Acknowledgements

Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences.

Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (<http://zacat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

1.2 Content

1.2.1 Abstract

This round of Eurobarometer surveys diverged from the Standard Eurobarometer measures and queried respondents on the following major areas of focus: (1) poverty and social exclusion, (2) mobile phone use in other EU countries, (3) the financial and economic crisis, (4) international trade.

For the first major focus, poverty and social exclusion, respondents were queried about their own definition of poverty, the extent of poverty in their area, trends in the growth or decline of poverty in their area and in the world, social and personal causes of poverty and homelessness, and negative effects of poverty. Questions also included the risk of poverty for themselves and others, the importance of governmental wealth redistribution, social tension between groups, trust in individual people, trust in and reliability of institutions in fighting poverty, minimal acceptable living standards, and the level of homelessness in their area. In addition, respondents were queried on their ability to keep their job, the relationship between their job and their family, their own personal aid to help the poor, access to financial services, the respondents' satisfaction with life, and the respondents' own living conditions and income.

Demographic and other background information includes left-right political placement, occupation, age, gender, marital status, age at completion of full-time education, household composition, ownership of a fixed or a mobile telephone and other durable goods, internet usage, financial situation, level in society, region of residence, type and size of locality, and language of interview.

1.2.2 Topic classification

- International Institutions, Relations
- Economic Policy, National Economic Situation
- Social Policy
- Income
- Society, Culture
- Patterns of Consumption

1.3 Universe

In all, Eurobarometer 74.1 interviewed 26.635 citizens in the 27 countries of the European Union after the 2004/2007 enlargement (i.e. including the Accession Countries Romania and Bulgaria). All respondents were residents in the respective country, nationals and non-nationals but EU-citizens, and aged 15 and over. They were supposed to have sufficient command of one of the respective national language(s) to answer the questionnaire. Separate samples were drawn for Northern Ireland and East Germany.

1.4 Sampling procedure

A multi-stage, random (probability) sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regional units in every country (Statistical Office of the European Community, EUROSTAT NUTS 2 or equivalent). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of starting addresses was selected from each sampled PSU, at random. Further addresses were chosen systematically using standard random route procedures as every Nth address from the initial address. In each household, a respondent was drawn, at random, following the closest birthday rule. No more than one interview was conducted in each household.

The regular sample size (in the sense of completed interviews) is 1000 respondents per country, except the United Kingdom with separate samples for Great Britain (1000) and Northern Ireland (300), Germany with separate samples for the Eastern (500) and the Western part (1000), and Luxembourg, Cyprus (Republic) and Malta with 500 interviews each. The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

From August 26 to September 22, 2010, the TNS Opinion & Social, a consortium created between TNS plc and TNS opinion, carried out the fieldwork for these two Eurobarometer surveys, at the request of the European Commission, Directorate General Press and Communication, Opinion Polls. TNS Opinion & Social is based at Avenue Herrmann Debroux, 40, 1160 Brussels, Belgium. TNS Opinion & Social coordinates the fieldwork carried out through its network of national institutes:

1.6 Mode of data collection

In all countries, fieldwork was conducted on the basis of detailed and uniform instructions prepared by TNS Opinion Social. Interviews were conducted face-to-face in people's home in the appropriate national language. As far as the data capture is concerned, CAPI (Computer Assisted Personal Interview) was used in those countries where this technique was available.

Equivalent French and English basic questionnaires were developed for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country. Backtranslation procedures were applied for controlling semantic equivalence.

1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factor corrects for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country as well as each lower level sample (Great Britain and Northern Ireland, East and West Germany) are represented in proportion to its population size within different groupings, or according to the historical states of European unification (e.g. founder members, new members, Euro zone) in the case of the EUROPEAN WEIGHTS, or for the United Kingdom (WEIGHT SPECIAL UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31) and for Germany as a whole (WEIGHT SPECIAL GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTs adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general all samples which do not belong to the respective group of samples under consideration are excluded from calculation.

The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 4) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

Eurobarometer 74.1 provides three (post-stratification) NATION WEIGHTs: W1 (WEIGHT RESULT FROM TARGET) for separate analysis or comparison of individual samples (countries or regions on sub-national level), W4 (WEIGHT SPECIAL UNITED KINGDOM) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole, and W3 (WEIGHT SPECIAL GERMANY), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. W3 and W4 exclude all other countries from calculation, but include the post-stratification factors for the United Kingdom and Germany respectively.

The EUROPEAN WEIGHTs provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries, of accession or candidate countries, and of Euro zone countries, representing different historical states of European integration (e.g. EU6 = six founder members) . All post-stratification factors are included.

Table 2: Overview of population size weights

European Weights in Eurobarometer 74.1	Function
W5 to W9, W11, W14, W22	grouping EU member countries
W10, W13, W24	grouping new member countries
W18	grouping candidate/accession countries
-	grouping member + candidate/accession countries
W81, W82	grouping (non-)Eurozone countries

For more detailed information on the individual weights please see the corresponding variable description.

1.8 Data preparation

The data received by GESIS from TNS Opinion & Social were checked for completeness, missing and duplicate records, for illegal (wild) codes and for (formal) consistency of response patterns and question routing. Errors discovered by these procedures are documented or corrected, as a general rule after consulting related additional documentation (e.g. tabular reports) or the data provider. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable DDI-XML compliant documentation was created for this dataset by GESIS.

GESIS added 'Inappropriate' (INAP) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the original questionnaire was adhered to for (almost) every respondent. An additional INAP category was defined whenever a question or group of questions were not surveyed in one or more countries, or if variables refer to country specific items (e.g. regions).

Users should note that answers to multiple-response questions are (originally) represented by a series of binary 'dummy' variables (i.e. variables which take on values of one and zero only), creating separate 'dummy' variables also to explicitly represent 'Don't know', 'No answer/refusal' or other residual responses, such as 'None of the above'. The archive has recoded these residual responses in the case of uncommon minor inconsistencies with respect to and in favour of the series of substantial answers.

GESIS has recoded the missing answers (NA) represented in the original data set by blanks (system missing) to standard values. Their practically complete absence suggests that eventual cases of any not explicitly coded item non-response, might be collapsed with the DK (don't know) category.

