Acknowledgements

The fieldwork of the European Values Study during the four waves was financially supported by universities and research institutes, national science foundations, charitable trusts and foundations, companies and church organizations in the EVS member countries.

Detailed information on the history of the European Values Study (EVS) is given on the [EVS website \(http://www.europeanvaluesstudy.eu/\)](http://www.europeanvaluesstudy.eu/). For information on the origin and study design of the EVS wave 1981, as well as data and documentation provided, please go to www.europeanvaluesstudy.eu/evs/surveys/survey-1981.html.

The datasets and related materials were delivered by the European Values Study group at Tilburg University. Preparation and documentation of European Values Study primary data for long term preservation and usability proceed in cooperation between the EVS teams at Tilburg University and GESIS Data Archive for the Social Sciences Cologne.

Introduction and preliminary remarks

The data release (Version 3.0.0, 2011-11-20) includes data and documentation of the 16 countries participating in European Values Study 1981. To make the data accessible in a user friendly way, the Variable Report on the Integrated Dataset of EVS 1981 is provided. It offers a comprehensive description of the data on study and variable level. In addition, the Variable Documentation in the present report (section seven) contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate weight.

The report is structured into seven sections:

- Section 1 provides brief information on the European Values Study.
- Section 2 gives an overview of all data and documentation available.
- Section 3 includes information about the dataset version and changes from previous release.
- Section 4 contains methodological information on origin and content of the data.
- Section 5 refers to the structure of the dataset and standardization efforts made.
- Section 6 provides the explanation of the Variable Documentation.
- The last section contains the Variable Documentation. It describes variables in the data file in terms of relevant metadata and frequency distribution.

Data access

Primary data for statistical analysis and related documentation (English Master Questionnaire, national field questionnaires, and variable report) are made available online through the GESIS Data Catalogue (<http://dbk.gesis.org/dbksearch/GDESC2.asp?no=0009&DB=E>).

Anonymized data

According to data regulations in participating countries, only anonymized data are made available to users. Each national team was responsible for checking their data confidentiality before depositing data.

Citation requirements

Publications based on EVS data should acknowledge this by means of bibliographic citations as listed in the Study Description under item "Citation". To ensure that such source attributions are captured for social science bibliographic utilities, citations must appear in the footnotes or in the reference section of publications.

Usage requirement

To provide funding agencies with essential information about the use of EVS data and to facilitate the exchange of information about the EVS, users of EVS data are required to send bibliographic citations and/or electronic copies of each completed report, article, conference paper or thesis abstract using EVS data to the EVS team. Then, these will be included in the EVS repository. For more information, see www.europeanvaluesstudy.eu/evs/publications/.

Disclaimer

EVS, GESIS, and the producers bear no responsibility for the use of EVS data, or for interpretations or inferences based on these uses. EVS, GESIS, and the producers accept no liability for indirect, consequential or incidental damages or losses arising from use of the data collection, or from the unavailability of, or break in access to the service for whatever reason.

1 European Values Study 1981-2008

The European Values Study is the most comprehensive research project on human values in Europe. It is a large-scale, cross-national, and longitudinal survey research program on how Europeans think about family, work, religion, politics and society. Repeated every nine years in an increasing number of countries, the survey provides insights into the ideas, beliefs, preferences, attitudes, values, and opinions of citizens all over Europe.

The research program was initiated by the European Value System Study Group (EVSSG) in the late 1970s and has emerged as a well-established network of social and political scientists aiming at high standards in data creation and processing. So far, four waves of survey were conducted in European and other countries. These surveys explore value differences, similarities, and value changes.

Survey 1981

The first EVS wave was conducted by the European Values Systems Study Group (EVSSG) in 1981, when citizens of the EU Member States of that time and the USA and Canada were interviewed. The national datasets were combined into an international dataset including altogether 16 countries¹. Table 1 gives an overview of countries participating in EVS waves and year of fieldwork.

Table 1: Participating countries in European Values Study 1981-2008

*1981 only Germany (West)

More information on the steering group and the technical group established for coordinating the EVS 1981 Survey, developing the questionnaire, and conducting the fieldwork is given at www.europeanvaluesstudy.eu/evs/surveys/survey-1981.html.

2 Access to data and documentation

The data and documentation of the four EVS waves is publicly available at the EVS and GESIS websites.

Data: For EVS 1981 the Integrated Dataset is provided.

Study Description: The study description offers methodological information on origin and content of the data and overviews on dataset versions and errata.

Variable Report: The *EVS 1981 Variable Report* combines variable descriptions of the Integrated Dataset with question texts of the English Master Questionnaire, as well as frequency counts, by country (sample), for almost all variables.

Questionnaires: The English Master Questionnaire and the field questionnaires are downloadable.

Access to EVS data and documentation

General study information

The EVS website (www.europeanvaluesstudy.eu) covers comprehensive information on the origin of the project and provides access to all data and documentation available for EVS surveys.

Data and documentation download

Data and documentation can be obtained at the GESIS Data Archive for the Social Sciences in Cologne through their online download facilities GESIS Data Catalogue (<http://dbk.gesis.org/dbksearch/GDESC2.asp?no=0009&DB=E>) and ZACAT-Online Study Catalogue (<http://zacat.gesis.org/webview/index.jsp?object=http://zacat.gesis.org/obj/fCatalog/Catalog5>).

GESIS Data Catalogue contains study descriptions for all datasets providing information on the origin of data, version history, and errata. It supports direct access to data and documentation for download.

ZACAT provides data and documentation for retrieval purposes and data exploration. It assists users in identifying trend variables of all EVS waves. Furthermore, it enables comparisons of original questions in survey languages of the third and fourth wave.

Data analyses and data downloads are possible after registration.

Online variable information

Online Variable Overview (<http://info1.gesis.org/EVS/Variables/>) allows for comparisons of trend variables of the four EVS waves 1981, 1990, 1999, and 2008. In addition, comparisons of original question texts across the waves 1999 and 2008 are supported.

Full-text retrieval

Question text retrieval is a facility for word/phrase searches in EVS text documents. It supports full-text searches in the master questionnaire and variable reports on the EVS integrated datasets and national datasets.

Publication

EVS Repository (www.europeanvaluesstudy.eu/evs/publications/) contains direct links to publications based on the data of the European Values Study. A subset of the publications is enhanced by additional information on the data, interview questions, and syntax codes of concepts used.

