## Acknowledgements

---

Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences.

## Introduction and preliminary remarks

---

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

### Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (<http://zacat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

### Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

### Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

## 1.2 Content

### 1.2.1 Abstract

This round of Eurobarometer surveys diverged from the Standard Eurobarometer measures and queried respondents on the following major area of focus: (1) consumer empowerment. The survey focused on consumer issues. Respondents were asked when they last used the Internet, how often and where they used the Internet in the last three months, and whether they used the Internet to compare prices or quality of services, or bought goods or services by post, phone, or the Internet over the last 12 months. The survey queried respondents about their opinion on consumer rights pertaining to their right to return goods purchased by post, phone, or the Internet without any reason or after finding a better deal, as well as to have an appliance repaired or replaced without an extended commercial guarantee, whether a specific newspaper advertisement was legal versus illegal, and their obligation to pay for goods received but not ordered. Respondents also identified whether they purchased airline tickets over the last 12 months and what rules apply to airline ticket pricing, whether they read the conditions and terms of contracts, and if not, why, and the names of organizations or authorities representing and protecting consumers of which they had heard, whether they consulted any resources, such as the general media, specialized consumer magazines, certain Internet Web sites, shops, or family and friends, in order to make a comparison of purchased goods, and whether they compared the price of goods using the price per unit measure. The survey also asked respondents about their online shopping habits, specifically, when they last bought or ordered goods for private use via a Web site, and if they did not do so in the last 12 months, why, whether they read the conditions of sale for their last goods or services purchased over the Internet, and if not, why, and the location of sellers for goods purchased for private use over the Internet. Respondents were also queried about their knowledge of consumer protection laws, the last problem and last positive experience they had as a consumer, whether they encountered problems for which they had legitimate cause for complaint with a good, a service, a retailer or provider, and if they had a problem in the last 12 months, whether they would have made a complaint, the number of consumer-related complaints encountered over the last 12 months, and the estimated amount of financial losses due to bad consumer experience. They were further queried on whether they took certain actions as a consequence of the problem encountered, whether they were satisfied with the help received the last time they made a complaint to a public authority or consumer organization about a problem, the main reasons for not taking a business to court or out-of-court settlement body the last time a problem was encountered, what amount of financial loss would be needed to take a business to court, how often they viewed or listened to television and radio programs about consumer rights, and whether they went looking for information on consumer rights in the last 12 months. Respondents were asked questions pertaining to their understanding of common consumer issues including intermediate numerical skills, interpreting nutritional information, identification of the 'best before' date on products, their familiarity with logos, as well as their confidence and knowledge, and whether they felt well-protected as a consumer. Finally, respondents were asked about their household situation, dwelling, finances, and expenses, specifically, whether they are able to make ends meet financially, whether their household has been in arrears for missed mortgage or rent payments, whether they can afford meals with meat, chicken, fish, or the vegetarian equivalent every second day, type of housing, problems with the condition of their current home, and whether the respondent or spouse makes decisions on purchases. Demographic and other background information includes age, gender, nationality, origin of birth (personal), marital status and parental relations, occupation and form of employment, age at completion of full-time education and level of education, household composition, ownership of a fixed or a mobile telephone and other durable goods, difficulties in paying bills, level in society, computer experience, and Internet use. In addition, country-specific data includes type and size of locality, region of residence, and language of interview.

Survey requested by EUROSTAT and the Directorate-General for "Health and Consumers" (DG SANCO) and coordinated by the Directorate-General for Communication ("Research and Speechwriting" Unit), Brussels, April 2011.

## 1.3 Universe

In all, Eurobarometer 73.2 and 73.3 interviewed a total of 56.471 citizens in the 27 countries of the European Union after the 2004/2007 enlargement (i.e. including the Accession Countries Romania and Bulgaria), plus EFTA countries Iceland and Norway. All respondents were residents in the respective country, nationals and non-nationals but EU-citizens, and aged 15 and over. They were supposed to have sufficient command of one of the respective national language(s) to answer the questionnaire. Separate samples were drawn for Northern Ireland and East Germany.

## 1.4 Sampling procedure

A multi-stage, random (probability) sampling design was used for both Eurobarometer, 73.2 and 73.3. In the first stage, primary sampling units (PSU) were selected from each of the administrative regional units in every country (Statistical Office of the European Community, EUROSTAT NUTS 2 or equivalent). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of starting addresses was selected from each sampled PSU, at random. Further addresses were chosen systematically using standard random route procedures as every Nth address from the initial address. In each household, a respondent was drawn, at random, following the closest birthday rule. No more than one interview was conducted in each household.

The regular sample size (in the sense of completed interviews) for a single Eurobarometer is 1000 respondents per country, except the United Kingdom with separate samples for Great Britain (1000) and Northern Ireland (300), Germany with separate samples for the Eastern (500) and the Western part (1000), and Luxembourg, Cyprus (Republic), Malta and Iceland with 500 interviews each. The effective number of realized interviews in this round is indicated in table 1.

## 1.5 Fieldwork

From February 26 to March 17, 2010 (73.2) and from March 12 to April 1, 2010 (73.3), the TNS Opinion & Social, a consortium created between Taylor Nelson Sofres and EOS Gallup Europe, carried out the fieldwork for these two Eurobarometer surveys, at the request of the European Commission, Directorate General Press and Communication, Opinion Polls. TNS Opinion & Social is based at Avenue Herrmann Debroux, 40, 1160 Brussels,

Belgium. TNS Opinion & Social coordinates the fieldwork carried out through its network of national institutes:

## 1.6 Mode of data collection

In all countries, fieldwork was conducted on the basis of detailed and uniform instructions prepared by TNS Opinion Social. Interviews were conducted face-to-face in people's home in the appropriate national language. As far as the data capture is concerned, CAPI (Computer Assisted Personal Interview) was used in those countries where this technique was available.

Equivalent French and English basic questionnaires were developed for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country. Backtranslation procedures were applied for controlling semantic equivalence.

## 1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factor corrects for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country as well as each lower level sample (Great Britain and Northern Ireland, East and West Germany) are represented in proportion to its population size within different groupings, or according to the historical states of European unification (e.g. founder members, new members, Euro zone) in the case of the EUROPEAN WEIGHTS, or for the United Kingdom (WEIGHT SPECIAL UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31) and for Germany as a whole (WEIGHT SPECIAL GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general all samples which do not belong to the respective group of samples under consideration are excluded from calculation.

The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 4) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

**Eurobarometer 73.2+73.3** provides three (post-stratification) NATION WEIGHTS: W1 (WEIGHT RESULT FROM TARGET) for separate analysis or comparison of individual samples (countries or regions on sub-national level), W4 (WEIGHT SPECIAL UNITED KINGDOM) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole, and W3 (WEIGHT SPECIAL GERMANY), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. W3 and W4 exclude all other countries from calculation, but include the post-stratification factors for the United Kingdom and Germany respectively.

The EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries, of accession or candidate countries, and of Euro zone countries, representing different historical states of European integration (e.g. EU6 = six founder members) . All post-stratification factors are included. WEIGHT EU27+IS+NO (W87) groups all available samples, the 27 EU member countries as of the 2004/2007 enlargement, plus the EFTA and EU application country Iceland, plus EFTA country Norway.

