out through its network of national institutes:

1.6 Mode of data collection

In all countries, fieldwork was conducted on the basis of detailed and uniform instructions prepared by TNS Opinion Social. Interviews were conducted face-to-face in people's home in the appropriate national language. As far as the data capture is concerned, CAPI (Computer Assisted Personal Interview) was used in those countries where this technique was available.

Equivalent French and English basic questionnaires were developed for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country. Back-translation procedures were applied for controlling semantic equivalence.

1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factor corrects for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country as well as each lower level sample (Great Britain and Northern Ireland, East and West Germany) are represented in proportion to its population size within different groupings, or according to the historical states of European unification (e.g. founder members, new members, Euro zone) in the case of the EUROPEAN WEIGHTS, or for the United Kingdom (WEIGHT SPECIAL UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31) and for Germany as a whole (WEIGHT SPECIAL GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general all samples which do not belong to the respective group of samples under consideration are excluded from calculation.

The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 4) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

Eurobarometer 71.1 provides three (post-stratification) NATION WEIGHTS: W1 (WEIGHT RESULT FROM TARGET) for separate analysis or comparison of individual samples (countries or regions on sub-national level), W4 (WEIGHT SPECIAL UNITED KINGDOM) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole, and W3 (WEIGHT SPECIAL GERMANY), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. W3 and W4 exclude all other countries from calculation, but include the post-stratification factors for the United Kingdom and Germany respectively.

The EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries, of accession or candidate countries, and of Euro zone countries, representing different historical states of European integration (e.g. EU6 = six founder members) . All post-stratification factors are included.

Table 2: Overview of population size weights

European Weights in Eurobarometer 71.1	Function
W5 to W9, W11, W14, W22	grouping EU member countries
W10, W13, W24	grouping new member countries
W15, W18, W19	grouping candidate/accession countries
W25, W26, W27	grouping member + candidate/accession countries
W12, W29, W30	grouping (non-)Eurozone countries

For more detailed information on the individual weights please see the corresponding variable description.

1.8 Data preparation

The data received by GESIS from TNS Opinion & Social were checked for completeness, missing and duplicate records, for illegal (wild) codes and for (formal) consistency of response patterns and question routing. Errors discovered by these procedures are documented or corrected, as a general rule after consulting related additional documentation (e.g. tabular reports) or the data provider. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable DDI-XML compliant documentation was created for this dataset by GESIS.

GESIS added 'Inappropriate' (INAP) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the original questionnaire was adhered to for (almost) every respondent. An additional INAP category was defined whenever a question or group of questions were not surveyed in one or more countries, or if variables refer to country specific items (e.g. regions).

Users should note that answers to multiple-response questions are (originally) represented by a series of binary 'dummy' variables (i.e. variables which take on values of one and zero only), creating separate 'dummy' variables also to explicitly represent 'Don't know', 'No answer/refusal' or other residual responses, such as 'None of the

above'. The archive has recoded these residual responses in the case of uncommon minor inconsistencies with respect to and in favour of the series of substantial answers.

GESIS has recoded the missing answers (NA) represented in the original data set by blanks (system missing) to standard values. Their practically complete absence suggests that eventual cases of any not explicitly coded item non-response, might be collapsed with the DK (don't know) category.

Question text and contingency text appearing in the variable description is taken from English language version of the basic (bilingual) questionnaire (master questionnaire). Coding schemes and other documentation are based on the English language version of the basic questionnaire or on the respective SPSS data definition statements as provided by TNS Opinion & Social. In case of any discrepancy between questionnaires, SPSS definitions and data regarding the coding scheme of a variable, the archive, as a general rule, carried out any correction in agreement with the data provider.

If the documentation for country-specific questions or answer categories is provided in another language than English, the archive documents the original language wording and supplies the English translation in brackets.

In general all detailed information on data preparation or on data inconsistencies is noted for each individual variable in the variable documentation part. For details on the harmonization of the political party coding see also paragraph 3.2 (coding frames).

1.9 Further remarks

Special topical modules QB (European Parliament), QC (European Elections), QD (Economic crisis) and QF (Chemical products) have only be asked in EU 27.

The primary data on voting behaviour (QA25 to QA27) are made available for the first time with the present dataset version v4.0.0. The embargo has been lifted by the European Commission.

The rest of the dataset and of the variable report remains substantially unchanged compared to the previous release (v3.1.0), except the documentation for variables v720 (P7 REGION I – PORTUGAL) and v747 (P7 REGION II – GREECE) which have been corrected as noted in the variable documentation part.

2 Eurobarometer Series Description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

Table 3: EU enlargement and countries covered by Standard and Special Eurobarometer

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 4: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.20VR, 55.10VR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.30VR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.20VR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 5) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 5: Overview of Eurobarometer surveys with standard EU and trend question modules

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

3 Dataset structure and standards

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 6: ZEUS Party Family Code (slightly modified)

Category		Party Family
0	(001-099)	not affiliated / electoral alliances across "families"
1	(100-199)	Communists
2	(200-299)	Socialists
3	(300-399)	Liberals
4	(400-499)	Christian Democrats
5	(500-599)	Conservatives
6	(600-699)	Extreme Rights / Nationalists
7	(700-799)	Regionalists / Ethnic
8	(800-899)	Environmental parties
9	(900-949)	Agricultural parties
9	(950-989)	other special issue parties (e.g. Eurosceptics) and independents
	990	other (spontaneous)
	994	not voting age
	995	empty ballot (blank) or invalid vote
	996	not voted / would not vote
	997	Refused
	998	DK / DK+NA if NA not coded separately
	999	INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION – ALL SAMPLES ISO 3166).

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (–1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded "real" values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission's official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

Header with DIGITAL OBJECT IDENTIFIER (DOI) linked to the Study Description in the GESIS Data Catalogue.	Eurobarometer 67.1 - February-March 2007 GESIS Study No. 4529 (v3.0.1, http://dx.doi.org/doi:10.4232/1.10983)																																																																																																																																																																																																																																																																																																																					
VARIABLE NAME (serial number assigned by the archive) and VARIABLE LABEL as defined in the dataset.	<div>v77 - QA1 FEELING FULFILLED: PROFESSIONAL LIFE</div> <div>Q.A1 ASK Q.A IN EU27 To what extent would you say that the life you live allows you to feel fulfilled in...? (SHOW CARD WITH SCALE - ONE ANSWER PER LINE) (READ OUT) Q.A1_2 Your professional life 1 Totally fulfilled 2 Fairly fulfilled 3 Not very fulfilled 4 Not at all fulfilled 5 Not applicable (SPONTANEOUS) 6 DK 9 Inap. not EU27 (not coded 1 to 31 in V6) Derivation: ... QUESTION NUMBER and full QUESTION TEXT from the basic questionnaire, including interviewer instructions. The numbers or letters that may appear together with the original question number, reflect the item order (multiple item or multiple response questions) or indicate if a question was recoded (R) or summarized (T), or if asked only in a single country (country abbreviation).																																																																																																																																																																																																																																																																																																																						
CODE VALUES occurring in the data for this variable and complete ANSWER TEXT from the basic questionnaire. Code values may differ from the questionnaire specification due to standardization. Abbreviations commonly used in the code definitions are DK (don't know), NA (not ascertained) and INAP (inappropriate).																																																																																																																																																																																																																																																																																																																						
DERIVATION information refers to the construction principle of indices or other derived variables (not in the example). NOTE delineates additional explanatory text subsuming trend information (last appearance of the question) or archive remarks on data processing and other issues relevant for the understanding or application of the variable.																																																																																																																																																																																																																																																																																																																						
CROSS-TABULATION: The absolute frequencies of the occurrence of values (<i>absolute values</i>) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies (<i>row percent</i>) refer to the valid cases (<i>n valid sum</i>), i.e. the total number of cases (<i>n sum</i>) reduced by the number of cases defined as missing data (<i>M</i>). For display and place saving reasons excluded countries or areas may be completely dropped from the table.																																																																																																																																																																																																																																																																																																																						
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (<i>M</i>), i.e. <i>percent</i> on the basis of all cases (<i>sum</i>) and <i>valid percent</i> on the basis of the <i>valid cases</i> .

5 Variable Documentation

Variable, Label

Question Text (English Language)

v1 - ARCHIVE STUDY NUMBER - DISTRIBUTOR

ARCHIVE STUDY NUMBER - DISTRIBUTOR

Study Number of the distributing data archive.

v1

Value	Label	Missing	Count	Percent	Valid Percent
4971			30232	100.0	100.0
	Sum		30232	100.0	100.0
	Valid Cases		30232		

v2 - ARCHIVE STUDY NUMBER - PUBLISHER

ARCHIVE STUDY NUMBER - PUBLISHER

Study number of the data archive which is publishing this data set version.

v2

Value	Label	Missing	Count	Percent	Valid Percent
4971			30232	100.0	100.0
	Sum		30232	100.0	100.0
	Valid Cases		30232		

v3 - GESIS ARCHIVE VERSION**VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET**

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

v3

Value	Label	Missing	Count	Percent	Valid Percent
4.0.0 (2013-08-07)			30232	100.0	100.0
	Sum		30232	100.0	100.0
	Valid Cases		30232		

v4 - EUROBAROMETER NUMBER

EUROBAROMETER SURVEY NUMBER

The number identifying the Eurobarometer survey.

711 Eurobarometer 71.1

v4

Value	Label	Missing	Count	Percent	Valid Percent
711	Eurobarometer 71.1		30232	100.0	100.0
	Sum		30232	100.0	100.0
	Valid Cases		30232		

v5 - UNIQUE CASE ID (TNS COUNTRY ID + INTERVIEW ID)

UNIQUE CASE ID (TNS COUNTRY ID + TNS INTERVIEW ID)

This unique respondent identification is composed of the original TNS country code and the original TNS interview number. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 04: Greece; 05: Spain; 06: Finland; 07: France; 08: Ireland; 09: Italy; 10: Luxembourg; 11: Netherlands; 12: Austria; 13: Portugal; 14: Sweden; 20: Germany West; 21: Germany East; 22: Great Britain; 23: Northern Ireland; 31: Bulgaria; 32: Cyprus (Republic); 33: Czech Republic; 34: Estonia; 35: Hungary; 36: Latvia; 37: Lithuania; 38: Malta; 39: Poland; 40: Romania; 41: Slovakia; 42: Slovenia; 43: Turkey; 46: Croatia; 57: Cyprus (CY-TCC); 63: Macedonia). The remaining digits contain the country-specific questionnaire numbers.

Note:

Actual number is coded.

v6 - NATION - ALL SAMPLES

NATION - ALL SAMPLES

All samples including separate samples for East and West Germany and for Great Britain and Northern Ireland.

