## Acknowledgements

---

Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences.

## Introduction and preliminary remarks

---

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

### Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (<http://zacat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

### Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

### Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

## 1.2 Content

### 1.2.1 Abstract

This round of Eurobarometer surveys queried respondents on standard Eurobarometer measures, such as how satisfied they were with their present life, whether they attempted to persuade others close to them to share their views on subjects they held strong opinions about, whether they discussed political matters, and how they viewed the need for societal change. Additional questions focused on the respondents' knowledge of and opinions on the European Union (EU), including how well-informed they felt about the EU, whether their country had benefited from being an EU member, and the extent of their personal interest in EU matters. Further questions on the EU included the extent of EU involvement in various policy areas and the importance of these issues, further European integration, economic growth, and trust in EU organizations. The survey also queried respondents about these six major topical areas: (1) Globalization, (2) Personal Values and Priorities, (3) European Identity, (4) Future of the European Union, (5) Social Problems and Welfare, and (6) European Elections. For the first major topic, respondents were asked for their opinions on globalization and its effect on the local community, companies, and the EU. For the second major topic, respondents were asked about their values and priorities. The survey then asked respondents about the third topic, European Identity. Respondents were questioned about their national and European identities, what they thought were the important characteristics and elements of their identities, and what their identities mean to them. For the fourth topic, the future of the European Union, respondents were asked about their predictions for the year 2030 in regards to the economy, expansion, societal norms, and culture. For the fifth topic, social problems and welfare, respondents were asked about social welfare and pensions, and the quality of their country's plans and possible future changes to the programs. Respondents were also questioned about employment possibilities in their country, including whether highly educated people had problems obtaining jobs. The sixth major topic focused on the European Parliament elections, respondents were asked their reasons for voting or not voting, what they felt were important policy issues, their attitudes toward the elections, their exposure to election campaigns, and their closeness to the political parties. In addition to the six major areas of focus, four minor topics were also covered: (1) Human Rights, (2) Public Authorities, (3) Minorities and Immigrants, and (4) Elderly Care. Demographic and other background information collected includes age, gender, origin of birth (personal and parental), marital status, occupation, age at completion of full-time education, left-right political self placement, level in society, household composition, ownership of a fixed or mobile telephone, ownership of household durables, financial situation, Internet usage, and quality of life pertaining to health. In addition, country-specific data includes region of residence, type and size of locality, and language of interview.

### 1.2.2 Topic classification

- International Institutions, Relations
- Political Issues
- Political Attitudes and Behavior
- Economic Policy, National Economic Situation
- Social Policy

## 1.3 Universe

In all, Eurobarometer 71.3 interviewed 30.343 citizens in the 27 countries of the European Union after the 2004/2007 enlargement (i.e. including the Accession Countries Romania and Bulgaria), in the remaining Candidate Countries (CC) Croatia and Turkey, as well as in the Turkish Cypriote Community (TCC) and in the Former Yugoslav Republic of Makedonia (FYROM). All respondents were residents in the respective country, nationals and non-nationals but EU-citizens, and aged 15 and over. They were supposed to have sufficient command of one of the respective national language(s) to answer the questionnaire. Separate samples were drawn for Northern Ireland and East Germany.

## 1.4 Sampling procedure

A multi-stage, random (probability) sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regional units in every country (Statistical Office of the European Community, EUROSTAT NUTS 2 or equivalent). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of starting addresses was selected from each sampled PSU, at random. Further addresses were chosen systematically using standard random route procedures as every Nth address from the initial address. In each household, a respondent was drawn, at random, following the closest birthday rule. No more than one interview was conducted in each household.

The regular sample size (in the sense of completed interviews) is 1000 respondents per country, except the United Kingdom with separate samples for Great Britain (1000) and Northern Ireland (300), Germany with separate samples for the Eastern (500) and the Western part (1000), and Luxembourg, Cyprus (Republic), Cyprus TCC, and Malta with 500 interviews each. The effective number of realized interviews in this round is indicated in table 1.

## 1.5 Fieldwork

From June 12 to July 7, 2009, the TNS Opinion & Social, a consortium created between Taylor Nelson Sofres and EOS Gallup Europe, carried out the fieldwork for this Eurobarometer, at the request of the European Commission, Directorate General Press and Communication, Opinion Polls. TNS Opinion & Social is based at Avenue Herrmann Debroux, 40, 1160 Brussels, Belgium. TNS Opinion & Social coordinates the fieldwork carried out through its network of national institutes:

## 1.6 Mode of data collection

In all countries, fieldwork was conducted on the basis of detailed and uniform instructions prepared by TNS Opinion Social. Interviews were conducted face-to-face in people's home in the appropriate national language.

As far as the data capture is concerned, CAPI (Computer Assisted Personal Interview) was used in those countries where this technique was available.

Equivalent French and English basic questionnaires were developed for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country. Backtranslation procedures were applied for controlling semantic equivalence.

## 1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factor corrects for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country as well as each lower level sample (Great Britain and Northern Ireland, East and West Germany) are represented in proportion to its population size within different groupings, or according to the historical states of European unification (e.g. founder members, new members, Euro zone) in the case of the EUROPEAN WEIGHTS, or for the United Kingdom (WEIGHT SPECIAL UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31) and for Germany as a whole (WEIGHT SPECIAL GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general all samples which do not belong to the respective group of samples under consideration are excluded from calculation.

The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 4) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

**Eurobarometer 71.3** provides three (post-stratification) NATION WEIGHTS: W1 (WEIGHT RESULT FROM TARGET) for separate analysis or comparison of individual samples (countries or regions on sub-national level), W4 (WEIGHT SPECIAL UNITED KINGDOM) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole, and W3 (WEIGHT SPECIAL GERMANY), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. W3 and W4 exclude all other countries from calculation, but include the post-stratification factors for the United Kingdom and Germany respectively.

The EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries, of accession or candidate countries, and of Euro zone countries, representing different historical states of European integration (e.g. EU6 = six founder members) . All post-stratification factors are included.

Table 2: Overview of population size weights

European Weights in Eurobarometer 71.3	Function
W5 to W9, W11, W14, W22	grouping EU member countries
W10, W13, W24	grouping new member countries
W15, W18, W19	grouping candidate/accession countries
W25, W26	grouping member + candidate/accession countries
W81, W82, W84	grouping (non-)Eurozone countries

For more detailed information on the individual weights please see the corresponding variable description.

## 1.8 Data preparation

The data received by GESIS from TNS Opinion & Social were checked for completeness, missing and duplicate records, for illegal (wild) codes and for (formal) consistency of response patterns and question routing. Errors discovered by these procedures are documented or corrected, as a general rule after consulting related additional documentation (e.g. tabular reports) or the data provider. Indices and other derived summary variables were also

checked and corrected as necessary. Complete machine-readable DDI-XML compliant documentation was created for this dataset by GESIS.

GESIS added 'Inappropriate' (INAP) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the original questionnaire was adhered to for (almost) every respondent. An additional INAP category was defined whenever a question or group of questions were not surveyed in one or more countries, or if variables refer to country specific items (e.g. regions).

Users should note that answers to multiple-response questions are (originally) represented by a series of binary 'dummy' variables (i.e. variables which take on values of one and zero only), creating separate 'dummy' variables also to explicitly represent 'Don't know', 'No answer/refusal' or other residual responses, such as 'None of the above'. The archive has recoded these residual responses in the case of uncommon minor inconsistencies with respect to and in favour of the series of substantial answers.

GESIS has recoded the missing answers (NA) represented in the original data set by blanks (system missing) to standard values. Their practically complete absence suggests that eventual cases of any not explicitly coded item non-response, might be collapsed with the DK (don't know) category.

Question text and contingency text appearing in the variable description is taken from English language version of the basic (bilingual) questionnaire (master questionnaire). Coding schemes and other documentation are based on the English language version of the basic questionnaire or on the respective SPSS data definition statements as provided by TNS Opinion & Social. In case of any discrepancy between questionnaires, SPSS definitions and data regarding the coding scheme of a variable, the archive, as a general rule, carried out any correction in agreement with the data provider.

If the documentation for country-specific questions or answer categories is provided in another languages than English, the archive documents the original language wording and supplies the English translation in brackets.

Coding for POLITICAL PARTIES in voting behaviour variables (QK2: V542 to V573) has been harmonized, whenever possible in accordance with the PARTY FAMILY coding scheme developed for the Mannheim Eurobarometer Trendfile.

Specific information on data preparation, harmonization or regarding inconsistencies is noted on variable level.

## 1.9 Further remarks

Module QK on 'European Elections' has only been surveyed in EU 27 countries.

Results for the social topical module QD (QD1 to QD4) on Human Right issues are only published in the context of the national Standard Eurobarometer reports.

## 2 Eurobarometer Series Description

---

### 2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

### 2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

### 2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

### 2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

Table 3: EU enlargement and countries covered by Standard and Special Eurobarometer

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 4: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.2OVR, 55.1OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.2OVR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

## 2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 5) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 5: Overview of Eurobarometer surveys with standard EU and trend question modules

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

## 3 Dataset structure and standards

---

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

### 3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

### 3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

#### 3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 6: ZEUS Party Family Code (slightly modified)

Category		Party Family
0	(001-099)	not affiliated / electoral alliances across "families"
1	(100-199)	Communists
2	(200-299)	Socialists
3	(300-399)	Liberals
4	(400-499)	Christian Democrats
5	(500-599)	Conservatives
6	(600-699)	Extreme Rights / Nationalists
7	(700-799)	Regionalists / Ethnic
8	(800-899)	Environmental parties
9	(900-949)	Agricultural parties
9	(950-989)	other special issue parties (e.g. Eurosceptics) and independents
	990	other (spontaneous)
	994	not voting age
	995	empty ballot (blank) or invalid vote
	996	not voted / would not vote
	997	Refused
	998	DK / DK+NA if NA not coded separately
	999	INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

### 3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

## 3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

## 4 Explanation of the variable documentation

---

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION – ALL SAMPLES ISO 3166).