Question text and contingency text appearing in the variable description is taken from English language version of the basic (bilingual) questionnaire (master questionnaire). Coding schemes and other documentation are based on the English language version of the basic questionnaire or on the respective SPSS data definition statements as provided by TNS Opinion & Social. In case of any discrepancy between questionnaires, SPSS definitions and data regarding the coding scheme of a variable, the archive, as a general rule, carried out any correction in agreement with the data provider.

If the documentation for country-specific questions or answer categories is provided in other languages than English, the archive documents the original language wording and supplies the English translation in brackets.

1.9 Further remarks

Module QA on POVERTY AND SOCIAL EXCLUSION replicates the complete set of questions asked in the context of Eurobarometer 72.1 (GESIS study id ZA4975).

The following protocol variables are not made available by the data producer: P1 – DATE OF INTERVIEW, P2 – TIME OF INTERVIEW BEGINNING, P3 – DURATION OF INTERVIEW, P4 – N OF PERSONS PRESENT DURING THE INTERVIEW, and P5 – RESPONDENT COOPERATION.

2 Eurobarometer Series Description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001–2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 4: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.2OVR, 55.1OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.2OVR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 5) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 5: Overview of Eurobarometer surveys with standard EU and trend question modules

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

3 Dataset structure and standards

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structures

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 6: ZEUS Party Family Code (slightly modified)

Category		Party Family
0	(001-099)	not affiliated / electoral alliances across "families"
1	(100-199)	Communists
2	(200-299)	Socialists
3	(300-399)	Liberals
4	(400-499)	Christian Democrats
5	(500-599)	Conservatives
6	(600-699)	Extreme Rights / Nationalists
7	(700-799)	Regionalists / Ethnic
8	(800-899)	Environmental parties
9	(900-949)	Agricultural parties
9	(950-989)	other special issue parties (e.g. Eurosceptics) and independents
	990	other (spontaneous)
	994	not voting age
	995	empty ballot (blank) or invalid vote
	996	not voted / would not vote
	997	Refused
	998	DK / DK+NA if NA not coded separately
	999	INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

Starting with Eurobarometer 74.1 an additional REGION variable (REGION – NUTS CODES) is produced, integrating all participating countries with regional units defined in accordance with the EUROSTAT Nomenclature of Territorial Units for Statistics (NUTS). For each country the lowest available NUTS subdivision level is considered, whereby the hierarchical structure always implies all higher subdivision levels. The official NUTS codes are coded verbatim in accordance with the in each case valid (applicable) NUTS version as documented in the official EUROSTAT classification history (History of NUTS). A second variable indicates the lowest coded NUTS LEVEL for each country. All original regional subdivisions and categories remain coded separately and unchanged in the country-wise P7 variables. A second variable indicates the coded NUTS LEVEL for each country. Details are documented with the respective country specific and/or integrated variable.

3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

3.3 International documentation standard (DDI)

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION – ALL SAMPLES ISO 3166). In the case of Greece the non-ISO abbreviation EL* is used in parallel, as introduced by EUROSTAT as of NUTS version 2010.

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (–1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR / EL*	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded “real” values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission's official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

CROSS-TABULATION: The absolute frequencies of the occurrence of values (<i>absolute values</i>) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies (<i>row percent</i>) refer to the valid cases (<i>n valid sum</i>), i.e. the total number of cases (<i>n sum</i>) reduced by the number of cases defined as missing data (<i>M</i>). For display and place saving reasons excluded countries or areas may be completely dropped from the table.																																																																																																																																																																																																																																																																																																																																																					
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (<i>M</i>), i.e. <i>percent</i> on the basis of all cases (<i>sum</i>) and <i>valid percent</i> on the basis of the <i>valid cases</i> .																																																																																																																																																																																																																																																																																																																																																					

5 Variable Documentation

Variable, Label

Question Text (English Language)

v1 - STUDY NUMBER - DISTRIBUTOR

ARCHIVE STUDY NUMBER – DISTRIBUTOR

Study Number of the distributing data archive.

v1

Value	Label	Missing	Count	Percent	Valid Percent
5237			26635	100.0	100.0
	Sum		26635	100.0	100.0
	Valid Cases		26635		

v2 - STUDY NUMBER - PUBLISHER

ARCHIVE STUDY NUMBER – PUBLISHER

Study number of the data archive which is publishing this data set version.

v2

Value	Label	Missing	Count	Percent	Valid Percent
5237			26635	100.0	100.0
	Sum		26635	100.0	100.0
	Valid Cases		26635		

v3 - GESIS ARCHIVE VERSION

VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

v3

Value	Label	Missing	Count	Percent	Valid Percent
4.2.0 (2013-04-30)			26635	100.0	100.0
	Sum		26635	100.0	100.0
	Valid Cases		26635		

v4 - EUROBAROMETER NUMBER

EUROBAROMETER SURVEY NUMBER

The number identifying the Eurobarometer survey.

741 Eurobarometer 74.1

v4

Value	Label	Missing	Count	Percent	Valid Percent
741	Eurobarometer 74.1		26635	100.0	100.0
	Sum		26635	100.0	100.0
	Valid Cases		26635		

v5 - UNIQUE CASE ID (TNS COUNTRY ID + INTERVIEW ID)

UNIQUE CASE ID (TNS COUNTRY ID + TNS INTERVIEW ID)

This unique respondent identification is composed of the original TNS country code and the original TNS interview number. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 04: Greece; 05: Spain; 06: Finland; 07: France; 08: Ireland; 09: Italy; 10: Luxembourg; 11: Netherlands; 12: Austria; 13: Portugal; 14: Sweden; 20: Germany West; 21: Germany East; 22: Great Britain; 23: Northern Ireland; 31: Bulgaria; 32: Cyprus (Republic); 33: Czech Republic; 34: Estonia; 35: Hungary; 36: Latvia; 37: Lithuania; 38: Malta; 39: Poland; 40: Romania; 41: Slovakia; 42: Slovenia). The remaining digits contain the country-specific questionnaire numbers.

Note:

Actual number is coded.

v6 - NATION - ALL SAMPLES

NATION - ALL SAMPLES

All samples including separate samples for East and West Germany and for Great Britain and Northern Ireland.

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany West
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain

	Sum		26635	100.0	100.0
	Valid Cases		26635		

v7 - NATION - ALL SAMPLES ISO 3166

NATION – ALL SAMPLES ISO 3166

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

	Valid Cases		26635		

v8 - W1 WEIGHT RESULT FROM TARGET

W1 WEIGHT RESULT FROM TARGET

This POST-STRATIFICATION WEIGHT is based on a comparison for each sample with the respective universe description. As such in all countries, gender, age, region and size of locality are introduced in the iteration procedure carried out by the fieldwork institutes.