Table 2: Overview of population size weights

European Weights in Eurobarometer 73.2+73.3	Function
W5 to W9, W11, W14, W22	grouping EU member countries
W10, W13, W24	grouping new EU member countries
W18	Grouping EU candidate/accession countries
-	grouping EU member + candidate/accession countries
W81, W82	grouping (non-)Eurozone countries
W87	grouping EU member and non-member countries

For more detailed information on the individual weights please see the corresponding variable description.

## 1.8 Data preparation

The data received by GESIS from TNS Opinion & Social were checked for completeness, missing and duplicate records, for illegal (wild) codes and for (formal) consistency of response patterns and question routing. Errors discovered by these procedures are documented or corrected, as a general rule after consulting related additional documentation (e.g. tabular reports) or the data provider. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable DDI-XML compliant documentation was created for this dataset by GESIS.

GESIS added 'Inappropriate' (INAP) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the original questionnaire was adhered to for (almost) every respondent. An additional INAP category was defined whenever a question or group of questions were not surveyed in one or more countries, or if variables refer to country specific items (e.g. regions).

Users should note that answers to multiple-response questions are (originally) represented by a series of binary 'dummy' variables (i.e. variables which take on values of one and zero only), creating separate 'dummy' variables also to explicitly represent 'Don't know', 'No answer/refusal' or other residual responses, such as 'None of the above'. The archive has recoded these residual responses in the case of uncommon minor inconsistencies with respect to and in favour of the series of substantial answers.

GESIS has recoded the missing answers (NA) represented in the original data set by blanks (system missing) to standard values. Their practically complete absence suggests that eventual cases of any not explicitly coded item non-response, might be collapsed with the DK (don't know) category.

Question text and contingency text appearing in the variable description is taken from English language version of the basic (bilingual) questionnaire (master questionnaire). Coding schemes and other documentation are based on the English language version of the basic questionnaire or on the respective SPSS data definition statements as provided by TNS Opinion & Social. In case of any discrepancy between questionnaires, SPSS definitions and data regarding the coding scheme of a variable, the archive, as a general rule, carried out any correction in agreement with the data provider.

If the documentation for country-specific questions or answer categories is provided in another languages than English, the archive documents the original language wording and supplies the English translation in brackets.

Specific information on data preparation, harmonization or regarding inconsistencies is noted on variable level.

## 1.9 Further remarks

Eurobarometer 73.2 & 73.3 merges responses to identical questions on 'Consumer Empowerment' (QA) plus relevant demographics from Eurobarometer surveys 73.2 (ZA5232) and 73.3 (ZA5233). This merged data set doubles standard sample sizes and covers the EU27 countries plus Iceland and Norway. The national field questionnaires are made available in the context of Eurobarometer 73.2 (ZA5232).

## 2 Eurobarometer Series Description

---

### 2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

### 2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

### 2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

### 2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

Table 3: EU enlargement and countries covered by Standard and Special Eurobarometer

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 4: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.20VR, 55.10VR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.30VR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.20VR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

## 2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 5) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 5: Overview of Eurobarometer surveys with standard EU and trend question modules

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

## 3 Dataset structure and standards

---

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

### 3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

### 3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

#### 3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 6: ZEUS Party Family Code (slightly modified)

Category		Party Family
0	(001-099)	not affiliated / electoral alliances across "families"
1	(100-199)	Communists
2	(200-299)	Socialists
3	(300-399)	Liberals
4	(400-499)	Christian Democrats
5	(500-599)	Conservatives
6	(600-699)	Extreme Rights / Nationalists
7	(700-799)	Regionalists / Ethnic
8	(800-899)	Environmental parties
9	(900-949)	Agricultural parties
9	(950-989)	other special issue parties (e.g. Eurosceptics) and independents
	990	other (spontaneous)
	994	not voting age
	995	empty ballot (blank) or invalid vote
	996	not voted / would not vote
	997	Refused
	998	DK / DK+NA if NA not coded separately
	999	INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

### 3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

## 3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

## 4 Explanation of the variable documentation

---

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION – ALL SAMPLES ISO 3166).

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (–1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded “real” values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission’s official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

CROSS-TABULATION: The absolute frequencies of the occurrence of values ( <i>absolute values</i> ) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies ( <i>row percent</i> ) refer to the valid cases ( <i>n valid sum</i> ), i.e. the total number of cases ( <i>n sum</i> ) reduced by the number of cases defined as missing data ( <i>M</i> ). For display and place saving reasons excluded countries or areas may be completely dropped from the table.																																																																																																																																																																																																																																																																																																																						
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data ( <i>M</i> ), i.e. <i>percent</i> on the basis of all cases ( <i>sum</i> ) and <i>valid percent</i> on the basis of the <i>valid cases</i> .																																																																																																																																																																																																																																																																																																																						

## 5 Variable Documentation

Variable, Label  
Question Text (English Language)

v1 - STUDY NUMBER - DISTRIBUTOR  
ARCHIVE STUDY NUMBER – DISTRIBUTOR

Study Number of the distributing data archive.

v1

Value	Label	Missing	Count	Percent	Valid Percent
5236			56471	100.0	100.0
	Sum		56471	100.0	100.0
	Valid Cases		56471		

v2 - STUDY NUMBER - PUBLISHER

ARCHIVE STUDY NUMBER – PUBLISHER

Study number of the data archive which is publishing this data set version.

v2

Value	Label	Missing	Count	Percent	Valid Percent
5236			56471	100.0	100.0
	Sum		56471	100.0	100.0
	Valid Cases		56471		

### v3 - GESIS ARCHIVE VERSION

#### VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

v3

Value	Label	Missing	Count	Percent	Valid Percent
2.0.1 (2012-10-04)			56471	100.0	100.0
	Sum		56471	100.0	100.0
	Valid Cases		56471		

v4 - EUROBAROMETER NUMBER

EUROBAROMETER SURVEY NUMBER

The number identifying the Eurobarometer survey.

732 Eurobarometer 73.2

733 Eurobarometer 73.3

v4

Value	Label	Missing	Count	Percent	Valid Percent
732	Eurobarometer 73.2		28304	50.1	50.1
733	Eurobarometer 73.3		28167	49.9	49.9
	Sum		56471	100.0	100.0
	Valid Cases		56471		

v5 - UNIQUE CASE ID (SURVEY ID + TNS COUNTRY ID + INTERVIEW ID)

UNIQUE CASE ID (SURVEY ID + TNS COUNTRY ID + TNS INTERVIEW ID)

This unique respondent identification is composed of the original TNS country code and the original TNS interview number. The first three digits identify the survey the respondent has participated in (732: EB73.2; 733: EB73.3). The next two digits identify the country of interview (01: Belgium; 02: Denmark; 04: Greece; 05: Spain; 06: Finland; 07: France; 08: Ireland; 09: Italy; 10: Luxembourg; 11: Netherlands; 12: Austria; 13: Portugal; 14: Sweden; 20: Germany West; 21: Germany East; 22: Great Britain; 23: Northern Ireland; 31: Bulgaria; 32: Cyprus (Republic); 33: Czech Republic; 34: Estonia; 35: Hungary; 36: Latvia; 37: Lithuania; 38: Malta; 39: Poland; 40: Romania; 41: Slovakia; 42: Slovenia; 45: Iceland; 51: Norway). The remaining digits contain the country-specific questionnaire numbers.