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (–1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded “real” values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission’s official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

CROSS-TABULATION: The absolute frequencies of the occurrence of values ( <i>absolute values</i> ) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies ( <i>row percent</i> ) refer to the valid cases ( <i>n valid sum</i> ), i.e. the total number of cases ( <i>n sum</i> ) reduced by the number of cases defined as missing data ( <i>M</i> ). For display and place saving reasons excluded countries or areas may be completely dropped from the table.																																																																																																																																																																																																																																																																																																																						
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data ( <i>M</i> ), i.e. <i>percent</i> on the basis of all cases ( <i>sum</i> ) and <i>valid percent</i> on the basis of the <i>valid cases</i> .																																																																																																																																																																																																																																																																																																																						

## 5 Variable Documentation

Variable, Label

Question Text (English Language)

v1 - ARCHIVE STUDY NUMBER - DISTRIBUTOR

ARCHIVE STUDY NUMBER - DISTRIBUTOR

Study Number of the distributing data archive.

v1

Value	Label	Missing	Count	Percent	Valid Percent
4973			30343	100.0	100.0
	Sum		30343	100.0	100.0
	Valid Cases		30343		

v2 - ARCHIVE STUDY NUMBER - PUBLISHER

ARCHIVE STUDY NUMBER - PUBLISHER

Study number of the data archive which is publishing this data set version.

v2

Value	Label	Missing	Count	Percent	Valid Percent
4973			30343	100.0	100.0
	Sum		30343	100.0	100.0
	Valid Cases		30343		

**v3 - GESIS ARCHIVE VERSION****VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET**

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

v3

Value	Label	Missing	Count	Percent	Valid Percent
3.0.0 (2012-02-03)			30343	100.0	100.0
	Sum		30343	100.0	100.0
	Valid Cases		30343		

## v4 - EUROBAROMETER NUMBER

## EUROBAROMETER SURVEY NUMBER

The number identifying the Eurobarometer survey.

713 Eurobarometer 71.3

v4

Value	Label	Missing	Count	Percent	Valid Percent
713	Eurobarometer 71.3		30343	100.0	100.0
	Sum		30343	100.0	100.0
	Valid Cases		30343		

v5 - SERIAL CASE ID (APPOINTED BY THE ARCHIVE)

SERIAL CASE ID (APPOINTED BY THE ARCHIVE)

This is a unique serial respondent identification number appointed by the archive. Original TNS case ID is not unique (see V798).

Note:

Actual number is coded.

v6 - NATION - ALL SAMPLES

NATION - ALL SAMPLES

All samples including separate samples for East and West Germany and for Great Britain and Northern Ireland.

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany West
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 Germany East
- 15 Norway (not included)
- 16 Finland
- 17 Sweden
- 18 Austria
- 19 Cyprus (Republic)
- 20 Czech Republic
- 21 Estonia
- 22 Hungary
- 23 Latvia
- 24 Lithuania
- 25 Malta
- 26 Poland
- 27 Slovakia
- 28 Slovenia
- 29 Bulgaria
- 30 Romania
- 31 Turkey
- 32 Croatia
- 33 Cyprus (CY-TCC)
- 34 Macedonia (FYROM)

Note:

Use of weighting factor W1 (V8) is optional.

	Sum		30343	100.0	100.0
	Valid Cases		30343		

v7 - NATION - ALL SAMPLES ISO 3166

NATION – ALL SAMPLES ISO 3166

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

Note:

Use of weighting factor W1 (V8) is optional.

v8 - W1 WEIGHT RESULT FROM TARGET

W1 WEIGHT RESULT FROM TARGET

This POST-STRATIFICATION WEIGHT is based on a comparison for each sample with the respective universe description. As such in all countries, gender, age, region and size of locality are introduced in the iteration procedure carried out by the fieldwork institutes.

British and Northern Irish as well as East and West German samples are weighted separately. The weight reproduces the real number of cases for each country. In terms of its general function it corresponds to former NATION WEIGHT II (until EUROBAROMETER 31).

v9 - NATION - UNITED KINGDOM

NATION - UNITED KINGDOM

Great Britain and Northern Ireland are coded together.

0 Other

1 United Kingdom

Note:

Use of weighting factor W4 (V10) is mandatory.

v10 - W4 WEIGHT UNITED KINGDOM

W4 WEIGHT UNITED KINGDOM

This POPULATION SIZE WEIGHT adjusts the British and the Northern Irish (sub-national) samples to their share in the total population aged 15 and over in the United Kingdom. It must be applied whenever the United Kingdom is to be analyzed as a whole. The post-stratification weighting factors are included for both samples. All other samples are excluded from analysis. In terms of its general function the weight corresponds to former NATION WEIGHT I (until EUROBAROMETER 31).

v11 - NATION - UNITED GERMANY

NATION - UNITED GERMANY

East and West Germany are coded together.

0 Other

1 Germany

Note:

Use of weighting factor W3 (V12) is mandatory.

v14 - W5 WEIGHT EU6

W5 WEIGHT EU6

This POPULATION SIZE WEIGHT refers to the six EC founder members: France, Belgium, Netherlands, West Germany, Italy, and Luxembourg. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EU6 must be applied whenever these six EC founder countries are to be analyzed altogether as a group.

v15 - NATION GROUP EU9

NATION GROUP EU9

NATION GROUP EU9 adds Denmark, Ireland, Great Britain and Northern Ireland to the EU6 countries.

0 Other

1 EU9

Note:

Use of weighting factor W6 (V16) is mandatory.

v24 - W10 WEIGHT EU NMS 3

W10 WEIGHT EU NMS 3

This POPULATION SIZE WEIGHT only refers to the three new members as of January 1995: Finland, Sweden and Austria. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EU NMS 3 must be applied whenever these three countries are to be analyzed altogether as a group.

v25 - NATION GROUP EU15

NATION GROUP EU15

NATION GROUP EU15 adds Austria, Finland and Sweden to the EURO 12+ countries, new members as of January 1995.

0 Other

1 EU15

Note:

Use of weighting factor W11 (V26) is mandatory.

v38 - W22 WEIGHT EU27

W22 WEIGHT EU27

WEIGHT EU27 includes all 25 member countries after the 2004 enlargement, plus the Accession Countries Bulgaria and Romania.

This POPULATION SIZE WEIGHT adjusts each national sample in proportion to its share in the total population aged 15 and over, of the European Union plus Bulgaria and Romania. It should be used whenever all 27 countries participating in this wave are to be analysed as a group. The post-stratification weighting factors for all samples/countries are included.

v39 - NATION GROUP EU NMS 12

NATION GROUP EU NMS 12

NATION GROUP EU NMS 12 refers to the group of the 12 new members after the enlargement of January 2007 (accession of Bulgaria and Romania).

0 Other

1 EU NMS 12

Note:

Use of weighting factor W24 (V40) is mandatory.

v40 - W24 WEIGHT EU NMS 12

W24 WEIGHT EU NMS 12

This POPULATION SIZE WEIGHT refers to the group of the 12 new member countries as of the enlargement in January 2007: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia, BULGARIA and ROMANIA. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EU NMS 12 must be applied whenever these 12 countries are to be analyzed altogether as a group.

v41 - NATION GROUP EU27 + TR + HR + CY-TCC

NATION GROUP EU27 + TR + HR + CY-TCC

NATION GROUP EU27 + TR + HR + CY-TCC includes all 25 member countries after the 2004 enlargement, the new members as of 2007 Romania and Bulgaria, the remaining candidate countries Turkey and Croatia and the Turkish Cypriot Community. The Former Yugoslav Republic of Macedonia is excluded.

v48 - W81 WEIGHT EURO ZONE 2009

W81 WEIGHT EURO ZONE 2009

This POPULATION SIZE WEIGHT separates the group of 12 countries which introduced the EURO as of January 1, 2002 (Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland) plus Slovenia which introduced the EURO as of January 1, 2007, plus Cyprus and Malta, which introduced the EURO as of January 1, 2008, plus Slovakia, which introduced the EURO as of January 1, 2009. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EURO ZONE 2009 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

v49 - NATION GROUP NON EURO ZONE 2009

NATION GROUP NON EURO ZONE 2009

NATION GROUP NON EURO ZONE 2009 refers to the group of countries which did not introduce the EURO up to January 1, 2009 (Denmark, United Kingdom, Sweden, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Bulgaria, Romania).

0 Other

1 NON EURO ZONE 2009

v50 - W82 WEIGHT NON EURO ZONE 2009

W82 WEIGHT NON EURO ZONE 2009

This POPULATION SIZE WEIGHT separates the group of countries (Denmark, United Kingdom, Sweden, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Bulgaria, Romania) which did not introduce the EURO up to January 1, 2009. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT NON EURO ZONE 2009 must be applied whenever these countries are to be analyzed altogether as a group.

v51 - NATION GROUP NON EURO ZONE EU NMS 12

NATION GROUP NON EURO ZONE EU NMS 12

NATION GROUP NON EURO ZONE EU NMS 12 refers to the group of countries among the new member states as of 2007 which did not introduce the EURO up to January 1, 2009 (Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Bulgaria, Romania).

