Acknowledgements

Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences (DAS).

Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (<http://zacat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through the Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

GESIS, Cologne [Publisher]: ZA5479, dataset version 6.0.0, DOI:[10.4232/1.11646](https://doi.org/10.4232/1.11646) (2013).

The registered Digital Object Identifier (DOI) persistently identifies this dataset version with reference to former (or more recent) versions and to the corresponding ERRATA and update documentation.

1.2 Content

1.2.1 Abstract

This round of Eurobarometer surveys covers the following special topics: (1) energy in the EU, (2) citizens' rights, (3) e-communications, (4) the internal market, and (5) carbon dioxide capture and storage.

Information was collected on potential policies and ways to reduce energy consumption, the performance of EU administration, opinions about citizens' most important rights, and report access, use, and providers of various technology and media, including the Internet. Additional information includes respondents' views on employment across EU countries, counterfeiting and piracy, the handling of carbon dioxide, and effects on climate change.

Demographic and other background information collected includes age, gender, nationality, marital status and parental relations, left-right political self-placement, occupation, age when stopped full-time education, household composition, ownership of a fixed or a mobile telephone and other durable goods, difficulties in paying bills, level in society, and Internet use. In addition, country-specific data includes type and size of locality, region of residence, and language of interview.

1.2.2 Topic classification

- International Institutions, Relations
- Legal system, Legislation, Law
- Communication, Public Opinion, Media
- Technology, Energy

CESSDA Topic Classification

- 11.2 International politics and organisations
- 13.4 Gender and gender roles
- 16.2 Natural resources and energy
- 16.4 Environmental degradation / pollution and protection
- 17.3 Consumption / consumer behaviour
- 18.2 Information technology

1.3 Universe

In all, Eurobarometer 75.1 interviewed 26.836 citizens in the 27 countries of the European Union after the 2004/2007 enlargement (i.e. including the Accession Countries Romania and Bulgaria). All respondents were residents in the respective country, nationals and non-nationals but EU-citizens, and aged 15 and over. They were supposed to have sufficient command of one of the respective national language(s) to answer the questionnaire. Separate samples were drawn for Northern Ireland and East Germany.

1.4 Sampling procedure

A multi-stage, random (probability) sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regional units in every country (Statistical Office of the European Community, EUROSTAT NUTS 2 or equivalent). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of starting addresses was selected from each sampled PSU, at random. Further addresses were chosen systematically using standard random route procedures as every Nth address from the initial address. In each household, a respondent was drawn, at random, following the closest birthday rule. No more than one interview was conducted in each household.

The regular sample size (in the sense of completed interviews) is 1000 respondents per country, except the United Kingdom with separate samples for Great Britain (1000) and Northern Ireland (300), Germany with separate samples for the Eastern (500) and the Western part (1000), and Luxembourg and Cyprus (Republic) with 500 interviews each. The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

From February 9 to March 8, 2011, the TNS Opinion & Social, a consortium created between TNS plc and TNS opinion, carried out the fieldwork for these two Eurobarometer surveys, at the request of the European Commission, Directorate-General Communication. TNS Opinion & Social is based at Avenue Herrmann Debroux, 40, 1160 Brussels, Belgium. TNS Opinion & Social coordinates the fieldwork carried out through its network of national institutes:

1.6 Mode of data collection

In all countries, fieldwork was conducted on the basis of detailed and uniform instructions prepared by TNS Opinion Social. Interviews were conducted face-to-face in people's home in the appropriate national language. As far as the data capture is concerned, CAPI (Computer Assisted Personal Interview) was used in those countries where this technique was available.

Equivalent French and English basic questionnaires were developed for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country. Backtranslation procedures were applied for controlling semantic equivalence.

1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually

reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factor corrects for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country as well as each lower level sample (Great Britain and Northern Ireland, East and West Germany) are represented in proportion to its population size within different groupings, or according to the historical states of European unification (e.g. founder members, new members, Euro zone) in the case of the EUROPEAN WEIGHTS, or for the United Kingdom (WEIGHT SPECIAL UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31) and for Germany as a whole (WEIGHT SPECIAL GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general all samples which do not belong to the respective group of samples under consideration are excluded from calculation.

The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 4) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

Eurobarometer 75.1 provides three (post-stratification) NATION WEIGHTS: W1 (WEIGHT RESULT FROM TARGET) for separate analysis or comparison of individual samples (countries or regions on sub-national level), W4 (WEIGHT SPECIAL UNITED KINGDOM) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole, and W3 (WEIGHT SPECIAL GERMANY), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. W3 and W4 exclude all other countries from calculation, but include the post-stratification factors for the United Kingdom and Germany respectively.

The EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries, of accession or candidate countries, and of Euro zone countries, representing different historical states of European integration (e.g. EU6 = six founder members) . All post-stratification factors are included.

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criteria was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices. The total household figures for input in this post-weighting procedure are listed in the technical description annexed to the basic bilingual questionnaire. The weights described above are all available in the STANDARD and in the HOUSEHOLD version, if applicable: W31 (WEIGHT RESULT FROM TRAGET), W33 (WEIGHT GERMANY), W34 (WEIGHT UNITED KINGDOM) and the EUROPEAN WEIGHTS W35 to W72, WEX_HH).

Table 2: Overview of population size weights (household weights in parenthesis)

European Weights in Eurobarometer 75.1	Function
W5 to W9 (W35 to W39), W11 (W41), W14 (W44), W22 (W52)	grouping EU member countries
W10 (W40), W13 (W43), W24 (W54)	grouping new member countries
W18 (W48)	grouping candidate/accession countries
-	grouping member + candidate/accession countries
(W42), W29 , W30, W81 (W61), W82 (W62), W84, W89 (W69), W90 (W70)	grouping (non-)Eurozone countries

The special WEIGHT QE-MODULE COUNTRIES (W91) refers to the group of countries where question module Q.E has been asked: DE-W, DE-E, GR, ES, FI, FR, IT, NL, GB, CZ, PL, BG, RO.

For more detailed information on the individual weights please see the corresponding variable description.

1.8 Data preparation

The data received by GESIS from TNS Opinion & Social were checked for completeness, missing and duplicate records, for illegal (wild) codes and for (formal) consistency of response patterns and question routing. Errors discovered by these procedures are documented or corrected, as a general rule after consulting related additional documentation (e.g. tabular reports) or the data provider. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable DDI-XML compliant documentation was created for this dataset by GESIS.

GESIS added 'Inappropriate' (INAP) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the original questionnaire was adhered to for (almost) every respondent. An additional INAP category was defined whenever a question or group of questions were not surveyed in one or more countries, or if variables refer to country specific items (e.g. regions).

Users should note that answers to multiple-response questions are (originally) represented by a series of binary 'dummy' variables (i.e. variables which take on values of one and zero only), creating separate 'dummy' variables also to explicitly represent 'Don't know', 'No answer/refusal' or other residual responses, such as 'None of the above'. The archive has recoded these residual responses in the case of uncommon minor inconsistencies with respect to and in favour of the series of substantial answers.

GESIS has recoded the missing answers (NA) represented in the original data set by blanks (system missing) to standard values. Their practically complete absence suggests that eventual cases of any not explicitly coded item non-response, might be collapsed with the DK (don't know) category.

Question text and contingency text appearing in the variable description is taken from English language version of the basic (bilingual) questionnaire (master questionnaire). Coding schemes and other documentation are based on the English language version of the basic questionnaire or on the respective SPSS data definition statements as provided by TNS Opinion & Social. In case of any discrepancy between questionnaires, SPSS definitions and data regarding the coding scheme of a variable, the archive, as a general rule, carried out any correction in agreement with the data provider.

If the documentation for country-specific questions or answer categories is provided in another languages than English, the archive documents the original language wording and supplies the English translation in brackets.

In the first dataset delivery the original EUROPEAN WEIGHTS W10, W11, W13, W14, W18, W22, W24, W29, W30, W81, W82, W83, W84, W89, W90 and WEX erroneously excluded AUSTRIA from calculation. CORRECT WEIGHT weights have subsequently been delivered by TNS and been integrated by the archive starting with dataset version 2.1.0.

The following protocol variables have also been delivered belatedly and subsequently been added by the archive starting with dataset version 2.1.0: P1 - DATE OF INTERVIEW, P2 - TIME OF INTERVIEW BEGINNING, P3 - DURATION OF INTERVIEW, P4 - N OF PERSONS PRESENT DURING THE INTERVIEW, and P5 - RESPONDENT COOPERATION.

Further specific information on data preparation, harmonization or regarding inconsistencies is noted on variable level.

1.9 Further remarks

The European Parliament (EP) question module Q.A1 to Q.A15 on 'Women in the European Union' is only available in a separate dataset [Eurobarometer 75.1EP - GESIS study ZA5526] and with a reduced number respondents for BELGIUM (n=913). Reason for this is the duration of fieldwork in Belgium and the given time frame for the official reporting. The present dataset [GESIS study ZA5479] includes all other modules (Q.A16 to Q.A21 and Q.B to Q.E) with the entire sample for Belgium (n=1025).

Module Q.C on 'E-communications' partly replicates the corresponding module Q.A of Eurobarometer 72.5.

Module Q.D on 'Internal Market' issues partly replicates Flash Eurobarometer 263.

Module Q.E on 'CO2 Capture and Storage' was ONLY surveyed in Germany, the United Kingdom, Italy, Spain, the Netherlands, Poland, Finland, France, Greece, the Czech Republic, Bulgaria and Romania.

