Preliminary remarks on this supplement to the *ALLBUS /GGSS 2006 Data Handbook*:

In the data handbook for ALLBUS / GGSS 2006 all marginals for total Germany have been weighted using the East-West design weight (V735). This weight adjusts for the *oversample* of respondents from the new federal states (East Germany), so that the frequencies in the data handbook are readily interpretable for total Germany.

As a consequence of weighting, the marginals documented in the data handbook differ from the factual distribution of responses in the unweighted data file. To complement the documentation of weighted frequency counts in the data handbook, this supplement therefore contains frequency tables of the unweighted data. The purpose of the following tables is to document the factual distribution of responses in the data file. Please be aware that the data has not been adjusted for the oversample and thus cannot be directly interpreted as representative of total Germany.

V3 SPLIT QUESTIONNAIRE

		West	East	Total
1	CASI IN F017			
	Cases	1151	568	1719