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany West
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 Germany East
- 15 Norway (not included)
- 16 Finland
- 17 Sweden
- 18 Austria
- 19 Cyprus (Republic)
- 20 Czech Republic
- 21 Estonia
- 22 Hungary
- 23 Latvia
- 24 Lithuania
- 25 Malta
- 26 Poland
- 27 Slovakia
- 28 Slovenia
- 29 Bulgaria
- 30 Romania
- 31 Turkey
- 32 Croatia
- 33 Cyprus (CY-TCC)
- 34 Macedonia (FYROM)

Note:

Use of weighting factor W1 (V8) is optional.

v7 - NATION - ALL SAMPLES ISO 3166

NATION – ALL SAMPLES ISO 3166

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the “historical” East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized “Turkish Republic of Northern Cyprus”.

Note:

Use of weighting factor W1 (V8) is optional.

v8 - W1 WEIGHT RESULT FROM TARGET

W1 WEIGHT RESULT FROM TARGET

This POST-STRATIFICATION WEIGHT is based on a comparison for each sample with the respective universe description. As such in all countries, gender, age, region and size of locality are introduced in the iteration procedure carried out by the fieldwork institutes.

British and Northern Irish as well as East and West German samples are weighted separately. The weight reproduces the real number of cases for each country. In terms of its general function it corresponds to former NATION WEIGHT II (until EUROBAROMETER 31).

v9 - NATION - UNITED KINGDOM

NATION - UNITED KINGDOM

Great Britain and Northern Ireland are coded together.

0 Other

1 United Kingdom

Note:

Use of weighting factor W4 (V10) is mandatory.

v10 - W4 WEIGHT UNITED KINGDOM

W4 WEIGHT UNITED KINGDOM

This POPULATION SIZE WEIGHT adjusts the British and the Northern Irish (sub-national) samples to their share in the total population aged 15 and over in the United Kingdom. It must be applied whenever the United Kingdom is to be analyzed as a whole. The post-stratification weighting factors are included for both samples. All other samples are excluded from analysis. In terms of its general function the weight corresponds to former NATION WEIGHT I (until EUROBAROMETER 31).

v11 - NATION - UNITED GERMANY

NATION - UNITED GERMANY

East and West Germany are coded together.

0 Other

1 Germany

Note:

Use of weighting factor W3 (V12) is mandatory.

v14 - W5 WEIGHT EU6

W5 WEIGHT EU6

This POPULATION SIZE WEIGHT refers to the six EC founder members: France, Belgium, Netherlands, West Germany, Italy, and Luxembourg. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EU6 must be applied whenever these six EC founder countries are to be analyzed altogether as a group.

v15 - NATION GROUP EU9

NATION GROUP EU9

NATION GROUP EU9 adds Denmark, Ireland, Great Britain and Northern Ireland to the EU6 countries.

0 Other

1 EU9

Note:

Use of weighting factor W6 (V16) is mandatory.

v24 - W10 WEIGHT EU NMS 3

W10 WEIGHT EU NMS 3

This POPULATION SIZE WEIGHT only refers to the three new members as of January 1995: Finland, Sweden and Austria. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EU NMS 3 must be applied whenever these three countries are to be analyzed altogether as a group.

v25 - NATION GROUP EU15

NATION GROUP EU15

NATION GROUP EU15 adds Austria, Finland and Sweden to the EURO 12+ countries, new members as of January 1995.

0 Other

1 EU15

Note:

Use of weighting factor W11 (V26) is mandatory.

v26 - W11 WEIGHT EU15

W11 WEIGHT EU15

This POPULATION SIZE WEIGHT adds Austria, Finland and Sweden to the EU12+ countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EU15 must be applied whenever these 15 countries as of the 1995 enlargement are to be analyzed altogether as a group.

v27 - NATION GROUP EU NMS 10

NATION GROUP EU NMS 10

NATION GROUP EU NMS 10 refers to the group of the ten new members of the enlargement in 2004.

0 Other

1 EU NMS 10

v38 - W22 WEIGHT EU27

W22 WEIGHT EU27

WEIGHT EU27 includes all 25 member countries after the 2004 enlargement, plus the Accession Countries Bulgaria and Romania. This POPULATION SIZE WEIGHT adjusts each national sample in proportion to its share in the total population aged 15 and over, of the European Union plus Bulgaria and Romania. It should be used whenever all 27 countries participating in this wave are to be analysed as a group. The post-stratification weighting factors for all samples/countries are included.

v39 - NATION GROUP EU NMS 12

NATION GROUP EU NMS 12

NATION GROUP EU NMS 12 refers to the group of the 12 new members after the enlargement of January 2007 (accession of Bulgaria and Romania).

0 Other

1 EU NMS 12

Note:

Use of weighting factor W24 (V40) is mandatory.

v40 - W24 WEIGHT EU NMS 12

W24 WEIGHT EU NMS 12

This POPULATION SIZE WEIGHT refers to the group of the 12 new member countries as of the enlargement in January 2007: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia, Bulgaria and Romania. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EU NMS 12 must be applied whenever these 12 countries are to be analyzed altogether as a group.

v41 - NATION GROUP EU27 + TR + HR + CY-TCC

NATION GROUP EU27 + TR + HR + CY-TCC

NATION GROUP EU27 + TR + HR + CY-TCC includes all 25 member countries after the 2004 enlargement, the new members as of 2007 Romania and Bulgaria, the remaining candidate countries Turkey and Croatia and the Turkish Cypriot Community. The Former Yugoslav Republic of Macedonia is excluded.

v48 - W81 WEIGHT EURO ZONE 2009

W81 WEIGHT EURO ZONE 2009

This POPULATION SIZE WEIGHT separates the group of 12 countries which introduced the EURO as of January 1, 2002 (Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland) plus Slovenia which introduced the EURO as of January 1, 2007, plus Cyprus and Malta, which introduced the EURO as of January 1, 2008, plus Slovakia, which introduced the EURO as of January 1, 2009. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EURO ZONE 2009 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

v49 - NATION GROUP NON EURO ZONE 2009

NATION GROUP NON EURO ZONE 2009

NATION GROUP NON EURO ZONE 2009 refers to the group of countries which did not introduce the EURO up to January 1, 2009 (Denmark, United Kingdom, Sweden, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Bulgaria, Romania).

0 Other

v50 - W82 WEIGHT NON EURO ZONE 2009

W82 WEIGHT NON EURO ZONE 2009

This POPULATION SIZE WEIGHT separates the group of countries (Denmark, United Kingdom, Sweden, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Bulgaria, Romania) which did not introduce the EURO up to January 1, 2009. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT NON EURO ZONE 2009 must be applied whenever these countries are to be analyzed altogether as a group.

v51 - NATION GROUP NON EURO ZONE EU NMS 12

NATION GROUP NON EURO ZONE EU NMS 12

NATION GROUP NON EURO ZONE EU NMS 12 refers to the group of countries among the new member states as of 2007 which did not introduce the EURO up to January 1, 2009 (Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Bulgaria, Romania).

0 Other

1 NON EURO ZONE EU NMS 12

Note:

Use of weighting factor W84 (V52) is mandatory.

v52 - W84 WEIGHT NON EURO ZONE EU NMS 12

W84 WEIGHT NON EURO ZONE EU NMS 12

This POPULATION SIZE WEIGHT separates the group of countries among the new member states as of 2007 which did not introduce the EURO up to January 1, 2009 (Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Bulgaria, Romania). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT NON EURO ZONE EU NMS 12 must be applied whenever these countries are to be analyzed altogether as a group.

v53 - WEX WEIGHT EXTRA POPULATION 15+

WEX WEIGHT EXTRA POPULATION 15+

WEIGHT EXTRA extrapolates the actual universe (population aged 15 or more) for each country (sample), i.e. this weight variable integrates all other available weights, but does not reproduce the number of cases in the data set.

1 Mentioned

Note:

According to the interviewer instruction the interview is supposed to be closed for respondents answering only "other country" or "don't know / no answer" in Q.1. However, one respondent coded '1' (mentioned) for DK is included in the survey without indicating any of the nationalities provided in question Q.1.

v261 - QA23AB INFO MEDIA TRUST MOST: NEWSPAPERS

Q.A23AB Information media trusted in total

Q.A23AB_1 Newspapers

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes answers to this item in Q.A23A and Q.A23B (V259 and V260).

Note:

See Q.A23A and Q.A23B for complete question text. Variables summarize answers to Q.A23A and Q.A23B (V259 and V260), except for category '8' (DK) (V268).

v262 - QA23AB INFO MEDIA TRUST MOST: WR MAGAZINES

Q.A23AB Information media trusted in total

Q.A23AB_2 Written magazines

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes answers to this item in Q.A23A and Q.A23B (V259 and V260).

Note:

See Q.A23A and Q.A23B for complete question text. Variables summarize answers to Q.A23A and Q.A23B (V259 and V260), except for category '8' (DK) (V268).

Q.A23AB_8 DK (Q.A23A only)

0 Not mentioned

1 Mentioned

Derivation:

This variable repeats answers to this item in Q.A23A (V259).

Note:

See Q.A23A and Q.A23B for complete question text. Variable repeats answers to category '8' (DK) in Q.A23A (V259), while all other answers to Q.A23A are summarized with Q.A23B (V260) in variables V261 to V267.

v271 - QA24AB INFO MEDIA PREFERENCE: NEWSPAPERS

Q.A24AB Preferred media of getting information about politics and political matters in total

Q.A24AB_1 Newspapers

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes answers to this item in Q.A24A and Q.A24B (V269 and V270).

Note:

See Q.A24A and Q.A24B for complete question text. Variables summarize answers to Q.A24A and Q.A24B (V269 and V270), except for category '8' (DK) (V278).

v272 - QA24AB INFO MEDIA PREFERENCE: WR MAGAZINES

Q.A24AB Preferred media of getting information about politics and political matters in total

Q.A24AB_2 Written magazines

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes answers to this item in Q.A24A and Q.A24B (V269 and V270).

Note:

See Q.A24A and Q.A24B for complete question text. Variables summarize answers to Q.A24A and Q.A24B (V269 and V270), except for category '8' (DK) (V278).

Q.A24AB_8 DK (Q.A24A only)

0 Not mentioned

1 Mentioned

Derivation:

This variable repeats answers to this item in Q.A24A (V269).