0 Other

1 NON EURO ZONE EU NMS 12

Note:

Use of weighting factor W84 (V52) is mandatory.

v52 - W84 WEIGHT NON EURO ZONE NMS 12

W84 WEIGHT NON EURO ZONE EU NMS 12

This POPULATION SIZE WEIGHT separates the group of countries among the new member states as of 2007 which did not introduce the EURO up to January 1, 2009 (Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Bulgaria, Romania). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT NON EURO ZONE EU NMS 12 must be applied whenever these countries are to be analyzed altogether as a group.

v53 - WEX WEIGHT EXTRA POPULATION 15+

WEX WEIGHT EXTRA POPULATION 15+

WEIGHT EXTRA extrapolates the actual universe (population aged 15 or more) for each country (sample), i.e. this weight variable integrates all other available weights, but does not reproduce the number of cases in the data set.

Note:

Weighting variable corrected by the Archive. Original weight only reproduced half of the population compared to the relevant populations size indicated in the technical specifications.

v54 - W31 POLIT WEIGHT RESULT FROM TARGET EU27 (VOTING AGE)

W31 POLITICAL WEIGHT RESULT FROM TARGET EU27 (VOTING AGE)

This POST-STRATIFICATION WEIGHT is based on a comparison for each sample with the respective universe description. As such in all countries, gender, age, region and size of locality are introduced in the iteration procedure carried out by the fieldwork institutes.

Note:

These political weights are provided as optional for the analysis of voting behaviour related questions (Q.K1 to Q.K10 / V541 to V658, C5/V794). In its general function they correspond to the respective standard weight (W1 to W84, WEX), but introducing each countries' VOTING AGE POPULATION as additional factor for the comparison of sample composition and corresponding universe description.

Unlike the regular WEIGHT RESULT FROM TARGET (W1), this corresponding political weight includes the population size weighting factors for Germany (East+West) and the United Kingdom (Great Britain+Northern Ireland). There is no POLITICAL WEIGHT for the separate samples in Germany and the UK.

v55 - W35 POLIT WEIGHT EU6 (VOTING AGE)

W35 POLITICAL WEIGHT EU6 (VOTING AGE)

This POPULATION SIZE WEIGHT refers to the six EC founder members: France, Belgium, Netherlands, West Germany, Italy, and Luxembourg. It adjusts each national sample in proportion to its share in the total population of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EU6 must be applied whenever these six EC founder countries are to be analyzed altogether as a group.

Note:

These political weights are provided as optional for the analysis of voting behaviour related questions (Q.K1 to Q.K10 / V541 to V658, C5/V794). In its general function they correspond to the respective standard weight (W1 to W84, WEX), but introducing each countries' VOTING AGE POPULATION as additional factor for the comparison of sample composition and corresponding universe description.

Weighting variable corrected by the Archive. Cases for East Germany have been recoded to '0' in order to be excluded from weighted calculations.

v56 - W36 POLIT WEIGHT EU9 (VOTING AGE)

W36 POLITICAL WEIGHT EU9 (VOTING AGE)

This POPULATION SIZE WEIGHT adds Denmark, Ireland, Great Britain and Northern Ireland to the EU6 countries. It adjusts each national sample in proportion to its share in the total population of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EU9 must be applied whenever these nine countries as of the 1973 enlargement are to be analyzed altogether as a group.

Note:

These political weights are provided as optional for the analysis of voting behaviour related questions (Q.K1 to Q.K10 / V541 to V658, C5/V794). In its general function they correspond to the respective standard weight (W1 to W84, WEX), but introducing each countries' VOTING AGE POPULATION as additional factor for the comparison of sample composition and corresponding universe description.

Weighting variable corrected by the Archive. Cases for East Germany have been recoded to '0' in order to be excluded from weighted calculations.

v57 - W37 POLIT WEIGHT EU10 (VOTING AGE)

W37 POLITICAL WEIGHT EU10 (VOTING AGE)

This POPULATION SIZE WEIGHT adds Greece to the EU9 countries. It adjusts each national sample in proportion to its share in the total population of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EU10 must be applied whenever these ten countries as of the 1981 enlargement are to be analyzed altogether as a group.

Note:

These political weights are provided as optional for the analysis of voting behaviour related questions (Q.K1 to Q.K10 / V541 to V658, C5/V794). In its general function they correspond to the respective standard weight (W1 to W84, WEX), but introducing each countries' VOTING AGE POPULATION as additional factor for the comparison of sample composition and corresponding universe description.

Weighting variable corrected by the Archive. Cases for East Germany have been recoded to '0' in order to be excluded from weighted calculations.

v58 - W38 POLIT WEIGHT EU12 (VOTING AGE)

W38 POLITICAL WEIGHT EU12 (VOTING AGE)

This POPULATION SIZE WEIGHT adds Spain and Portugal to the EU10 countries. It adjusts each national sample in proportion to its share in the total population of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EU12 must be applied whenever these twelve countries as of the 1986 enlargement are to be analyzed altogether as a group.

Note:

These political weights are provided as optional for the analysis of voting behaviour related questions (Q.K1 to Q.K10 / V541 to V658, C5/V794). In its general function they correspond to the respective standard weight (W1 to W84, WEX), but introducing each countries' VOTING AGE POPULATION as additional factor for the comparison of sample composition and corresponding universe description.

Weighting variable corrected by the Archive. Cases for East Germany have been recoded to '0' in order to be excluded from weighted calculations.

v59 - W39 POLIT WEIGHT EU12+ (VOTING AGE)

W39 POLITICAL WEIGHT EU12+ (VOTING AGE)

This POPULATION SIZE WEIGHT equals WEIGHT EU12 but in addition including East Germany (former German Democratic Republic) after the unification of Germany on October 3, 1990 (Eurobarometer 34). It adjusts each national sample in proportion to its share in the total population of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EU12+ must be applied whenever these twelve member countries are to be analyzed altogether as a group including the Eastern part of Germany (new German federal states).

Note:

These political weights are provided as optional for the analysis of voting behaviour related questions (Q.K1 to Q.K10 / V541 to V658, C5/V794). In its general function they correspond to the respective standard weight (W1 to W84, WEX), but introducing each countries' VOTING AGE POPULATION as additional factor for the comparison of sample composition and corresponding universe description.

v60 - W40 POLIT WEIGHT EU NMS 3 (VOTING AGE)

W40 POLITICAL WEIGHT EU NMS 3 (VOTING AGE)

This POPULATION SIZE WEIGHT only refers to the three new members as of January 1995: Finland, Sweden and Austria. It adjusts each national sample in proportion to its share in the total population of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EU NMS 3 must be applied whenever these three countries are to be analyzed altogether as a group.

Note:

These political weights are provided as optional for the analysis of voting behaviour related questions (Q.K1 to Q.K10 / V541 to V658, C5/V794). In its general function they correspond to the respective standard weight (W1 to W84, WEX), but introducing each countries' VOTING AGE POPULATION as additional factor for the comparison of sample composition and corresponding universe description.

v61 - W41 POLIT WEIGHT EU15 (VOTING AGE)

W41 POLITICAL WEIGHT EU15 (VOTING AGE)

This POPULATION SIZE WEIGHT adds Austria, Finland and Sweden to the EU12+ countries. It adjusts each national sample in proportion to its share in the total population of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EU15 must be applied whenever these 15 countries as of the 1995 enlargement are to be analyzed altogether as a group.

Note:

These political weights are provided as optional for the analysis of voting behaviour related questions (Q.K1 to Q.K10 / V541 to V658, C5/V794). In its general function they correspond to the respective standard weight (W1 to W84, WEX), but introducing each countries' VOTING AGE POPULATION as additional factor for the comparison of sample composition and corresponding universe description.

v62 - W43 POLIT WEIGHT EU NMS 10 (VOTING AGE)

W43 POLITICAL WEIGHT EU NMS 10 (VOTING AGE)

This POPULATION SIZE WEIGHT only refers to the group of the ten new members as of the enlargement in 2004: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia and Slovenia. It adjusts each national sample in proportion to its share in the total population of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EU NMS 10 must be applied whenever these ten countries are to be analyzed altogether as a group.

Note:

These political weights are provided as optional for the analysis of voting behaviour related questions (Q.K1 to Q.K10 / V541 to V658, C5/V794). In its general function they correspond to the respective standard weight (W1 to W84, WEX), but introducing each countries' VOTING AGE POPULATION as additional factor for the comparison of sample composition and corresponding universe description.

v63 - W44 POLIT WEIGHT EU25 (VOTING AGE)

W44 POLITICAL WEIGHT EU25 (VOTING AGE)

This POPULATION SIZE WEIGHT adds Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia and Slovenia to the EU15 countries. It adjusts each national sample in proportion to its share in the total population of this (historical) group of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EU25 must be applied whenever these 25 countries as of the 2004 enlargement are to be analyzed altogether as a group.

Note:

These political weights are provided as optional for the analysis of voting behaviour related questions (Q.K1 to Q.K10 / V541 to V658, C5/V794). In its general function they correspond to the respective standard weight (W1 to W84, WEX), but introducing each countries' VOTING AGE POPULATION as additional factor for the comparison of sample composition and corresponding universe description.

v64 - W45 POLIT WEIGHT AC (BG RO) (VOTING AGE)

W45 POLITICAL WEIGHT AC (BG RO) (VOTING AGE)

This POPULATION SIZE WEIGHT refers to Bulgaria and Romania. It adjusts each national sample in proportion to its share in the total population of this group of future EU accession countries. The post-stratification weighting factors are included. All other countries are excluded from calculation. WEIGHT AC must be applied whenever these two countries are to be analyzed altogether as a group.

