Acknowledgements

Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences.

Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (<http://zacat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

TNS OPINION & SOCIAL, Brussels [Producer];

GESIS, Cologne [Publisher]: ZA4999, dataset version 5.1.0, DOI:[10.4232/1.11642](https://doi.org/10.4232/1.11642) (2013).

The registered Digital Object Identifier (DOI) persistently identifies this dataset version with reference to former (or more recent) versions and to the corresponding ERRATA and update documentation.

1.2 Content

1.2.1 Abstract

This round of Eurobarometer surveys diverged from the Standard Eurobarometer measures and queried respondents on the following major areas of focus: (1) e-communications, (2) agriculture, (3) geographical and labor market mobility, and (4) knowledge of antibiotic use. The first major area of focus, e-communications, dealt with the nature, frequency, and quality of e-communications in the household. All respondents were asked whether they owned a fixed or mobile telephone and other goods, and about the number of different types of mobile phone access in the household. For those respondents with a personal mobile telephone, the survey asked about their mobile phone subscription services and how much they pay for mobile phone service as compared to two years ago. Respondents with fixed telephone access expressed their opinion about their landline phone services, and those with no fixed telephone access were asked why they chose not to have a fixed phone line, and how often and why they use public payphones. In addition, respondents were asked which type of services the household used to receive television and Internet in their homes. Respondents with Internet access were asked about accessing the Internet anytime and through what methods, the quality of their Internet service, and whether or not they had ever considered changing Internet service providers. Those without broadband or any Internet access were asked why they had chosen not to have broadband access or any Internet access in their homes. Finally, participants were asked about the confidentiality of the data they provide to telecom companies and social networking Web sites, use of social networking Web sites and telephone directories, whether they would consider buying a technology bundle, and their opinions about communication packages and e-communications services. For the second major area of focus, agriculture, the survey queried participants on the importance of and their knowledge about agriculture, including agricultural policy, who should address certain agricultural issues and which issues should be a main priority of the European Union (EU). They were also asked to evaluate the EU's current and potential future actions on agriculture, the main responsibilities and roles of farmers, the most important reasons for maintaining agriculture in the EU, and whether or not they thought the current economic support measures in place for farmers are appropriate. The respondents were also presented questions about agriculture in relation to climate change. The third major area of focus, geographical and labor market mobility, queried participants on their opinions about moving abroad, including whether they had personally done so for education or employment, and whether family or friends had ever lived or worked abroad. Respondents who lived or worked in another country were asked how often they commuted across the border, which country they had visited and the duration of their last stay and the general type of work done and how they found that job. Respondents who were retired were asked about whether they envisage to work outside their country in the future, how soon they would be likely to work there, and the type of employment that interests them in that country. In addition, they were asked to identify which countries they would prefer to work in, why they prefer these countries, the length of time they intend to work outside their own country, and whether they had taken any steps to move to another country. If these respondents were moving to a specific country, the survey inquired whether friends or relatives could supply them with information about the country, whether they would move there alone or with other people, and how they would go about finding a job in another country. All respondents were asked whether they would move abroad if they were unemployed and having difficulties finding a job, the income they would need in order to take a job in another country, the type of commute to work preferred, and the chances of finding a job outside their own country. Respondents were then asked about their knowledge of EURES, the Europe-wide network of public employment services, which employment service they would find useful, what reasons might encourage or discourage them from working abroad, and what difficulties they may encounter when working abroad. The survey queried respondents on their opinion of pension payments and health care after retirement, reimbursement for medical treatment by their national health service, and their awareness and use of the European Health Insurance Card (EHIC). For the fourth

and final major area of focus, knowledge of antibiotic use, participants were asked if they had taken antibiotics within the last year, how they obtained the last course of antibiotics they used, and the reason for last taking antibiotics. They were asked about their knowledge of antibiotic use, whether they had received any information about not taking antibiotics unnecessarily and the source of this information, whether this information had changed their views on antibiotics and how so, and which sources would provide trustworthy information on antibiotics. Demographic and other background information includes age, gender, nationality, occupation, marital status, age when stopped full-time education, household composition, difficulties in paying bills, level in society, Internet use, type and size of locality, region of residence, and language of interview (in select countries).

Brussels, August 2010.

1.3 Universe

In all, Eurobarometer 72.5 interviewed 26.761 citizens in the 27 member countries of the European Union after the 2004/2007 enlargement (i.e. including the former Accession Countries Romania and Bulgaria). All respondents were residents in the respective country, nationals and non-nationals but EU-citizens, and aged 15 and over. They were supposed to have sufficient command of one of the respective national language(s) to answer the questionnaire. Separate samples were drawn for Northern Ireland and East Germany.

1.4 Sampling procedure

A multi-stage, random (probability) sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regional units in every country (Statistical Office of the European Community, EUROSTAT NUTS 2 or equivalent). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of starting addresses was selected from each sampled PSU, at random. Further addresses were chosen systematically using standard random route procedures as every Nth address from the initial address. In each household, a respondent was drawn, at random, following the closest birthday rule. No more than one interview was conducted in each household.

The regular sample size (in the sense of completed interviews) is 1000 respondents per country, except the United Kingdom with separate samples for Great Britain (1000) and Northern Ireland (300), Germany with separate samples for the Eastern (500) and the Western part (1000), and Luxembourg, Cyprus (Republic) and Malta with 500 interviews each. The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

From November 13 to December 9, 2009, the TNS Opinion & Social, a consortium created between Taylor Nelson Sofres and EOS Gallup Europe, carried out the fieldwork for this Eurobarometer, at the request of the European Commission, Directorate General Press and Communication, Opinion Polls. TNS Opinion & Social is based at Avenue Herrmann Debroux, 40, 1160 Brussels, Belgium. TNS Opinion & Social coordinates the fieldwork carried out through its network of national institutes:

1.6 Mode of data collection

In all countries, fieldwork was conducted on the basis of detailed and uniform instructions prepared by TNS Opinion Social. Interviews were conducted face-to-face in people's home in the appropriate national language. As far as the data capture is concerned, CAPI (Computer Assisted Personal Interview) was used in those countries where this technique was available.

Equivalent French and English basic questionnaires were developed for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country. Backtranslation procedures were applied for controlling semantic equivalence.

1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factor corrects for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country as well as each lower level sample (Great Britain and Northern Ireland, East and West Germany) are represented in proportion to its population size within different groupings, or according to the historical states of European unification (e.g. founder members, new members, Euro zone) in the case of the EUROPEAN WEIGHTS, or for the United Kingdom (WEIGHT SPECIAL UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31) and for Germany as a whole (WEIGHT SPECIAL GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTs adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general all samples which do not belong to the respective group of samples under consideration are excluded from calculation.

The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight WEIGHT EXTRA (WEX) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 4) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

Eurobarometer 72.5 provides three (post-stratification) NATION WEIGHTs: W1 (WEIGHT RESULT FROM TARGET) for separate analysis or comparison of individual samples (countries or regions on sub-national level), W4 (WEIGHT SPECIAL UNITED KINGDOM) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole, and W3 (WEIGHT SPECIAL GERMANY), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. W3 and W4 exclude all other countries from calculation, but include the post-stratification factors for the United Kingdom and Germany respectively.

The EUROPEAN WEIGHTs provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries, of accession or candidate countries, and of Euro zone countries, representing different historical states of European integration (e.g. EU6 = six founder members) . All post-stratification factors are included.

For the parts of the questionnaire for which respondents were asked to answer for their household (QA), an additional national weighting criteria was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices. The total household figures for input in this post-weighting procedure are listed in the technical description annexed to the basic bilingual questionnaire. The weights described in the following are available in the STANDARD and in the HOUSEHOLD version, if applicable (W31 to W62, WEX_HH).

Table 2: Overview of population size weights

European Weights in Eurobarometer 72.5	Function
W5 to W9, W11, W14, W22; W35 to W39, W41, W44, W52	grouping EU member countries
W10, W13, W24; W40, W43, W54	grouping new member countries
W18; W48	grouping accession countries
W81, W82; W42, W61, W62	grouping (non-)Eurozone countries

For more detailed information on the individual weights please see the corresponding variable description.

1.8 Data preparation

The data received by GESIS from TNS Opinion & Social were checked for completeness, missing and duplicate records, for illegal (wild) codes and for (formal) consistency of response patterns and question routing. Errors discovered by these procedures are documented or corrected, as a general rule after consulting related additional documentation (e.g. tabular reports) or the data provider. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable DDI-XML compliant documentation was created for this dataset by GESIS.

GESIS added 'Inappropriate' (INAP) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the original questionnaire was adhered to for (almost) every respondent. An additional INAP category was defined whenever a question or group of questions were not surveyed in one or more countries, or if variables refer to country specific items (e.g. regions).

Users should note that answers to multiple-response questions are (originally) represented by a series of binary 'dummy' variables (i.e. variables which take on values of one and zero only), creating separate 'dummy' variables also to explicitly represent 'Don't know', 'No answer/refusal' or other residual responses, such as 'None of the above'. The archive has recoded these residual responses in the case of uncommon minor inconsistencies with respect to and in favour of the series of substantial answers.

