# ISSP Background Variable Documentation

by

Markus Quandt, Evi Scholz and Insa Bechert GESIS

on behalf of the

ISSP Demographics Method Group

(Germany, Mexico, Norway, the Philippines, South Africa, Spain, Sweden, Switzerland,  
Taiwan, and the Archive)

Users of the international ISSP data file should have all relevant information to understand the construction of the ISSP background variables. Thus, the ISSP has decided to provide a documentation of its background variables and to regularly update this documentation (decisions of the ISSP General Meetings in 2005 and 2006). The information collected with this document will be published with the ISSP data files. Furthermore, it will help to discuss and decide on streamlining the ISSP background variables.

The Demographics Method Group asks you to provide information on all your ISSP background variables. The document at hand serves to collect and structure this information from ISSP members in a template.

Please note that, due to changes in the ISSP Background Variables, there are different versions of documentation templates to use, related to the respective ISSP study under consideration. The template at hand serves to document your national **ISSP 2011 and 2012** surveys.

The document consists of three sections: Section 1 of this documentation refers to basic elements: source description, information on filters and routing, and construction information. In section 2, as an example, we present the relevant information for the variable UNION (Trade union membership) from Germany. Section 3 finally offers the documentation template for all ISSP background variables valid for the ISSP modules 2011 and 2012.

If you have any questions on the documentation, please do not hesitate to contact us:

[isspservice@gesis.org](mailto:isspservice@gesis.org)

## 1. Basic Elements

For each of the variables listed in section 3 below, please give the following information as applicable.

### ❖ Source description

- Please give the **question no./position/name(s)** used in your field questionnaire and report additional information sources, for example, if interviewer observation was used instead of asking questions to respondents. If your ISSP is run with a larger survey and the background variable is taken from this survey, then refer to that (those) source question(s). Please make a **note** from which survey the question(s)/variable(s) come(s) (see below).
- Please give the text of the **original question(s)** exactly as used in your field questionnaire and **in your national language**.
  - Please include all **response categories** of the original field questionnaire.

- Please give **interviewer instructions** if necessary to understand the generation of response codes.
- Please **translate original questions, response categories and interviewer instructions** into English.
- Please provide **notes** if needed. Notes can address both possible translation issues (**translation note**) and country specific particularities of question background, of variable generation or of the meaning of individual response categories (**note**).
  
- ❖ **Filter Variables and Conditions:** If any variables cover only part of the sample, please list the conditions (questions/variables and categories/codes) used to define the *excluded cases*. In other words, report the conditions which lead to a ‘not applicable’ code in the variable following the filter.
  
- ❖ **Construction/Recoding**
- Please report how the codes of the ISSP target variable were derived from your source data.
- Please use a table of correspondence with source and target codes (see the example in section 2 and tables in section 3).
- If construction of ISSP target codes involves more than simple 1-1 relationships between source and target codes, please use roughly Boolean syntax as shown in the example 2 below. Command syntax of common statistics programs is also welcome. Just put the syntax used into the “Optional: Recoding Syntax” box if you consider that it will increase comprehensibility and transparency.
- Please always (also for country specific variables) report how the ISSP missing values (not applicable-NAP, no answer-NA, don’t know-DK) were filled.
  
- ❖ **Complementary information (see last page)**
- Please provide the part(s) of your country questionnaire that relate(s) to the background variables reported in this template. If these variables are already covered by your country’s field questionnaire delivered with your national ISSP data file, then just tick the box on the last page of this document. (PDF or MS Word format preferred.)
- Please also supply frequency tables with absolute and relative frequencies, missing values *included*, for **all source** variables. *Source variables* are the country-specific variables **before** recodes into ISSP standard variables are done. (MS Word or simple ASCII file preferred.)
- If your country derives ISCO88 codes from a national occupation coding scheme, please supply a correspondence list of national codes and ISCO88 codes. (MS Word or simple ASCII file preferred.)