Atlas of European Values "Trends and Traditions at the turn of the Century"

The Atlas of European Values (www.atlasofeuropeanvalues.eu) unlocks the results of the European Values Study project for the general public. It presents values, beliefs, attitudes, and opinions through graphs, charts, and maps.

Secondary education

For secondary education, an interactive website offers courses and modules in different languages to provide a better understanding of European values in the classroom (<http://www.europeanvaluesstudy.eu/evs/education.html>).

3 Dataset version and changes from previous release

In order to uniquely identify a dataset, each dataset version is assigned a GESIS Study No., a version no., and a Digital Object Identifier (doi). The doi is linked to the Study Description in the GESIS Data Catalogue. Metadata entered in the Study Description of EVS 1981 data and associated with a doi are provided to the Registration agency for social science data ([dajra](https://www.dajra.eu)).

The [doi:10.4232/1.10791](https://doi.org/10.4232/1.10791) is assigned to the EVS 1981 Integrated Dataset (v.3.0.0) including the 16 national datasets.

3.1 Version of datasets

Variable **"version"** includes the GESIS archive version number of a dataset and the corresponding release date. It is composed of a sequence of three numbers (alphanumeric string).

- The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases).
- The minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels).
- The third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

In Table 2 the GESIS Study No. of the Integrated Dataset and the included national samples², as well as the doi, dataset version and version date of the current release is listed.

Table 2: Digital Object Identifier (doi) and version of EVS 1981 dataset

Country/Region	Study No.	Digital Object Identifier	Version	Version date
Integrated Dataset	ZA4438	doi=10.4232/1.10791	3.0.0	2011-11-20
Belgium	ZA4439			
Denmark	ZA4440			
France	ZA4441			
Germany	ZA4442			
Great Britain	ZA4443			
Iceland	ZA4445			
Ireland	ZA4444			
Northern Ireland	ZA4450			
Italy	ZA4446			
Malta	ZA4448			
Netherlands	ZA4449			
Norway	ZA4498			
Spain	ZA4451			
Sweden	ZA4499			
Canada	ZA4447			
USA	ZA4452			

² For EVS waves 1981 and 1990, integrated datasets are provided only; for EVS 1999 and 2008 the single national datasets are accessible additionally.

3.2 Main changes and updates from previous data release

From edition 2.0.0 to 3.0.0

The third release of the EVS 1981 Integrated Dataset contains additional variables, data and metadata updates, and improvements to the second release. The main changes are listed here.

Variables added to the dataset

The following variables were added to the Integrated Dataset:

<i>Variable</i>	<i>Label</i>
version	GESIS archive version
versionc	GESIS archive version (EVS national datasets)
studynoc	GESIS study number (national datasets)
id_cocas	unified respondent number
cntry_y	country-year
c_abrv	country abbreviation
age_r	age (recoded)
age_r2	age (recoded into 3 intervals)
v271_01	do you belong to a religious denomination (Q156)
v461_4	post-materialist index 4-item
v551_r*	age completed education respondent (Q361)
v570_r	income household respondent (Q376)
v575	year/month of start-fieldwork
v576	year/month of end-fieldwork
flag variables	for indicating inconsistencies (see Table 7 and Appendix 1)

*Original variable v551 was surveyed as categorised variable. For the purpose of providing comparability across waves, the variable has been recoded to an 'open' format. However, please note that the first and last categories do not represent an exact year but ranges (0-12 and 21 years and more). When using this variable be aware that the initial variable v551 corresponds to the recoded (categorised) variables in EVS waves 2-4.

Renamed variables

Naming of some variables was adjusted for consistency with EVS waves and the Longitudinal Data File.

<i>Variable renamed</i>	<i>Label</i>
respno to caseno	original respondent number
weight to weight_g	weight
v653_cs to v653_us	size of town where interview was conducted (US)
v535_cs to v535_us	belong to geographic group: next (6 answer categories) (Q346b_US)
v534_cs to v534_us	belong to geographic group: most (6 answer categories) (Q346a_US)

Variables coded according to ISO 3166-1

For standardization across EVS waves country identifiers according to ISO 3166-1 (3-digit or alphanumeric country code) were added to the following variables: id_cocas, country, c_abrv, cntry_y, v532, v534_us, v535_us, v569, v570_cs, v571_cs, v653_us.

For more information see section 5.1.2: Variables with country codes. An overview of ISO 3166-1 country codes and supplements for countries or (sub-national) areas is provided as well.

Changed alphanumerical country codes

Some codes of the alphanumerical country code (ISO 3166-1 alpha-2) in variable "**c_abrv: country abbreviation**" were modified. Country abbreviation in country specific value labels were adjusted accordingly in the variables v532 v570_cs, v571_cs and v569.

Great Britain	GB to GB-GBN
Northern Ireland	NIR to GB-NIR

Numerical country code:

Germany	900 'Germany West' to 276 'Germany'
---------	-------------------------------------

Data checks and data corrections

The data was checked for filter inconsistency and contradictions between variables of item batteries:

- For the most common non-conformed interviewer instructions and illogic answer-patterns across the national datasets, flag variables are created (see section 5.2.1: Flag variables indicating inconsistencies).
- Variables with skip patterns deviating from Master Questionnaire and inconsistent filter, respectively, were not corrected but marked by notes (see section 5.2.2: Notes indicating deviating filtering).

Further corrections are related to:

- Variable v572 'Socio-economic status socio-economic status respondent (Q377b)': For standardization across EVS waves, variable was recoded (v572 (7=1) (8=2) (9=3) (11=4) (else=copy)).
- Variable v461_4 'post-materialist index 4-item' was constructed differently than in the Longitudinal Data File Version (1.0.0). If a person chose twice the same materialistic (1/1 or 3/3) or post-materialistic (2/2 or 4/4) aim in Q277A (v460) and Q277B (v461), he/she was coded as materialistic or post-materialistic person. To exclude these 63 cases (36 materialist and 27 post-materialists) of equal mentions from analysis use the flag variable f460 for filtering. In earlier versions of the Longitudinal Data File these persons were codes as 2 'mixed'.
- Variable v553 'Are there children 18 year and over': Variable was deleted from dataset as data was not available.
- Variable v532: Cases with wild code '0' (N=43) were coded into -5 'other missing'

Recodes for standardization across waves

Values/value labels of item batteries were standardized across the EVS waves:

- Values 1 'yes'/0 'no': value code 2 'no' recoded to 0 'no'
Variables: v308 to v315.
- Values 1 'approve'/0 'disapprove': value code 2 'disapprove' recoded to 0 'disapprove'
Variables: v523 to v526.

