Acknowledgements

The fieldwork of the European Values Study during the four waves was financially supported by universities and research institutes, national science foundations, charitable trusts and foundations, companies and church organizations in the EVS member countries.

Detailed information on the history of the European Values Study (EVS) is given on the EVS website (<http://www.europeanvaluesstudy.eu/>). For information on the origin and study design of the EVS wave 1990, as well as data and documentation provided, please go to www.europeanvaluesstudy.eu/evs/surveys/survey-1990.html.

The datasets and related materials were delivered by the European Values Study group at Tilburg University. Preparation and documentation of European Values Study primary data for long term preservation and usability proceed in cooperation between the EVS teams at Tilburg University and GESIS Data Archive for the Social Sciences Cologne.

Introduction and preliminary remarks

The data release (Version 3.0.0, 2011-11-20) includes data and documentation of the 29 countries/regions participating in European Values Study 1990. To make the data accessible in a user friendly way, the Variable Report on the Integrated Datasets of EVS 1990 is provided. It offers a comprehensive description of the data on study and variable level. In addition, the Variable Documentation in the present report (section seven) contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate weight.

The report is structured into seven sections:

- Section 1 provides brief information on the European Values Study.
- Section 2 gives an overview of all data and documentation available.
- Section 3 includes information about the dataset version and changes from previous release.
- Section 4 contains methodological information on origin and content of the data.
- Section 5 refers to the structure of the dataset and standardization efforts made.
- Section 6 provides the explanation of the Variable Documentation.
- The last section contains the Variable Documentation. It describes variables in the data file in terms of relevant metadata and frequency distribution.

Data access

Primary data for statistical analysis and related documentation (English Master Questionnaire, national field questionnaires, and variable report) are made available online through the GESIS Data Catalogue (<http://dbk.gesis.org/dbksearch/GDESC2.asp?no=0009&DB=E>).

Anonymized data

According to data regulations in participating countries, only anonymized data are made available to users. Each national team was responsible for checking their data confidentiality before depositing data.

Citation requirements

Publications based on EVS data should acknowledge this by means of bibliographic citations as listed in the Study Description under item "Citation". To ensure that such source attributions are captured for social science bibliographic utilities, citations must appear in the footnotes or in the reference section of publications.

Usage requirement

To provide funding agencies with essential information about the use of EVS data and to facilitate the exchange of information about the EVS, users of EVS data are required to send bibliographic citations and/or electronic copies of each completed report, article, conference paper or thesis abstract using EVS data to the EVS team. Then, these will be included in the EVS repository. For more information, see www.europeanvaluesstudy.eu/evs/publications/.

Disclaimer

EVS, GESIS, and the producers bear no responsibility for the use of EVS data, or for interpretations or inferences based on these uses. EVS, GESIS, and the producers accept no liability for indirect, consequential or incidental damages or losses arising from use of the data collection, or from the unavailability of, or break in access to the service for whatever reason.

1 European Values Study 1981-2008

The European Values Study is the most comprehensive research project on human values in Europe. It is a large-scale, cross-national, and longitudinal survey research program on how Europeans think about family, work, religion, politics and society. Repeated every nine years in an increasing number of countries, the survey provides insights into the ideas, beliefs, preferences, attitudes, values, and opinions of citizens all over Europe.

The research program was initiated by the European Value System Study Group (EVSSG) in the late 1970s and has emerged as a well-established network of social and political scientists aiming at high standards in data creation and processing. So far, four waves of survey were conducted in European and other countries. These surveys explore value differences, similarities, and value changes.

Survey 1990

The second EVS wave was launched in 1990 to explore the dynamics of value change covering almost the same topics as the first wave conducted in 1981. Surveys were carried out in 27 European countries, the United States, and Canada. The national datasets were combined into an international dataset including altogether 29 countries¹.

The Allensbach Institute for Public Opinion Research, Germany coordinated the 1990 surveys in all European countries, including Austria and countries in Central and Eastern Europe, as well as in the USA and Canada. Table 1 gives an overview of countries participating in EVS waves and year of fieldwork.

More information on the new Steering Committee entrusted with the scientific supervision of the EVS 1990 Survey is given at www.europeanvaluesstudy.eu/evs/surveys/survey-1990.html.

2 Access to data and documentation

The data and documentation of the four EVS waves is publicly available at the EVS and GESIS websites.

Data: For EVS 1990 the Integrated Dataset is provided.

Study Description: The study description offers methodological information on origin and content of the data and overviews on dataset versions and errata.

Variable Report: The *EVS 1990 Variable Report* combines variable descriptions of the Integrated Dataset with question texts of the English Master Questionnaire, as well as frequency counts, by country (sample), for almost all variables.

Questionnaires: The English Master Questionnaire and the field questionnaires are downloadable.

Access to EVS data and documentation

General study information

The EVS website (www.europeanvaluesstudy.eu) covers comprehensive information on the origin of the project and provides access to all data and documentation available for EVS surveys.

Data and documentation download

Data and documentation can be obtained at the GESIS Data Archive for the Social Sciences in Cologne through their online download facilities GESIS Data Catalogue (<http://dbk.gesis.org/dbksearch/GDESC2.asp?no=0009&DB=E>) and ZACAT-Online Study Catalogue (<http://zacat.gesis.org/webview/index.jsp?object=http://zacat.gesis.org/obj/fCatalog/Catalog5>).

GESIS Data Catalogue contains study descriptions for all datasets providing information on the origin of data, version history, and errata. It supports direct access to data and documentation for download.

ZACAT provides data and documentation for retrieval purposes and data exploration. It assists users in identifying trend variables of all EVS waves. Furthermore, it enables comparisons of original questions in survey languages of the third and fourth wave.

Data analyses and data downloads are possible after registration.

Online variable information

Online Variable Overview (<http://info1.gesis.org/EVS/Variables/>) allows for comparisons of trend variables of the four EVS waves 1981, 1990, 1999, and 2008. In addition, comparisons of original question texts across the waves 1999 and 2008 are supported.

Full-text retrieval

Question text retrieval is a facility for word/phrase searches in EVS text documents. It supports full-text searches in the master questionnaire and variable reports on the EVS integrated datasets and national datasets.

Publication

EVS Repository (www.europeanvaluesstudy.eu/evs/publications/) contains direct links to publications based on the data of the European Values Study. A subset of the publications is enhanced by additional information on the data, interview questions, and syntax codes of concepts used.

Atlas of European Values "Trends and Traditions at the turn of the Century"

The Atlas of European Values (www.atlasofeuropeanvalues.eu) unlocks the results of the European Values Study project for the general public. It presents values, beliefs, attitudes, and opinions through graphs, charts, and maps.

Secondary education

For secondary education, an interactive website offers courses and modules in different languages to provide a better understanding of European values in the classroom (<http://www.europeanvaluesstudy.eu/evs/education.html>).

3 Dataset version and changes from previous release

In order to uniquely identify a dataset, each dataset version is assigned a GESIS Study No., a version no., and a Digital Object Identifier (doi). The doi is linked to the Study Description in the Data Catalogue. Metadata entered in the Study Description of EVS 1990 data and associated with a doi are provided to the Registration agency for social science data (da|ra).

The [doi:10.4232/1.10790](https://doi.org/10.4232/1.10790) is assigned to the EVS 1990 Integrated Dataset (v.3.0.0) including the 29 national datasets.

3.1 Version of datasets

Variable **"version"** includes the GESIS archive version number of a dataset and the corresponding release date. It is composed of a sequence of three numbers (alphanumeric string).

- The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases).
- The minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels).
- The third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

In Table 2 the GESIS Study No. of the Integrated Dataset and the included national samples², as well as the doi, dataset version and version date of the current release is listed.