2 Eurobarometer Series Description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

At present Eurobarometer are carried out on the general responsibility of the European Commission Directorate-General Communication, COMM.A.2 'Research and Speechwriting'.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and

over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizen oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

Table 3: EU enlargement and countries covered by Standard and Special Eurobarometer

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 4: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.20VR, 55.10VR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.30VR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.20VR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 5) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 5: Overview of Eurobarometer surveys with standard EU and trend question modules

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

3 Dataset structure and standards

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structures

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 6: ZEUS Party Family Code (slightly modified)

Category		Party Family
0	(001-099)	not affiliated / electoral alliances across "families"
1	(100-199)	Communists
2	(200-299)	Socialists
3	(300-399)	Liberals
4	(400-499)	Christian Democrats
5	(500-599)	Conservatives
6	(600-699)	Extreme Rights / Nationalists
7	(700-799)	Regionalists / Ethnic
8	(800-899)	Environmental parties
9	(900-949)	Agricultural parties
9	(950-989)	other special issue parties (e.g. Eurosceptics) and independents
	990	other (spontaneous)
	994	not voting age
	995	empty ballot (blank) or invalid vote
	996	not voted / would not vote
	997	Refused
	998	DK / DK+NA if NA not coded separately
	999	INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

Starting with Eurobarometer 74.1 an additional standardized REGION variable (REGION - NUTS CODES) is constructed, integrating all participating countries with regional units defined in accordance with the EUROSTAT Nomenclature of Territorial Units for Statistics (NUTS). For each country the lowest available NUTS subdivision level is considered, whereby the hierarchical structure always implies all higher subdivision levels. The official NUTS codes are coded verbatim in accordance with the in each case valid (applicable) NUTS version as documented in the official EUROSTAT classification history (History of NUTS). A second variable indicates the lowest coded NUTS LEVEL for each country. All original regional subdivisions and categories remain coded separately and unchanged in the country-wise P7 variables. A second variable indicates the coded NUTS LEVEL for each country. Details are documented with the respective country specific and/or integrated variable.

3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

3.3 International documentation standard (DDI)

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION - ALL SAMPLES ISO 3166). In the case of Greece the non-ISO abbreviation EL* is used in parallel, as introduced by EUROSTAT as of NUTS version 2010.

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (-1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR / EL*	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded "real" values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission's official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

CROSS-TABULATION: The absolute frequencies of the occurrence of values (<i>absolute values</i>) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies (<i>row percent</i>) refer to the valid cases (<i>n valid sum</i>), i.e. the total number of cases (<i>n sum</i>) reduced by the number of cases defined as missing data (<i>M</i>). For display and place saving reasons excluded countries or areas may be completely dropped from the table.																																																																																																																																																																																																																																																																																																																																																					
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (<i>M</i>), i.e. <i>percent</i> on the basis of all cases (<i>sum</i>) and <i>valid percent</i> on the basis of the <i>valid cases</i> .																																																																																																																																																																																																																																																																																																																																																					

5 Variable Documentation

Variable, Label

Question Text (English Language)

v1 - STUDY NUMBER - DISTRIBUTOR

ARCHIVE STUDY NUMBER – DISTRIBUTOR

Study Number of the distributing data archive.

v1

Value	Label	Missing	Count	Percent	Valid Percent
5479			26836	100.0	100.0
	Sum		26836	100.0	100.0
	Valid Cases		26836		

v2 - STUDY NUMBER - PUBLISHER

ARCHIVE STUDY NUMBER – PUBLISHER

Study number of the data archive which is publishing this data set version.

v2

Value	Label	Missing	Count	Percent	Valid Percent
5479			26836	100.0	100.0
	Sum		26836	100.0	100.0
	Valid Cases		26836		

v3 - GESIS ARCHIVE VERSION

VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

GESIS Archive Version: 6.0.0 '2013-06-14'

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

For details of the version history and for information on errata in current or former dataset versions, please consult the GESIS data catalogue entry (study description) persistently referenced by the dataset DOI (Digital Object Identifier).

v3

Value	Label	Missing	Count	Percent	Valid Percent
6.0.0 (2013-06-14)			26836	100.0	100.0
	Sum		26836	100.0	100.0
	Valid Cases		26836		

v4 - EUROBAROMETER NUMBER

EUROBAROMETER SURVEY NUMBER

The number identifying the Eurobarometer survey.

751 Eurobarometer 75.1 (February-March 2011)

v4

Value	Label	Missing	Count	Percent	Valid Percent
751	Eurobarometer 75.1 (February-March 2011)		26836	100.0	100.0
	Sum		26836	100.0	100.0
	Valid Cases		26836		

v5 - UNIQUE CASE ID (TNS COUNTRY ID + INTERVIEW ID)

UNIQUE CASE ID (TNS COUNTRY ID + TNS INTERVIEW ID)

This unique respondent identification is composed of the original TNS country code and the original TNS interview number. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 04: Greece; 05: Spain; 06: Finland; 07: France; 08: Ireland; 09: Italy; 10: Luxembourg; 11: Netherlands; 12: Austria; 13: Portugal; 14: Sweden; 20: Germany West; 21: Germany East; 22: Great Britain; 23: Northern Ireland; 31: Bulgaria; 32: Cyprus (Republic); 33: Czech Republic; 34: Estonia; 35: Hungary; 36: Latvia; 37: Lithuania; 38: Malta; 39: Poland; 40: Romania; 41: Slovakia; 42: Slovenia). The remaining digits contain the country-specific questionnaire numbers.

Note:

Actual number is coded.

v6 - NATION - ALL SAMPLES

NATION – ALL SAMPLES

All samples including separate samples for East and West Germany and for Great Britain and Northern Ireland.

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany West
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 Germany East
- 16 Finland
- 17 Sweden
- 18 Austria
- 19 Cyprus (Republic)
- 20 Czech Republic
- 21 Estonia
- 22 Hungary
- 23 Latvia
- 24 Lithuania
- 25 Malta
- 26 Poland
- 27 Slovakia
- 28 Slovenia
- 29 Bulgaria
- 30 Romania

Note:

Use of weighting factor W1 (V8) is optional.

v6

	Sum		26836	100.0	100.0
	Valid Cases		26836		

v7 - NATION - ALL SAMPLES ISO 3166

NATION ALL – ALL SAMPLES ISO 3166

All surveyed countries and regions, i.e. including separate samples for East-/West-Germany, Great Britain/Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East/West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

Note:

Use of weighting factor W1 (V8) is optional.

v8 - W1 WEIGHT RESULT FROM TARGET

W1 WEIGHT RESULT FROM TARGET

This POST-STRATIFICATION WEIGHT is based on a comparison for each sample with the respective universe description. As such in all countries, gender, age, region and size of locality are introduced in the iteration procedure carried out by the fieldwork institutes.

British and Northern Irish as well as East and West German samples are weighted separately. The weight reproduces the real number of cases for each country. In terms of its general function it corresponds to former NATION WEIGHT II (until EUROBAROMETER 31).

v9 - NATION - UNITED KINGDOM

NATION – UNITED KINGDOM

Great Britain and Northern Ireland are coded together.

0 Other

1 United Kingdom

Note:

Use of weighting factor W4 (V10) is mandatory.

v10 - W4 WEIGHT UNITED KINGDOM

W4 WEIGHT UNITED KINGDOM

This POPULATION SIZE WEIGHT adjusts the British and the Northern Irish (sub-national) samples to their share in the total population aged 15 and over in the United Kingdom. It must be applied whenever the United Kingdom is to be analyzed as a whole. The post-stratification weighting factors are included for both samples. All other samples are excluded from analysis. In terms of its general function the weight corresponds to former NATION WEIGHT I (until EUROBAROMETER 31).

v11 - NATION - UNITED GERMANY

NATION – UNITED GERMANY

East and West Germany are coded together.

- 0 Other
- 1 Germany

Note:

Use of weighting factor W3 (V12) is mandatory.

v24 - W10 WEIGHT EU NMS 3

W10 WEIGHT EU NMS 3

This POPULATION SIZE WEIGHT only refers to the three new members as of January 1995: Finland, Sweden, and Austria. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EU NMS 3 must be applied whenever these three countries are to be analyzed altogether as a group.

v25 - NATION GROUP EU15

NATION GROUP EU15

NATION GROUP EU15 adds Austria, Finland, and Sweden to the EURO 12+ countries, new members as of January 1995.

0 Other

1 EU15

Note:

Use of weighting factor W11 (V26) is mandatory.

v38 - W29 WEIGHT EURO ZONE 2008

W29 WEIGHT EURO ZONE 2008

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2008. These are 15 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EURO ZONE 2008 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

v39 - NATION GROUP NON EURO ZONE 2008

NATION GROUP NON EURO ZONE 2008

NATION GROUP NON EURO ZONE 2008 refers to the group of countries which did not introduce the EURO up to January 1, 2008 (Denmark, United Kingdom, Sweden, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Slovakia, Bulgaria, Romania).

v52 - W91 WEIGHT QE-MODULE COUNTRIES

W91 WEIGHT QE-MODULE COUNTRIES

This POPULATION SIZE WEIGHT separates the group of countries (France, Netherlands, Germany, Italy, United Kingdom, Greece, Spain, Finland, Czech Republic, Poland, Bulgaria, and Romania) which participated in question module E on Carbon capture and storage. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT QE-MODULE COUNTRIES must be applied whenever these countries are to be analyzed altogether as a group.

v53 - WEX WEIGHT EXTRA POPULATION 15+

WEX WEIGHT EXTRA POPULATION 15+

WEIGHT EXTRA extrapolates the actual universe (population aged 15 or more) for each country (sample), i.e. this weight variable integrates all other available weights, but does not reproduce the number of cases in the data set.

v54 - W31 HH WEIGHT RESULT FROM TARGET

W31 HH WEIGHT RESULT FROM TARGET – HOUSEHOLD WEIGHT

This POST-STRATIFICATION WEIGHT is based on a comparison for each sample with the respective universe description in terms of households. British and Northern Irish as well as East and West German samples are weighted separately.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v55 - W34 HH WEIGHT UNITED KINGDOM

W34 HH WEIGHT UNITED KINGDOM – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT adjusts the British and the Northern Irish (sub-national) samples to their share in the total population aged 15 and over in the United Kingdom. It must be applied whenever the United Kingdom is to be analyzed as a whole. All other samples are excluded from analysis.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v56 - W33 HH WEIGHT GERMANY

W33 HH WEIGHT GERMANY – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT adjusts the East and the West German (sub-national) samples to their share in the total population aged 15 and over, of the united Germany. It must be applied whenever Germany is to be analyzed as a whole. All other samples are excluded from analysis.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v57 - W35 HH WEIGHT EU6

W35 HH WEIGHT EU6 - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT refers to the six EC founder members: France, Belgium, Netherlands, West Germany, Italy, and Luxembourg. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. WEIGHT EU6 must be applied whenever these six EC founder countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v58 - W36 HH WEIGHT EU9

W36 HH WEIGHT EU9 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT adds Denmark, Ireland, Great Britain and Northern Ireland to the EU6 countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. WEIGHT EU9 must be applied whenever these nine countries as of the 1973 enlargement are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v59 - W37 HH WEIGHT EU10

W37 HH WEIGHT EU10 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT adds Greece to the EU9 countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. WEIGHT EU10 must be applied whenever these ten countries as of the 1981 enlargement are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v60 - W38 HH WEIGHT EU12

W38 HH WEIGHT EU12 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT adds Spain and Portugal to the EU10 countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. WEIGHT EU12 must be applied whenever these twelve countries as of the 1986 enlargement are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v61 - W39 HH WEIGHT EURO12+

W39 HH WEIGHT EU12+ – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT equals WEIGHT EU12 but in addition including East Germany (former German Democratic Republic) after the unification of Germany on October 3, 1990 (Eurobarometer 34). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. WEIGHT EU12+ must be applied whenever these twelve member countries are to be analyzed altogether as a group including the Eastern part of Germany (new German federal states).