Updated (internal) metadata of the dataset

Variable labels and variable formats were standardized across the EVS waves and the Longitudinal Data File. In addition, misleading value labels were adjusted for all EVS waves according to the English

Master Questionnaire (for definition of 'missing values', see section 5: Dataset structure and variable definition).

- 1 'yes'/0 'no' items
Variables: v157 to v166, v259 to v266, v356 to v369
- 1 'important'/0 'not mentioned' items
Variables: v430 to v446

Updated Variable Documentation

Variable documentation included in the Variable Report of EVS 1981 additionally covers weighted tables based on country variable c_abrv 'country abbreviation'.

An overview of all variables included in EVS waves and Longitudinal Data File is given in Appendix 2.

3.3 New features

Section [Errata and Version](#) in the Study Description of the GESIS Data Catalogue provides errata detected to date and related to the last dataset version. For major problems, patches for solving the data problems will be provided.

The [Online Variable Overview](#) includes all variables of the four EVS waves 1981/1990/1999/2008 and the Longitudinal Data File 1981-2008. The variables of all waves are documented with the English question texts; for EVS 1999 and EVS 2008 the original question texts are provided additionally. This gives an overview of all comparable variables across waves and allows for comparisons of original question texts across the waves 1999 and 2008.

The web page [Compare question texts](#) serves users who want to check the translations of the English master questions, compare original questions across languages, countries, or waves (EVS 1999/EVS 2008), and report problems or peculiarities. Problems in original question texts spotted and reported to date are listed on this page.

The [EVS mailing list](#) is maintained by GESIS and the European Values Study team at Tilburg University. It provides a venue for researchers to interact with each other and to increase communication between the archive and the EVS user community. By subscribing to the list, you will be informed about events, publications, new data and documentation offers, data updates, and errata for EVS surveys.

For regular information about EVS Data and Documentation News, you can also subscribe to the [RSS Feed](#).

4.2 Study scope

Abstract: Moral, religious, societal, political, work, and family values of Europeans. Data set from the year 1981.

Topics

Feeling of happiness; state of health; ever felt: very excited or interested, restless, proud, lonely, pleased, bored, depressed, upset because of criticism; when at home: feeling relaxed, anxious, happy, aggressive, secure; respect and love for parents; important child qualities: good manners, politeness and neatness, independence, hard work, honesty, feeling of responsibility, patience, imagination, tolerance, leadership, self-control, saving money, determination perseverance, religious faith, unselfishness, obedience, loyalty; attitude towards abortion; way of spending leisure time: alone, with family, with friends, in a lively place; frequency of political discussions; opinion leader; voluntary engagement in: welfare service for elderly, education, labour unions, political parties, human rights, environment, professional associations, youth work, consumer groups; dislike being with people with different ideas; will to help; characterisation of neighbourhood: people with a criminal record, of a different race, heavy drinkers, emotionally unstable people, immigrants or foreign workers, left-wing or right-wing extremists, people with large families, students, unmarried mothers, members of minority religious sects or cults; general confidence; young people trust in older people and vice versa; satisfaction with life; freedom of choice and control; satisfaction with financial situation of the household; financial situation in 12 months; important values at work: good pay, not too much pressure, job security, a respected job, good hours, opportunity to use initiative, generous holidays, responsibility, interesting job, a job that meets one's abilities, pleasant people, chances for promotion, useful job for society, meeting people; look forward to work after weekend; pride in one's work; exploitation at work; job satisfaction; freedom of decision taking in job; behaviour at paid free days: find extra work, use spare time to study, spend time with family and friends, find additional work to avoid boredom, use spare time for voluntary work, spend time on hobbies, run own business, relaxing; fair payment; preferred management type; attitude towards following instructions at work; satisfaction with home life; sharing attitudes with partner and parents: towards religion, moral standards, social attitudes, political views, sexual attitudes; ideal number of children; child needs a home with father and mother; a woman has to have children to be fulfilled; sex cannot entirely be left to individual choice; marriage as an out-dated institution; woman as a single parent; enjoy sexual freedom; important values for a successful marriage: faithfulness, adequate income, same social background, respect and appreciation, religious beliefs, good housing, agreement on politics,

understanding and tolerance, apart from in-laws, happy sexual relationship, sharing household chores, children, taste and interests in common; accepted reasons for divorce; main aim of imprisonment; willingness to fight for the own country; fear of war; expected future changes of values; opinion about scientific advances; interest in politics; political action: signing a petition, joining in boycotts, attending lawful demonstrations, joining unofficial strikes, occupying buildings or factories, damaging things and personal violence; preference for freedom or equality; self-positioning on a left-right scale; basic kinds of attitudes concerning society; confidence in institutions: churches, armed forces, education system, the press, labour unions, the police, parliament, the civil services, major companies and the justice system; living day to day because of uncertain future; party preference and identification; regularly reading of a daily newspaper; frequency of TV watching; opinion on terrorism; thinking about meaning and purpose of life; feeling that life is meaningless; thoughts about dead; good and evil in everyone; regret having done something; worth risking life for: country, another's life, justice, freedom, peace and religion; attitude towards good and evil and religion and truth; religious denomination; church attendance; self placement as religious person; churches give answers to: moral problems, problems of family life, spiritual needs, importance of religion in the future; believe in: God, life after death, soul, hell, heaven, sin, re-incarnation and devil; personal God vs. spirit or life force; importance of God; comfort and strength from religion; moments of prayer or meditation; applying of the ten commandments to the interviewee himself and to most people; feel in touch with someone far away; seen events that happened far away; feel in touch with someone dead; feel close to a powerful life force; altered outlook on life through transcendental experience; relationship between the parents and relationship between interviewee and his mother and father; strict education through the parents; moral values: personal attitudes and expected attitude of most people towards unjustified claiming of government benefits, avoiding fare on public transport, cheating on taxes, accepting a bribe, homosexuality, prostitution, abortion, divorce, euthanasia, suicide, joyriding, taking soft drugs, lying, adultery, sex under the legal age of consent, political assassination, buying stolen goods, keeping money that one finds, fighting with the police, hit-and-run driving, strikebreaking, killing in self-defence; consumption of alcohol; illegal drug-taking and alcoholism as a serious problem in the respondent's country; proud of nationality.

