Acknowledgements

Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences.

Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (<http://zacat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

1.2 Content

1.2.1 Abstract

This round of Eurobarometer surveys queried respondents on standard Eurobarometer measures such as how satisfied they were with their present life. Additional questions focused on the respondents' current living conditions as compared to five years ago, and expectations for the future, including jobs, unemployment, their financial situation, inequality, affordable energy and housing, and the economic situation in their country. Further questions centered on four major areas: (1) European employment and social policy, (2) discrimination, (3) development aid, and (4) air transport services. For the first major area, European employment and social policy, the survey focused on respondents' familiarity with the European Social Fund (ESF), past and present employers, the most valuable assets in finding a job, job training, the likelihood of finding a job if laid off, and whether the European Union (EU) has a positive or negative impact on employment and social policies. For the second major area, discrimination, respondents were asked about discrimination based on ethnic origin, gender, sexual orientation, age, religion, and disability. The survey queried respondents about the extent of discrimination in their countries, whether discrimination is more or less common compared with five years ago, their personal experiences of discrimination in the past 12 months, their level of comfort with politicians of minority backgrounds, diversity in the media and workplace, how the economic crisis may affect discrimination, and respondents' identification with minority groups. For the third major area, development aid, respondents were queried about the importance of helping people in developing countries, the Millennium Development Goals, motives for rich countries to provide aid to developing nations, the countries best positioned to help develop countries, the largest challenges facing developing nations, and the European Union's contribution to development. The final major focus of the survey concluded with questions about respondents' use of air transportation, knowledge of air passengers rights, and satisfaction and positive and negative experiences with air transport services. Demographic and other background information includes left-right political placement, occupation, age at completion of full-time education, household composition, religious affiliation, ownership of a fixed or a mobile telephone and other durable goods, internet usage, financial situation, level in society, minority group affiliation, type and size of locality, region of residence, and language of interview.

1.2.2 Topic classification

- International Institutions, Relations
- Economic Policy, National Economic Situation
- Social Policy
- Occupation, Profession
- Society, Culture
- Patterns of Consumption

Brussels, September 2009.

1.3 Universe

In all, Eurobarometer 71.2 interviewed 29.768 citizens in the 27 countries of the European Union after the 2004/2007 enlargement (i.e. including the Accession Countries Romania and Bulgaria), in the remaining Candidate Countries (CC) Croatia and Turkey, as well as in the Former Yugoslav Republic of Macedonia (FYROM). All respondents were residents in the respective country, nationals and non-nationals but EU-citizens, and aged 15 and over. They were supposed to have sufficient command of one of the respective national language(s) to answer the questionnaire. Separate samples were drawn for Northern Ireland and East Germany.

1.4 Sampling procedure

A multi-stage, random (probability) sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regional units in every country (Statistical Office of the European Community, EUROSTAT NUTS 2 or equivalent). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of starting addresses was selected from each sampled PSU, at random. Further addresses were chosen systematically using standard random route procedures as every Nth address from the initial address. In each household, a respondent was drawn, at random, following the closest birthday rule. No more than one interview was conducted in each household.

The regular sample size (in the sense of completed interviews) is 1000 respondents per country, except the United Kingdom with separate samples for Great Britain (1000) and Northern Ireland (300), Germany with separate samples for the Eastern (500) and the Western part (1000), and Luxembourg, Cyprus (Republic), and Malta with 500 interviews each. The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

From May 25 to June 17, 2009, the TNS Opinion & Social, a consortium created between Taylor Nelson Sofres and EOS Gallup Europe, carried out the fieldwork for this Eurobarometer, at the request of the European Commission, Directorate General Press and Communication, Opinion Polls. TNS Opinion & Social is based at Avenue Herrmann Debroux, 40, 1160 Brussels, Belgium. TNS Opinion & Social coordinates the fieldwork carried out through its network of national institutes.

1.6 Mode of data collection

In all countries, fieldwork was conducted on the basis of detailed and uniform instructions prepared by TNS Opinion & Social. Interviews were conducted face-to-face in people's home in the appropriate national language. As far as the data capture is concerned, CAPI (Computer Assisted Personal Interview) was used in those countries where this technique was available.

Equivalent French and English basic questionnaires were developed for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country. Back-translation procedures were applied for controlling semantic equivalence.

1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factor corrects for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country as well as each lower level sample (Great Britain and Northern Ireland, East and West Germany) are represented in proportion to its population size within different groupings, or according to the historical states of European unification (e.g. founder members, new members, Euro zone) in the case of the EUROPEAN WEIGHTS, or for the United Kingdom (WEIGHT SPECIAL UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31) and for Germany as a whole (WEIGHT SPECIAL GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general all samples which do not belong to the respective group of samples under consideration are excluded from calculation.