Table 2: Digital Object Identifier (doi) and version of EVS 1990 dataset

Country/Region	Study No.	Digital Object Identifier	Version	Version date
Integrated Dataset	ZA4460	doi:10.4232/1.10790	3.0.0	2011-11-20
Austria	ZA4754			
Belgium	ZA4461			
Bulgaria	ZA4462			
Czech Republic (-1991Czechoslovakia)	ZA4488			
Denmark	ZA4463			
Estonia	ZA4466			
Finland	ZA4467			
France	ZA4468			
Germany	ZA4464			
Great Britain	ZA4469			
Hungary	ZA4489			
Iceland	ZA4471			
Ireland	ZA4470			
Northern Ireland	ZA4509			
Italy	ZA4472			
Latvia	ZA4474			
Lithuania	ZA4475			
Malta	ZA4476			

² For EVS waves 1981 and 1990, integrated datasets are provided only; for EVS 1999 and 2008 the single national datasets are accessible additionally.

Netherlands	ZA4477			
Norway	ZA4478			
Poland	ZA4480			
Portugal	ZA4481			
Romania	ZA4482			
Slovak Republic	ZA4485			
Slovenia	ZA4486			
Spain	ZA4487			
Sweden	ZA4484			
Canada	ZA4473			
USA	ZA4490			

3.2 Main changes and updates from previous data release

From edition 2.0.0 to 3.0.0

The third release of the EVS 1990 Integrated Dataset contains additional variables, data and metadata updates, and improvements to the second release. The main changes are listed here.

Variables added to the dataset

The following variables were added to the Integrated Dataset:

Variable Label	version	GESIS archive version
versionc		GESIS archive version (EVS national datasets)
studynoc		GESIS study number (national datasets)
caseno		original respondent number (constructed)
cntry_y		country-year
cntry1_y		country [with split ups]- year
c_abrv		country abbreviation
c_abrv1		country abbreviation [with split ups]
q533b_4		post-materialist index 4-item
q535b_12		post-materialist index 12-item
q719b_r		age (Q 717b) (recoded)
q719b_r2		age (Q 717b) (recoded into 3 intervals)
q721_r		age completed education respondent (Q721) (recoded in intervals)
q731		income household respondent (Q731)
q731_r		income household respondent (Q731) (recoded)
q744		year/month of start-fieldwork
q745		year/month of end-fieldwork
flag variables		for indicating inconsistencies (see Table 7 and Appendix 1)

Renamed variables

Naming of some variables was adjusted for consistency with EVS waves and the Longitudinal Data File.

Variables renamed	Label
country1 to country	country code
country to country1	country code [with split ups]
weight1 to weight_g	weight
weight to weight_s	weight [with split ups]
q648a_cs to q648a_de	belong to geographic group: most (6 answer categories) (Q648A_DE)
q649b_cs to q649b_de	belong to geographic group: next (6 answer categories) (Q649B_DE)

q742b_cs to q742b_fi	size of town where interview was conducted (FI)
q731 to q731_cs	income household respondent (Q731) (country specific)

Variables coded according to ISO 3166-1

For standardization across EVS waves country identifiers according to ISO 3166-1 (3-digit or alphanumeric country code) were added to the following variables: q674a, q676b, q678c, q648a_de, q649b_de, country, country1, c_abrv, c_abrv1, language, cntry_y, cntry1_y, q731, q743, q742b_fi.

For more information see section 5.1.2: Variables with country codes. An overview of ISO 3166-1 country codes and supplements for countries or (sub-national) areas is provided as well.

Changed country codes

Some codes of the alphanumeric country code (ISO 3166-1 alpha-2) in variables **c_abrv** 'country abbreviation' and **c_abrv1** 'country abbreviation [with split ups]' were modified.

East-Germany	E-DE to DE-E
West-Germany	W-DE to DE-W
Great Britain	GB to GB-GBN
Northern Ireland	NIR to GB-NIR

Data checks and data corrections

The data was checked for filter inconsistency and contradictions between variables of item batteries:

- For the most common non-conformed interviewer instructions and illogic answer-patterns across the national datasets, flag variables were created (see section 5.2.1: Flag variables indicating inconsistencies).
- Variables with skip patterns deviating from Master Questionnaire and inconsistent filter, respectively were not corrected but marked by notes (see section 5.2.2: Notes indicating deviating filtering).

Further corrections are related to:

- Variable q240j 'upset because somebody criticized you': as data is not available for Bulgaria recoded from "-2 no answer" to "-4 not asked in survey".
- Variable q373a 'how many times married (constructed) (Q373A)': according to English Master Questionnaire, value code "0 never" recoded to "3 never".
- Variable q533b_4: 'post-materialist index 4-item' was constructed differently than in the Longitudinal Data File Version (1.0.0). If a person chose two times the same materialistic (1/1 or 3/3) or post-materialistic (2/2 or 4/4) aim in q533a and q533b, he/she was coded as materialistic or post-materialistic person. To exclude these 72 cases (27 materialist and 45 post-materialists) of equal mentions from analysis use the flag variable f534a for filtering. In earlier version of Longitudinal Data File these persons were coded as 2 'mixed'.
- Variable caseno was constructed from the id_cocas variable of dataset version (2.0.0) by deleting information of country (former country codes) and wave identifier (90).
- Variable id_cocas was constructed in form of a 12 digits code: YYYY (year of wave), CCC (ISO-Code for country), and NNNNN (continous casenumber of variable caseno).

Recodes for standardization across waves

Values/value labels of item batteries were standardized across the EVS waves:

- Values 1 'yes'/0 'no': value code 2 'no' recoded to 0 'no'
Variables: q231a, q232b, q233c, q234d, q235e, q236f, q237g, q238h, q239i, q240j, q337a, q338b, q339c, q341a, q342b, q343c, q344d, q345a, q346b, q347c, q348d, q349e, q350f, q351g, q352h, q353i, q354j, q341a, q342b, q343c, q344d, q345a, q346b, q347c, q348d, q349e, q350f, q351g, q352h, q353i, q354j, q355a, q356b, q357c, q358d, q359e, q360f, q361g, q362h, q363i.
- Values 1 'approve'/0 'disapprove': value code 2 'disapprove' recoded to 0 'disapprove'
Variables: q465a, q466b, q467c, q468d
- Values 1 'yes'/2 'no': variables recoded according to English Master Questionnaire
Variable: q332a

Updated (internal) metadata of the dataset

Variable labels were standardized across the EVS waves and the Longitudinal Data File. In addition, selected value labels were standardized for all EVS waves (for definition of 'missing values', see section 5: Dataset structure and variable definition).

- 1 'important'/0 'not mentioned' items
Variables: q453a, q454b, q455c, q456d, q457e, q458f, q459g, q460h, q461i, q462j, q463k

Updated Variable Documentation

Variable documentation included in the Variable Report of EVS 1990 additionally covers weighted tables based on country variable c_abrv 'country abbreviation'.

An overview of all variables included in EVS waves and Longitudinal Data File is given in Appendix 2.

3.3 New features

Section [Errata and Version](#) in the Study Description of the GESIS Data Catalogue provides errata detected to date and related to the last dataset version. For major problems, patches for solving the data problems will be provided.

The [Online Variable Overview](#) includes all variables of the four EVS waves 1981/1990/1999/2008 and the Longitudinal Data File 1981-2008. The variables of all waves are documented with the English question texts; for EVS 1999 and EVS 2008 the original question texts are provided additionally. This gives an overview of all comparable variables across waves and allows for comparisons of original question texts across the waves 1999 and 2008.

The web page [Compare question texts](#) serves users who want to check the translations of the English master questions, compare original questions across languages, countries, or waves (EVS 1999/EVS 2008), and report problems or peculiarities. Problems in original question texts spotted and reported to date are listed on this page.