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v62 - W40 HH WEIGHT EU NMS 3

W40 HH WEIGHT EU NMS 3 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT only refers to the three new members as of January 1995: Finland, Sweden, and Austria. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. All other samples are excluded from calculation. WEIGHT EU NMS 3 must be applied whenever these three countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v63 - W41 HH WEIGHT EU15

W41 HH WEIGHT EU15 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT adds Austria, Finland, and Sweden to the EU12+ countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. WEIGHT EU15 must be applied whenever these 15 countries as of the 1995 enlargement are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v64 - W42 HH WEIGHT EURO ZONE 2007

W42 HH WEIGHT EURO ZONE 2007 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2007. These are 13 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), and Slovenia (introduction as of January 1, 2007). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. WEIGHT EURO ZONE 2007 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v65 - W43 HH WEIGHT EU NMS 10

W43 HH WEIGHT EU NMS 10 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT only refers to the group of the ten new members as of the enlargement in 2004: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia and Slovenia. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. All other samples are excluded from calculation. WEIGHT EU NMS 10 must be applied whenever these ten countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v66 - W44 HH WEIGHT EU25

W44 HH WEIGHT EU25 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT adds Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia and Slovenia to the EU15 countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) group of countries. All other samples are excluded from calculation. WEIGHT EU25 must be applied whenever these 25 countries as of the 2004 enlargement are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v67 - W48 HH WEIGHT AC (BG RO)

W48 WEIGHT AC (BG RO) – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT refers to Bulgaria and Romania. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of future EU accession countries. All other countries are excluded from calculation. WEIGHT AC must be applied whenever these two countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v68 - W52 HH WEIGHT EU27

W52 HH WEIGHT EU27 – HOUSEHOLD WEIGHT

WEIGHT EU27 includes all 25 member countries after the 2004 enlargement, plus the remaining Accession Countries Bulgaria and Romania. This POPULATION SIZE WEIGHT adjusts each national sample in proportion to its share in the total population aged 15 and over, of the European Union plus Bulgaria and Romania. It should be used whenever all 27 countries participating in this wave are to be analysed as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v69 - W54 HH WEIGHT EU NMS 12

W54 HH WEIGHT EU NMS 12 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT refers to the group of the 12 new member countries as of the enlargement in January 2007: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia, Bulgaria and Romania. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. All other samples are excluded from calculation. WEIGHT EU NMS 12 must be applied whenever these 12 countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v70 - W61 HH WEIGHT EURO ZONE 2009

W61 HH WEIGHT EURO ZONE 2009 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2009. These are 16 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008), and Slovakia (introduction as of January 1, 2009). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EURO ZONE 2009 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v71 - W62 HH WEIGHT NON EURO ZONE 2009

W62 HH WEIGHT NON EURO ZONE 2009 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT separates the group of countries (Denmark, United Kingdom, Sweden, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Bulgaria, Romania) which did not introduce the EURO up to January 1, 2009. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT NON EURO ZONE 2009 must be applied whenever these countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v72 - W69 HH WEIGHT EURO ZONE 2011

W69 HH WEIGHT EURO ZONE 2011 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2011. These are 17 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008), Slovakia (introduction as of January 1, 2009), and Estonia (introduction as of January 1, 2011). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EURO ZONE 2011 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v73 - W70 HH WEIGHT NON EURO ZONE 2011

W70 HH WEIGHT NON EURO ZONE 2011 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT separates the group of countries (Denmark, United Kingdom, Sweden, Czech Republic, Hungary, Latvia, Lithuania, Poland, Bulgaria, Romania) which did not introduce the EURO up to January 1, 2011. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT NON EURO ZONE 2011 must be applied whenever these countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v74 - WEX HH WEIGHT EXTRA POPULATION 15+

WEX HH WEIGHT EXTRA POPULATION 15+ – HOUSEHOLD WEIGHT

WEIGHT EXTRA extrapolates the actual universe (population aged 15 or more) for each country (sample), i.e. this weight variable integrates all other available weights, but does not reproduce the number of cases in the data set.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v102 - Q1 NATIONALITY OTHER COUNTRIES

Q.1

What is your nationality? Please tell me the country(ies) that applies(y).

(MULTIPLE ANSWERS POSSIBLE)

(IF "OTHER COUNTRIES" or "DK" CLOSE INTERVIEW)

Q.1_28 Other countries

0 Not mentioned

1 Mentioned

Note:

According to the interviewer instruction the interview is supposed to be closed for respondents answering only "other countries" or "don't know / no answer" in Q.1. However, three respondents from the Netherlands coded '1' (mentioned) for "other countries" are included in the survey without indicating any of the nationalities provided in question Q.1.

v116 - QA18 ENERGY BILL REDUCTION: EASY PROVIDER CHANGE

Q.A18

According to you as an energy consumer, which two of the following measures would allow you to decrease your energy bills?

(SHOW CARD – READ OUT – MAX. 2 ANSWERS)

Q.A18_1 Creating the conditions for different energy providers to compete and giving the possibility for consumers to easily change their energy provider

v117 - QA18 ENERGY BILL REDUCTION: SMART ENERGY METERS

Q.A18

According to you as an energy consumer, which two of the following measures would allow you to decrease your energy bills?

(SHOW CARD – READ OUT – MAX. 2 ANSWERS)

Q.A18_2 Widespread the installation of “smart” energy meters in each household, meaning energy meters that allow for more efficient use of the energy by using energy when it is cheaper, permitting users to regulate their energy consumption (household devices, heating from a distance, etc.)

v122 - QA19A EU ENERGY NETWORK ADVANTAGES - 1ST

Q.A19A

Because of the existence of 27 national networks, the EU does not have an integrated energy network According to you, which would be the main advantages of putting in place such a network? Firstly?

(SHOW CARD – READ OUT – ONE ANSWER ONLY)

- 1 Safer delivery of energy
- 2 Decrease in energy costs
- 3 Better use of varying types of energy, particularly use of renewables
- 4 Increased solidarity among the EU Member States
- 5 Greater capacity for the EU to negotiate major contracts with countries outside its borders or with regional networks as the Mediterranean or Baltic networks
- 6 Other (SPONTANEOUS)

v140 - QB2 EU ADMINISTR PERFORM: EFFECTIVENESS

Q.B2

Based on what you know and using a scale from 1 to 10, how would you judge the performance of the EU administration in each of the following areas? '1' means that the EU administration's performance in a specific area is "not at all satisfactory" and '10' means that its performance is "very satisfactory".

v141 - QB2 EU ADMINISTR PERFORM: SERVICE MINDEDNESS

Q.B2

Based on what you know and using a scale from 1 to 10, how would you judge the performance of the EU administration in each of the following areas? '1' means that the EU administration's performance in a specific area is "not at all satisfactory" and '10' means that its performance is "very satisfactory".

v142 - QB2 EU ADMINISTR PERFORM: TRANSPARENCY

Q.B2

Based on what you know and using a scale from 1 to 10, how would you judge the performance of the EU administration in each of the following areas? '1' means that the EU administration's performance in a specific area is "not at all satisfactory" and '10' means that its performance is "very satisfactory".

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE – READ OUT)

v177 - QC2 MOBILE PHONES HH - PRE-PAID (REC)

Q.C2 MOBILE PHONE ACCESS ON PRE-PAID ARRANGEMENT (HH) – RECODED

- 0 None
- 1 Box 1
- 2 Box 2
- 3 Box 3
- 4 4 or more
- 8 DK

Derivation:

This variable groups answers to question Q.C2_2.

Note:

See Q.C2_2 (V176) for complete question text.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V54 to V74.

v180 - QC2R MOBILE PHONES HH (REC)

Q.C2R MOBILE PHONES HOUSEHOLD – RECODED

- 1 Mobile phone access on contract
- 2 Mobile phone access on pre-paid
- 3 Mobile phone access on both
- 4 Without mobile phone access

Derivation:

Respondents coded 1 to 9 in both V174 and V176 are coded '3' ("Mobile phone access on both"). Respondents coded '0' ("None") or '11' ("DK") in both V174 and V176 are summarized in category '4' ("Without mobile phone access").

Note:

See V174, V176, and V178 for complete question text.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V54 to V74.

v185 - QC3R MOBILE PHONE SATISFACTION INDEX

Q.C3R MOBILE PHONE SATISFACTION INDEX

- 0 DK/NA
- 1 -- low
- 2 -
- 3 +
- 4 ++ high
- 9 Inap. No mobile phone (not coded 1 in V162)

Derivation:

This variable summarizes answers to question Q.C3 (V181, V182 and V183).