Note:

See Q.A24A and Q.A24B for complete question text. Variable repeats answers to category '8' (DK) in Q.A24A (V269), while all other answers to Q.A24A are summarized with Q.A24B (V270) in variables V271 to V277.

v279 - QA25 VOTING BEHAVIOUR LAST NAT ELECTIONS - FRANCE

Q.A25

ASK Q.A25 TO Q.A27 ONLY in EU27 - OTHERS GO TO Q.B

Which party did you vote for in the last parliamentary elections in (OUR COUNTRY) in (DATE – ADAPT TO YOUR COUNTRY)?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

Q.A25_FR

Last vote (national elections): France

100 PCF - Parti Communiste Français (Communist Party) (10)

101 Extrême gauche (PT, LO, LCR) - Extrême gauche (Parti des travailleurs, Lutte ouvrière, Ligue communiste révolutionnaire) (Extreme Left (Workers Party, Workers Struggle, Revolutionary Communist League) (5)

200 PS - Liste du Parti Socialiste (Socialist Party) (20)

300 PRG - Parti Radical de gauche (Radical Party of the Left) (30)

304 MoDem - Mouvement démocrate (Democratic Movement) (40)

403 UMP - Union pour un Mouvement Populaire (Union for a Popular Movement) (62)

406 NC - Le Nouveau Centre (New Centre) (63)

506 MPF - Mouvement pour la France (Movement for France) (69)

600 FN - Front National (National Front) (80)

690 Extrême droite (MNR, ...) - Un autre parti d'extrême droite (Mouvement National Republicain, ...) (Other extreme right party (National Republican Movement, ...)) (91) (not mentioned)

700 Un parti régionaliste (Regional party) (92)

801 Les Verts (The Greens) (50)

890 Un autre parti écologiste (Other ecological party) (93)

950 CPNT - Chasse, Pêche, Nature et Tradition (Hunting, Fishing, Nature and Tradition) (56)

990 Other party (SPONTANEOUS)

994 Did not have the legal age to vote at that time (SPONTANEOUS)

995 Voted blank or invalid (SPONTANEOUS)

996 You did not vote in that election (SPONTANEOUS)

998 DK

999 Inap. not FR (not coded 1 in V6)

Derivation:

Starting with EB69.2 the coding of this variable is basically standardized in accordance with the "ZEUS Party Family Code" which was developed for the "Mannheim Eurobarometer Trend File" (GESIS study ZA3521). The standard is based on a three digit coding. The first digit represents the party family and is consistent across countries. The second and third digits identify the individual party within this family and are country-specific (not comparable across countries). The assignment of parties to families is done according to their OVERALL ideological orientations. Nevertheless the consistency of party coding over time is maintained with priority. Former standard party codes as applied for archive dataset editions up to Eurobarometer 56.3 are reported in brackets, if applicable.

The slightly modified ZEUS Party Family Codes are: The ZEUS Party Family codes are: (001-099) Not-assigned; (100-199) Communists; (200-299) Socialists; (300-399) Liberals; (400-499) Christian-Democrats; (500-599) Conservatives; (600-699) Extreme Right / Nationalists; (700-799) Regionalists, Ethnic parties (modified); (800-899) Environmental Parties; (900-949) Agricultural Parties; (950-979) Independent candidates, special issue parties or splinter groups (modified); (980-989) electoral alliances across party family groups (new). Codes 990-999 contain the response "Other party" and various missing value responses. Users may modify these codings or part of these codings in order to suit their needs such as possible alternative ideological party classifications.

Note:

Q.A25_LU

Last vote (national elections): Luxembourg

- 100 KPL - Kommunistesch Partei (Communist Party) (10)
- 101 Déi Lénk (The Left) (12)
- 200 LSAP - Letzebuurger Sozialistesche Arbechterpartei (Luxembourg Socialist Workers Party) (20)
- 300 DP - Demokratesch Partei (Democratic Party) (70)
- 400 CSV - Chrëstlech-Sozial Vollekspartei (Christian Social Party) (60)
- 700 FPL - Fräi Partei Lëtzebuerg (Free Party of Luxembourg) (81) (not mentioned)
- 803 Déi Gréng (The Greens) (50)
- 957 ADR - Alternativ Demokratesch Reformpartei (Alternative Democratic Reform Party) (79)
- 990 Other party (SPONTANEOUS)
- 994 Did not have the legal age to vote at that time (SPONTANEOUS)
- 996 You did not vote in that election (SPONTANEOUS)
- 998 DK
- 999 Inap. not LU (not coded 6 in V6)

Derivation:

Starting with EB69.2 the coding of this variable is basically standardized in accordance with the "ZEUS Party Family Code" which was developed for the "Mannheim Eurobarometer Trend File" (GESIS study ZA3521). The standard is based on a three digit coding. The first digit represents the party family and is consistent across countries. The second and third digits identify the individual party within this family and are country-specific (not comparable across countries). The assignment of parties to families is done according to their OVERALL ideological orientations. Nevertheless the consistency of party coding over time is maintained with priority. Former standard party codes as applied for archive dataset editions up to Eurobarometer 56.3 are reported in brackets, if applicable.

The slightly modified ZEUS Party Family Codes are: The ZEUS Party Family codes are: (001-099) Not-assigned; (100-199) Communists; (200-299) Socialists; (300-399) Liberals; (400-499) Christian-Democrats; (500-599) Conservatives; (600-699) Extreme Right / Nationalists; (700-799) Regionalists, Ethnic parties (modified); (800-899) Environmental Parties; (900-949) Agricultural Parties; (950-979) Independent candidates, special issue parties or splinter groups (modified); (980-989) electoral alliances across party family groups (new). Codes 990-999 contain the response "Other party" and various missing value responses. Users may modify these codings or part of these codings in order to suit their needs such as possible alternative ideological party classifications.

v291 - QA25 VOTING BEHAVIOUR LAST NAT ELECTIONS - PORTUGAL

Q.A25

ASK Q.A25 TO Q.A27 ONLY in EU27 - OTHERS GO TO Q.B

Which party did you vote for in the last parliamentary elections in (OUR COUNTRY) in (DATE – ADAPT TO YOUR COUNTRY)?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

Q.A25_PT

Last vote (national elections): Portugal

9 MPT - Partido da Terra (Earth Party) (90)

13 PH - Partido Humanista (The Humanist Party)

100 CDU (PCP-PEV) - Coligação Democrática Unitária (Partido Comunista Português-Partido Ecologista "Os Verdes") (Democratic Unity Coalition (Portuguese Communist Party-Ecologist Party "The Greens")) (10)

105 BE - Bloco de Esquerda (Left Bloc) (11)

106 BE - Bloco de Esquerda (Left Bloc) (11)

154 PCTP/MRPP - Partido Comunista dos Trabalhadores Portugueses (Communist Party of Portuguese Workers) (17)

157 POUS - Partido Operário de Unidade Socialista (Workers Party of Socialist Unity) (6)

200 PS - Partido Socialista Portuguesa (Socialist Party) (20)

201 CDS-PP -Centro Democrático e Social / Partido Popular (The Democratic and Social Centre - People's Party) (60)

300 PPD/PSD - Partido Social Democrata (Social Democratic Party) (30)

601 PNR - Partido Nacional Renovador (The National Renovator Party) (82) (not mentioned)

712 PDA - Partido Democrático do Atlântico (The Democratic Party of the Atlantic) (90)

950 PND - Partida da Nova Democracia (New Democracy Party) (not mentioned)

990 Other party (SPONTANEOUS)

994 Did not have the legal age to vote at that time (SPONTANEOUS)

996 You did not vote in that election (SPONTANEOUS)

998 DK

999 Inap. not PT (not coded 13 in V6)

Derivation:

Starting with EB69.2 the coding of this variable is basically standardized in accordance with the "ZEUS Party Family Code" which was developed for the "Mannheim Eurobarometer Trend File" (GESIS study ZA3521). The standard is based on a three digit coding. The first digit represents the party family and is consistent across countries. The second and third digits identify the individual party within this family and are country-specific (not comparable across countries). The assignment of parties to families is done according to their OVERALL ideological orientations. Nevertheless the consistency of party coding over time is maintained with priority. Former standard party codes as applied for archive dataset editions up to Eurobarometer 56.3 are reported in brackets, if applicable.

The slightly modified ZEUS Party Family Codes are: The ZEUS Party Family codes are: (001-099) Not-assigned; (100-199) Communists; (200-299) Socialists; (300-399) Liberals; (400-499) Christian-Democrats; (500-599) Conservatives; (600-699) Extreme Right / Nationalists; (700-799) Regionalists, Ethnic parties (modified); (800-899) Environmental Parties; (900-949) Agricultural Parties; (950-979) Independent candidates, special issue parties or splinter groups (modified); (980-989) electoral alliances across party family groups (new). Codes 990-999 contain the response "Other party" and various missing value responses. Users may modify these codings or part of these codings in order to suit their needs such as possible alternative ideological party classifications.

Note:

Please notice that two separate codes are attributed to "Bloco de Esquerda" (BE) due to double nomination in the field questionnaire and report. Code '105' represents questionnaire code '5', code '106' represents questionnaire code '13'.

- 600 EIP - Eesti Iseseisvuspartei (Estonian Independence Party)
- 700 VEE - Vene Erakond Eestis (Russian Party in Estonia)
- 800 EER - Erakond Eestimaa Rohelised (Estonian Greens)
- 900 ERL - Eestimaa Rahvaliid (People's Union of Estonia)
- 950 Independent candidates
- 990 Other party (SPONTANEOUS)
- 994 Did not have the legal age to vote at that time (SPONTANEOUS)
- 996 You did not vote in that election (SPONTANEOUS)
- 998 DK
- 999 Inap. not EE (not coded 21 in V6)

Derivation:

Starting with EB69.2 the coding of this variable is basically standardized in accordance with the "ZEUS Party Family Code" which was developed for the "Mannheim Eurobarometer Trend File" (GESIS study ZA3521). The standard is based on a three digit coding. The first digit represents the party family and is consistent across countries. The second and third digits identify the individual party within this family and are country-specific (not comparable across countries). The assignment of parties to families is done according to their OVERALL ideological orientations. Nevertheless the consistency of party coding over time is maintained with priority. Former standard party codes as applied for archive dataset editions up to Eurobarometer 56.3 are reported in brackets, if applicable.

The slightly modified ZEUS Party Family Codes are: The ZEUS Party Family codes are: (001-099) Not-assigned; (100-199) Communists; (200-299) Socialists; (300-399) Liberals; (400-499) Christian-Democrats; (500-599) Conservatives; (600-699) Extreme Right / Nationalists; (700-799) Regionalists, Ethnic parties (modified); (800-899) Environmental Parties; (900-949) Agricultural Parties; (950-979) Independent candidates, special issue parties or splinter groups (modified); (980-989) electoral alliances across party family groups (new). Codes 990-999 contain the response "Other party" and various missing value responses. Users may modify these codings or part of these codings in order to suit their needs such as possible alternative ideological party classifications.

