ISSP Background Variable Documentation

by

Markus Quandt, Evi Scholz and Insa Bechert GESIS

on behalf of the

ISSP Demographics Method Group

(Germany, Mexico, Norway, the Philippines, South Africa, Spain, Sweden, Switzerland, Taiwan, and the Archive)

Users of the international ISSP data file should have all relevant information to understand the construction of the ISSP background variables. Thus, the ISSP has decided to provide a documentation of its background variables and to regularly update this documentation (decisions of the ISSP General Meetings in 2005 and 2006). The information collected with this document will be published with the ISSP data files. Furthermore, it will help to discuss and decide on streamlining the ISSP background variables.

The Demographics Method Group asks you to provide information on all your ISSP background variables. The document at hand serves to collect and structure this information from ISSP members in a template.

The document consists of three sections: Section 1 of this documentation refers to basic elements: source description, information on filters and routing, and construction information. In section 2, as an example, we present the relevant information for the variable UNION (Trade union membership) from Germany. Section 3 finally offers the documentation template for all ISSP background variables valid from the ISSP module 2010 forward.

If you have any questions on the documentation, please do not hesitate to contact us:

isspservice@gesis.org

1. Basic Elements

For each of the variables listed in section 3 below, please give the following information as applicable.

❖ Source description

- Please give the **question no./position/name(s)** used in your field questionnaire and report additional information sources, for example, if interviewer observation was used instead of asking questions to respondents. If your ISSP is run with a larger survey and the background variable is taken from this survey, then refer to that (those) source question(s). Please make a **note** from which survey the question(s)/variable(s) come(s) (see below).
- Please give the text of the **original question(s)** exactly as used in your field questionnaire and **in your national language**.
 - Please include all **response categories** of the original field questionnaire.
 - Please give **interviewer instructions** if necessary to understand the generation of response codes.
- Please **translate original questions, response categories and interviewer instructions** into English.

- Please provide **notes** if needed. Notes can address both possible translation issues (**translation note**) and country specific particularities of question background, of variable generation or of the meaning of individual response categories (**note**).

- ❖ **Filter Variables and Conditions:** If any variables cover only part of the sample, please list the conditions (questions/variables and categories/codes) used to define the *excluded cases*. In other words, report the conditions which lead to a ‘not applicable’ code in the variable following the filter.

- ❖ **Construction/Recoding**
 - Please report how the codes of the ISSP target variable were derived from your source data.
 - Please use a table of correspondence with source and target codes (see the example in section 2 and tables in section 3).
 - If construction of ISSP target codes involves more than simple 1-1 relationships between source and target codes, please use roughly Boolean syntax as shown in the example 2 below. Command syntax of common statistics programs is also welcome. Just put the syntax used into the “Optional: Recoding Syntax” box if you consider that it will increase comprehensibility and transparency.
 - Please always (also for country specific variables) report how the ISSP missing values (not applicable-NAP, no answer-NA, don’t know-DK) were filled.

- ❖ **Complementary information (see last page)**
 - Please provide the part(s) of your country questionnaire that relate(s) to the background variables reported in this template. If these variables are already covered by your country’s field questionnaire delivered with your national ISSP data file, then just tick the box on the last page of this document. (PDF or MS Word format preferred.)
 - Please also supply frequency tables with absolute and relative frequencies, missing values *included*, for **all** *source* variables. *Source variables* are the country-specific variables **before** recodes into ISSP standard variables are done. (MS Word or simple ASCII file preferred.)
 - If your country derives ISCO88 codes from a national occupation coding scheme, please supply a correspondence list of national codes and ISCO88 codes. (MS Word or simple ASCII file preferred.)

2. Example

The German example for the variable UNION is constructed from two variables referring to two questions in the German field questionnaire.

UNION – Trade union membership

	National Language	English Translation
<i>Question no. and text</i>	#1 Darf ich Sie fragen, ob Sie derzeit Mitglied in einer Gewerkschaft sind?	#1 May I ask you whether you are currently a member of a trade union?
<i>Codes/ Categories</i>	1. Ja, bin Mitglied	1. Yes, I am member
	2. Nein, bin kein Mitglied	2. No, I am not member
	9. Keine Angabe*	9. No answer*
	0. Nein, Befragter will Frage nicht beantworten*	0. Respondent refuses to answer*
<i>Question no. and text</i>	#2 Waren Sie früher einmal Mitglied in einer Gewerkschaft?	#2 Were you once a member of a trade union?
<i>Codes/ Categories</i>	1. Ja	1. Yes
	2. Nein	2. No
	8. Weiß nicht	8. Don't know
	9. Keine Angabe*	9. No answer*
<i>Note</i>	Falls Befragter aktuell kein Gewerkschaftsmitglied ist; „nein“ in #1	If respondent not currently union member; no in #1
<i>Interviewer Instructions</i>	—	
<i>Translation Note</i>	—	
<i>Note</i>	Current and former union membership taken from ALLBUS 2010 Answer categories marked by an asterisk are not read aloud.	