Respondents coded 3 or 4 in V181 and V182, and coded 1 or 2 in V183 are coded 1 ("-- low") in the index variable. If for ONE of the derivation variables the opposite is true (or V181 coded 1 or 2, or V182 coded 1 or 2, or V183 coded 3 or 4) respondents are coded 2 ("-") in the index variable. Respondents coded 1 or 2 in V181 and V182, and coded 3 or 4 in V183 are coded 4 ("++ high") in the index variable. If for ONE of the derivation variables the opposite is true (or V181 coded 3 or 4, or V182 coded 3 or 4, or V183 coded 1 or 2) respondents are coded 3 ("+") in the index variable. Respondents coded 5 ("not applicable") or 6 ("DK") in at least one of the derivation variables (V181, V182 or V183 coded 5 or 6) respondents are coded 0 ("DK/NA") in the index variable. Respondents coded 9 ("INAP") in the derivation variables (mobile phone subscription does not allow internet access) are also coded 9 in the index variable.

Note:

Agreement (codes 1 or 2) to V181 and V182 is considered as an indicator for satisfaction, whereas this is true for disagreement (codes 3 or 4) to V183. V184 (Q.C3_4) refers to mobile INTERNET access and is not considered for the mobile PHONE satisfaction index.

See Q.C3 (V181 to V183) for complete question text.

v186 - QC4 TV RECEPTION VIA: AERIAL

Q.C4

ASK Q.C4 IF "TELEVISION IN THE HOUSEHOLD", CODE 1 IN D.46 – OTHERS GO TO Q.C5

Does your household receive the television via...?

(SHOW CARD – READ OUT – MULTIPLE ANSWERS POSSIBLE)

Q.C4_1 An aerial (on the roof or on the top of the TV set)

0 Not mentioned

1 Mentioned

9 Inap. No television in household (not coded 1 in V163)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V54 to V74.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

ASK Q.C4 IF "TELEVISION IN THE HOUSEHOLD", CODE 1 IN D.46 – OTHERS GO TO Q.C5

Does your household receive the television via...?

(SHOW CARD – READ OUT – MULTIPLE ANSWERS POSSIBLE)

Q.C4_4 A cable TV network + decoder (digital TV)

0 Not mentioned

1 Mentioned

9 Inap. No television in household (not coded 1 in V163)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V54 to V74.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v195 - QC5 INTERNET ACCESS HH: CABLE TV NETWORK

Q.C5

ASK Q.C5 TO Q.C8 IF "INTERNET IN THE HOUSEHOLD", CODES 5 IN D.46 – OTHERS GO TO Q.C9

How does your household access the Internet from home?

(SHOW CARD – READ OUT – MULTIPLE ANSWERS POSSIBLE)

Q.C5_3 Via the cable TV network using a cable modem, box or router (Broadband Internet)

0 Not mentioned

1 Mentioned

9 Inap. No Internet connection at home (not coded 1 in V167)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V54 to V74.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v201 - QC5 INTERNET ACCESS HH: DK

Q.C5

ASK Q.C5 TO Q.C8 IF "INTERNET IN THE HOUSEHOLD", CODES 5 IN D.46 – OTHERS GO TO Q.C9

How does your household access the Internet from home?

(SHOW CARD – READ OUT – MULTIPLE ANSWERS POSSIBLE)

Q.C5_9 DK

0 Not mentioned

1 Mentioned

9 Inap. No Internet connection at home (not coded 1 in V167)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V54 to V74.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v202 - QC6 INTERNET USE FOR PHONE CALLS IN HH

ASK Q.C5 TO Q.C8 IF "INTERNET IN THE HOUSEHOLD", CODES 5 IN D.46 – OTHERS GO TO Q.C9

Q.C6

Does any household member, including yourself, use a PC or a wifi connected device, at home to make phone calls over the Internet?

(READ OUT – ONE ANSWER ONLY)

- 1 No
- 2 Yes, you (or a member of your household) call users who have subscribed to the same Internet phone service as you, for free (INT.: Internet call sites such as SKYPE)
- 3 Yes, you (or a member of your household) make cheap international calls to landlines or mobile phones by mean of an Internet phone service
- 4 Yes, both options (SPONTANEOUS)
- 5 DK
- 9 Inap. No Internet connection at home (not coded 1 in V167)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V54 to V74.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v205 - QC7 INTERNET: PROVIDER SUPPORT IS USEFUL

ASK Q.C5 TO Q.C8 IF "INTERNET IN THE HOUSEHOLD", CODES 5 IN D.46 – OTHERS GO TO Q.C9

Q.C7

For each of the following, please tell me whether you totally agree, tend to agree, tend to disagree or totally disagree.

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE – READ OUT)

Q.C7_3 In case of problems, your Internet provider gives you a useful answer

- 1 Totally agree
- 2 Tend to agree
- 3 Tend to disagree
- 4 Totally disagree
- 5 Not applicable (SPONTANEOUS)
- 6 DK
- 9 Inap. No Internet connection at home (not coded 1 in V167)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v206 - QC7R INTERNET SATISFACTION INDEX

Q.C7R INTERNET SATISFACTION INDEX

- 0 DK/NA
- 1 -- low
- 2 -
- 3 +
- 4 ++ high
- 9 Inap. No Internet connection at home (not coded 1 in V167)

Derivation:

This variable summarizes answers to question Q.C7 (V203, V204 and V205).

Respondents coded 3 or 4 in V203, V204 and V205 are coded 1 ("-- low") in the index variable. If for ONE of the derivation variables the opposite is true (or V203 or V204 or V205 coded 1 or 2) respondents are coded 2 ("-") in the index variable.

Respondents coded 3 or 4 in V203, V204 and V205 are coded 4 ("++ high") in the index variable. If for ONE of the derivation variables the opposite is true (or V203 or V204 or V205 coded 1 or 2) respondents are coded 3 ("+") in the index variable.

Respondents coded 5 ("not applicable") or 6 ("DK") in at least one of the derivation variables (V203, V204 or V205 coded 5 or 6) respondents are coded 0 ("DK/NA") in the index variable. Respondents coded 9 ("INAP") in the derivation variables (no internet connection at home) are also coded 9 in the index variable.

Note:

Disagreement (codes 3 or 4) to the Q.C7 items (V203, V204, V205) is considered as an indicator for satisfaction.

See Q.C7 (V203 to V205) for complete question text.

v207 - QC8 INTERNET PROV CHANGE: NO/NEVER

ASK Q.C5 TO Q.C8 IF "INTERNET IN THE HOUSEHOLD", CODES 5 IN D.46 – OTHERS GO TO Q.C9

Q.C8

Have you or someone in your household ever considered changing Internet service provider?
(SHOW CARD – READ OUT – ROTATE ITEMS 2 TO 11 – MULTIPLE ANSWERS POSSIBLE)

Q.C8_1 No, you and the members of your household never considered it

- 0 Not mentioned
- 1 Mentioned
- 9 Inap. No Internet connection at home (not coded 1 in V167)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V54 to V74.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v210 - QC8 INTERNET PROV CHANGE: CHANGED

ASK Q.C5 TO Q.C8 IF "INTERNET IN THE HOUSEHOLD", CODES 5 IN D.46 – OTHERS GO TO Q.C9

Q.C8

Have you or someone in your household ever considered changing Internet service provider?
(SHOW CARD – READ OUT – ROTATE ITEMS 2 TO 11 – MULTIPLE ANSWERS POSSIBLE)

Q.C8_4 Yes, you or someone in your household has already changed

- 0 Not mentioned
- 1 Mentioned
- 9 Inap. No Internet connection at home (not coded 1 in V167)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V54 to V74.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v215 - QC8 INTERNET PROV CHANGE: DISTRUST

ASK Q.C5 TO Q.C8 IF "INTERNET IN THE HOUSEHOLD", CODES 5 IN D.46 – OTHERS GO TO Q.C9

Q.C8

Have you or someone in your household ever considered changing Internet service provider?
(SHOW CARD – READ OUT – ROTATE ITEMS 2 TO 11 – MULTIPLE ANSWERS POSSIBLE)

Q.C8_9 Yes, there are more interesting offers from other providers but you and the members of your household do not trust them

0 Not mentioned

1 Mentioned

9 Inap. No Internet connection at home (not coded 1 in V167)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V54 to V74.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v221 - QC9 INTERNET NO ACCESS: LACK OF KNOWLEDGE

Q.C9

ASK Q.C9 IF "NO INTERNET ACCESS AT HOME", NO CODE 5 IN D.46 – OTHERS GO TO Q.C10

You said you do not have Internet access at home. Among the following list, which ones best explain why your household does not have access to the Internet?

(SHOW CARD – READ OUT – MULTIPLE ANSWERS POSSIBLE)

Q.C9_2 You and the members of your household do not know exactly what the Internet is

0 Not mentioned

1 Mentioned

9 Inap. Internet connection at home (coded 1 in V167)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V54 to V74.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v227 - QC9 INTERNET NO ACCESS: SUBSCRIPTION COSTS

Q.C9

ASK Q.C9 IF "NO INTERNET ACCESS AT HOME", NO CODE 5 IN D.46 – OTHERS GO TO Q.C10

You said you do not have Internet access at home. Among the following list, which ones best explain why your household does not have access to the Internet?

(SHOW CARD – READ OUT – MULTIPLE ANSWERS POSSIBLE)

Q.C9_8 The monthly subscription cost is too high

0 Not mentioned

1 Mentioned

9 Inap. Internet connection at home (coded 1 in V167)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V54 to V74.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v233 - QC10 COMMUNICTN PACKAGE HH: FIXED PHONE

Q.C10

ASK ALL

By bundle, we mean a combined package offering more than one communication service from the same provider at a single price. Does your household buy two or more of the following services as part of a bundle?

(READ OUT – MIN. 2 ANSWERS)

Q.C10_2 Fixed telephony

0 Not mentioned

1 Mentioned

Derivation:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V54 to V74.

v239 - QC10_TOT COMMUNICTN PACKAGE HH - COMBINATION

Q.C10R TOTAL COMMUNICATION PACKAGE HOUSEHOLD - COMBINATION – RECODED

- 1 1+2+3+4
- 2 1+2+3
- 3 1+2+4
- 4 1+3+4
- 5 2+3+4
- 6 1+2
- 7 1+3
- 8 1+4
- 9 2+3
- 10 2+4
- 11 3+4
- 99 Inap. None, Other, or DK in Q.C10 (coded 1 in V236 to V238)

Derivation:

This variable summarizes answers to Q.C10 by categorizing the different combinations of services (coded 1 in V232 to V235) contracted in communication packages. All "other", "none" and "DK" answers (coded 1 in V236 to V238) are coded 99 (DK/NA).