## 2. Example

The German example for the variable UNION is constructed from two variables referring to two questions in the German field questionnaire.

### UNION – Trade union membership

	National Language	English Translation
<i>Question no. and text</i>	#1 Darf ich Sie fragen, ob Sie derzeit Mitglied in einer Gewerkschaft sind?	#1 May I ask you whether you are currently a member of a trade union?
<i>Codes/ Categories</i>	1. Ja, bin Mitglied	1. Yes, I am member
	2. Nein, bin kein Mitglied	2. No, I am not member
	9. Keine Angabe*	9. No answer*
	0. Nein, Befragter will Frage nicht beantworten*	0. Respondent refuses to answer*
<i>Question no. and text</i>	#2 Waren Sie früher einmal Mitglied in einer Gewerkschaft?	#2 Were you once a member of a trade union?
<i>Codes/ Categories</i>	1. Ja	1. Yes
	2. Nein	2. No
	8. Weiß nicht	8. Don't know
	9. Keine Angabe*	9. No answer*
<i>Note</i>	Falls Befragter aktuell kein Gewerkschaftsmitglied ist; „nein“ in #1	If respondent not currently union member; no in #1
<i>Interviewer Instructions</i>	—	
<i>Translation Note</i>	—	
<i>Note</i>	Current and former union membership taken from ALLBUS 2010 Answer categories marked by an asterisk are not read aloud.	

#### Filter Variable(s) and Conditions:

Former membership (#2) not asked if respondent currently member (#1=1)

#### Construction/Recoding:

Country Variable Codes/ Construction Rules	➔UNION
If (#1=1)	1. Yes, currently
If (#2=1)	2. Yes, previously but not currently
If (#1=2 and #2=2)	3. No, never

If (#1=0)	7. Refused
Else	9. No answer

### 3. Variable List

In the following you will find forms to ease documentation of the points described in section 1 above.

#### Some Hints to Fill in the Forms

- Please fill in the forms on the screen and return the file to <isspservice@gesis.org> – please do *not* return a printout using paper and pencil!
- In general, please feel free to be flexible in using the forms. If necessary adopt them to your reporting needs. In particular:
  - Please insert as many additional fields as needed, e.g. add lines if your country variable has more categories than the template provides.
  - Please skip fields not needed, e.g. skip ‘note’ lines if no note is required.
  - If individual response categories require separate notes, insert as many additional lines as necessary *below* the respective category.
  - If your field questionnaire has more than one language version, please replicate the complete ‘National Language - English Translation/Note’ block as often as needed.
- The question numbers should refer to the numbers of your original field questionnaire.
- For variables with continuous data (AGE, WRKHRS...), please list the lowest and the highest valid codes empirically found in your country’s data and the various non-response codes, e.g. NAP (not applicable), DK (don’t know); if additional non-response codes occur in your data, such as ‘refused’, please add.
- If source variables are relevant for *several* ISSP target variables, please copy the information for the source variables each time to offer a complete documentation of the individual ISSP target variable.

Please name the **ISSP module** which the documentation refers to (e.g., "Health and Health Care / ISSP2011"):

**Family / ISSP 2012**

Please name your **country**:

**SLOVENIA**

### **SEX - Sex of respondent**

	National Language	English Translation
<i>Question no. and text</i>	D1. Spol	D1. Sex
<i>Codes/ Categories</i>	1 - moški	1 - male
	2 - ženski	2 - female
<i>Interviewer Instruction</i>		
<i>Translation Note</i>		
<i>Note</i>		

### **Construction/Recoding:**

	Country Variable Codes/Construction Rules	➔BIRTH
<i>Construction</i>	compute SEX=d1.	
<i>Codes</i>	1 - moški 2 - ženski did not use "no answer"	1. Male 2. Female 9. No answer

### BIRTH – Year of birth

This question can be asked as an alternative to asking about AGE. If BIRTH is not asked directly, it must be computed by DATEYR ‘year of interview’ minus AGE ‘age of respondent’.