British and Northern Irish as well as East and West German samples are weighted separately. The weight reproduces the real number of cases for each country. In terms of its general function it corresponds to former NATION WEIGHT II (until EUROBAROMETER 31).

v9 - NATION - UNITED KINGDOM

NATION - UNITED KINGDOM

Great Britain and Northern Ireland are coded together.

0 Other

1 United Kingdom

Note:

Use of weighting factor W4 (V10) is mandatory.

v10 - W4 WEIGHT UNITED KINGDOM

W4 WEIGHT UNITED KINGDOM

This POPULATION SIZE WEIGHT adjusts the British and the Northern Irish (sub-national) samples to their share in the total population aged 15 and over in the United Kingdom. It must be applied whenever the United Kingdom is to be analyzed as a whole. The post-stratification weighting factors are included for both samples. All other samples are excluded from analysis. In terms of its general function the weight corresponds to former NATION WEIGHT I (until EUROBAROMETER 31).

v11 - NATION - UNITED GERMANY

NATION - UNITED GERMANY

East and West Germany are coded together.

0 Other

1 Germany

Note:

Use of weighting factor W3 (V12) is mandatory.

v26 - W11 WEIGHT EU15

W11 WEIGHT EU15

This POPULATION SIZE WEIGHT adds Finland, Sweden, and Austria to the EU12+ countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EU15 must be applied whenever these 15 countries as of the 1995 enlargement are to be analyzed altogether as a group.

v27 - NATION GROUP EU NMS 10

NATION GROUP EU NMS 10

NATION GROUP EU NMS 10 refers to the group of the ten new members of the enlargement in 2004.

0 Other

1 EU NMS 10

Note:

Use of weighting factor W13 (V28) is mandatory.

v38 - W81 WEIGHT EURO ZONE 2009

W81 WEIGHT EURO ZONE 2009

This POPULATION SIZE WEIGHT separates the group of 12 countries which introduced the EURO as of January 1, 2002 (Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland) plus Slovenia which introduced the EURO as of January 1, 2007, plus Cyprus and Malta, which introduced the EURO as of January 1, 2008, plus Slovakia, which introduced the EURO as of January 1, 2009. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EURO ZONE 2009 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

v39 - NATION GROUP NON EURO ZONE 2009

NATION GROUP NON EURO ZONE 2009

NATION GROUP NON EURO ZONE 2009 refers to the group of countries which did not introduce the EURO up to January 1, 2009 (Denmark, United Kingdom, Sweden, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Bulgaria, Romania).

0 Other

1 NON EURO ZONE 2009

v40 - W82 WEIGHT NON EURO ZONE 2009

W82 WEIGHT NON EURO ZONE 2009

This POPULATION SIZE WEIGHT separates the group of countries (Denmark, United Kingdom, Sweden, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Bulgaria, Romania) which did not introduce the EURO up to January 1, 2009. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT NON EURO ZONE 2009 must be applied whenever these countries are to be analyzed altogether as a group.

v41 - WEX WEIGHT EXTRA POPULATION 15+

WEX WEIGHT EXTRA POPULATION 15+

WEIGHT EXTRA extrapolates the actual universe (population aged 15 or more) for each country (sample), i.e. this weight variable integrates all other available weights, but does not reproduce the number of cases in the data set.

v42 - Q1 NATIONALITY BELGIUM

Q.1

What is your nationality? Please tell me the country(ies) that applies(y).

v72 - D15B OCCUPATION OF RESPONDENT - LAST JOB

D.15B

ASK D.15B IF "NOT DOING ANY PAID WORK CURRENTLY", CODES 1 TO 4 IN D.15A

Did you do any paid work in the past? What was your last occupation?

SELF EMPLOYED

- 1 Farmer
- 2 Fisherman
- 3 Professional (lawyer, medical practitioner, accountant, architect, etc.)
- 4 Owner of a shop, craftsmen, other self-employed person
- 5 Business proprietors, owner (full or partner) of a company

EMPLOYED

- 6 Employed professional (employed doctor, lawyer, accountant, architect)
- 7 General management, director or top management (managing directors, director general, other director)
- 8 Middle management, other management (department head, junior manager, teacher, technician)
- 9 Employed position, working mainly at a desk
- 10 Employed position, not at a desk but travelling (salesmen, driver, etc.)
- 11 Employed position, not at a desk, but in a service job
(hospital, restaurant, police, fireman, etc.)
- 12 Supervisor
- 13 Skilled manual worker
- 14 Other (unskilled) manual worker, servant

15 Never did any paid work

99 Inap. Currently doing payed work (not coded 1 to 4 in V70)

Note:

In accordance with former waves coding has been (correctly) shifted compared to the questionnaire.

Comparability:

Last trend: EB73.5, D.15B

v74 - QA1 SATISFACTION LIFE GENERAL (10P-SCALE)

Now, we will talk about poverty, the image you have of it, and what it means to be poor or excluded from our society.

Q.A1

All things considered, how satisfied would you say you are with your life these days? Please use a scale from 1 to 10 where [1] means 'very dissatisfied' and [10] means 'very satisfied'.

(SHOW CARD WITH SCALE – ONE ANSWER ONLY)

- 1 Box 1 - Very dissatisfied
- 2 Box 2
- 3 Box 3
- 4 Box 4
- 5 Box 5
- 6 Box 6
- 7 Box 7
- 8 Box 8
- 9 Box 9
- 10 Box 10 - Very satisfied
- 11 DK

v75 - QA1 SATISFACTION LIFE GENERAL (REC)
Q.A1 SATISFACTION LIFE GENERAL – RECODED

- 1 Dissatisfied (coded 1 to 4 in V74)
- 2 Neither nor (coded 5 to 6 in V74)
- 3 Satisfied (coded 7 to 10 in V74)
- 8 DK

Derivation:

This variable collapses answers to Q.A1 into three categories.

Note:

See Q.A1 (V74) for complete question text.

v77 - QA2 SATISFACTION FAMILY LIFE (REC)

Q.A2 SATISFACTION FAMILY LIFE – RECODED

- 1 Dissatisfied (coded 1 to 4 in V76)
- 2 Neither nor (coded 5 to 6 in V76)
- 3 Satisfied (coded 7 to 10 in V76)
- 8 DK

Derivation:

This variable collapses answers to Q.A2 into three categories.

