Note for Publications Using ALLBUS/GGSS Data

Usage and analysis of research data as well as any publication of research results based on such data should be connected with information on the data generator, the data source and an identification of the dataset. GESIS Data Archive for the Social Sciences therefore suggests the following minimum standard for the scientific citation of its data sets. Example for release 1.0.0 (2014-04-15):

ALLBUS full version:

GESIS – Leibniz Institute for the Social Sciences (2014): German General Social Survey (ALLBUS) – Cumulation 1980-2012. GESIS Data Archive, Cologne. ZA4580, Data file Version 1.0.0, doi: 10.4232/1.11952

ALLBUScompact:

GESIS – Leibniz Institute for the Social Sciences (2014): German General Social Survey (ALLBUScompact) – Cumulation 1980-2012. GESIS Data Archive, Cologne. ZA4581, Data file Version 1.0.0, doi: 10.4232/1.11953

To gain more insight into the use of ALLBUS/GGSS data and to facilitate the exchange of information within the scientific community, authors using ALLBUS/GGSS are requested to send in bibliographic citations and, if possible, two sample copies of completed texts. Among other things, the information you provide will be made available in the **GESIS-library catalogue**, which is also searchable online as part of the GESIS web presence (please direct any questions concerning the GESIS-library holdings and catalogues to Heidi Dorn (phone: +49 221 47694-132; email: heidi.dorn@gesis.org) or Rielies Neitzke (phone: +49 221 47694-131; email: rielies.neitzke@gesis.org)).

Information about all known publications and research projects based on ALLBUS/GGSS data is collected in the **ALLBUS bibliography**. This bibliography is available for online search as well as for download on the ALLBUS pages of the GESIS website.

ALLBUS/GGSS: A National Data Generation Program

Michael Terwey

General Introduction

In the mid-1970s, the "German General Social Survey" (GGSS ("Allgemeine Bevölkerungsumfrage der Sozialwissenschaften" - ALLBUS)) was originally initiated as cooperation between the former Centre for Survey Research and Methodology (ZUMA, Mannheim) and the Central Archive for Empirical Social Research. Its mission is to collect and disseminate high quality data for research and teaching in the social sciences. The core of its concept are repeated cross-section surveys comprising a partly constant and partly varying program of questions that covers key areas of the social sciences.

The first four surveys of the years 1980, 1982, 1984 and 1986 were funded through individual grants of the German Research Foundation (Deutsche Forschungsgemeinschaft (DFG)).¹ DFG funding was also made available for an additional survey in 1991. The aim of this so-called "Baseline Study" was to provide ALLBUS/GGSS data covering the special situation immediately after the German unification.²

With the foundation of the "German Social Sciences Infrastructure Services" (Gesellschaft Sozialwissenschaftlicher Infrastruktureinrichtungen (GESIS)) on 12 December 1986, ALLBUS was included into the state-federal funding of the institutes united within GESIS, so that ALLBUS could be permanently institutionalized as a joint project of GESIS-ZUMA in Mannheim and GESIS-ZA in Cologne. Today this cooperation is in progress as a part of GESIS – Leibniz Institute for the Social Sciences.

¹ For the ALLBUS surveys 1980 to 1986, the following persons acted as applicants for funding by the DFG:

- M. Rainer Lepsius (1980-82; University of Heidelberg)
- Karl Ulrich Mayer (1984-86; Max-Planck-Institute for Human Development, Berlin)
- Walter Müller (1984-86; University of Mannheim)
- Franz Urban Pappi (1984-86; University of Kiel)
- Erwin K. Scheuch (1980-86; University of Cologne)
- Rolf Ziegler (1980-86; University of Munich).

² Primary applicants at the DFG for the ALLBUS-Baseline-Study were:

- Peter Ph. Mohler (ZUMA, Mannheim, in charge)
- Michael Braun (ZUMA, Mannheim)
- Erwin K. Scheuch (University of Cologne)
- Michael Häder (ZUMA, Mannheim)

Further members of the ALLBUS scientific council participated in the application in an advisory role.

When GESIS was founded, the group of former DFG-applicants (principal investigators) was reorganized into a scientific council (ALLBUS-Ausschuss). In April 2014 this scientific council consisted of:

- Andreas Diekmann (ETH-Zentrum Zürich)
- Detlef Fetchenhauer (University of Cologne)
- Frauke Kreuter (University of Munich)
- Karin Kurz (University of Göttingen)
- Stefan Liebig (University of Bielefeld, chair)
- Michael Wagner (University of Cologne)
- Bettina Westle (University of Marburg)³

Working in close coordination with the scientific council, the ALLBUS subgroup at the GESIS department Monitoring Society and Social Change is responsible for design and supervision of survey processes. For information on the surveys as such please contact Dipl.-Soz. Michael Blohm in Mannheim (Tel.: +49 621/1246-276; Fax: +49 621/1246-100; e-mail: michael.blohm@gesis.org).