Note:

See Q.C10 (V232 to V238) for complete question text.

This variable informs about the different composition of communication packages in a household. The numbering of the services are based on the numbering of the subquestions (1 "TV channels", 2 "Fixed phones", 3 "Mobile phones", 4 "Internet").

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V54 to V74.

v249 - QC13 BUNDLE PROVIDER CHANGE: NOT CONSIDERED

Q.C13

ASK Q.C13 IF "HAVE A BUNDLE", NO CODE 5-7 IN Q.C10 – OTHERS GO TO Q.C14

Have you or someone in your household ever considered changing your bundle provider?

(SHOW CARD – READ OUT – ROTATE ITEMS 2 TO 10 – MULTIPLE ANSWERS POSSIBLE)

Q.C13_1 No, you and the members of your household never considered it

0 Not mentioned

1 Mentioned

9 Inap. Not have a bundle (not coded any 1 in V232 to V235)

Note:

Three respondents from Ireland that are coded '1' (mentioned) for "Other" in V237 without indicating any other item also answered Q.C13.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V54 to V74.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v250 - QC13 BUNDLE PROVIDER CHANGE: SATISFIED

Q.C13

ASK Q.C13 IF "HAVE A BUNDLE", NO CODE 5-7 IN Q.C10 – OTHERS GO TO Q.C14

Have you or someone in your household ever considered changing your bundle provider?

(SHOW CARD – READ OUT – ROTATE ITEMS 2 TO 10 – MULTIPLE ANSWERS POSSIBLE)

Q.C13_2 Yes, but you and the members of your household are satisfied with the current service you get

0 Not mentioned

1 Mentioned

9 Inap. Not have a bundle (not coded any 1 in V232 to V235)

Note:

Three respondents from Ireland that are coded '1' (mentioned) for "Other" in V237 without indicating any other item also answered Q.C13.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V54 to V74.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v255 - QC13 BUNDLE PROVIDER CHANGE: RISK TO PAY TWICE

Q.C13

ASK Q.C13 IF "HAVE A BUNDLE", NO CODE 5-7 IN Q.C10 – OTHERS GO TO Q.C14

Have you or someone in your household ever considered changing your bundle provider?

(SHOW CARD – READ OUT – ROTATE ITEMS 2 TO 10 – MULTIPLE ANSWERS POSSIBLE)

Q.C13_7 Yes, but you don't want to take the risk of having to pay more than one provider during the switching process

0 Not mentioned

1 Mentioned

9 Inap. Not have a bundle (not coded any 1 in V232 to V235)

Note:

Three respondents from Ireland that are coded '1' (mentioned) for "Other" in V237 without indicating any other item also answered Q.C13.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V54 to V74.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v283 - QD2A WORK ABROAD IN EU - EVER DID

Q.D2A

Have you worked or do you currently work in an EU Member State other than your "home country" (i.e. where you lived most of your life)? By working, we mean working for a longer term, at least 6 months or more, for a company or as a self-employed in the other country. This excludes business trips, or short term deployments from your company to another EU Member State.

(READ OUT – ONE ANSWER ONLY)

- 1 Yes, in the past
- 2 Yes, currently
- 3 No
- 4 DK

v286 - QD3B WORK ABROAD - PRACTICAL DIFFICULTY 2ND

[Q.D3A

In relation to working in another EU Member State, what do you or would you consider as the main practical difficulty for you?

Firstly?]

Q.D3B

And secondly?

- 1 Language barriers
- 2 Cultural differences
- 3 Bureaucracy involved
- 4 Family considerations
- 5 Tax implications
- 6 You cannot afford to live in another EU Member State
- 7 Your qualifications will not be recognised and you will not find a corresponding job
- 8 Lack of information about the opportunities
- 9 Difficulty in finding an appropriate job
- 10 You are concerned that social security standards (such as pensions, healthcare or unemployment) are lower
- 11 Other
- 12 None
- 13 DK
- 99 Inap. Not mentioned any difficulty (not coded 1 to 11 in V285)

Comparability:

v342 - QD15 PUBLIC TENDER AWARD - MOST IMPORTANT FACTOR

Q.D15

Imagine that public authorities plan to spend taxpayers' money on an important project (for example building a hospital, a highway or a sewage-treatment plant) close to your home town. According to you, what should be the deciding factor when awarding contracts for such a project? The most important factor should be that...

(SHOW CARD – READ OUT – ROTATE – ONE ANSWER ONLY)

- 1 The company to which the contract is awarded is (NATIONALITY)
- 2 The cheapest offer is chosen
- 3 The best offer is chosen across a mix of characteristics including the price and, for example, the quality, environmental considerations, social aspects and/or innovative aspects
- 4 The contract is awarded without delays so the project can be started as quickly as possible

Q.D16

Still thinking about the same situation, when public authorities decide on how to spend the taxpayers' money, imagine they don't choose the cheapest offer. In which cases do you think that public authorities can accept a more expensive offer? Public authorities can accept a more expensive offer as long as it ensures that...

v393 - QE4R KNOWLEDGE - WHAT IS CO2 (REC)

Q.E4R KNOWLEDGE – WHAT IS CO2 – RECODED

- 1 Correct answer
- 2 Acceptable answers
- 3 Wrong answers
- 4 Other
- 5 DK
- 9 Inap. (not 1, 3 to 5, 9 to 12, 14, 16, 20, 26 or 29 to 30 in V6)

Derivation:

This variable groups answers to question Q.E4.

Note:

See Q.E4 (V392) for complete question text.

Correct answer is "Carbon dioxide" (code 2 in V392). "Greenhouse gas", "A gas", "A chemical", and "Something to do with climate change but don't know what" (codes 3, 4, 5 or 10 in V392) are considered as acceptable answers. Wrong answers are "Carbon monoxide", "Water", "Carbon", "Ozone", and "Methane" (codes 1, 6, 7, 8 or 9 in V392).

For question module E "Carbon capture and storage" (V368 to V513) only part of the countries (France, Netherlands, Germany, Italy, United Kingdom, Greece, Spain, Finland, Czech Republic, Poland, Bulgaria, and Romania) participated. The POPULATION SIZE WEIGHT W91 separates this group of countries and adapts the samples regarding population size and universe description. For more information see V52.

v403 - QE5R KNOWLEDGE CO2: ONLY POSITIVE

Q.E5R KNOWLEDGE CO2: ONLY POSITIVE ASSOCIATIONS

- 0 Not only positive statements mentioned
- 1 Only positive statements
- 9 Inap. BE, LU, DK, IE, PT, SE, AT, CY, EE, HU, LV, LT, MT, SK, SI (not 1, 3 to 5, 9 to 12, 14, 16, 20, 26 or 29 to 30 in V6)

Derivation:

This variable summarizes positive responses to question Q.E5 (statements applying to carbon dioxide). Respondents which exclusively mention "It is safe to breathe" (code 1 in V395), "It is harmless" (code 1 in v397) or "other" (code 1 in V400), are coded 1. All other responses or response combinations are coded 0.

Note:

See Q.E5 (V394 to V402) for complete question text.

"It is safe to breathe" (code 1 in V395) and "It is harmless" (code 1 in v397) are considered as positive statements. (TNS Opinion & Social: Special Eurobarometer 364 / Wave 75.1: Public Awareness and Acceptance of CO2 capture and storage. Brussels, May 2011. page 46)

For question module E "Carbon capture and storage" (V368 to V513) only part of the countries (France, Netherlands, Germany, Italy, United Kingdom, Greece, Spain, Finland, Czech Republic, Poland, Bulgaria, and Romania) participated. The POPULATION SIZE WEIGHT W91 separates this group of countries and adapts the samples regarding population size and universe description. For more information see V52.

v404 - QE5R KNOWLEDGE CO2: ONLY NEGATIVE

Q.E5R KNOWLEDGE CO2: ONLY NEGATIVE ASSOCIATIONS

0 Not only negative statements mentioned

1 Only negative statements

9 Inap. BE, LU, DK, IE, PT, SE, AT, CY, EE, HU, LV, LT, MT, SK, SI (not 1, 3 to 5, 9 to 12, 14, 16, 20, 26 or 29 to 30 in V6)

Derivation:

This variable summarizes negative responses to question Q.E5 (statements applying to carbon dioxide). Respondents which exclusively mention "It is flammable" (code 1 in V394), "It is unhealthy" (code 1 in V396), "It is explosive" (code 1 in V398), "It is a water pollutant" (code 1 in V399) or "other" (code 1 in V400), are coded 1 in accordance with the original TNS data. All other responses or response combinations are coded 0.

Note:

See Q.E5 (V394 to V402) for complete question text.

"It is flammable" (code 1 in V394), "It is unhealthy" (code 1 in V396), "It is explosive" (code 1 in V398), and "It is a water pollutant" (code 1 in V399) are considered as negative statements. (TNS Opinion & Social: Special Eurobarometer 364 / Wave 75.1: Public Awareness and Acceptance of CO2 capture and storage. Brussels, May 2011. page 46)

For question module E "Carbon capture and storage" (V368 to V513) only part of the countries (France, Netherlands, Germany, Italy, United Kingdom, Greece, Spain, Finland, Czech Republic, Poland, Bulgaria, and Romania) participated. The POPULATION SIZE WEIGHT W91 separates this group of countries and adapts the samples regarding population size and universe description. For more information see V52.

v405 - QE5R KNOWLEDGE CO2: APPLYING

Q.E5R KNOWLEDGE CO2: APPLYING

- 0 No characteristic specified that applies
- 1 Statements that apply
- 8 Not any characteristic specified (coded 0 in each variable V394 to V399)
- 9 Inap. BE, LU, DK, IE, PT, SE, AT, CY, EE, HU, LV, LT, MT, SK, SI (not coded 1, 3 to 5, 9 to 12, 14, 16, 20, 26 or 29 to 30 in V6)

Derivation:

This variable groups answers to question Q.E5 (characteristics of carbon dioxide) as far as considered as applying: "It is safe to breathe" (code 1 in V395), "It is unhealthy" (code 1 in V396), and "It is a water pollutant" (code 1 in V399). Respondents who do not mention any of the specified characteristics are coded 8 ("Not any characteristic specified"). Respondents which do not mention any characteristic that applies or answering "None" (code 1 in V401) or "DK" (code 1 in V401) are coded 0 ("No characteristic that applies specified").