Filter Variable(s) and Conditions:

Former membership (#2) not asked if respondent currently member (#1=1)

Construction/Recoding:

Country Variable Codes/ Construction Rules	→ UNION
If (#1=1)	1. Yes, currently
If (#2=1)	2. Yes, previously but not currently
If (#1=2 and #2=2)	3. No, never

If (#1=0)	7. Refused
Else	9. No answer

3. Variable List

In the following you will find forms to ease documentation of the points described in section 1 above.

Some Hints to Fill in the Forms

- Please fill in the forms on the screen and return the file to <isspservice@gesis.org> – please do *not* return a printout using paper and pencil!
- In general, please feel free to be flexible in using the forms. If necessary adopt them to your reporting needs. In particular:
 - Please insert as many additional fields as needed, e.g. add lines if your country variable has more categories than the template provides.
 - Please skip fields not needed, e.g. skip ‘note’ lines if no note is required.
 - If individual response categories require separate notes, insert as many additional lines as necessary *below* the respective category.
 - If your field questionnaire has more than one language version, please replicate the complete ‘National Language - English Translation/Note’ block as often as needed.
- The question numbers should refer to the numbers of your original field questionnaire.
- For variables with continuous data (AGE, WRKHRS...), please list the lowest and the highest valid codes empirically found in your country’s data and the various non-response codes, e.g. NAP (not applicable), DK (don’t know); if additional non-response codes occur in your data, such as ‘refused’, please add.
- If source variables are relevant for *several* ISSP target variables, please copy the information for the source variables each time to offer a complete documentation of the individual ISSP target variable.

General Note

In general, translations for the German background questions are taken from the ALLBUS 2002 translation where wording for most of the background questions was identical to the ALLBUS 2012 (Harkness and Blohm 2004). Where wording was not identical to the ALLBUS 2012 questions, translation was done by the German ISSP team itself (marked by two asterisks).

Answer categories marked by one asterisk are not read aloud.

The German ISSP 2011 data file is based on the final but GESIS inhouse version of ALLBUS 2012. Thus, variable names used in the “Construction/Recoding” part of the following documentation will differ from the variable names in the ALLBUS 2012 data file distributed by GESIS, Cologne.

ISSP 2011 Germany

Please name the **ISSP module** which the documentation refers to (e.g., “*Environment III / ISSP2010*”):

Health and Health Care / ISSP 2011

Please name your **country**:

Germany

SEX - Sex of respondent

	National Language	English Translation
<i>Question no. and text</i>	—	—
<i>Interviewer Instruction</i>	S001 <i>Geschlecht der befragten Person ohne Befragen eintragen!</i>	S001 <i>Enter sex of respondent without asking.</i> **
<i>Codes/ Categories</i>	1. Männlich	1. Male
	2. Weiblich	2. Female
	9. KA *	9. NA *
<i>Translation Note</i>	—	
<i>Note</i>	Sex taken from ALLBUS 2012 where question was not asked; face-to-face interview; sex coded by interviewer	

Construction/Recoding:

** Translated by the German ISSP team.

* Answer categories marked by an asterisk are not read aloud.

BIRTH – Year of birth

This question can be asked as an alternative to asking about AGE. If BIRTH is not asked directly, it must be computed by DATEYR ‘year of interview’ minus AGE ‘age of respondent’.

	National Language	English Translation
<i>Question no. and text</i>	S002 Sagen Sie mir bitte, in welchem Monat und welchem Jahr Sie geboren sind?	S002 Please tell me what month and year you were born in.
<i>Codes/ Categories</i>		
<i>Interviewer Instruction</i>	<i>Achtung: Wichtige Angabe für das weitere Interview! Bitte besonders auf korrekte Angabe achten!</i>	<i>Attention: Important information for the further interview. Please take care of correct information.**</i>
<i>Translation Note</i>	—	
<i>Note</i>	Year of birth (s002_2) taken from ALLBUS 2012.	

Construction/Recoding: (list lowest, highest, and ‘missing’ codes only, replace terms in [square brackets] with real numbers)

	Country Variable Codes/Construction Rules s002_2	→BIRTH
<i>Construction</i>		
<i>Codes</i>	1916	[MIN BIRTH]
	1993	[HIGH BIRTH]
	9999	9999. No answer

Optional: Recoding Syntax

```
compute birth=s002_2.
```

** Translated by the German ISSP team.

AGE - Age of respondent

This question can be asked as an alternative to asking about BIRTH. If AGE is not asked directly, it must be computed by DATEYR 'year of interview' minus BIRTH 'year of birth'.