Archiving, documentation, distribution and integrative cumulation of the data are handled by the ALLBUS-Team at the GESIS department Data Archive for the Social Sciences (DAS) in Cologne. Further information about these ALLBUS data services can be obtained through Dr. Michael Terwey (Tel.: +49 221/47694-440; Fax: +49 221/47694-8440; e-mail: michael.terwey@gesis.org).

Since the year of 2009 both ALLBUS subgroups are additionally joined together in the ALLBUS (GSS) Research Data Center (RDC). All service-operations of this RDC ALLBUS are handled according to the criteria of the German Council for Social and Economic Data (RatSWD – German Data Forum).

Since 1980, commercial polling institutes have been entrusted with the fieldwork of the nationwide surveys (see further comments on technical details of the surveys in the ALLBUS/GGSS survey descrip-

³ Further previous members of the ALLBUS-council:

- Klaus Allerbeck (University of Frankfurt)
- Hans-Jürgen Andreß (University of Cologne)
- Jutta Allmendinger (University of Munich)
- Wilhelm Bürklin (University of Potsdam)
- Hubert Feger (Free University of Berlin)
- Marie Luise Kiefer (University of Vienna)
- Johannes Huinink (University of Bremen)
- Steffen Kühnel (University of Göttingen)
- Karl Ulrich Mayer (Max-Planck-Institute for Human Development, Berlin)
- Heiner Meulemann (University of Cologne)
- Walter Müller (University of Mannheim)
- Karl Dieter Opp (University of Leipzig)
- Franz Urban Pappi (University of Mannheim)
- Erwin K. Scheuch (University of Cologne)
- Rüdiger Schmitt-Beck (University of Mannheim)
- Heike Solga (University of Göttingen)
- Heike Trappe (University of Rostock)
- Rolf Ziegler (University of Munich).

See also the lists of primary investigators and council members in the survey descriptions for the individual ALLBUS surveys.

tion following below). Finally, it should be emphasized that, apart from the regular ALLBUS contributors, many other social scientists have played a significant part in developing the ALLBUS program by proposing questions and offering valuable advice.

The collection and distribution of ALLBUS data for the social sciences in general has four primary goals:

- to investigate current social structures, attitudes, values and behavior in Germany
- to monitor social change over time
- to supply those scientists and students who have no immediate personal access to empirical materials with easily obtainable, high quality data
- to provide data for international comparisons.

Today, ALLBUS/GGSS is an easily available and well documented source of data for research and teaching in the social sciences. A large part of the questions have already been tested in various previous surveys. If earlier questionnaires and publications could not yield adequate questions for specific areas of investigation, modified or new items have been developed specifically for ALLBUS.

Acceptance of ALLBUS/GGSS within the scientific community is widespread and reaches beyond national boundaries. Ever since the first ALLBUS survey in 1980, this series has been among the most requested data of GESIS. As in a number of other countries – notably in the United Kingdom with the "British Social Attitudes" (BSA), in Poland with the "Polish General Social Survey" (PGSS) and in Japan with the "Japanese General Social Survey" (JGSS) – the institutionalization of a social monitoring instrument comparable to the U.S. "General Social Survey" (GSS) has been successful.⁴

⁴ Compare, for example:

Contents of Cumulated ALLBUS/GGSS 1980-2012

This cumulative variable report collects data from 19 ALLBUS/GGSS surveys (1980-2012), with a total of 57,723 respondents. It comprises all items that have been surveyed at least two times within the regular ALLBUS/GGSS program (replications). Until 1990, the surveys were conducted using a random sample of ca. 3000 German citizens from the old Federal Republic of Germany and West Berlin who were residing in private households and were at least 18 years old at the time of the interview. As of 1991, the universe sampled has been extended to cover the former German Democratic Republic (GDR, DDR) and the restriction of the universe sampled to German citizens has been discontinued. From 1991 onward, the samples therefore also contain foreigners living in Germany (insofar as their knowledge of German was sufficient to conduct the interview).⁵

The comparative analysis of East and West German data, made possible by the inclusion of East German respondents in the ALLBUS/GGSS sample since 1991, is of special interest for many researchers. In order to allow meaningful analyses of social groups in the eastern sub-sample, respondents from the area of the new federal states have been oversampled, i.e. more people were interviewed than would have been fitting given their actual proportion of the total population. In many cases it is advisable to do separate analyses of the West and East German sub-samples, because, as numerous analyses have shown, there are still substantial statistical differences between the old and the new federal states. In order to carry out analyses immediately representative of Germany as a whole, however, i.e. without differentiating between old and new federal states, the data must first be weighted. Otherwise, the analysis is quite simply not representative of Germany as a whole, due to the East German oversample. A weight for person-level analyses of total Germany is provided in V1741 (use the WEIGHT command in SPSS). This weight was calculated using official Mikrozensus data from both East and West Germany (cf. *Gabler* 1994; *Koch* et al. 1994; *Wasmer* et al. 1996). More information about further weighting options can be found in the section on sampling methods and weighting below.