Note:

The question wording (Q.E5) does not refer to ordinary concentration levels only, as does the official EU-Report in the following conclusion: "In ordinary atmospheric concentration levels, CO2 is safe to breathe, healthy and harmless, and not a water pollutant." (TNS Opinion & Social: Special Eurobarometer 364 / Wave 75.1: Public Awareness and Acceptance of CO2 capture and storage. Brussels, May 2011. page 45)

For question module E "Carbon capture and storage" (V368 to V513) only part of the countries (France, Netherlands, Germany, Italy, United Kingdom, Greece, Spain, Finland, Czech Republic, Poland, Bulgaria, and Romania) participated. The POPULATION SIZE WEIGHT W91 separates this group of countries and adapts the samples regarding population size and universe description. For more information see V52.

v407 - QE6 CO2 EMISSIONS - MAIN SOURCE GLOBALLY

ASK Q.E ONLY IN DE, UK, IT, ES, NL, PL, FI, FR, GR, CZ, BG AND RO

Q.E6

In your opinion, which of the following produces the most carbon dioxide (CO2) globally?

(SHOW CARD – READ OUT – ROTATE – ONE ANSWER ONLY)

- 1 Power plants that burn fossil fuels
- 2 Farming / Agriculture
- 3 Factories
- 4 Passenger or freight transport
- 5 Heating our homes
- 6 DK
- 9 Inap. BE, LU, DK, IE, PT, SE, AT, CY, EE, HU, LV, LT, MT, SK, SI (not 1, 3 to 5, 9 to 12, 14, 16, 20, 26 or 29 to 30 in V6)

Note:

Category 2 is specified as "Farming" in the English language basic questionnaire and as "Agriculture" in the UK field questionnaire.

For question module E "Carbon capture and storage" (V368 to V513) only part of the countries (France, Netherlands, Germany, Italy, United Kingdom, Greece, Spain, Finland, Czech Republic, Poland, Bulgaria, and Romania) participated. The POPULATION SIZE WEIGHT W91 separates this group of countries and adapts the samples regarding population size and universe description. For more information see V52.

v408 - QE7 CO2 EMISSIONS - CLIMATE CHANGE IMPACT

ASK Q.E ONLY IN DE, UK, IT, ES, NL, PL, FI, FR, GR, CZ, BG AND RO

Q.E7

What impact do you think CO2 emissions have on climate change? Do you think it has ...?

(READ OUT – ONE ANSWER ONLY)

- 1 A very high impact
- 2 A fairly high impact
- 3 A fairly low impact
- 4 A very low impact
- 5 None (SPONTANEOUS)
- 6 DK
- 9 Inap. BE, LU, DK, IE, PT, SE, AT, CY, EE, HU, LV, LT, MT, SK, SI (not 1, 3 to 5, 9 to 12, 14, 16, 20, 26 or 29 to 30 in V6)

Note:

For question module E "Carbon capture and storage" (V368 to V513) only part of the countries (France, Netherlands, Germany, Italy, United Kingdom, Greece, Spain, Finland, Czech Republic, Poland, Bulgaria, and Romania) participated. The POPULATION SIZE WEIGHT W91 separates this group of countries and adapts the samples regarding population size and universe description. For more information see V52.

v409 - QE8A ELECTRICITY PROPORTION - COAL

ASK Q.E ONLY IN DE, UK, IT, ES, NL, PL, FI, FR, GR, CZ, BG AND RO

Q.E8A

According to you, what proportion of total electricity produced in (OUR COUNTRY) currently comes from coal?

(SHOW CARD – ONE ANSWER PER COLUMN – READ OUT)

- 1 0%
- 2 Between 1 and 10%
- 3 Between 11 and 20%
- 4 Between 21 and 30%
- 5 Between 31 and 50%
- 6 More than 50%
- 7 DK
- 9 Inap. BE, LU, DK, IE, PT, SE, AT, CY, EE, HU, LV, LT, MT, SK, SI (not 1, 3 to 5, 9 to 12, 14, 16, 20, 26 or 29 to 30 in V6)

Note:

The actual figures for electricity production differ by country. The proportion of electricity produced from coal and from renewable energy sources in each of the twelve EU countries as of 2007 is presented in the official EU-Report (TNS Opinion & Social: Special Eurobarometer 364 / Wave 75.1: Public Awareness and Acceptance of CO2 capture and storage. Brussels, May 2011. Page 60).

For question module E "Carbon capture and storage" (V368 to V513) only part of the countries (France, Netherlands, Germany, Italy, United Kingdom, Greece, Spain, Finland, Czech Republic, Poland, Bulgaria, and Romania) participated. The POPULATION SIZE WEIGHT W91 separates this group of countries and adapts the samples regarding population size and universe description. For more information see V52.

v413 - QE9 CO2 CAPTURE & STORAGE (CCS)-AWARENESS

ASK Q.E ONLY IN DE, UK, IT, ES, NL, PL, FI, FR, GR, CZ, BG AND RO

Q.E9

Have you ever heard of CO2 capture and storage, also known as carbon capture and storage or carbon capture and sequestration (CCS)?

(READ OUT – ONE ANSWER ONLY)

- 1 Yes, know what it is
- 2 Yes, but don't know what it is
- 3 No
- 4 DK
- 9 Inap. BE, LU, DK, IE, PT, SE, AT, CY, EE, HU, LV, LT, MT, SK, SI (not 1, 3 to 5, 9 to 12, 14, 16, 20, 26 or 29 to 30 in V6)

Note:

For question module E "Carbon capture and storage" (V368 to V513) only part of the countries (France, Netherlands, Germany, Italy, United Kingdom, Greece, Spain, Finland, Czech Republic, Poland, Bulgaria, and Romania) participated. The POPULATION SIZE WEIGHT W91 separates this group of countries and adapts the samples regarding population size and universe description. For more information see V52.

v427 - QE11 ENERGY PROD AWARENESS: DK

ASK Q.E ONLY IN DE, UK, IT, ES, NL, PL, FI, FR, GR, CZ, BG AND RO

Q.E11

In the context of energy production, which, if any, of the following have you heard of?

(SHOW CARD – READ OUT – MULTIPLE ANSWERS POSSIBLE)

Q.E11_13 DK

0 Not mentioned

1 Mentioned

9 Inap. BE, LU, DK, IE, PT, SE, AT, CY, EE, HU, LV, LT, MT, SK, SI (not coded 1, 3 to 5, 9 to 12, 14, 16, 20, 26 or 29 to 30 in V6)

Note:

For question module E "Carbon capture and storage" (V368 to V513) only part of the countries (France, Netherlands, Germany, Italy, United Kingdom, Greece, Spain, Finland, Czech Republic, Poland, Bulgaria, and Romania) participated. The POPULATION SIZE WEIGHT W91 separates this group of countries and adapts the samples regarding population size and universe description. For more information see V52.

v435 - QE13 CO2 CAPTURE & STORAGE - EFFECTIVITY

ASK Q.E ONLY IN DE, UK, IT, ES, NL, PL, FI, FR, GR, CZ, BG AND RO

Now let's talk specifically about carbon capture and storage or CCS. Carbon capture and storage, or CCS, is a technology for capturing the carbon dioxide produced by fossil fuel-fired power plants, i.e those burning coal, gas or oil, and some heavy industries such as steel and cement. CO2 can be stored either onshore (underground) or offshore (under the seabed) at depth of several kilometres.

Q.E13

In your opinion, taking into account all you know about CCS or Carbon capture and storage, could you tell me whether you think it could be effective or not to fight climate change?

(READ OUT – ONE ANSWER ONLY)

- 1 Very effective
- 2 Fairly effective
- 3 Not very effective
- 4 Not at all effective
- 5 DK
- 9 Inap. BE, LU, DK, IE, PT, SE, AT, CY, EE, HU, LV, LT, MT, SK, SI (not coded 1, 3 to 5, 9 to 12, 14, 16, 20, 26 or 29 to 30 in V6)

Note:

For question module E "Carbon capture and storage" (V368 to V513) only part of the countries (France, Netherlands, Germany, Italy, United Kingdom, Greece, Spain, Finland, Czech Republic, Poland, Bulgaria, and Romania) participated. 9 Inap. Not Other in Q.E15 (not coded 1 in V451)

99 Inap. BE, LU, DK, IE, PT, SE, AT, CY, EE, HU, LV, LT, MT, SK, SI (not coded 1, 3 to 5, 9 to 12, 14, 16, 20, 26 or 29 to 30 in V6)

Note:

Specifications have not been made available to the archive.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

For question module E "Carbon capture and storage" (V368 to V513) only part of the countries (France, Netherlands, Germany, Italy, United Kingdom, Greece, Spain, Finland, Czech Republic, Poland, Bulgaria, and Romania) participated. The POPULATION SIZE WEIGHT W91 separates this group of countries and adapts the samples regarding population size and universe description. For more information see V52.

9 Inap. Not Other in Q.E15 (not coded 1 in V451)

99 Inap. BE, LU, DK, IE, PT, SE, AT, CY, EE, HU, LV, LT, MT, SK, SI (not coded 1, 3 to 5, 9 to 12, 14, 16, 20, 26 or 29 to 30 in V6)

Note:

Specifications have not been made available to the archive.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

For question module E "Carbon capture and storage" (V368 to V513) only part of the countries (France, Netherlands, Germany, Italy, United Kingdom, Greece, Spain, Finland, Czech Republic, Poland, Bulgaria, and Romania) participated. The POPULATION SIZE WEIGHT W91 separates this group of countries and adapts the samples regarding population size and universe description. For more information see V52.