Note:

Actual number is coded.

v6 - NATION - ALL SAMPLES

NATION – ALL SAMPLES

All samples including separate samples for East and West Germany and for Great Britain and Northern Ireland.

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany West
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 Germany East
- 16 Finland
- 17 Sweden

	Sum		56471	100.0	100.0
	Valid Cases		56471		

v7 - NATION - ALL SAMPLES ISO 3166

NATION ALL – ISO LABELS

All surveyed countries and regions, i.e. including separate samples for East-/West-Germany, Great Britain/Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East/West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

Note:

Use of weighting factor W1 (V8) is optional.

v8 - W1 WEIGHT RESULT FROM TARGET

W1 WEIGHT RESULT FROM TARGET

This POST-STRATIFICATION WEIGHT is based on a comparison for each sample with the respective universe description. As such in all countries, gender, age, region and size of locality are introduced in the iteration procedure carried out by the fieldwork institutes.

British and Northern Irish as well as East and West German samples are weighted separately. The weight reproduces the real number of cases for each country. In terms of its general function it corresponds to former NATION WEIGHT II (until EUROBAROMETER 31).

v9 - NATION - UNITED KINGDOM

NATION – UNITED KINGDOM

Great Britain and Northern Ireland are coded together.

0 Other

1 United Kingdom

Note:

Use of weighting factor W4 (V10) is mandatory.

v10 - W4 WEIGHT UNITED KINGDOM

W4 WEIGHT UNITED KINGDOM

This POPULATION SIZE WEIGHT adjusts the British and the Northern Irish (sub-national) samples to their share in the total population aged 15 and over in the United Kingdom. It must be applied whenever the United Kingdom is to be analyzed as a whole. The post-stratification weighting factors are included for both samples. All other samples are excluded from analysis. In terms of its general function the weight corresponds to former NATION WEIGHT I (until EUROBAROMETER 31).

v11 - NATION - UNITED GERMANY

NATION – UNITED GERMANY

East and West Germany are coded together.

0 Other

1 Germany

Note:

Use of weighting factor W3 (V12) is mandatory.

v24 - W10 WEIGHT EU NMS 3

W10 WEIGHT EU NMS 3

This POPULATION SIZE WEIGHT only refers to the three new members as of January 1995: Finland, Sweden and Austria. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EU NMS 3 must be applied whenever these three countries are to be analyzed altogether as a group.

v25 - NATION GROUP EU15

NATION GROUP EU15

NATION GROUP EU15 adds Austria, Finland and Sweden to the EURO 12+ countries, new members as of January 1995.

0 Other

1 EU15

Note:

Use of weighting factor W11 (V26) is mandatory.

v26 - W11 WEIGHT EU15

W11 WEIGHT EU15

This POPULATION SIZE WEIGHT adds Austria, Finland and Sweden to the EU12+ countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EU15 must be applied whenever these 15 countries as of the 1995 enlargement are to be analyzed altogether as a group.

v27 - NATION GROUP EU NMS 10

NATION GROUP EU NMS 10

NATION GROUP EU NMS 10 refers to the group of the ten new members of the enlargement in 2004.

0 Other

1 EU NMS 10

Note:

Use of weighting factor W13 (V28) is mandatory.

v38 - W81 WEIGHT EURO ZONE 2009

W81 WEIGHT EURO ZONE 2009

This POPULATION SIZE WEIGHT separates the group of 12 countries which introduced the EURO as of January 1, 2002 (Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland) plus Slovenia which introduced the EURO as of January 1, 2007, plus Cyprus and Malta, which introduced the EURO as of January 1, 2008, plus Slovakia, which introduced the EURO as of January 1, 2009. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EURO ZONE 2009 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

v39 - NATION GROUP NON EURO ZONE 2009

NATION GROUP NON EURO ZONE 2009

NATION GROUP NON EURO ZONE 2009 refers to the group of countries which did not introduce the EURO up to January 1, 2009 (Denmark, United Kingdom, Sweden, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Bulgaria, Romania).

0 Other

1 NON EURO ZONE 2009

Note:

Use of weighting factor W82 (V40) is mandatory.

v40 - W82 WEIGHT NON EURO ZONE 2009

W82 WEIGHT NON EURO ZONE 2009

This POPULATION SIZE WEIGHT separates the group of countries (Denmark, United Kingdom, Sweden, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Bulgaria, Romania) which did not introduce the EURO up to January 1, 2009. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT NON EURO ZONE 2009 must be applied whenever these countries are to be analyzed altogether as a group.

v41 - NATION GROUP EU27+IS+NO

NATION GROUP EU27 + IS + NO

NATION GROUP EU27 + IS and NO includes all participating countries.

0 Other

1 EU27+ IS+ NO

Note:

Use of weighting factor W86 (V42) is mandatory.

v42 - W87 WEIGHT TOTAL (EU27+IS+NO)

W86 WEIGHT EU27 + IS + NO

WEIGHT EU27 + IS and NO is provided for analysing all participating countries (samples) in total, the EU member countries plus Iceland and Norway. This POPULATION SIZE WEIGHT adjusts each national sample in proportion to its share in the total population aged 15 and over, of the total population surveyed in this wave (V41). The post-stratification weighting factors are included.

v43 - WEX WEIGHT EXTRA POPULATION 15+

WEX WEIGHT EXTRA POPULATION 15+

WEIGHT EXTRA extrapolates the actual universe (population aged 15 or more) for each country (sample), i.e. this weight variable integrates all other available weights, but does not reproduce the number of cases in the data set.

v44 - Q1 NATIONALITY BELGIUM

Q.1

What is your nationality? Please tell me the country(ies) that applies(y).

v73 - Q1 NATIONALITY OTHER COUNTRIES

Q.1

What is your nationality? Please tell me the country(ies) that applies(y).

(MULTIPLE ANSWERS POSSIBLE)

(IF OTHER or DK THEN CLOSE INTERVIEW)

Q.1\_30 Other countries

0 Not mentioned

1 Mentioned

Note:

According to the interviewer instruction the interview is supposed to be closed for respondents answering only "other countries" or "don't know / no answer" in Q.1. However, three respondents from Slovenia and one respondent from Cyprus coded '1' (mentioned) for "other countries" are included in the survey without indicating any of the nationalities provided in question Q.1.

v77 - D7 MARITAL STATUS (REC STATUS)

D.7 MARITAL STATUS – RECODED STATUS

- 1 (Re-)Married (coded 1 to 4 in V76)
- 2 Single living with partner (coded 5 to 8 in V76)
- 3 Single (coded 9 and 10 in V76)
- 4 Divorced or separated (coded 11 and 12 in V76)
- 5 Widow (coded 13 and 14 in V76)
- 6 Other (SPONTANEOUS)
- 7 Refusal (SPONTANEOUS)

Derivation:

This variable collapses answers to D.7 into five categories.