	National Language	English Translation
<i>Question no. and text</i>	S002 Sagen Sie mir bitte, in welchem Monat und welchem Jahr Sie geboren sind?	S002 Please tell me what month and year you were born in.
<i>Codes/ Categories</i>		
<i>Interviewer Instruction</i>	<i>Achtung: Wichtige Angabe für das weitere Interview! Bitte besonders auf korrekte Angabe achten!</i>	<i>Attention: Important information for the further interview. Please take care of correct information.**</i>
<i>Translation Note</i>	—	
<i>Note</i>	Month (S002_1) and year of birth (S002_2) taken from ALLBUS 2012; in order to calculate age, the month of interview was used (as reported by interviewer; intmon)	

Construction/Recoding: (list lowest, highest, and 'missing' codes only, replace terms in [square brackets] with real numbers)

	Country Variable Codes/Construction Rules	→AGE
<i>Construction</i>		
<i>Codes</i>	18	[MIN AGE]
	95	[HIGH AGE]
		999. No answer

Optional: Recoding Syntax

```
compute age=999.
do if (S002_2 ne 9999).
compute age=2012-S002_2.
end if.
do if (S002_1 ne 99).
if (intmon le S002_1)age=age-1.
end if.
```

** Translated by the German ISSP team.

EDUCYRS - Education I: years of schooling

	National Language	English Translation
<i>Question no. and text</i>	i32 Wie viele Jahre waren Sie insgesamt in Schule, Hochschule, oder anderer schulischer Ausbildung, ohne betriebliche Ausbildung? Sollten Sie ein Schuljahr wiederholt haben, zählen dieses bitte NICHT mit. Wenn Sie noch Schüler(in) oder Student(in) sind, zählen Sie bitte die Jahre, die Sie bereits in Schule oder Hochschule verbracht haben.	i32 How many full years of schooling or education have you had in total, including primary and secondary schooling, university and full-time vocational training at school, but not including in-firm training. If you have ever repeated a year, please do NOT include these years. If you are currently at school or university, please count the number of years you have already completed at school or university.**
<i>Interviewer Instruction</i>	Bitte Anzahl eintragen! Runden Sie auf volle Jahre. Bitte KEINE Altersangabe. Bitte Kindergartenzeit NICHT mitzählen!	Please enter number of years. Round to full years. Please do NOT enter your age. Please do NOT count number of years in kindergarten!**
<i>Codes/ Categories</i>	_____ Jahre	_____ years
<i>Translation Note</i>	—	
<i>Note</i>	Wording slightly modified by additional instructions compared to ISSP 2010 (highlighted).

ISCO88 - Occupation ISCO 1988

ISCO INCLUDED IN ALLBUS 2012, BUT UNFORTUNATELY NOT YET CODED.

WILL BE DELIVERED AT THE EARLIEST POSSIBLE TIME

Please give the text of the source question(s) on the respondent's occupation used in your field questionnaire. If ISCO88-codes are not coded directly from the responses, but derived from a country-specific occupation coding scheme, please provide a table of correspondence between country-specific and ISCO88 codes *attached as a separate file*. Please report which kind of ISCO code you apply. The most common ones are the code developed by the International Labour Organisation (ILO) and the variant developed for the European Union (EU), ISCO-COM. If you apply another variant such as ISCO88-CIS developed by the Statistical Committee of the Commonwealth of Independent States, then please specify.

Please do **not** enter **standard** ISCO88 codes here. But please report if your country **adds** or **changes** codes compared to ISCO88, if any.

Occupations should be coded on the 4-digit level of ISCO88. Occupational area 0 (Armed Forces occupations) needs some special attention. Since the ISCO variable is numeric, the 4-digit code 0110 will usually appear as 110 in the data file. It is therefore suggested that the only valid 3-digit code in the data file is 110 (Armed Forces).

In some special cases information concerning the occupation may be insufficient for 4-digit coding. Instead of coding these cases as [9998] "inadequately described" use 3-digit coding. In those very special cases where 3-digit coding is applied, fill in a zero for the missing digit. Example: code 131 is coded as 1310.

	National Language	English Translation

Optional: Recoding Syntax

recode i42(-6=0)(else=copy) into spwrksup.
if (spwork=0 or spwork=3) spwrksup=0.

SPISCO88 – Spouse, partner: occupation ISCO 1988

SPOUSE ISCO INCLUDED IN ALLBUS 2012, BUT UNFORTUNATELY NOT YET CODED.