Q.E15BO_39 Other 39

0 Not mentioned

1 Mentioned

9 Inap. Not Other in Q.E15 (not coded 1 in V451)

99 Inap. BE, LU, DK, IE, PT, SE, AT, CY, EE, HU, LV, LT, MT, SK, SI (not coded 1, 3 to 5, 9 to 12, 14, 16, 20, 26 or 29 to 30 in V6)

Note:

Specifications have not been made available to the archive.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

For question module E "Carbon capture and storage" (V368 to V513) only part of the countries (France, Netherlands, Germany, Italy, United Kingdom, Greece, Spain, Finland, Czech Republic, Poland, Bulgaria, and Romania) participated. The POPULATION SIZE WEIGHT W91 separates this group of countries and adapts the samples regarding population size and universe description. For more information see V52.

v515 - D1 LEFT-RIGHT PLACEMENT - RECODED 3 CAT

D.1R1 LEFT-RIGHT SCALE – RECODED

- 1 (1 - 4) Left
- 2 (5 - 6) Centre
- 3 (7 -10) Right
- 9 DK/Refusal

Derivation:

This variable collapses answers to D.1 into three categories.

Note:

See D.1 for complete question text.

v517 - D7 MARITAL STATUS

D.7

Could you give me the letter which corresponds best to your own current situation?

(SHOW CARD – READ OUT – ONE ANSWER ONLY)

MARRIED OR REMARRIED

- 1 Living without children
- 2 Living with the children of this marriage
- 3 Living with the children of a previous marriage
- 4 Living with the children of this marriage and of a previous marriage

SINGLE LIVING WITH A PARTNER

- 5 Living without children
- 6 Living with the children of this union
- 7 Living with the children of a previous union
- 8 Living with the children of this union and of a previous union

SINGLE

- 9 Living without children
- 10 Living with children

DIVORCED OR SEPARATED

- 11 Living without children
- 12 Living with children

WIDOW

- 13 Living without children
- 14 Living with children

15 Other (SPONTANEOUS)

97 Refusal (SPONTANEOUS)

Note:

Original code "16" recoded to "97".

Comparability:

Last trend: EB74.3, D.7

v518 - D7 MARITAL STATUS (REC STATUS)

D.7R1 MARITAL STATUS – RECODED STATUS

- 1 (Re-)Married (coded 1 to 4 in V517)
- 2 Single living with partner (coded 5 to 8 in V517)
- 3 Single (coded 9 to 10 in V517)
- 4 Divorced or separated (coded 11 to 12 in V517)
- 5 Widow (coded 13 to 14 in V517)
- 6 Other (SPONTANEOUS)
- 7 Refusal (SPONTANEOUS)

Derivation:

This variable collapses answers to D.7 into five categories.

Note:

See D.7 for complete question text.

Comparability:

Last trend: EB74.3, D.7

v520 - D8 AGE EDUCATION

D.8

How old were you when you stopped full-time education?

(IF "STILL STUDYING", CODE '00' – IF "NO EDUCATION" CODE '01' – IF "REFUSAL" CODE '98' – IF "DK" CODE '99')

- 0 Refusal
- 2 2 years
- 65 65 years
- 97 No full-time education
- 98 Still studying
- 99 DK

Note:

Original code "00" recoded to "98".

Original code "01" recoded to "97".

Original code "98" recoded to "0".

Due to a deviant specification in the coding instruction in the Portuguese field questionnaire data for Portugal have been corrected according to the basic questionnaire.

Code "00" is recoded to "97" for Portugal.

Actual number is coded.

Comparability:

Last trend: EB74.3, D.8

v521 - D8 AGE EDUCATION - RECODED

D.8R AGE WHEN FINISHED FULL-TIME EDUCATION – RECODED

- 1 Up to 14 years
- 2 15 years
- 3 16 years
- 4 17 years
- 5 18 years
- 6 19 years
- 7 20 years
- 8 21 years
- 9 22 years and older
- 10 Still studying
- 11 No full-time education
- 97 Refusal
- 98 DK

Derivation:

This variable groups answers to question D.8.

Note:

See D.8 for complete question text.

Due to a deviant specification in the coding instruction in the Portuguese field questionnaire data for Portugal have been corrected according to the basic questionnaire.

Code "97" is recoded to "11" for Portugal.

NO QUESTION D.9

QUESTION D.10 ASKED BEFORE Q.A

v522 - D11 AGE EXACT

D.11

How old are you?

15 15 years

98 98 years

Note:

Actual number is coded.

Comparability:

Last trend: EB874.3, D.11

v523 - D11 AGE RECODED - FOUR GROUPS

D.11R1 AGE – RECODED IN FOUR GROUPS

- 1 15 - 24 years
- 2 25 - 39 years
- 3 40 - 54 years
- 4 55 years and older

Derivation:

This variable collapses answers to D.11 into four categories.

Note:

See D.11 for complete question text.

v527 - D15B OCCUPATION OF RESPONDENT - LAST JOB

D.15B

ASK D.15B IF "NOT DOING ANY PAID WORK CURRENTLY", CODES 1 to 4 in D.15A

Did you do any paid work in the past? What was your last occupation?

SELF EMPLOYED

- 1 Farmer
- 2 Fisherman
- 3 Professional (lawyer, medical practitioner, accountant, architect, etc.)
- 4 Owner of a shop, craftsmen, other self-employed person
- 5 Business proprietors, owner (full or partner) of a company

EMPLOYED

- 6 Employed professional (employed doctor, lawyer, accountant, architect)
- 7 General management, director or top management (managing directors, director general, other director)
- 8 Middle management, other management (department head, junior manager, teacher, technician)
- 9 Employed position, working mainly at a desk
- 10 Employed position, not at a desk but travelling (salesmen, driver, etc.)
- 11 Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, etc.)
- 12 Supervisor
- 13 Skilled manual worker
- 14 Other (unskilled) manual worker, servant

15 Never did any paid work

99 Inap. Currently doing paid work (not 1 to 4 in V525)

Note:

In accordance with former waves coding has been (correctly) shifted compared to the questionnaire.

NO QUESTIONS D.16 TO D.24

Comparability:

Last trend: EB74.3, D.15B

v528 - D15B OCCUPATION OF RESPONDENT - LAST JOB (REC)

D.15BR OCCUPATION OF RESPONDENT - LAST JOB – RECODED

- 1 Self-employed (coded 1-5 in V527)
- 2 Employed (coded 6-14 in V527)
- 3 Not working (coded 15 in V527)
- 9 Inap. Currently doing payed work (not coded 1 to 4 in V525)

Derivation:

This variable collapses answers to D.15B into three categories.

Note:

See D.15B for complete question text.

NO QUESTIONS D.16 TO D.24

v531 - D40A HOUSEHOLD COMPOSITION: AGED 15+ (REC)

D.40AR HOUSEHOLD COMPOSITION: AGED 15+ – RECODED

n of people in household

- 1 One
- 2 Two
- 3 Three
- 4 Four or more

Derivation:

This variable groups answers to question D.40A.

Note:

See D.40A (V530) for complete question text.

v536 - D40 HOUSEHOLD COMPOSITION: SIZE A+B+C

D.40 HOUSEHOLD COMPOSITION: SIZE (A+B+C)

n of people in household

- 1 One
- 2 Two
- 3 Three
- 4 Four
- 5 Five
- 6 Six
- 7 Seven
- 8 Eight
- 9 Nine
- 10 Ten
- 11 Eleven
- 12 Twelve
- 13 Thirteen
- 14 Fourteen
- 16 Sixteen
- 19 Nineteen
- 20 Twenty

Derivation:

This variable summarizes V530, V532, and V534.

Note:

See V530, V532, and V534 for complete question text.

Generated by the Archive in accordance with former surveys.

v538 - D60 DIFFICULTIES PAYING BILLS - LAST YEAR

D.60

During the last twelve months, would you say you had difficulties to pay your bills at the end of the month...?

(SHOW CARD – READ OUT – ONE ANSWER ONLY)

- 1 Most of the time
- 2 From time to time
- 3 Almost never/never
- 7 Refusal (SPONTANEOUS)

Note:

Original code "4" recoded to "7".

Comparability:

Last trend: EB74.3, D.60

v539 - D61 LEVEL IN SOCIETY - SELF PLACEMENT

D.61

On the following scale, step '1' corresponds to "the lowest level in the society"; step '10' corresponds to "the highest level in the society". Could you tell me on which step you would place yourself?

(SHOW CARD – ONE ANSWER ONLY)

- 1 Box 1 - The lowest level in the society
- 2 Box 2
- 3 Box 3
- 4 Box 4
- 5 Box 5
- 6 Box 6
- 7 Box 7
- 8 Box 8
- 9 Box 9
- 10 Box 10 - The highest level in the society
- 97 Refusal (SPONTANEOUS)

Comparability:

Last trend: EB74.3, D.61

v540 - D61 LEVEL IN SOCIETY - SELF PLACEMENT (REC)

D.61R LEVEL IN SOCIETY - SELF PLACEMENT – RECODED

- 1 Low level (1-4 in V539)
- 2 Middel level (5-6 in V539)
- 3 High lebel (7-10 in V539)
- 9 Refusal (SPONTANEOUS)

Derivation:

This variable collapses answers to D.61 into three categories.

Note:

See D.61 for complete question text.

v543 - D62 INTERNET USE FREQ: SOMEWHERE ELSE

D.62

Could you tell me if...?

(SHOW SCREEN – READ OUT)

D.62_3 You use the Internet somewhere else (school, university, cyber-café, etc.)

- 1 Everyday/Almost everyday
- 2 Two or three times a week
- 3 About once a week
- 4 Two or three times a month
- 5 Less often
- 6 Never
- 7 No Internet access (SPONTANEOUS)

Note:

The basic bilingual questionnaire as provided by TNS did not include question D.62. Question and answer text have been extracted from the UK field questionnaire.

v544 - D62 INTERNET USE (INDEX)

D.62 INTERNET USE – INDEX

- 1 Everyday/Almost everyday
- 2 Two or three times a week
- 3 About once a week
- 4 Two or three times a month
- 5 Less often
- 6 Never/No access
- 7 No Internet access at all

Derivation:

This variable summarizes responses to D.62 (V541 to V543).