Note:

See D.7 (V76) for complete question text.

v79 - D11 AGE EXACT

D.11

How old are you?

15 15 years

98 98 years

Note:

Actual number is coded.

Last trend: EB73.1, D.11

v80 - D11 AGE RECODED - FOUR GROUPS

D.11R1 AGE – RECODED IN FOUR GROUPS

- 1 15 - 24 years
- 2 25 - 39 years
- 3 40 - 54 years
- 4 55 years and older

Derivation:

This variable collapses answers to D.11 into four categories.

Note:

See D.11 (V79) for complete question text.

v81 - D11 AGE RECODED - SIX GROUPS

D.11R2 AGE – RECODED IN SIX GROUPS

- 1 15 - 24 years
- 2 25 - 34 years
- 3 35 - 44 years
- 4 45 - 54 years
- 5 55 - 64 years
- 6 65 years and older

Derivation:

This variable collapses answers to D.11 into six categories.

Note:

See D.11 (V79) for complete question text.

v91 - D16R LEVEL OF COMPUTER SKILLS

D.16R LEVEL OF COMPUTER SKILLS – RECODED

- 0 No computer skills
- 1 Low
- 2 Medium
- 3 High

Derivation:

This variable groups answers to question D.16.

Note:

Category '0' ("No computer skills") summarizes the answers for respondents coded '1' ("Mentioned") only in variables V88, V89, and V90. Category '1' ("Low") summarizes one or two positive answers ("Mentioned") in V82 to V87. Category '2' ("Medium") summarizes three or four positive answers ("Mentioned") in V82 to V87. Category '3' ("High") summarizes five or six positive answers ("Mentioned") in V82 to V87.

See D.16 (V82-V90) for complete question text.

v92 - QA1 INTERNET USE - LAST TIME

Q.A1

ASK Q.A IN EU27 + IS + NW

When did you last use the Internet?

(DO NOT READ OUT – ONE ANSWER ONLY)

- 1 Within the last 3 months
- 2 Between 3 months and a year ago
- 3 More than one year ago
- 4 Never used it
- 5 DK

Note:

Last trend modified: EB65.1, Q.A2

v93 - QA2 INTERNET USE - LAST 3 MONTHS

Q.A2

ASK Q.A2 AND Q.A3 IF "USE THE INTERNET WITHIN THE LAST 3 MONTHS", CODE 1 IN Q.A1– OTHERS GO TO Q.A4

On average, how often did you use the Internet in the last 3 months?

(READ OUT – ONE ANSWER ONLY)

- 1 Every day or almost every day
- 2 At least once a week (but not every day)
- 3 At least once a month (but not every week)
- 4 Less than once a month
- 5 DK
- 9 Inap. Not use Internet last 3 months (not coded 1 in V92)

v107 - QA8 KNOWLEDGE: ADVERTISEMENT LEGALITY

Q.A8

(PROMPT IF NECESSARY: the information on the price of the call is not showed in the advert)

An advertisement in your newspaper says: "Free sunglasses, just call this number to collect them". You call the number and later you discover that it is a very costly premium rate telephone number. Was the advertisement legal or illegal?

- 1 Legal
- 2 Illegal (correct)
- 3 Allowed for certain goods (SPONTANEOUS)
- 4 DK

v113 - QA14 SERVICE CONTRACT - READ TERMS/CONDITIONS

Q.A14

Please think about the last time you signed a contract for a service, for example, gas, electricity, mobile phone, bank account or insurance. Did you read its terms and conditions?

(READ OUT – ONE ANSWER ONLY)

- 1 Yes, carefully and completely
- 2 Yes, but only partially
- 3 No
- 4 You have never signed this kind of contract (SPONTANEOUS)
- 5 DK

v202 - QA19 ONLINE SHOPPING - LAST TIME

And now let's talk about online shopping.

Q.A19

ASK Q.A19 TO Q.A24 IF "USE THE INTERNET", CODE 1 TO 3 IN Q.A1 – OTHERS GO TO Q.A25

When did you last buy or order goods or services for private use via a website? Note that order or purchase goods or services by email is not considered as a purchase or order over the Internet.

(READ OUT – ONE ANSWER ONLY)

- 1 Within the last 3 months
- 2 Between 3 months and a year ago
- 3 More than one year ago
- 4 Never
- 5 DK
- 9 Inap. Not use Internet (not coded 1 to 3 in V92)

Q.A20R NO INTERNET PURCHASE: SHOPS PREFERRED – RECODED

- 0 Not mentioned
- 1 Mentioned
- 9 Inap. Buy goods via Internet (not coded 3 or 4 in V202)

Derivation:

This variable groups answers to question Q.A20.

Note:

Category '1' ("Mentioned") summarizes the reasons related to traditional purchasing behavior, coded '1' ("Mentioned") only in variables V204, V205, and/or V206. Category '0' ("Not mentioned") represents the respondents who did not mention any of these three items.

See Q.A20 (V203-V216) for complete question text.

v239 - QA25 CONSUMER BAD EXP - INFORMED N OF PEOPLE

Q.A25

ASK ALL

(PROMPT IF NECESSARY: You might have told people like family, friends or colleagues)

I would now like you to think about the last problem you had as a consumer. This could be any problem, related to a good, a service, a retailer or a provider. How many people, apart from the employees of the business concerned, did you tell, in total, about the last problem you had as a consumer?

(WRITE DOWN – IF “TO NO ONE” CODE ‘00’ – IF “AT LEAST ONE PERSON, BUT I CANNOT REMEMBER EXACTLY TO HOW MANY PEOPLE” CODE ‘97’ – IF “NEVER HAD A PROBLEM” CODE ‘98’ – IF “DK” CODE ‘99’ – IF YOU ARE GIVEN A RANGE, TRY TO HAVE THE BEST ESTIMATE)

0 None

96 96 persons

97 At least one, cannot remember exactly

98 Never had a problem

99 DK

Note:

Actual number is coded.

v240 - QA25 CONSUMER BAD EXP - INFORMED N OF PPL (REC)

Q.A25 CONSUMER BAD EXPERIENCES – NUMBER OF INFORMED PEOPLE – RECODED

- 0 None
- 1 One person
- 2 Two persons
- 3 Three persons
- 4 Four persons and more
- 7 At least one, cannot remember exactly
- 8 Never had a problem
- 98 DK

Derivation:

This variable groups answers to question Q.A25.

Note:

See Q.A25 (V239) for complete question text.

v245 - QA29 CONSUMER COMPLAINTS - N

Q.A29

ASK Q.A29 TO Q.A37 IF "HAS ENCOUNTERED A PROBLEM", CODE 1 IN Q.A27 – OTHERS GO TO Q.A38

Could you please tell me how many such problems you encountered over the last 12 months?