Note:

See Q.A2 (V76) for complete question text.

v79 - QA2 SATISFACTION HEALTH (REC)

Q.A2 SATISFACTION HEALTH – RECODED

- 1 Dissatisfied (coded 1 to 4 in V78)
- 2 Neither nor (coded 5 to 6 on V78)
- 3 Satisfied (coded 7 to 10 in V78)
- 8 DK

Derivation:

This variable collapses answers to Q.A2 into three categories.

Note:

See Q.A2 (V78) for complete question text.

v81 - QA2 SATISFACTION JOB (REC)

Q.A2 SATISFACTION JOB – RECODED

- 1 Dissatisfied (coded 1 to 4 in V80)
- 2 Neither nor (coded 5 to 6 in V80)
- 3 Satisfied (coded 7 to 10 in V80)
- 8 DK
- 9 Inap. No paid work (not coded 5 to 18 in V70)

Derivation:

This variable collapses answers to Q.A2 into three categories.

Note:

See Q.A2 (V80) for complete question text.

v82 - QA2 SATISFACTION LIVING STANDARD (10P-SCALE)

Q.A2

Could you please tell me on a scale of 1 to 10 how satisfied you are with each of the following items, where [1] means you are "very dissatisfied" and [10] means you are "very satisfied"?

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE – READ OUT)

Q.A2_4 Your present standard of living

- 1 Box 1 - Very dissatisfied
- 2 Box 2
- 3 Box 3
- 4 Box 4
- 5 Box 5
- 6 Box 6
- 7 Box 7
- 8 Box 8
- 9 Box 9
- 10 Box 10 - Very satisfied
- 11 DK

Comparability:

v83 - QA2 SATISFACTION LIVING STANDARD (REC)

Q.A2 SATISFACTION LIVING STANDARD – RECODED

- 1 Dissatisfied (coded 1 to 4 in V82)
- 2 Neither nor (coded 5 to 6 in V82)
- 3 Satisfied (coded 7 to 10 in V82)
- 8 DK

Derivation:

This variable collapses answers to Q.A2 into three categories.

Note:

See Q.A2 (V82) for complete question text.

v84 - QA3 POVERTY - DEFINITION

Q.A3

There are different ways of defining when people are poor in (OUR COUNTRY). Which of the following statements would best correspond to your definition of being poor? People are poor when...

(SHOW CARD – READ OUT – ROTATE – ONE ANSWER ONLY)

- 1 Their resources are so limited that they cannot participate fully in the life of the society they live in
- 2 They have less than (INSERT POVERTY THRESHOLD IN EACH COUNTRY) per month to live on
- 3 They have a very low social status in our society, independently from their resources
- 4 They depend on charity or public subsidies
- 5 They cannot afford the basic goods they need to live (food, shelter, clothes, etc.) (SPONTANEOUS)
- 6 Other (SPONTANEOUS)
- 7 It is impossible to define poverty just by one statement (SPONTANEOUS)
- 8 DK

v173 - QA16 GENERAL TRUST IN PEOPLE (REC)

Q.A16 GENERAL TRUST IN PEOPLE – RECODED

- 1 Tend not to trust (coded 1 to 4 in V172)
- 2 Neither nor (coded 5 to 6 in V172)
- 3 Tend to trust (coded 7 to 10 in V172)
- 8 DK

Derivation:

This variable collapses answers to Q.A16 into three categories.

Note:

See Q.A16 (V172) for complete question text.

v177 - QA17 TRUST IN INSTITUTIONS: GOVERNMENT (REC)

Q.A17 TRUST IN INSTITUTIONS: GOVERNMENT – RECODED

- 1 Tend not to trust (coded 1 to 4 in V176)
- 2 Neither nor (coded 5 to 6 in V176)
- 3 Tend to trust (coded 7 to 10 in V176)
- 8 DK

Derivation:

This variable collapses answers to Q.A17 into three categories.

Note:

See Q.A17 (V176) for complete question text.

v213 - QA25A SOLVING UNEMPLOYMENT PROBLEM - STRATEGIES

Q.A25A

People think differently on what steps should be taken to help solving social and economic problems in (OUR COUNTRY). I'm going to read you two contradictory statements on this topic. Please tell me which one comes closest to your view.

(SHOW CARD – READ OUT – ONE ANSWER ONLY)

- 1 It is primarily up to the (NATIONALITY) Government to provide jobs for the unemployed
- 2 Providing jobs should rest primarily on private companies and markets in general
- 3 It depends (SPONTANEOUS)
- 4 DK

v214 - QA25B FINANCING EDUCATION - STRATEGIES

Q.A25B

And which of these two statements comes closest to your view?

(SHOW CARD – READ OUT – ONE ANSWER ONLY)

- 1 Education should be totally free, even if this means that the quality might be lower
- 2 Tuition fees are necessary for providing high quality education, even if this means that some people won't be able to afford it
- 3 It depends (SPONTANEOUS)
- 4 DK

v278 - QA42 LOWEST HH INCOME TO MAKE ENDS MEET

Q.A42

ASK ALL

In your opinion, what would be the very lowest net monthly income that your household would need in order to have a minimum acceptable standard of living, given the present circumstances and composition of your household? Net income is after tax and social security contributions have been deducted, and after including any social benefits you are entitled to.

(CODE SPONTANEOUS ANSWER – IF "REFUSAL", CODE '9999999998' – IF "DK", CODE '9999999999')

50 50 Euro

10000 10000 Euro

99997 Refusal

99998 DK

Note:

Actual number is coded.

v281 - QA44 HOUSEHOLD SITUATION - POOR/WEALTHY

Q.A44

ASK ALL

On this card, please select the letter that would best describe the situation of your household.

(SHOW CARD – ONE ANSWER ONLY)

- 1 Box 1 - E Very poor
- 2 Box 2 - B
- 3 Box 3 - V
- 4 Box 4 - Z
- 5 Box 5 - R
- 6 Box 6 - P
- 7 Box 7 - A
- 8 Box 8 - G
- 9 Box 9 - O
- 10 Box 10 - T Very wealthy
- 97 Refusal
- 98 DK

Note:

Original code "11" recoded to "97".