The [EVS mailing list](#) is maintained by GESIS and the European Values Study team at Tilburg University. It provides a venue for researchers to interact with each other and to increase communication between the archive and the EVS user community. By subscribing to the list, you will be informed

about events, publications, new data and documentation offers, data updates, and errata for EVS surveys.

For regular information about EVS Data and Documentation News, you can also subscribe to the [RSS Feed](#).

4.2 Study scope

Abstract: Moral, religious, societal, political, work, and family values of Europeans.

Topics

Important areas in life; feeling of happiness; state of health; ever felt: very excited or interested, restless, proud, lonely, pleased, bored, depressed, upset because of criticism; respect and love for parents; important child qualities: good manners, independence, hard work, feeling of responsibility, imagination, tolerance, saving money, determination perseverance, religious faith, unselfishness, obedience; attitude towards abortion; frequency of political discussions; opinion leader; voluntary engagement in: welfare service for elderly, education, labour unions, political parties, local political action, human rights, environment, animal rights, professional associations, youth work, sports, women's group, peace movement, health group; reasons for voluntary work; characterisation of neighbourhood: people with a criminal record, of a different race, heavy drinkers, emotionally unstable people, Muslims, Hindus, immigrants or foreign workers, people with AIDS, drug addicts, homosexuals, Jews, left-wing or right-wing extremists, people with large families; general confidence; satisfaction with life; freedom of choice and control; willingness to give part of income for better environment; environment talks make people anxious; priority: for men, domestic people, able bodied and younger persons in case of scarce job situation; satisfaction with financial situation of the household; important values at work: good pay, not too much pressure, job security, a respected job, good hours, opportunity to use initiative, generous holidays, responsibility, interesting job, a job that meets one's abilities, pleasant people, chances for promotion, useful job for society, meeting people; pride in one's work; job satisfaction; freedom of decision taking in job; job orientation; fair payment; preferred management type; attitude towards following instructions at work; satisfaction with home life; sharing attitudes with partner and parents: towards religion, moral standards, social attitudes, political views, sexual attitudes; ideal number of children; child needs a home with father and mother; a woman has to have children to be fulfilled; marriage as an out-dated institution; woman as a single parent; enjoy sexual freedom; important values for a successful marriage: faithfulness, adequate income, same social background, respect and appreciation, religious beliefs, good housing, agreement on politics, understanding and tolerance, apart from in-laws, happy sexual relationship, sharing household chores, children, taste and interests in common; gender role in job and family; willingness to fight for the own country; expected future changes of values; opinion about scientific advances; interest in politics; political action: signing a petition, joining in boycotts, attending lawful demonstrations, joining unofficial strikes and occupying buildings or factories; preference for freedom or equality; self-positioning on a left-right scale; basic kinds of attitudes concerning society and economic system; income equality; wealth accumulation; idea of welfare state preferred aims of society and politics; post materialism; personal characteristics; conservatism and need for change in politics and economic system; confidence in institutions: churches, armed forces, education system, the press, labour unions, the police, parliament, the civil services, social secure system, major companies EU, NATO and the justice system; approval of: ecology movement, anti-nuclear energy movement, disarmament movement, human rights movement, women's movement and anti-apartheid movement; party preference and identification; reasons for people living in need; opinion on terrorism; thinking about meaning and purpose of life; feeling that life is meaningless; thoughts about

dead; attitude towards good and evil and religion and truth; religious denomination; former religious denomination; church attendance; raised religiously; importance of religious service at birth, marriage and death; self placement as religious person; attitudes to churches to speak out on political issues like disarmament, abortion, third world problems, extramarital affairs, unemployment, racial discrimination, euthanasia, homosexuality, ecology and government policy; believe in: God, life after death, soul, hell, heaven, sin, re-incarnation and devil, belief in resurrection; personal God vs. spirit or life force; importance of God; comfort and strength from religion; moments of prayer or meditation; prayers outside of religious services; moral values: personal attitudes and expected attitude of most people towards unjustified claiming of government benefits, avoiding fare on public transport, cheating on taxes, accepting a bribe, homosexuality, prostitution, abortion, divorce, euthanasia, suicide, joyriding, taking soft drugs, lying, adultery, sex under the legal age of consent, littering, driving under influence of alcohol, political assassination, buying stolen goods, keeping money that one finds, fighting with the police, hit-and-run driving, strikebreaking, killing in self-defense; identification with geographical region; proud of nationality; opinion on European Union.

Demography: sex; year of birth; age; marital status; been married before; number of children; size of household; education; living with parents; employment status; chief wage earns profession; socio-economic status of interviewee; scale of incomes; region; size of town.

Additionally encoded: country; region; confidence of the interviewee during the interview; language.

Universe: Adult population of the country 18 years and older.

4.3 Methodology and processing

Selection method

Representative multi-stage random sample respective quota sample of the adult population of the country 18 years old and older.

Mode of data collection

Personal interview with standardized questionnaire

Number of units: 38.213

Number of variables: 390

Fieldwork period

Table 3: Fieldwork period 1990-1993

Country/Region	1990 - 1993
Austria	1990-04-09 to 1990-06-01
Belgium	1990-06-10 to 1990-06-27
Bulgaria	1990-08-01 to 1991-12-31
Canada	1990-05-01 to 1990-06-30
Czech Republic (-1991Czechoslovakia)	1991-08-26 to 1991-10-06
Denmark	1990-04-01 to 1990-05-31
Estonia	1990-06-01 to 1990-08-30
Finland	1990-04-01 to 1990-04-30
France	1990-06-25 to 1990-07-13
Germany East	1990-05-28 to 1990-06-16

Germany West	1990-04-23 to 1990-05-15
Great Britain	1990-06-01 to 1990-09-20
Hungary	1991-05 to 1991-06
Iceland	1990-04-01 to 1990-04-30
Ireland	1990-07-06 to 1990-10-26
Italy	1990-10-26 to 1990-11-26
Latvia	1990-06-01 to 1990-08-30
Lithuania	1990-06-01 to 1990-08-30
Malta	1991
Netherlands	1990-06-01 to 1990-09-30
Northern Ireland	1990-07-01 to 1990-09-30
Norway	1990-04 to 1990-06
Poland	1990-05 to 1990-06
Portugal	1990-05-11 to 1990-07-13
Romania	1993
Slovak Republic	1991-08-26 to 1991-09-08
Slovenia	1992-02-01 to 1992-02-28
Spain	1990-04-09 to 1990-05-14
Sweden	1990-04-01 to 1990-05-31
USA	1990-05-01 to 1990-06-30

Usage regulations

Data and documents are released for academic research and teaching - Access category A.

5 Dataset structure and variable definition

The naming of variables follows several standards differentiated by type of variables. Although variable names are not harmonized across waves, all standard variables are build in the scheme "xNNN" (e.g. q130). Exceptions are constructed variables, country-specific variables, and administrative variables (see below section 5.1: Administrative and ID variables).

- Constructed/recoded variables are indicated with a respective suffix (*_r*).
- Country-specific variables, i.e. variables created for questions which could not be harmonized, or questions countries additionally included in the field questionnaire, are named by the alphanumerical country code (*_fi* for Finland according to ISO 3166-1 alpha-2). Their positions in the datasets mirror their positions in the field questionnaires.
- Another type of variables are standardized country-specific variables indicated with a respective suffix "*_cs*". These are compiled variables constructed e.g. for religion and political party preference. They contain country identifier (ISO 3166-1) and the given order of country-specific categories in the field questionnaires. References to respective harmonized variables in Integrated Dataset are added as notes.