Last vote (national elections): Slovenia

- 200 SD (ZLSD) - Socialni Demokrati / Združena lista socialnih demokratov (Social Democrats / former United List of Social Democrats)
- 300 LDS - Liberalna Demokracija Slovenije (Liberal Democracy of Slovenia)
- 301 ZARES - Zares "nova politika" (Party 'For Real' "New Politics")
- 400 N.Si - Nova Slovenija - Krščanska Ljudska Stranka (New Slovenia - Christian People's Party)
- 500 SDS - Slovenska Demokratska Stranka (Slovenian Democratic Party)
- 501 SLS - Slovenska Ljudska Stranka (Slovenian People's Party)
- 600 SNS - Slovenska Nacionalna Stranka (Slovene National Party)
- 601 LIPA (Party Lime Tree)
- 950 DeSUS - Demokratska Stranka Upokojencev Slovenij (Democratic Party of Retired Persons of Slovenia)
- 990 Other party (SPONTANEOUS)
- 994 Did not have the legal age to vote at that time (SPONTANEOUS)
- 996 You did not vote in that election (SPONTANEOUS)
- 998 DK
- 999 Inap. not SI (not coded 28 in V6)

Derivation:

Starting with EB69.2 the coding of this variable is basically standardized in accordance with the "ZEUS Party Family Code" which was developed for the "Mannheim Eurobarometer Trend File" (GESIS study ZA3521). The standard is based on a three digit coding. The first digit represents the party family and is consistent across countries. The second and third digits identify the individual party within this family and are country-specific (not comparable across countries). The assignment of parties to families is done according to their OVERALL ideological orientations. Nevertheless the consistency of party coding over time is maintained with priority. Former standard party codes as applied for archive dataset editions up to Eurobarometer 56.3 are reported in brackets, if applicable.

The slightly modified ZEUS Party Family Codes are: The ZEUS Party Family codes are: (001-099) Not-assigned; (100-199) Communists; (200-299) Socialists; (300-399) Liberals; (400-499) Christian-Democrats; (500-599) Conservatives; (600-699) Extreme Right / Nationalists; (700-799) Regionalists, Ethnic parties (modified); (800-899) Environmental Parties; (900-949) Agricultural Parties; (950-979) Independent candidates, special issue parties or splinter groups (modified); (980-989) electoral alliances across party family groups (new). Codes 990-999 contain the response "Other party" and various missing value responses. Users may modify these codings or part of these codings in order to suit their needs such as possible alternative ideological party classifications.

701 Partida Romilor "Pro- Europa" (Party of the Roma)
800 PER - Partidul Ecologist Român (Romanian Ecologist Party)
990 Other party (SPONTANEOUS)
994 Did not have the legal age to vote at that time (SPONTANEOUS)

Derivation:

This additional variable merges data for all countries in accordance with former Eurobarometer archive dataset editions.

Note:

See Q.A25 (V279 to V306) for complete question text and further information.

Belgium (V280): Note: Political parties originally coded '12' and '13' are not further specified. Corresponding responses (n=5) have been recoded to answer category "Other" (990).

Germany (V282): For meaningful results this variable needs to be weighted by W3 WEIGHT GERMANY (V12) or be used for West and East Germany separately.

Great Britain (V287)/Northern Ireland (V288): Note: Only one national field questionnaire is provided for the United Kingdom, including equally parties from Great Britain and Northern Ireland.

Portugal (V291): Please notice that two separate codes are attributed to "Bloco de Esquerda" (BE) due to double nomination in the field questionnaire and report. Code '105' represents questionnaire code '5', code '106' represents questionnaire code '13'.

Last trend: EB69.2, D.54

v307 by v7, Absolute Values (Row Percent), weighted by v8

v308 - QA26 PARTY ATTACHMENT - WHICH PARTY - FRANCE

ASK Q.A25 TO Q.A27 ONLY in EU27

Q.A26

To which of the following political parties do you feel the closest to or the least furthest from?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

Q.A26_FR

Party attachment (national): France

- 100 PCF - Parti Communiste Français (Communist Party) (10)
- 101 LO - Liste Lutte Ouvrière (d'Arlette Laguiller) (Workers Struggle) (5)
- 102 NPA - Liste du Nouveau Parti Anticapitaliste d'Olivier Besancenot (New Anticapitalist Party)
- 200 PS - Liste du Parti Socialiste (Socialist Party) (20)
- 300 PRG - Parti Radical de gauche (Radical Party of the Left) (30)
- 304 MoDem - Liste du MoDem (Mouvement démocrate de François Bayrou) (Democratic Movement by François Bayrou) (40)
- 403 UMP - Union pour un Mouvement Populaire (Union for a Popular Movement) (62)
- 406 NC - Le Nouveau Centre (d'Hervé Morin) (New Centre) (63)
- 506 MPF - Mouvement pour la France (de Philippe de Villiers) (Movement for France) (69)
- 600 FN - Front National (de Jean-Marie Le Pen) (National Front) (80)
- 801 Les Verts (The Greens) (50)
- 804 Un autre mouvement écologiste (Génération-écologie, Mouvement Écologiste Indépendant) (Other ecological movement (Ecology Generation, Independent Ecological Movement))
- 990 Other party (SPONTANEOUS)
- 998 DK
- 999 Inap. not FR (not coded 1 in V6)

Derivation:

Starting with EB69.2 the coding of this variable is basically standardized in accordance with the "ZEUS Party Family Code" which was developed for the "Mannheim Eurobarometer Trend File" (GESIS study ZA3521). The standard is based on a three digit coding. The first digit represents the party family and is consistent across countries. The second and third digits identify the individual party within this family and are country-specific (not comparable across countries). The assignment of parties to families is done according to their OVERALL ideological orientations. Nevertheless the consistency of party coding over time is maintained with priority. Former standard party codes as applied for archive dataset editions up to Eurobarometer 56.3 are reported in brackets, if applicable.

The slightly modified ZEUS Party Family Codes are: The ZEUS Party Family codes are: (001-099) Not-assigned; (100-199) Communists; (200-299) Socialists; (300-399) Liberals; (400-499) Christian-Democrats; (500-599) Conservatives; (600-699) Extreme Right / Nationalists; (700-799) Regionalists, Ethnic parties (modified); (800-899) Environmental Parties; (900-949) Agricultural Parties; (950-979) Independent candidates, special issue parties or splinter groups (modified); (980-989) electoral alliances across party family groups (new). Codes 990-999 contain the response "Other party" and various missing value responses. Users may modify these codings or part of these codings in order to suit their needs such as possible alternative ideological party classifications.

Note:

- 995 None (SPONTANEOUS)
- 998 DK
- 999 Inap. not DK (not coded 7 in V6)

Derivation:

Starting with EB69.2 the coding of this variable is basically standardized in accordance with the "ZEUS Party Family Code" which was developed for the "Mannheim Eurobarometer Trend File" (GESIS study ZA3521). The standard is based on a three digit coding. The first digit represents the party family and is consistent across countries. The second and third digits identify the individual party within this family and are country-specific (not comparable across countries). The assignment of parties to families is done according to their OVERALL ideological orientations. Nevertheless the consistency of party coding over time is maintained with priority. Former standard party codes as applied for archive dataset editions up to Eurobarometer 56.3 are reported in brackets, if applicable.

The slightly modified ZEUS Party Family Codes are: The ZEUS Party Family codes are: (001-099) Not-assigned; (100-199) Communists; (200-299) Socialists; (300-399) Liberals; (400-499) Christian-Democrats; (500-599) Conservatives; (600-699) Extreme Right / Nationalists; (700-799) Regionalists, Ethnic parties (modified); (800-899) Environmental Parties; (900-949) Agricultural Parties; (950-979) Independent candidates, special issue parties or splinter groups (modified); (980-989) electoral alliances across party family groups (new). Codes 990-999 contain the response "Other party" and various missing value responses. Users may modify these codings or part of these codings in order to suit their needs such as possible alternative ideological party classifications.

- 900 KESK - Suomen Keskusta (Centre Party) (60)
- 950 Suomen Senioripuolue (Finnish Senior Citizens Party)
- 990 Other party (SPONTANEOUS)
- 995 None (SPONTANEOUS)
- 998 DK
- 999 Inap. not FI (not coded 16 in V6)

Derivation:

Starting with EB69.2 the coding of this variable is basically standardized in accordance with the "ZEUS Party Family Code" which was developed for the "Mannheim Eurobarometer Trend File" (GESIS study ZA3521). The standard is based on a three digit coding. The first digit represents the party family and is consistent across countries. The second and third digits identify the individual party within this family and are country-specific (not comparable across countries). The assignment of parties to families is done according to their OVERALL ideological orientations. Nevertheless the consistency of party coding over time is maintained with priority. Former standard party codes as applied for archive dataset editions up to Eurobarometer 56.3 are reported in brackets, if applicable.

The slightly modified ZEUS Party Family Codes are: The ZEUS Party Family codes are: (001-099) Not-assigned; (100-199) Communists; (200-299) Socialists; (300-399) Liberals; (400-499) Christian-Democrats; (500-599) Conservatives; (600-699) Extreme Right / Nationalists; (700-799) Regionalists, Ethnic parties (modified); (800-899) Environmental Parties; (900-949) Agricultural Parties; (950-979) Independent candidates, special issue parties or splinter groups (modified); (980-989) electoral alliances across party family groups (new). Codes 990-999 contain the response "Other party" and various missing value responses. Users may modify these codings or part of these codings in order to suit their needs such as possible alternative ideological party classifications.

200 LSDSP - Latvijas Sociāldemokrātiskā Strādnieku partija (Latvian Social Democratic Workers' Party)

201 SC - Saskaņas Centrs (The Harmony Centre)

305 SCP - Sabiedrība citai politikai (Society for Other Politics)

400 LPP/LC - Latvijas Pirmās partijas / Partijas „Latvijas Ceļš” (Latvia's First Party / Latvia's Way)

500 TP - Tautas Partija (The People's Party)

501 JL - Jaunais Laiks (New Era)

502 PS - Pilsoniskā Savienība (Civic Union)

600 TB/LNNK - „Tēvzemei un Brīvībai”/LNNK (For Fatherland and Freedom)

602 VL - Visu Latvijai (All For Latvia)

700 PCTVL - Par cilvēka tiesībām vienotā Latvijā (For Human Rights in United Latvia)

800 ZZS - Zaļo un Zemnieku Savienība (Union of Greens and Farmers)

995 None (SPONTANEOUS)

998 DK

999 Inap. not LV (not coded 23 in V6)

Derivation:

Starting with EB69.2 the coding of this variable is basically standardized in accordance with the “ZEUS Party Family Code” which was developed for the “Mannheim Eurobarometer Trend File” (GESIS study ZA3521). The standard is based on a three digit coding. The first digit represents the party family and is consistent across countries. The second and third digits identify the individual party within this family and are country-specific (not comparable across countries). The assignment of parties to families is done according to their OVERALL ideological orientations. Nevertheless the consistency of party coding over time is maintained with priority. Former standard party codes as applied for archive dataset editions up to Eurobarometer 56.3 are reported in brackets, if applicable.