The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 4) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

Eurobarometer 71.2 provides three (post-stratification) NATION WEIGHTS: W1 (WEIGHT RESULT FROM TARGET) for separate analysis or comparison of individual samples (countries or regions on sub-national level), W4 (WEIGHT SPECIAL UNITED KINGDOM) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole, and W3 (WEIGHT SPECIAL GERMANY), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. W3 and W4 exclude all other countries from calculation, but include the post-stratification factors for the United Kingdom and Germany respectively.

The EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries, of accession or candidate countries, and of Euro zone countries, representing different historical states of European integration (e.g. EU6 = six founder members) . All post-stratification factors are included.

Table 2: Overview of population size weights

European Weights in Eurobarometer 71.2	Function
W5 to W9, W11, W14, W22	grouping EU member countries
W10, W13, W24	grouping new member countries
W15, W18, W19	grouping candidate/accession countries
W25, W26	grouping member + candidate/accession countries
W81, W82, W84	grouping (non-)Eurozone countries

For more detailed information on the individual weights please see the corresponding variable description.

1.8 Data preparation

The data received by GESIS from TNS Opinion & Social were checked for completeness, missing and duplicate records, for illegal (wild) codes and for (formal) consistency of response patterns and question routing. Errors discovered by these procedures are documented or corrected, as a general rule after consulting related additional documentation (e.g. tabular reports) or the data provider. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable DDI-XML (see chapter 3.3) compliant documentation was created for this dataset by GESIS.

GESIS added 'Inappropriate' (INAP) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the original questionnaire was adhered to for (almost) every respondent. An additional INAP category was defined whenever a question or group of questions were not surveyed in one or more countries, or if variables refer to country specific items (e.g. regions).

Users should note that answers to multiple-response questions are (originally) represented by a series of binary

'dummy' variables (i.e. variables which take on values of one and zero only), creating separate 'dummy' variables also to explicitly represent 'Don't know', 'No answer/refusal' or other residual responses, such as 'None of the above'. The archive has recoded these residual responses in the case of uncommon minor inconsistencies with respect to and in favour of the series of substantial answers.

GESIS has recoded the missing answers (NA) represented in the original data set by blanks (system missing) to standard values. Their practically complete absence suggests that eventual cases of any not explicitly coded item non-response, might be collapsed with the DK (don't know) category.

Question text and contingency text appearing in the variable description is taken from English language version of the basic (bilingual) questionnaire (master questionnaire). Coding schemes and other documentation are based on the English language version of the basic questionnaire or on the respective SPSS data definition statements as provided by TNS Opinion & Social. In case of any discrepancy between questionnaires, SPSS definitions and data regarding the coding scheme of a variable, the archive, as a general rule, carried out any correction in agreement with the data provider.

If the documentation for country-specific questions or answer categories is provided in another language than English, the archive documents the original language wording and supplies the English translation in brackets. Specific information on data preparation or inconsistencies is noted on variable level.

1.9 Further remarks

Questionnaire module QG on "Transport Services" was only surveyed in EU 27 countries.

2 Eurobarometer Series Description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brêthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 4: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.2OVR, 55.1OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.2OVR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 5) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 5: Overview of Eurobarometer surveys with standard EU and trend question modules

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

3 Dataset structure and standards

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 6: ZEUS Party Family Code (slightly modified)

Category		Party Family
0	(001-099)	not affiliated / electoral alliances across "families"
1	(100-199)	Communists
2	(200-299)	Socialists
3	(300-399)	Liberals
4	(400-499)	Christian Democrats
5	(500-599)	Conservatives
6	(600-699)	Extreme Rights / Nationalists
7	(700-799)	Regionalists / Ethnic
8	(800-899)	Environmental parties
9	(900-949)	Agricultural parties
9	(950-989)	other special issue parties (e.g. Eurosceptics) and independents
	990	other (spontaneous)
	994	not voting age
	995	empty ballot (blank) or invalid vote
	996	not voted / would not vote
	997	Refused
	998	DK / DK+NA if NA not coded separately
	999	INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION – ALL SAMPLES ISO 3166).

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (–1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded “real” values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission’s official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

CROSS-TABULATION: The absolute frequencies of the occurrence of values (<i>absolute values</i>) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies (<i>row percent</i>) refer to the valid cases (<i>n valid sum</i>), i.e. the total number of cases (<i>n sum</i>) reduced by the number of cases defined as missing data (<i>M</i>). For display and place saving reasons excluded countries or areas may be completely dropped from the table.																																																																																																																																																																																																																																																																																																																																																					
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (<i>M</i>), i.e. <i>percent</i> on the basis of all cases (<i>sum</i>) and <i>valid percent</i> on the basis of the <i>valid cases</i> .																																																																																																																																																																																																																																																																																																																																																					

5 Variable Documentation

Variable, Label

Question Text (English Language)

v1 - ARCHIVE STUDY NUMBER - DISTRIBUTOR

ARCHIVE STUDY NUMBER - DISTRIBUTOR

Study Number of the distributing data archive.