Demography: sex; year of birth; age; marital status; number of children; size of household; number of people in the household aged 18 and older; number of people in the household at different age groups; living with parents; house or apartment; employment status; profession of chief wage profession; seize if department; member of a labour union; socio-economic status of interviewee; income; size of town; type of habitat; ethnic group.

Additionally encoded: country; region; confidence of the interviewee during the interview.

Universe: Adult population of the country 18 years and older

4.3 Methodology and processing

Selection method

Nationally representative samples were selected. The target number of interviews in each country was set at 1000, with an additional booster quota sample of 200 young adults aged 18-24.

Mode of data collection: Personal interview with standardized questionnaire

Number of units: 19.378

Number of variables: 370

Fieldwork period

Table 3: *Fieldwork period 1981-1984*

Country/Region	1981-1984
Belgium	1981-03-01 to 1981-05-31
Canada	1982
Denmark	1981-03-01 to 1981-05-31
France	1981-03-01 to 1981-05-31
Germany (1981 only West Germany)	1981-03-01 to 1981-05-31
Great Britain	1981-03-01 to 1981-05-31
Iceland	1984
Ireland	1981-03-01 to 1981-05-31
Italy	1981-03-01 to 1981-05-31
Malta	1983-11 to 1984-02
Netherlands	1981-03-01 to 1981-05-31
Northern Ireland	1981-03-01 to 1981-05-31
Norway	1982-11 to 1982-12
Spain	1981-03-01 to 1981-05-31
Sweden	1982
USA	1982-03-01 to 1982-03-31

Usage regulations

Data and documents are released for academic research and teaching - Access category A.

5 Dataset structure and variable definition

The naming of variables follows several standards differentiated by type of variables. Although variable names are not harmonized across waves, all standard variables are built in the scheme "xNNN" (e.g. v130). Exceptions are newly added standard variables, constructed variables, country-specific variables, and administrative variables (see section 5.1: Administrative and ID variables).

- Constructed/recoded variables are indicated with a respective suffix (*_r*).
- Country-specific variables, i.e. variables created for questions which could not be harmonized, or questions countries additionally included in the field questionnaire, are named by the alphanumeric country code (*_us* for USA according to ISO 3166-1 alpha-2). Their positions in the datasets mirror their positions in the field questionnaires.
- Another type of variables are country-specific variables indicated with a respective suffix "*_cs*". These are compiled variables constructed e.g. for religion and political party preference. They contain country identifier (ISO 3166-1) and the given order of country-specific categories in the field questionnaires. References to respective harmonized variables in Integrated Dataset are added as notes.

Missing values

In general, the missing values are standardized across EVS waves. For all variables a set of missing values is defined:

- 1 don't know
- 2 no answer
- 3 not applicable (missing values which result from filter questions; missing values in administrative variables)
- 4 question not asked (i.e. question not included in country's field questionnaire or not provided for by National Program Director of the EVS member countries)
- 5 other missing (includes: system missing, wild codes, illogic answer-patterns in e.g. filters)

Dummy variables

For questions that allow for multiple responses a dummy variable is created for each answer category. E.g. a question with four answer categories in an item battery has four dummy variables as final data. In general, a value "1" means that the respondent choose the particular category as an answer (mentioned, yes, ...). In case of a value "0" the respondent did not choose the particular category as answer (not mentioned, no, ...). Dummy variables are also created for "None of these", "Don't know" or other residual responses. Inconsistencies between choosing category 'none of these' and other mentioned items of a battery are flagged by flag variables (see section 5.2.1: Flag variables indicating inconsistencies).

5.1 Administrative and ID variables

Administrative variables are used mainly for identifying datasets with regard to version, wave, and country (see Table 4 below). They include different kinds of variables:

- Technical variables for identifying the dataset or cases
- Weighting variables to help adjust samples to the universe
- Cumulation of specific variables combining the information of different variables
- Special compound variables for creation of customized data files

Table 4: Overview of administrative variables

Variable name	Variable label
studyNo	GESIS Study Number
studyNoC*	GESIS Study Number (National datasets)
version	GESIS Archive Version
versionC*	GESIS Archive Version (National datasets)
id_cocas	unified respondent number
caseno	original respondent number
year	survey year
country	country code
c_abrv	country abbreviation
cntry_y	country_year
weight_g	weight
v575	year/month of start-fieldwork
v576	year/month of end-fieldwork

5.1.1 Identification variables

Each record in the Longitudinal Data File contains two identification variables:

Caseno: 'Original respondent number'

Id_cocas: 'Unified respondent number' consisting of year/country/case_id

Code comprises 11 digits: YYYY (year of wave), CCC (ISO-Code), NNNN (casenumber)

5.1.2 Variables with country codes

The following overview in Table 5 lists further variables for which country identifiers (ISO 3166-1 numeric or alphanumeric) were added to values. Information about the composition of values is given as well.

Table 5: Variables with country codes ISO 3166-1

Variable name	Variable Label	Composition of values (cc=country code)
country	country/region	CC_ISO (3 digits)
c_abrv	country/region	CC- ISO 3166-1 alpha-2
cntry_y	country/region-year	CC_ISO (3 digits)+Year
v532	political parties	CC_ISO (3 digits)+VALUE (3 digits)
v534_us v535_us	geographical groups (1st/2nd)	CC_ISO (3 digits)+VALUE (3 digits)
v569	Region	CC_ISO (3 digits)+VALUE
v570_cs	Income	CC_ISO (3 digits)+VALUE
v571_cs	ethnic group	CC_ISO (3 digits)+VALUE
v653_us	city size	CC_ISO (3 digits)+VALUE

In Table 6 alphanumeric country abbreviations and numeric 3-digits country codes as used in EVS 1981 are compiled. All surveyed countries and regions, i.e. including separate samples for Great Britain/Northern Ireland, are coded in accordance with the ISO 3166-1 alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions.

Table 6: Country codes (ISO 3166-1)

Country/Region	Country abbreviation ISO 3166-1 alpha-2	ISO 3166-1 (3 digits)	EVS-specific country code used in previous dataset versions
Belgium	BE	056	8111
Denmark	DK	208	8112
France	FR	250	8101
Germany (West)	DE	276*	8103
Great Britain	GB-GBN	826*	8102
Iceland	IS	352	8131
Ireland	IE	372	8117
Northern Ireland	GB-NIR	909	8116
Italy	IT	380	8107
Malta	MT	470	8132
Netherlands, The	NL	528	8110
Norway	NO	578	8113
Spain	ES	724	8108
Sweden	SE	752	8114
Canada	CA	124	8126
USA	US	840	8125

*Nonofficial ISO 3166-1 or ISO 3166-1 alpha-2 code.