	National Language	English Translation
<i>Question no. and text</i>	D2. Kdaj ste bili rojeni? Prosim, povejte samo leto rojstva.	When were you born? Please, tell us year of birth, only.
<i>Codes/ Categories</i>		
<i>Interviewer Instruction</i>		
<i>Translation Note</i>		
<i>Note</i>		

**Construction/Recoding:** (list lowest, highest, and ‘missing’ codes only, replace terms in [square brackets] with real numbers)

	Country Variable Codes/Construction Rules	➔BIRTH
<i>Construction</i>	compute BIRTH=1900 + d2.	
<i>Codes</i>	1918	[MIN BIRTH]
	1994	[HIGH BIRTH]
		9999. No answer

*Optional: Recoding Syntax*

--

### AGE - Age of respondent

This question can be asked as an alternative to asking about BIRTH. If AGE is not asked directly, it must be computed by DATEYR ‘year of interview’ minus BIRTH ‘year of birth’.

	National Language	English Translation
<i>Question no. and text</i>	D2 Kdaj ste bili rojeni? Prosim, povejte samo leto rojstva.	When were you born? Please, tell us year of birth, only.
<i>Codes/ Categories</i>		
<i>Interviewer Instruction</i>		
<i>Translation Note</i>		
<i>Note</i>		

**Construction/Recoding:** (list lowest, highest, and ‘missing’ codes only, replace terms in [square brackets] with real numbers)

	Country Variable Codes/Construction Rules	➔AGE
<i>Construction</i>	compute AGE=2012-d2.	
<i>Codes</i>	18	[MIN AGE]
	94	[HIGH AGE]
		999. No answer

***Optional: Recoding Syntax***

compute AGE=2012-d2.

**EDUCYRS - Education I: years of schooling**

	<b>National Language</b>	<b>English Translation</b>
<i>Question no. and text</i>	D3 Koliko let je trajalo vaše šolanje? Upoštevajte vse vrste izobraževanja od osnovne šole do univerze, vključno s poklicnim izobraževanjem, vajeništvom, vendar ne upoštevajte ponavljanj letnikov)	How long lasted your schooling? Consider all types of schooling from primary school to university, including professional education, training period, but do not count class repetitions.
<i>Codes/ Categories</i>		
<i>Interviewer Instruction</i>		
<i>Translation Note</i>		
<i>Note</i>		

**Filter Variable(s) and Conditions:**

<b>Country Variable Codes/Construction Rules</b>	<b>➔ EDUCYRS</b>
0	0. No formal schooling, no years at school
1	1. One year
28	...
88	98. Don't know
99, sysmis	99. No answer