The first variables in this ALLBUS/GGSS cumulation 1980-2012 contain basic information about the data set, as for example V1 ZA STUDY NUMBER and V2 YEAR OF SURVEY. V5 REGION OF INTERVIEW and V6 GERMAN CITIZENSHIP, are of special interest because of the changes in the universe sampled, which have been discussed in the previous paragraph (more on sample designs below). V7 allows a differentiation between CAPI and PAPI surveys (cf. *Wasmer* et al. 2002; *Terwey* 2002).⁶ V8 contains information about the sampling method used in the original surveys (household sample or person sample). Some original surveys used a split questionnaire, i.e. a number of questions have only been posed to one half of the respondents in the same way (comp. V9 to V13). This split-half method was mainly used for methodological reasons, e.g. to test the effects of different wordings of a question. In other cases the sequence of some questions was changed to test for context effects. Split questionnaires have also been used to increase the overall number of questions surveyed.

⁵ For some research interests, it makes more sense to exclude foreign nationals from the analysis, e.g. to obtain a demographically more uniform sample for the comparison of data over time. In these cases V6 allows an identification of German citizens and foreign nationals in the data set and the codebook.

⁶ Notes on the special relation between the CAPI (Computer Assisted Personal Interviewing) and PAPI (Paper and Pencil Interviewing) surveys in 2000 can be found in the respective codebooks and in the methodological reports for ALLBUS 2000.

V14 to V648 contain questions about attitudes, subjective self-placements, social perceptions and social contacts:

- V14 to V19: Assessment of economic situations
- V20 to V144: Political attitudes and political participation
- V144 to V153: Attitudes relating to the process of German unification
- V154 to V216: Attitudes towards social inequality and the welfare state
- V217 to V237: Confidence in public institutions and organizations
- V238 to V248: Pride in being a German
- V249 to V321: Ethnocentrism and minorities
- V322 to V327: Attachment to various political entities
- V328 to V379: Family and child raising
- V380 to V394: Attitudes towards abortion
- V395 to V416: Questions on AIDS (HIV)
- V417 to V437: Importance of life aspects and job characteristics
- V438 to V461: Free time activities
- V462 to V475: Health
- V476 to V489: Use of media
- V490 to V569: Religiousness, cosmology and church attachment
- V570 to V581: Environmental pollution
- V582 to V591: Attitudes towards the administration
- V592 to 605: Personal and collective values
- V606 to V612: Anomia and fear of crime
- V613 to V648: Deviant behavior and sanctions

The next variables – V649 to V1682 – cover questions from the field of demographic characteristics:

- V649 to V845: Demographic characteristics of the respondent (e.g. age, religious denomination, education, occupation, income, marital status)
- V846 to V1020: Marital biography and demographic characteristics of spouse
- V1021 to V1097: Demographic characteristics of steady extra-marital partner
- V1098 to V1180: Information about respondent's parents (incl. geographical origin, education and occupation)
- V1181 to V1236: Questions relating to citizenships, length of residence in the FRG, place of residence

- V1237 to V1423: Composition of household and information about respondent's children
- V1424 to V1638: Data on friends and acquaintances of the respondent (ego-centered networks)
- V1639 to V1682: Membership of respondent in various organizations and clubs

Variables V1683 to V1558 contain details about the interview and the interviewer, V1735 to V1738 contain information about the respondent's residence, and the final variables - V1739 to V1744 - contain various weights.

Oversamples, Units of Analysis, and the Topic of Data Transformation

Michael Terwey

Samples of social surveys are not necessarily to be used without prior basic information. Those who intend to work with ALLBUS/GGSS data should be aware of the fact that since 1991 the ALLBUS-samples contain disproportionate shares of respondents from the area of the former German Democratic Republic. Since the reunification a lot of analyses have shown substantial differences between the new federal states and the old Federal Republic of Germany (FRG). It is therefore often statistically accurate to do separate analyses for these areas of present-day Germany. In order to allow meaningful analyses of social groups in the eastern sub-sample, ALLBUS uses a disproportionate sampling design which oversamples respondents from the area of the new federal states, i.e. more people are interviewed in East Germany than would be appropriate given its actual proportion of the total population. For separate analyses of East and West Germany there is no need to take care of this oversample by weighting the data. If your investigation aims at making a statement about Germany as a whole, however, the data have to be weighted first. For this purpose two East-West weights are provided with the data set (cf. V1739-V1744). As an enhancement, the new variable report introduces properly weighted frequency counts for total Germany as a regular feature of most variable descriptions since 1991. Because the data has been adjusted for the oversample, these marginal distributions can be interpreted as *prima facie* representative of Germany as a whole. Cross tabulations by East and West can be found in a separate supplement documentation to the ALLBUS variable reports. *The percentages in these tables can be analyzed without adjusting for the East German oversample.* However as mentioned above, if your own analyses of this data set aim at making a statement about total Germany, the data needs to be weighted first.