5.1.3 Weighting

Variable `weight_g` adjusts the national samples for age distribution. No weights are available in the following countries (coded to 1): Norway, Sweden, and Malta.

5.2 Data quality checks

EVS 1981 data was checked for wild codes, system missing, contradictions between answers on variables of item batteries, and filter inconsistency.

5.2.1 Flag variables indicating inconsistencies

For the most common non-conformed interviewer instructions and illogic answer patterns across national datasets, flag variables were created which mark such non-conformities and leave decisions on corrections up to the researcher.

Information about both flag and flagged variables is provided by notes in the Variable Documentation.

Flagged variable `v460` 'aims of respondeent: first choice (Q277a)'

Note: Please see flag variable `f460` which indicates inconsistencies for variables `v460` and `v461`.

Flag variable f460 'flag variable: aims of respondent: first/second choice (Q277a/Q277b)'
Indicates inconsistencies for the variables v460/v461.

If most important aim is identical with next most important aim.

if v460=v461 then f460=1

0 'consistent' /1 'inconsistent'

There are three types of non-conformities which were flagged (see Appendix 1):

1. 'first/second choice' variables which were flagged in case the value of the variable for the first choice equaled the value of the variable for the second choice.

Variables: v535/v534 – f534; v460/v461 – f460

2. 'multiple response question' variables which were flagged in case respondents chose more than the 5 maximally permitted items.

Variables: v430 to v446 – f446

3. 'none'-item battery variables which were flagged in case the answer pattern of the 'none'-item variable and the other variables of the item battery of a question was illogic. As several illogic answer patterns are possible the flag variables have five categories.

In the national datasets some countries included additional items within these item batteries which had to be taken into account as base for the flagging of answer patterns as well. As these country-specific variables are not included in the Integrated Dataset the bases for flagging changed minimally, i.e. the sum of flagged cases in the national datasets does not equal the total of flagged cases in the Integrated Dataset.

Variables: v118 to v127 – f128; v129 to v139 – f139; v216 to v231 – f231; v236 to v244 – f244; v413 to v423 – f423; v356 to v360 – f361; v363 to v367 – f368

Flag variables introduced in EVS 1981 are listed in Table 7.

Table 7: Flag variables for indicating inconsistencies

Variable	Variable Label
f534	flag variable: belong to geographic group - most/second (Q346a/Q346b)
f460	flag variable: aims of respondent: first/second choice (Q277A/Q277B)
f446	flag variable: learn children at home (Q262)
f231	flag variable: important in a job: none of these (Q132)
f139	flag variable: do you work unpaid for: none (Q113b)
f128	flag variable: do you belong to: none (Q113a)
f423	flag variable: divorce: none of these (Q255)
f368	flag variable: share with parents: none of these (Q245_6)
f361	flag variable: share with partner: none of these (Q244_6)
f244	flag variable: paid free days: none (Q138)

5.2.2 Notes on deviating filtering

In case filtering in countries' field questionnaires systematically deviated from filtering in the Master Questionnaire (either by lacking filter or by adding country-specific filter) data were not corrected but marked by variable notes related to the affected countries. Two cases of problems were indicated in the Variable Documentation:

- Respondents who should have been asked questions after the filter question but were coded as -3 'not applicable': variables are v232 to v235, and v559.
- Respondents who should not have been asked the questions after the filter questions but have valid codes: variables are v532, v533, and v559.

6 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. It is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with the international metadata specification for the social and behavioral sciences, established by the Data Documentation Initiative (DDI-Codebook/XML).

The documentation combines the variable description (variable name, values, and labels) of the dataset with the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the questionnaire.

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable "c_abrv: country abbreviation" and "c_abrv1: country abbreviation [with split ups]", respectively.

AL	Albania	ES	Spain	ME	Montenegro
AM	Armenia	FI	Finland	MK	Macedonia
AT	Austria	FR	France	MT	Malta
AZ	Azerbaijan	GB-GBN	Great Britain	NL	The Netherlands
BA	Bosnia-Herzegovina	GB-NIR	Northern Ireland	NO	Norway
BE	Belgium	GE	Georgia	PL	Poland
BG	Bulgaria	GR	Greece	PT	Portugal
BY	Belarus	HR	Croatia	RO	Romania
CY	Cyprus	HU	Hungary	RS	Serbia
CY-TCC	Turkish Cypriote Community	IE	Ireland	RS-KM	Kosovo
CZ	Czech Republic	IS	Iceland	RU	Russia
DK	Denmark	IT	Italy	SE	Sweden
DE	Germany (-1989)	LT	Lithuania	SI	Slovenia
DE-W	Germany West (1990 ff.)	LU	Luxembourg	SK	Slovakia
DE-E	Germany East (1990 ff.)	LV	Latvia	TR	Turkey
EE	Estonia	MD	Moldova	UA	Ukraine

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country-specific variables. In the case of variables with long lists of coded "real values" (e.g. age), results are only presented for the corresponding categorized variable if available. The content and construction of technical, administrative, or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table. Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English Master Questionnaire as provided by the European Values Study.

Digital Object Identifier (doi): Header with doi linked to the Study Description in the GESIS Data Catalogue.

VARIABLE NAME (serial number from questionnaire or assigned by the archive) and **VARIABLE LABEL** as defined in the dataset, including question number. The numbers or letters that may appear together with the variable name reflect the item order (multiple item or multiple response questions) or indicate if a question was recoded (R), harmonized, or if asked only in a single country (country abbreviation).

QUESTION NUMBER and full **QUESTION TEXT** from the Master Questionnaire, including interviewer instructions.

CODE VALUES occurring in the data for this variable and complete **ANSWER TEXT** from the Master Questionnaire. Code values may differ from the questionnaire specification due to standardized/ harmonization.

NOTES delineate additional explanatory text subsuming trend information or archive remarks on data processing and other issues relevant for the understanding and application of the variable. **DERIVATION** information refers to the construction principle of indices or other derived variables (not in the example).