Missing values

In general, the missing values are standardized across EVS waves. For all variables a set of missing values is defined:

- 1 don't know
- 2 no answer
- 3 not applicable (missing values which result from filter questions; missing values in administrative variables)
- 4 question not asked (i.e. question not included in country's field questionnaire or not provided for by National Program Director of EVS member countries)
- 5 other missing (includes: system missing, wild codes, illogic answer-patterns in e.g. filters)

Dummy variables

For questions that allow for multiple responses a dummy variable is created for each answer category. E.g. a question with four answer categories in an item battery has four dummy variables as final data. In general, a value "1" means that the respondent choose the particular category as an answer (mentioned, yes, ...). In case of a value "0" the respondent did not choose the particular category as answer (not mentioned, no, ...). Dummy variables are also created for "None of these", "Don't know" or other residual responses. Inconsistencies between choosing category 'none of these' and other mentioned items of a battery are flagged by flag variables (see section 5.2.1: Flag variables indicating inconsistencies).

5.1 Administrative and ID variables

Administrative variables are used mainly for identifying datasets with regard to version, wave, and country (see Table 4 below). They include different kinds of variables:

- Technical variables for identifying the dataset or cases
- Weighting variables to help adjust samples to the universe
- Cumulation specific variables combining the information of different variables
- Special compound variables for creation of customized data files

Table 4: Overview of administrative variables

Variable name	Variable label
studyNo	GESIS Study Number
studyNoC	GESIS Study Number (National datasets)
version	GESIS Archive Version
versionC	GESIS Archive Version (National datasets)
id_cocas	unified respondent number
caseno	original respondent number (constructed)
year	survey year
country	country code
country1	country code [with split ups]
c_abrv	country abbreviation
c_abrv1	country abbreviation [with split ups]
weight_g	weight
weight_s	weight [with split ups]
cntry_y	country_year
cntry1_y	country_[with split ups]- year
q744	year/month of start-fieldwork
q745	year/month of end-fieldwork
language	language of interview

5.1.1 Identification variables

Each record in the Longitudinal Data File contains two identification variables:

Caseno: 'Original respondent number (constructed)'

Id_cocas: 'Unified respondent number' consisting of year/country/case_id

Code comprises 12 digits: YYYY (year of wave), CCC (ISO-Code-Country), and NNNNN casenumber)

5.1.2 Variables with country codes

The following overview in Table 5 lists variables for which country identifiers (ISO 3166-1 numeric or alphanumeric) were added to values. Information about the composition of values is given as well.

Table 5: Variables with country codes ISO 3166-1

Variable	Variable Label	CComposition of values (cc=country code)
country	country code	CC-ISO (3 digits)
country1	country code [with split ups]	
c_abrv	country abbreviation	CC- ISO 3166-1 alpha-2
c_abrv1	country abbreviation [with split ups]	
language	language of interview	CC-ISO (3 digits)+VALUE (2 digits)
cntry_y	country_year	CC-ISO (3 digits)+YEAR (4 digits)
cntry1_y	country_year – [with split ups]	
q648a_de	belong to geographic group: most (6 answer catgories) (Q648A_DE)	CC-VALUE=CC-ISO (3 digits)+VALUE (2 digits)
q649b_de	belong to geographic group: next (6 answer categories) (Q649B_DE)	
q674a	which political party would you vote for (Q674)	CC-ISO (3 digits) + VALUE (2 digits)
q676b	which political party would you vote for-2nd choice (Q676)	
q678c	which political party appeals to you most (Q678)	

q731_cs	income household respondent (Q731)	CC-ISO (3 digits)+VALUE (2 digits)
q742b_fi	size of town where interview was conducted (FI)	CC-ISO (3 digits)+VALUE (2 digits)
q743	region where interview was conducted (Q743)	CC-ISO (3 digits)+VALUE (3 digits)

Country variables with split ups

Country variables 'country', 'c_abrv', and 'cntry_y' each have a pendant of a country variable with split ups. In the split up variables 'country1', 'c_abrv1', 'cntr1_y', Germany is represented by two different codes, Germany West: 900 or DE-W and Germany East: 901 or DE-E. The same rule applies to the weight variable: 'weight_g' corresponds to the weight variable with split ups for Germany 'weight_s'.

In Table 6 alphanumeric country abbreviations and numeric 3-digits country codes as used in EVS 1990 are compiled. All surveyed countries and regions, i.e. including separate samples for Great Britain/Northern Ireland, are coded in accordance with the ISO 3166-1 alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East/West subdivision of Germany.

Table 6: Country codes (ISO 3166-1)

Country/Region	Country abbreviation ISO 3166-1 alpha-2	ISO 3166-1 (3 digits)	ISO 3166-1 (3 digits with split ups)	EVS-specific country code used in previous dataset versions
Austria	AT	40	40	5
Belgium	BE	56	56	10
Bulgaria	BG	100	100	26
Czech Republic (-1991Czechoslovakia)	CZ	203	203	22
Denmark	DK	208	208	11
Estonia	EE	233	233	18
Finland	FI	246	246	14
France	FR	250	250	1
Germany West	DE-E*	276	900*	3
Germany East	DE-W*	276	901*	4
Great Britain	GB-GBN	826*	826*	2
Hungary	HU	348	348	24
Iceland	IS	352	352	15
Ireland	IE	372	372	17
Northern Ireland	GB-NIR	909*	909*	16
Italy	IT	380	380	6
Latvia	LV	428	428	19
Lithuania	LT	440	440	20
Malta	MT	470	470	32

Portugal	PT	620	620	8
Romania	RO	642	642	25
Slovakia	SK	703	703	23
Slovenia	SI	705	705	34
Spain	ES	724	724	7
Sweden	SE	752	752	13
Canada	CA	124	124	46

USA	US	840	840	45
-----	----	-----	-----	----

*Nonofficial ISO 3166-1 or ISO 3166-1 alpha-2 code.

5.1.3 Weighting

Variable 'weight_g' adjusts national samples for gender and age distribution in the country population. For Germany (united) additionally the disproportional East and West German samples have been adjusted. The US sample was also weighted for race and the Italian sample was additionally corrected for level of education.

No weights are available in the following countries (coded to 1): France, Denmark, Norway, Sweden, Finland, Iceland, Northern Ireland, Ireland, Estonia, Latvia, Lithuania, Poland, Czech Republic, Slovakia, Hungary, Romania, Bulgaria, and Slovenia.

Variable 'weight_s' is based on 'weight_g'. It weights East and West German samples for gender and age separately and has to be applied whenever East or West Germany is analyzed separately.

5.2 Data quality checks

The data of the Survey 1990 was checked for wild codes, system missing, filter inconsistency, and contradictions between variables of item batteries.

5.2.1 Flag variables indicating inconsistencies

For the most common non-conformed interviewer instructions and illogic answer patterns across national datasets, flag variables were created which mark such non-conformities and leave decisions on corrections up to the researcher.

Information about both flag and flagged variables is provided by notes in the Variable Documentation.

Flagged variable q534a 'aims of respondeent II: first choice (Q534a)'

Note: Please see flag variable f534a which indicates inconsistencies for variables q534a and q535b.

Flag variable f534a 'flag variable: aims of respondeent II: first choice (Q534a)'

Indicates inconsistencies for the variables q534a to q535b.

If most important aim is identical with next most important aim.

if q534a=q535b then f534a=1

0 'consistent' / 1 'inconsistent'

There are three types of non-conformities which were flagged (see Appendix 1).

1. 'first/second choice' variables which were flagged in case the value of the variable for the first choice equaled to the value of the variable for the second choice.

Variables: q246a to q247b – f246a; q530a to q531b – f530a; q532a to q533b – f532a; q534a to q535b – f534a; q648a to q649b – f648a; q648a_de to q649b_de – f648a_de; q674a to q676b – f674a.

2. 'multiple response question' variables which were flagged in case respondents chose more than the 5 maximally permitted items.

Variables: q453a to q463k – f463

3. 'none'-item battery variables which were flagged in case the answer pattern of the 'none'-item variable and the other variables of the item battery of a question was illogic. As several illogic answer patterns are possible the flag variables have nine categories.