The slightly modified ZEUS Party Family Codes are: The ZEUS Party Family codes are: (001-099) Not-assigned; (100-199) Communists; (200-299) Socialists; (300-399) Liberals; (400-499) Christian-Democrats; (500-599) Conservatives; (600-699) Extreme Right / Nationalists; (700-799) Regionalists, Ethnic parties (modified); (800-899) Environmental Parties; (900-949) Agricultural Parties; (950-979) Independent candidates, special issue parties or splinter groups (modified); (980-989) electoral alliances across party family groups (new). Codes 990-999 contain the response “Other party” and various missing value responses. Users may modify these codings or part of these codings in order to suit their needs such as possible alternative ideological party classifications.

- 990 Other party (SPONTANEOUS)
- 995 None (SPONTANEOUS)
- 998 DK
- 999 Inap. not RO (not coded 30 in V6)

Derivation:

Starting with EB69.2 the coding of this variable is basically standardized in accordance with the "ZEUS Party Family Code" which was developed for the "Mannheim Eurobarometer Trend File" (GESIS study ZA3521). The standard is based on a three digit coding. The first digit represents the party family and is consistent across countries. The second and third digits identify the individual party within this family and are country-specific (not comparable across countries). The assignment of parties to families is done according to their OVERALL ideological orientations. Nevertheless the consistency of party coding over time is maintained with priority. Former standard party codes as applied for archive dataset editions up to Eurobarometer 56.3 are reported in brackets, if applicable.

The slightly modified ZEUS Party Family Codes are: The ZEUS Party Family codes are: (001-099) Not-assigned; (100-199) Communists; (200-299) Socialists; (300-399) Liberals; (400-499) Christian-Democrats; (500-599) Conservatives; (600-699) Extreme Right / Nationalists; (700-799) Regionalists, Ethnic parties (modified); (800-899) Environmental Parties; (900-949) Agricultural Parties; (950-979) Independent candidates, special issue parties or splinter groups (modified); (980-989) electoral alliances across party family groups (new). Codes 990-999 contain the response "Other party" and various missing value responses. Users may modify these codings or part of these codings in order to suit their needs such as possible alternative ideological party classifications.

Note:

Last trend modified: EB69.2, D.2

- 700 UDMR - Uniunea Democrată a Maghiarilor din România (Democratic Union of Hungarians in Romania)
- 800 PER - Partidul Ecologist Român (Romanian Ecologist Party)
- 990 Other party (SPONTANEOUS)
- 995 None (SPONTANEOUS)

Derivation:

This additional variable merges data for all countries in accordance with former Eurobarometer archive dataset editions.

Note:

See Q.A26 (V308 to V335) for complete question text and further information.

Germany (V311): For meaningful results this variable needs to be weighted by W3 WEIGHT GERMANY (V12) or be used for West and East Germany separately.

Great Britain (V316)/Northern Ireland (V317): Note: Only one national field questionnaire is provided for the United Kingdom, including equally parties from Great Britain and Northern Ireland.

Last trend modified: EB69.2, D.2

v337 - QA27 PARTY ATTACHMENT EU ISSUES - WHICH PARTY - FRANCE

ASK Q.A25 TO Q.A27 ONLY in EU27

Q.A27

On European issues, to which of the following political parties do you feel the closest to or the least furthest from?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

Q.A27_FR

Party attachment (European): France

- 100 PCF - Parti Communiste Français (Communist Party) (10)
- 101 LO - Liste Lutte Ouvrière (d'Arlette Laguiller) (Workers Struggle) (5)
- 102 NPA - Liste du Nouveau Parti Anticapitaliste d'Olivier Besancenot (New Anticapitalist Party)
- 200 PS - Liste du Parti Socialiste (Socialist Party) (20)
- 300 PRG - Parti Radical de gauche (Radical Party of the Left) (30)
- 304 MoDem - Liste du MoDem (Mouvement démocrate de François Bayrou) (Democratic Movement by François Bayrou) (40)
- 403 UMP - Union pour un Mouvement Populaire (Union for a Popular Movement) (62)
- 406 NC - Le Nouveau Centre (d'Hervé Morin) (New Centre) (63)
- 506 MPF - Mouvement pour la France (de Philippe de Villiers) (Movement for France) (69)
- 600 FN - Front National (de Jean-Marie Le Pen) (National Front) (80)
- 801 Les Verts (The Greens) (50)
- 804 Un autre mouvement écologiste (Génération-écologie, Mouvement Écologiste Indépendant) (Other ecological movement (Ecology Generation, Independent Ecological Movement))
- 990 Other party (SPONTANEOUS)
- 998 DK
- 999 Inap. not FR (not coded 1 in V6)

Derivation:

Starting with EB69.2 the coding of this variable is basically standardized in accordance with the "ZEUS Party Family Code" which was developed for the "Mannheim Eurobarometer Trend File" (GESIS study ZA3521). The standard is based on a three digit coding. The first digit represents the party family and is consistent across countries. The second and third digits identify the individual party within this family and are country-specific (not comparable across countries). The assignment of parties to families is done according to their OVERALL ideological orientations. Nevertheless the consistency of party coding over time is maintained with priority. Former standard party codes as applied for archive dataset editions up to Eurobarometer 56.3 are reported in brackets, if applicable.

The slightly modified ZEUS Party Family Codes are: The ZEUS Party Family codes are: (001-099) Not-assigned; (100-199) Communists; (200-299) Socialists; (300-399) Liberals; (400-499) Christian-Democrats; (500-599) Conservatives; (600-699) Extreme Right / Nationalists; (700-799) Regionalists, Ethnic parties (modified); (800-899) Environmental Parties; (900-949) Agricultural Parties; (950-979) Independent candidates, special issue parties or splinter groups (modified); (980-989) electoral alliances across party family groups (new). Codes 990-999 contain the response "Other party" and various missing value responses. Users may modify these codings or part of these codings in order to suit their needs such as possible alternative ideological party classifications.

- 999 Inap. not BE (not coded 2 in V6)

Derivation:

Starting with EB69.2 the coding of this variable is basically standardized in accordance with the "ZEUS Party Family Code" which was developed for the "Mannheim Eurobarometer Trend File" (GESIS study ZA3521). The standard is based on a three digit coding. The first digit represents the party family and is consistent across countries. The second and third digits identify the individual party within this family and are country-specific (not comparable across countries). The assignment of parties to families is done according to their OVERALL ideological orientations. Nevertheless the consistency of party coding over time is maintained with priority. Former standard party codes as applied for archive dataset editions up to Eurobarometer 56.3 are reported in brackets, if applicable.

The slightly modified ZEUS Party Family Codes are: The ZEUS Party Family codes are: (001-099) Not-assigned; (100-199) Communists; (200-299) Socialists; (300-399) Liberals; (400-499) Christian-Democrats; (500-599) Conservatives; (600-699) Extreme Right / Nationalists; (700-799) Regionalists, Ethnic parties (modified); (800-899) Environmental Parties; (900-949) Agricultural Parties; (950-979) Independent candidates, special issue parties or splinter groups (modified); (980-989) electoral alliances across party family groups (new). Codes 990-999 contain the response "Other party" and various missing value responses. Users may modify these codings or part of these codings in order to suit their needs such as possible alternative ideological party classifications.

v346 - QA27 PARTY ATTACHMENT EU ISSUES - WHICH PARTY - NORTHERN IRELAND

ASK Q.A25 TO Q.A27 ONLY in EU27

Q.A27

On European issues, to which of the following political parties do you feel the closest to or the least furthest from?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

Q.A27_GB-NIR

Party attachment (European): Northern Ireland

- 100 SF - Sinn Fein (81)
- 200 Labour - The Labour Party (20)
- 201 SDLP - Social Democratic and Labour Party (15/30)
- 301 LD - The Liberal Democrats (40)
- 500 Conservatives - The Conservative Party (60)
- 700 UUP - Ulster Unionist Party (61)
- 701 DUP - Democratic Unionist Party (62)
- 800 Greens - The Green Party (51)
- 990 Other (SPONTANEOUS)
- 995 None (SPONTANEOUS)
- 998 DK
- 999 Inap. not GB-NIR (not coded 10 in V6)

Derivation:

Starting with EB69.2 the coding of this variable is basically standardized in accordance with the "ZEUS Party Family Code" which was developed for the "Mannheim Eurobarometer Trend File" (GESIS study ZA3521). The standard is based on a three digit coding. The first digit represents the party family and is consistent across countries. The second and third digits identify the individual party within this family and are country-specific (not comparable across countries). The assignment of parties to families is done according to their OVERALL ideological orientations. Nevertheless the consistency of party coding over time is maintained with priority. Former standard party codes as applied for archive dataset editions up to Eurobarometer 56.3 are reported in brackets, if applicable.

The slightly modified ZEUS Party Family Codes are: The ZEUS Party Family codes are: (001-099) Not-assigned; (100-199) Communists; (200-299) Socialists; (300-399) Liberals; (400-499) Christian-Democrats; (500-599) Conservatives; (600-699) Extreme Right / Nationalists; (700-799) Regionalists, Ethnic parties (modified); (800-899) Environmental Parties; (900-949) Agricultural Parties; (950-979) Independent candidates, special issue parties or splinter groups (modified); (980-989) electoral alliances across party family groups (new). Codes 990-999 contain the response "Other party" and various missing value responses. Users may modify these codings or part of these codings in order to suit their needs such as possible alternative ideological party classifications.

Note:

Only one national field questionnaire is provided for the United Kingdom, including equally parties from Great Britain and Northern Ireland.

- 995 None (SPONTANEOUS)
- 998 DK
- 999 Inap. not AT (not coded 18 in V6)

Derivation:

Starting with EB69.2 the coding of this variable is basically standardized in accordance with the "ZEUS Party Family Code" which was developed for the "Mannheim Eurobarometer Trend File" (GESIS study ZA3521). The standard is based on a three digit coding. The first digit represents the party family and is consistent across countries. The second and third digits identify the individual party within this family and are country-specific (not comparable across countries). The assignment of parties to families is done according to their OVERALL ideological orientations. Nevertheless the consistency of party coding over time is maintained with priority. Former standard party codes as applied for archive dataset editions up to Eurobarometer 56.3 are reported in brackets, if applicable.