Respondents coded 1 at least once in V541 to V543 are coded 1 in V544 ("Everyday / Almost everyday"). Respondents coded 2 at least once in V541 to V543 and not coded 1, are coded 2 in V544 ("Two or three times a week"). Respondents coded 3 at least once in V541 to V543 and not coded 1 or 2, are coded 3 in V544 ("About once a week"). Respondents coded 4 at least once in V541 to V543 and not coded 1 to 3, are coded 4 in V544 ("Two or three times a month"). Respondents coded 5 at least once in V541 to V543 and not coded 1 to 4, are coded 5 in V544 ("Less often"). Respondents coded 6 ("Never") in each variable V541 to V543, or at least once coded 6 in V541 to V543 and coded 7 ("No internet access") in the other variable(s), are coded 6 ("Never/No access") in V544. Respondents coded 7 ("No internet access") in each variable V541 to V543 are coded 7 ("No internet access at all") in V544.

Note:

See D.62 for complete question text.

v548 - P3 DURATION OF INTERVIEW - RECODED

P.3R NUMBER OF MINUTES OF THE INTERVEIW LASTED – RECODED

- 1 Up to 14 minutes
- 2 15 - 29 minutes
- 3 30 - 44 minutes
- 4 45 - 59 minutes
- 5 60 - 74 minutes
- 6 75 - 89 minutes
- 7 90 minutes and more

Derivation:

This variable collapses codes in P.3 into seven categories.

v549 - P4 N OF PERSONS PRESENT DURING INTERVIEW

P.4

Number of persons present during the interview, including interviewer

- 1 Two (interviewer and respondent)
- 2 Three
- 3 Four
- 4 Five or more

Comparability:

Last trend: EB74.3, P.4

v598 - P7 REGION - PORTUGAL NUTS 2

P.7_PT REGION

Portugal (EUROSTAT NUTS 2 LEVEL) – Comissaoes de Coordenação regional + Regioes autonomas

- 1 Norte (North)
- 2 Centro (Center)
- 3 Lisboa (Lisbon)
- 4 Alentejo (Alentejo Region)
- 5 Algarve
- 99 Inap. Not PT (not coded 13 in V6)

Note:

The autonomous regions of the Azores (PT20 - Região Autónoma dos Açores) and of Madeira (PT30 - Região Autónoma da Madeira) are not covered.

Since 2002 the region “Lisboa e vale do tejo” is split up and the subregion “Lezíria do Tejo” reinstated to the “Alentejo” Region and the “Médio Tejo” and “Oeste” reinstated to the “Centro” Region. The relative frequencies for each region indicate that this is reflected in the Eurobarometer P.7 regions starting with Eurobarometer 62.0. The original label for category ‘3’ (“Lisboa e vale do Tejo”) has been edited accordingly. According to the NUTS 2 specifications for Portugal this now only includes “Grande Lisboa” and “Península de Setúbal”.

The official NUTS categories are coded and documented in the integrated alphanumeric NUTS CODES variable V621.

Comparability:

v599 - P7 REGION - FINLAND NUTS 3

P.7_FI REGION

Finland (EUROSTAT NUTS 3 LEVEL 2010) – Maakunnat / Landskap

- 1 Helsinki-Uusimaa
- 2 Varsinais-Suomi (Southwest Finland)
- 3 Satakunta
- 4 Kanta-Häme (Tavastia Proper)
- 5 Pirkanmaa (Tampere Region)
- 6 Päijät-Häme (Paijanne Tavastia)
- 7 Kymenlaakso
- 8 Etelä-Karjala (South Karelia)
- 9 Etelä-Savo (Southern Savonia)
- 10 Pohjois-Savo (Northern Savonia)
- 11 Pohjois-Karjala (North Karelia)
- 12 Keski-Suomi (Central Finland)
- 13 Etelä-Pohjanmaa (Southern Ostrobothnia)
- 14 Pohjanmaa (Ostrobothnia)
- 15 Keski-Pohjanmaa (Central Ostrobothnia) (not mentioned)
- 16 Pohjois-Pohjanmaa (Northern Ostrobothnia)
- 17 Kainuu
- 18 Lappi (Lapland)
- 99 Inap. Not FI (not coded 16 in V6)

Note:

The Åland Islands (FI200 - Landskapet Åland / Avenanmaan maakunta) are not covered.

Former regions of "Uusimaa" (FI181) and "Itä-Uusimaa" (FI182) have been consolidated to the region of "Helsinki-Uusimaa" (FI1B1) on January 1, 2011. The official NUTS codes have changed accordingly starting with NUTS version 2010.

Eurobarometer did never code "Itä-Uusimaa" (East Uusimaa) separately. "Uusimaa" always included the capital area of Helsinki. For this reason the NUTS CODES variable V621 is already coded in accordance with NUTS version 2010.

The NUTS version history documents a minor boundary shift between "Satakunta" (NUTS 2003: FI191; NUTS 2006/2010: FI196) and "Pirkanmaa" (NUTS 2003: FI192; NUTS 2006/2010: FI197). One municipality has been transferred between these NUTS level 3 regions. Please notice that the NUTS CODES variable V621 is based on the NUTS 2006/2010 codes for "Satakunta" and "Pirkanmaa" although it could not be verified if and when the boundary shift is actually reflected in Eurobarometer data.

The official NUTS categories are coded and documented in the integrated alphanumeric NUTS CODES variable V621.

Comparability:

v600 - P7 REGION - FINLAND NUTS 2

P.7R_FI REGION

Finland (EUROSTAT NUTS 2 LEVEL 2003 / 2006) – Suuralueet / Storområden

- 1 Itä-Suomi (East Finland)
- 2 Etelä-Suomi (South Finland)
- 3 Länsi-Suomi (West Finland)
- 4 Pohjois-Suomi (North Finland)
- 99 Inap. Not FI (not coded 16 in V6)

Note:

The Åland Islands (FI200 - Landskapet Åland / Avenanmaan maakunta) are not covered.

This variable corresponds to the NUTS 2 breakdown in accordance with NUTS versions 2003 und 2006, i.e. before separating "Helsinki-Uusimaa" (NUTS version 2010: FI1B) from "Etelä-Suomi" (NUTS 2003/2006: FI18; NUTS 2010: FI1C), and before merging "Pohjois-Suomi" (NUTS 2003/2006: FI1A) with "Itä-Suomi" (NUTS 2003/2006: FI13) to "Pohjois- ja Itä-Suomi" (NUTS 2010: FI1D). This coding corresponds to former Eurobarometer waves. Unlike the present NUTS 2 variable, the NUTS CODES variable V621 represents NUTS version 2010.

Comparability:

Last trend: EB74.3, P.7

RO31 Sud - Muntenia (South)

RO32 București - Ilfov (Bucharest - Ilfov)

RO41 Sud-Vest - Oltenia (South-West)

RO42 Vest (West)

Derivation:

This additional alphanumeric NUTS CODES variable is produced by the archive. It integrates all country specific P.7 variables given that the regional units are defined in accordance with the EUROSTAT Nomenclature of Territorial Units for Statistics (NUTS) respectively in accordance with the Statistical Regions for Candidate and EFTA Countries 2010. For each country the lowest available NUTS subdivision level is considered.

Eurostat: RAMON Eurostat Metadata Server. Statistical Regions for Candidate countries and EFTA countries, by country.

Webdownload: 2013-03-01 http://ec.europa.eu/eurostat/ramon/documents/nuts/Statistical_Regions_2010.zip)

Note:

The official NUTS codes are coded verbatim in accordance with the in each case valid (applicable) NUTS version. All version details and changes are documented in the official EUROSTAT classification history (History of NUTS). A second variable (V622) indicates the coded NUTS LEVEL for each country.

France:

The territorial unit of Corse (FR83) and the overseas departments (FR9) are not covered.

Italy:

Starting with NUTS version 2010 NUTS 1 codes for Italy have changed for North-East (ITH instead of ITD) and Center (ITI instead of ITE). The reason for this are minor boundary shifts on NUTS 2 and 3 level (Marche and Emilia Romagna).

Greece:

The Aegean Islands (GR41 - Voreio Aigaio and GR42 - Notio Aigaio) as well as the Ionian Islands (GR22 - Ionia Nisia) are not covered.

Starting with NUTS version 2010 the standard country prefix 'GR' is exchanged by 'EL'. The remaining numerical part of the codes is not affected.

Spain:

The autonomous cities of Ceuta (ES63 - Ciudad Autónoma de Ceuta) and Melilla (ES64 - Ciudad Autónoma de Melilla) are not covered.

Portugal:

The autonomous regions of the Azores (PT20 - Região Autónoma dos Açores) and of Madeira (PT30 - Região Autónoma da Madeira) are not covered.

Finland:

The Åland Islands (FI200 - Landskapet Åland / Avenanmaan maakunta) are not covered.

Former regions of "Uusimaa" (FI181) and "Itä-Uusimaa" (FI182) have been consolidated to the region of "Helsinki-Uusimaa" (FI1B1) on January 1, 2011. The official NUTS codes have changed accordingly starting with NUTS version 2010.

Eurobarometer did never code "Itä-Uusimaa" (East Uusimaa) separately. "Uusimaa" always included the capital area of Helsinki. For this reason the NUTS CODES variable V621 for Finland is already coded in accordance with NUTS version 2010. Only the country specific NUTS 2 variable (V600) is still coded in accordance with NUTS version 2003/2006 in order to remain consistent with former Eurobarometer waves.

The NUTS version history documents a minor boundary shift between "Satakunta" (NUTS 2003: FI191; NUTS 2006/2010: FI196) and "Pirkanmaa" (NUTS 2003: FI192; NUTS 2006/2010: FI197). One municipality has been transferred between these NUTS level 3 regions. Please notice that NUTS CODES variable V621 is based on the NUTS 2006/2010 codes for "Satakunta" and "Pirkanmaa" although it could not be verified if and when the boundary shift is actually reflected in Eurobarometer data.

Comparability:
