# Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

## Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (http://zacat.gesis.org), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

## Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

## Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

# 1 Study Description – Eurobarometer 73.5

## 1.1 Bibliographic information

### 1.1.1 Archive study numbers

GESIS:  ZA5235
ICPSR:  34084

Under a co-operative arrangement for the archival processing and distribution of Standard & Special Eurobarometer, ICPSR and GESIS employ its own study number to identify each – otherwise congruent – dataset.

### 1.1.2 Title and archive subtitle

Eurobarometer 73.5
Civil Justice, Development Aid, Africa and the European Union, and Food Risk
June 2010

### 1.1.3 Principal investigator

Antonis Papacostas (Head of Eurobarometer Unit)

Directorate-General Communication

### 1.1.4 Bibliographic citation

Publications based on data collections which are made available through ICPSR or GESIS, should acknowledge those sources by means of bibliographic citations. To ensure that such source attributions are captured for social science bibliographic utilities, citations must appear in footnotes or in the reference section of publications. The bibliographic citation for this data collection is:

European Commission, Brussels: Eurobarometer 73.5, June 2010.
TNS OPINION & SOCIAL, Brussels [Producer];
GESIS, Cologne [Publisher]: ZA5235, dataset version 4.0.0, doi: 10.4232/1.11432.

## 1.2 Content

### 1.2.1 Abstract

This round of Eurobarometer surveys queried respondents on standard Eurobarometer measures, such as how satisfied they were with their present life and what their expectations were for the next 12 months. Additional questions focused on how respondents would judge the current economic, employment, or cultural situation in their household and country as compared to five years ago, which issues they thought the European Union (EU) should address and invest in as a priority, and whether they have heard of the European Social Fund. Further questions centered on four major areas: (1) civil justice, (2) development aid, (3) Africa and the European Union, and (4) food risk. For the first major area, civil justice, the survey asked respondents if they were ever involved in a civil or commercial legal proceeding and for details about their last experience, how easy or difficult it was to access civil justice in another EU member state, and whether additional measures should be taken to help citizens access civil justice in an EU member state other than their own. Respondents also identified their main worry in starting legal proceedings, the main difficulty in enforcing a favorable decision from a court in another EU member state, and how important it was for the EU to take additional measures to simplify procedures to enforce court decisions in other EU member states. In addition, the survey queried respondents about their knowledge of and opinion on a number of cross-border and family law issues. For the second major area, development aid, respondents ascertained the two biggest challenges currently facing developing countries, how important it is to help people in developing countries, how they help individuals in developing countries, and which actors are in the best position to help developing countries. They also determined whether the EU should increase or decrease aid to developing countries given the current economic situation, if there is added value in the EU member states working together to help developing countries, and the EU policies that have a positive impact on developing countries. For the third major area, Africa and the European Union, respondents were asked whether Africa would become a more important or less important partner for the EU by 2020, and to identify the two most important areas of cooperation between the EU and Africa, the two most important problems for African countries to tackle together, and the most positive image of Africa. For the fourth major area, food risk, the survey asked respondents to what extent they associate food and eating with a series of statements, how likely they would personally encounter certain risks, what comes to mind when thinking about possible problems or risks associated with food and eating, and to what extent they are worried about certain food-related risks. Respondents also indicated how much confidence they would have in certain sources to give them accurate information about food risks, whether they agreed with certain statements pertaining to food-related risks, how confident they were that they could avoid certain health risks, and whether they thought public authorities in the EU were doing enough to protect them from these possible health risks. Finally, respondents provided the last time they heard from the media that food may be unsafe and how they reacted to this information. Demographic and other background information includes age, gender, nationality, marital status and parental relations, occupation, age when stopped full-time education, household composition, ownership of a fixed or mobile telephone and other durable goods, difficulties in paying bills, level in society, Internet use, type and size of locality, region of residence, and language of interview.

### 1.2.2 Topic classification

- International Institutions, Relations
- Legal system, Legislation, Law
- Patterns of Consumption
- Medicine

- Economic Policy, National Economic Situation

## 1.3 Universe

In all, Eurobarometer 73.5 interviewed 26.691 citizens in the 27 countries of the European Union after the 2004/2007 enlargement. All respondents were residents in the respective country, nationals and non-nationals but EU-citizens, and aged 15 and over. They were supposed to have sufficient command of one of the respective national language(s) to answer the questionnaire. Separate samples were drawn for Northern Ireland and East Germany.

## 1.4 Sampling procedure

A multi-stage, random (probability) sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regionals units in every country (Statistical Office of the European Community, EUROSTAT NUTS 2 or equivalent). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the

next stage, a cluster of starting addresses was selected from each sampled PSU, at random. Further addresses were chosen systematically using standard random route procedures as every Nth address from th initial address. In each household, a respondent was drawn, at random, following the closest birthday rule. No more than one interview was conducted in each household.

The regular sample size (in the sense of completed interviews) is 1000 respondents per country, except the United Kingdom with separate samples for Great Britain (1000) and Northern Ireland (300), Germany with separate samples for the Eastern (500) and the Western part (1000), and Luxembourg, Cyprus (Republic), and Malta with 500 interviews each. The effective number of realized interviews in this round is indicated in table 1.

## 1.5 Fieldwork

From June 9 to 30, 2010, the TNS Opinion & Social, a consortium created between TNS plc and TNS opinion, carried out the fieldwork for this Eurobarometer, at the request of the European Commission, Directorate General Press and Communication, Opinion Polls. TNS Opinion & Social is based at Avenue Herrmann Debroux, 40, 1160 Brussels, Belgium. TNS Opinion & Social coordinates the fieldwork carried out through its network of national institutes:

## 1.6 Mode of data collection

In all countries, fieldwork was conducted on the basis of detailed and uniform instructions prepared by TNS Opinion Social. Interviews were conducted face-to-face in people's home in the appropriate national language. As far as the data capture is concerned, CAPI (Computer Assisted Personal Interview) was used in those countries where this technique was available.

Equivalent French and English basic questionnaires were developed for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country. Backtranslation procedures were applied for controlling semantic equivalence.

## 1.7 Weighting

In general the Standard and Special  Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factor corrects for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country as well as each lower level sample (Great Britain and Northern Ireland, East and West Germany) are represented in proportion to its population size within different groupings, or according to the historical states of European unification (e.g. founder members, new members, Euro zone) in the case of the EUROPEAN WEIGHTS, or for the United Kingdom (WEIGHT SPECIAL UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31) and for Germany as a whole  (WEIGHT SPECIAL GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTs adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general all samples which do not belong to the respective group of samples under consideration are excluded from calculation.

The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 4) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

**Eurobarometer 73.5** provides three (post-stratification) NATION WEIGHTS: W1 (WEIGHT RESULT FROM TARGET) for separate analysis or comparison of individual samples (countries or regions on sub-national level), W4 (WEIGHT SPECIAL UNITED KINGDOM) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole, and W3 (WEIGHT SPECIAL GERMANY), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. W3 and W4 exclude all other countries from calculation, but include the post-stratification factors for the United Kingdom and Germany respectively.

The EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries, of accession or candidate countries, and of Euro zone countries, representing different historical states of European integration (e.g. EU6 = six founder members) . All post-stratification factors are included.

Table 2: Overview of population size weights

| European Weights in Eurobarometer 73.5 | Function |
|---|---|
| W5 to W9, W11, W14, W22 | grouping EU member countries |
| W10, W13, W24 | grouping new EU member countries |
| W18 | grouping EU candidate/accession countries |
| - | grouping EU member + candidate/accession countries |
| W81, W82 | grouping (non-)Eurozone countries |

For more detailed information on the individual weights please see the corresponding variable description.

## 1.8 Data preparation

The data received by GESIS from TNS Opinion & Social were checked for completeness, missing and duplicate records, for illegal (wild) codes and for (formal) consistency of response patterns and question routing. Errors discovered by these procedures are documented or corrected, as a general rule after consulting related additional documentation (e.g. tabular reports) or the data provider. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable DDI-XML compliant documentation was created for this dataset by GESIS.

GESIS added ´Inappropriate´ (INAP) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the original questionnaire was adhered to for (almost) every respondent. An additional INAP category was defined whenever a question or group of questions were not surveyed in one or more countries, or if variables refer to country specific items (e.g. regions).

Users should note that answers to multiple-response questions are (originally) represented by a series of binary ´dummy´ variables (i.e. variables which take on values of one and zero only), creating separate ´dummy´ variables also to explicitly represent ´Don´t know´, ´No answer/refusal´ or other residual responses, such as ´None of the

above´. The archive has recoded these residual responses in the case of uncommon minor inconsistencies with respect to and in favour of the series of substantial answers.

GESIS has recoded the missing answers (NA) represented in the original data set by blanks (system missing) to standard values. Their practically complete absence suggests that eventual cases of any not explicitly coded item non-response, might be collapsed with the DK (don´t know) category.

Question text and contingency text appearing in the variable description is taken from English language version of the basic (bilingual) questionnaire (master questionnaire). Coding schemes and other documentation are based on the English language version of the basic questionnaire or on the respective SPSS data definition statements as provided by TNS Opinion & Social. In case of any discrepancy between questionnaires, SPSS definitions and data regarding the coding scheme of a variable, the archive, as a general rule, carried out any correction in agreement with the data provider.

If the documentation for country-specific questions or answer categories is provided in another languages than English, the archive documents the original language wording and supplies the English translation in brackets.

No data are made available for question QC22. The question wording is considered to be too complicated.

Further specific information on data preparation, harmonization or regarding inconsistencies is noted on variable level.

# 2 Eurobarometer Series Description

## 2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

## 2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

## 2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

## 2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

## Table 3: EU enlargement and countries covered by Standard and Special Eurobarometer

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 4: Oversamples for special topic Eurobarometer

| Topic | (Over-)Sample | Eurobarometer Survey |
|---|---|---|
| Young Europeans | Youth aged 15-24 | 17, 28.1, 34.2, 47.2OVR, 55.1OVR |
| Elderly Europeans | Elderly aged 60+ | 37.2 |
| Consumer Behaviour | Responsible for shopping | 41.0 |
| Unemployment | Unemployed | 44.3OVR |
| Working Conditions | Professionally active | 37.0+1, 39.0+1 |
| Drug Abuse | Youth aged 15-24 | 43.0+1, 57.2OVR |
| Education Issues | Youth aged 15-24 | 44.0 / 44.1 (data not integrated) |

## 2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 5) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus  on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 5: Overview of Eurobarometer surveys with standard EU and trend question modules

| Standard and trend surveys | Fieldwork Dates | GESIS ID | Standard Report | Special topic | Subset |

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: http://www.gesis.org/eurobarometer

# 3 Dataset structure and standards

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

## 3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

## 3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

### 3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

## Table 6: ZEUS Party Family Code (slightly modified)

| Category | | Party Family |
|---|---|---|
| | | |
| 0 | (001-099) | not affiliated / electoral alliances across "families" |
| 1 | (100-199) | Communists |
| 2 | (200-299) | Socialists |
| 3 | (300-399) | Liberals |
| 4 | (400-499) | Christian Democrats |
| 5 | (500-599) | Conservatives |
| 6 | (600-699) | Extreme Rights / Nationalists |
| 7 | (700-799) | Regionalists / Ethnic |
| 8 | (800-899) | Environmental parties |
| 9 | (900-949) | Agricultural parties |
| 9 | (950-989) | other special issue parties (e.g. Eurosceptics) and independents |
| | | |
| | 990 | other (spontaneous) |
| | 994 | not voting age |
| | 995 | empty ballot (blank) or invalid vote |
| | 996 | not voted / would not vote |
| | 997 | Refused |
| | 998 | DK / DK+NA if NA not coded separately |
| | 999 | INAP (inappropriate) |

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

### 3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

## 3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

# 4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION - ALL SAMPLES ISO 3166).

| | | | |
|---|---|---|---|
| AT | Austria | HR | Croatia |
| BE | Belgium | HU | Hungary |
| BG | Bulgaria | IE | Ireland |
| CY | Cyprus | IT | Italy |
| CY-TCC | Turkish Cypriote Community | LT | Lithuania |
| CZ | Czech Republic | LU | Luxembourg |
| DE | Germany (-1989) | LV | Latvia |
| DE-W | Germany West (1990 ff.) | MK | Macedonia (FYROM) |
| DE-E | Germany East (1990 ff.) | MT | Malta |
| EE | Estonia | NL | The Netherlands |
| ES | Spain | PL | Poland |
| FI | Finland | PT | Portugal |
| FR | France | RO | Romania |
| GB | United Kingdom | SE | Sweden |
| GB-GBN | Great Britain | SI | Slovenia |
| GB-NIR | Northern Ireland | SK | Slovakia |
| GR | Greece | TR | Turkey |

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded "real" values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission's official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

Header with DIGITAL OBJECT IDENTIFIER (DOI) linked to the Study Description in the GESIS Data Catalogue.

VARIABLE NAME (serial number assigned by the archive) and VARIABLE LABEL as defined in the dataset.

QUESTION NUMBER and full QUESTION TEXT from the basic questionnaire, including interviewer instructions. The numbers or letters that may appear together with the original question number, reflect the item order (multiple item or multiple response questions) or indicate if a question was recoded (R) or summarized (T), or if asked only in a single country (country abbreviation).

CODE VALUES occurring in the data for this variable and complete ANSWER TEXT from the basic questionnaire. Code values may differ from the questionnaire specification due to standardization. Abbreviations commonly used in the code definitions are DK (don't know), NA (not ascertained) and INAP (inappropriate).

DERIVATION information refers to the construction principle of indices or other derived variables (not in the example). NOTE delineates additional explanatory text subsuming trend information (last appearance of the question) or archive remarks on data processing and other issues relevant for the understanding or application of the variable.

CROSS-TABULATION: The absolute frequencies of the occurrence of values (*absolute values*) refer to the number of cases in the weighted dataset as indicated, in this case *weighted by V8*. The relative frequencies (*row percent*) refer to the valid cases (*n valid sum*), i.e. the total number of cases (*n sum*) reduced by the number of cases defined as missing data (*M*). For display and place saving reasons excluded countries or areas may be completely dropped from the table.

FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (*M*), i.e. *percent* on the basis of all cases (*sum*) and *valid percent* on the basis of the *valid cases*.

# 5 Variable Documentation

| Variable, Label |
| --- |
| Question Text (English Language) |

### v1 - STUDY NUMBER - DISTRIBUTOR

ARCHIVE STUDY NUMBER - DISTRIBUTOR

Study Number of the distributing data archive.

v1

| Value | Label | Missing | Count | Percent | Valid Percent |
| --- | --- | --- | --- | --- | --- |
| 5235 | | | 26691 | 100.0 | 100.0 |
| | Sum | | 26691 | 100.0 | 100.0 |
| | Valid Cases | | 26691 | | |

v2 - STUDY NUMBER - PUBLISHER

ARCHIVE STUDY NUMBER - PUBLISHER

Study number of the data archive which is publishing this data set version.

v2

| Value | Label | Missing | Count | Percent | Valid Percent |
|-------|-------|---------|-------|---------|---------------|
| 5235 | | | 26691 | 100.0 | 100.0 |
| | Sum | | 26691 | 100.0 | 100.0 |
| | Valid Cases | | 26691 | | |

## v3 - GESIS ARCHIVE VERSION

VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

v3

| Value | Label | Missing | Count | Percent | Valid Percent |
|---|---|---|---|---|---|
| 4.0.0 (2012-08-31) | | | 26691 | 100.0 | 100.0 |
| | Sum | | 26691 | 100.0 | 100.0 |
| | Valid Cases | | 26691 | | |

## v4 - EUROBAROMETER NUMBER

EUROBAROMETER SURVEY NUMBER

The number identifying the Eurobarometer survey.

735   Eurobarometer 73.5

v4

| Value | Label | Missing | Count | Percent | Valid Percent |
|-------|-------|---------|-------|---------|---------------|
| 735 | Eurobarometer 73.5 | | 26691 | 100.0 | 100.0 |
| | Sum | | 26691 | 100.0 | 100.0 |
| | Valid Cases | | 26691 | | |

v5 - UNIQUE CASE ID (TNS COUNTRY ID + INTERVIEW ID)

UNIQUE CASE ID (TNS COUNTRY ID + TNS INTERVIEW ID)

This unique respondent identification is composed of the original TNS country code and the original TNS interview number. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 04: Greece; 05: Spain; 06: Finland; 07: France; 08: Ireland; 09: Italy; 10: Luxembourg; 11: Netherlands; 12: Austria; 13: Portugal; 14: Sweden; 20: Germany West; 21: Germany East; 22: Great Britain; 23: Northern Ireland; 31: Bulgaria; 32:Cyprus (Republic); 33: Czech Republic; 34: Estonia; 35: Hungary; 36: Latvia; 37: Lithuania; 38: Malta; 39: Poland; 40: Romania; 41: Slovakia; 42: Slovenia). The remaining digits contain the country-specific questionnaire numbers.

Note:

Actual number is coded.

## v6 - NATION - ALL SAMPLES

NATION - ALL SAMPLES

All samples including separate samples for East and West Germany and for Great Britain and Northern Ireland.

1   France

2   Belgium

3   The Netherlands

4   Germany West

5   Italy

6   Luxembourg

7   Denmark

8   Ireland

9   Great Britain

10   Northern Ireland

11   Greece

12   Spain

13   Portugal

14   Germany East

16   Finland

17   Sweden

18   Austria

19   Cyprus (Republic)

20   Czech Republic

21   Estonia

22   Hungary

23   Latvia

24   Lithuania

25   Malta

26   Poland

27   Slovakia

28   Slovenia

29   Bulgaria

30   Romania

Note:

Use of weighting factor W1 (V8) is optional.

v6

v7 - NATION - ALL SAMPLES ISO 3166

NATION – ALL SAMPLES ISO 3166

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

Note:

Use of weighting factor W1 (V8) is optional.

v8 - W1 WEIGHT RESULT FROM TARGET

W1 WEIGHT RESULT FROM TARGET

This POST-STRATIFICATION WEIGHT is based on a comparison for each sample with the respective universe description. As such in all countries, gender, age, region and size of locality are introduced in the iteration procedure carried out by the fieldwork institutes.

British and Northern Irish as well as East and West German samples are weighted separately. The weight reproduces the real number of cases for each country. In terms of its general function it corresponds to former NATION WEIGHT II (until EUROBAROMETER 31).

v9 - NATION - UNITED KINGDOM

NATION - UNITED KINGDOM

Great Britain and Northern Ireland are coded together.

0   Other

1   United Kingdom

Note:

Use of weighting factor W4 (V10) is mandatory.

## v10 - W4 WEIGHT UNITED KINGDOM

W4 WEIGHT UNITED KINGDOM

This POPULATION SIZE WEIGHT adjusts the British and the Northern Irish (sub-national) samples to their share in the total population aged 15 and over in the United Kingdom. It must be applied whenever the United Kingdom is to be analyzed as a whole. The post-stratification weighting factors are included for both samples. All other samples are excluded from analysis. In terms of its general function the weight corresponds to former NATION WEIGHT I (until EUROBAROMETER 31).

v11 - NATION - UNITED GERMANY

NATION - UNITED GERMANY

East and West Germany are coded together.

0   Other

1   Germany

Note:

Use of weighting factor W3 (V12) is mandatory.

v12 - W3 WEIGHT GERMANY

W3 WEIGHT GERMANY

This POPULATION SIZE WEIGHT adjusts the East and the West German (sub-national) samples to their share in the total population aged 15 and over, of the united Germany. It must be applied whenever Germany is to be analyzed as a whole. The post-stratification weighting factors are included for both samples. All other samples are excluded from analysis.

v13 - NATION GROUP EU6

NATION GROUP EU6

NATION GROUP EU6 only refers to the six EC founder-members (France, Belgium, the Netherlands, West Germany, Italy and Luxembourg).