1 One problem

50 50 problems

98 Don't remember how much

99 DK

999 Inap. Not encountered problems/DK (not coded 1 in V243)

Note:

Actual number is coded.

v246 - QA29 CONSUMER COMPLAINTS - N (REC)

Q.A29 CONSUMER COMPLAINTS – NUMBER OF PROBLEMS – RECODED

- 1 One problem
- 2 Two problems
- 3 Three problems
- 4 Four problems and more
- 8 At least one, cannot remember exactly
- 98 DK
- 99 Inap. Not encountered problems/DK (not coded 1 in V243)

Derivation:

This variable groups answers to question Q.A29.

Note:

See Q.A29 (V245) for complete question text.

v247 - QA30 CONSUMER COMPLAINT - VALUE

ASK Q.A29 TO Q.A37 IF "HAS ENCOUNTERED A PROBLEM", CODE 1 IN Q.A27 – OTHERS GO TO Q.A38

Now we would like you to estimate the total value of financial losses to you as a result of this problem. As a reminder, please look at this list which outlines some of the costs we are talking about. Please do not include in your estimate anything that has now been fully recompensed by any insurance policy, but do include anything where an insurance has not left you fully compensated.

(SHOW LIST – DO NOT READ OUT)

A: Administrative or travel costs, B: Putting things right at your own expense, such as the cost of replacing or repairing the goods or paying for the services again, C: Cost of expert advice or assistance, D: Paying for any "knock on" damage or inconvenience caused to you or any of your possessions as a result of the problem, E: Reduction in value of the goods or any other possessions as a result of the problem

Q.A30

Thinking about the last problem you encountered, could you please estimate the total value of any financial losses involved as a result of this problem? It doesn't matter if you are not entirely sure, we are interested in your estimations.

(WRITE DOWN – IF "NONE" CODE '000000' – IF "REFUSAL" CODE '999998' – IF "DK" CODE '999999')

0 None

250000 250.000

v254 - QA31 CONSUMER COMPL ACTION: DK

ASK Q.A29 TO Q.A37 IF "HAS ENCOUNTERED A PROBLEM", CODE 1 IN Q.A27 – OTHERS GO TO Q.A38

Q.A31

(PROMPT IF NECESSARY: an out-of-Court dispute settlement body is an independent body which can be an arbitrator, a mediator or an ombudsman and it helps the consumer and the business to reach a solution to their dispute without the direct intervention of a Court.)

As a consequence of the problem(s) you encountered, did you take any of the following actions?

(READ OUT – MULTIPLE ANSWERS POSSIBLE)

v269 - QA36 NO COMPLAINT TO COURT: DK PROCEEDING

ASK Q.A29 TO Q.A37 IF "HAS ENCOUNTERED A PROBLEM", CODE 1 IN Q.A27 – OTHERS GO TO Q.A38

Q.A36

ASK Q.A36 IF "DID NOT TAKE THE BUSINESS CONCERNED TO COURT", CODE 1, 3-6 IN Q.A31 – OTHERS GO TO Q.A37

Thinking about the last time you encountered this kind of problem but didn't take the businesses concerned to Court, what were the main reasons for that?

(SHOW CARD – READ OUT – MULTIPLE ANSWERS POSSIBLE)

Q.A36\_1 You did not know how to proceed

0 Not Mentioned

1 Mentioned

9 NA

99 Inap. Did take to court (not any 1 coded in V249, V251, V252, V253, and V254)

Note:

42 cases coded 1 or 3-6 in Q.A31 (i.e. in accordance with the question routing supposed to be asked Q.A36) were not coded in any of the corresponding variables V269 to V278 (system missing). These cases were recoded to '9' ("NA") in V269 to V278.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

v271 - QA36 NO COMPLAINT TO COURT: SUMS TOO SMALL

ASK Q.A29 TO Q.A37 IF "HAS ENCOUNTERED A PROBLEM", CODE 1 IN Q.A27 – OTHERS GO TO Q.A38

Q.A36

ASK Q.A36 IF "DID NOT TAKE THE BUSINESS CONCERNED TO COURT", CODE 1, 3-6 IN Q.A31 – OTHERS GO TO Q.A37

Thinking about the last time you encountered this kind of problem but didn't take the businesses concerned to Court, what were the main reasons for that?

(SHOW CARD – READ OUT – MULTIPLE ANSWERS POSSIBLE)

Q.A36\_3 The sums involved were too small

0 Not Mentioned

1 Mentioned

9 NA

99 Inap. Did take to court (not any 1 coded in V249, V251, V252, V253, and V254)

Note:

42 cases coded 1 or 3-6 in Q.A31 (i.e. in accordance with the question routing supposed to be asked Q.A36) were not coded in any of the corresponding variables V269 to V278 (system missing). These cases were recoded to '9' ("NA") in V269 to V278.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

ASK Q.A29 TO Q.A37 IF "HAS ENCOUNTERED A PROBLEM", CODE 1 IN Q.A27 – OTHERS GO TO Q.A38

Q.A36

ASK Q.A36 IF "DID NOT TAKE THE BUSINESS CONCERNED TO COURT", CODE 1, 3-6 IN Q.A31 – OTHERS GO TO Q.A37

Thinking about the last time you encountered this kind of problem but didn't take the businesses concerned to Court, what were the main reasons for that?

(SHOW CARD – READ OUT – MULTIPLE ANSWERS POSSIBLE)

Q.A36\_7 You thought it would take too long

0 Not Mentioned

1 Mentioned

9 NA

99 Inap. Did take to court (not any 1 coded in V249, V251, V252, V253, and V254)

Note:

42 cases coded 1 or 3-6 in Q.A31 (i.e. in accordance with the question routing supposed to be asked Q.A36) were not coded in any of the corresponding variables V269 to V278 (system missing). These cases were recoded to '9' ("NA") in V269 to V278.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

v280 - QA37 NO DISPUTE SETTLEMENT: DK PROCEEDING

ASK Q.A29 TO Q.A37 IF "HAS ENCOUNTERED A PROBLEM", CODE 1 IN Q.A27 – OTHERS GO TO Q.A38

Q.A37

ASK Q.A37 IF "DID NOT TAKE THE BUSINESS CONCERNED TO AN OUT-OF-COURT DISPUTE SETTLEMENT BODY",  
CODE 2 TO 6 IN Q.A31– OTHERS GO TO Q.A38A

Thinking about the last time you encountered such a problem but didn't take the business concerned to an out-of-court dispute  
settlement body (ADR), what were the main reasons for that?

(SHOW CARD – READ OUT – MULTIPLE ANSWERS POSSIBLE)

Q.A37\_2 You did not know how to proceed

0 Not Mentioned

1 Mentioned

9 NA

99 Inap. Did take to out-of-court dispute settlement body (coded 1 in V250 to V254)

Note:

42 cases coded 1 or 3-6 in Q.A31 (i.e. in accordance with the question routing supposed to be asked Q.A37) were not coded in  
any of the corresponding variables V279 to V289 (system missing). These cases were recoded to '9' ("NA") in V279 to V289.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which  
represent each of the original categories and which are identified by the respective original category code as question number  
suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as  
referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the  
exclusion of respondents.

v285 - QA37 NO DISPUTE SETTLEMENT: TAKE TOO LONG

ASK Q.A29 TO Q.A37 IF "HAS ENCOUNTERED A PROBLEM", CODE 1 IN Q.A27 – OTHERS GO TO Q.A38

Q.A37

ASK Q.A37 IF "DID NOT TAKE THE BUSINESS CONCERNED TO AN OUT-OF-COURT DISPUTE SETTLEMENT BODY",  
CODE 2 TO 6 IN Q.A31– OTHERS GO TO Q.A38A

Thinking about the last time you encountered such a problem but didn't take the business concerned to an out-of-court dispute  
settlement body (ADR), what were the main reasons for that?