European Values Study 1981

GESIS Study No. 4438 (v3.0.0), <http://dx.doi.org/doi:10.4232/1.10791>

v212 - taking all things together how happy are you (Q128)

Q.128

Taking all things together, would you say you are:

<Read out in reverse order for alternate contacts>

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 Very happy
- 2 Quite happy
- 3 Not very happy
- 4 Not at all happy

N Valid Sum			5295	11843	1601	188			18927

CROSS-TABULATION: The absolute frequencies of the occurrence of values (absolute values) refer to the number of cases in the weighted dataset as indicated, in this case weighted by weight_g. The relative frequencies (row percent) refer to the valid cases (n valid sum), i.e. the total number of cases (n sum) reduced by the number of cases defined as missing data (M).

FREQUENCY COUNTS: For country specific variables relative frequencies are calculated including and excluding missing data (M), i.e. percent on the basis of all cases (sum) and valid percent on the basis of the valid cases.

Appendix 1: Overview of flag variables to identify inconsistencies

Variable	Label	N	Total N	Values	Value Labels	Description
f446	flag variable: learn children at home (Q262)	759	19378	0 1	Limitation followed Limitation ignored	If respondent named more than the allowed 5 qualities. if v430 to v446=1 > 5 then f446=1
f460	flag variable: aims of respondents: first/second choice (Q277A/Q277B)	63	19378	0 1	consistent inconsistent	If most important aim is identical with next most important aim. if v460=v461 then f460=1
f534	flag variable: belong to geographic group - most/second (Q346a/Q346b)	217	19378	0 1	consistent inconsistent	If geographical group that respondent states to belong to first of all is identical with secondly stated group. if v534=v535 then f534=1
f128	flag variable: do you belong to: none (Q113a)	18269	19378	0	consistent	
		10	19378	1	inconsistent1	If respondent mentions at least one organisation and "none". if v128=1 and any of v118 to v127=1 then f128=1
		145	19378	2	inconsistent2	If respondent does not mention any organisation and does not mention "none". if v128=0 and all of v118 to v127=0 then f128=2
		316	19378	3	inconsistent3	If respondent does not mention any organisation and "none" is missing. if v128=-5 and all of v118 to v127=0 then f128=3
		638	19378	4	inconsistent4	If respondent mentions at least one organisation and "none" is missing. if v128=-5 and any of v118 to v127=1 then f128=4
f139	flag variable: do you work unpaid for: none (Q113b)	16079	19378	0	consistent	
		2	19378	1	inconsistent1	If respondent mentions at least one organisation and "none". if v139=1 and any of v129 to v138=1 then f139=1
		1292	19378	2	inconsistent2	If respondent does not mention any organisation and does not mention "none". if v139=0 and all of v129 to v138=0 then f139=2
		1504	19378	3	inconsistent3	If respondent does not mention any organisation and "none" is missing. if v139=-5 and all of v129 to v138=0 then f139=3
		501	19378	4	inconsistent4	If respondent mentions at least one organisation and "none" is missing. if v139=-5 and any of v129 to v138=1 then f139=4

f231	flag variable: important in a job: none of these (Q123)	19249	19378	0	consistent	
		36	19378	1	inconsistent1	If respondent mentions at least one aspect and "none". if v231=1 and any of v216 to v230=1 then f231=1
		92	19378	2	inconsistent2	If respondent does not mention any aspect and does not mention "none". if v231=0 and all of v216 to v230=0 then f231=2
		0	19378	3	inconsistent3	If respondent does not mention any aspect and "none" is missing. if v231=-5 and all of v216 to v230=0 then f231=3
		1	19378	4	inconsistent4	If respondent mentions at least one aspect and "none" is missing. if v231=-5 and any of v216 to v230=1 then f231=4
f244	flag variable: paid free days: none of these (Q138)	18098	19378	0	consistent	
		3	19378	1	inconsistent1	If respondent mentions at least one activity and "none". if v244=1 and any of v236 to v243=1 then f244=1
		486	19378	2	inconsistent2	If respondent does not mention any activity and does not mention "none". if v244=1 and any of v236 to v243=0 then f244=2
		423	19378	3	inconsistent3	If respondent does not mention any activity and "none" is missing. if v244=1 and any of v236 to v243=0 then f244=3
		368	19378	4	inconsistent4	If respondent mentions at least one activity and "none" is missing. if v244=1 and any of v236 to v243=0 then f244=4
f423	Flag variable: divorce: none of these (Q.255)	18336	19378	0	consistent	
		13	19378	1	inconsistent1	If respondent mentions at least one reason and "none". if v423=1 and any of v413 to v422=1 then f423=1
		75	19378	2	inconsistent2	If respondent does not mention any reason and does not mention "none". if v423=0 and all of v413 to v422=0 then f423=2
		19	19378	3	inconsistent3	If respondent does not mention any reason and "none" is missing. if v423=-5 and all of v413 to v422=0 then f423=3

		935	19378	4	inconsistent4	If respondent mentions at least one reason and "none" is missing. if v423=-5 and any of v413 to v422=1 then f423=4

version - GESIS archive version

GESIS Archive Version:

3.0.0 '2011-11-20'

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

versionc

id_cocas - unified respondent number

Unified respondent number:

Code comprises 11 digits: YYYY (year of wave), CCC (ISO-Code for country), and NNNN (casenumber)

caseno - original respondent number

Original respondent number

year - survey year

Survey year: 1981-1984

For detailed information, see variable cntry_y.

c_abrv - country abbreviation

Country abbreviation

BE Belgium; CA Canada; DK Denmark; FR France; DE Germany; GB-GBN Great-Britain; IS Iceland; IE Ireland; IT Italy; MT Malta; NL The Netherlands; GB-NIR Northern Ireland; NO Norway; ES Spain; SE Sweden; US USA

Note: All surveyed countries and regions, i.e. including separate samples for Great Britain/Northern Ireland, are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East/West subdivision of Germany.

weight_g - weight

General weight factor

Adjusts the national samples for age distribution.

Norway, Sweden and Malta are weighted by 1.

(The target number of interviews in each country was set at 1000, with an additional booster quota sample of 200 young adults aged 18-24.)

f128 - flag variable: do you belong to: none (Q113a)

Flag variable:

Indicates inconsistencies for the variables v118-v128.