0   Other
1   EU6

Note:

Use of weighting factor W5 (V14) is mandatory.

v14 - W5 WEIGHT EU6

W5 WEIGHT EU6

This POPULATION SIZE WEIGHT refers to the six EC founder members: France, Belgium, Netherlands, West Germany, Italy, and Luxembourg. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EU6 must be applied whenever these six EC founder countries are to be analyzed altogether as a group.

v15 - NATION GROUP EU9

NATION GROUP EU9

NATION GROUP EU9 adds Denmark, Ireland, Great Britain and Northern Ireland to the EU6 countries.

0   Other

1   EU9

Note:

Use of weighting factor W6 (V16) is mandatory.

v16 - W6 WEIGHT EU9

W6 WEIGHT EU9

This POPULATION SIZE WEIGHT adds Denmark, Ireland, Great Britain and Northern Ireland to the EU6 countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EU9 must be applied whenever these nine countries as of the 1973 enlargement are to be analyzed altogether as a group.

v17 - NATION GROUP EU10

NATION GROUP EU10

NATION GROUP EU10 adds Greece to the EU9 countries (new member as of January 1981).

0   Other

1   EU10

Note:

Use of weighting factor W7 (V18) is mandatory.

v30 - W14 WEIGHT EU25

W14 WEIGHT EU25

This POPULATION SIZE WEIGHT adds Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia and Slovenia to the EU15 countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) group of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EU25 must be applied whenever these 25 countries as of the 2004 enlargement are to be analyzed altogether as a group.

v31 - NATION GROUP AC (BG RO)

NATION GROUP AC (BG RO)

NATION GROUP AC refers to Bulgaria and Romania.

0  Other

1  AC (BG RO)

Note:

Use of weighting factor W18 (V32) is mandatory.

v32 - W18 WEIGHT AC (BG RO)

W18 WEIGHT AC (BG RO)

This POPULATION SIZE WEIGHT refers to Bulgaria and Romania. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of future EU accession countries. The post-stratification weighting factors are included. All other countries are excluded from calculation. WEIGHT AC must be applied whenever these two countries are to be analyzed altogether as a group.

v33 - NATION GROUP EU27

NATION GROUP EU27

NATION GROUP EU27 includes all 25 member countries after the 2004 enlargement, plus the Accession Countries Bulgaria and Romania.

0   Other

1   EU27

Note:

Use of weighting factor W22 (V34) is mandatory.

v34 - W22 WEIGHT EU27

W22 WEIGHT EU27

WEIGHT EU27 includes all 25 member countries after the 2004 enlargement, plus the Accession Countries Bulgaria and Romania.

This POPULATION SIZE WEIGHT adjusts each national sample in proportion to its share in the total population aged 15 and over, of the European Union plus Bulgaria and Romania. It should be used whenever all 27 countries participating in this wave are to be analysed as a group. The post-stratification weighting factors for all samples/countries are included.

v35 - NATION GROUP EU NMS 12

NATION GROUP EU NMS 12

NATION GROUP EU NMS 12 refers to the group of the 12 new members after the enlargement of January 2007 (accession of Bulgaria and Romania).

0   Other

1   EU NMS 12

Note:

Use of weighting factor W24 (V36) is mandatory.

v36 - W24 WEIGHT EU NMS 12

W24 WEIGHT EU NMS 12

This POPULATION SIZE WEIGHT refers to the group of the 12 new member countries as of the enlargement in January 2007: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia, Bulgaria and Romania. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EU NMS 12 must be applied whenever these 12 countries are to be analyzed altogether as a group.

v37 - NATION GROUP EURO ZONE 2009

NATION GROUP EURO ZONE 2009

NATION GROUP EURO ZONE 2009 separates the group of 12 countries which introduced the EURO as of January 1, 2002 (Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland) plus Slovenia which introduced the EURO as of January 1, 2007, plus Cyprus and Malta, which introduced the EURO as of January 1, 2008, plus Slovakia, which introduced the EURO as of January 1, 2009.

0   Other

v38 - W81 WEIGHT EURO ZONE 2009

W81 WEIGHT EURO ZONE 2009

This POPULATION SIZE WEIGHT separates the group of 12 countries which introduced the EURO as of January 1, 2002 (Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland) plus Slovenia which introduced the EURO as of January 1, 2007, plus Cyprus and Malta, which introduced the EURO as of January 1, 2008, plus Slovakia, which introduced the EURO as of January 1, 2009. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EURO ZONE 2009 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

v39 - NATION GROUP NON EURO ZONE 2009

NATION GROUP NON EURO ZONE 2009

NATION GROUP NON EURO ZONE 2009 refers to the group of countries which did not introduce the EURO up to January 1, 2009

(Denmark, United Kingdom, Sweden, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Bulgaria, Romania).