v1

Value	Label	Missing	Count	Percent	Valid Percent
4972			29768	100.0	100.0
	Sum		29768	100.0	100.0
	Valid Cases		29768		

v2 - ARCHIVE STUDY NUMBER - PUBLISHER

ARCHIVE STUDY NUMBER - PUBLISHER

Study number of the data archive which is publishing this data set version.

v2

Value	Label	Missing	Count	Percent	Valid Percent
4972			29768	100.0	100.0
	Sum		29768	100.0	100.0
	Valid Cases		29768		

v3 - GESIS ARCHIVE VERSION**VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET**

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

v3

Value	Label	Missing	Count	Percent	Valid Percent
3.0.2 (2012-07-02)			29768	100.0	100.0
	Sum		29768	100.0	100.0
	Valid Cases		29768		

v4 - EUROBAROMETER NUMBER**EUROBAROMETER SURVEY NUMBER**

The number identifying the Eurobarometer survey.

712 Eurobarometer 71.2

v4

Value	Label	Missing	Count	Percent	Valid Percent
712	Eurobarometer 71.2		29768	100.0	100.0
	Sum		29768	100.0	100.0
	Valid Cases		29768		

v5 - UNIQUE CASE ID (TNS COUNTRY ID + INTERVIEW ID)

UNIQUE CASE ID (TNS COUNTRY ID + TNS INTERVIEW ID)

This unique respondent identification is composed of the original TNS country code and the original TNS interview number. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 04: Greece; 05: Spain; 06: Finland; 07: France; 08: Ireland; 09: Italy; 10: Luxembourg; 11: Netherlands; 12: Austria; 13: Portugal; 14: Sweden; 20: Germany West; 21: Germany East; 22: Great Britain; 23: Northern Ireland; 31: Bulgaria; 32: Cyprus (Republic); 33: Czech Republic; 34: Estonia; 35: Hungary; 36: Latvia; 37: Lithuania; 38: Malta; 39: Poland; 40: Romania; 41: Slovakia; 42: Slovenia; 43: Turkey; 46: Croatia; 63: Macedonia). The remaining digits contain the country-specific questionnaire numbers.

v6 - NATION - ALL SAMPLES

NATION - ALL SAMPLES

All samples including separate samples for East and West Germany and for Great Britain and Northern Ireland.

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany West
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 Germany East
- 15 Norway (not included)
- 16 Finland
- 17 Sweden
- 18 Austria
- 19 Cyprus (Republic)
- 20 Czech Republic
- 21 Estonia
- 22 Hungary
- 23 Latvia
- 24 Lithuania
- 25 Malta
- 26 Poland
- 27 Slovakia
- 28 Slovenia
- 29 Bulgaria
- 30 Romania
- 31 Turkey
- 32 Croatia
- 33 Cyprus (CY-TCC) (not included)
- 34 Macedonia (FYROM)

Note:

Use of weighting factor W1 (V8) is optional.

	Sum		29768	100.0	100.0
	Valid Cases		29768		

v7 - NATION - ALL SAMPLES ISO 3166

NATION - ALL SAMPLES ISO 3166

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

Note:

Use of weighting factor W1 (V8) is optional.

v8 - W1 WEIGHT RESULT FROM TARGET

W1 WEIGHT RESULT FROM TARGET

This POST-STRATIFICATION WEIGHT is based on a comparison for each sample with the respective universe description. As such in all countries, gender, age, region and size of locality are introduced in the iteration procedure carried out by the fieldwork institutes.

British and Northern Irish as well as East and West German samples are weighted separately. The weight reproduces the real number of cases for each country. In terms of its general function it corresponds to former NATION WEIGHT II (until EUROBAROMETER 31).

v9 - NATION - UNITED KINGDOM

NATION - UNITED KINGDOM

Great Britain and Northern Ireland are coded together.

0 Other

1 United Kingdom

Note:

Use of weighting factor W4 (V10) is mandatory.

v10 - W4 WEIGHT UNITED KINGDOM

W4 WEIGHT UNITED KINGDOM

This POPULATION SIZE WEIGHT adjusts the British and the Northern Irish (sub-national) samples to their share in the total population aged 15 and over in the United Kingdom. It must be applied whenever the United Kingdom is to be analyzed as a whole. The post-stratification weighting factors are included for both samples. All other samples are excluded from analysis. In terms of its general function the weight corresponds to former NATION WEIGHT I (until EUROBAROMETER 31).

v11 - NATION - UNITED GERMANY

NATION - UNITED GERMANY

East and West Germany are coded together.

0 Other

1 Germany

Note:

Use of weighting factor W3 (V12) is mandatory.

v24 - W10 WEIGHT EU NMS 3

W10 WEIGHT EU NMS 3

This POPULATION SIZE WEIGHT only refers to the three new members as of January 1995: Finland, Sweden and Austria. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EU NMS 3 must be applied whenever these three countries are to be analyzed altogether as a group.

v25 - NATION GROUP EU15

NATION GROUP EU15

NATION GROUP EU15 adds Austria, Finland and Sweden to the EURO 12+ countries, new members as of January 1995.