An additional topic to consider is the use of *transformation weights* to change household-samples into data on persons and vice versa: From **1980** to **1992** and again in **1998**, the ALLBUS surveys used a sampling method based on the ADM-design. In the first stage of this three stage sampling procedure, a sample of electoral districts was selected. In the second stage the interviewers selected a target household in the electoral district, starting at a randomly chosen address and then proceeding through the area following specified rules. In the third stage, random digits (Kish-Selection-Grid) were finally used to determine the household-member to be interviewed (cf. *Kirschner* 1984; ADM and AG.MA 1999).

In the case of the ADM-sampling-design it is therefore the **households** within the universe sampled which have the same probability of selection. However, for the individuals living at a specific address, the probability of selection also depends on the respective number of household-members belonging to the universe sampled. More specifically: The larger the number of household-members who are eligible to be interviewed, the smaller the chance for a particular person in the household to be finally chosen for the interview. *In principle, all person-level analyses of data from ALLBUS/GGSS surveys using a household-sample, i.e. ALLBUS 1980 to ALLBUS 1992 and ALLBUS 1998, therefore have to be weighted proportionally to the number of household-members belonging to the universe sampled (transformation weight, cf. V1739 and V1741).*

In contrast to earlier ALLBUS-surveys, the surveys in 1994, 1996 and as of 2000 all used a two stage random sampling design yielding a sample of persons rather than of households. In the first stage, a

random sample of municipalities was selected. In the second stage, addresses of individuals were selected at random from the municipal registers of residents. Compared to the ADM-method of sampling, this procedure promises some advantages regarding not only the sample plan and the fieldwork but also the accuracy of some results (cf. ADM and AG.MA 1999, *Blohm* 2006, *Holst* 2006, *Koch* 1997, *Koch* et al. 1994, and table 1). As this more sophisticated and more costly sampling method would have exceeded the budget for the 1998 survey, ALLBUS 1998 was again conducted using the ADM-design (with interviewers working through lists of contact addresses which were pre-selected by random route (cf. ADM and AG.MA 1999, ADM et al. 1999, *Holst* 2006)).

Similar to the early ALLBUS/GGSS-surveys the General Social Survey (GSS) has used full-probability sampling of households giving each household an equal probability of being included. Consequently, the GSS is also self-**weighting** for household-level variables. But again only one adult per household is interviewed. Thus, respondents living in large households have lower probabilities to be selected. For person-level variables, weighting analyses proportionally to the number of persons over 18 in the household may adjust this.⁷ Figure 1 includes an example taken from GSS. For various reasons church attachment can be expected to be positively correlated with household-size (cf. amongst others *Franzmann* and *Wagner* 1999; *Blume* 2006). Therefore an analysis of household-samples without transformation weighting (in GSS NADULTS) may underestimate church attendance (see crosses and dotted trend line in figure 1). Doing the same tabulation with weighting yields slightly higher percentages of weekly church attendance (red boxes, solid trend line). Note that in GSS all units sampled are of the same type, i.e. households, in all years.

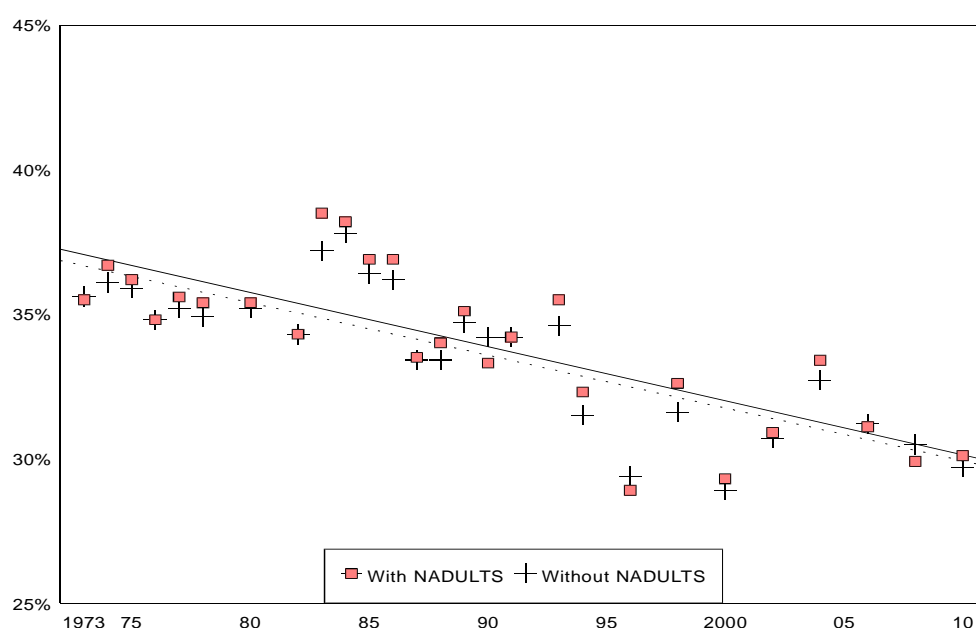

Figure 1: Weekly church attendance in the USA weighted with COMPWT (transformation weight) and unweighted (own calculations on General Social Survey (GSS) 1973-2010, 'nearly every week', 'every week', 'more than once a week' combined)

⁷ Actually in this analysis the weighting is done by composition of variables (COMPWT), which includes the number of adults in the factor WTSSALL (COMPWT=OVERSAMP*FORMWT*WTSSALL). In addition to the transformation of the household data some special features of GSS are modified by this composition (cf. SDA 2013, Stephenson 1978).