Original code "12" recoded to "98".

v282 - QA44 HOUSEHOLD SITUATION - POOR/WEALTHY (REC)
Q.A44 HOUSEHOLD SITUATION - POOR/WEALTHY – RECODED

- 1 Poor (coded 1 to 4 in V281)
- 2 Neither nor (coded 5 to 6 in V281)
- 3 Rich (coded 7 to 10 in V281)
- 7 Refusal
- 8 DK

Derivation:

This variable collapses answers to Q.A44 into three categories.

Note:

See Q.A44 (V281) for complete question text.

v362 - QA57 PUBLIC SERVICE QUALITY: HEALTH SERVICES (REC)

Q.A57 PUBLIC SERVICE QUALITY: HEALTH SERVICES – RECODED

- 1 Bad (coded 1 to 4 in V361)
- 2 Neither nor (coded 5 to 6 in V361)
- 3 Good (coded 7 to 10 in V361)
- 8 DK

Derivation:

This variable collapses answers to Q.A57 into three categories.

Note:

See Q.A57 (V361) for complete question text.

v364 - QA57 PUBLIC SERVICE QUALITY: PENSION SYSTEM (REC)

Q.A57 PUBLIC SERVICE QUALITY: PENSION SYSTEM – RECODED

- 1 Bad (coded 1 to 4 V363)
- 2 Neither nor (coded 5 to 6 in V363)
- 3 Good (coded 7 to 10 in V363)
- 8 DK

Derivation:

This variable collapses answers to Q.A57 into three categories.

Note:

See Q.A57 (V363) for complete question text.

v378 - QB2AB MOBILE PHONE USE IN EU: MAKE VOICE CALLS

[Q.B2A + Q.B2B

Which of the following mobile phone communication services do you use most when visiting another European Union country?

And which other services do you usually use when visiting another European Union country?]

Q.B2AB_1 Making voice calls

0 Not mentioned

1 Mentioned

9 Inap. Not making calls (not coded 1 in V369 or V370)

Derivation:

This variable summarizes answers to this item in Q.B2A and Q.B2B_1 (V369 and V370).

Note:

See Q.B2A and Q.B2B_1 for complete question text. Variables summarize answers to Q.B2A and Q.B2B_1 (V369 and V370), except for categories '7' to '11' in Q.B2A (V384 to V388).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

v379 - QB2AB MOBILE PHONE USE IN EU: RCV VOICE CALLS

[Q.B2A + Q.B2B

Which of the following mobile phone communication services do you use most when visiting another European Union country?

And which other services do you usually use when visiting another European Union country?]

Q.B2AB_2 Receiving voice calls

0 Not mentioned

1 Mentioned

9 Inap. Not receiving calls (not coded 2 in V369 or not 1 in V371)

Derivation:

This variable summarizes answers to this item in Q.B2A and Q.B2B_2 (V369 and V371).

Note:

See Q.B2A and Q.B2B_2 for complete question text. Variables summarize answers to Q.B2A and Q.B2B_2 (V369 and V371), except for categories '7' to '11' in Q.B2A (V384 to V388).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

v385 - QB2AB MOBILE PHONE USE IN EU: SWITCH OFF (QB2A ONLY)

[Q.B2A + Q.B2B

Which of the following mobile phone communication services do you use most when visiting another European Union country?

And which other services do you usually use when visiting another European Union country?]

Q.B2AB_8 You normally switch off your mobile phone when in another European Union country (Q.B2A only)

0 Not mentioned

1 Mentioned

9 Inap. Not switch it off (not coded 8 in V369)

Derivation:

This variable repeats answers to this item in Q.B2A (V369).

Note:

See Q.B2A and Q.B2B for complete question text. Variable repeats answers to category '8' ('Switch off') in Q.B2A (V369), while other answers to Q.B2A are summarized with Q.B2B_1 to Q.B2B_6 (V370 to V375) in variables V378 to V383.

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

v389 - QB3 MOBILE PH USE EU COMPARED: MAKE VOICE CALLS

ASK Q.B1 TO Q.B4 IF "HAS A PERSONAL MOBILE PHONE", CODE 1 IN D.43B – OTHERS GO TO Q.C1

ASK Q.B2A TO Q.B4 IF "HAS VISITED ANOTHER EUROPEAN UNION COUNTRY", CODE 1 OR 2 IN Q.B1_1 OR Q.B1_2

Q.B3

ASK Q.B3 IF "USES MAIN MOBILE PHONE COMMUNICATION SERVICES IN ANOTHER EU COUNTRY" – CODES 1 TO 3
IN Q.B2A OR Q.B2B – OTHERS GO TO Q.B4

Compared to the situation 4 years ago, would you say that you use the following mobile phone services more frequently, less frequently or with the same frequency while you are visiting another European Union country?

(SHOW CARD – ONE ANSWER PER LINE – READ OUT)

Q.B3_1 (ONLY IF CODE 1 IN Q.B2A OR Q.B2B) Making voice calls with your mobile phone while visiting another European Union country

- 1 More frequently
- 2 Less often
- 3 The same frequency
- 4 Not applicable (SPONTANEOUS)
- 5 DK
- 9 Inap. Not making calls (not coded 1 in V369 or V370)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

v390 - QB3 MOBILE PH USE EU COMPARED: RCV VOICE CALLS

ASK Q.B1 TO Q.B4 IF "HAS A PERSONAL MOBILE PHONE", CODE 1 IN D.43B – OTHERS GO TO Q.C1

ASK Q.B2A TO Q.B4 IF "HAS VISITED ANOTHER EUROPEAN UNION COUNTRY", CODE 1 OR 2 IN Q.B1_1 OR Q.B1_2

Q.B3

ASK Q.B3 IF "USES MAIN MOBILE PHONE COMMUNICATION SERVICES IN ANOTHER EU COUNTRY" – CODES 1 TO 3
IN Q.B2A OR Q.B2B – OTHERS GO TO Q.B4

Compared to the situation 4 years ago, would you say that you use the following mobile phone services more frequently, less frequently or with the same frequency while you are visiting another European Union country?

(SHOW CARD – ONE ANSWER PER LINE – READ OUT)

Q.B3_2 (ONLY IF CODE 2 IN Q.B2A OR Q.B2B) Receiving voice calls on your mobile phone while visiting another European Union country

- 1 More frequently
- 2 Less often
- 3 The same frequency
- 4 Not applicable (SPONTANEOUS)
- 5 DK
- 9 Inap. Not receiving calls (not 2 in V369 or not 1 in V371)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

v394 - QB4 MOBILE PH USE IN EU: FAIR INTERNET COSTS

ASK Q.B1 TO Q.B4 IF "HAS A PERSONAL MOBILE PHONE", CODE 1 IN D.43B – OTHERS GO TO Q.C1

Q.B4

ASK Q.B4 IF "HAS VISITED ANOTHER EUROPEAN UNION COUNTRY", CODE 1 OR 2 IN Q.B1_1 OR Q.B1_2

To what extent do you agree or disagree with each of the following statements?