(SHOW CARD – READ OUT – MULTIPLE ANSWERS POSSIBLE)

Q.A37\_7 You thought it would take too long

0 Not Mentioned

1 Mentioned

9 NA

99 Inap. Did take to out-of-court dispute settlement body (coded 1 in V250 to V254)

Note:

42 cases coded 1 or 3-6 in Q.A31 (i.e. in accordance with the question routing supposed to be asked Q.A37) were not coded in  
any of the corresponding variables V279 to V289 (system missing). These cases were recoded to '9' ("NA") in V279 to V289.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which  
represent each of the original categories and which are identified by the respective original category code as question number  
suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as  
referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the  
exclusion of respondents.

Note:

42 cases coded 1 or 3-6 in Q.A31 (i.e. in accordance with the question routing supposed to be asked Q.A37) were not coded in  
any of the corresponding variables V279 to V289 (system missing). These cases were recoded to '9' ("NA") in V279 to V289.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which  
represent each of the original categories and which are identified by the respective original category code as question number  
suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as  
referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the  
exclusion of respondents.

v292 - QA39 SHOPPING HOURS PER WEEK

Q.A39

In a typical week how many hours do you spend shopping (please include both grocery shopping and other types of shopping including comparing offers between goods and services and online shopping)?

(WRITE DOWN – IF “NONE” CODE ‘00’ – IF “DK” CODE ‘99’)

0 None

72 72 hours

99 DK

Note:

Actual number is coded.

v293 - QA39 SHOPPING HOURS PER WEEK (REC)

Q.A39 SHOPPING HOURS PER WEEK – RECODED

- 0 None
- 1 1 hour
- 2 2 hours
- 3 3 hours
- 4 4 hours
- 5 5 hours
- 6 6 hours and more
- 8 DK

Derivation:

This variable collapses answers to Q.A39 into seven categories.

Note:

See Q.A39 (V292) for complete question text.

v296 - QA42 CONSUMER ISSUE: TV ON SALE IN SHOP A/B

The following questions address commonly occurring consumer issues.

Q.A42

The same flat-screen TV is on sale in both shop A and B. Which one is cheaper?

(SHOW PICTURE – READ OUT – ONE ANSWER ONLY)

- 1 The one sold in shop A
- 2 The one sold in shop B (correct)
- 3 They are the same price
- 4 Refusal (SPONTANEOUS)
- 5 DK

Note:

Respondents were next presented with a scenario where two shops were selling identical flat-screen TVs. They were told that in shop A, the price is €500 but a discount of 10% is offered. In shop B, the price is €400. Consumers were asked which TV would be cheaper.

v299 - QA45 CONSUMER ISSUE: GRAMS OF FAT IN PRODUCT

Q.A45

Looking at this picture, please could you tell me how many grams of fat there are in 100 grams of this product?

(SHOW PICTURE – WRITE DOWN – IF “NONE” CODE ‘000.0’ – IF “REFUSAL” CODE ‘999.8’ – IF “DK” CODE ‘999.9’)

0 None

0,1 0.1 gram

1,5 1.5 gram (correct)

100 100 gram

998 DK

999 Refusal

Note:

Respondents were shown a picture of a breakfast cereal box, which included a table depicting nutritional information about the contents. Respondents were then asked how many grams of fat there were in 100 grams of the product, information that was included in the nutritional information table on the box.

Original code "999.8" recoded to "999".

Original code "999.9" recoded to "998".

Actual number is coded.

	per 100g
Energy	1603 kJ 376 kcal
Protein	15 g
Carbohydrate	75 g
- of which sugars	17 g
Fat	1.5 g
- of which saturates	0.5 g
Fibre	2.5 g
Sodium	0.85 g

v300 - QA45 CONSUMER ISSUE: GRAMS OF FAT (REC)

Q.A45 COMSUMER ISSUE: GRAMS OF FAT – RECODED

- 0 None
- 1 Less than the correct answer
- 2 Correct answer (1.5g /100g)
- 3 More than the correct answer
- 8 DK
- 9 Refusal

Derivation:

This variable collapses answers to Q.A45 into four categories.

Note:

See Q.A45 (V299) for complete question text.

Code "998" DK in V299 recoded to "8".

Code "999" Refusal in V299 recoded to "9".

v301 - QA46 CONSUMER ISSUE: USE-BY DATE RECOG MONTH

Q.A46

Still looking at the same picture, could you please tell me by which date is it suggested you can eat this product?  
(SHOW PICTURE – WRITE DOWN – IF “NO DATE” CODE ‘00’ – IF “REFUSAL” CODE ‘98’ – IF “DK” CODE ‘99’)  
month

- 0 No date
- 1 January
- 2 February
- 3 March
- 4 April
- 5 May
- 6 June (correct)
- 7 July
- 8 August
- 9 September
- 10 October
- 11 November
- 12 December
- 98 Refusal
- 99 DK

Note:

The respondents were asked to identify the best before date of the product from the same packaging used for the previous question.

v310 - QA47A FAMILIAR PRODUCT LOGOS: DK

Q.A47A

Among the logos on this card, please select the ones you are familiar with?

(SHOW LOGOS – MULTIPLE ANSWERS POSSIBLE)

Q.A47A\_7 DK

0 Not mentioned

1 Mentioned

Note:

The interviewees were presented with five logos and asked to indicate which ones they were familiar with. Only the logos were shown, with identification letters. Neither their names nor their meanings were provided at this stage.

See variables V304 to V308 for an image of each logo.

v311 - QA47B1 PRODUCT LOGO MEANING: A

Q.A47B1

And could you select which of the statements you think is the right meaning for logo A?

(SHOW LOGOS – SHOW STATEMENTS – ONE ANSWER PER COLUMN)

- 1 Product meets strict ecological standards
- 2 Product will be detrimental to your health
- 3 Product is organically farmed (correct)
- 4 Product is made of paper that can be recycled
- 5 Product has been made in the EU
- 6 Product conforms with the relevant European legislation
- 7 Food is in direct contact with material that is non edible
- 8 Product is a traditional speciality guaranteed
- 9 Product has a protected geographical origin
- 10 Product is highly efficient in energy consumption
- 11 DK

Note:

The interviewees were presented with five logos and asked to indicate which ones they were familiar with. Only the logos were shown, with identification letters. Neither their names nor their meanings were provided at this stage.

Logo A: The product is organically farmed (actual size of logo shown to respondents)

v313 - QA47B3 PRODUCT LOGO MEANING: C

Q.A47B3

And for logo C?