The following illustration shows ALLBUS/GGSS-data on married respondents living together in one household. In contrast to GSS we have two types of samples. As already mentioned above, the surveys from 1980 to 1992 and again in 1998 are household-samples, whereas the others are person-samples. Being married and living together is to some degree directly correlated with household-size. As the dotted line in figure 1 shows, we would find basically no change over time if no weighting is done in this straightforward case. Because we are living in a society with a growing share of singles, this finding would probably be misleading.⁸ After weighting the household-surveys to adjust for the underrepresentation of persons in larger households, we find a trend of diminishing percentages of married respondents living together, which is probably a more realistic finding. (A similar difference of trends would occur for calculations on households after transforming the person-samples into household-data (cf. transformation weighting of person-samples below).)

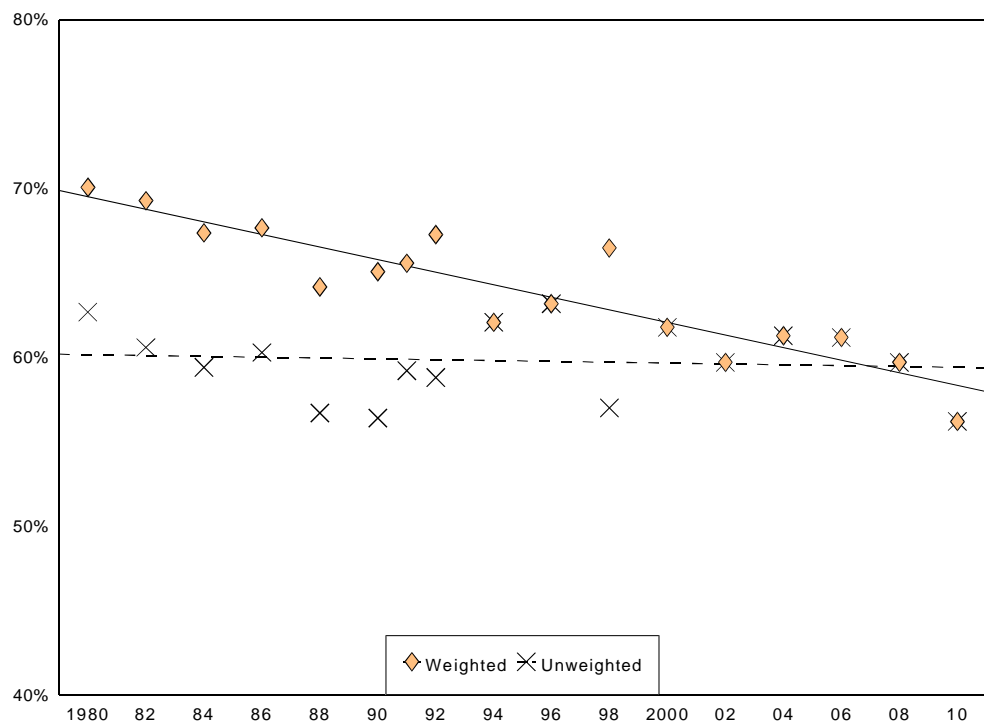

Figure 2: Percentages of married West German respondents living together in one household (weighted with transformation weight and unweighted; own calculations on ALLBUS/GGSS 1980-2010)

However, transformation weights are rarely used in the daily practice of research using household-samples. This is usually unproblematic, because weighted and unweighted results often differ only

⁸ For instance, the share of single person households in the old Federal States increased from 23% in 1980 to 38% in 2010 and in the new Federal States it increased from 15% in 1991 to 38% in 2010 (own calculations using V1199 in ALLBUS/GGSS 1980-2010 weighted by V1566). This remarkable change of communal culture seems to be even more striking in post-socialist society.

slightly or not at all. Generally speaking, the strength of the weighting effect depends on the strength of the correlation between the object of interest in the analysis and the size of the household. If the correlation is weak, using the transformation weight will only slightly affect the analysis. If the correlation is strong, however, weighting will lead to a more substantial difference between weighted and unweighted results. Thus, the safest procedure when performing person-level analyses with data from household samples is to perform both weighted and unweighted analyses. Results should then be checked carefully to determine the influence of weighting.

As shown in figure 2, if weighted and unweighted results differ, it is often recommendable to use the weighted results. It should be noted, however, that in other, less simplistic examples weighted data can deviate more from official census data than unweighted data. The reason for this is that in surveys using the ADM-design the observed size of households can itself be biased in the net sample because of the practical chances of getting contact for interviews. One pertinent example is the underrepresentation, to some degree, of one-person households in ADM-design samples. In theory, respondents living in one-person households should be overrepresented in samples using the ADM-design because of the a priori higher selection probability of persons living in small households. As a matter of fact, however, the difficulty in contacting respondents who are living alone trumps their theoretical advantage in the selection process, leading to a de facto underrepresentation (cf. *Hartmann and Schimpl-Neimanns* 1992).