GESIS has recoded the missing answers (NA) represented in the original data set by blanks (system missing) to standard values. Their practically complete absence suggests that eventual cases of any not explicitly coded item non-response, might be collapsed with the DK (don't know) category.

Question text and contingency text appearing in the variable description is taken from English language version of the basic (bilingual) questionnaire (master questionnaire). Coding schemes and other documentation are based on the English language version of the basic questionnaire or on the respective SPSS data definition statements as provided by TNS Opinion & Social. In case of any discrepancy between questionnaires, SPSS definitions and data regarding the coding scheme of a variable, the archive, as a general rule, carried out any correction in agreement with the data provider.

If the documentation for country-specific questions or answer categories is provided in another languages than English, the archive documents the original language wording and supplies the English translation in brackets.

Specific information on data preparation, harmonization or regarding inconsistencies is noted on variable level. The basic bilingual questionnaire has not (yet) been supplied completely. Missing questions have been added from the UK field questionnaire (question module Q.A).

1.9 Further remarks

The HOUSEHOLD WEIGHTS for the "E-Communications" module QA have been provided with delay and have subsequently been integrated by the archive starting with dataset version 3.0.0. Results in the corresponding official EC reports are all based on weighted data.

The protocol variables P1 to P7 have been provided with delay and have subsequently been integrated by the archive starting with dataset version 4.0.0.

Country specific items (OTHER specified) for QA10 (V155), QA19 (V209 to V231) and QC6 (V375) are documented in the additional variable level documentation made available through the ZACAT data portal and in the corresponding variable report. No country specific documentation was provided for QC13 (OTHER specified).

Questionnaire module QF (Sport and physical activity) is part of the basic bilingual questionnaire, but neither included in the national field questionnaires nor in the data set as provided by TNS.

2 Eurobarometer Series Description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brêthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

Table 3: EU enlargement and countries covered by Standard and Special Eurobarometer

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 4: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.2OVR, 55.1OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.2OVR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 5) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 5: Overview of Eurobarometer surveys with standard EU and trend question modules

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

3 Dataset structure and standards

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 6: ZEUS Party Family Code (slightly modified)

Category		Party Family
0	(001-099)	not affiliated / electoral alliances across "families"
1	(100-199)	Communists
2	(200-299)	Socialists
3	(300-399)	Liberals
4	(400-499)	Christian Democrats
5	(500-599)	Conservatives
6	(600-699)	Extreme Rights / Nationalists
7	(700-799)	Regionalists / Ethnic
8	(800-899)	Environmental parties
9	(900-949)	Agricultural parties
9	(950-989)	other special issue parties (e.g. Eurosceptics) and independents
	990	other (spontaneous)
	994	not voting age
	995	empty ballot (blank) or invalid vote
	996	not voted / would not vote
	997	Refused
	998	DK / DK+NA if NA not coded separately
	999	INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION – ALL SAMPLES ISO 3166).

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (–1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded “real” values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission’s official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

CROSS-TABULATION: The absolute frequencies of the occurrence of values (<i>absolute values</i>) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies (<i>row percent</i>) refer to the valid cases (<i>n valid sum</i>), i.e. the total number of cases (<i>n sum</i>) reduced by the number of cases defined as missing data (<i>M</i>). For display and place saving reasons excluded countries or areas may be completely dropped from the table.																																																																																																																																																																																																																																																																																																																																																					
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (<i>M</i>), i.e. <i>percent</i> on the basis of all cases (<i>sum</i>) and <i>valid percent</i> on the basis of the <i>valid cases</i> .																																																																																																																																																																																																																																																																																																																																																					

5 Variable Documentation

Variable, Label

Question Text (English Language)

v1 - STUDY NUMBER - DISTRIBUTOR

ARCHIVE STUDY NUMBER - DISTRIBUTOR

Study Number of the distributing data archive.

v1

Value	Label	Missing	Count	Percent	Valid Percent
4999			26761	100.0	100.0
	Sum		26761	100.0	100.0
	Valid Cases		26761		

v2 - STUDY NUMBER - PUBLISHER

ARCHIVE STUDY NUMBER - PUBLISHER

Study number of the data archive which is publishing this data set version.

v2

Value	Label	Missing	Count	Percent	Valid Percent
4999			26761	100.0	100.0
	Sum		26761	100.0	100.0
	Valid Cases		26761		

v3 - GESIS ARCHIVE VERSION

VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

GESIS Archive Version: 5.1.0 '2013-06-14'

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

For details of the version history and for information on errata in current or former dataset versions, please consult the GESIS data catalogue entry (study description) persistently referenced by the dataset DOI (Digital Object Identifier).

v3

Value	Label	Missing	Count	Percent	Valid Percent
5.1.0 (2013-06-14)			26761	100.0	100.0
	Sum		26761	100.0	100.0
	Valid Cases		26761		

v4 - EUROBAROMETER NUMBER

EUROBAROMETER SURVEY NUMBER

The number identifying the Eurobarometer survey.

725 Eurobarometer 72.5 (November-December 2009)

v4

Value	Label	Missing	Count	Percent	Valid Percent
725	Eurobarometer 72.5 (November-December 2009)		26761	100.0	100.0
	Sum		26761	100.0	100.0
	Valid Cases		26761		

v5 - UNIQUE CASE ID (TNS COUNTRY ID + INTERVIEW ID)

UNIQUE CASE ID (TNS COUNTRY ID + TNS INTERVIEW ID)

This unique respondent identification is composed of the original TNS country code and the original TNS interview number. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 04: Greece; 05: Spain; 06: Finland; 07: France; 08: Ireland; 09: Italy; 10: Luxembourg; 11: Netherlands; 12: Austria; 13: Portugal; 14: Sweden; 20: Germany West; 21: Germany East; 22: Great Britain; 23: Northern Ireland; 31: Bulgaria; 32: Cyprus (Republic); 33: Czech Republic; 34: Estonia; 35: Hungary; 36: Latvia; 37: Lithuania; 38: Malta; 39: Poland; 40: Romania; 41: Slovakia; 42: Slovenia). The remaining digits contain the country-specific questionnaire numbers.

Note:

Actual number is coded.

v6 - NATION - ALL SAMPLES

NATION – ALL SAMPLES

All samples including separate samples for East and West Germany and for Great Britain and Northern Ireland.

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany West
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 Germany East
- 16 Finland
- 17 Sweden
- 18 Austria
- 19 Cyprus (Republic)
- 20 Czech Republic
- 21 Estonia
- 22 Hungary
- 23 Latvia
- 24 Lithuania
- 25 Malta
- 26 Poland
- 27 Slovakia
- 28 Slovenia
- 29 Bulgaria
- 30 Romania

Note:

Use of weighting factor W1 (V8) is optional.

v6

v7 - NATION - ALL SAMPLES ISO 3166

NATION ALL – ISO LABELS

All surveyed countries and regions, i.e. including separate samples for East-/West-Germany, Great Britain/Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the “historical” East/West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized “Turkish Republic of Northern Cyprus”.

Note:

Use of weighting factor W1 (V8) is optional.

v8 - W1 WEIGHT RESULT FROM TARGET

W1 WEIGHT RESULT FROM TARGET

This POST-STRATIFICATION WEIGHT is based on a comparison for each sample with the respective universe description. As such in all countries, gender, age, region and size of locality are introduced in the iteration procedure carried out by the fieldwork institutes.

British and Northern Irish as well as East and West German samples are weighted separately. The weight reproduces the real number of cases for each country. In terms of its general function it corresponds to former NATION WEIGHT II (until EUROBAROMETER 31).

v9 - NATION - UNITED KINGDOM

NATION – UNITED KINGDOM

Great Britain and Northern Ireland are coded together.

0 Other

1 United Kingdom

Note:

Use of weighting factor W4 (V10) is mandatory.

v10 - W4 WEIGHT UNITED KINGDOM

W4 WEIGHT UNITED KINGDOM

This POPULATION SIZE WEIGHT adjusts the British and the Northern Irish (sub-national) samples to their share in the total population aged 15 and over in the United Kingdom. It must be applied whenever the United Kingdom is to be analyzed as a whole. The post-stratification weighting factors are included for both samples. All other samples are excluded from analysis. In terms of its general function the weight corresponds to former NATION WEIGHT I (until EUROBAROMETER 31).

v11 - NATION - UNITED GERMANY

NATION – UNITED GERMANY

East and West Germany are coded together.

0 Other

1 Germany

v24 - W10 WEIGHT EU NMS 3

W10 WEIGHT EU NMS 3

This POPULATION SIZE WEIGHT only refers to the three new members as of January 1995: Finland, Sweden and Austria. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EU NMS 3 must be applied whenever these three countries are to be analyzed altogether as a group.

v25 - NATION GROUP EU15

NATION GROUP EU15

NATION GROUP EU15 adds Austria, Finland and Sweden to the EURO 12+ countries, new members as of January 1995.