(SHOW CARD – ONE ANSWER PER LINE – READ OUT)

Q.B4_3 The cost of surfing the Internet with a mobile phone while visiting another European Union country is fair

- 1 Totally agree
- 2 Tend to agree
- 3 Tend to disagree
- 4 Totally disagree
- 5 Not applicable (SPONTANEOUS)
- 6 DK
- 9 Inap. Not visit other EU countries (not 1 or 2 in V367 or V368)

Note:

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

v413 - QC2 CRISIS IMPACT ON: PERSONAL SITUATION

For more than a year, the world has been facing a crisis that is economic, financial, social and monetary. To simplify, we will use the term crisis in the whole questionnaire.

Q.C2

To what extent do you consider that the current crisis is or is not having an impact on each of the following?
(SHOW CARD WITH SCALE – ONE ANSWER PER LINE – READ OUT)

Q.C2_4 Your personal situation

- 1 Very significant impact
- 2 Fairly significant impact
- 3 Not really any impact
- 4 No impact at all
- 5 DK

Comparability:

v422 - QC8 CRISIS - FINANCIAL POLICY PREFERENCE

Q.C8

Personally, would you say that to emerge from the crisis rapidly, EU Member States should first reduce their public spending or should they first invest in measures to boost the economy?

(READ OUT – ONE ANSWER ONLY)

- 1 First reduce their public spending
- 2 First invest in measures to boost the economy
- 3 Both equally (SPONTANEOUS)
- 4 DK

v455 - QD1 PRODUCT ORIGIN - AWARENESS INDEX

Q.D1 PRODUKT ORIGIN – AWARENESS INDEX

- 1 Strong (7 to 10)
- 2 Medium (4 to 6)
- 3 Low (1 to 3)
- 4 None

Note:

See Q.D1 (V450 to V454) for complete question text.

This index is constructed by using the five variables V450 to V454. For different levels of awareness different values are assigned: value 2 for awareness influencing decisions, value 1 for awareness without decision-making influence and value 0 for no awareness. Subsequently the five weighted items are added up resulting in a scale between 0 and 10 with values 7 to 10 indicating a strong awareness, values 4 to 6 a medium awareness, values 1 to 3 a low awareness and value 0 no awareness at all.

v461 - QD4 INTERNATIONAL TRADE - BENEFIT

Q.D4

Nowadays, international trade has an important place in the EU: this means that goods and services from outside are imported into the EU, while EU goods and services are exported around the world. Could you tell me whether you are currently benefiting from international trade or not?

(SHOW CARD – ONE ANSWER ONLY)

- 1 Yes, benefiting a lot
- 2 Yes, benefiting somewhat
- 3 No, not really benefiting
- 4 No, not at all benefiting
- 5 DK

v481 - QD8A EU TRADE POLICY - PRIORITY

Q.D8A

In your opinion, what should be the main priorities of European Union's trade policy for the years to come? Firstly?

(SHOW CARD – READ OUT – ROTATE – ONE ANSWER ONLY)

- 1 Offer consumers the widest choice of products and services at the lowest prices
- 2 Help developing countries around the world
- 3 Ensure environmental standards
- 4 Ensure that the same rules for trade are applied everywhere in the world
- 5 Create jobs in the EU
- 6 Support European companies and businesses
- 7 Other (SPONTANEOUS)
- 8 DK

v499 - D1 LEFT-RIGHT PLACEMENT - RECODED 3 CAT

D.1R1 LEFT-RIGHT SCALE – RECODED

- 1 (1 - 4) Left
- 2 (5 - 6) Centre
- 3 (7 -10) Right
- 9 DK/Refusal

Derivation:

This variable collapses answers to D.1 into three categories.

Note:

See D.1 for complete question text.

v501 - D7 MARITAL STATUS

D.7

Could you give me the letter which corresponds best to your own current situation?

(SHOW CARD – READ OUT – ONE ANSWER ONLY)

MARRIED OR REMARRIED

- 1 Living without children
- 2 Living with the children of this marriage
- 3 Living with the children of a previous marriage
- 4 Living with the children of this marriage and of a previous marriage

SINGLE LIVING WITH A PARTNER

- 5 Living without children
- 6 Living with the children of this union
- 7 Living with the children of a previous union
- 8 Living with the children of this union and of a previous union

SINGLE

- 9 Living without children
- 10 Living with children

DIVORCED OR SEPARATED

- 11 Living without children
- 12 Living with children

WIDOW

- 13 Living without children
- 14 Living with children

15 Other (SPONTANEOUS)

97 Refusal (SPONTANEOUS)

Note:

Original code "16" recoded to "97".

Comparability:

Last trend: EB73.5, D.7

v502 - D7 MARITAL STATUS (REC STATUS)

D.7R1 MARITAL STATUS – RECODED STATUS

- 1 (Re-)Married (coded 1 to 4 in V501)
- 2 Single living with partner (coded 5 to 8 in V501)
- 3 Single (coded 9 to 10 in V501)
- 4 Divorced or separated (coded 11 to 12 in V501)
- 5 Widow (coded 13 to 14 in V501)
- 6 Other (SPONTANEOUS)
- 7 Refusal (SPONTANEOUS)

Derivation:

This variable collapses answers to D.7 into five categories.

Note:

See D.7 for complete question text.

v503 - D7 MARITAL STATUS (REC CHILDREN)

D.7R2 MARITAL STATUS – RECODED CHILDREN

- 1 Single household without children (coded 9,11, and 13 in V501)
- 2 Single household with children (coded 10,12, and 14 in V501)
- 3 Multiple occupancy household without children (coded 1 and 5 in V501)
- 4 Multiple occupancy household with children (coded 2 to 4 and 6 to 8 in V501)
- 5 Other (SPONTANEOUS)
- 7 Refusal (SPONTANEOUS)

Derivation:

This variable collapses answers to D.7 into four categories.

Note:

See D.7 for complete question text.

v504 - D8 AGE EDUCATION

D.8

How old were you when you stopped full-time education?