Table 1 shows some examples of various weighting effects. For this purpose, ALLBUS/GGSS data from 1992 (household-sample) were compared to data from the 1991 Mikrozensus and from ALLBUS/GGSS 1994 (person-sample). While weighting has little effect on all of the listed attitudinal variables (comparing ALLBUS 1992 and 1994), this is only true for some of the demographic variables (comparing with Mikrozensus). Weighting only slightly affects the estimated proportion of men, of respondents with less than 10 years of schooling and the proportion of workers.

The figures for older age groups (70 and older), for married respondents, for respondents living in their own house and especially for respondents living alone, however, again show an effect of weighting which may be desirable. This supports the assumption that all of these characteristics are statistically connected with the size of household. On the other hand, further comparisons show that at least some of the results show more deviation from the Mikrozensus data after the application of the transformation weight.

Both the ADM-design and the design using municipal registers of residents theoretically provide representative samples of the target population. The two methods differ, however, in the selection probability of the sampled units. If the targeted sampling unit is a known individual, respondents have an a priori identical probability of selection. *Therefore, the sample of persons drawn from the municipal registers of residence needs no weighting for analyses targeting the person-level.* In other words, for analyses of person-level data from ALLBUS-surveys using the register-of-residents-sample applying a transformation weight is unnecessary (cf. *Bens* 2006; *Blohm* 2006: 40). Demonstrating the accuracy of a person-sample, the 1994 percentages, which can be analyzed on the person-level without transformation weighting, show rather little deviations from the official data in table 1.

Finally, while household-samples are not necessarily simply representative on the person-level, it is, on the other hand, *mostly inappropriate to draw statements about households from a person-sample without applying an appropriate transformation weight.* Whenever attributes of households – like number of residents, household income, family typology or household classification – are concerned, it is strongly recommended to apply the proper transformation weights (cf. *Bens* 2006 and V1739-V1744 in this variable report). Both types of transformation weights are currently available for all surveys in the ALLBUS/GGSS-cumulation.

Table 1: Comparison of selected data from Mikrozensus 1991 (MZ 91), ALLBUS 1992 (A92) and ALLBUS 1994 (A94) – calculation by Achim Koch (GESIS)

	West Germany %			East Germany %		
	MZ91	A92	A94	MZ91	A92	A94
<u>Attitudes:</u>						
Own economic situation: Very good/good	--	62.4 <i>61.6</i>	57.3	--	35.0	48.3
Interested in politics: Very strongly/strongly	--	33.3 <i>33.2</i>	27.0	--	29.6 <i>29.6</i>	26.4
Inglehart-Index: Postmaterialists	--	23.3 <i>23.3</i>	22.1	--	10.8 <i>9.8</i>	10.8
Socialism is a good idea: Agree completely/ tend to agree	--	42.5 <i>42.8</i>	43.6	--	72.8 <i>73.3</i>	81.2
<u>Demography:</u>						
Sex: Male	47.5	49.0 <i>47.2</i>	51.6	46.6	49.0 <i>46.3</i>	48.1
Age: 70 years and older	12.3	8.8 <i>11.8</i>	9.5	10.9	6.3 <i>8.4</i>	10.5
Schooling: Less than 10 years	61.4	54.1 <i>53.3</i>	54.4	--	39.5 <i>40.7</i>	42.9
Occupational Position: Worker*	34.3	29.7 <i>28.8</i>	32.0	43.8	35.2 <i>35.0</i>	38.8
Marital Status: Married	61.5	68.0 <i>60.0</i>	63.5	65.7	74.7 <i>67.6</i>	68.1
Lives in own house	--	46.9 <i>41.2</i>	47.2	--	36.0 <i>32.5</i>	34.8
Lives alone	18.9	12.4 <i>24.3</i>	18.1	14.9	8.1 <i>16.0</i>	13.6

MZ 91: Anonymized 70% subsample of the 1991 Mikrozensus (ZUMA-File); adult population living in private households

A92: Figures are weighted using the transformation weight (unweighted figures are in italics)

A94: Unweighted figures

* Based on the number of respondents currently full- or part-time employed.

Table 2 shows an exemplary comparison of categorized household income data from ALLBUS/GGSS 2004 and Mikrozensus 2004 (cf. Bens 2006). Comparing columns 1 and 2 with columns 3 and 4 it becomes apparent that a routine analysis of household income would be misleading without transformation weighting (transformation from person-data to household-data). For instance, about 25% of the non-farm households in Mikrozensus 2004 and ALLBUS/GGSS 2004 have an income of 2600 Euro or more.⁹ The same household income category applies more often to persons (over 30%). The share of large households (which often have higher incomes as such) decreases with this type of transformation. On the other hand, a comparison of columns 1 and 3 with columns 2 and 4 shows a positive degree of similarity between Mikrozensus and ALLBUS/GGSS. Consequently, analyzing a sample of persons on the household-level without weighting will often show rather misleading results.