0 Other

1 EU15

Note:

Use of weighting factor W11 (V26) is mandatory.

v26 - W11 WEIGHT EU15

W11 WEIGHT EU15

This POPULATION SIZE WEIGHT adds Austria, Finland and Sweden to the EU12+ countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EU15 must be applied whenever these 15 countries as of the 1995 enlargement are to be analyzed altogether as a group.

v27 - NATION GROUP EU NMS 10

NATION GROUP EU NMS 10

NATION GROUP EU NMS 10 refers to the group of the ten new members of the enlargement in 2004.

0 Other

1 EU NMS 10

Note:

Use of weighting factor W13 (V28) is mandatory.

v38 - W22 WEIGHT EU27

W22 WEIGHT EU27

WEIGHT EU27 includes all 25 member countries after the 2004 enlargement, plus the Accession Countries Bulgaria and Romania. This POPULATION SIZE WEIGHT adjusts each national sample in proportion to its share in the total population aged 15 and over, of the European Union plus Bulgaria and Romania. It should be used whenever all 27 countries participating in this wave are to be analysed as a group. The post-stratification weighting factors for all samples/countries are included.

v39 - NATION GROUP EU NMS 12

NATION GROUP EU NMS 12

NATION GROUP EU NMS 12 refers to the group of the 12 new members after the enlargement of January 2007 (accession of Bulgaria and Romania).

0 Other

1 EU NMS 12

Note:

Use of weighting factor W24 (V40) is mandatory.

v40 - W24 WEIGHT EU NMS 12

W24 WEIGHT EU NMS 12

This POPULATION SIZE WEIGHT refers to the group of the 12 new member countries as of the enlargement in January 2007: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia, Bulgaria and Romania. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EU NMS 12 must be applied whenever these 12 countries are to be analyzed altogether as a group.

v41 - NATION GROUP EU27 + TR + HR

NATION GROUP EU27 + TR + HR

NATION GROUP EU27 + TR + HR includes all 25 member countries after the 2004 enlargement, the new members as of 2007 Romania and Bulgaria and the remaining candidate countries Turkey and Croatia. The Former Yugoslav Republic of Macedonia is excluded from calculation.

v46 - W81 WEIGHT EURO ZONE 2009

W81 WEIGHT EURO ZONE 2009

This POPULATION SIZE WEIGHT separates the group of 12 countries which introduced the EURO as of January 1, 2002 (Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland) plus Slovenia which introduced the EURO as of January 1, 2007, plus Cyprus and Malta, which introduced the EURO as of January 1, 2008, plus Slovakia, which introduced the EURO as of January 1, 2009. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EURO ZONE 2009 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

v47 - NATION GROUP NON EURO ZONE 2009

NATION GROUP NON EURO ZONE 2009

NATION GROUP NON EURO ZONE 2009 refers to the group of countries which did not introduce the EURO up to January 1, 2009 (Denmark, United Kingdom, Sweden, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Bulgaria, Romania).

v135 - QB3 CRISIS JOB MARKET IMPACT -PHASE

Q.B3

Some analysts say that the impact of the economic crisis on the job market has already reached its peak and things will recover little by little; others, on the contrary, say that the worst is still to come. Which of the two statements is closer to your opinion?

(ONE ANSWER ONLY)

- 1 The impact of the crisis on jobs has already reached its peak
- 2 The worst is still to come
- 3 DK

v137 - D15B OCCUPATION OF RESPONDENT - LAST JOB

D.15B

ASK D.15B "IF NOT DOING ANY PAID WORK CURRENTLY", CODES 1 TO 4 IN D.15A

Did you do any paid work in the past? What was your last occupation?

SELF EMPLOYED

- 1 Farmer
- 2 Fisherman
- 3 Professional (lawyer, medical practitioner, accountant, architect, etc.)
- 4 Owner of a shop, craftsmen, other self-employed person
- 5 Business proprietors, owner (full or partner) of a company

EMPLOYED

- 6 Employed professional (employed doctor, lawyer, accountant, architect)
- 7 General management, director or top management (managing directors, director general, other director)
- 8 Middle management, other management (department head, junior manager, teacher, technician)
- 9 Employed position, working mainly at a desk
- 10 Employed position, not at a desk but travelling (salesmen, driver, etc.)
- 11 Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, etc.)
- 12 Supervisor
- 13 Skilled manual worker
- 14 Other (unskilled) manual worker, servant

0 NA

15 Never did any paid work

99 Inap. currently doing paid work (not coded 1 to 4 in V136)

Note:

In accordance with former waves coding results to be (correctly) shifted compared to the questionnaire.

All cases in code "0" (NA) from Denmark.

Last trend: EB70.1, D.15B

v164 - QD3 ESF BUDGET - APPRAISAL

Q.D3

The European Social Fund (ESF) is the European Union fund dedicated to helping European citizens develop their skills and improve their job prospects. The European Union dedicates some 10% of its overall budget to the European Social Fund. Would you say that this share of the budget is too much, about right or too little?