(IF "STILL STUDYING", CODE '00' - IF "NO EDUCATION" CODE '01' - IF "REFUSAL" CODE '98' - IF "DK" CODE '99')

- 0 Refusal
- 2 2 years
- 80 80 years
- 97 No full-time education
- 98 Still studying
- 99 DK

Note:

Original code "00" recoded to "98".

Original code "01" recoded to "97".

Original code "98" recoded to "0".

Due to a deviant specification in the coding instruction in the Portuguese field questionnaire data for Portugal have been corrected according to the basic questionnaire.

Code "00" is recoded to "97" for Portugal.

Actual number is coded.

Comparability:

Last trend: EB73.5, D.8

v505 - D8 AGE EDUCATION - RECODED

D.8R AGE WHEN FINISHED FULL-TIME EDUCATION – RECODED

- 1 Up to 14 years
- 2 15 years
- 3 16 years
- 4 17 years
- 5 18 years
- 6 19 years
- 7 20 years
- 8 21 years
- 9 22 years and older
- 10 Still studying
- 11 No full-time education
- 97 Refusal
- 98 DK

Derivation:

This variable groups answers to question D.8.

Note:

See D.8 for complete question text.

Due to a deviant specification in the coding instruction in the Portuguese field questionnaire data for Portugal have been corrected according to the basic questionnaire.

Code "97" is recoded to "11" for Portugal.

v507 - D11 AGE EXACT

D.11

How old are you?

15 15 years

98 98 years

Note:

Actual number is coded.

Comparability:

Last trend: EB73.5, D.11

v508 - D11 AGE RECODED - FOUR GROUPS

D.11R1 AGE – RECODED IN FOUR GROUPS

- 1 15 - 24 years
- 2 25 - 39 years
- 3 40 - 54 years
- 4 55 years and older

Derivation:

This variable collapses answers to D.11 into four categories.

Note:

See D.11 for complete question text.

v516 - D40C HOUSEHOLD COMPOSITION: AGED 10-14 (REC)
D.40CR HOUSEHOLD COMPOSITION: AGED 10-14 – RECODED

n of people in household

- 0 None
- 1 One
- 2 Two
- 3 Three
- 4 Four or more

Derivation:

This variable groups answers to question D.40C.

Note:

See D.40C (V515) for complete question text.

v517 - D40 HOUSEHOLD COMPOSITION: SIZE A+B+C

D.40 HOUSEHOLD COMPOSITION: SIZE (A+B+C)

n of people in household

- 1 One
- 2 Two
- 3 Three
- 4 Four
- 5 Five
- 6 Six
- 7 Seven
- 8 Eight
- 9 Nine
- 10 Ten
- 11 Eleven
- 12 Twelve
- 13 Thirteen
- 14 Fourteen
- 15 Fifteen
- 16 Sixteen
- 18 Eighteen
- 20 Twenty

Derivation:

This variable summarizes V511, V513, and V515.

Note:

See V511, V513, and V515 for complete question text.

Generated by the Archive in accordance with former surveys.

v518 - D40 HOUSEHOLD COMPOSITION: SIZE A+B+C (REC)

D.40R HOUSEHOLD COMPOSITION: SIZE (A+B+C) – RECODED

n of people in household

- 1 One
- 2 Two
- 3 Three
- 4 Four
- 5 Five
- 6 Six
- 7 Seven or more

Derivation:

This variable groups the summarized variable V517.

Note:

See V511, V513, and V515 for complete question text.

NO QUESTION D.41 TO D.42

D.43 ASKED BEFORE Q.B

v531 - D62 INTERNET USE FREQ: AT HOME

D.62

Could you tell me if...?

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE – READ OUT)

D.62_1 You use the Internet at home, in your home

- 1 Everyday/Almost everyday
- 2 Two or three times a week
- 3 About once a week
- 4 Two or three times a month
- 5 Less often
- 6 Never
- 7 No Internet access (SPONTANEOUS)

Comparability:

Last trend: EB73.5, D.62

v588 - P7 REGION - PORTUGAL NUTS 2

P.7_PT REGION

Portugal (EUROSTAT NUTS 2 LEVEL) – Comissaoes de Coordenação regional + Regioes autonomas

- 1 Norte (North)
- 2 Centro (Center)
- 3 Lisboa (Lisbon)
- 4 Alentejo (Alentejo Region)
- 5 Algarve
- 99 Inap. Not PT (not coded 13 in V6)

Note:

The autonomous regions of the Azores (PT20 - Região Autónoma dos Açores) and of Madeira (PT30 - Região Autónoma da Madeira) are not covered.

Since 2002 the region “Lisboa e vale do tejo” is split up and the subregion “Lezíria do Tejo” reinstated to the “Alentejo” Region and the “Médio Tejo” and “Oeste” reinstated to the “Centro” Region. The relative frequencies for each region indicate that this is reflected in the Eurobarometer P.7 regions starting with Eurobarometer 62.0. The original label for category ‘3’ (“Lisboa e vale do Tejo”) has been edited accordingly. According to the NUTS 2 specifications for Portugal this now only includes “Grande Lisboa” and “Península de Setúbal”.

The official NUTS categories are coded and documented in the integrated alphanumeric NUTS CODES variable V611.

v589 - P7 REGION - FINLAND NUTS 3

P.7_FI REGION

Finland (EUROSTAT NUTS 3 LEVEL 2010) – Maakunnat / Landskap

- 1 Helsinki-Uusimaa
- 2 Varsinais-Suomi (Southwest Finland)
- 3 Satakunta
- 4 Kanta-Häme (Tavastia Proper)
- 5 Pirkanmaa (Tampere Region)
- 6 Päijät-Häme (Paijanne Tavastia)
- 7 Kymenlaakso
- 8 Etelä-Karjala (South Karelia)
- 9 Etelä-Savo (Southern Savonia)
- 10 Pohjois-Savo (Northern Savonia)
- 11 Pohjois-Karjala (North Karelia)
- 12 Keski-Suomi (Central Finland)
- 13 Etelä-Pohjanmaa (Southern Ostrobothnia)
- 14 Pohjanmaa (Ostrobothnia)
- 15 Keski-Pohjanmaa (Central Ostrobothnia)
- 16 Pohjois-Pohjanmaa (Northern Ostrobothnia)
- 17 Kainuu
- 18 Lappi (Lapland)
- 99 Inap. Not FI (not coded 16 in V6)

Note:

The Åland Islands (FI200 - Landskapet Åland / Avenanmaan maakunta) are not covered.