WILL BE DELIVERED AT THE EARLIEST POSSIBLE TIME

Please give the text of the source question(s) on the spouse's occupation used in your field questionnaire. If ISCO88-codes are not coded directly from the responses, but derived from a country-specific occupation coding scheme, please provide a table of correspondence between country-specific and ISCO88 codes *attached as a separate file*. Please report which kind of ISCO code you apply. The most common ones are the code developed by the International Labour Organisation (ILO) and the variant developed for the European Union (EU), ISCO-COM. If you apply another variant such as ISCO88-CIS developed by the Statistical Committee of the Commonwealth of Independent States, then please specify.

Please do **not** enter **standard** ISCO88 codes here. But please report if your country **adds** or **changes** codes compared to ISCO88, if any.

Occupations should be coded on the 4-digit level of ISCO88. Occupational area 0 (Armed Forces occupations) needs some special attention. Since the ISCO variable is numeric, the 4-digit code 0110 will usually appear as 110 in the data file. It is therefore suggested that the only valid 3-digit code in the data file is 110 (Armed Forces).

In some special cases information concerning the occupation may be insufficient for 4-digit coding. Instead of coding these cases as [9998] "inadequately described" use 3-digit coding. In those very special cases where 3-digit coding is applied, fill in a zero for the missing digit. Example: code 131 is coded as 1310.

Optional: Recoding Syntax

--

WEIGHT – Weighting factor

Please report on whether you calculate any weighting variables. If you adjust for non-response bias, please enter the variable(s) on which the sample's distribution(s) is (are) adjusted to the population distribution(s). Please, also report if you apply any kind of rescaling.

<i>Design weight to adjust for unequal selection probabilities</i>	No <input checked="" type="checkbox"/>	<input type="checkbox"/>
	Yes <input type="checkbox"/>	<input type="checkbox"/>
<i>Weight to adjust for non-response bias</i>	No <input checked="" type="checkbox"/>	<input type="checkbox"/>
	Yes <input type="checkbox"/>	<input type="checkbox"/> → please specify variables used for calculation of weight
<i>Are the final weights rescaled to net sample size (thus weighted sample size=unweighted sample size)?</i>	No <input type="checkbox"/>	<input type="checkbox"/> → please specify target population represented by sum of all case weights
	Yes <input type="checkbox"/>	<input type="checkbox"/>
<i>Note</i>	<p>Two separate German samples: the sample for eastern Germany deliberately over-samples the five eastern federal states.</p> <p>If all of Germany is taken as the unit of analysis (rather than the eastern and western states), design weight is necessary: weighting factor for Western Germany: 1.23472181*; weighting factor for Eastern Germany: 0.53513429*; recoding of the country variable is necessary</p> <p>The two weighting factors are <u>not</u> stored in the weight variable.</p>	

Construction/Recoding:

Country Variable Codes/Construction Rules	➔ WEIGHT
All German interviews	1. No weighting

MODE – Administrative mode of data-collection

<i>Note</i>	Self-completion, interviewer attending, CASI (answers not forced; filter routing program-controlled). [CASI used in German ISSP since 2005]
-------------	--

Construction/Recoding:

Country Variable Codes/Construction Rules	→ Mode

—	31. SC, arrives with interviewer, drops-off, picks up later
—	32. SC, arrives with interviewer, drops off, mailed back by R
—	33. SC, mailed to, completed by R and hold for pick up
—	34. SC, mailed to, mailed back by R
Applies for German ISSP 2011 interviews: CASI interview with interviewer attending (issp_c=1)	40. CASI, self-completion, computer-assisted

4. Country Questionnaire

Please provide the part(s) of your country questionnaire that relate(s) to the background variables reported in this template. If these variables are already covered by your country's field questionnaire delivered with your national ISSP data file, then just tick on the last page of this document. (PDF or MS Word format preferred.)

☐ Already included in field questionnaire provided with the country data file.

☒ Attached file: **issp2011_german_final.doc**; BV partly included in the German ISSP 2012 this field quex, partly taken from ALLBUS 2012.

5. Frequency Distributions of Source Variables

Please supply frequency distributions with absolute and relative frequencies, missing values *included*, for **all** source variables. *Source variables* are the country-specific variables **before** recodes into ISSP standard variables are done. (MS Word or simple ASCII file preferred.)

Attached files:

issp2011_bv_freq.spv

issp2011_bv_freq.docx

6. Correspondence list ISCO88<->national occupation codes

If your country derives ISCO88 codes from a national occupation coding scheme, please supply a correspondence list of national codes and ISCO88 codes. (MS Word or simple ASCII file preferred.)

☒ ISCO88 is used to code responses directly.

☐ Conversion of national coding scheme to ISCO88. Attached file: **ZZZZZZ.ZZZ**.