The slightly modified ZEUS Party Family Codes are: The ZEUS Party Family codes are: (001-099) Not-assigned; (100-199) Communists; (200-299) Socialists; (300-399) Liberals; (400-499) Christian-Democrats; (500-599) Conservatives; (600-699) Extreme Right / Nationalists; (700-799) Regionalists, Ethnic parties (modified); (800-899) Environmental Parties; (900-949) Agricultural Parties; (950-979) Independent candidates, special issue parties or splinter groups (modified); (980-989) electoral alliances across party family groups (new). Codes 990-999 contain the response "Other party" and various missing value responses. Users may modify these codings or part of these codings in order to suit their needs such as possible alternative ideological party classifications.

v359 - QA27 PARTY ATTACHMENT EU ISSUES - WHICH PARTY - MALTA

ASK Q.A25 TO Q.A27 ONLY in EU27

Q.A27

On European issues, to which of the following political parties do you feel the closest to or the least furthest from?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

Q.A27_MT

Party attachment (European): Malta

- 200 MLP - Partit Laburista (Malta Labour Party)
- 400 PN - Partit Nazzjonalista (Nationalist Party)
- 600 AN - Azzjoni Nazzjonali (National Action) (not mentioned)
- 800 AD - Alternattiva Demokratika (Democratic Alternative)
- 995 None (SPONTANEOUS)
- 998 DK
- 999 Inap. not MT (not coded 25 in V6)

Derivation:

Starting with EB69.2 the coding of this variable is basically standardized in accordance with the "ZEUS Party Family Code" which was developed for the "Mannheim Eurobarometer Trend File" (GESIS study ZA3521). The standard is based on a three digit coding. The first digit represents the party family and is consistent across countries. The second and third digits identify the individual party within this family and are country-specific (not comparable across countries). The assignment of parties to families is done according to their OVERALL ideological orientations. Nevertheless the consistency of party coding over time is maintained with priority. Former standard party codes as applied for archive dataset editions up to Eurobarometer 56.3 are reported in brackets, if applicable.

The slightly modified ZEUS Party Family Codes are: The ZEUS Party Family codes are: (001-099) Not-assigned; (100-199) Communists; (200-299) Socialists; (300-399) Liberals; (400-499) Christian-Democrats; (500-599) Conservatives; (600-699) Extreme Right / Nationalists; (700-799) Regionalists, Ethnic parties (modified); (800-899) Environmental Parties; (900-949) Agricultural Parties; (950-979) Independent candidates, special issue parties or splinter groups (modified); (980-989) electoral alliances across party family groups (new). Codes 990-999 contain the response "Other party" and various missing value responses. Users may modify these codings or part of these codings in order to suit their needs such as possible alternative ideological party classifications.

Derivation:

This additional variable merges data for all countries in accordance with former Eurobarometer archive dataset editions.

Note:

See Q.A27 (V337 to V364) for complete question text and further information.

Germany (V340): For meaningful results this variable needs to be weighted by W3 WEIGHT GERMANY (V12) or be used for West and East Germany separately.

Great Britain (V345)/Northern Ireland (V346): Note Only one national field questionnaire is provided for the United Kingdom, including equally parties from Great Britain and Northern Ireland.

Portugal (V349): Please notice that two separate codes are attributed to "Bloco de Esquerda" (BE) due to double nomination in the field questionnaire and report. Code '105' represents questionnaire code '5', code '106' represents questionnaire code '13'.

v365 by v7, Absolute Values (Row Percent), weighted by v8

v409 - QC3 EUROPEAN ELECTIONS - VOTE INTENTION

ASK Q.C TO ALL IN EU27

Q.C3

Can you tell me on a scale of 1 to 10 how likely it is that you would vote in the next European elections in June 2009? Please place yourself at a point on this scale where '1' indicates that you would "definitely not vote", '10' indicates that you would "definitely vote" and the remaining numbers indicates something in between these two positions.

(SHOW CARD)

- 1 Box 1 - Definitely would not vote
- 2 Box 2
- 3 Box 3
- 4 Box 4
- 5 Box 5
- 6 Box 6
- 7 Box 7
- 8 Box 8
- 9 Box 9
- 10 Box 10 - Would definitely vote
- 11 DK
- 99 Inap. not EU27 (not coded 1 to 30 in V6)

v411 - QC4A EUROP ELECTIONS VOTE - OTHER CRITERIA

ASK Q.C TO ALL IN EU27

[Q.C4A

Among the following criteria, can you tell what would be the main element in your decision in view of the European elections? Firstly?]

Q.C4AO

ASK Q.C4AO ONLY IF "OTHER", CODE 9 IN Q.C4A - OTHERS GO TO Q.C4B

Which other?

(WRITE DOWN - CODE AT THE OFFICE - ONE ANSWER ONLY)

- 1 Other 1
- 2 Other 2
- 3 Other 3
- 4 Other 4
- 5 Other 5
- 6 Other 6
- 7 Other 7
- 8 Other 8
- 9 Other 9
- 10 Other 10
- 11 Other 11
- 12 Other 12
- 16 Other 16
- 21 Other 21
- 23 Other 23
- 24 Other 24
- 98 Other 98
- 99 DK

999 Inap. not any other in Q.C4A (not coded 9 in V410)

9999 Inap. not EU27 (not coded 1 to 30 in V6)

Note:

Answers are not further specified.

v422 - QC4B EUROP ELECT VOTE WHICH OTHERS - SUMMARIZED

ASK Q.C TO ALL IN EU27

[Q.C4A

Among the following criteria, can you tell what would be the main element in your decision in view of the European elections? Firstly?

Q.C4B

DO NOT ASK IF CODE 8 OR 10 IN Q.C4A

Any others?]

Q.C4BO

ASK Q.C4BO ONLY IF "OTHER", CODE 9 IN Q.C4B - OTHERS GO TO Q.C5

Which other(s)?

(WRITE DOWN - CODE AT THE OFFICE - MAX. 3 ANSWERS)

- 1 One other item mentioned
- 2 Two other items mentioned
- 8 DK
- 9 Inap. not any others in Q.C4B (not coded 1 in V420)
- 99 Inap. not EU27 (not coded 1 to 30 in V6)

Derivation:

This variable summarizes the number of other answers given by the respondent. The answers are not further specified.

Note:

Variable generated by the Archive.

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v430 - QC4AB EUROP ELECT VOTE: NONE

Q.C4AB Main element in decision in European elections in total

Q.C4AB_8 None (SPONTANEOUS)

0 Not mentioned

1 Mentioned

9 Inap. not EU27 (not coded 1 to 30 in V6)

Derivation:

This variable summarizes responses to this item in Q.C4A (V410) and Q.C4B (V412 to V420).

Note:

See Q.C4A to Q.C4B for complete question text. Variables summarize answers to Q.C4A (V410) and Q.C4B (V412 TO V420), except for category '9' (DK) (V432).

v459 - QC6B EUROP ELEC CAMP WHICH OTHERS - SUMMARIZED

ASK Q.C ONLY IN EU27

[Q.C6A

For you, among the following themes, which are the ones that the electoral campaign for the next European elections should concentrate on?

Firstly?

Q.C6B

DO NOT ASK IF CODE 17 OR 19 IN Q.C6A

Any others?]

Q.C6BO

ASK Q.C6BO ONLY IF "OTHER", CODE 18 IN Q.C6B - OTHERS GO TO Q.D1

Which other(s)?

(WRITE DOWN - CODE AT THE OFFICE - MAX. 5 ANSWERS)

1 One other item mentioned

2 Two other items mentioned

8 DK

9 Inap. not any others in Q.C6B (not coded 1 in V457)

99 Inap. not EU27 (not coded 1 to 30 in V6)

Derivation:

This variable summarizes the number of other answers given by the respondent. The answers are not further specified.

Note:

Variable generated by the Archive.

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

9 Inap. not EU27 (not coded 1 to 30 in V6)

Derivation:

This variable summarizes responses to this item in Q.C6A (V438) and Q.C6B (V440 TO V457).

Note:

See Q.C6A to Q.C6B for complete question text. Variables summarize answers to Q.C6A (V438) and Q.C6B (V440 TO V457), except for category '19' (DK) (V478).

v477 - QC6AB EUROP ELEC CAMP: OTHER

Q.C6AB Themes for next European elections in total

Q.C6AB_18 Other (SPONTANEOUS - SPECIFY)

0 Not mentioned

1 Mentioned

9 Inap. not EU27 (not coded 1 to 30 in V6)

Derivation:

This variable summarizes responses to this item in Q.C6A (V438) and Q.C6B (V440 TO V457).

Note:

See Q.C6A to Q.C6B for complete question text. Variables summarize answers to Q.C6A (V438) and Q.C6B (V440 TO V457), except for category '19' (DK) (V478).

v478 - QC6AB EUROP ELEC CAMP: DK (QC6A ONLY)

Q.C6AB Themes for next European elections in total

Q.C6AB_19 DK (Q.C6A only)

0 Not mentioned

1 Mentioned

9 Inap. not EU27 (not coded 1 to 30 in V6)

Derivation:

This variable repeats responses to this item in Q.C6A (V438).

Note:

See Q.C6A to Q.C6B for complete question text. Variable repeats answers to category '19' (DK) in Q.C6A (V438), while all other answers to Q.C6A are summarized with Q.C6B (V440 TO V457) in variables V460 to V477.

Data on voting behaviour in the latest European Elections (D.53a-c) and last national parliamentary elections (D.54) have been provided and released with delay. The corresponding variables have subsequently been added at the end of the dataset (V279 to V365) irrespective of the questionnaire structure.

v497 - QD9 CRISIS MSRS: EU SUPERVISION IF PUBLIC MONEY

ASK ALL IN EU27

Q.D9

Certain measures intended to combat the current economic and financial crisis are currently being discussed within the European institutions.

For each of these measures, could you tell me whether you think that it would be effective or ineffective in combating the crisis?

(SHOW CARD WITH SCALE - ONE ANSWER PER LINE - READ OUT)

Q.D9_4 A supervision by the European Union whenever public money is used to rescue a financial institution

- 1 Very effective
- 2 Fairly effective
- 3 Not very effective
- 4 Not at all effective
- 5 DK
- 9 Inap. not EU27 (not coded 1 to 30 in V6)

v498 - QE1A SERIOUS WORLD PROBLEMS - FIRST

E. CLIMATE CHANGE

Q.E1A

ASK ALL

In your opinion, which of the following do you consider to be the most serious problem currently facing the world as a whole? Firstly?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

- 1 Climate change
- 2 International terrorism
- 3 Poverty, lack of food and drinking water
- 4 The spread of an infectious disease
- 5 A major global economic downturn
- 6 The proliferation of nuclear weapons
- 7 Armed conflicts
- 8 The increasing world population
- 9 None (SPONTANEOUS)
- 10 Other (SPONTANEOUS)
- 11 DK

v499 - QE1A SERIOUS WORLD PROBLEMS - WHICH OTHERS

[Q.E1A

In your opinion, which of the following do you consider to be the most serious problem currently facing the world as a whole? Firstly?]