Variables: q665c to q664h -f665; q374 to q378 – f379; q416 to q420 – f421

Flag variables introduced in EVS 1990 are listed in Table 7.

Table 7: *Flag variables for indicating inconsistencies*

Variable	Variable label
f246a	flag variable: why do people live in need - most/second important (Q246A/Q247B)
f379	flag variable: share with partner: none of these (Q374_6)
f421	flag variable: share with parents: none of these (Q416_6)
f463	flag variable: learn children at home (Q262)
f530a	flag variable: aims of this country - most/second important (Q530/Q531)
f532a	flag variable: aims of respondent: first/second choice (Q532a/Q533b)
f534a	flag variable: aims of respondent II: first/second important (Q534a/Q535b)
f648a	flag variable: belong to geographic group - most/second (Q648A/Q649B)
f648a_de	flag variable: belong to geographic group - most (6 answer categories) (Q648A_DE/Q649B_DE)
f665	flag variable: personal characteristics: none of the above (Q657)
f674a	flag variable: which political party would you vote for (Q674A/Q676B)

5.2.2 Notes on deviating filtering

In case filtering in countries' **field questionnaires** systematically deviated from filtering in the Master Questionnaire (either by lacking filter or by adding country-specific filter) data were not corrected but marked by variable notes related to the affected countries. Two cases of problems were indicated in the Variable Documentation:

- Respondents who should have been asked questions after the filter question, but were coded as -3 'not applicable': variables are q166 to q180n.
- Respondents who should not have been asked the questions after the filter questions but have valid codes: variables are q265, q266, q268, q728.

6 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. It is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with the international metadata specification for the social and behavioral sciences, established by the Data Documentation Initiative (DDI-Codebook/XML).

The documentation combines the variable description (variable name, values, and labels) of the dataset with the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the questionnaire.

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable "c_abrv: country abbreviation" and "c_abrv1: country abbreviation [with split ups]", respectively.

AL	Albania	ES	Spain	ME	Montenegro
AM	Armenia	FI	Finland	MK	Macedonia
AT	Austria	FR	France	MT	Malta
AZ	Azerbaijan	GB-GBN	Great Britain	NL	The Netherlands
BA	Bosnia-Herzegovina	GB-NIR	Northern Ireland	NO	Norway
BE	Belgium	GE	Georgia	PL	Poland
BG	Bulgaria	GR	Greece	PT	Portugal
BY	Belarus	HR	Croatia	RO	Romania
CY	Cyprus	HU	Hungary	RS	Serbia
CY-TCC	Turkish Cypriote Community	IE	Ireland	RS-KM	Kosovo
CZ	Czech Republic	IS	Iceland	RU	Russia
DK	Denmark	IT	Italy	SE	Sweden
DE	Germany (-1989)	LT	Lithuania	SI	Slovenia
DE-W	Germany West (1990 ff.)	LU	Luxembourg	SK	Slovakia
DE-E	Germany East (1990 ff.)	LV	Latvia	TR	Turkey
EE	Estonia	MD	Moldova	UA	Ukraine

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country-specific variables. In the case of variables with long lists of coded "real values" (e.g. age), results are only presented for the corresponding categorized variable if available. The content and construction of technical, administrative, or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table. Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English Master Questionnaire as provided by the European Values Study.

Digital Object Identifier (doi): Header with doi linked to the Study Description in the GESIS Data Catalogue.

VARIABLE NAME (serial number from questionnaire or assigned by the archive) and **VARIABLE LABEL** as defined in the dataset, including question number. The numbers or letters that may appear together with the variable name reflect the item order (multiple item or multiple response questions) or indicate if a question was recoded (R), harmonized, or if asked only in a single country (country abbreviation).

QUESTION NUMBER and full **QUESTION TEXT** from the Master Questionnaire, including interviewer instructions.

CODE VALUES occurring in the data for this variable and complete **ANSWER TEXT** from the Master Questionnaire. Code values may differ from the questionnaire specification due to standardized/ harmonization.

NOTES delineate additional explanatory text subsuming trend information or archive remarks on data processing and other issues relevant for the understanding and application of the variable. **DERIVATION** information refers to the construction principle of indices or other derived variables (not in the example).

European Values Study 1981

GESIS Study No. 4438 (v3.0.0), <http://dx.doi.org/doi:10.4232/1.10791>

v212 - taking all things together how happy are you (Q128)

Q.128

Taking all things together, would you say you are:

<Read out in reverse order for alternate contacts>

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 Very happy
- 2 Quite happy
- 3 Not very happy
- 4 Not at all happy

CROSS-TABULATION: The absolute frequencies of the occurrence of values (absolute values) refer to the number of cases in the weighted dataset as indicated, in this case weighted by weight_g. The relative frequencies (row percent) refer to the valid cases (n valid sum), i.e. the total number of cases (n sum) reduced by the number of cases defined as missing data (M).

FREQUENCY COUNTS: For country specific variables relative frequencies are calculated including and excluding missing data (M), i.e. percent on the basis of all cases (sum) and valid percent on the basis of the valid cases.

Appendix 1: Overview of flag variables to identify inconsistencies

Variable	Label	N	total N	Values	Value Labels	Description
f246a	flag variable: why do people live in need - most/second important (Q246A/Q247B)	37451 762	38213	0 1	Limitation followed Limitation ignored	If most important reason is identical with next important reason. if q246a=q247b then f246a=1
f463	flag variable: learn children at home (Q262)	18619 759	38213	0 1	Limitation followed Limitation ignored	If respondent named more than the allowed 5 qualities. if q453A to q463K=1 > 5 then f463=1
f530a	flag variable: aims of this country - most/second important (Q530/Q531)	38133 80	38213	0 1	consistent inconsistent	If most important aim is identical with next most important aim. if q530a=q531b then f530a=1
f532a	flag variable: aims of respondent: first/second choice (Q532a/Q533b)	38141 72	38213	0 1	consistent inconsistent	If most important aim is identical with next most important aim. if q532a=q533b then f532a=1
f534a	flag variable: aims of respondent II: first/second important (Q534a/Q535b)	38155 58	38213	0 1	consistent inconsistent	If most important aim is identical with next most important aim. if q534a=q535b then f534a=1
f648a	flag variable: belong to geographic group - most/second (Q648A/Q649B)	38086 127	38213	0 1	consistent inconsistent	If geographical group that respondent states to belong to first of all is identical with secondly stated group. if q648a=q649b then f648a=1
f648a_de	flag variable: belong to geographic group - most (6 answer categories) (Q648A_DE/Q649B_DE)	38207 6	38213	0 1	consistent inconsistent	If geographical group that respondent states to belong to first of all is identical with secondly stated group. if q648a_de=q649b_de then f648a_de=1
f674a	flag variable: which political party would you vote for (Q674A/Q676B)	36226 1987	38213	0 1	consistent inconsistent	If party respondent states to vote for first of all is identical with second stated party. if q674a=q676b then f674a=1
f665	flag variable: personal characteristics: none of the above (Q657)	37776 437	38213	0 1	consistent inconsistent	If respondent mentions at least one characteristic and "none". if q665=1 and any of q655c to q664h=1 then f665=1
f379	flag variable: share with partner: none of these (Q374_6)	37031	38213	0	consistent	
		0	38213	1	inconsistent1	If respondent mentions at least one attitude and "none". if q379=1 and any of q374 to q378=1 then f379=1

