Introduction

The present bilingual variable documentation is a supplement to the English Variable Report published for the national dataset.

The English Variable Report not only includes an extensive description of the data on study and variable level, but also contains frequency counts for almost all variables. It can be accessed through the GESIS Data Catalogue (<http://gesis.org/data-catalogue/>) and ZACAT-Online Study Catalogue (<http://zacat.gesis.org/>).

Bilingual Variable Documentation eases the work process by offering a direct comparison of questions as in English Master Questionnaire on one side, and language versions in field questionnaire on the other. What is more, for comparative analyses users can easily access this type of documentation provided for all participating countries. By this, exploration of communalities and differences in question wording across countries/cultural contexts is supported.

An overview of available documentation accessible for all countries can be found on the EVS website: <http://www.europeanvaluesstudy.eu/evs/surveys/survey-1999-2000/participatingcountries/>

The graphic below shows countries sharing one or more languages in the blue boxes. Languages marked red show shared languages.

Languages fielded in EVS 1999

Integrated Dataset English Master Questionnaire						
Austria German	Belarus Russian	Belgium Flemish/Dutch French	Bulgaria Bulgarian	Croatia Croatian	Czech Republic Czech	Denmark Danish
Estonia Estonian Russian	Finland Finnish	France French	Germany German	Great Britain English	Greece Greek	Hungary Hungarian
Iceland Icelandic	Ireland English	Italy Italian	Latvia Latvian Russian	Lithuania Lithuanian	Luxembourg Luxembourgish French Portuguese	Malta Maltese
Netherlands Dutch	Northern Ireland English	Poland Polish	Portugal Portuguese	Romania Romanian		Russian Russian
Slovenia Slovenian	Spain Spanish	Sweden Swedish	Slovak Republic Slovak	Turkey Turkish	Ukraine Ukrainian Russian	

Comparisons between countries and language versions can be extended to the EVS 2008 for which bilingual documentation of national datasets is also available through the Data Catalogue and ZACAT.

Additionally, the [Online Variable Overview](#), which also allows for identification of trend variables across EVS waves (1981, 1990, 1999, and 2008), is provided by the GESIS Data Archive.

Explanation of Bilingual Variable Documentation

In the following pages, the English/original language documentation is provided.

The left part of the page depicts the variable documentation according to the English Master Questionnaire. It displays question number and text, response categories and missing values, additional notes referring to data, as well as applied standards, information on coding and harmonized variables.

On the right hand side, variables are documented in the original language fielded in given country. Question number and text, as well as response categories and missing values are displayed in original (fielded) language(s). Notes on this side refer to deviations between master and field questionnaire, translation problems, typing errors, and references to original country-specific variables. Besides, a standard note is added concerning the recoding and documentation of missing values in the national datasets.