Q.E1A

ASK Q.E1AO ONLY IF "OTHER", CODE 10 IN Q.E1A - OTHERS GO TO Q.E1B

Which other?

(WRITE DOWN - CODE AT THE OFFICE - ONE ANSWER ONLY)

- 1 Other 1
- 2 Other 2
- 3 Other 3
- 4 Other 4
- 5 Other 5
- 6 Other 6
- 7 Other 7
- 8 Other 8
- 10 Other 10
- 11 Other 11
- 12 Other 12
- 14 Other 14
- 15 Other 15
- 16 Other 16
- 98 Other 98
- 99 DK
- 999 Inap. not any others in Q.E1A (not coded 10 in V498)

Note:

Answers are not further specified.

v510 - QE1B SERIOUS WORLD PROBL WHICH OTHERS - SUMMARIZED

[Q.E1A

In your opinion, which of the following do you consider to be the most serious problem currently facing the world as a whole? Firstly?]

Q.E1B

DO NOT ASK IF CODE 9 OR 11 IN Q.E1A

Any others?]

Q.E1BO

ASK Q.E1BO ONLY IF "OTHER", CODE 9 IN Q.E1BO - OTHERS GO TO Q.E2

Which other(s) ?

(WRITE DOWN - CODE AT THE OFFICE - MAX. 3 ANSWERS)

- 1 One other item mentioned
- 2 Two other items mentioned
- 3 Three other items mentioned
- 8 DK
- 9 Inap. not any others in Q.E1B (not coded 1 in V508)

Derivation:

The answers are not further specified.

Note:

Variable generated by the Archive.

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Last trend (no more split): EB69.2, Q.E1B2O

v511 - QE1AB SERIOUS WORLD PROBLEMS: CLIMATE CHANGE

Q.E1AB Most serious problem currently facing the world as a whole in total

Q.E1AB_1 Climate change

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes responses to this item in Q.E1A (V498) and Q.E1B (V500 TO V508).

Note:

See Q.E1A to Q.E1B for complete question text. Variables summarize answers to Q.E1A (V498) and Q.E1B (V500 TO V508), except for categories '9' (None) (V519) and '11' (DK) (V521).

v518 - QE1AB SERIOUS WORLD PROBLEMS: WRLD POPULATION

Q.E1AB Most serious problem currently facing the world as a whole in total

Q.E1AB_8 The increasing world population

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes responses to this item in Q.E1A (V498) and Q.E1B (V500 TO V508).

Note:

See Q.E1A to Q.E1B for complete question text. Variables summarize answers to Q.E1A (V498) and Q.E1B (V500 TO V508), except for categories '9' (None) (V519) and '11' (DK) (V521).

v519 - QE1AB SERIOUS WORLD PROBLEMS: NONE (QE1A ONLY)

Q.E1AB Most serious problem currently facing the world as a whole in total

Q.E1AB_9 None (Q.E1A only)

0 Not mentioned

1 Mentioned

Derivation:

This variable repeats responses to this item in Q.E1A (V498).

Note:

See Q.E1A to Q.E1B for complete question text. Variable repeats answers to category '9' (None) in Q.E1A (V498), while all other answers to Q.E1A are summarized with Q.E1B (V500 TO V508) in variables V511 to V518 and V520 (except DK (V521)).

v522 - QE2 CLIMATE CHANGE - PERCEPTION

Q.E2

ASK ALL

And how serious a problem do you think climate change is at this moment? Please use a scale from 1 to 10, '1' would mean that it is "not at all a serious problem" and '10' would mean that it is a problem extremely serious".

(SHOW CARD - ONE ANSWER ONLY)

- 1 Box 1 - Not at all a serious problem
- 2 Box 2
- 3 Box 3
- 4 Box 4
- 5 Box 5
- 6 Box 6
- 7 Box 7
- 8 Box 8
- 9 Box 9
- 10 Box 10 - A problem extremely serious
- 11 DK

Note:

Last trend (no more split): EB69.2, Q.E2B

v526 - QE4 CLIMATE CHANGE: UNSTOPPABLE PROCESS

Q.E4

For each of the following statements, please tell me whether you totally agree, tend to agree, tend to disagree or totally disagree.

(SHOW CARD WITH SCALE - ONE ANSWER PER LINE)

(If necessary, explain that CO₂ (carbon dioxide) is a gas generated notably in the combustion of fossil fuels, for example by all types of transport that use hydrocarbons and by industrial plants and power generators using fossil fuels)

(READ OUT - ROTATE ITEMS 1 TO 5)

Q.E4_1 Climate change is an unstoppable process, we cannot do anything about it

- 1 Totally agree
- 2 Tend to agree
- 3 Tend to disagree
- 4 Totally disagree
- 5 DK

v527 - QE4 CLIMATE CHANGE: SERIOUSNESS EXAGGERATED

Q.E4

For each of the following statements, please tell me whether you totally agree, tend to agree, tend to disagree or totally disagree.

(SHOW CARD WITH SCALE - ONE ANSWER PER LINE)

(If necessary, explain that CO₂ (carbon dioxide) is a gas generated notably in the combustion of fossil fuels, for example by all types of transport that use hydrocarbons and by industrial plants and power generators using fossil fuels)

(READ OUT - ROTATE ITEMS 1 TO 5)

Q.E4_2 The seriousness of climate change has been exaggerated

- 1 Totally agree
- 2 Tend to agree
- 3 Tend to disagree
- 4 Totally disagree
- 5 DK

v530 - QE4 CLIMATE CHANGE: USE ALTERNATIVE FUELS

Q.E4

For each of the following statements, please tell me whether you totally agree, tend to agree, tend to disagree or totally disagree.

(SHOW CARD WITH SCALE - ONE ANSWER PER LINE)

(If necessary, explain that CO₂ (carbon dioxide) is a gas generated notably in the combustion of fossil fuels, for example by all types of transport that use hydrocarbons and by industrial plants and power generators using fossil fuels)

(READ OUT - ROTATE ITEMS 1 TO 5)

Q.E4_5 Alternative fuels, such as "bio fuels", should be used to reduce greenhouse gas emissions

- 1 Totally agree
- 2 Tend to agree
- 3 Tend to disagree
- 4 Totally disagree
- 5 DK

v548 - QF2 CHEMICALS RISK PEOPLE: HAIR DYES

ASK Q.F IN EU27

Q.F2

For each of the following product categories please tell me how risky or not do you consider this product category to be for people in (OUR COUNTRY) in general, because of the chemicals present in it. Please use a scale from 1 to 7, where '1' means that you consider that this product is "not at all risky" for people in (OUR COUNTRY), and '7' means that it is "extremely risky".

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE - READ OUT - ROTATE)

v549 - QF2 CHEMICALS RISK PEOPLE: FABRIC

ASK Q.F IN EU27

Q.F2

For each of the following product categories please tell me how risky or not do you consider this product category to be for people in (OUR COUNTRY) in general, because of the chemicals present in it. Please use a scale from 1 to 7, where '1' means that you consider that this product is "not at all risky" for people in (OUR COUNTRY), and '7' means that it is "extremely risky".

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE - READ OUT - ROTATE)

v552 - QF3 CHEMICALS RISK PERSONALLY: HAIR DYES

ASK Q.F IN EU27

Q.F3

And now, thinking about you personally, please tell me how risky or not do you consider each of the following product categories to be for you personally because of the chemicals present in it. Please use a scale from 1 to 7, where '1' means that you consider that this product is "not at all risky" for you personally, and '7' means that it is "extremely risky".

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE - READ OUT - ROTATE)

v555 - QF3 CHEMICALS RISK PERSONALLY: CLEANERS

ASK Q.F IN EU27

Q.F3

And now, thinking about you personally, please tell me how risky or not do you consider each of the following product categories to be for you personally because of the chemicals present in it. Please use a scale from 1 to 7, where '1' means that you consider that this product is "not at all risky" for you personally, and '7' means that it is "extremely risky".

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE - READ OUT - ROTATE)

v558 - QF4 CHEMICALS RISK WORRIED: SUNSCREENS

ASK Q.F IN EU27

Q.F4

To what extent are you worried or not about the potential hazard or risk to your health that may arise from the chemicals present in any of the following product categories you may use? Please use a scale from 1 to 7, where '1' means that you are "not at all worried" (about potential hazards or risk to your health that may arise from the use of any of the following products), and '7' means that you are "extremely worried".

v560 - QF5 CHEMICALS PROTECTION JOB: INDUSTRY

ASK Q.F IN EU27

Q.F5

To what extent do you trust or not each of the following actors in doing a good job to protect consumers from potential health risks from chemicals in consumer products? Please use a scale from 1 to 7, where '1' means that you have "no trust at all" (in this actor in doing a good job to protect consumers from potential health risks from chemicals in consumer products), and '7' means that you have "a great deal of trust".

v561 - QF5 CHEMICALS PROTECTION JOB: GOVERNMENT

ASK Q.F IN EU27

Q.F5

To what extent do you trust or not each of the following actors in doing a good job to protect consumers from potential health risks from chemicals in consumer products? Please use a scale from 1 to 7, where '1' means that you have "no trust at all" (in this actor in doing a good job to protect consumers from potential health risks from chemicals in consumer products), and '7' means that you have "a great deal of trust".

v564 - QF6 CHEMICALS EXPOSURE: SMALL AMOUNT

ASK Q.F IN EU27

Q.F6

Please tell me to what extent do you agree or disagree with each of the following statements regarding the exposure to chemical substances.

Please use a scale from 1 to 7, where '1' means that you "totally disagree" with the statement and '7' means that you "totally agree" with it.

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE - READ OUT - ROTATE)

Q.F6_2 If a person is exposed to an extremely small amount of a chemical that is harmful at larger amounts, then that person will probably be seriously ill some day in the future, even if the amount is extremely small

v588 - QF10 LEGAL RESPONSIBILITY OF PRODUCERS

ASK Q.F IN EU27

Q.F10

Which answer best describes your opinion of the following statement: Personally, do you think that the producer of a consumer product should be held legally responsible and pay damages if someone gets hurt?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

- 1 Always
- 2 Only when the producer was fully aware of potential risks
- 3 Only if the product did not provide clear warnings or instructions for safeuse
- 4 Not at all if the consumer did not follow the product provider warnings or instructions for safe-use
- 5 DK
- 9 Inap. not EU27 (not coded 1 to 30 in V6)

v609 - QF15 CLOTHING HEALTH RISKS: WOOL/COTTON/LINEN

ASK Q.F IN EU27

Q.F15

Please tell me to what extent you think that there is a health risk (such as allergic reactions, etc.) to you personally from chemicals in the following fabrics used in clothing. Please use a scale from 1 to 7, '1' means that you think there is "no health risk at all" to you personally from this fabric and '7' means that there is "a high health risk".