(SHOW LOGOS – SHOW STATEMENTS – ONE ANSWER PER COLUMN)

- 1 Product meets strict ecological standards (correct)
- 2 Product will be detrimental to your health
- 3 Product is organically farmed
- 4 Product is made of paper that can be recycled
- 5 Product has been made in the EU
- 6 Product conforms with the relevant European legislation
- 7 Food is in direct contact with material that is non edible
- 8 Product is a traditional speciality guaranteed
- 9 Product has a protected geographical origin
- 10 Product is highly efficient in energy consumption
- 11 DK

Note:

The interviewees were presented with five logos and asked to indicate which ones they were familiar with. Only the logos were shown, with identification letters. Neither their names nor their meanings were provided at this stage.

Logo C: The product meets strict ecological standards: it is eco-friendly (actual size of logo shown to respondents)

v315 - QA47B5 PRODUCT LOGO MEANING: E

Q.A47B5

And for logo E?

(SHOW LOGOS – SHOW STATEMENTS – ONE ANSWER PER COLUMN)

- 1 Product meets strict ecological standards
- 2 Product will be detrimental to your health (correct)
- 3 Product is organically farmed
- 4 Product is made of paper that can be recycled
- 5 Product has been made in the EU
- 6 Product conforms with the relevant European legislation
- 7 Food is in direct contact with material that is non edible
- 8 Product is a traditional speciality guaranteed
- 9 Product has a protected geographical origin
- 10 Product is highly efficient in energy consumption
- 11 DK

Note:

The interviewees were presented with five logos and asked to indicate which ones they were familiar with. Only the logos were shown, with identification letters. Neither their names nor their meanings were provided at this stage.

Logo E: The product will be detrimental to your health if not used properly (actual size of logo shown to respondents)

v321 - QA50 HOUSING SITUATION (REC)

Q.A50 HOUSING SITUATION – RECODED

- 1 Owner
- 2 Tenant
- 3 Accomodation provided free
- 8 DK/Refusal

Derivation:

This variable collapses answers to Q.A50 into three categories.

Note:

See Q.A50 (V320) for complete question text.

v327 - QA55 TYPE OF DWELLING (REC)

Q.A55 TYPE OF DWELLING – RECODED

- 1 House
- 2 Apartment
- 3 Other
- 8 DK

Derivation:

This variable collapses answers to Q.A55 into three categories.

Note:

See Q.A55 (V326) for complete question text.

v363 - D8BIS EDUCATIONAL LEVEL - ISCED97 - RECODED

D.8BIS EDUCATIONAL LEVEL: 3-LEVEL INDEX – RECODED VARIABLE

- 1 Low educational attainment (coded 0 to 2 in V362)
- 2 Medium educational attainment (coded 3 and 4 in V362)
- 3 High educational attainment (coded 5 and 6 in V362)
- 7 Refusal

Derivation:

This variable collapses answers to D.8BIS into three categories.

Note:

See D.8BIS (V362) for complete question text.

v364 - D15C1 OCCUPATION - ISCO88

D.15C1 CURRENT JOB: ISCO 88 (TWO-DIGIT CODE) – HARMONIZED VARIABLE

D.15C1

ASK D.15C1 TO D.15E1 IF "CURRENTLY WORKING", CODE 5 TO 18 IN D.15A – OTHERS GO TO D.15C2

Can you specify what your current job is?

(USE ISCO 88 CODES)

- 1 Armed forces
- 11 Legislators and senior officials
- 12 Corporate managers
- 13 Managers of small enterprises
- 21 Physical, mathematical and engineering science professionals
- 22 Life science and health professionals
- 23 Teaching professionals
- 24 Other professionals
- 31 Physical and engineering science associate professionals
- 32 Life science and health associate professionals
- 33 Teaching associate professionals
- 34 Other associate professionals
- 41 Office clerks
- 42 Customer services clerks
- 51 Personal and protective services workers
- 52 Models, salespersons and demonstrators
- 61 Skilled agricultural and fishery workers
- 71 Extraction and building trades workers
- 72 Metal, machinery and related trades workers
- 73 Precision, handicraft, craft printing and related trades workers
- 74 Other craft and related trades workers
- 81 Stationary plant and related operators
- 82 Machine operators and assemblers
- 83 Drivers and mobile plant operators
- 91 Sales and services elementary occupations
- 92 Agricultural, fishery and related labourers
- 93 Labourers in mining, construction, manufacturing and transport
- 97 Refusal
- 99 Inap. Currently not working (not coded 5 to 18 in V74)

Note:

This variable codes the respondents' current occupation in accordance to the two-digit coding scheme of the International Standard Classification of Occupation (ISCO88). Source: ILO (1988).

The interviewer instruction in the field questionnaires for Finland (Swedish version), Portugal, and Sweden (as delivered to the archive) erroneously refers to "ISCED 88" instead of "ISCO 88".

v367 - D15C2 LAST OCCUPATION - ISCO88

D.15C2 LAST JOB: ISCO 88 (TWO-DIGIT CODE) – HARMONIZED VARIABLE

D.15C2

ASK D.15C2 TO D15E2 IF "NOT CURRENTLY WORKING" BUT "WORKED IN THE PAST", CODE 1 TO 4 IN D.15A AND  
CODE 5 TO 18 in D.15B – OTHERS GO TO D.41

Can you specify what your last job was?

(USE ISCO 88 CODES)

- 1 Armed forces
- 11 Legislators and senior officials
- 12 Corporate managers
- 13 Managers of small enterprises
- 21 Physical, mathematical and engineering science professionals
- 22 Life science and health professionals
- 23 Teaching professionals
- 24 Other professionals
- 31 Physical and engineering science associate professionals
- 32 Life science and health associate professionals
- 33 Teaching associate professionals
- 34 Other associate professionals
- 41 Office clerks
- 42 Customer services clerks
- 51 Personal and protective services workers
- 52 Models, salespersons and demonstrators
- 61 Skilled agricultural and fishery workers
- 71 Extraction and building trades workers
- 72 Metal, machinery and related trades workers
- 73 Precision, handicraft, craft printing and related trades workers
- 74 Other craft and related trades workers
- 81 Stationary plant and related operators
- 82 Machine operators and assemblers
- 83 Drivers and mobile plant operators
- 91 Sales and services elementary occupations
- 92 Agricultural, fishery and related labourers
- 93 Labourers in mining, construction, manufacturing and transport
- 97 Refusal
- 99 Inap. Currently working (not coded 1 to 4 in V74 and not coded 1 to 14 in V75)

Note:

This variable codes the respondents' last occupation in accordance to the two-digit coding scheme of the International Standard Classification of Occupation (ISCO88). Source: ILO (1988).

Please notice that the coding for D.15B in variable V74 differs from the questionnaire coding which is referenced in the interviewer instruction (questionnaire routing) of D.15E. Codes for D.15B (V74) are shifted in accordance with a routine in

former Eurobarometer surveys.

The interviewer instruction in the field questionnaires for Finland (Swedish version), Portugal, and Sweden (as delivered to the archive) erroneously refers to "ISCED 88" instead of "ISCO 88".

v371 - D8 AGE EDUCATION

DEMOGRAPHICS

How old were you when you stopped full-time education?