0 Other

1 EU15

Note:

Use of weighting factor W11 (V26) is mandatory.

v38 - W81 WEIGHT EURO ZONE 2009

W81 WEIGHT EURO ZONE 2009

This POPULATION SIZE WEIGHT separates the group of 12 countries which introduced the EURO as of January 1, 2002 (Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland) plus Slovenia which introduced the EURO as of January 1, 2007, plus Cyprus and Malta, which introduced the EURO as of January 1, 2008, plus Slovakia, which introduced the EURO as of January 1, 2009. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EURO ZONE 2009 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

v39 - NATION GROUP NON EURO ZONE 2009

NATION GROUP NON EURO ZONE 2009

NATION GROUP NON EURO ZONE 2009 refers to the group of countries which did not introduce the EURO up to January 1, 2009 (Denmark, United Kingdom, Sweden, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Bulgaria, Romania).

0 Other

1 NON EURO ZONE 2009

Note:

Use of weighting factor W82 (V40) is mandatory.

v40 - W82 WEIGHT NON EURO ZONE 2009

W82 WEIGHT NON EURO ZONE 2009

This POPULATION SIZE WEIGHT separates the group of countries (Denmark, United Kingdom, Sweden, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Bulgaria, Romania) which did not introduce the EURO up to January 1, 2009. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT NON EURO ZONE 2009 must be applied whenever these countries are to be analyzed altogether as a group.

v41 - WEX WEIGHT EXTRA POPULATION 15+

WEX WEIGHT EXTRA POPULATION 15+

WEIGHT EXTRA extrapolates the actual universe (population aged 15 or more) for each country (sample), i.e. this weight variable integrates all other available weights, but does not reproduce the number of cases in the data set.

v42 - W31 HH WEIGHT RESULT FROM TARGET

W31 HH WEIGHT RESULT FROM TARGET – HOUSEHOLD WEIGHT

This POST-STRATIFICATION WEIGHT is based on a comparison for each sample with the respective universe description. British and Northern Irish as well as East and West German samples are weighted separately.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.A), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v43 - W34 HH WEIGHT UNITED KINGDOM

W34 HH WEIGHT UNITED KINGDOM – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT adjusts the British and the Northern Irish (sub-national) samples to their share in the total population aged 15 and over in the United Kingdom. It must be applied whenever the United Kingdom is to be analyzed as a whole. All other samples are excluded from analysis.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.A), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v44 - W33 HH WEIGHT GERMANY

W33 HH WEIGHT GERMANY – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT adjusts the East and the West German (sub-national) samples to their share in the total population aged 15 and over, of the united Germany. It must be applied whenever Germany is to be analyzed as a whole. All other samples are excluded from analysis.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.A), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v45 - W35 HH WEIGHT EU6

W35 HH WEIGHT EU6 - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT refers to the six EC founder members: France, Belgium, Netherlands, West Germany, Italy, and Luxembourg. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. WEIGHT EU6 must be applied whenever these six EC founder countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.A), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v46 - W36 HH WEIGHT EU9

W36 HH WEIGHT EU9 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT adds Denmark, Ireland, Great Britain and Northern Ireland to the EU6 countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. WEIGHT EU9 must be applied whenever these nine countries as of the 1973 enlargement are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.A), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v47 - W37 HH WEIGHT EU10

W37 HH WEIGHT EU10 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT adds Greece to the EU9 countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. WEIGHT EU10 must be applied whenever these ten countries as of the 1981 enlargement are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.A), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v48 - W38 HH WEIGHT EU12

W38 HH WEIGHT EU12 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT adds Spain and Portugal to the EU10 countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. WEIGHT EU12 must be applied whenever these twelve countries as of the 1986 enlargement are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.A), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v49 - W39 HH WEIGHT EURO12+

W39 HH WEIGHT EU12+ – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT equals WEIGHT EU12 but in addition including East Germany (former German Democratic Republic) after the unification of Germany on October 3, 1990 (Eurobarometer 34). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. WEIGHT EU12+ must be applied whenever these twelve member countries are to be analyzed altogether as a group including the Eastern part of Germany (new German federal states).

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.A), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v50 - W40 HH WEIGHT EU NMS 3

W40 HH WEIGHT EU NMS 3 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT only refers to the three new members as of January 1995: Finland, Sweden and Austria. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. All other samples are excluded from calculation. WEIGHT EU NMS 3 must be applied whenever these three countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.A), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v51 - W41 HH WEIGHT EU15

W41 HH WEIGHT EU15 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT adds Austria, Finland and Sweden to the EU12+ countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. WEIGHT EU15 must be applied whenever these 15 countries as of the 1995 enlargement are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.A), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v52 - W42 HH WEIGHT EURO ZONE 2007

W42 HH WEIGHT EURO ZONE 2007 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT separates the group of 12 countries which introduced the EURO as of January 1, 2002 (Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland) plus Slovenia which introduced the EURO as of January 1, 2007. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. WEIGHT EURO ZONE 2007 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.A), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v53 - W43 HH WEIGHT EU NMS 10

W43 HH WEIGHT EU NMS 10 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT only refers to the group of the ten new members as of the enlargement in 2004: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia and Slovenia. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. All other samples are excluded from calculation. WEIGHT EU NMS 10 must be applied whenever these ten countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.A), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v54 - W44 HH WEIGHT EU25

W44 HH WEIGHT EU25 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT adds Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia and Slovenia to the EU15 countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) group of countries. All other samples are excluded from calculation. WEIGHT EU25 must be applied whenever these 25 countries as of the 2004 enlargement are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.A), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v55 - W48 HH WEIGHT AC (BG RO)

W45 WEIGHT AC (BG RO) – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT refers to Bulgaria and Romania. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of future EU accession countries. All other countries are excluded from calculation. WEIGHT AC must be applied whenever these two countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.A), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v56 - W52 HH WEIGHT EU27

W52 HH WEIGHT EU27 – HOUSEHOLD WEIGHT

WEIGHT EU27 includes all 25 member countries after the 2004 enlargement, plus the remaining Accession Countries Bulgaria and Romania. This POPULATION SIZE WEIGHT adjusts each national sample in proportion to its share in the total population aged 15 and over, of the European Union plus Bulgaria and Romania. It should be used whenever all 27 countries participating in this wave are to be analysed as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.A), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v57 - W54 HH WEIGHT EU NMS 12

W54 HH WEIGHT EU NMS 12 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT refers to the group of the 12 new member countries as of the enlargement in January 2007: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia, Bulgaria and Romania. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. All other samples are excluded from calculation. WEIGHT EU NMS 12 must be applied whenever these 12 countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.A), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v58 - W61 HH WEIGHT EURO ZONE 2009

W61 HH WEIGHT EURO ZONE 2009 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT separates the group of 12 countries which introduced the EURO as of January 1, 2002 (Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland) plus Slovenia which introduced the EURO as of January 1, 2007, plus Cyprus and Malta, which introduced the EURO as of January 1, 2008, plus Slovakia, which introduced the EURO as of January 1, 2009. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EURO ZONE 2009 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.A), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v59 - W62 HH WEIGHT NON EURO ZONE 2009

W62 HH WEIGHT NON EURO ZONE 2009 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT separates the group of countries (Denmark, United Kingdom, Sweden, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Bulgaria, Romania) which did not introduce the EURO up to January 1, 2009. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT NON EURO ZONE 2009 must be applied whenever these countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.A), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v60 - WEX HH WEIGHT EXTRA POPULATION 15+

WEX HH WEIGHT EXTRA POPULATION 15+ – HOUSEHOLD WEIGHT

WEIGHT EXTRA extrapolates the actual universe (population aged 15 or more) for each country (sample), i.e. this weight variable integrates all other available weights, but does not reproduce the number of cases in the data set.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.A), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v89 - D43A PHONE AVAILABLE - FIXED IN HH

D.43A

Is there a fixed telephone (landline) available in the household?

- 1 Yes
- 2 No

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V42 to V60.

v102 - QA2 MOBILE PHONES HH - CONTRACT

Q.A2

ASK ALL

And thinking about all household members, including yourself, please indicate for each of the following how many of them are available in your household

(SHOW SCREEN WITH ITEMS – ONE ANSWER PER LINE – READ OUT)

Q.A2_1 Mobile phone access on a contract (billed)

- 0 None
- 1 Box 1
- 2 Box 2
- 3 Box 3
- 4 Box 4
- 5 Box 5
- 6 Box 6
- 7 Box 7
- 8 Box 8
- 9 9 or more
- 11 DK

Note:

Original code "10" recoded to "0".

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V42 to V60.

The basic bilingual questionnaire as provided by TNS did not include question module Q.A (E-Communications). This part has been extracted from the UK field questionnaire.

v105 - QA2 MOBILE PHONES HH - PRE-PAID (REC)

Q.A2 MOBILE PHONE ACCESS ON PRE-PAID ARRANGEMENT (HH) – RECODED

- 0 None
- 1 Box 1
- 2 Box 2
- 3 Box 3
- 4 4 or more
- 8 DK

Derivation:

This variable groups answers to question Q.A2_2.

Note:

See Q.A2_2 (V104) for complete question text.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V42 to V60.