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE - READ OUT - ROTATE)

v612 - QF16 FABRICS HEALTH RISKS - PERS IMPORTANCE

ASK Q.F IN EU27

Q.F16

To what extent would you say that you consider the potential health and environment risks due to fabrics important or not when you buy clothes for yourself or your family? Please use a scale from 1 to 7, where '1' means that it is "not at all important", and '7' means that it is "extremely important".

(SHOW CARD – ONE ANSWER ONLY)

- 1 Box 1 - Not at all important
- 2 Box 2
- 3 Box 3
- 4 Box 4
- 5 Box 5
- 6 Box 6
- 7 Box 7 - Extremely important
- 8 DK
- 9 Inap. not EU27 (not coded 1 to 30 in V6)

v639 - D1 LEFT-RIGHT PLACEMENT - RECODED 3 CAT

D.1R1 Left - right scale (RECODED)

- 1 (1 - 4) Left
- 2 (5 - 6) Centre
- 3 (7 - 10) Right
- 9 DK/Refusal

Derivation:

This variable collapses answers to D.1 into three categories.

Note:

See D.1 for complete question text.

v640 - D1 LEFT-RIGHT PLACEMENT - RECODED 5 CAT

D.1R2 Left - right scale (RECODED)

- 1 (1 - 2) Left
- 2 (3 - 4)
- 3 (5 - 6) Centre
- 4 (7 - 8)
- 5 (9 -10) Right
- 9 DK/Refusal

Derivation:

This variable collapses answers to D.1 into five categories.

Note:

See D.1 for complete question text.

Data on party attachment (D.2) have been provided and released with delay. The corresponding variables have subsequently been added at the end of the dataset (V279 to V365) irrespective of the questionnaire structure.

NO QUESTIONS D.2 TO D.6

v641 - D7 MARITAL STATUS

D.7

Could you give me the letter which corresponds best to your own current situation?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

- 1 Married
- 2 Remarried
- 3 Unmarried, currently living with partner
- 4 Unmarried, having never lived with a partner
- 5 Unmarried, having previously lived with a partner, but now on my own
- 6 Divorced
- 7 Separated
- 8 Widowed
- 9 Other (SPONTANEOUS)
- 97 Refusal (SPONTANEOUS)

Note:

Original code "10" recoded to "97".

Last trend: EB70.1, D.7

v642 - D8 AGE EDUCATION

D.8

How old were you when you stopped full-time education?

(IF "STILL STUDYING", CODE '00' - IF "NO EDUCATION" CODE '01' - IF "REFUSAL" CODE '98' - IF "DK" CODE '99')

0 Refusal

2 2 years

75 75 years

97 No full-time education

98 Still studying

99 DK

Note:

Original code "00" recoded to "98".

Original code "01" recoded to "97".

Original code "98" recoded to "0".

Due to a deviant specification in the coding instruction in the Portuguese field questionnaire data for Portugal have been corrected according to the basic questionnaire.

Actual number is coded.

Last trend: EB70.1, D.8

v643 - D8 AGE EDUCATION - RECODED

D.8R Age when finished full-time education - RECODED

- 1 Up to 14 years
- 2 15 years
- 3 16 years
- 4 17 years
- 5 18 years
- 6 19 years
- 7 20 years
- 8 21 years
- 9 22 years and older
- 10 Still studying
- 97 No full-time education
- 98 DK

Note:

See D.8 for complete question text.

Due to a deviant specification in the coding instruction in the Portuguese field questionnaire data for Portugal have been corrected according to the basic questionnaire.

v645 - D11 AGE EXACT

D.11

How old are you?

15 15 years

98 98 years

Note:

Actual number is coded.

Last trend: EB70.1, D.11

v646 - D11 AGE RECODED - FOUR GROUPS

D.11R1 AGE - RECODED IN FOUR GROUPS

- 1 15 - 24 years
- 2 25 - 39 years
- 3 40 - 54 years
- 4 55 years and older

Derivation:

This variable collapses answers to D.11 into four categories.

Note:

See D.11 for complete question text.

v647 - D11 AGE RECODED - SIX GROUPS

D.11R2 AGE - RECODED IN SIX GROUPS

- 1 15 - 24 years
- 2 25 - 34 years
- 3 35 - 44 years
- 4 45 - 54 years
- 5 55 - 64 years
- 6 65 years and older

Derivation:

This variable collapses answers to D.11 into six categories.

Note:

See D.11 for complete question text.

v655 - D40C HOUSEHOLD COMPOSITION: AGED 10-14

D.40C

Could you tell me how many children aged 10 to 14 years old live in your household?

(READ OUT - WRITE DOWN)

- 0 None
- 1 One
- 2 Two
- 3 Three
- 4 Four
- 6 Six
- 8 Eight
- 9 Nine
- 11 Eleven
- 12 Twelve

Note:

Last trend: EB70.1, D.40C

v658 - D40 HOUSEHOLD COMPOSITION: SIZE A+B+C (REC)

D.40R HOUSEHOLD COMPOSITION: SIZE (A+B+C) (RECODED)

- 1 One
- 2 Two
- 3 Three
- 4 Four
- 5 Five
- 6 Six
- 7 Seven or more

Derivation:

This variable groups the summarized variable V657.

Note:

See V651, V653 and V655 for complete question text.

Generated by the Archive in accordance with former surveys.

v677 - P3 DURATION OF INTERVIEW

P.3 Number of minutes the interview lasted

10 10 minutes

298 298 minutes

Note:

Actual number is coded.

Last trend: EB70.1, P.3

v678 - P3 DURATION OF INTERVIEW - RECODED

P.3R Number of minutes the interview lasted - RECODED

- 1 Up to 14 minutes
- 2 15 - 29 minutes
- 3 30 - 44 minutes
- 4 45 - 59 minutes
- 5 60 - 74 minutes
- 6 75 - 89 minutes
- 7 90 minutes or more

Derivation:

This variable collapses codes in P.3 into seven categories.

v689 - P6 SIZE OF COMMUNITY - UNITED KINGDOM

P.6_GB (Objective) Size of community: United Kingdom

- 1 Rural
- 2 Urban
- 3 Metropolitan
- 99 Inap. not GB (not coded 9 or 10 in V6)

Note:

The original variable integrated data for Northern Ireland (codes 1-2, 6) and Great Britain (codes 3-5). The original categories (value label) were corrected after consultation with TNS OPINION & SOCIAL. In order to facilitate the analysis for the United Kingdom as a whole, identical categories have been combined. For Northern Ireland code 3 ("Metropolitan") has been recoded from code 6 (DK) in accordance with P7 Region I for the United Kingdom (if coded 1 = "Belfast"). In Eurobarometer 62 to 66 "Belfast" is coded as "Urban" together with other communities; former Eurobarometer have different categories for community size in Northern Ireland.

For meaningful results this variable needs to be weighted by W4 WEIGHT UNITED KINGDOM (V10) or be used for Great Britain and Northern Ireland separately.

Last trend: EB70.1, P.6

v689, weighted by v10

Value	Label	Missing	Count	Percent	Valid Percent
1	Rural		218	16.6	16.6

v720 - P7 REGION I - PORTUGAL

P.7_PT Region I

Portugal (EUROSTAT NUTS II LEVEL) - Comissoes de Coordinacao Regional, Regioes Autonomas

- 1 North
- 2 Centre
- 3 Lisboa
- 4 Alentejo
- 5 Algarve
- 99 Inap. not PT (not coded 13 in V6)

Note:

Starting with Eurobarometer 62 the NUTS 2 regions for Portugal have changed. In accordance with the official EUROSTAT NUTS 2 version 2003 the region "Lisboa e vale do Tejo" is split up and the subregion "Lezíria do Tejo" reinstated to the "Alentejo" Region; "Médio Tejo" and "Oeste" are reinstated to the "Centro" region (Centre). Accordingly the regions "Centro" and "Alentejo" do not change names but regional coverage. The regions "Norte" (North) and "Algarve" remain unchanged. Also starting with Eurobarometer 62 the autonomous regions Açores and Madeira are not covered anymore.

v766 - C5 EUROPEAN POLITICAL PARTY PREFERENCE

C.5 EUROPEAN PARTY PARLIAMENTARY PREFERENCE INDEX

- 0 Other answers (Did not have the legal age to vote at that time, Did not vote in that election, Voted blank or invalid, DK)
- 1 EPP - Group of the European People's Party
- 2 S&D - Group of the Progressive Alliance of Socialists and Democrats in the European Parliament
- 3 ALDE - Group of the Alliance of Liberals and Democrats for Europe
- 4 GREENS/EFA - Group of the Greens / European Free Alliance
- 5 ECR - European Conservatives and Reformists Group
- 6 GUE/NGL - Confederal group of the European United Left / Nordic Green Left
- 7 EFD - Europe of Freedom and Democracy Group
- 8 Non-attached
- 9 No clear attribution
- 10 Not represented (other parties)
- 99 Inap. not EU27 (not coded 1 to 30 in V6)

Derivation:

This index is based upon the last vote question Q.A25: "Which party did you vote for in the last parliamentary elections in (OUR COUNTRY) in (DATE – ADAPT TO YOUR COUNTRY)?"

Answers are grouped according to the affiliation of the representatives of the respective party to a group in the European Parliament after the June elections in 2009. The variable is constructed by the Archive mapping the country specific variables V279 to V306 to the party group structure of the 7th EU-Parliament period (2009-2014).

Unlike EUROPEAN PARTY PARLIAMENTARY PREFERENCE INDEX variables up to EB56.3, supporters of parties not represented in the 7th EU-Parliament but represented in former election periods are NOT coded as belonging to the European Parliament group their party has previously been affiliated with. Supporters of parties represented in the European Parliament whose MEPs are not affiliated with any group are labelled "Non-attached", supporters of parties not represented in the European Parliament are labelled "Not represented (other parties)". In some cases "No clear attribution" may be possible.

Different internet resources were used for information on the respective party affiliations (reference date 8th February, 2011):

<http://www.europarl.europa.eu/parliament/archive/staticDisplay.do?language=EN&id=212> (official website of the EP); www.eppgroup.eu; www.socialistsanddemocrats.eu; www.alde.eu; www.greens-efa.org; www.ecrgroup.eu; www.guengl.eu; www.efdgroupp.eu.