		0	38213	2	inconsistent2	If respondent does not mention any attitude and does not mention "none". if q379=0 and all of q374 to q378=0 then f379=2
		1182	38213	3	inconsistent3	If respondent does not mention any attitude and "none" is missing. if q379=-2 or -1 and all of q374 to q378=0 then f379=3
		0	38213	4	inconsistent4	If respondent mentions at least one attitude and "none" is missing. if q379=-2 or -1 and any of q374 to q378=1 then f379=4
f421	flag variable: share with parents: none of these (Q416_6)	36343	38213	0	consistent	
		0	38213	1	inconsistent1	If respondent mentions at least one attitude and "none". if q421=1 and any of q416 to q420=1 then f421=1
		0	38213	2	inconsistent2	If respondent does not mention any attitude and does not mention "none". if q421=0 and all of q416 to q420=0 then f421=2
		1870	38213	3	inconsistent3	If respondent does not mention any attitude and "none" is missing. if q421=-2 or -1 and all of q416 to q420=0 then f421=3
		0	38213	4	inconsistent4	If respondent mentions at least one attitude and "none" is missing. if q421=-2 or -1 and any of q416 to q420=1 then f421=4

version - GESIS archive version

GESIS Archive Version:

3.0.0 '2011-11-20'

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

version

Value	Label	Missing	Count	Percent	Valid Percent
3.0.0 (2011-11-20)			38213	100.0	100.0
	Sum		38213	100.0	100.0
	Valid Cases		38213		

versionc - GESIS archive version (EVS national datasets)

GESIS Archive Version:

3.0.0 '2011-11-20'

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

id_cocas - unified respondent number

Unified respondent number:

Code comprises 12 digits: YYYY (year of wave), CCC (ISO-Code for country), and NNNNN (casenumber)

caseno - original respondent number (constructed)

Original respondent number

year - survey year

Survey year: 1990-1993

Note: For detailed information, see variables cntry_y, cntry1_y.

weight_g - weight

Weight factor

Adjusts the national samples for gender and age distribution. To deal with united Germany.

The US 1990 sample was additionally weighted for race.

The Italian 1990 sample was weighted additionally to correct for level of education.

Bulgaria, Czech Republic, Denmark, Estonia, France, Finland, Hungary, Iceland, Ireland, Latvia, Lithuania, Northern Ireland, Norway, Poland, Romania, Slovenia, Slovakia, and Sweden are weighted by 1.

weight_s - weight [with split ups]

Weight_s - Germany West and East

Adjusts the national samples for gender and age distribution.

To deal with Germany West and Germany East separately.

The US 1990 sample was additionally weighted for race.

The Italian 1990 sample was weighted additionally to correct for level of education.

Bulgaria, Czech Republic, Denmark, Estonia, France, Finland, Hungary, Iceland, Ireland, Latvia, Lithuania, Northern Ireland, Norway, Poland, Romania, Slovenia, Slovakia, and Sweden are weighted by 1.

q125b - environment: increase taxes to prevent environmental pollution (Q124B)

Q.124

<Show card B>

I am now going to read out some statements about the environment. For each one read out, can you tell me whether you agree strongly, agree, disagree or strongly disagree?

<Read out each statement and code an answer for each>

Q.124B I would agree to an increase in taxes if the extra money is used to prevent environmental pollution

q129f - environment: protecting the environment less urgent (Q124F)

Q.124

<Show card B>

I am now going to read out some statements about the environment. For each one read out, can you tell me whether you agree strongly, agree, disagree or strongly disagree?

<Read out each statement and code an answer for each>

Q.124F Protecting the environment and fighting pollution is less urgent than often suggested

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 Strongly agree
- 2 Agree
- 3 Disagree
- 4 Strongly disagree

Romania:

Question not asked in Field Questionnaire. Computed and coded as -4 'question not asked'.

q169c - why voluntary work: opportunity to repay (Q167C)

Q.167

<Show card D>

Thinking about your reasons for doing voluntary work, please use the following five point scale to indicate how important each of the reasons below have been in your own case.

(Where 1 is unimportant and 5 is very important)

Q.167C An opportunity to repay something, give something back

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

1 Unimportant

2

3

4

5 Very important

Note: Austria:

Filter instruction deviating from Master Questionnaire. None of the respondents with q165 "none" should have been asked q167a to q180n.

Malta:

Question not asked in Field Questionnaire. Computed and coded as -4 'question not asked'.

q176j - why voluntary work: make a contribution to my local community (Q167J)

Q.167

<Show card D>

Thinking about your reasons for doing voluntary work, please use the following five point scale to indicate how important each of the reasons below have been in your own case.

(Where 1 is unimportant and 5 is very important)

Q.167J To make a contribution to my
local community

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

1 Unimportant

2

3

4

5 Very important

Note: Austria:

Filter instruction deviating from Master Questionnaire. None of the respondents with q165 "none" should have been asked q167a to q180n.

Malta:

Question not asked in Field Questionnaire. Computed and coded as -4 'question not asked'.

q180n - why voluntary work: did not want to, but could not refuse (Q167N)

Q.167

<Show card D>

Thinking about your reasons for doing voluntary work, please use the following five point scale to indicate how important each of the reasons below have been in your own case.

(Where 1 is unimportant and 5 is very important)

Q.167N Did not want to, but could not refuse

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

1 Unimportant

2

3

4

5 Very important

Note: Austria:

Filter instruction deviating from Master Questionnaire. None of the respondents with q165 "none" should have been asked q167a to q180n.

Malta:

Question not asked in Field Questionnaire. Computed and coded as -4 'question not asked'.

q180n by c_abrv, Absolute Values (Row Percent), weighted by weight_g

q226k - don't like as neighbours: drug addicts (Q216K)

Q.216

<Show card E>

On this list are various groups of people. Could you please sort out any that you would not like to have as neighbours?

<Code an answer for each>

Q.216K Drug addicts

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 0 Not mentioned
- 1 Mentioned

Note: Multiple response questions are split into a set of dichotomized variables (1 mentioned, 0 not mentioned) which represent each of the original categories and are identified by the respective original category code as question number suffix.

Response categories documented according to dataset. In Master Questionnaire response categories are:

1. mentioned
2. not mentioned

q242 - how much control over your life (Q242)

Q.242

<Show card F>

Some people feel they have completely free choice and control over their lives, and other people feel that what they do has no real effect on what happens to them. Please use the scale to indicate how much freedom of choice and control you feel you have over the way your life turns out?

q246a - why do people live in need: most important (Q246a)

Q.246a

<Show card H>

Why are there people in this country who live in need? Here are four possible reasons. Which one reason do you consider to be most important?

<Code one under (a) below>

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 Because they are unlucky
- 2 Because of laziness and lack of willpower
- 3 Because of injustice in our society
- 4 It's an inevitable part of modern progress
- 5 None of these

Note: Please see flag variable f246a which indicates inconsistencies for variables q246a and q247b.

f246a - flag variable: why do people live in need - most/second important (Q246A/Q247B)

Flag variable:

Indicates inconsistencies for the variables q246a to q246b.

If most important reason is identical with next important reason.

if q246a=q247b then f246a=1

0 consistent

1 inconsistent

Note: For more detailed information, see EVS 1990 variable report.

q247b - why do people live in need: 2nd most important (Q247b)

Q.247b

And which reason do you consider to be the second most important?

<Code one under (b) below>

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 Because they are unlucky
- 2 Because of laziness and lack of willpower
- 3 Because of injustice in our society
- 4 It's an inevitable part of modern progress
- 5 None of these

Note: Please see flag variable f246a which indicates inconsistencies for variables q246a and q247b.

q270 - work is like a business transaction (Q270_1)

Q.270

<Ask all>

<Show card L>

Here are some statements about why people work. Irrespective of whether you have a job, or not, which of them comes closest to what you think?

Q.270_1 Work is like a business transaction. The more I get paid, the more I do; the less I get paid, the less I do.

q270_cs - statements about why people work (Q270_CS)

Q.270_cs

Here are some statements about why people work. Irrespective of whether you have a job, or not, which of them comes closest to what you think?