**Optional: Recoding Syntax**

```
compute EDUCYRS=d3.  
recode EDUCYRS (88=98) (sysmis=99).
```

**nat\_DEGR - Country-specific highest completed degree of education**

	<b>National Language</b>	<b>English Translation</b>
<i>Question no. and text</i>	D4 Navedite zadnjo šolo, ki ste jo končali, redno ali izredno:	Name last school that you finished, full-time or part-time:
<i>Codes/ Categories</i>	<b>0 - brez šolske izobrazbe</b> (0 do največ 3 razrede osemletke ali do največ 5 razredov devetletke).	0 - without formal education (0 to at most 3 grades of 8-year primary school or at most 5 grades of 9-year primary school)
	<b>1 - nepopolna osnovnošolska izobrazba</b> (nedokončana oš z več kot 3 razrede osemletke ali več kot 5 razredov devetletke)	1 - incomplete primary school (more than 3 grades of 8-year or more than 5-grades of 9-year primary school)
	<b>2 - osnovnošolska izobrazba</b> (ima spričevalo o končani oš)	2 - primary school (has a primary school certificate)
	<b>3 - nižja ali srednja poklicna izobrazba</b> (2-3 letni poklicni program, certifikat o npk)	3 - lower high school or vocational school (2 to 3-year program with certificate)
	<b>4 - srednja strokovna izobrazba</b> (srednja tehniska šola, trajanje 4 leta, matura)	4 - high school (technical school, 4-year program with leaving examination)
	<b>5 - srednja splošna izobrazba</b> (gimnazija, matura)	5 - general high school (gymnasium with leaving examination)
	<b>6 - višja strokovna izobrazba, višešolska izobrazba</b> (predhodna višja šola, 2 leti+diploma)	6 - higher school (2-year program + degree)
	<b>7 - visokošolska strokovna izobrazba</b> (nekdanji vs - 3 leta, 1. bolonjska stopnja)	7 - college (3-year program, 1st Bologna degree)
	<b>8 - visokošolska univerzitetna izobrazba</b> (4 - lahko tudi 6 let + diploma)	8 - university degree (4-year program (or 6) + thesis)
	<b>9 - specializacija</b> (približno 1 leto)	9 - specialisation (1 year)
	<b>10 - magisterij</b> (tudi bolonjski magisterij)	10 - master degree (also Bologna master)
	<b>11 - doktorat</b>	11 - PhD
	<b>12 - drugo</b>	12 - other
<i>Interviewer Instruction</i>		
<i>Translation Note</i>		
<i>Note</i>

<i>Translation Note</i>		
<i>Note</i>		

**Filter Variable(s) and Conditions:**

--

### Construction/Recoding:

Country Variable Codes/Construction Rules	→DEGREE
0,1	0. No formal education
2	1. Primary school
3	2. Lower secondary (secondary completed does not allow entry to university: obligatory school)
4,5	3. Upper secondary (programs that allow entry to university)
6	4. Post secondary, non-tertiary (other upper secondary programs toward labour market or technical formation)
7,8	5. Lower level tertiary, first stage (also technical schools at a tertiary level)
9,10,11	6. Upper level tertiary (Master, Dr.)
99	9. No answer

*Optional: Recoding Syntax*

**compute DEGREE=d4.**

**recode degree (0,1=0)(2=1)(3=2) (4,5=3)(6=4)(7,8=5) (9,10,11=6)(99=9).**

**WORK – Currently, formerly, or never in paid work**

	<b>National Language</b>	<b>English Translation</b>
<i>Question no. and text</i>	D5 Ali trenutno imate plačano zaposlitev, ali ste jo imeli v preteklosti, ali niste bili nikoli zaposleni?	Are you currently in paid work, used to have paid work or never had paid work?
<i>Codes/ Categories</i>	1 – sedaj delam, imam plačano zaposlitev	Currently in paid work
	2 – trenutno nimam zaposlitve, sem jo imel v preteklosti	Currently not in paid work, paid work in the past
	3 – nikoli nisem imel plačane zaposlitve	Never had a paid work
<i>Interviewer Instruction</i>		
<i>Translation Note</i>		
<i>Note</i>		

**Filter Variable(s) and Conditions:**

If D5=2, go to D7

If D5=3, go to D14

**Construction/Recoding:**

<b>Country Variable Codes/Construction Rules</b>	<b>➔WORK</b>
1	1. Currently in paid work
2	2. Currently not in paid work, paid work in the past
3	3. Never had a paid work
9	9. No answer

**Optional: Recoding Syntax**

compute WORK=d5.

recode work (8 sysmis=9).

**WRKHRS – Hours worked weekly**

	<b>National Language</b>	<b>English Translation</b>
<i>Question no. and text</i>	D6 Povprečno koliko ur delate v običajnem tednu? Pri tem upoštevajte vsako delo za katero dobite plačilo. Če delate za več kot enega delodajalca, ali če ste hkrati zaposleni in samozaposleni, seštejte vse ure, ki jih opravite!	On an average week, how many hours do you work? Consider any work that you get paid for. If you work for more than one employer or you are employed and self-employed at the same time, count all hours that you work.
<i>Codes/ Categories</i>		
<i>Interviewer Instruction</i>		
<i>Translation Note</i>		
<i>Note</i>	An open question	

**Filter Variable(s) and Conditions:**

recode TYPORG2 (sysmis=9).
RECODE TYPORG2 (1 2 3 4=1)(5 6 7 8=2)(88=8)(99=9).
```

### ISCO88 - Occupation ISCO 1988

Please give the text of the source question(s) on the respondent's occupation used in your field questionnaire. If ISCO88-codes are not coded directly from the responses, but derived from a country-specific occupation coding scheme, please provide a table of correspondence between country-specific and ISCO88 codes *attached as a separate file*. Please report which kind of ISCO code you apply. The most common ones are the code developed by the International Labour Organisation (ILO) and the variant developed for the European Union (EU), ISCO-COM. If you apply another variant such as ISCO88-CIS developed by the Statistical Committee of the Commonwealth of Independent States, then please specify.

Please do **not** enter **standard** ISCO88 codes here. But please report if your country **adds** or **changes** codes compared to ISCO88, if any.

Occupations should be coded on the **4-digit level** of ISCO88. Occupational area 0 (Armed Forces occupations) needs some special attention. Since the ISCO variable is numeric, the 4-digit code 0110 will usually appear as 110 in the data file. It is therefore suggested that the only valid 3-digit code in the data file is 110 (Armed Forces).

In some special cases information concerning the occupation may be insufficient for 4-digit coding. Instead of coding these cases as [9998] "inadequately described" use 3-digit coding. In those very special cases where 3-digit coding is applied, fill in a zero for the missing digit. Example: code 131 is coded as 1310.

### PARTLIV – Living in steady partnership

	National Language	English Translation
<i>Question no. and text</i>	F2 Ali imate partnerja / partnerko?	Do you have a partner?
<i>Codes/ Categories</i>	1 – da	yes
	2 – ne	no
	(9 - brez odgovora)	(no answer)
<i>Question no. and text</i>	F4 Ali živite skupaj z zakoncem / partnerjem – partnerko?	Do you live together with a partner?
<i>Codes/ Categories</i>	1 – da	yes
	2 – ne	no
	(9 - brez odgovora)	(no answer)
<i>Interviewer Instruction</i>	S “partnerjem” se misli tako na zakonca kot na izvenzakonskega partnerja. Živeti skupaj, pomeni živeti v skupnem gospodinjstvu.	“Partner” includes both, legal partner and a partner from a civil partnership. Living together means to have a common household.
<i>Translation Note</i>		
<i>Note</i>	Both questions F2 and F4 were filter questions. F2 was applied 2 times – once within a national survey module and within ISSP demography. F4 was used within the ISSP Family module.	

**Filter Variable(s) and Conditions:**

### SPISCO88 – Spouse, partner: occupation ISCO 1988

Please give the text of the source question(s) on the spouse's occupation used in your field questionnaire. If ISCO88-codes are not coded directly from the responses, but derived from a country-specific occupation coding scheme, please provide a table of correspondence between country-specific and ISCO88 codes *attached as a separate file*. Please report which kind of ISCO code you apply. The most common ones are the code developed by the International Labour Organisation (ILO) and the variant developed for the European Union (EU), ISCO-COM. If you apply another variant such as ISCO88-CIS developed by the Statistical Committee of the Commonwealth of Independent States, then please specify.

Please do **not** enter **standard** ISCO88 codes here. But please report if your country **adds** or **changes** codes compared to ISCO88, if any.

Occupations should be coded on the 4-digit level of ISCO88. Occupational area 0 (Armed Forces occupations) needs some special attention. Since the ISCO variable is numeric, the 4-digit code 0110 will usually appear as 110 in the data file. It is therefore suggested that the only valid 3-digit code in the data file is 110 (Armed Forces).

In some special cases information concerning the occupation may be insufficient for 4-digit coding. Instead of coding these cases as [9998] "inadequately described" use 3-digit coding. In those very special cases where 3-digit coding is applied, fill in a zero for the missing digit. Example: code 131 is coded as 1310.