Inconsistent 1

If respondent mentions at least one organisation and "none".

if v128=1 and any of v118 to v127=1 then f128=1

Inconsistent 2

If respondent does not mention any organisation and does not mention "none".

if v128=0 and all of v118 to v127=0 then f128=2

Inconsistent 3

If respondent does not mention any organisation and "none" is missing.

if v128=-5 and all of v118 to v127=0 then f128=3

Inconsistent 4

If respondent mentions at least one organisation and "none" is missing.

if v128=-5 and any of v118 to v127=1 then f128=4

Note: For detailed information, see EVS 1981 variable report.

f139 - flag variable: do you work unpaid for: none (Q113b)

Flag variable:

Indicates inconsistencies for the variables v129-v139.

Inconsistent 1

If respondent mentions at least one organisation and "none".

if v139=1 and any of v129 to v138=1 then f139=1

Inconsistent 2

If respondent does not mention any organisation and does not mention "none".

if v139=0 and all of v129 to v138=0 then f139=2

Inconsistent 3

If respondent does not mention any organisation and "none" is missing.

if v139=-5 and all of v129 to v138=0 then f139=3

Inconsistent 4

If respondent mentions at least one organisation and "none" is missing.

if v139=-5 and any of v129 to v138=1 then f139=4

Note: For detailed information, see EVS 1981 variable report.

v211 - how much control over your life (Q127)

Q.127

<Show card C>

Some people feel they have completely free choice and control over the way their lives turn out, and other people feel that what they themselves do has no real effect on what happens to them. Please use the scale to indicate how much freedom of choice and control you feel you have over the way your life turns out.

f231 - flag variable: important in a job: none of these (Q132)

Flag variable:

Indicates inconsistencies for the variables v216-v231.

Inconsistent 1

If respondent mentions at least one aspect and "none".

if v231=1 and any of v216 to v230=1 then f231=1

Inconsistent 2

If respondent does not mention any aspect and does not mention "none".

if v231=0 and all of v216 to v230=0 then f231=2

Inconsistent 3

If respondent does not mention any aspect and "none" is missing. if v231=-5 and all of v216 to v230=0 then f231=3

Inconsistent 4

If respondent mentions at least one aspect and "none" is missing. if v231=-5 and any of v216 to v230=1 then f231=4

Note: For detailed information, see EVS 1981 variable report.

v236 - paid free days: find extra work for money (Q138A)

Q.138

<Ask if working full, or part-time: if not, skip to question 140>

<Show card G>

I should like you to imagine for a moment that the government and employers agree to shorten the working week to 3 days - each of 8 hours- but continue to offer the same pay as for a full week. Which of these, if any, would you do?

<Mark all mentioned>

Q.138A Work 3 days for your employer and then attempt to find extra work for the rest of the week to earn some more money

v239 - paid free days: find additional work to avoid boredom (Q138D)

Q.138

<Ask if working full, or part-time: if not, skip to question 140>

<Show card G>

I should like you to imagine for a moment that the government and employers agree to shorten the working week to 3 days - each of 8 hours- but continue to offer the same pay as for a full week. Which of these, if any, would you do?

<Mark all mentioned>

Q.138D To avoid getting bored, find some additional work even if this doesn't bring in much extra cash

f244 - flag variable: paid free days: none (Q138)

Flag variable:

Indicates inconsistencies for the variables v236-v244.

Inconsistent 1

If respondent mentions at least one activity and "none".

if v244=1 and any of v236 to v243=1 then f244=1

Inconsistent 2

If respondent does not mention any activity and does not mention "none".

if v244=1 and any of v236 to v243=0 then f244=2

Inconsistent 3

If respondent does not mention any activity and "none" is missing. if v244=1 and any of v236 to v243=0 then f244=3

Inconsistent 4

If respondent mentions at least one activity and "none" is missing. if v244=1 and any of v236 to v243=0 then f244=4

Note: Please note that f244 does not include v245 ("paid free days: don't know"). For detailed information, see EVS 1981 variable report.

v249 - fair/unfair: quicker secretary is paid more (Q142)

Q.142

I'd like to relate an incident to you and ask your opinion of it. There are two secretaris, of the same age, doing practically the same job.

One of the secretaries finds out that the other one earns ... (amount) a week more than she does. She complains to her boss.

He says, quite rightly, that the other secretary is quicker, more efficient and more reliable at her job. In your opinion, is it fair or not fair that one secretary is paid more than the other?

-5 other missing

v251 - follow instructions at work/must be convinced first (Q144)

Q.144

<Show card J>

People have different ideas about following instructions at work. Some say that one should follow instructions of one's superiors even when one does not fully agree with them. Others say that one should follow one's superior's instructions only when one is convinced that they are right. Which of these two opinions do you agree with?

v269 - good and evil: clear/no clear guidelines (Q154)

Q.154

<Show card L>

Here are two statements which people sometimes make when discussing good and evil. Which one comes closest to your own point of view?

A) There are absolutely clear guidelines about what is good and evil. These always apply to everyone, whatever the circumstances.

B) There can never be clear and absolute guidelines about what is good and evil. What is good and evil depends entirely upon the circumstances at the time.

v322 - 3rd commandment applies for myself (Q208A_3)

Q.208A

<Show card P>

Here is a card on which are the Ten Commandments. Please look at them and tell me, for each one, whether it still applies fully today, whether it applies today to a limited extent, or no longer really applies today (a) for yourself, and (b) most people?

<Write in code number 1, 2, 3 or V under column for 'Self' and 'Most people'.>

A. Yourself

v337 - 8th commandment applies to most people (Q208B_8)

Q.208B

<Show card P>

Here is a card on which are the Ten Commandments. Please look at them and tell me, for each one, whether it still applies fully today, whether it applies today to a limited extent, or no longer really applies today (a) for yourself, and (b) most people?

<Write in code number 1, 2, 3 or V under column for 'Self' and 'Most people'.>

A. Most people

Q.208B_8 Thou shalt not bear false witness against thy neighbour

v345 - relationship between your parents (Q233a)

Q.233a

I'd now like to ask a few questions about your childhood.

During the time you were growing up, would you say that your father and mother were very close to each other, quite close to each other, not very close or not at all close?

<Mark answer in 1st column below>

f361 - flag variable: share with partner: none of these (Q244_6)

Flag variable:

Indicates inconsistencies for the variables v356-v361.