The basic bilingual questionnaire as provided by TNS did not include question module Q.A (E-Communications). This part has been extracted from the UK field questionnaire.

Last trend modified: EB68.2, Q.D1

v139 - QA9 TV RECEPTION VIA: AERIAL

Q.A9

ASK Q.A9 IF "TELEVISION IN THE HOUSEHOLD", CODE 1 IN D.46 – OTHERS GO TO Q.A10

Does your household receive the television via...?

(READ OUT – MULTIPLE ANSWERS POSSIBLE)

Q.A9_1 An aerial (on the roof or on the top of the TV set)

0 Not mentioned

1 Mentioned

9 Inap. No television in household (not coded 1 in V91)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V42 to V60.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

The basic bilingual questionnaire as provided by TNS did not include question module Q.A (E-Communications). This part has been extracted from the UK field questionnaire.

v145 - QA10 INTERNET ACCESS HH: DIAL UP STANDARD

Q.A10

ASK Q.A10 TO Q.A18 IF "INTERNET IN THE HOUSEHOLD", CODES 5 IN D.46 – OTHERS GO TO Q.A19

How does your household access the Internet from home?

(READ OUT – MULTIPLE ANSWERS POSSIBLE)

Q.A10_1 Via a dial-up connection using a standard telephone line (narrow band)

0 Not mentioned

1 Mentioned

9 Inap. No Internet connection at home (not coded 1 in V95)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V42 to V60.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

The basic bilingual questionnaire as provided by TNS did not include question module Q.A (E-Communications). This part has been extracted from the UK field questionnaire.

v150 - QA10 INTERNET ACCESS HH: SATELLITE NETWORK

Q.A10

ASK Q.A10 TO Q.A18 IF "INTERNET IN THE HOUSEHOLD", CODES 5 IN D.46 – OTHERS GO TO Q.A19

How does your household access the Internet from home?

(READ OUT – MULTIPLE ANSWERS POSSIBLE)

Q.A10_6 Via the satellite network (broadband)

- 0 Not mentioned
- 1 Mentioned
- 9 Inap. No Internet connection at home (not coded 1 in V95)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V42 to V60.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

The basic bilingual questionnaire as provided by TNS did not include question module Q.A (E-Communications). This part has been extracted from the UK field questionnaire.

ASK Q.A10 TO Q.A18 IF "INTERNET IN THE HOUSEHOLD", CODES 5 IN D.46

[Q.A10

How does your household access the Internet from home?]

Q.A100

ASK Q.A100 ONLY IF "OTHER" IN Q.A10 – CODE 9 IN Q.A10 – OTHERS GO TO Q.A11

Which other(s)?

(WRITE DOWN – CODE AT THE OFFICE – SEVERAL ANSWERS POSSIBLE)

- 0 NA
- 1 Code 1 (country specific)
- 2 Code 2 (country specific)
- 3 Code 3 (country specific)
- 4 Code 4 (country specific)
- 5 Code 5 (country specific)
- 6 Code 6 (country specific)
- 7 Code 7 (country specific)
- 8 Code 8 (country specific)
- 11 Code 11 (country specific)
- 12 Code 12 (country specific)
- 99 Inap. Not any others in Q.A10 (not coded 1 in V153)

in Germany (DE):

country specific code

- 1 With a webstick (UMT stick)

in Italy (IT):

country specific code

- 1 Internet key

in Ireland (IE):

country specific code

- 1 Mobile broadband via USB Stick
- 2 Wireless broadband

in Finland (FI):

country specific code

- 1 Mikkula - moving broad band internet connection
- 2 W-lan, wireless internet connection
- 4 Not at use

in Austria (AT):

country specific code

1 Wireless Lan

in Czech Republic (CZ):

country specific code

11 WiFi, wireless

in Estonia (EE):

1 Other

in Hungary (HU):

country specific code

1 Via mobil internet

2 Via IP telephone

3 With the separate antenna

4 Via microwave

in Lithuania (LT):

country specific code

1 Wireless Internet

2 UTP cable

3 "Erdvės"

4 "Viasat"

5 KIS

in Slovakia (SK):

country specific code

11 Microwave connection

12 Wifi

in Slovenia (SI):

country specific code

1 Siol

2 E-point (over-the-air), named "Silyago KUD"

3 Wireles (from the neighbour, from the nearest city)

4 Over antenna

5 USB device, not paying for internet

6 We have it locally, doesn't know the name

7 T2 internet bundle

8 Connection approved and financed by community Velenje

in Bulgaria (BG):

country specific code

12 LAN

Note:

Respondents answering "Other" to Q.A10 (Code 1 in V153) without any specification in Q.A10O ("Which other(s)?") are coded '0' (NA) in V155.

Coding of "other" was not clearly documented without ambiguity for Estonia (EE) and Bulgaria (BG).

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V42 to V60.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

The basic bilingual questionnaire as provided by TNS did not include question module Q.A (E-Communications). This part has been extracted from the UK field questionnaire.

v156 - QA11 MOB PH NETW INTERNET HH - FOR ALL MEMBERS

ASK Q.A10 TO Q.A18 IF "INTERNET IN THE HOUSEHOLD", CODES 5 IN D.46

Q.A11

ASK Q.A11 AND Q.A12 IF "ONLY INTERNET ACCESS VIA MOBILE PHONE NETWORK", ONLY CODE 5 IN Q.A10 –
OTHERS GO TO Q.A13

You said the household's Internet access is via the mobile phone network only. Does this access serve the needs of all household members that want to go on the Internet anytime?

- 1 Yes
- 2 No
- 3 DK
- 9 Inap. No Internet access via mobile phone network (not coded 1 in V149)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V42 to V60.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

The basic bilingual questionnaire as provided by TNS did not include question module Q.A (E-Communications). This part has been extracted from the UK field questionnaire.

ASK Q.A11 AND Q.A12 IF "ONLY INTERNET ACCESS VIA MOBILE PHONE NETWORK", ONLY CODE 5 IN Q.A10

Q.A12

And in what ways can your household access the Internet at home?

(READ OUT – MULTIPLE ANSWERS POSSIBLE)

Q.A12_5 Other (SPONTANEOUS)

0 Not mentioned

1 Mentioned

9 Inap. No Internet access via mobile phone network (not coded 1 in V149)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V42 to V60.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

The basic bilingual questionnaire as provided by TNS did not include question module Q.A (E-Communications). This part has been extracted from the UK field questionnaire.

v167 - QA16 INTERNET: SPEED REMAINS CONSTANT

ASK Q.A13 TO Q.A18 IF "INTERNET IN THE HOUSEHOLD", CODES 5 IN D.46

Q.A16

For each of the following, please tell me whether you totally agree, tend to agree, tend to disagree or totally disagree.

(SHOW SCREEN – ONE ANSWER PER LINE – READ OUT)

Q.A16_2 The speed of your Internet connection\ time to download remains constant

- 1 Totally agree
- 2 Tend to agree
- 3 Tend to disagree
- 4 Totally disagree
- 5 Not applicable (SPONTANEOUS)
- 6 DK
- 9 Inap. No Internet connection at home (not coded 1 in V95)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

The basic bilingual questionnaire as provided by TNS did not include question module Q.A (E-Communications). This part has been extracted from the UK field questionnaire.

v173 - QA17 INTERNET PROV CHANGE: NO/NEVER

ASK Q.A13 TO Q.A18 IF "INTERNET IN THE HOUSEHOLD", CODES 5 IN D.46

Q.A17

Have you or someone in your household ever considered changing Internet service provider?
(SHOW SCREEN – READ OUT – ROTATE ITEMS 2 TO 11 – MULTIPLE ANSWERS POSSIBLE)

Q.A17_1 No, your household never considered it

- 0 Not mentioned
- 1 Mentioned
- 9 Inap. No Internet connection at home (not coded 1 in V95)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V42 to V60.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

The basic bilingual questionnaire as provided by TNS did not include question module Q.A (E-Communications). This part has been extracted from the UK field questionnaire.

v174 - QA17 INTERNET PROV CHANGE: SATISFIED

ASK Q.A13 TO Q.A18 IF "INTERNET IN THE HOUSEHOLD", CODES 5 IN D.46

Q.A17

ITEMS 2 – 13 ASKED ONLY TO RESPONDENTS CODED 0 IN ITEM 1

Have you or someone in your household ever considered changing Internet service provider?

(SHOW SCREEN – READ OUT – ROTATE ITEMS 2 TO 11 – MULTIPLE ANSWERS POSSIBLE)

Q.A17_2 Yes, but your household is satisfied with the current service it gets

0 Not mentioned

1 Mentioned

9 Inap. Not considered changing Internet service provider (coded 1 in V173)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V42 to V60.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

The basic bilingual questionnaire as provided by TNS did not include question module Q.A (E-Communications). This part has been extracted from the UK field questionnaire.

Have you or someone in your household ever considered changing Internet service provider?