Note:

These political weights are provided as optional for the analysis of voting behaviour related questions (Q.K1 to Q.K10 / V541 to V658, C5/V794). In its general function they correspond to the respective standard weight (W1 to W84, WEX), but introducing each countries' VOTING AGE POPULATION as additional factor for the comparison of sample composition and corresponding universe description.

v65 - W52 POLIT WEIGHT EU27 (VOTING AGE)

W52 POLITICAL WEIGHT EU27 (VOTING AGE)

WEIGHT EU27 includes all 25 member countries after the 2004 enlargement, plus the Accession Countries Bulgaria and Romania.

This POPULATION SIZE WEIGHT adjusts each national sample in proportion to its share in the total population of the European Union plus Bulgaria and Romania. It should be used whenever all 27 countries participating in this wave are to be analysed as a group. The post-stratification weighting factors for all samples/countries are included.

Note:

These political weights are provided as optional for the analysis of voting behaviour related questions (Q.K1 to Q.K10 / V541 to V658, C5/V794). In its general function they correspond to the respective standard weight (W1 to W84, WEX), but introducing each countries' VOTING AGE POPULATION as additional factor for the comparison of sample composition and corresponding universe description.

v66 - W54 POLIT WEIGHT EU NMS 12 (VOTING AGE)

W54 POLITICAL WEIGHT EU NMS 12 (VOTING AGE)

This POPULATION SIZE WEIGHT refers to the group of the 12 new member countries as of the enlargement in January 2007: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia, BULGARIA and ROMANIA. It adjusts each national sample in proportion to its share in the total population of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EU NMS 12 must be applied whenever these 12 countries are to be analyzed altogether as a group.

Note:

These political weights are provided as optional for the analysis of voting behaviour related questions (Q.K1 to Q.K10 / V541 to V658, C5/V794). In its general function they correspond to the respective standard weight (W1 to W84, WEX), but introducing each countries' VOTING AGE POPULATION as additional factor for the comparison of sample composition and corresponding universe description.

v67 - W111 POLIT WEIGHT EURO ZONE 2009 (VOTING AGE)

W111 POLITICAL WEIGHT EURO ZONE 2009 (VOTING AGE)

This POPULATION SIZE WEIGHT separates the group of 12 countries which introduced the EURO as of January 1, 2002 (Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland) plus Slovenia which introduced the EURO as of January 1, 2007, plus Cyprus and Malta, which introduced the EURO as of January 1, 2008, plus Slovakia, which introduced the EURO as of January 1, 2009. It adjusts each national sample in proportion to its share in the total population of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EURO ZONE 2009 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

Note:

These political weights are provided as optional for the analysis of voting behaviour related questions (Q.K1 to Q.K10 / V541 to V658, C5/V794). In its general function they correspond to the respective standard weight (W1 to W84, WEX), but introducing each countries' VOTING AGE POPULATION as additional factor for the comparison of sample composition and corresponding universe description.

v68 - W112 POLIT WEIGHT NON EURO ZONE 2009 (VOTING AGE)

W112 POLITICAL WEIGHT NON EURO ZONE 2009 (VOTING AGE)

This POPULATION SIZE WEIGHT separates the group of countries (Denmark, United Kingdom, Sweden, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Bulgaria, Romania) which did not introduce the EURO up to January 1, 2009. It adjusts each national sample in proportion to its share in the total population of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT NON EURO ZONE 2009 must be applied whenever these countries are to be analyzed altogether as a group.

Note:

These political weights are provided as optional for the analysis of voting behaviour related questions (Q.K1 to Q.K10 / V541 to V658, C5/V794). In its general function they correspond to the respective standard weight (W1 to W84, WEX), but introducing each countries' VOTING AGE POPULATION as additional factor for the comparison of sample composition and corresponding universe description.

v69 - W114 POLIT WEIGHT NON EURO ZONE EU NMS 12 (VOTING AGE)

W114 POLITICAL WEIGHT NON EURO ZONE EU NMS 12 (VOTING AGE)

This POPULATION SIZE WEIGHT separates the group of countries among the new member states as of 2007 which did not introduce the EURO up to January 1, 2009 (Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Bulgaria, Romania). It adjusts each national sample in proportion to its share in the total population of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT NON EURO ZONE EU NMS 12 must be applied whenever these countries are to be analyzed altogether as a group.

Note:

These political weights are provided as optional for the analysis of voting behaviour related questions (Q.K1 to Q.K10 / V541 to V658, C5/V794). In its general function they correspond to the respective standard weight (W1 to W84, WEX), but introducing each countries' VOTING AGE POPULATION as additional factor for the comparison of sample composition and corresponding universe description.

v70 - WEX POLIT WEIGHT EXTRA POPULATION (VOTING AGE)

WEX POLITICAL WEIGHT EXTRA POPULATION (VOTING AGE)

WEIGHT EXTRA extrapolates the actual universe for each country (sample), i.e. this weight variable integrates all other available weights, but does not reproduce the number of cases in the data set.

Note:

These political weights are provided as optional for the analysis of voting behaviour related questions (Q.K1 to Q.K10 / V541 to V658, C5/V794). In its general function they correspond to the respective standard weight (W1 to W84, WEX), but introducing each countries' VOTING AGE POPULATION as additional factor for the comparison of sample composition and corresponding universe description.

v328 - QB1AB WORLD POWER: MILITARY STRENGTH

Q.B1AB Most important issue in determining world power in total

Q.B1AB\_3 Its military strength

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes answers to this item in Q.B1A and Q.B1B (V324 and V325).

Note:

See Q.B1A and Q.B1B for complete question text. Variables summarize answers to Q.B1A and Q.B1B (V324 and V325), except for category '7' (DK) (V332).

v334 - QB2B EU CHARACTERISTICS - BEST 2ND

[Q.B2A

And in your opinion, which of the following best characterizes the European Union? Firstly]

Q.B2B

And secondly?

(SHOW CARD - ONE ANSWER PER COLUMN - READ OUT - SAME BOTTOM TO TOP/TOP TO BOTTOM AS IN Q.B1)

- 1 Its economic power
- 2 Its political influence
- 3 Its military strength
- 4 Its cultural influence
- 5 Others (SPONTANEOUS)
- 6 None (SPONTANEOUS)
- 7 DK
- 9 Inap. none or DK in Q.B2A (not coded 1 to 5 in V333)

v338 - QB2AB EU CHARACTERISTICS: CULTURAL INFLUENCE

Q.B2AB Best European Union characteristics in total

Q.B2AB\_4 Its cultural influence

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes answers to this item in Q.B2A and Q.B2B (V333 and V334).

Note:

See Q.B2A and Q.B2B for complete question text. Variables summarize answers to Q.B2A and Q.B2B (V333 and V334), except for category '7' (DK) (V341).

v344 - QB3 GLOBALISATION: WORLDWIDE GOVERNANCE

Q.B3

For each of the following statements, please tell me whether you strongly agree, somewhat agree, somewhat disagree or strongly disagree.

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE - READ OUT - ROTATE)

Q.B3\_3 Globalisation requires common global rules ("worldwide governance")

- 1 Totally agree
- 2 Tend to agree
- 3 Tend to disagree
- 4 Totally disagree
- 5 DK

v390 - QC4 SOCIAL CHANGE - PREFERRED WAY

Q.C4

Which of the following statements best describes your opinion on how to change our society?

(READ OUT – ONE ANSWER ONLY)

- 1 Important changes in our society have to be achieved little by little, even if this approach takes longer
- 2 One can only obtain important changes in our society by acting quickly, even if this means sometimes being radical
- 3 We do not need to change our society (SPONTANEOUS)
- 4 DK

v457 - QE4 SENSE OF BELONGING: EUROPEAN

I would like you to think about the idea of geographical identity. Different people think of this in different ways. People might think of themselves as being European, (NATIONALITY) or from a specific region to different extents. Some people say that with globalisation, people are becoming closer to each other as 'citizens of the world'.

v469 - QF9 EU HOPES - ECONOMY VS ENVIRONMENT

2) TIME LINE: FUTURE - THE EUROPEAN UNION IN 2030

b) HOPES FOR 2030

Q.F9

Let's now talk about your own hopes not your predictions for the future. In 2030, in the European Union, would you prefer a society where more importance is given to the economy, or to the environment?

(ONE ANSWER ONLY)

- 1 The economy
- 2 The environment
- 3 A society where both will have equal importance (SPONTANEOUS)
- 4 No change, the same as today's society (SPONTANEOUS)
- 5 DK

v513 - Q11 CARE FOR PARENTS: ALREADY PAID

5) CITIZEN IN THE EU / BEHAVIOURAL INTENTIONS

Q.I1

ASK ALL

Thinking now about payment for care. Have you already had to pay, are you currently paying, or do you expect one day that you will pay for professional home care or care in an institution for either of your parents? Please tell me all answers that apply.

((READ OUT – MULTIPLE ANSWERS POSSIBLE))

Q.I1\_1 Yes, you have already paid in the past

0 Not mentioned

## v527 - QJ2B SOC WELFARE SYS FUTURE: ENOUGH COVERAGE

Q.J2B

ASK Q.J2B ONLY IN CY-TCC - OTHERS GO TO Q.J3

Let's now think about what will be the social welfare system of our community in 2030. In your opinion, in 2030, your social welfare system,...