Former regions of "Uusimaa" (FI181) and "Itä-Uusimaa" (FI182) have been consolidated to the region of "Helsinki-Uusimaa" (FI1B1) on January 1, 2011. The official NUTS codes have changed accordingly starting with NUTS version 2010.

Eurobarometer did never code "Itä-Uusimaa" (East Uusimaa) separately. "Uusimaa" always included the capital area of Helsinki. For this reason the NUTS CODES variable V611 is already coded in accordance with NUTS version 2010.

The NUTS version history documents a minor boundary shift between "Satakunta" (NUTS 2003: FI191; NUTS 2006/2010: FI196) and "Pirkanmaa" (NUTS 2003: FI192; NUTS 2006/2010: FI197). One municipality has been transferred between these NUTS level 3 regions. Please notice that the NUTS CODES variable V611 is based on the NUTS 2006/2010 codes for "Satakunta" and "Pirkanmaa" although it could not be verified if and when the boundary shift is actually reflected in Eurobarometer data.

The official NUTS categories are coded and documented in the integrated alphanumeric NUTS CODES variable V611.

Comparability:

Last trend: EB73.5, P.7

v590 - P7 REGION - FINLAND NUTS 2

P.7R_FI REGION

Finland (EUROSTAT NUTS 2 LEVEL 2003 / 2006) – Suuralueet / Storområden

- 1 Itä-Suomi (East Finland)
- 2 Etelä-Suomi (South Finland)
- 3 Länsi-Suomi (West Finland)
- 4 Pohjois-Suomi (North Finland)
- 99 Inap. Not FI (not coded 16 in V6)

Note:

The Åland Islands (FI200 - Landskapet Åland / Avenanmaan maakunta) are not covered.

This variable corresponds to the NUTS 2 breakdown in accordance with NUTS versions 2003 und 2006, i.e. before separating "Helsinki-Uusimaa" (NUTS version 2010: FI1B) from "Etelä-Suomi" (NUTS 2003/2006: FI18; NUTS 2010: FI1C), and before merging "Pohjois-Suomi" (NUTS 2003/2006: FI1A) with "Itä-Suomi" (NUTS 2003/2006: FI13) to "Pohjois- ja Itä-Suomi" (NUTS 2010: FI1D). This coding corresponds to former Eurobarometer waves. Unlike the present NUTS 2 variable, the NUTS CODES variable V611 represents NUTS version 2010.

RO31 Sud - Muntenia (South)

RO32 București - Ilfov (Bucharest - Ilfov)

RO41 Sud-Vest - Oltenia (South-West)

RO42 Vest (West)

Derivation:

This additional alphanumeric NUTS CODES variable is produced by the archive. It integrates all country specific P.7 variables given that the regional units are defined in accordance with the EUROSTAT Nomenclature of Territorial Units for Statistics (NUTS) respectively in accordance with the Statistical Regions for Candidate and EFTA Countries 2010. For each country the lowest available NUTS subdivision level is considered.

Eurostat: RAMON Eurostat Metadata Server. NUTS (Nomenclature of Territorial Units for Statistics), by country.

Webdownload: 2013-03-01 (http://ec.europa.eu/eurostat/ramon/documents/nuts/NUTS_2010.zip)

Eurostat: RAMON Eurostat Metadata Server. Statistical Regions for Candidate countries and EFTA countries, by country.

Webdownload: 2013-03-01 http://ec.europa.eu/eurostat/ramon/documents/nuts/Statistical_Regions_2010.zip)

Note:

The official NUTS codes are coded verbatim in accordance with the in each case valid (applicable) NUTS version. All version details and changes are documented in the official EUROSTAT classification history (History of NUTS). A second variable (V612) indicates the coded NUTS LEVEL for each country.

France:

The territorial unit of Corse (FR83) and the overseas departments (FR9) are not covered.

Italy:

Starting with NUTS version 2010 NUTS 1 codes for Italy have changed for North-East (ITH instead of ITD) and Center (ITI instead of ITE). The reason for this are minor boundary shifts on NUTS 2 and 3 level (Marche and Emilia Romagna).

Greece:

The Aegean Islands (GR41 - Voreio Aigaio and GR42 - Notio Aigaio) as well as the Ionian Islands (GR22 - Ionia Nisia) are not covered.

Starting with NUTS version 2010 the standard country prefix 'GR' is exchanged by 'EL'. The remaining numerical part of the codes is not affected.

Spain:

The autonomous cities of Ceuta (ES63 - Ciudad Autónoma de Ceuta) and Melilla (ES64 - Ciudad Autónoma de Melilla) are not

covered.

Portugal:

The autonomous regions of the Azores (PT20 - Região Autónoma dos Açores) and of Madeira (PT30 - Região Autónoma da Madeira) are not covered.

Finland:

The Åland Islands (FI200 - Landskapet Åland / Avenanmaan maakunta) are not covered.

Former regions of "Uusimaa" (FI181) and "Itä-Uusimaa" (FI182) have been consolidated to the region of "Helsinki-Uusimaa" (FI1B1) on January 1, 2011. The official NUTS codes have changed accordingly starting with NUTS version 2010.

Eurobarometer did never code "Itä-Uusimaa" (East Uusimaa) separately. "Uusimaa" always included the capital area of Helsinki. For this reason the NUTS CODES variable V611 for Finland is already coded in accordance with NUTS version 2010. Only the country specific NUTS 2 variable (V590) is still coded in accordance with NUTS version 2003/2006 in order to remain consistent with former Eurobarometer waves.

The NUTS version history documents a minor boundary shift between "Satakunta" (NUTS 2003: FI191; NUTS 2006/2010: FI196) and "Pirkanmaa" (NUTS 2003: FI192; NUTS 2006/2010: FI197). One municipality has been transferred between these NUTS level 3 regions. Please notice that NUTS CODES variable V611 is based on the NUTS 2006/2010 codes for "Satakunta" and "Pirkanmaa" although it could not be verified if and when the boundary shift is actually reflected in Eurobarometer data.

v612 - REGION - NUTS LEVEL

REGION – NUTS LEVEL

- 0 No NUTS units
- 1 NUTS level 1
- 2 NUTS level 2
- 3 NUTS level 3

Note:

This variable identifies the lowest available NUTS LEVEL as coded for each country in variable NUTS CODES (V611).