(SHOW SCREEN – READ OUT – ROTATE ITEMS 2 TO 11 – MULTIPLE ANSWERS POSSIBLE)

Q.A17_7 Yes, but your household is getting the Internet access via a package (bundle) which makes it difficult to switch to another provider

0 Not mentioned

1 Mentioned

9 Inap. Not considered changing Internet service provider (coded 1 in V173)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V42 to V60.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

The basic bilingual questionnaire as provided by TNS did not include question module Q.A (E-Communications). This part has been extracted from the UK field questionnaire.

v185 - QA17 INTERNET PROV CHANGE: DK

ASK Q.A13 TO Q.A18 IF "INTERNET IN THE HOUSEHOLD", CODES 5 IN D.46

Q.A17

ITEMS 2 – 13 ASKED ONLY TO RESPONDENTS CODED 0 IN ITEM 1

Have you or someone in your household ever considered changing Internet service provider?

(SHOW SCREEN – READ OUT – ROTATE ITEMS 2 TO 11 – MULTIPLE ANSWERS POSSIBLE)

Q.A17_13 DK

0 Not mentioned

1 Mentioned

9 Inap. Not considered changing Internet service provider (coded 1 in V173)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V42 to V60.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

The basic bilingual questionnaire as provided by TNS did not include question module Q.A (E-Communications). This part has been extracted from the UK field questionnaire.

v186 - QA17 INTERNET PROV CHANGE: YES (REC)

Q.A17 CONDIDERATION OF INTERNET PROVIDER CHANGE – YES-ANSWERS (RECODED)

0 No/DK

1 Yes

9 Inap. No Internet connection (not coded 1 in V95)

Derivation:

This variable collapses answers to Q.A17 into two categories.

Note:

See Q.A17 (V173-V185) for complete question text.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V42 to V60.

The basic bilingual questionnaire as provided by TNS did not include question module Q.A (E-Communications). This part has been extracted from the UK field questionnaire.

9 Inap. No dial-up connection (not coded 1 in V145 or V146)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V42 to V60.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

The basic bilingual questionnaire as provided by TNS did not include question module Q.A (E-Communications). This part has been extracted from the UK field questionnaire.

v196 - QA18 INTERNET BROADBAND: DK

ASK Q.A13 TO Q.A18 IF "INTERNET IN THE HOUSEHOLD", CODES 5 IN D.46

Q.A18

ASK Q.A18 IF ONLY "NARROWBAND INTERNET ACCESS", ONLY CODE 1 OR 2 IN Q.A10 – OTHERS GO TO Q.A19

Why does your household not have broadband Internet access?

(READ OUT – MULTIPLE ANSWERS POSSIBLE)

Q.A18_10 DK

0 Not mentioned

1 Mentioned

9 Inap. No dial-up connection (not coded 1 in V145 or V146)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V42 to V60.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

The basic bilingual questionnaire as provided by TNS did not include question module Q.A (E-Communications). This part has been extracted from the UK field questionnaire.

v202 - QA19 INTERNET NO ACCESS: SUBSCRIPTION COSTS BB

Q.A19

ASK Q.A19 IF "NO INTERNET ACCESS AT HOME", NO CODE 5 IN D.46 – OTHERS GO TO Q.A20

You said you do not have Internet access at home. Among the following list, which ones best explain why your household does not have access to the Internet?

(READ OUT – MULTIPLE ANSWERS POSSIBLE)

Q.A19_6 The monthly subscription cost of broadband internet is too high

- 0 Not mentioned
- 1 Mentioned
- 9 Inap. Internet connection at home (coded 1 in V95)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V42 to V60.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

The basic bilingual questionnaire as provided by TNS did not include question module Q.A (E-Communications). This part has been extracted from the UK field questionnaire.

Q.A19

ASK Q.A19 IF "NO INTERNET ACCESS AT HOME", NO CODE 5 IN D.46 – OTHERS GO TO Q.A20

You said you do not have Internet access at home. Among the following list, which ones best explain why your household does not have access to the Internet?

(READ OUT – MULTIPLE ANSWERS POSSIBLE)

Q.A19_11 Other (SPONTANEOUS – SPECIFY)

- 0 Not mentioned
- 1 Mentioned
- 9 Inap. Internet connection at home (coded 1 in V95)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V42 to V60.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

The basic bilingual questionnaire as provided by TNS did not include question module Q.A (E-Communications). This part has been extracted from the UK field questionnaire.

v213 - QA19 INTERNET NO ACCESS: OTHER REASONS 5

ASK Q.A19 IF "NO INTERNET ACCESS AT HOME", NO CODE 5 IN D.46

[Q.A19

You said you do not have Internet access at home. Among the following list, which ones best explain why your household does not have access to the Internet?]

Q.A19O

ASK Q.A19O ONLY IF "OTHER" IN Q.A19 – CODE 11 IN Q.A19 – OTHERS GO TO Q.A20

Which other(s)?

(WRITE DOWN – CODE AT THE OFFICE – SEVERAL ANSWERS POSSIBLE)

Q.A19O_5 Other reasons 5

0 Not mentioned

1 Mentioned (country specific)

9 NA

99 Inap. Not any others in Q.A19 (not coded 1 in V207)

in Italy (IT):

country specific code

1 My parents preferred to remove the Internet connection, because I neglected my studies.

in Finland (FI):

country specific code

1 Does not want to study how to use computer

in Hungary (HU):

country specific code

1 I don't need it

in Slovenia (SI):

country specific code

1 Maybe the son will get internet - but doesn't know for sure

Note:

Respondents answering "Other" to Q.A19 (Code 1 in V207) without any specification in Q.A19O ("Which other(s)?") are coded '9' (NA) in V209 to V231.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V42 to V60.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number

suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

The basic bilingual questionnaire as provided by TNS did not include question module Q.A (E-Communications). This part has been extracted from the UK field questionnaire.

Last trend: EB68.2, Q.D12O

v219 - QA19 INTERNET NO ACCESS: OTHER REASONS 11

ASK Q.A19 IF "NO INTERNET ACCESS AT HOME", NO CODE 5 IN D.46

[Q.A19

You said you do not have Internet access at home. Among the following list, which ones best explain why your household does not have access to the Internet?]

Q.A19O

ASK Q.A19O ONLY IF "OTHER" IN Q.A19 – CODE 11 IN Q.A19 – OTHERS GO TO Q.A20

Which other(s)?

(WRITE DOWN – CODE AT THE OFFICE – SEVERAL ANSWERS POSSIBLE)

Q.A19O_11 Other reasons 11

0 Not mentioned

1 Mentioned (country specific)

9 NA

99 Inap. Not any others in Q.A19 (not coded 1 in V207)

in Finland (FI):

country specific code

1 Seeing problems

in Slovenia (SI):

country specific code

1 Just moved into the place

Note:

Respondents answering "Other" to Q.A19 (Code 1 in V207) without any specification in Q.A19O ("Which other(s)?") are coded '9' (NA) in V209 to V231.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V42 to V60.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

The basic bilingual questionnaire as provided by TNS did not include question module Q.A (E-Communications). This part has been extracted from the UK field questionnaire.

Last trend: EB68.2, Q.D12O

- 99 Inap. Not any others in Q.A19 (not coded 1 in V207)

in Czech Republic (CZ):

country specific code

- 1 Cannot afford due to finance

in Estonia (EE):

country specific code

- 1 Do not feel the need / no need

in Slovakia (SK):

country specific code

- 1 Do not have time to use internet

in Bulgaria (BG):

country specific code

- 1 We do not need it

in Romania (RO):

country specific code

- 1 Due to the age

Note:

Respondents answering "Other" to Q.A19 (Code 1 in V207) without any specification in Q.A19O ("Which other(s)?") are coded '9' (NA) in V209 to V231.

Original documentation for Romania is ambiguous. The only available office coded answer category ("Due to the age") has been attributed to the only variable with an item coded as "mentioned". The original documentation does not provide an explicit

attribution.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V42 to V60.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

The basic bilingual questionnaire as provided by TNS did not include question module Q.A (E-Communications). This part has been extracted from the UK field questionnaire.

v225 - QA19 INTERNET NO ACCESS: OTHER REASONS 17

ASK Q.A19 IF "NO INTERNET ACCESS AT HOME", NO CODE 5 IN D.46

[Q.A19

You said you do not have Internet access at home. Among the following list, which ones best explain why your household does not have access to the Internet?]

Q.A19O

ASK Q.A19O ONLY IF "OTHER" IN Q.A19 – CODE 11 IN Q.A19 – OTHERS GO TO Q.A20

Which other(s)?

(WRITE DOWN – CODE AT THE OFFICE – SEVERAL ANSWERS POSSIBLE)

Q.A19O_17 Other reasons 17

- 0 Not mentioned
- 1 Mentioned (country specific)
- 9 NA
- 99 Inap. Not any others in Q.A19 (not coded 1 in V207)

in Estonia (EE):

country specific code

- 1 Do not have a computer

in Slovakia (SK):

country specific code

- 1 Do not have place for computer / internet (small flat, house)

in Bulgaria (BG):

country specific code

- 1 Unsettled fee

Note:

Respondents answering "Other" to Q.A19 (Code 1 in V207) without any specification in Q.A19O ("Which other(s)?") are coded '9' (NA) in V209 to V231.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V42 to V60.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the

exclusion of respondents.