(ONE ANSWER PER LINE - READ OUT)

Q.J2B\_1 Will provide wide enough coverage

- 1 Yes, probably
- 2 No, probably not
- 3 DK
- 9 Inap. not CY-TCC (not coded 33 in V6)

v527, weighted by v8

Value	Label	Missing	Count	Percent	Valid Percent
1	Yes, probably		202	0.7	47.5
2	No, probably not		223	0.7	52.5
3	DK	M	75	0.2	
9	Inap. (not 33 in V6)	M	29843	98.4	
	Sum		30343	100.0	100.0
	Valid Cases		425		

## v528 - QJ2B SOC WELFARE SYS FUTURE: TOO EXPENSIVE

Q.J2B

ASK Q.J2B ONLY IN CY-TCC - OTHERS GO TO Q.J3

Let's now think about what will be the social welfare system of our community in 2030. In your opinion, in 2030, your social welfare system,...

(ONE ANSWER PER LINE - READ OUT)

Q.J2B\_2 Will be too expensive for the society of our community

- 1 Yes, probably
- 2 No, probably not
- 3 DK
- 9 Inap. not CY-TCC (not coded 33 in V6)

v528, weighted by v8

Value	Label	Missing	Count	Percent	Valid Percent
1	Yes, probably		284	0.9	74.0
2	No, probably not		100	0.3	26.0
3	DK	M	115	0.4	
9	Inap. (not 33 in V6)	M	29843	98.4	
	Sum		30343	100.0	100.0
	Valid Cases		385		

v529 - QJ3 PENSIONS FUTURE - RESPONDENT

6) EVALUATION OF THE SOCIAL SYSTEM, TODAY AND TOMORROW

PENSIONS

Q.J3

ASK ALL

At the moment, when you think of the future of your pension, would you say that you are...?

(READ OUT – ONE ANSWER ONLY)

- 1 Very confident
- 2 Somewhat confident
- 3 Not very confident
- 4 Not at all confident
- 5 DK

v530 - QJ4A PENSION SYSTEM - FINANC ACCEPT RESP

Q.J4A

DO NOT ASK Q.J4A AND Q.J5A IN CY-TCC - ASK Q.J4A IF "CURRENTLY WORK", CODE 5 TO 18 IN D15a - CY-TCC GO TO Q.J4B - OTHERS GO TO Q.J5A

If you had to choose from the following possibilities aimed at guaranteeing the financing of the pension system in (OUR COUNTRY), which one would be most acceptable for you?

(READ OUT – ONE ANSWER ONLY)

- 1 Work and contribute for longer
- 2 Maintain the retirement age and increase your social security contributions
- 3 Maintain the current retirement age and accept that you will receive less
- 4 A combination of all three (SPONTANEOUS)
- 5 None of these ((SPONTANEOUS)
- 6 DK
- 9 Inap. not currently doing paid work (coded 1 to 4 in V669)
- 99 Inap. CY-TCC (coded 33 in V6)

## v532 - QJ4B PENSION SYSTEM - FINANC ACCEPT RESP

Q.J4B

ASK Q.J4B AND Q.J5B ONLY IN CY-TCC - ASK Q.J4B IF "CURRENTLY WORK", CODE 5 TO 18 IN D.15A - OTHERS GO TO

Q.J5B

If you had to choose from the following options aimed at guaranteeing the finance of the pension system in our community, which one would be most acceptable to you?

(SHOW CARD - READ OUT – ONE ANSWER ONLY)

- 1 Work and contribute for longer
- 2 Maintain the retirement age and increase your social security contributions
- 3 Maintain the current retirement age and accept that you will receive less
- 4 A combination of all three (SPONTANEOUS)
- 5 None of these (SPONTANEOUS)
- 6 DK
- 9 Inap. not currently doing paid work (coded 1 to 4 in V669)
- 99 Inap. not CY-TCC (not coded 33 in V6)

v532, weighted by v8

Value	Label	Missing	Count	Percent	Valid Percent
1	Work and contribute for longer		46	0.2	23.0
2	Maintain retirement age, increase contributions		96	0.3	48.0
3	Maintain retirement age, receive less		19	0.1	9.5
4	Combination of all three (SPONT.)		28	0.1	14.0
5	None of these (SPONT.)		11	0.0	5.5
6	DK	M	35	0.1	
9	Inap. (1 to 4 in V669)	M	265	0.9	
99	Inap. (not 33 in V6)	M	29843	98.4	
	Sum		30343	100.0	100.0
	Valid Cases		200		

## v533 - QJ5B PENSION SYSTEM - FINANC ACCEPT S/O WORKING

## Q.J5B

ASK Q.J5B ONLY IN CY-TCC - ASK Q.J5B IF "NOT CURRENTLY WORK", CODE 1 TO 4 IN D.15A - OTHERS GO TO Q.J6

In your opinion, which of the following options aimed at guaranteeing the finance of the pension system in our community, would be most acceptable for someone working?

(SHOW CARD - READ OUT – ONE ANSWER ONLY)

- 1 Work and contribute for longer
- 2 Maintain the retirement age and increase social security contributions paid by the workers
- 3 Maintain the current retirement age and accept that one will receive less
- 4 A combination of all three (SPONTANEOUS)
- 5 None of these (SPONTANEOUS)
- 6 DK
- 9 Inap. currently doing paid work (coded 5 to 18 in V669)
- 99 Inap. not CY-TCC (not coded 33 in V6)

v533, weighted by v8

Value	Label	Missing	Count	Percent	Valid Percent
1	Work and contribute for longer		32	0.1	14.5
2	Maintain retirement age, increase contributions		132	0.4	59.7
3	Maintain retirement age, receive less		24	0.1	10.9
4	Combination of all three (SPONT.)		19	0.1	8.6
5	None of these (SPONT.)		14	0.0	6.3
6	DK	M	43	0.1	
9	Inap. (5 to 18 in V669)	M	235	0.8	
99	Inap. (not 33 in V6)	M	29843	98.4	
	Sum		30343	100.0	100.0

Which party did you vote for in these recent European Parliament elections?

(SHOW CARD – READ OUT – ONE ANSWER ONLY – INSERT LIST OF PARTIES INCLUDED IN EE 2009 IN YOUR COUNTRY)

Q.K2\_FR

Last vote (European elections): France

50 Libertas (MPF-CPNT) - Liste Libertas constituée du Mouvement pour la France de Philippe de Villiers et de Chasse, pêche, nature et traditions de Frédéric Nihous (Libertas composed of Movement for France by Philippe de Villiers and Hunting, Fishing, Nature and Tradition by Frédéric Nihous)

101 LO - Liste Lutte Ouvrière de Nathalie Arthaud (Workers' Struggle by Nathalie Arthaud) (5)

102 NPA - Liste du Nouveau Parti Anticapitaliste d'Olivier Besancenot (New Anticapitalist Party by Olivier Besancenot)

103 FG - Liste du Front de Gauche constitué du Parti Communiste de Marie-George Buffet et du Parti de Gauche de Jean-Luc Mélenchon (Left Front consisting of Communist Party by Marie-George Buffet and Party of the Left by Jean-Luc Mélenchon)

200 PS - Liste du Parti Socialiste de Martine Aubry (Socialist Party by Martine Aubry) (20)

301 Liste d'Alternative Libérale de Sabine Hérault (Alternative Liberals by Sabine Hérault) (not mentioned)

304 MoDem - Liste du MoDem (Mouvement démocrate) de François Bayrou (Democratic Movement by François Bayrou) (40)

450 Liste de l'UMP et du Nouveau Centre de Xavier Bertrand (Union for a Popular Movement & New Centre by Xavier Bertrand)

508 DLR - Liste Debout la République de Nicolas Dupont-Aignan (Arise the Republic by Nicolas Dupont-Aignan)

600 FN - Liste du Front national de Jean-Marie Le Pen (National front by Jean-Marie Le Pen) (80)

603 Liste du Parti de la France de Carl Lang (Party of France by Carl Lang) (not mentioned)

801 Liste Europe Ecologie (avec les Verts) de Daniel Cohn-Bendit (Europe Ecologie (composed of The Greens and Daniel Cohn-Bendit))

803 AEI - Liste de l'Alliance Ecologiste Indépendante, constituée du Mouvement écologique indépendant d'Antoine Waechter, de Génération écologie et de France en action (Independent Ecological Alliance composed of the Independent Ecological Movement by Antoine Waechter, Ecology Generation and France in Action)

990 Other

999 Inap. did not vote in European Parliament elections (not coded 1 in V541)

9999 Inap. not FR (not coded 1 in V6)

Derivation:

Starting with EB69.2 the coding of this variable is basically standardized in accordance with the "ZEUS Party Family Code" which was developed for the "Mannheim Eurobarometer Trend File" (GESIS study ZA3521). The standard is based on a three digit coding. The first digit represents the party family and is consistent across countries. The second and third digits identify the individual party within this family and are country-specific (not comparable across countries). The assignment of parties to families is done according to their OVERALL ideological orientations. Nevertheless the consistency of party coding over time is maintained with priority. Former standard party codes as applied for archive dataset editions up to Eurobarometer 56.3 are reported in brackets, if applicable.

The slightly modified ZEUS Party Family Codes are: The ZEUS Party Family codes are: (001-099) Not-assigned; (100-199)

Communists; (200-299) Socialists; (300-399) Liberals; (400-499) Christian-Democrats; (500-599) Conservatives; (600-699) Extreme Right / Nationalists; (700-799) Regionalists, Ethnic parties (modified); (800-899) Environmental Parties; (900-949) Agricultural Parties;

(950-979) Independent candidates, special issue parties or splinter groups (modified); (980-989) electoral alliances across party family groups (new). Codes 990-999 contain the response "Other party" and various missing value responses. Users may modify these codings or part of these codings in order to suit their needs such as possible alternative ideological party classifications.