Inconsistent 1

If respondent mentions at least one attitude and "none".

if v361=1 and any of v356 to v360=1 then f361=1

Inconsistent 2

If respondent does not mention any attitude and does not mention "none".

if v361=0 and all of v356 to v360=0 then f361=2

Inconsistent 3

If respondent does not mention any attitude and "none" is missing.

if v361=-5 and all of v356 to v360=0 then f361=3

Inconsistent 4

If respondent mentions at least one attitude and "none" is missing.

if v361=-5 and any of v356 to v360=1 then f361=4

Note: Please note that f361 does not include v362 ("share with partner: don't know"). For detailed information, see EVS 1981 variable report.

f368 - flag variable: share with parents: none of these (Q245_6)

Flag variable:

Indicates inconsistencies for the variables v363-v368.

Inconsistent 1

If respondent mentions at least one attitude and "none".

if v368=1 and any of v363 to v367=1 then f368=1

Inconsistent 2

If respondent does not mention any attitude and does not mention "none".

if v368=0 and all of v363 to v367=0 then f368=2

Inconsistent 3

If respondent does not mention any attitude and "none" is missing.

if v368=-5 and all of v363 to v367=0 then f368=3

Inconsistent 4

If respondent mentions at least one attitude and "none" is missing.

if v368=-5 and any of v363 to v367=1 then f368=4

Note: Please note that f368 does not include v369 ("share with parents: don't know"). For more detailed information, see EVS 1981 variable report.

f423 - flag variable: divorce: none of these (Q255)

Flag variable:

Indicates inconsistencies for the variables v413-v423.

Inconsistent 1

If respondent mentions at least one reason and "none".

if v423=1 and any of v413 to v422=1 then f423=1

Inconsistent 2

If respondent does not mention any reason and does not mention "none".

if v423=0 and all of v413 to v422=0 then f423=2

Inconsistent 3

If respondent does not mention any reason and "none" is missing. if v423=-5 and all of v413 to v422=0 then f423=3

Inconsistent 4

If respondent mentions at least one reason and "none" is missing. if v423=-5 and any of v413 to v422=1 then f423=4

Note: For more detailed information, see EVS 1981 variable report.

v446 - learn children at home: loyalty (Q262Q)

Q.262

<Show card V>

Here is a list of qualities which children can be encouraged to learn at home. Which, if any, do you consider to be especially important? Please choose up to five?

<Mark five only>

Q.262Q Loyalty

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 0 Not mentioned
- 1 Important

Note: Multiple response questions are split into a set of dichotomized variables (1 important, 0 not mentioned) which represent each of the original categories and are identified by the respective original category code as question number suffix.

Please see flag variable f446 which indicates inconsistencies for variables v430-v446.

f446 - flag variable: learn children at home (Q262)

Flag variable:

Indicates inconsistencies for variables v430-v446.

If respondent named more than the allowed 5 qualities.

if v430 to v446=1 > 5 then f446=1

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

0 Limitation followed

1 Limitation ignored

Note: For detailed information, see EVS 1981 variable report.

v453 - political action: joining unofficial strikes (Q267D)

Q.267

<Show card Z>

Now I'd like you to look at this card. I'm going to read out some different forms of political action that people can take, and I'd like you to tell me, for each one, whether you have actually done any of these things, whether you would do it, might do it or would not, under any circumstances, do any of them.

<Mark an answer for each>

v457 - more important: freedom or equality (Q274)

Q.274

<Show card Aa>

Which of these statements comes closest to your own opinion?

A) I find that both freedom and equality are important. But if I were to make up my mind for one or the other, I would consider personal freedom more important, that is, everyone can live in freedom and develop without hindrance.

B) Certainly both freedom and equality are important. But if I were to make up my mind for one of the two, I would consider equality more important, that is that nobody is underprivileged and that social class differences are not so strong.

v459 - opinion on society (Q276)

Q.276

<Show card Cc>

On this card are three basic kinds of attitudes vis-à-vis the society we live in. Please choose the one which best describes your own opinion.

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

1 The entire way our society is organised must be radically changed by revolutionary action

2 Our society must be gradually improved by reforms

3 Our present society must be valiantly defended against all subversive forces

v460 - aims of respondent: first choice (Q277A)

Q.277

<Show card Dd>

There is a lot of talk these days about what the aims of this country should be for the next ten years. On this card are listed some of the goals which different people would give top priority. Would you please say which of these you, yourself, consider the most important? And which would be the next most important?

Q.277A First most important

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 Maintaining order in the nation
- 2 Giving the people more say in important government decisions
- 3 Fighting rising prices
- 4 Protecting freedom of speech

Note: Please see flag variable f460 which indicates inconsistencies for variables v460 and v461.

f534 - flag variable: belong to geographic group - most/second (Q346a/Q346b)

Flag variable:

Indicates inconsistencies for the variables v534/v535.

If geographical group that respondent states to belong to first of all is identical with secondly stated group.

if v534=v535 then f534=1

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

0 consistent

1 inconsistent

v551_r - age completed education respondent (Q361) (recoded)

Age completed education respondent - recoded in intervals

Source variable: v551

[And what age did you (will you) complete your full-time education?]

Note: Age (in years) of completed education constructed from original categorial variable v551. Please note that the first and last categories do not represent an exact year but ranges (0-12 and 21 years and more). When using this variable be aware that the initial variable v551 corresponds the recoded (categorised) variables in EVS waves 2-4.

v552 - number of people in household (Q362a)

Q.362a

How many people are there in your household, including yourself and the children?

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 One
- 2 Two
- 3 Three
- 4 Four
- 5 Five
- 6 Six
- 7 Seven
- 8 Eight
- 9 Nine
- 10 Ten
- 11 Eleven

Note: Response categories documented according to dataset. Open question in Master Questionnaire.

v560 - employment status (Q365_1)

Q.365

<Ask all>

Are you, yourself, employed now?

If Yes: About how many hours a week?

<Mark an answer in the first column below>

Q.365_1 Respondent

Has a paid job:

- 1 Full time (30 hours a week or more)
- 2 Part time (less than 30 hours a week)
- 3 Self-employed

No paid job:

- 4 Unemployed
- 5 Retired; pensioned
- 6 Housewife not otherwise employed
- 7 Student

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

v570_r - income household respondent (Q376) (recoded)

Income level - recoded (3 categories)

Source variable: v570

[Here is a scale of incomes and we would like to know in what group your family is, counting all wages, salaries, pensions, and other income that comes in. Just give me the number of the group your household falls into before tax and other deductions.]