The basic bilingual questionnaire as provided by TNS did not include question module Q.A (E-Communications). This part has been extracted from the UK field questionnaire.

Last trend: EB68.2, Q.D12O

v231 - QA19 INTERNET NO ACCESS: OTHER REASONS 99

Q.A19O

ASK Q.A19O ONLY IF "OTHER" IN Q.A19 – CODE 11 IN Q.A19 – OTHERS GO TO Q.A20

Which other(s)?

(WRITE DOWN – CODE AT THE OFFICE – SEVERAL ANSWERS POSSIBLE)

ASK Q.A19 IF "NO INTERNET ACCESS AT HOME", NO CODE 5 IN D.46

[Q.A19

You said you do not have Internet access at home. Among the following list, which ones best explain why your household does not have access to the Internet?]

Q.A19O_99 Other reasons 99

0 Not mentioned

1 Mentioned (country specific)

9 NA

99 Inap. Not any others in Q.A19 (not coded 1 in V207)

Note:

No cases for this item in the original dataset.

Respondents answering "Other" to Q.A19 (Code 1 in V207) without any specification in Q.A19O ("Which other(s)?") are coded '9' (NA) in V209 to V231.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V42 to V60.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

The basic bilingual questionnaire as provided by TNS did not include question module Q.A (E-Communications). This part has been extracted from the UK field questionnaire.

v232 - QA20 TELECOM PROVIDER INFO IF PERS DATA LOST

Q.A20

ASK ALL

Companies like telecom providers collect personal data such as name, address and credit card details. If any of your personal data was lost, stolen or altered in any way, would you like to be informed about this or not?

(READ OUT – ONE ANSWER ONLY)

- 1 Yes, in all circumstances
- 2 Yes, but only if you risk financial harm
- 3 No
- 4 DK

Note:

The basic bilingual questionnaire as provided by TNS did not include question module Q.A (E-Communications). This part has been extracted from the UK field questionnaire.

v236 - QA23 CONSULT FREQ: ONLINE TELEPHONE DIRECTORIES

Q.A23

How often do you personally consult...?

(SHOW SCREEN – ONE ANSWER PER LINE – READ OUT)

Q.A23_2 Online telephone directories

- 1 More than once a month
- 2 About once a month
- 3 About each 2 or 3 months
- 4 About twice a year
- 5 About once a year
- 6 Less often
- 7 Never
- 8 DK

Note:

The basic bilingual questionnaire as provided by TNS did not include question module Q.A (E-Communications). This part has been extracted from the UK field questionnaire.

Last trend: EB68.2, Q.D13

v238 - QA24 COMMUNICTN PACKAGE HH: TV CHANNELS

Q.A24

By bundle, we mean a combined package offering more than one communication service from the same provider at a single price. Does your household buy two or more of the following services as part of a bundle?

(READ OUT – MIN. 2 ANSWERS)

Q.A24_1 Television channels

0 Not mentioned

1 Mentioned

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V42 to V60.

The basic bilingual questionnaire as provided by TNS did not include question module Q.A (E-Communications). This part has been extracted from the UK field questionnaire.

v289 - QB5AB CAP PRIORITIES: DK (QB5A ONLY)

Q.B5AB

In your opinion, which of the following should be the main priorities of the European Union in terms of agriculture and rural development policy?

(SHOW CARD – READ OUT – ROTATE)

Q.B5AB_8 DK

0 Not mentioned

1 Mentioned

Derivation:

This variable repeats answers to this item in Q.B5B (V281).

Note:

See Q.B5A to Q.B5B for complete question text. Variable repeats answers to category '8' (DK) in Q.B5B (V281), while all other answers to Q.B5A (V273) are summarized with Q.B5B (V274 TO V280) in variables V282 to V288.

Based on: EB68.2, Q.E4A

v346 - D15A OCCUPATION OF RESPONDENT

Now let's talk about another topic.

D.15A

ASK D.15B IF "NOT DOING ANY PAID WORK CURRENTLY", CODES 1 to 4 in D.15A

What is your current occupation?

NON-ACTIVE

- 1 Responsible for ordinary shopping and looking after the home, or without any current occupation, not working
- 2 Student
- 3 Unemployed or temporarily not working
- 4 Retired or unable to work through illness

SELF EMPLOYED

- 5 Farmer
- 6 Fisherman
- 7 Professional (lawyer, medical practitioner, accountant, architect, etc.)
- 8 Owner of a shop, craftsmen, other self-employed person
- 9 Business proprietors, owner (full or partner) of a company

EMPLOYED

- 10 Employed professional (employed doctor, lawyer, accountant, architect)
- 11 General management, director or top management (managing directors, director general, other director)
- 12 Middle management, other management (department head, junior manager, teacher, technician)
- 13 Employed position, working mainly at a desk
- 14 Employed position, not at a desk but travelling (salesmen, driver, etc.)
- 15 Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, etc.)
- 16 Supervisor
- 17 Skilled manual worker
- 18 Other (unskilled) manual worker, servant

v367 - QC4 COMMUTING TO WORK - FREQUENCY

Q.C4

ASK Q.C4 IF YES "COMMUTED\COMMUTE", CODES 3 OR 6 IN Q.C3 (codes 3 OR 6) – OTHERS GO TO Q.C5

How often did/do you commute to work across the border?

(READ OUT – ONE ANSWER ONLY)

- 1 Daily commute across country border to workplace
- 2 Weekly commute
- 3 Monthly commute
- 4 DK
- 9 Inap. Not commuted/commute (not coded 1 in V361 or V364)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v374 - QC6 LIVED/WORKED ABROAD - LAST COUNTRY

Q.C6

ASK Q.C6 AND Q.C7 IF "LIVED/LIVE AND/OR WORKED/WORK ABROAD", CODE 1 TO 6 IN QC3 – OTHERS GO TO Q.C10 (except "retired")

From Q.C6 to Q.C10: we are talking about the most recent living and/or working experience abroad of the respondent

In which country outside (OUR COUNTRY) did you last live and/or work?

(DO NOT READ OUT – PRE-CODED OPENED QUESTION – ONE ANSWER ONLY)

- 1 Australia
- 2 Austria
- 3 Belgium
- 4 Brazil
- 5 Canada
- 6 Denmark
- 7 France
- 8 Germany
- 9 Ireland
- 10 Italy
- 11 Netherlands
- 12 New Zealand
- 13 Norway
- 14 South Africa
- 15 Spain
- 16 Sweden
- 17 Switzerland
- 18 United Kingdom (Great Britain + Northern Ireland)
- 19 United States of America
- 20 Other (SPECIFY)
- 21 DK
- 99 Inap. Not live/work abroad (not coded any 1 in V359 to V364)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

- 41 Slovenia

in Romania (RO):
country specific code

- 1 Israel
- 2 Hungary
- 4 Turkey
- 6 Cyprus

Note:

Respondents answering "Other" to Q.C6 (Code 20 in V374) without any specification in Q.C6O ("Which others?") are coded '0' (NA) in V375. For Spain "other" countries are not specified. All cases originally coded 98 were recoded to 0.

Country specific documentation has subsequently been made available by TNS. Skipped codes are not applied.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

v376 - QC7 LIVED/WORKED ABROAD - DURATION

ASK Q.C6 AND Q.C7 IF "LIVED/LIVE AND/OR WORKED/WORK ABROAD", CODE 1 TO 6 IN Q.C3

Q.C7

How long was the duration of your stay the last time you lived and\ or worked abroad (or how long have you already been here, if you are from abroad)? We are talking here about your last experience of living and/or working abroad, not of a leisure or business trip.

(READ OUT – ONE ANSWER ONLY)

- 1 A few weeks or less
- 2 A few month to less than 1 year
- 3 1 year to less than 2 years
- 4 2 years to less than 5 years
- 5 5 years to less than 10 years
- 6 10 years or more
- 7 DK
- 9 Inap. Not live/work abroad (not coded any 1 in V359 to V364)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v377 - QC8 WORKED ABROAD - TYPE OF WORK

Q.C8

ASK Q.C8 AND Q.C9 IF YES "WORKED/WORK ABROAD", CODES 1, 3, 4, OR 6 IN Q.C3 – OTHERS GO TO Q.C10 (except "retired")

When you worked in a country outside (OUR COUNTRY) in the past (or when you have come from abroad to work here), what general type of work did you do there last (or what type of work do you currently do if you are from abroad)?

(READ OUT – ONE ANSWER ONLY)

- 1 Seasonal work
- 2 Traineeship
- 3 Temporary assignment(s) abroad through your employer
- 4 Permanent work
- 5 Other type of work (e.g. contract work)
- 6 DK
- 9 Inap. Not lived/worked abroad in the past (not coded any 1 in V359, V361, V362, and V364)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

v378 - QC9 WORKED ABROAD - WAY OF FINDING JOB

Q.C9

When you worked in a country outside (OUR COUNTRY) in the past, how did you find that job (or, if you are from abroad, how did you find your current job in (OUR COUNTRY))?