(IF "STILL STUDYING", CODE '00' - IF "NO EDUCATION" CODE '01' - IF "REFUSAL" CODE '98' - IF "DK" CODE '99')

- 0 Refusal
- 2 2 years
- 90 90 years
- 97 No full-time education
- 98 Still studying
- 99 DK

Note:

Original code "00" recoded to "98".

Original code "01" recoded to "97".

Original code "98" recoded to "0".

Due to a deviant specification in the coding instruction in the Portuguese field questionnaire data for Portugal have been corrected according to the basic questionnaire.

Code "0" is recoded to "97" for Portugal.

Actual number is coded.

Last trend: EB73.1, D.8

NO QUESTIONS D.1 TO D.6

D.7 ASKED BEFORE Q.A

v372 - D8 AGE EDUCATION - RECODED

D.8R AGE WHEN FINISHED FULL-TIME EDUCATION – RECODED

- 1 Up to 14 years
- 2 15 years
- 3 16 years
- 4 17 years
- 5 18 years
- 6 19 years
- 7 20 years
- 8 21 years
- 9 22 years and older
- 10 Still studying
- 11 No full-time education
- 97 Refusal
- 98 DK

Derivation:

This variable groups answers to question D.8.

Note:

See D.8 (V371) for complete question text.

Due to a deviant specification in the coding instruction in the Portuguese field questionnaire data for Portugal have been corrected according to the basic questionnaire.

Code "97" is recoded to "11" for Portugal.

v376 - D40A HOUSEHOLD COMPOSITION: AGED 15+ (REC)

D.40AR HOUSEHOLD COMPOSITION: AGED 15+ – RECODED

n of people in household

- 1 One
- 2 Two
- 3 Three
- 4 Four or more

Derivation:

This variable groups answers to question D.40A.

Note:

See D.40A (V375) for complete question text.

v382 - D40 HOUSEHOLD COMPOSITION: SIZE A+B+C (REC)

D.40R HOUSEHOLD COMPOSITION: SIZE (A+B+C) – RECODED

n of people in household

- 1 One
- 2 Two
- 3 Three
- 4 Four
- 5 Five
- 6 Six
- 7 Seven or more

Derivation:

This variable groups the summarized variable V381.

Note:

See V375, V377, and V379 for complete question text.

Generated by the Archive in accordance with former surveys.

	Sum		56471	100.0	100.0
	Valid Cases		2000		

v425 - P6 SIZE OF COMMUNITY - HUNGARY

P.6\_HU (OBJECTIVE) SIZE OF COMMUNITY: HUNGARY

- 1 Village
- 2 Other towns
- 3 County town
- 4 Budapest
- 99 Inap. Not HU (not coded 22 in V6)

Note:

Last trend: EB73.1, P.6

v425, weighted by v8

Value	Label	Missing	Count	Percent	Valid Percent
1	Village		694	1.2	33.5
2	Other towns		649	1.1	31.3
3	County town		366	0.6	17.7
4	Budapest		362	0.6	17.5
99	Inap. (not 22 in V6)	M	54401	96.3	
	Sum		56471	100.0	100.0
	Valid Cases		2070		

v426 - P6 SIZE OF COMMUNITY - LATVIA

P.6\_LV (OBJECTIVE) SIZE OF COMMUNITY: LATVIA

- 1 Rural areas
- 2 Cities
- 3 Capital
- 99 Inap. Not LV (not coded 23 in V6)

Note:

Last trend: EB73.1, P.6

v426, weighted by v8

Value	Label	Missing	Count	Percent	Valid Percent
1	Rural areas		721	1.3	35.8
2	Cities		742	1.3	36.9
3	Capital		550	1.0	27.3
99	Inap. (not 23 in V6)	M	54458	96.4	
	Sum		56471	100.0	100.0
	Valid Cases		2013		

v427 - P6 SIZE OF COMMUNITY - LITHUANIA

P.6\_LT (OBJECTIVE) SIZE OF COMMUNITY: LITHUANIA

- 1 Less than 2.000 inhabitants
- 2 2.000 to 200.000 inhabitants
- 3 More than 200.000 inhabitants
- 99 Inap. Not LT (not coded 24 in V6)

Note:

Last trend: EB73.1, P.6

v427, weighted by v8

Value	Label	Missing	Count	Percent	Valid Percent
1	Less than 2.000		663	1.2	32.6
2	2.000 to 200.000		811	1.4	39.9
3	More than 200.000		558	1.0	27.5
99	Inap. (not 24 in V6)	M	54439	96.4	
	Sum		56471	100.0	100.0
	Valid Cases		2032		

v428 - P6 SIZE OF COMMUNITY - MALTA

P.6\_MT (OBJECTIVE) SIZE OF COMMUNITY: MALTA

- 1 Up to 6.000 inhabitants
- 2 6.001 to 10.000 inhabitants
- 3 More than 10.000 inhabitants
- 99 Inap. Not MT (not coded 25 in V6)

Note:

Last trend: EB73.1, P.6

v428, weighted by v8

Value	Label	Missing	Count	Percent	Valid Percent
1	Up to 6.000		311	0.6	31.1
2	6.001 to 10.000		414	0.7	41.4
3	More than 10.000		275	0.5	27.5
99	Inap. (not 25 in V6)	M	55471	98.2	
	Sum		56471	100.0	100.0
	Valid Cases		1000		

v429 - P6 SIZE OF COMMUNITY - POLAND

P.6\_PL (OBJECTIVE) SIZE OF COMMUNITY: POLAND

- 1 Rural area (village)
- 2 Less than 20.000 inhabitants
- 3 20.000 to 100.000 inhabitants
- 4 100.001 to 500.000 inhabitants
- 5 More than 500.000 inhabitants
- 99 Inap. Not PL (not coded 26 in V6)

Note:

Last trend: EB73.1, P.6

v429, weighted by v8

Value	Label	Missing	Count	Percent	Valid Percent
1	Rural area (village)		758	1.3	37.9
2	Less than 20.000		258	0.5	12.9
3	20.000 to 100.000		391	0.7	19.6
4	100.001 to 500.000		353	0.6	17.7
5	More than 500.000		240	0.4	12.0
99	Inap. (not 26 in V6)	M	54471	96.5	
	Sum		56471	100.0	100.0
	Valid Cases		2000		

v430 - P6 SIZE OF COMMUNITY - SLOVAKIA

P.6\_SK (OBJECTIVE) SIZE OF COMMUNITY: SLOVAKIA

- 1 Less than 1.000 inhabitants
- 2 1.000 to 5.000 inhabitants
- 3 5.001 to 20.000 inhabitants
- 4 20.001 to 100.000 inhabitants
- 5 More than 100.000 inhabitants
- 99 Inap. Not SK (not coded 27 in V6)

Note:

Last trend: EB73.1, P.6

v430, weighted by v8

Value	Label	Missing	Count	Percent	Valid Percent
1	Less than 1.000		328	0.6	15.9
2	1.000 to 5.000		593	1.1	28.8
3	5.001 to 20.000		323	0.6	15.7
4	20.001 to 100.000		560	1.0	27.2
5	More than 100.000		258	0.5	12.5