(READ OUT – ONE ANSWER ONLY)

- 1 Too much
- 2 About right
- 3 Too little
- 4 DK

v165 - QD4 WORKING LIFE - TIMES CHANGED EMPLOYER

Q.D4

How many times have you changed employer in your working life so far?

(DO NOT COUNT VACATION JOBS WHILE IN FULL-TIME EDUCATION - IF "DK" CODE '99' - IF "NEVER HAD ANY PAID WORK" CODE '98')

0 Never

1 Once

30 Thirty times

98 Never had any paid work

99 DK/NA

Note:

Actual number is coded.

Last trend: EB70.1, Q.F13

v166 - QD4 WORKING LIFE - TIMES CHANGED EMPLOYER (REC)

Q.D4 Working Life: times have changed employer so far - RECODED

- 1 Never had any paid work
- 2 Never
- 3 1 to 5 times
- 4 6 to 10 times
- 5 More than 10 times
- 9 DK/NA

Derivation:

This variable collapses answers to Q.D4.

Note:

See Q.D4 for complete question text.

v167 - QD5 WORKING LIFE - YEARS FOR LAST EMPLOYER

Q.D5

For how long have you been working for your current employer or last employer if you are not currently working?

(IF "DK" CODE '99' - IF "NEVER HAD ANY PAID WORK" CODE '98')

- 0 Less than one year
- 1 One year
- 60 Sixty years
- 98 Never had any paid work
- 99 DK

Note:

Actual number is coded.

Last trend: EB65.3, Q.C5

v168 - QD5 WORKING LIFE - YEARS FOR LAST EMPLOYER (REC)

Q.D5 Working Life: years worked for current or last employer - RECODED

- 1 Never had any paid work
- 2 Less than one year
- 3 1 to 5 years
- 4 6 to 10 years
- 5 11 to 20 years
- 6 More than 20 years
- 8 DK

Derivation:

This variable collapses answers to Q.D5.

Note:

See Q.D5 for complete question text.

v247 - QE1 DISCRIMINATION I CTRY: SEXUAL ORIENT

Let's talk about another topic.

Discrimination is understood to mean when a person or group is treated less favourably than others because of specific personal characteristics.

Q.E1

ASK Q.E TO EU27 + HR + TR + MK

For each of the following types of discrimination, could you please tell me whether, in your opinion, it is very widespread, fairly widespread, fairly rare or very rare in (OUR COUNTRY)?

Discrimination on the basis of...

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE - READ OUT – ROTATE)

Q.E1_3 Sexual orientation (for example being gay or lesbian)

- 1 Very widespread
- 2 Fairly widespread
- 3 Fairly rare
- 4 Very rare
- 5 Non-existent (SPONTANEOUS)
- 6 DK

v250 - QE1 DISCRIMINATION I CTRY: DISABILITY

Let's talk about another topic.

Discrimination is understood to mean when a person or group is treated less favourably than others because of specific personal characteristics.

Q.E1

ASK Q.E TO EU27 + HR + TR + MK

For each of the following types of discrimination, could you please tell me whether, in your opinion, it is very widespread, fairly widespread, fairly rare or very rare in (OUR COUNTRY)?

Discrimination on the basis of...

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE - READ OUT – ROTATE)

Q.E1_6 Disability

- 1 Very widespread
- 2 Fairly widespread
- 3 Fairly rare
- 4 Very rare
- 5 Non-existent (SPONTANEOUS)
- 6 DK

v304 - QE6 ELECTED POLITICIAN: AGED OVER 75 (REC)

Q.E6 Feeling about having someone in the highest elected political position - RECODED

Q.E6_7 A person aged over 75

- 1 Uncomfortable (codes 1-3)
- 2 A little uncomfortable (codes 4-7)
- 3 Comfortable (codes 8-10)
- 4 Indifferent (SPONTANEOUS)
- 8 DK

Derivation:

This variable collapses answers to this item in Q.E6 into three categories.

Note:

See Q.E6 for complete question text.

v328 - QE14 DIVERSITY AT WORK INCRS: ETHNIC ORIGIN

Q.E14

ASK Q.E14 IF "CURRENTLY WORK", CODE 5 to 18 in D.15A - OTHERS GO TO Q.E15A

Do you think that enough is being done to increase diversity in your work place as far as... is concerned?

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE - READ OUT - ROTATE)

Q.E14_1 Ethnic origin

- 1 Yes, definitely
- 2 Yes, to some extent
- 3 No, not really
- 4 No, definitely not
- 5 Not applicable (SPONTANEOUS)
- 6 DK
- 9 Inap. currently not doing any paid work (not coded 5 to 18 in V136)

v337 - QE15ABC PERS DISCRIM REPORT: TRADE UNIONS

Q.E15ABC Body to report personal discrimination or harassment in total

Q.E15ABC_1 Trade Unions

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes answers to this item in Q.E15A, Q.E15B and Q.E15C (V334 to V336).