(SHOW CARD – READ OUT – ONE ANSWER ONLY)

- 1 Public employment service
- 2 Private employment service
- 3 Internet
- 4 Newspaper advertisements
- 5 Personal contacts
- 6 Employer for a transfer abroad
- 7 Employer abroad
- 8 Another way (SPONTANEOUS)
- 9 DK
- 99 Inap. Not lived/worked abroad in the past (not coded any 1 in V359, V361, V362, and V364)

Note:

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

v380 - QC11 WORK ABROAD - TIME PERSPECTIVE

DO NOT ASK Q.C10 TO Q.C19 TO THE "RETIRED", CODE 4 IN D.15A

Q.C11

ASK Q.C11 TO Q.C19 ONLY IF "ENVISAGE TO WORK IN A COUNTRY OUTSIDE", CODE 1 IN Q.C10 – OTHERS GO TO Q.C20

How soon are you likely to work there?

(READ OUT – ONE ANSWER ONLY)

- 1 During the next 6 months
- 2 In 6 to 11 months
- 3 In 1 to 2 years
- 4 In 3 to 5 years
- 5 Later
- 6 Don't know yet
- 7 DK
- 9 Inap. Not envisage working abroad (not coded 1 in V379)

Note:

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

0 Not mentioned

1 Mentioned

9 NA

99 Inap. No other type of work (not coded 1 in V406)

Note:

Respondents answering "Other" to Q.C13 (Code 1 in V406) without any specification in Q.C13O ("Which others?") are coded '9' (NA) in V408 to V451.

Specifications have not been made available to the archive.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

v411 - QC13 WORK ABROAD PREF COUNTRY: OTHER 4

DO NOT ASK Q.C10 TO Q.C19 TO THE "RETIRED", CODE 4 IN D.15A

ASK Q.C11 TO Q.C19 ONLY IF "ENVISAGE TO WORK IN A COUNTRY OUTSIDE", CODE 1 IN Q.C10

[Q.C13

In which country(ies) would you prefer to work?]

Q.C13O

ASK Q.C13O ONLY IF "OTHER" IN Q.C13 – CODE 20 IN Q.C13 – OTHERS GO TO Q.C14

Which other?

(WRITE DOWN – CODE AT THE OFFICE – MULTIPLE ANSWERS POSSIBLE)

Q.C13O_4 Other 4

0 Not mentioned

1 Mentioned

9 NA

99 Inap. No other type of work (not coded 1 in V406)

Note:

Respondents answering "Other" to Q.C13 (Code 1 in V406) without any specification in Q.C13O ("Which others?") are coded '9' (NA) in V408 to V451.

Specifications have not been made available to the archive.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

v418 - QC13 WORK ABROAD PREF COUNTRY: OTHER 11

DO NOT ASK Q.C10 TO Q.C19 TO THE "RETIRED", CODE 4 IN D.15A

ASK Q.C11 TO Q.C19 ONLY IF "ENVISAGE TO WORK IN A COUNTRY OUTSIDE", CODE 1 IN Q.C10

[Q.C13

In which country(ies) would you prefer to work?]

Q.C13O

ASK Q.C13O ONLY IF "OTHER" IN Q.C13 – CODE 20 IN Q.C13 – OTHERS GO TO Q.C14

Which other?

(WRITE DOWN – CODE AT THE OFFICE – MULTIPLE ANSWERS POSSIBLE)

Q.C13O_11 Other 11

0 Not mentioned

1 Mentioned

9 NA

99 Inap. No other type of work (not coded 1 in V406)

Note:

Respondents answering "Other" to Q.C13 (Code 1 in V406) without any specification in Q.C13O ("Which others?") are coded '9' (NA) in V408 to V451.

Specifications have not been made available to the archive.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

Q.C13O_18 Other 18

0 Not mentioned

1 Mentioned

9 NA

99 Inap. No other type of work (not coded 1 in V406)

Note:

Respondents answering "Other" to Q.C13 (Code 1 in V406) without any specification in Q.C13O ("Which others?") are coded '9' (NA) in V408 to V451.

Specifications have not been made available to the archive.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

v432 - QC13 WORK ABROAD PREF COUNTRY: OTHER 25

DO NOT ASK Q.C10 TO Q.C19 TO THE "RETIRED", CODE 4 IN D.15A

ASK Q.C11 TO Q.C19 ONLY IF "ENVISAGE TO WORK IN A COUNTRY OUTSIDE", CODE 1 IN Q.C10

[Q.C13

In which country(ies) would you prefer to work?]

Q.C13O

ASK Q.C13O ONLY IF "OTHER" IN Q.C13 – CODE 20 IN Q.C13 – OTHERS GO TO Q.C14

Which other?

(WRITE DOWN – CODE AT THE OFFICE – MULTIPLE ANSWERS POSSIBLE)

Q.C13O_25 Other 25

0 Not mentioned

1 Mentioned

9 NA

99 Inap. No other type of work (not coded 1 in V406)

Note:

Respondents answering "Other" to Q.C13 (Code 1 in V406) without any specification in Q.C13O ("Which others?") are coded '9' (NA) in V408 to V451.

Specifications have not been made available to the archive.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

0 Not mentioned

1 Mentioned

9 NA

99 Inap. No other type of work (not coded 1 in V406)

Note:

Respondents answering "Other" to Q.C13 (Code 1 in V406) without any specification in Q.C13O ("Which others?") are coded '9' (NA) in V408 to V451.

Specifications have not been made available to the archive.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

[Q.C13

In which country(ies) would you prefer to work?]

Q.C13O

ASK Q.C13O ONLY IF "OTHER" IN Q.C13 – CODE 20 IN Q.C13 – OTHERS GO TO Q.C14

Which other?

(WRITE DOWN – CODE AT THE OFFICE – MULTIPLE ANSWERS POSSIBLE)

Q.C13O_39 Other 39

0 Not mentioned

1 Mentioned

9 NA

99 Inap. No other type of work (not coded 1 in V406)

Note:

Respondents answering "Other" to Q.C13 (Code 1 in V406) without any specification in Q.C13O ("Which others?") are coded '9' (NA) in V408 to V451.

Specifications have not been made available to the archive.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

v464 - QC14 WORK ABROAD COUNTRY: OTHER REASON

DO NOT ASK Q.C10 TO Q.C19 TO THE "RETIRED", CODE 4 IN D.15A

ASK Q.C11 TO Q.C19 ONLY IF "ENVISAGE TO WORK IN A COUNTRY OUTSIDE", CODE 1 IN Q.C10

Q.C14

ASK Q.C14 IF SPECIFIC COUNTRY NAMED UNDER Q.C13, CODE 1 TO 20 EN Q.C13

Why would you prefer to work in this (these) particular country(ies)?

(SHOW CARD – READ OUT – MAX. 3 ANSWERS)

Q.C14_13 Other (SPONTANEOUS)

0 Not mentioned

1 Mentioned

9 Inap. No country namend (not coded any 1 in V387 to V406)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

v477 - QC16 MOVE ABROAD PREPARATION - TYPE OF STEPS

Q.C16 TYPE OF STEPS TAKEN TO PREPARE MOVE TO ANOTHER COUNTRY – RECODED

- 1 Only firm steps
- 2 Only general steps
- 3 General and firm steps
- 4 No step taken yet/Other/DK
- 9 Inap. Not envisage working abroad (not coded 1 in V379)

Derivation:

This variable collapses answers to Q.C16 into four categories.

Category '1' ("only firm steps") summarizes the answers for respondents coded '1' ("mentioned") only in variables V469, V471, V472 and/or V473.

Category '2' ("only general steps") summarizes the answers for respondents coded '1' ("mentioned") only in variables V467, V468 and/or V470.

Category '3' (general and firm steps) summarizes the answers for respondents mentioning both kind of steps.

Category '4' (no steps taken yet/other/DK) summarizes answers to variables V474 to V476.

Note:

See Q.C16 (V467-V476) for complete question text.

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

v478 - QC17 MOVE ABROAD - INFO FROM FRIENDS/RELATIVES

DO NOT ASK Q.C10 TO Q.C19 TO THE "RETIRED", CODE 4 IN D.15A

ASK Q.C11 TO Q.C19 ONLY IF "ENVISAGE TO WORK IN A COUNTRY OUTSIDE", CODE 1 IN Q.C10

Q.C17

ASK Q.C17 IF SPECIFIC COUNTRY NAMED UNDER Q.C13, CODE 1 TO 20 IN Q.C13

Do you have any friends or relatives in the country(ies) you would like to work in who could help you or provide you with information?

- 1 Yes
- 2 No
- 3 DK
- 9 Inap. No country named (not coded any 1 in V387 to V405)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

Based on: EB70.1, Q.F9

v497 - QC21 WORK ABROAD - INCOME TO BE OFFERED

Q.C21

Compared to what you earn or could earn here, what income would one need to offer to you in order to take up a job in another country or region?