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 Work is like a business transaction. The more I get paid, the more I do; the less I get paid, the less I do.
- 2 I will always do the best I can regardless of pay
- 3 Working for a living is a necessity; I wouldn't work if I didn't have to
- 4 I enjoy working but I don't let it interfere with the rest of my life
- 5 I enjoy my work; it's the most important thing in my life
- 6 I never had a paid job

Note: Question asked in France, Netherlands, Iceland, Czech Republic and Slovakia: Question with only one answer (6 answer categories) instead of multiple-answer question.

Data available for all countries: Variable reconstructed with q270 to q275.

q277 - fair/unfair: quicker secretary is paid more (Q277)

Q.277

Imagine two secretaries, of the same age, doing practically the same job. One finds out that the other earns £ 20 (Countries other than UK: Please use own currency) a week more than she does. The better paid secretary, however, is quicker, more efficient and more reliable at her job.

In your opinion is it fair or not fair that one secretary is paid more than the other?

q279 - follow instructions at work/must be convinced first (Q279)

Q.279

<Show card N>

People have different ideas about following instruction at work. Some say that one should follow instructions of one's superiors even when one does not fully agree with them. Others say that one should follow one's superior's instructions only when one is convinced that they are right. Which of these two opinions do you agree with?

q331 - good and evil: clear/no clear guidelines (Q331)

Q.331

<Show card P>

Here are two statements which people sometimes make when discussing good and evil. Which one comes closest to your own point of view?

A: There are absolutely clear guidelines about what is good and evil. These always apply to everyone, whatever the circumstances.

B: There can never be absolutely clear guidelines about what is good and evil. What is good and evil depends entirely upon the circumstances at the time.

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

1 Agree with statement A

2 Agree with statement B

3 Disagree with both

q373a - how many times married (constructed) (Q373A)

Q.373A

How many times have you been married?

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 more than once
- 2 only once
- 3 never

Note: 2 separate questions in master questionnaire ('Have you been married before' with 3 answer categories and follow up 'How many times have you been married' with 4 answer categories). In most countries these two questions were combined into one question. Therefore question wording and answer categories differ from the master question (4 instead of 3 answer categories: 'once', 'twice', 'more than once', 'never been married').

Estonia, Iceland, Latvia, Lithuania, and Norway:

q374 - share with partner: attitudes towards religion (Q374_1)

Q.374

<Ask all except singles>

Do (did) you and your partner share any of the following?

<Read out and code all mentioned>

Q.374_1 Attitudes towards religion

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

0 No

1 Yes

Note: Multiple response questions are split into a set of dichotomized variables (1 Yes, 0 No) which represent each of the original categories and are identified by the respective original category code as question number suffix.

Please see flag variable f379 which indicates inconsistencies for variables q374 to q379.

f379 - flag variable: share with partner: none of these (Q374_6)

Flag variable:

Indicates inconsistencies for the variables q374 to q378.

Inconsistent 1

If respondent mentions at least one attitude and "none".

if q379=1 and any of q374 to q378=1 then f379=1

Inconsistent 2

If respondent does not mention any attitude and does not mention "none".

if q379=0 and all of q374 to q378=0 then f379=2

Inconsistent 3

If respondent does not mention any attitude and "none" is missing.

if q379=-2 or -1 and all of q374 to q378=0 then f379=3

Inconsistent 4

If respondent mentions at least one attitude and "none" is missing.

if q379=-2 or -1 and any of q374 to q378=1 then f379=4

Note: For more detailed information, see EVS 1990 variable report.

q421 - share with parents: none of these (Q416_6)

Q.416

<Ask all>

And how about your parents? Do (did) you and your parents share any of the following?

<Read out and code all mentioned>

Q.416_6 None of these

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

0 No

1 Yes

Note: Multiple response questions are split into a set of dichotomized variables (1 Yes, 0 No) which represent each of the original categories and are identified by the respective original category code as question number suffix.

Please see flag variable f421 which indicates inconsistencies for variables q416 to q421.

f421 - flag variable: share with parents: none of these (Q416_6)

Flag variable:

Indicates inconsistencies for the variables q416 to q420.

Inconsistent 1

If respondent mentions at least one attitude and "none".

if q421=1 and any of q416 to q420=1 then f421=1

Inconsistent 2

If respondent does not mention any attitude and does not mention "none".

if q421=0 and all of q416 to q420=0 then f421=2

Inconsistent 3

If respondent does not mention any attitude and "none" is missing.

if q421=-2 or -1 and all of q416 to q420=0 then f421=3

Inconsistent 4

If respondent mentions at least one attitude and "none" is missing.

if q421=-2 or -1 and any of q416 to q420=1 then f421=4

Note: For more detailed information, see EVS 1990 variable report.

q462j - learn children at home: unselfishness (Q453J)

Q.453

<Show card Y>

Here is a list of qualities which children can be encouraged to learn at home. Which, if any, do you consider to be especially important?

Please choose up to five?

<Code five only>

Q.453J Unselfishness

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 0 Not mentioned
- 1 Important

Note: Multiple response questions are split into a set of dichotomized variables (1 important, 0 not mentioned) which represent each of the original categories and are identified by the respective original category code as question number suffix.

Please see flag variable f463 which indicates inconsistencies for variables q453a and q463k.

f463 - flag variable: learn children at home (Q262)

Flag variable:

Indicates inconsistencies for the variables q453a to q463k.

If respondent named more than the allowed 5 qualities.

if q453a to q463k=1 > 5 then f463=1

0 Limitation followed

1 Limitation ignored

Note: For more detailed information, see EVS 1990 variable report.

q468d - abortion if couple doesn't want more children (Q465D)

Q.465

<Show card Z>

Do you approve or disapprove of abortion under the following circumstances?

Q.465D Where a married couple does not want to have any more children

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 0 Disapprove
- 1 Approve

Response categories documented according to dataset. In Master Questionnaire response categories are:

1. approve
2. disapptove

q475d - political action: joining unofficial strikes (Q472D)

Q.472

<Show card AA>

Now I'd like you to look at this card. I'm going to read out some different forms of political action that people can take, and I'd like you to tell me, for each one, whether you have actually done any of these things, whether you might do it or would never, under any circumstances, do it.

Q.472D Joining unofficial strikes

q477 - more important: freedom or equality (Q477)

Q.477

<Show card BB>

Which of these two statements comes closest to your own opinion?

A: I find that both freedom and equality are important. But if I were to choose one or the other, I would consider personal freedom more important, that is, everyone can live in freedom and develop without hinderance;

B: Certainly both freedom and equality are important. But if I were to choose one or the other, I would consider equality more important, that is, that nobody is underprivileged and that social class differences are not so strong

-5 other missing

q480 - opinion on society (Q480)

Q.480

<Show card DD>

On this card are three basic kinds of attitudes vis-à-vis the society we live in. Please choose the one which best describes your own opinion.

<Code one only>

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

1 The entire way our society is organised must be radically changed by revolutionary action

2 Our society must be gradually improved by reforms

3 Our present society must be valiantly defended against all subversive forces

Romania:

Question not asked in Field Questionnaire. Computed and coded as -4 'question not asked'.

q516a - equalize incomes vs. incentives for individual effort (Q516A)

Q.516A

<Show card EE>

Now I'd like you to tell me your views on various issues. How would you place your views on this scale?

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

1 Incomes should be made more equal

2

3

4

5

6

7

8

9

10 There should be greater incentives for individual effort

q524e - competition good vs. harmful for people (Q516E)

Q.516E

<Show card EE>

Now I'd like you to tell me your views on various issues. How would you place your views on this scale?

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

1 Competition is good. It stimulates people to work hard and develop new ideas

2

3

4

5

6

7

8

9

10 Competition is harmful, it brings out the worst in people

q526f - hard work brings better life vs. doesn't bring success (Q516F)

Q.516F

Show card EE

Now I'd like you to tell me your views on various issues. How would you place your views on this scale?