Note:

See Q.E15A, Q.E15B and Q.E15C for complete question text. Variables summarize answers to Q.E15A, Q.E15B and Q.E15C (V334 to V336), except for category '8' (DK) (V344).

v344 - QE15ABC PERS DISCRIM REPORT: DK (QE15A ONLY)

Q.E15ABC Body to report personal discrimination or harassment in total

Q.E15ABC_8 DK (Q.E15A ONLY)

0 Not mentioned

1 Mentioned

Derivation:

This variable repeats answers to this item in Q.E15A (V334).

Note:

See Q.E15A, Q.E15B and Q.E15C (V334 to V336) for complete question text. Variable repeats answers to category '8' (DK) in Q.E15A (V334), while all other answers to Q.E15A are summarized with Q.E15B (V335) and Q.E15C (V336) in variables V337 to V343.

v361 - QF3 DEVELOPM AID MOTIVE: SELF-INTEREST

Q.F3

Development aid means giving grants or loans to developing countries which aim to promote economic development and human welfare. We are not talking here about humanitarian aid (that is assistance provided in emergency situations like war, natural disaster, famine, etc.), but about development aid. In your opinion, which of the following are the two main motivations for richer countries to provide development aid to poor countries?

(READ OUT – ROTATE – MAX. 2 ANSWERS)

Q.F3_1 Self-interest for example helping poor countries trade will enable them to buy more products from rich countries

v367 - QF3 DEVELOPM AID MOTIVE: AVOID EMIGRATION

Q.F3

Development aid means giving grants or loans to developing countries which aim to promote economic development and human welfare. We are not talking here about humanitarian aid (that is assistance provided in emergency situations like war, natural disaster, famine, etc.), but about development aid. In your opinion, which of the following are the two main motivations for richer countries to provide development aid to poor countries?

(READ OUT – ROTATE – MAX. 2 ANSWERS)

Q.F3_7 Avoid citizens of these countries emigrating to rich countries

v373 - QF5 EU DEVELOPMENT AID AND ECONOMIC CRISIS

Q.F5

The European Union committed to increasing the level of its developing aid towards developing countries. Given the current economic situation, which of the following propositions best describes your opinion?

(READ OUT - ONE ANSWER ONLY)

- 1 We should increase European aid to developing countries beyond what is already promised
- 2 We should keep our initial promise to developing countries, but no more
- 3 We should not increase the levels of aid to developing countries even though it has been promised
- 4 We should reduce aid to developing countries as we can no longer afford it
- 5 DK

v402 - QG5 AIR TRANSP SATISF: PUNCTUALITY

ASK Q.G TO EU27

Q.G5

For each of the following elements regarding air transport services, would you say that, in general, you are very satisfied, rather satisfied, rather unsatisfied or not at all satisfied with it?

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE - READ OUT)

Q.G5_1 Punctuality

- 1 Very satisfied
- 2 Rather satisfied
- 3 Rather unsatisfied
- 4 Not at all satisfied
- 5 Never use air transport services (SPONTANEOUS)
- 6 DK
- 9 Inap. not EU27 (not coded 1 to 30 in V6)

Note:

Code "5" (Never use air transport services) is not listed in the basic questionnaire but included in the original data set. Please notice that unlike the questionnaire instruction "DK" is coded "6".

v403 - QG5 AIR TRANSP SATISF: COMFORT

ASK Q.G TO EU27

Q.G5

For each of the following elements regarding air transport services, would you say that, in general, you are very satisfied, rather satisfied, rather unsatisfied or not at all satisfied with it?

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE - READ OUT)

Q.G5_2 Comfort

- 1 Very satisfied
- 2 Rather satisfied
- 3 Rather unsatisfied
- 4 Not at all satisfied
- 5 Never use air transport services (SPONTANEOUS)
- 6 DK
- 9 Inap. not EU27 (not coded 1 to 30 in V6)

Note:

Code "5" (Never use air transport services) is not listed in the basic questionnaire but included in the original data set. Please notice that unlike the questionnaire instruction "DK" is coded "6".

v406 - QG5 AIR TRANSP SATISF: COMPENSATIONS

ASK Q.G TO EU27

Q.G5

For each of the following elements regarding air transport services, would you say that, in general, you are very satisfied, rather satisfied, rather unsatisfied or not at all satisfied with it?

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE - READ OUT)

Q.G5_5 Compensation offered in case of service failures

- 1 Very satisfied
- 2 Rather satisfied
- 3 Rather unsatisfied
- 4 Not at all satisfied
- 5 Never use air transport services (SPONTANEOUS)
- 6 DK
- 9 Inap. not EU27 (not coded 1 to 30 in V6)

Note:

Code "5" (Never use air transport services) is not listed in the basic questionnaire but included in the original data set. Please notice that unlike the questionnaire instruction "DK" is coded "6".

v415 - QG7A AIR TRANSPORT PROBLEM - LAST YEAR

ASK Q.G TO EU27

Q.G7A

ASK Q.G7A TO Q.G7C IF "USE OF AIR TRANSPORT", CODE 3 IN Q.G1 – OTHERS GO TO Q.G8A

During the last twelve months, have you had to put up with a cancellation, a long delay, a denied boarding or loss/ damage of your luggage?