(SHOW CARD – READ OUT – ONE ANSWER ONLY)

- 1 Could be lower
- 2 About the same
- 3 About 25% higher
- 4 About 50% higher
- 5 About twice as high
- 6 About three times as high
- 7 More than three times as high
- 8 Depends on country (SPONTANEOUS)
- 9 No interest at all (SPONTANEOUS)
- 10 DK

v557 - QC32 EUROP HEALTH INSURANCE CARD (EHIC) - HAVING

In three countries of the European Union (Austria, the Czech Republic and Italy) the card was sent to all insured people (that is, almost every resident); thus there this question is about whether they remember having it or not; in all other countries the card is sent only on request and in most of them only 20-30% of the citizens have it.

Q.C32

The European Health Insurance Card (EHIC) entitles the holder to necessary medical care when travelling in the European Union. Do you currently have this European Health Insurance Card?

- 1 Yes
- 2 No
- 3 DK

v591 - QD1C ANTIBIOTICS REASON (REC)

Q.D1C ANTIBIOTICS REASON – RECODED

- 1 Illness only
- 2 Symptom only
- 3 Illness and Symptom
- 4 Other/DK
- 9 Inap. No antibiotics taken last 12 months (not coded 1 in V575)

Derivation:

This variable groups answers to question Q.D1C.

Category '1' ("illness only ") summarizes the answers for respondents coded '1' ("mentioned") only in variables V577 to V581.

Category '2' ("symptom only") summarizes the answers for respondents coded '1' ("mentioned") only in variables V582 to V588.

Category '3' ("illness and symptom") summarizes the answers for respondents mentioning both. Category '4' ("DK/Other") summarizes answers to variables V589 and V590.

Note:

See Q.D1C (V577-V590) for complete question text.

Generated variable by the Archive.

v598 - QD3B ANTIBIOTICS WARNING INFO - SOURCE

Q.D3B

ASK Q.D3B TO Q.D3D IF "YES", CODE 1 IN Q.D3A – OTHERS GO TO Q.D4

Where did you first get this information about not taking any antibiotics unnecessarily?

(DO NOT READ OUT – DO NOT SHOW CARD – USE THE PRE-CODED LIST – ONE ANSWER ONLY)

- 1 A doctor told me
- 2 A pharmacist told me
- 3 Another health professional (e.g. nurse, physical therapist) told me
- 4 A family member or friend told me
- 5 I saw it on a TV advertisement
- 6 I saw it in a leaflet or on a poster
- 7 I read it in a newspaper or I saw it on the TV news
- 8 I heard it on the radio
- 9 I saw it on the Internet
- 10 Other
- 11 DK
- 99 Inap. Not receive information about antibiotics last 12 months (not coded 1 in V597)

v625 - D7 MARITAL STATUS (REC STATUS)

D.7 MARITAL STATUS – RECODED STATUS

- 1 (Re-)Married (coded 1 to 4 in V624)
- 2 Single living with partner (coded 5 to 8 in V624)
- 3 Single (coded 9 and 10 in V624)
- 4 Divorced or separated (coded 11 and 12 in V624)
- 5 Widow (coded 13 and 14 in V624)
- 6 Other (SPONTANEOUS)
- 7 Refusal (SPONTANEOUS)

Derivation:

This variable collapses answers to D.7 into five categories.

Note:

See D.7 for complete question text.

v626 - D7 MARITAL STATUS (REC CHILDREN)

D.7 MARITAL STATUS – RECODED CHILDREN

- 1 Single household without children (coded 9, 11, and 13 in V624)
- 2 Single household with children (coded 10, 12, and 14 in V624)
- 3 Multiple occupancy household without children (coded 1 and 5 in V624)
- 4 Multiple occupancy household with children (coded 2 to 4 and 6 to 8 in V624)
- 5 Other (SPONTANEOUS)
- 7 Refusal (SPONTANEOUS)

Derivation:

This variable collapses answers to D.7 into four categories.

Note:

See D.7 for complete question text.

v627 - D8 AGE EDUCATION

D.8

How old were you when you stopped full-time education?

(IF "STILL STUDYING", CODE '00' – IF "NO EDUCATION" CODE '01' – IF "REFUSAL" CODE '98' – IF "DK" CODE '99')

- 0 Refusal
- 2 2 years
- 74 74 years
- 97 No full-time education
- 98 Still studying
- 99 DK

Note:

Original code "00" recoded to "98".

Original code "01" recoded to "97".

Original code "98" recoded to "0".

Due to a deviant specification in the coding instruction in the Portuguese field questionnaire data for Portugal have been corrected according to the basic questionnaire.

Code "0" is recoded to "97" for Portugal.

Actual number is coded.

Last trend: EB72.4 D.8

v628 - D8 AGE EDUCATION - RECODED

D.8R AGE WHEN FINISHED FULL-TIME EDUCATION – RECODED

- 1 Up to 14 years
- 2 15 years
- 3 16 years
- 4 17 years
- 5 18 years
- 6 19 years
- 7 20 years
- 8 21 years
- 9 22 years and older
- 10 Still Studying
- 11 No full-time education
- 97 Refusal
- 98 DK

Derivation:

This variable groups answers to question D.8.

Note:

See D.8 for complete question text.

Due to a deviant specification in the coding instruction in the Portuguese field questionnaire data for Portugal have been corrected according to the basic questionnaire.

Code "97" is recoded to "11" for Portugal.

v630 - D11 AGE EXACT

D.11

How old are you?

15 15 years

98 98 years

Note:

Actual number is coded.

Last trend: EB72.4, D.11

v631 - D11 AGE RECODED - FOUR GROUPS

D.11R1 AGE – RECODED IN FOUR GROUPS

- 1 15 - 24 years
- 2 25 - 39 years
- 3 40 - 54 years
- 4 55 years and older

Derivation:

This variable collapses answers to D.11 into four categories.

Note:

See D.11 for complete question text.

v639 - D40C HOUSEHOLD COMPOSITION: AGED 10-14 (REC)

D.40CR HOUSEHOLD COMPOSITION: AGED 10-14 – RECODED

n of people in household

- 0 None
- 1 One
- 2 Two
- 3 Three
- 4 Four or more

Derivation:

This variable groups answers to question D.40C.

Note:

See D.40C (V638) for complete question text.

Last trend: EB72.4, D.40C

v640 - D40 HOUSEHOLD COMPOSITION:SIZE A+B+C

D.40 HOUSEHOLD COMPOSITION: SIZE (A+B+C)

n of people in household

- 1 One
- 2 Two
- 3 Three
- 4 Four
- 5 Five
- 6 Six
- 7 Seven
- 8 Eight
- 9 Nine
- 10 Ten
- 11 Eleven
- 12 Twelve
- 13 Thirteen
- 14 Fourteen
- 15 Fifteen
- 20 Twenty

Derivation:

This variable summarizes V634, V636, and V638.

Note:

See V634, V636 and V638 for complete question text.

Generated by the Archive in accordance with former surveys.

v645 - D62 INTERNET USE FREQ: AT PLACE OF WORK

D.62

Could you tell me if...?

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE – READ OUT)

D.62_2 You use the Internet on your place of work

- 1 Everyday/Almost everyday
- 2 Two or three times a week
- 3 About once a week
- 4 Two or three times a month
- 5 Less often
- 6 Never
- 7 No Internet access (SPONTANEOUS)

Note:

Last trend: EB72.4, D.62

v649 - P3 DURATION OF INTERVIEW

P.3 NUMBER OF MINUTES THE INTERVIEW LASTED

14 14 minutes

193 193 minutes

Note:

Actual number is coded.

Last trend: EB72.4, P.3

v649 by v7, Absolute Values (Row Percent)

v650 - P3 DURATION OF INTERVIEW - RECODED

P.3R NUMBER OF MINUTES THE INTERVIEW LASTED – RECODED

- 1 Up to 14 minutes
- 2 15 - 29 minutes
- 3 30 - 44 minutes
- 4 45 - 59 minutes
- 5 60 - 74 minutes
- 6 75 - 89 minutes
- 7 90 minutes and more

Derivation:

This variable collapses codes in P.3 into seven categories.

Note:

Last trend: EB72.4, P.3

v689 - P7 REGION I - PORTUGAL

P.7_PT REGION I

Portugal (EUROSTAT NUTS II LEVEL) – Comissoes de Coordinacao Regional, Regioes Autonomas

- 1 North
- 2 Centre
- 3 Lisboa
- 4 Alentejo
- 5 Algarve
- 99 Inap. Not PT (not coded 13 in V6)

Note:

Since 2002 the region “Lisboa e vale do tejo” is split up and the subregion “Lezíria do Tejo” reinstated to the “Alentejo” Region and the “Médio Tejo” and “Oeste” reinstated to the “Centro” Region. The relative frequencies for each region indicate that this is reflected in the Eurobarometer P.7 regions starting with Eurobarometer 62.0. The original label for category ‘3’ (“Lisboa e vale do Tejo”) has been edited accordingly. According to the NUTS 2 specifications for Portugal this now only includes “Grande Lisboa” and “Península de Setúbal”.

Starting with Eurobarometer 62.0 no data are provided for Azores (PT20 Região Autónoma dos Açores) and Madeira (PT30 Região Autónoma da Madeira).