Table 2: Comparison of categorized net household incomes (non-farm) in Mikrozensus 2004 and ALLBUS/GGSS 2004. Income data from ALLBUS/GGSS as household-sample weighted with transformation weight and east-west weight - income data from ALLBUS/GGSS as sample of persons weighted with East-West weight only (calculations for Mikrozensus (70% subsample of Mikrozensus 2004 (ZUMA file)) were provided by Michael Blohm, GESIS Mannheim).

	Household Sample		Sample of Persons	
	Mikrozensus	ALLBUS	Mikrozensus	ALLBUS
Net household income	%	%	%	%
Under 900 Euro	15.6	14.6	10.2	9.6
900 to 1499 Euro	25.9	25.1	20.8	21.1
1500 to 2599 Euro	33.3	35.6	35.7	37.8
2600 Euro or more	25.2	24.7	33.4	31.5
	100.0	100.0	100.0	100.0

⁹ Income data of farmers are not available in Mikrozensus 2004.

Survey Description: Cumulated ALLBUS/GGSS 1980–2012 (ZA No. 4580)

Data Collection Periods:

1980: January 1980 to February 1980

1982: February 1982 to May 1982

1984: March 1984 to June 1984

1986: March 1986 to May 1986

1988: April 1988 to July 1988

1990: March 1990 to May 1990

1991: May 1991 to July 1991

1992: May 1992 to June 1992

1994: February 1994 to May 1994

1996: March 1996 to June 1996

1998: March 1998 to July 1998

2000: January 2000 to July 2000

2002: February 2002 to August 2002

2004: March 2004 to July 2004

2006: March 2006 to August 2006

2008: March 2008 to August 2008

2010: May 2010 to November 2010

2012: April 2012 to September 2012

Contents:

The original surveys have been designed to monitor trends in attitudes, behavior, and societal change in the Federal Republic of Germany. The main topics of this cumulative study are:

- 1.) Economy
- 2.) Political attitudes and participation
- 3.) Attitudes relating to the process of German unification
- 4.) Social inequality and the welfare state
- 5.) Confidence in public institutions and organizations
- 6.) National pride
- 7.) Ethnocentrism and Minorities
- 8.) Attachment to various political entities

- 9.) Attitudes towards marriage, family and partnership
- 10.) Attitudes towards abortion
- 11.) Questions on AIDS (HIV)
- 12.) Importance of life aspects and job characteristics
- 13.) Free time activities
- 14.) Use of media
- 15.) Religion and world view
- 16.) Environment
- 17.) Attitudes towards and contacts with the administration
- 18.) Anomia and fear of crime
- 19.) Personal and collective values
- 20.) Deviant behavior and sanctions
- 21.) ALLBUS-Demography
- 22.) Data on the interview (paradata)
- 23.) Added value

Topics:

- 1.) *Economy*: assessments of the present and future economic situation in Germany and in one's own federal state; assessment of present and future personal economic situation.
- 2.) *Political attitudes and participation*: satisfaction with federal government, state government, German democracy, and with the performance of the German political system (political support); self-placement on left-right continuum; political interest; party inclination; voting intention (Sonntagsfrage); participation in last federal elections; recall of vote in last federal elections; party-sympathy-scales for the CDU, CSU, SPD, FDP, Republicans (Republikaner), NPD, PDS, DKP as well as the Greens (Bündnis 90 / Die Grünen); likelihood of voting for different political parties; political participation; voluntary activities or honorary offices; attitudes towards nuclear energy, the death penalty for terrorists, towards the privatization of publicly owned companies, and towards abortion; democracy scale; perception of individual influence on politics (political efficacy, political alienation); gap between politicians and citizens; self-assuredness with regard to political group work; too much complexity in politics; the politicians' closeness to constituents; personal and average citizen's level of political knowledge; majority capable of working in a political group; participation in the vote as a civic duty; postmaterialism (importance of law and order, fighting rising prices, free expression of opinions, and influence on governmental decisions).
- 3.) *Attitudes relating to the process of German unification*: attitude towards the demand for increased willingness to make sacrifices in the West and more patience in the East; unification is advantageous, for East and West respectively; future of the East depends on the willingness of eastern Germans to make an effort; strangeness of citizens in the other part of Germany; performance pressure in the new states; attitude towards dealing with the Stasi-past of individuals; evaluation of socialism as an idea.
- 4.) *Social inequality and the welfare state*: fair share in standard of living; self-assessment of social class and classification on a top-bottom-scale; evaluation of personal occupational success, comparison with father's position and personal occupational expectations for the future; perceived strength of

conflicts between social groups; attitudes towards the German economic system and evaluation of policies supporting the welfare state; evaluation of equal educational opportunities for everyone; prerequisites for social success; income differences as incentive to achieve; acceptance of social differences; evaluation of personal social security; attitudes towards expansion or cuts in social services; attitudes towards cuts in the defense budget; perceived stance of the federal government in these matters.