(READ OUT – ONE ANSWER ONLY)

1 Yes

2 No

3 DK

9 Inap. no use of air transport during the last twelve months (not coded 1 in V390)

99 Inap. not EU27 (not coded 1 to 30 in V6)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v416 - QG7B AIR TRANSPORT PROBLEM - COMPLAINED

ASK Q.G TO EU27

ASK Q.G7A TO Q.G7C IF "USE OF AIR TRANSPORT", CODE 3 IN Q.G1

[Q.G7A

During the last twelve months, have you had to put up with a cancellation, a long delay, a denied boarding or loss/ damage of your luggage?]

Q.G7B

ASK Q.G7B AND Q.G7C IF "YES", CODE 1 IN Q.G7A

Have you already complained about this incident to a body in charge of complaint handling?

(READ OUT – ONE ANSWER ONLY)

1 Yes

2 No

3 DK

9 Inap. no problem with air transport during the last twelve months (not coded 1 in V415)

99 Inap. not EU27 (not coded 1 to 30 in V6)

Note:

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v418 - QG8A AIR TRANSPORT - LUGGAGE HANDLING

Q.G8A

ASK ALL IN EU27

Would you say that, when you use air transport, the way your luggage is handled is very satisfactory, rather satisfactory, not very satisfactory or not at all satisfactory?

(READ OUT – ONE ANSWER ONLY)

- 1 Very satisfactory
- 2 Rather satisfactory
- 3 Not very satisfactory
- 4 Not at all satisfactory
- 5 DK
- 9 Inap. not EU27 (not coded 1 to 30 in V6)

v419 - QG8B AIR TRANSPORT PROBLEMS - RESP AUTHORITY

ASK Q.G TO EU27

Q.G8B

Nowadays, national authorities in charge of the application of the rules concerning delays, cancellations and denied boarding are not obliged to intervene in luggage related problem. Some say that it would be better to have the opportunity to complain about luggage to the same national authorities as the ones in charge of the complaints about cancellations, delays or denied boarding. Others, on the contrary, say that it is better to continue to address complaints about luggage to the various organisations and associations (airline companies, consumer associations, etc.) which are currently taking care of these problems. Which of those two opinions is the closest to what you think?

(ONE ANSWER ONLY)

- 1 To complain about luggage to the same national authorities in charge of the complaints regarding cancellations, delays or denied boarding
- 2 To complain about luggage to organisations and associations currently in charge of problems related to luggage
- 3 DK
- 9 Inap. not EU27 (not coded 1 to 30 in V6)

v422 - D1 LEFT-RIGHT PLACEMENT - RECODED 3 CAT

D.1R1 Left - right scale (RECODED)

- 1 (1 - 4) Left
- 2 (5 - 6) Centre
- 3 (7 -10) Right
- 9 DK/Refusal

Derivation:

This variable collapses answers to D.1 into three categories.

Note:

See D.1 for complete question text.

v424 - D7 MARITAL STATUS

D.7

Could you give me the letter which corresponds best to your own current situation?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

MARRIED OR REMARRIED

- 1 Married or remarried: Living without children
- 2 Married or remarried: Living with the children of this marriage
- 3 Married or remarried: Living with the children of a previous marriage
- 4 Married or remarried: Living with the children of this marriage and of a previous marriage

SINGLE LIVING WITH A PARTNER

- 5 Single living with a partner: Living without children
- 6 Single living with a partner: Living with the children of this marriage/partnership
- 7 Single living with a partner: Living with the children of a previous marriage/partnership
- 8 Single living with a partner: Living with the children of this marriage/partnership and of a previous marriage/partnership

SINGLE

- 9 Single: Living without children
- 10 Single: Living with children

DIVORCED OR SEPARATED

- 11 Divorced or separated: Living without children
- 12 Divorced or separated: Living with children

WIDOW

- 13 Widow: Living without children
- 14 Widow: Living with children

15 Other (SPONTANEOUS)

97 Refusal (SPONTANEOUS)

Note:

Original code "16" recoded to "97".

Original answer text for categories '5, '6' and '7' in the basic bilingual questionnaire is not correct. "Marriage" should be read "marriage/partnership" as documented in the UK field questionnaire.

Last trend modified: EB71.1, D.7

v425 - D8 AGE EDUCATION

D.8

How old were you when you stopped full-time education?

(IF "STILL STUDYING", CODE '00' - IF "NO EDUCATION" CODE '01' - IF "REFUSAL" CODE '98' - IF "DK" CODE '99')

0 Refusal

2 2 years

74 74 years

97 No full-time education

98 Still studying

99 DK

Note:

Original code "00" recoded to "98".