Note:

Please notice that special political weights (V54-V70) are provided as optional for the analysis of voting behaviour related questions (Q.K1 to Q.K10 / V541 to V658, C5/V794).

- 990 Other
- 999 Inap. did not vote in European Parliament elections (not coded 1 in V541)
- 9999 Inap. not DE-E (not coded 14 in V6)

Derivation:

Starting with EB69.2 the coding of this variable is basically standardized in accordance with the "ZEUS Party Family Code" which was developed for the "Mannheim Eurobarometer Trend File" (GESIS study ZA3521). The standard is based on a three digit coding. The first digit represents the party family and is consistent across countries. The second and third digits identify the individual party within this family and are country-specific (not comparable across countries). The assignment of parties to families is done according to their OVERALL ideological orientations. Nevertheless the consistency of party coding over time is maintained with priority. Former standard party codes as applied for archive dataset editions up to Eurobarometer 56.3 are reported in brackets, if applicable.

The slightly modified ZEUS Party Family Codes are: The ZEUS Party Family codes are: (001-099) Not-assigned; (100-199) Communists; (200-299) Socialists; (300-399) Liberals; (400-499) Christian-Democrats; (500-599) Conservatives; (600-699) Extreme Right / Nationalists; (700-799) Regionalists, Ethnic parties (modified); (800-899) Environmental Parties; (900-949) Agricultural Parties; (950-979) Independent candidates, special issue parties or splinter groups (modified); (980-989) electoral alliances across party family groups (new). Codes 990-999 contain the response "Other party" and various missing value responses. Users may modify these codings or part of these codings in order to suit their needs such as possible alternative ideological party classifications.

Note:

Please notice that special political weights (V54-V70) are provided as optional for the analysis of voting behaviour related questions (Q.K1 to Q.K10 / V541 to V658, C5/V794). Unlike the standard WEIGHT RESULT FROM TARGET, the corresponding political weight does only provide weighting for East and West Germany as a whole and no factor for East and West Germany as separate units.

Note:

Only one national field questionnaire is provided for the United Kingdom, including equally parties from Great Britain and Northern Ireland.

Please notice that special political weights (V54-V70) are provided as optional for the analysis of voting behaviour related questions (Q.K1 to Q.K10 / V541 to V658, C5/V794). Unlike the standard WEIGHT RESULT FROM TARGET, the corresponding political weight does only provide weighting for the United Kingdom as a whole and no factors for Great Britain and Northern Ireland as separate units.

ASK Q.K ONLY IN EU27

Q.K2

ASK Q.K2 AND Q.K3A IF "VOTED", CODE 1 IN Q.K1 – OTHERS GO TO Q.K3B

Which party did you vote for in these recent European Parliament elections?

(SHOW CARD – READ OUT – ONE ANSWER ONLY – INSERT LIST OF PARTIES INCLUDED IN EE 2009 IN YOUR COUNTRY)

Q.K2\_GB-NIR

Last vote (European elections): Northern Ireland

- 50 UCUNF - Ulster Conservatives and Unionists (New Force)
- 100 SF - Sinn Fein (81)
- 200 Labour - The Labour Party (20) (not mentioned)
- 201 SDLP - Social Democratic and Labour Party (15/30)
- 301 LD - The Liberal Democrats (40) (not mentioned)
- 500 Conservatives - The Conservative Party (60)
- 600 BNP - British National Party (80) (not mentioned)
- 701 DUP - Democratic Unionist Party (62)
- 800 Greens - The Green Party (51)
- 951 UKIP - UK Independence Party (70) (not mentioned)
- 990 Other
- 999 Inap. did not vote in European Parliament elections (not coded 1 in V541)
- 9999 Inap. not GB-NIR (not coded 10 in V6)

Derivation:

Starting with EB69.2 the coding of this variable is basically standardized in accordance with the "ZEUS Party Family Code" which was developed for the "Mannheim Eurobarometer Trend File" (GESIS study ZA3521). The standard is based on a three digit coding. The first digit represents the party family and is consistent across countries. The second and third digits identify the individual party within this family and are country-specific (not comparable across countries). The assignment of parties to families is done according to their OVERALL ideological orientations. Nevertheless the consistency of party coding over time is maintained with priority. Former standard party codes as applied for archive dataset editions up to Eurobarometer 56.3 are reported in brackets, if applicable.

The slightly modified ZEUS Party Family Codes are: The ZEUS Party Family codes are: (001-099) Not-assigned; (100-199) Communists; (200-299) Socialists; (300-399) Liberals; (400-499) Christian-Democrats; (500-599) Conservatives; (600-699) Extreme Right / Nationalists; (700-799) Regionalists, Ethnic parties (modified); (800-899) Environmental Parties; (900-949) Agricultural Parties; (950-979) Independent candidates, special issue parties or splinter groups (modified); (980-989) electoral alliances across party family groups (new). Codes 990-999 contain the response "Other party" and various missing value responses. Users may modify these codings or part of these codings in order to suit their needs such as possible alternative ideological party classifications.

Note:

Only one national field questionnaire is provided for the United Kingdom, including equally parties from Great Britain and Northern Ireland.

Please notice that special political weights (V54-V70) are provided as optional for the analysis of voting behaviour related questions

(Q.K1 to Q.K10 / V541 to V658, C5/V794). Unlike the standard WEIGHT RESULT FROM TARGET, the corresponding political weight does only provide weighting for the United Kingdom as a whole and no factors for Great Britain and Northern Ireland as separate units.

ASK Q.K ONLY IN EU27

Q.K2

ASK Q.K2 AND Q.K3A IF "VOTED", CODE 1 IN Q.K1 – OTHERS GO TO Q.K3B

Which party did you vote for in these recent European Parliament elections?

(SHOW CARD – READ OUT – ONE ANSWER ONLY – INSERT LIST OF PARTIES INCLUDED IN EE 2009 IN YOUR COUNTRY)

Q.K2\_AT

Last vote (European elections): Austria

- 100 KPÖ - Kommunistische Partei Österreichs (The Communist Party of Austria) (10)
- 200 SPÖ - Sozialdemokratische Partei Österreichs (Social Democratic Party of Austria) (20)
- 300 JuLis - Junge Liberale Österreich (Young Liberals Austria)
- 401 ÖVP - Österreichische Volkspartei (Austrian People's Party) (60)
- 600 FPÖ - Freiheitliche Partei Österreichs (Freedom Party of Austria) (80)
- 601 BZÖ - Bündnis Zukunft Österreich (The Alliance for the Future of Austria) (81)
- 800 Die Grünen – Die Grüne Alternative (The Greens – The Green Alternative) (50)
- 950 Liste Hans Peter Martin
- 999 Inap. did not vote in European Parliament elections (not coded 1 in V541)
- 9999 Inap. not AT (not coded 18 in V6)

Derivation:

Starting with EB69.2 the coding of this variable is basically standardized in accordance with the "ZEUS Party Family Code" which was developed for the "Mannheim Eurobarometer Trend File" (GESIS study ZA3521). The standard is based on a three digit coding. The first digit represents the party family and is consistent across countries. The second and third digits identify the individual party within this family and are country-specific (not comparable across countries). The assignment of parties to families is done according to their OVERALL ideological orientations. Nevertheless the consistency of party coding over time is maintained with priority. Former standard party codes as applied for archive dataset editions up to Eurobarometer 56.3 are reported in brackets, if applicable.

The slightly modified ZEUS Party Family Codes are: The ZEUS Party Family codes are: (001-099) Not-assigned; (100-199) Communists; (200-299) Socialists; (300-399) Liberals; (400-499) Christian-Democrats; (500-599) Conservatives; (600-699) Extreme Right / Nationalists; (700-799) Regionalists, Ethnic parties (modified); (800-899) Environmental Parties; (900-949) Agricultural Parties; (950-979) Independent candidates, special issue parties or splinter groups (modified); (980-989) electoral alliances across party family groups (new). Codes 990-999 contain the response "Other party" and various missing value responses. Users may modify these codings or part of these codings in order to suit their needs such as possible alternative ideological party classifications.

Note:

Please notice that special political weights (V54-V70) are provided as optional for the analysis of voting behaviour related questions (Q.K1 to Q.K10 / V541 to V658, C5/V794).

- 999 Inap. did not vote in European Parliament elections (not coded 1 in V541)
- 9999 Inap. not MT (not coded 25 in V6)

Derivation:

Starting with EB69.2 the coding of this variable is basically standardized in accordance with the "ZEUS Party Family Code" which was developed for the "Mannheim Eurobarometer Trend File" (GESIS study ZA3521). The standard is based on a three digit coding. The first digit represents the party family and is consistent across countries. The second and third digits identify the individual party within this family and are country-specific (not comparable across countries). The assignment of parties to families is done according to their OVERALL ideological orientations. Nevertheless the consistency of party coding over time is maintained with priority. Former standard party codes as applied for archive dataset editions up to Eurobarometer 56.3 are reported in brackets, if applicable.

The slightly modified ZEUS Party Family Codes are: The ZEUS Party Family codes are: (001-099) Not-assigned; (100-199) Communists; (200-299) Socialists; (300-399) Liberals; (400-499) Christian-Democrats; (500-599) Conservatives; (600-699) Extreme Right / Nationalists; (700-799) Regionalists, Ethnic parties (modified); (800-899) Environmental Parties; (900-949) Agricultural Parties; (950-979) Independent candidates, special issue parties or splinter groups (modified); (980-989) electoral alliances across party family groups (new). Derivation:

This additional variable merges data for all countries in accordance with former Eurobarometer archive dataset editions.