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 Don't know

1 In the long run, hard work usually brings a better life

2

3

4

5

6

7

8

9

10 Hard work doesn't generally bring success - it's more a matter of luck and connections

q528g - accumulate wealth at expense of others vs. enough for everyone (Q516G)

Q.516G

<Show card EE>

Now I'd like you to tell me your views on various issues. How would you place your views on this scale?

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

1 People can only accumulate wealth at the expense of others

2

3

4

5

6

7

8

9

10 Wealth can grow so there's enough for everyone

q530a - aims of this country: most important (Q530)

Q.530

<Show card FF>

There is a lot of talk these days about what the aims of this country should be for the next ten years. On this card are listed some of the goals which different people would give top priority. Would you please say which one of these you, yourself, consider the most important?

<Code one answer only>

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

1 Maintaining a high level of economic growth

2 Making sure this country has strong defence forces

3 Seeing that people have more say about how things are done at their jobs and in their communities

4 Trying to make our cities and countryside more beautiful

Note: Please see flag variable f530a which indicates inconsistencies for variables q530a and q531b.

Romania:

Question not asked in Field Questionnaire. Computed and coded as -4 'question not asked'.

f530a - flag variable: aims of this country - most /second important (Q530/Q531)

Flag variable:

Indicates inconsistencies for the variables q530a to q531b.

If most important aim is identical with next most important aim.

if q530a=q531b then f530a=1

0 consistent

1 inconsistent

Note: For more detailed information, see EVS 1990 variable report.

f532a - flag variable: aims of respondent: first/second choice(Q532a/Q533b)

Flag variable:

Indicates inconsistencies for the variables q532a to q533b.

If most important aim is identical with next most important aim.

if q532a=q533b then f532a=1

0 consistent

1 inconsistent

Note: For more detailed information, see EVS 1990 variable report.

q533b - aims of respondent: second choice(Q533b)

Q.533b

And which would be the next most important?

<Code one answer only>

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 Maintaining order in the nation
- 2 Giving people more say in important government decisions
- 3 Fighting rising prices
- 4 Protecting freedom of speech

Note: Please see flag variable f532a which indicates inconsistencies for variables q532a and q533b.

q534a - aims of respondent II: first choice(Q534a)

Q.534a

<Show card HH>

Here is another list. In your opinion, which one of these is most important?

<Code one answer only>

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 A stable economy
- 2 Progress toward a less impersonal and more human society
- 3 Progress toward a society in which ideas count more than money
- 4 The fight against crime

Note: Please see flag variable f534a which indicates inconsistencies for variables q534a and q535b.

f534a - flag variable: aims of respondent II: first choice/second choice (Q534a/535b)

Flag variable:

Indicates inconsistencies for the variables q534a to q535b.

If most important aim is identical with next most important aim.

if q534a=q535b then f534a=1

0 consistent

1 inconsistent

Note: For more detailed information, see EVS 1990 variable report.

q535b - aims of respondent II: second choice (Q535b)

Q.535b

<Show card HH>

And what would be the next most important?

<Code one answer only>

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 A stable economy
- 2 Progress toward a less impersonal and more human society
- 3 Progress toward a society in which ideas count more than money
- 4 The fight against crime

Note: Please see flag variable f534a which indicates inconsistencies for variables q534a and q535b.

q636s - do you justify: not report damage done to a vehicle (Q565S)

Q.565

<Show card LL>

Please tell me for each of the following statements whether you think it can always be justified, never be justified, or something in between, using this card.

<Read out statements reversing order for alternate contacts. Code one answer for each statement>

Q.565S Failing to report damage you've done accidentally to a parked vehicle

f648a - flag variable: belong to geographic group - most/second (Q648A/Q649B)

Flag variable:

Indicates inconsistencies for the variables q648a to q649b.

If geographical group that respondent states to belong to first of all is identical with secondly stated group.

if q648a=q649b then f648a=1

0 consistent

1 inconsistent

Note: For more detailed information, see EVS 1990 variable report.

q651a - major changes in life cautious vs. act boldly (Q651A)

Q.651A

<Show card NN>

Now I want to ask you some questions about your outlook on life. Each card I show you has two contrasting statements on it. Using the scale listed, could you tell me where you would place your own view? 1 means you agree completely with the statement on the left, 10 means you agree completely with the statement on the right, or you can choose any number in between.

-5 other missing

-4 question not asked

q655c - personal characteristics: changes, worry or welcome possibility (Q651C)

Q.651C

<Show card NN>

Now I want to ask you some questions about your outlook on life. Each card I show you has two contrasting statements on it. Using the scale listed, could you tell me where you would place your own view? 1 means you agree completely with the statement on the left, 10 means you agree completely with the statement on the right, or you can choose any number in between.

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

1 When changes occur in my life, I worry about the difficulties they may cause.

2

3

4

5

6

7

8

9

10 When changes occur in my life, I welcome the possibility that something new is beginning

q657a - personal characteristics: I usually count on being successful (Q657A)

Q.657

<Show card OO>

A variety of characteristics are listed here. Could you take a look at them and select those which apply to you?

Q.657A I usually count on being successful in everything I do

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 0 Not mentioned
- 1 Mentioned

Note: Multiple response questions are split into a set of dichotomized variables (1 mentioned, 0 not mentioned) which represent each of the original categories and are identified by the respective original category code as question number suffix.

Please see flag variable f665 which indicates inconsistencies for variables q657a and q665.

f665 - flag variable: personal characteristics: none of the above (Q657)

Flag variable:

Indicates inconsistencies for the variables q657a to q664h.

If respondent mentions at least one characteristic and "none".

if q665=1 and any of q657a to q664h=1 then f665=1

0 consistent

1 inconsistent

Note: For more detailed information, see EVS 1990 variable report.

q673 - opinion on European Union (Q673)

Q.673

<Show card RR>

There is much talk about what the individual member states of the European Community Union have in common and what makes each one distinct.

<Interviewer presents illustration with responses and scale from 1 to 7>

A: Some people say: If the European member states were truly to be united, this would mean the end of their national, historical and cultural identities. Their national economic interests would also be sacrificed.

B: Others say: Only a truly united Europe can protect its states' national, historical and cultural identities and their national economic interests from the challenges of the superpowers.

Which opinion is closest to your own opinion, the first one or the second one? Please use the scale listed. 1 would mean that you agree completely with A and 7 would mean that you agree completely with B. The numbers in between allow you to show which of the opinions you tend to agree with, whether you tend to agree more with the one or with the other.

Note: Standardized country-specific variable containing country ISO 3166-1 identifier (CCC) and country-specific categories (political parties).

Please see flag variable f674a which indicates inconsistencies for variables q674a and q676b.

Estonia, Latvia, Lithuania and Malta:

Question not asked in Field Questionnaire. Computed and coded as -4 'question not asked'.

f674a - flag variable: which political party would you vote for (Q674A/Q676B)

Flag variable:

Indicates inconsistencies for the variables q674a to q676b.

If party respondent states to vote for first of all is identical with second stated party.

if q674a=q676b then f674a=1

0 consistent

1 inconsistent

Note: For more detailed information, see EVS 1990 variable report.

q724 - employment status (Q724a)

Q.724a

Are you yourself employed now or not? If yes: About how many hours a week?

<If more than one job: only for the main job>

Has paid employment

- 1 30 hours a week or more
- 2 less than 30 hours a week
- 3 self employed

If no paid employment

- 4 retired/pensioned
- 5 housewife not otherwise employed
- 6 student
- 7 unemployed
- 8 other

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

q731_cs - income household respondent (Q731) (country specific)

Q.731

<Ask all>

<Show income card>

Here is a scale of incomes and we would like to know in what group your household is, counting all wages, salaries, pensions and other incomes that come in. Just give the letter of the group your household falls into, before taxes and other deductions.