0   Other

1   NON EURO ZONE 2009

Note:

Use of weighting factor W82 (V40) is mandatory.

v149 - QC6A CIV JUSTICE ACCESS - CONCERN IN EU (1ST)

Q.C6A

ASK ALL

Imagine the following situation: You rent a house for two weeks' holiday in another European Union Member State and pay in advance one week. When you arrive at your holiday destination, you realise that the house does not meet minimum expected standards and you decide not to stay. The owner is not willing to pay you back your money. What would be your main worry about starting legal proceedings in that Member State? Firstly?

(SHOW CARD – ONE ANSWER PER COLUMN - READ OUT)

1   Not knowing which legal rules would apply

2   Not knowing the legal procedures in that Member State

3   The cost of legal action in that Member State

4   Lack of trust in the legal procedures of that Member State

5   Likely length of legal proceedings in that Member State

6   Language barriers

7   Distance between (OUR COUNTRY) and that Member State

8   Other (SPONTANEOUS)

9   None (SPONTANEOUS)

10  DK

v151 - QC6AB CIV JUSTICE ACCESS CONCERN: RULES

Q.C6AB Main worries about starting legal proceedings in another EU Member State in total

Q.C6AB_1 Not knowing which legal rules would apply

0   Not mentioned

1   Mentioned

Derivation:

This variable summarizes answers to this item in Q.C6A and Q.C6B (V149 and V150).

Note:

See Q.C6A and Q.C6B for complete question text. Variables summarize answers to Q.C6A and Q.C6B (V149 and V150), except for category '10' (DK) (V160).

v160 - QC6AB CIV JUSTICE ACCESS CONCERN: DK (QC6A ONLY)

Q.C6AB Main worries about starting legal proceedings in another EU Member State in total

Q.C6AB_10 DK( Q.C6A only)

0   Not mentioned

1   Mentioned

Derivation:

This variable repeats answers to this item in Q.C6A (V149).

Note:

See Q.C6A and Q.C6B for complete question text. Variable repeats answers to category '10' (DK) in Q.C6A (V149), while all other

answers to Q.C6A are summarized with Q.C6B (V150) in variables V151 to V159.

v170 - QC7AB LEGAL DECISION ENFORCEMENT CONCERN: DK (QC7A ONLY)

Q.C7AB Main difficulties in enforcing court decision in another EU Member State in total

Q.C7AB_8 DK( Q.C7A only)

0   Not mentioned

1   Mentioned

Derivation:

This variable repeats answers to this item in Q.C7A (V161).

Note:

See Q.C7A and Q.C7B for complete question text. Variable repeats answers to category '8' (DK) in Q.C7A (V161), while all other

answers to Q.C7A are summarized with Q.C7B (V162) in variables V163 to V169.

v171 - QC8 LEGAL DECISION ENFORCEMENT - PROCEDURE

Q.C8

Currently, for a decision from a court in (OUR COUNTRY) to be enforced in another European Union Member State, you have to request a court in this other Member State to issue a special declaration of enforcement (exequatur). Knowing that, would you be discouraged or not from starting legal proceedings against a person or a company from another European Union Member State? (READ OUT – ONE ANSWER ONLY)

1  Yes, definitely discouraged

2  Yes, probably discouraged

3  No, probably not discouraged

4  No, definitely not discouraged

5  DK

v207 - QC16 CROSS-BORDER FAMILY LAW - DIVORCE RULES

Q.C16

ASK ALL

Within the European Union, married couples increasingly involve people from different countries, and more and more couples from one country settle down in another. Do you think the European Union should take initiatives in any of the following cross-border family law areas?

(ONE ANSWER PER LINE - READ OUT)

Q.C16_1 To determine which EU Member State's rules should apply in case of an international divorce (divorce between people of different EU Member States, or divorce between people of the same nationality living in another EU Member State)

1  Yes, the EU should take initiatives

2  No, the EU should not take initiatives

3  DK

v208 - QC16 CROSS-BORDER FAMILY LAW - MARRIAGE FINANCES

Q.C16

ASK ALL

Within the European Union, married couples increasingly involve people from different countries, and more and more couples from one country settle down in another. Do you think the European Union should take initiatives in any of the following cross-border family law areas?

(ONE ANSWER PER LINE - READ OUT)

Q.C16_2 To determine which EU Member State's legal rules should govern the financial matters resulting from marriage between people of different EU Member States

1  Yes, the EU should take initiatives

2  No, the EU should not take initiatives

3  DK

Q.C19

ASK Q.C19 IF "HAS BEEN ASKED TO PRODUCE A DOCUMENT/ CERTIFICATE", CODE 2 TO 5 IN Q.C18 – OTHERS GO TO

Q.C20

Were any of the following formalities required when you were asked to show the document?

(READ OUT – MULTIPLE ANSWERS POSSIBLE)

Q.C19_1 No, none

0   Not mentioned

1   Mentioned

9   Inap. Never had to show documents/certificates or DK in Q.C19 (not coded 1 in V212 to V215)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which

represent each of the original categories and which are identified by the respective original category code as question number suffix.

As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to

the respective dummy variable if selected (code 1).

v219 - QC19 FAMILY DOC FORMALITY IN EU: LEGALISATION

Q.C19

ASK Q.C19 IF "HAS BEEN ASKED TO PRODUCE A DOCUMENT/ CERTIFICATE", CODE 2 TO 5 IN Q.C18 – OTHERS GO TO

Q.C20

Were any of the following formalities required when you were asked to show the document?

(READ OUT – MULTIPLE ANSWERS POSSIBLE)

Q.C19_3 Yes, legalisation

0   Not mentioned

1   Mentioned

9   Inap. Never had to show documents/certificates or DK in Q.C19 (not coded 1 in V212 to V215)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which

represent each of the original categories and which are identified by the respective original category code as question number suffix.

As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to

the respective dummy variable if selected (code 1).

v224 - QC20 CIV STATUS CERTIF RECOG - ADD MEASURES

Q.C20

ASK ALL

In your opinion, should additional measures be taken regarding the recognition of civil status certificates (e.g.: certificates of birth, marriage, death, etc.) between the European Union Member States?

(SHOW CARD – READ OUT – ONE ANSWER ONLY)

1   Yes, preferably at an EU level through common rules

2   Yes, preferably at a national level through bilateral agreements between the EU Member States

3   No, there is no need for additional measures

4   DK

v245 - QD5 DEVELOPMENT AID - EU AND THE ECONOMIC CRISIS

Q.D5

The European Union has promised to increase the level of its aid towards developing countries. Given the current economic situation, which of the following propositions best describe your opinion?

(READ OUT – ONE ANSWER ONLY)

1   We should increase European aid to developing countries beyond what is already promised

2   We should keep our promise to increase aid to developing countries

3   We should not increase the levels of aid to developing countries even though it has been promised

4   We should reduce aid to developing countries as we can no longer afford it

5   DK

v298 - QF2 RISK LIKELIHOOD: SERIOUS ILLNESS

Q.F2

I will read out a list of potential risks. For each of them please tell me how likely you think they are to happen to you personally.

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE - READ OUT – ROTATE)

Q.F2_6 Getting a serious illness

1  Very likely

2  Fairly likely

3  Not very likely

4  Not at all likely

5  DK

v320 - QF3 FOOD RISKS: NEW TECHNOLOGIES

Q.F3

Could you tell me in your own words, what are all the things that come to your mind when thinking about possible problems or risks

associated with food and eating? Just say out loud whatever comes to mind and I will write it down. Anything else?

(OPEN QUESTION – ENTER ALL SPONTANEOUS ANSWERS – MULTIPLE ANSWERS POSSIBLE)

Q.F3_22 New technologies (e.g. animal cloning, nanotechnology, irradiation)

0   Not mentioned

1   Mentioned

Note:

Please notice that 42 respondents mention one or more possible problems or risks associated with food and eating (V299 to V320,

V322) and at the same time are coded 1 ("Mentioned") in V321 ("QF3 FOOD RISKS: NO PROBLEM").

Item descriptions are specified according to official report.

### v341 - QF4 FOOD WORRIES - TOTAL SCALE

Q.F4 Number of items associated with food and eating respondents are worried about (codes 1 and 2) - SUMMARIZED

1   0 to 5 items

2   6 to 11 items

3   12 items and more

Derivation:

This variable collapses answers coded 1 or 2 ("Very worried" or "Fairly worried") in question Q.F4 (V324 to V340) into three categories.

Note:

See Q.F4 for complete question text.

v376 - QF8 PUBLIC RISK PROTECTION: ANIMAL DISEASES

Q.F8

Now we would like to know if you think that public authorities in the European Union are doing enough to protect you from these possible risks.

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE - READ OUT – ROTATE)

Q.F8_5 Possible risks from animal infections or diseases which could be transmitted to humans such as mad cow disease (BSE)

1  Yes, definitely

2  Yes, probably

3  No, probably not

4  No, certainly not

5  DK

v382 - D7 MARITAL STATUS (REC)

D.7 Marital Status (RECODED)

1   Married or Remarried (codes 1 to 4 in V381)

2   Single living with partner (codes 5 to 8 in V381)

3   Single (codes 9 and 10 in V381)

4   Divorced or separated (codes 11 and 12 in V381)

5   Widow (codes 13 and 14 in V381)

6   Other (SPONTANEOUS)

7   Refusal (SPONTANEOUS)

Derivation:

This variable collapses answers to D.7 into five categories.

Note:

See D.7 for complete question text.

v383 - D8 AGE EDUCATION

D.8

How old were you when you stopped full-time education?

(IF "STILL STUDYING", CODE '00' - IF "NO EDUCATION" CODE '01' - IF "REFUSAL" CODE '98' - IF "DK" CODE '99')

0   Refusal

2   2 years

80   80 years

97   No full-time education

98   Still studying

99   DK

Note:

Original code "00" recoded to "98".

Original code "01" recoded to "97".

Original code "98" recoded to "0".

Due to a deviant specification in the coding instruction in the Portuguese field questionnaire data for Portugal have been corrected according to the basic questionnaire.

Actual number is coded.

Last trend: EB73.4, D.8

v384 - D8 AGE EDUCATION - RECODED

D.8R Age when finished full-time education - RECODED

1   Up to 14 years

2   15 years

3   16 years

4   17 years

5   18 years

6   19 years

7   20 years

8   21 years

9   22 years and older

10   Still studying

11   No full-time education

97   Refusal

98   DK

Note:

Due to a deviant specification in the coding instruction in the Portuguese field questionnaire data for Portugal have been corrected
according to the basic questionnaire.

See D.8 for complete question text.

v386 - D11 AGE EXACT

D.11

How old are you?

15   15 years

97   97 years

Note:

Actual number is coded.

Last trend: EB73.4, D.11

v386 - D11 AGE EXACT

v387 - D11 AGE RECODED - FOUR GROUPS

D.11R1 AGE - RECODED IN FOUR GROUPS

1   15 - 24 years

2   25 - 39 years

3   40 - 54 years

4   55 years and older

Derivation:

This variable collapses answers to D.11 into four categories.

Note:

See D.11 for complete question text.

v390 - D15B OCCUPATION OF RESPONDENT - LAST JOB

D.15B

ASK D.15B ONLY IF NOT DOING ANY PAID WORK CURRENTLY - CODES 1 TO 4 IN D.15A

Did you do any paid work in the past? What was your last occupation?

SELF EMPLOYED

1   Farmer

2   Fisherman

3   Professional (lawyer, medical practitioner, accountant, architect, etc.)

4   Owner of a shop, craftsmen, other self-employed person

5   Business proprietors, owner (full or partner) of a company

EMPLOYED

6   Employed professional (employed doctor, lawyer, accountant, architect)

7   General management, director or top management (managing directors, director general, other director)

8   Middle management, other management (department head, junior manager, teacher, technician)

9   Employed position, working mainly at a desk

10   Employed position, not at a desk but travelling (salesmen, driver, etc.)

11   Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, etc.)

12   Supervisor

13   Skilled manual worker

14   Other (unskilled) manual worker, servant

15   Never did any paid work

99   Inap. currently doing paid work (not coded 1 to 4 in V389)

Note:

In accordance with former waves coding results to be (correctly) shifted compared to the questionnaire.

v415 - D62 INTERNET USE FREQ: AT PLACE OF WORK

D.62

Could you tell me if…?

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE - READ OUT)

D.62_2 You use the Internet on your place of work

1    Everyday / Almost everyday

2    Two or three times a week

3    About once a week

4    Two or three times a month

5    Less often

6    Never

7    No Internet access (SPONTANEOUS)

Note:

Last trend: EB73.4, D.62

v419 - P3 DURATION OF INTERVIEW

P.3 Number of minutes the interview lasted

15   15 minutes

147   147 minutes

Note:

Actual number is coded.

Last trend: EB73.4, P.3

v420 - P3 DURATION OF INTERVIEW - RECODED

P.3R Number of minutes the interview lasted - RECODED

1 Up to 14 minutes (catgeory not used)

2 15 - 29 minutes

3 30 - 44 minutes

4 45 - 59 minutes

5 60 - 74 minutes

6 75 - 89 minutes

7 90 minutes and more

Derivation:

This variable collapses codes in P.3 into seven categories.

Note:

Last trend: EB73.4, P.3

v494 - P13 LANGUAGE OF INTERVIEW - LUXEMBOURG

P.13_LU Language of questionnaire: Luxembourg

1 Luxembourgish

2 French

3 German

9 Inap. not LU (not coded 6 in V6)

Note:

Starting with Eurobarometer 62 and with the change of fieldwork responsibility to TNS, the relation between average frequencies for language categories "French" and "Luxembourgish" appears to be inversed. The majority of respondents in Luxembourg are now coded as being interviewed in French and not in Luxembourgish as former Eurobarometer surveys indicate. It could not be ascertained if TNS (intermittently) changed the fieldwork strategy regarding languages. Starting with Eurobarometer 69 the former proportion and rough plausibility regarding the regional distribution of questionnaire language versions is recovered. This is probably also true for Eurobarometer 68.1 and 68.2 where the labelling in the data set (value label) is shifted compared to the field questionnaire. Starting with 72.3 the total proportion of language versions is inversed again with up to about 75% of French questionnaires, but maintaining rough plausibility regarding the regional distribution. Starting with Eurobarometer 72.2 data on the questionnaire language version (P13) are not anymore regularly made available for all waves.

Last trend: EB73.4, P.13

v502 - INTERVIEWER ID

Original Interviewer Identification Number

This is the original interviewer identification number as supplied by TNS OPINION & SOCIAL. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 03: West Germany; 04: East Germany; 05: Greece; 06: Spain; 07: Finland; 08: France; 09: Ireland; 10: Italy; 11: Luxembourg; 12: Netherlands; 13: Austria; 14: Portugal; 15: Sweden; 16: Great Britain; 17:Northern Ireland; 18: Cyprus (Republic); 19: Czech Republic; 20: Estonia; 21: Hungary; 22: Latvia; 23: Lithuania; 24: Malta; 25: Poland; 26: Slovakia; 27: Slovenia; 28: Bulgaria; 29: Romania). The remaining digits contain the country-specific interviewer id numbers.

Note:

Actual number is coded.