Note:

See Q.K2 (V542 to V572) for complete question text and further information.

Please notice that special political weights (V54-V70) are provided as optional for the analysis of voting behaviour related questions (Q.K1 to Q.K10 / V541 to V658, C5/V794).

Belgium (V543): Please notice that political party "Front National" is not listed in the field questionnaire but included in the official report.

Germany-West (V546), Germany-East (V547): Unlike the standard WEIGHT RESULT FROM TARGET, the corresponding political weight does only provide weighting for East and West Germany as a whole and no factor for East and West Germany as separate units.

Luxembourg (V549): The German version of the national field questionnaire for Luxembourg erroneously lists political parties for Germany.

United Kingdom (V552), Great Britain (V553), Northern Ireland (V554): Only one national field questionnaire is provided for the United Kingdom, including equally parties from Great Britain and Northern Ireland.

Great Britain (V553), Northern Ireland (V554): Unlike the standard WEIGHT RESULT FROM TARGET, the corresponding political weight does only provide weighting for the United Kingdom as a whole and no factors for Great Britain and Northern Ireland as separate units.

Sweden (V559): Political party "Piratpartiet" is not listed in the field questionnaire but included in the official report.

Latvia (V565): Political party "„Tēvzemei un Brīvībai"/LNNK" is not listed in the field questionnaire but included in the official report.

Slovakia (V569): Political parties "Smer - Sociálna demokracia" and "Strana demokratickej ľavice" are not listed in the field questionnaire but included in the official report.

v574 - QK3A EUROPEAN ELECTIONS DECISION TO VOTE

POST ELECTION SURVEY

DECISION DATE

ASK Q.K ONLY IN EU27

ASK Q.K2 AND Q.K3A IF "VOTED", CODE 1 IN Q.K1

Q.K3A

When did you decide to vote for the political party or candidate you voted for in the recent European Parliament elections?  
(SHOW CARD – READ OUT – ONE ANSWER ONLY)

- 1 You have always voted like this
- 2 You decided a few months ago
- 3 You decided a few weeks ago
- 4 You decided a few days before the Elections
- 5 You decided on the day of the Election
- 6 DK
- 9 Inap. did not vote in European Parliament elections (not coded 1 in V541)
- 99 Inap. not EU27 (not coded 1 to 30 in V6)

Note:

Please notice that special political weights (V54-V70) are provided as optional for the analysis of voting behaviour related questions (Q.K1 to Q.K10 / V541 to V658, C5/V794).

v645 - QK5AB EUROP ELECT PARTICIP ISSUE: DK (QK5A ONLY)

Q.K5AB Issues which made respondents vote to European Elections in total

Q.K5AB\_18 DK (Q.K5A only)

0 Not mentioned

1 Mentioned

9 Inap. None or DK or "Inap." in Q.K5A (not coded 1 to 16 in V609)

99 Inap. not EU27 (not coded 1 to 30 in V6)

Derivation:

This variable repeats answers to this item in Q.K5A (V609).

Note:

See Q.K5A and Q.K5B for complete question text. Variable repeats answers to category '18' (DK) in Q.K5A (V609), while all other answers to Q.K5A are summarized with Q.K5B (V610 to V627) in variables V628 to V644.

Please notice that special political weights (V54-V70) are provided as optional for the analysis of voting behaviour related questions (Q.K1 to Q.K10 / V541 to V658, C5/V794).

Question Q.K6 not asked.

POST ELECTION SURVEY

THE EXPOSURE TO THE ELECTORAL CAMPAIGN

ASK Q.K ONLY IN EU27

Q.K8

Personally, do you remember having seen on TV, in the Internet or on posters, read in newspapers or heard on the radio a campaign encouraging people to go to vote on the European elections?

(ONE ANSWER ONLY)

- 1 Yes, remember
- 2 No, don't remember
- 3 DK
- 9 Inap. not EU27 (not coded 1 to 30 in V6)

Note:

Please notice that special political weights (V54-V70) are provided as optional for the analysis of voting behaviour related questions (Q.K1 to Q.K10 / V541 to V658, C5/V794).

v660 - D1 LEFT-RIGHT PLACEMENT - RECODED 3 CAT

D.1R1 Left - right scale (RECODED)

- 1 (1 - 4) Left
- 2 (5 - 6) Centre
- 3 (7 -10) Right
- 9 DK/Refusal

Derivation:

This variable collapses answers to D.1 into three categories.

Note:

See D.1 for complete question text.

v662 - D7 MARITAL STATUS

D.7

Could you give me the letter which corresponds best to your own current situation?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

MARRIED OR REMARRIED

- 1 Married or remarried: Living without children
- 2 Married or remarried: Living with the children of this marriage
- 3 Married or remarried: Living with the children of a previous marriage
- 4 Married or remarried: Living with the children of this marriage and of a previous marriage

SINGLE LIVING WITH A PARTNER

- 5 Single living with a partner: Living without children
- 6 Single living with a partner: Living with the children of this union
- 7 Single living with a partner: Living with the children of a previous union
- 8 Single living with a partner: Living with the children of this union and of a previous union

SINGLE

- 9 Single: Living without children
- 10 Single: Living with children

DIVORCED OR SEPARATED

- 11 Divorced or separated: Living without children
- 12 Divorced or separated: Living with children

WIDOW

- 13 Widow: Living without children
- 14 Widow: Living with children

15 Other (SPONTANEOUS)

97 Refusal (SPONTANEOUS)

Note:

Original code "16" recoded to "97".

Original answer text for categories '5', '6' and '7' in the basic bilingual questionnaire is not correct. "Marriage" should be read "marriage/partnership" as documented in the UK field questionnaire.

Last trend: EB71.2, D.7

v663 - D8 AGE EDUCATION

D.8

How old were you when you stopped full-time education?

(IF "STILL STUDYING", CODE '00' - IF "NO EDUCATION" CODE '01' - IF "REFUSAL" CODE '98' - IF "DK" CODE '99')

- 0 Refusal
- 2 2 years
- 63 63 years
- 97 No full-time education
- 98 Still studying
- 99 DK

Note:

Original code "00" recoded to "98".

Original code "01" recoded to "97".

Original code "98" recoded to "0".

Actual number is coded.

Due to a deviant specification in the coding instruction in the Portuguese field questionnaire data for Portugal have been corrected according to the basic questionnaire.

Last trend: EB71.2, D.8

v664 - D8 AGE EDUCATION - RECODED

D.8R Age when finished full-time education - RECODED

- 1 Up to 14 years
- 2 15 years
- 3 16 years
- 4 17 years
- 5 18 years
- 6 19 years
- 7 20 years
- 8 21 years
- 9 22 years and older
- 10 Still studying
- 11 No full-time education
- 97 Refusal
- 98 DK

Note:

See D.8 for complete question text.

Due to a deviant specification in the coding instruction in the Portuguese field questionnaire data for Portugal have been corrected according to the basic questionnaire.

v666 - D11 AGE EXACT

D.11

How old are you?

15 15 years

98 98 years

Note:

Actual number is coded.

Last trend: EB71.2, D.11

v667 - D11 AGE RECODED - FOUR GROUPS

D.11R1 AGE - RECODED IN FOUR GROUPS

- 1 15 - 24 years
- 2 25 - 39 years
- 3 40 - 54 years
- 4 55 years and older

Derivation:

This variable collapses answers to D.11 into four categories.

Note:

See D.11 for complete question text.

v668 - D11 AGE RECODED - SIX GROUPS

D.11R2 AGE - RECODED IN SIX GROUPS

- 1 15 - 24 years
- 2 25 - 34 years
- 3 35 - 44 years
- 4 45 - 54 years
- 5 55 - 64 years
- 6 65 years and older

Derivation:

This variable collapses answers to D.11 into six categories.

Note:

See D.11 for complete question text.

v670 - D15B OCCUPATION OF RESPONDENT - LAST JOB

D.15B

ASK D.15B ONLY IF NOT DOING ANY PAID WORK CURRENTLY - CODES 1 TO 4 IN D.15A

Did you do any paid work in the past? What was your last occupation?

SELF EMPLOYED

- 1 Farmer
- 2 Fisherman
- 3 Professional (lawyer, medical practitioner, accountant, architect, etc.)
- 4 Owner of a shop, craftsmen, other self-employed person
- 5 Business proprietors, owner (full or partner) of a company

EMPLOYED

- 6 Employed professional (employed doctor, lawyer, accountant, architect)
- 7 General management, director or top management (managing directors, director general, other director)
- 8 Middle management, other management (department head, junior manager, teacher, technician)
- 9 Employed position, working mainly at a desk
- 10 Employed position, not at a desk but travelling (salesmen, driver, etc.)
- 11 Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, etc.)
- 12 Supervisor
- 13 Skilled manual worker
- 14 Other (unskilled) manual worker, servant

15 Never did any paid work

99 Inap. currently doing paid work (not coded 1 to 4 in V669)

Note:

In accordance with former waves coding results to be (correctly) shifted compared to the questionnaire.

Last trend: EB71.2, D.15B

v676 - D40C HOUSEHOLD COMPOSITION: AGED 10-14

D.40C

Could you tell me how many children aged 10 to 14 years old live in your household?