Original code "01" recoded to "97".

Original code "98" recoded to "0".

Actual number is coded.

Please notice that starting with Eurobarometer 67.2 data for PORTUGAL and CROATIA show noticeable high frequencies for REFUSAL (new category) and not any response for NO FULL-TIME EDUCATION. Comparison with results from former waves suggests that data for both categories might have been collapsed. Inconsistent specifications for residual categories (no full-time education, DK, refusal) in some national field questionnaires over time and across countries support this argument. Data corresponding to these categories should be analysed with caution.

For Portugal: Original code "00" recoded to "97".

Last trend: EB71.1, D.8

v426 - D8 AGE EDUCATION - RECODED

D.8R Age when finished full-time education - RECODED

- 1 Up to 14 years
- 2 15 years
- 3 16 years
- 4 17 years
- 5 18 years
- 6 19 years
- 7 20 years
- 8 21 years
- 9 22 years and older
- 10 Still studying
- 11 No full-time education
- 97 Refusal
- 98 DK

Note:

See D.8 for complete question text.

Please notice that starting with Eurobarometer 67.2 data for PORTUGAL and CROATIA show noticeable high frequencies for REFUSAL (new category) and not any response for NO FULL-TIME EDUCATION. Comparison with results from former waves suggests that data for both categories might have been collapsed. Inconsistent specifications for residual categories (no full-time education, DK, refusal) in some national field questionnaires over time and across countries support this argument. Data corresponding to these categories should be analysed with caution.

For Portugal: Original code "97" recoded to "11".

v428 - D11 AGE EXACT

D.11

How old are you?

15 15 years

98 98 years

Note:

Actual number is coded.

Last trend: EB71.1, D.11

v429 - D11 AGE RECODED - FOUR GROUPS

D.11R1 AGE - RECODED IN FOUR GROUPS

- 1 15 - 24 years
- 2 25 - 39 years
- 3 40 - 54 years
- 4 55 years and older

Derivation:

This variable collapses answers to D.11 into four categories.

Note:

See D.11 for complete question text.

v430 - D11 AGE RECODED - SIX GROUPS

D.11R2 AGE - RECODED IN SIX GROUPS

- 1 15 - 24 years
- 2 25 - 34 years
- 3 35 - 44 years
- 4 45 - 54 years
- 5 55 - 64 years
- 6 65 years and older

Derivation:

This variable collapses answers to D.11 into six categories.

Note:

See D.11 for complete question text.

NO QUESTION D.12 TO D.14

QUESTIONS D.15A & D.15B ARE ASKED BEFORE Q.C1

NO QUESTIONS D.16 TO D.24

v437 - D40C HOUSEHOLD COMPOSITION: AGED 10-14 (REC)

D.40CR HOUSEHOLD COMPOSITION: AGED 10-14 (RECODED)

- 0 None
- 1 One
- 2 Two
- 3 Three
- 4 Four or more

Derivation:

This variable groups answers to question D.40C/V436.

Note:

See V436 for complete question text.

v438 - D40 HOUSEHOLD COMPOSITION: SIZE A+B+C

D.40 HOUSEHOLD COMPOSITION: SIZE (A+B+C)

- 1 One
- 2 Two
- 3 Three
- 4 Four
- 5 Five
- 6 Six
- 7 Seven
- 8 Eight
- 9 Nine
- 10 Ten
- 11 Eleven
- 12 Twelve
- 13 Thirteen
- 14 Fourteen
- 15 Fifteen
- 16 Sixteen
- 18 Eighteen
- 19 Nineteen
- 20 Twenty

Derivation:

This variable summarizes V432, V434 and V436.

Note:

See V432, V434 and V436 for complete question text.

Generated by the Archive in accordance with former surveys.

v473 - P6 SIZE OF COMMUNITY - UNITED KINGDOM

P.6_GB (Objective) Size of community: United Kingdom

- 1 Rural
- 2 Urban
- 3 Metropolitan
- 99 Inap. not GB (not coded 9 or 10 in V6)

Note:

The original variable integrated data for Northern Ireland (codes 1-2, 6) and Great Britain (codes 3-5). The original categories (value label) were corrected after consultation with TNS OPINION & SOCIAL. In order to facilitate the analysis for the United Kingdom as a whole, identical categories have been combined. For Northern Ireland code 3 ("Metropolitan") has been recoded from code 6 (DK) in accordance with P7 Region I for the United Kingdom (if coded 1 = "Belfast"). In Eurobarometer 62 to 66 "Belfast" is coded as "Urban" together with other communities; former Eurobarometer have different categories for community size in Northern Ireland.

For meaningful results this variable needs to be weighted by W4 WEIGHT UNITED KINGDOM (V10) or be used for Great Britain and Northern Ireland separately (select if '9' OR '10' in V6).

Last trend: EB71.1, P.6