(READ OUT - WRITE DOWN)

- 0 None
- 1 One
- 2 Two
- 3 Three
- 4 Four
- 5 Five
- 6 Six
- 7 Seven
- 9 Nine
- 10 Ten
- 13 Thirteen
- 14 Fourteen

Note:

Last trend: EB71.2, D.40C

v679 - D40 HOUSEHOLD COMPOSITION: SIZE A+B+C (REC)

D.40R HOUSEHOLD COMPOSITION: SIZE (A+B+C) (RECODED)

- 1 One
- 2 Two
- 3 Three
- 4 Four
- 5 Five
- 6 Six
- 7 Seven or more

Derivation:

This variable groups the summarized variable V678.

Note:

See V672, V674 and V676 for complete question text.

Generated by the Archive in accordance with former surveys.

v699 - D62 INTERNET USE FREQ: AT PLACE OF WORK

D.62

Could you tell me if...?

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE - READ OUT)

D.62\_2 You use the Internet on your place of work

- 1 Everyday / Almost everyday
- 2 Two or three times a week
- 3 About once a week
- 4 Once or twice a month
- 5 Less often
- 6 Never
- 7 No Internet access (SPONTANEOUS)

Note:

Last trend: EB71.2, D.62

v703 - P3 DURATION OF INTERVIEW

P.3 Number of minutes the interview lasted

15 15 minutes

284 284 minutes

Note:

Actual number is coded.

Last trend: EB71.2, P.3

v704 - P3 DURATION OF INTERVIEW - RECODED

P.3R Number of minutes the interview lasted - RECODED

- 1 Up to 14 minutes
- 2 15 - 29 minutes
- 3 30 - 44 minutes
- 4 45 - 59 minutes
- 5 60 - 74 minutes
- 6 75 - 89 minutes
- 7 90 minutes and more

Derivation:

This variable collapses codes in P.3 into seven categories.

Note:

Last trend: EB71.2, P.6

	Sum		30343	100.0	100.0
	Valid Cases		1012		

## v714 - P6 SIZE OF COMMUNITY - IRELAND

P.6\_IE (Objective) Size of community: Ireland

- 1 Less than 1.500 inhabitants
- 2 1.500 to 4.999 inhabitants
- 3 5.000 to 10.000 inhabitants
- 4 More than 10.000 inhabitants
- 5 Cities/County Boroughs
- 99 Inap. not IE (not coded 8 in V6)

Note:

Last trend: EB71.2, P.6

v714, weighted by v8

Value	Label	Missing	Count	Percent	Valid Percent
1	Less than 1.500		386	1.3	38.4
2	1.500 to 4.999		56	0.2	5.6
3	5.000 to 10.000		63	0.2	6.3
4	More than 10.000		145	0.5	14.4
5	Cities/County Boroughs		355	1.2	35.3
99	Inap. (not 8 in V6)	M	29337	96.7	
	Sum		30343	100.0	100.0
	Valid Cases		1006		

## v715 - P6 SIZE OF COMMUNITY - UNITED KINGDOM

P.6\_GB (Objective) Size of community: United Kingdom

- 1 Rural
- 2 Urban
- 3 Metropolitan
- 99 Inap. not GB (not coded 9 or 10 in V6)

## Note:

The original variable integrated data for Northern Ireland (codes 1-2, 6) and Great Britain (codes 3-5). The original categories (value label) were corrected after consultation with TNS OPINION & SOCIAL. In order to facilitate the analysis for the United Kingdom as a whole, identical categories have been combined. For Northern Ireland code 3 ("Metropolitan") has been recoded from code 6 (DK) in accordance with P7 Region I for the United Kingdom (if coded 1 = "Belfast"). In Eurobarometer 62 to 66 "Belfast" is coded as "Urban" together with other communities; former Eurobarometer have different categories for community size in Northern Ireland.

For meaningful results this variable needs to be weighted by W4 WEIGHT UNITED KINGDOM (V10) or be used for Great Britain and Northern Ireland separately.

Last trend: EB71.2, P.6

v715, weighted by v10

Value	Label	Missing	Count	Percent	Valid Percent
1	Rural		224	16.6	16.6
2	Urban		667	49.3	49.3
3	Metropolitan		461	34.1	34.1
99	Inap. (not 9 or 10 in V6)	M	0	0.0	
	Sum		1352	100.0	100.0
	Valid Cases		1352		

## v716 - P6 SIZE OF COMMUNITY - GREECE

P.6\_GR (Objective) Size of community: Greece

- 1 Rural
- 2 Semi-urban
- 3 Urban
- 4 Thessaloniki
- 5 Athens
- 99 Inap. not GR (not coded 11 in V6)

Note:

Last trend: EB71.2, P.6

v716, weighted by v8

Value	Label	Missing	Count	Percent	Valid Percent
1	Rural		258	0.9	25.8
2	Semi-urban		126	0.4	12.6
3	Urban		223	0.7	22.3
4	Thessaloniki		78	0.3	7.8
5	Athens		316	1.0	31.6
99	Inap. (not 11 in V6)	M	29343	96.7	
	Sum		30343	100.0	100.0
	Valid Cases		1000		

## v717 - P6 SIZE OF COMMUNITY - SPAIN

P.6\_ES (Objective) Size of community: Spain

- 1 Up to 2.000 inhabitants
- 2 2.001 - 10.000 inhabitants
- 3 10.001 - 50.000 inhabitants
- 4 50.001 - 100.000 inhabitants
- 5 100.001 - 500.000 inhabitants
- 6 500.001 - 1.000.000 inhabitants
- 7 More than 1.000.000 inhabitants
- 99 Inap. not ES (not coded 12 in V6)

Note:

Last trend: EB71.2, P.6

v717, weighted by v8

Value	Label	Missing	Count	Percent	Valid Percent
1	Up to 2.000		74	0.2	7.4

9	Inap. (not 34 in V6)	M	29335	96.7	
	Sum		30343	100.0	100.0
	Valid Cases		1008		

v794 - C5 EUROPEAN POLITICAL PARTY PREFERENCE

C.5 European Party Parliamentary Preference Index

- 0 NA (GB-GBN only)
- 1 EPP - Group of the European People's Party
- 2 S&D - Group of the Progressive Alliance of Socialists and Democrats in the European Parliament
- 3 ALDE - Group of the Alliance of Liberals and Democrats for Europe
- 4 GREENS/EFA - Group of the Greens / European Free Alliance
- 5 ECR - European Conservatives and Reformists Group
- 6 GUE/NGL - Confederal group of the European United Left / Nordic Green Left
- 7 EFD - Europe of Freedom and Democracy Group
- 8 Non-attached
- 9 No clear attribution
- 10 Not represented (other parties)
- 99 Inap. did not vote in European Parliament elections (not coded 1 in V541)
- 999 Inap. not EU27 (not coded 1 to 30 in V6)

Derivation:

This index is based upon the last vote question Q.K2: "Which party did you vote for in these recent European Parliament elections?"

"

Answers are grouped according to the affiliation of the representatives of the respective party to a group in the European Parliament after the June elections in 2009. The variable is constructed by the Archive mapping the country specific variables V542 to V572 to the party group structure of the 7th EU-Parliament period (2009-2014).

Unlike EUROPEAN PARTY PARLIAMENTARY PREFERENCE INDEX variables up to EB56.3, supporters of parties not represented in the 7th EU-Parliament but represented in former election periods are NOT coded as belonging to the European Parliament group their party has previously been affiliated with. Supporters of parties represented in the European Parliament whose MEPs are not affiliated with any group are labelled "Non-attached", supporters of parties not represented in the European Parliament are labelled "Not represented (other parties)". In some cases "No clear attribution" may be possible.

Different internet resources were used for information on the respective party affiliations (reference date 8th February, 2011):

#### v797 - INTERVIEWER ID

##### Original Interviewer Identification Number

This is the original interviewer identification number as supplied by TNS OPINION & SOCIAL. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 03: West Germany; 04: East Germany; 05: Greece; 06: Spain; 07: Finland; 08: France; 09: Ireland; 10: Italy; 11: Luxembourg; 12: Netherlands; 13: Austria; 14: Portugal; 15: Sweden; 16: Great Britain; 17: Northern Ireland; 18: Cyprus (Republic); 19: Czech Republic; 20: Estonia; 21: Hungary; 22: Latvia; 23: Lithuania; 24: Malta; 25: Poland; 26: Slovakia; 27: Slovenia; 28: Bulgaria; 29: Romania; 30: Turkey; 31: Croatia; 32: Cyprus (CY-TCC); 33: Macedonia). The remaining digits contain the country-specific interviewer id numbers.

0 NA

##### Note:

Actual number is coded.

The interviewer ID is missing for 63 cases from Luxembourg (coded '0').

v798 - ORIGINAL CASE ID (TNS COUNTRY ID + INTERVIEW ID)

ORIGINAL CASE ID (TNS COUNTRY ID + TNS INTERVIEW ID)

This original respondent identification is composed of the original TNS country code and the original TNS interview number. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 04: Greece; 05: Spain; 06: Finland; 07: France; 08: Ireland; 09: Italy; 10: Luxembourg; 11: Netherlands; 12: Austria; 13: Portugal; 14: Sweden; 20: Germany West; 21: Germany East; 22: Great Britain; 23: Northern Ireland; 31: Bulgaria; 32: Cyprus (Republic); 33: Czech Republic; 34: Estonia; 35: Hungary; 36: Latvia; 37: Lithuania; 38: Malta; 39: Poland; 40: Romania; 41: Slovakia; 42: Slovenia; 43: Turkey; 46: Croatia; 57: Cyprus (CY-TCC); 63: Macedonia). The remaining digits contain the country-specific questionnaire numbers.

Note:

Actual number is coded. This case ID number includes three duplicates.