5.) *Confidence in public institutions and organizations*: health service, federal constitutional court, federal parliament, local government, German armed forces, churches, judiciary, television, newspapers, universities, federal government, trade unions, police, political parties, employment offices, retirement insurance, employers' association, the European Commission, the European Parliament, the European Court of Justice.

6.) *National pride*: pride in German institutions and German achievements; pride in being a German.

7.) *Ethnocentrism and Minorities*: attitude towards the influx of eastern European ethnic Germans, asylum seekers, labor from EU or non-EU countries; perceived consequences of presence of foreigners in Germany; treatment of foreigners by the administration; ranking in terms of importance of different citizenship requirements; scale of attitudes towards foreigners and contacts with foreigners (split: guest-workers) within the family, at work, in the neighborhood, or among friends; opinion on dual citizenship and on equal rights for foreigners; perceived strength of conflict between guest workers and German citizens; support for the teaching of Islam in public schools; estimation of proportion of foreigners in East and West Germany and in the neighborhood where respondent lives; perceived differences in lifestyle; indicators for social distance to ethnic minorities and foreigners; items on anti-Semitism; perception and evaluation of discriminatory behavior towards foreigners.

8.) *Attachment to various political entities*: attachment to one's own municipality, the federal state, the old Federal Republic or the GDR, unified Germany and the EU.

9.) *Attitudes towards marriage, family, and partnership*: family as a prerequisite for happiness; marriage in case of steady partnership or if child was born; ideal number of children; attitude towards employment of women and mothers; attitude towards the role of men and women in the family; importance of educational goals; most important educational goals in school; classification of the importance of certain educational aspirations for a child; desired characteristics of children; authoritarianism; importance of the family.

10.) *Attitudes towards abortion*: abortion because of health risks for mother or child; abortion after rape, due to financial situation or by single women not wanting to marry; permitting abortion without restriction; until when to allow an abortion if baby will be severely handicapped, if mother does not want more children, if there is a serious health risk for the mother, if there is not enough money, if the mother does not want to raise the child alone, if the father is against an abortion, if children are not part of lifeplan, if the mother does not give a specific reason..

11.) *Questions on AIDS (HIV)*: knowledge of the disease AIDS; perceived reports in the media; attitudes towards higher health insurance fees for AIDS-infected people; attitudes towards dismissal of AIDS-infected employees and towards entry refusal for AIDS-infected foreigners; attitude towards mandatory registration of HIV-infected individuals; worry about personal AIDS infection; personal protective measures and behavioral changes; AIDS-infected people in one's own circle of friends.

12.) *Importance of life aspects and job characteristics*: family and children, occupation and work, free time and recreation, friends and acquaintances, kinship, religion and church, politics and public life, neighborhood; preferred job characteristics (security, income, responsibility, etc.).

13.) *Free time activities*: reading books; reading magazines; listening to records, CD's, cassettes; watching videos; using the computer; surfing the internet; private further education; relaxing, being lazy;

walking or hiking; yoga, meditation; going to restaurants; visiting friends; visiting relatives; playing games; taking short trips; participating in politics; voluntary activities or honorary offices; attending church or religious events; indulging in art and music; do it yourself; active sport; attending sports events, going to the cinema, to pop concerts, jazz or dance events; classic culture (i.e. opera, classical concerts, theater, exhibitions).

14.) *Use of media*: frequency of watching television over the week; taste in television programs: shows and quiz shows, sports, movies, news broadcasts, political magazines, art and culture programs, traditional German "Heimat"-films, detective films, action films, sitcom or entertainment series; frequency of reading a daily newspaper per week.

15.) *Religion and world view*: belief in God, cosmology, and the meaning of life; self-assessment of religiousness and spirituality; frequency of meditation; attitude towards religiousness; religious indifference; thinking about metaphysical questions; experience with and attitude towards different forms of belief, parabelief and superstition; religion vs. science; attitudes towards the role of religion in society and the world; religious tolerance; membership in a church; present and former denominational membership; funeral by church; marriage in church; baptism of children; frequency of church attendance and prayer; interest in Christian programs in the media; attitude towards person with different faiths marrying into the family; belief in a life after death; belief in heaven, hell, and miracles; belief in reincarnation; belief in the devil, angels and spirits; importance of religion in parental home.

16.) *Environment*: perception of general environmental pollution and personally experienced environmental pollution.

17.) *Attitudes towards and contacts with the administration*: evaluation of administration services and assessment of treatment by the administration.

18.) *Anomia and fear of crime*: general feeling of trust in ordinary people and in politicians; social pessimism and orientation towards the future (anomia); fear of crime; fear of unemployment or loss of business.

19.) *Personal and collective values*: basic personal goals (law and order, standard of living, power and influence, fantasy and creativity, security, help marginalized social groups, ability to assert oneself, industry and ambition, tolerance, political engagement, hedonism, faith in God, occupational achievement, self-realization); opinion on various deviant acts with reference to their reprehensibility and the degree to which they deserve persecution; respect of the law; probability of engaging in various deviant acts in the future; self-reported deviant behavior; assessment of probability of being caught committing various crimes; lowering the crime rate through severer punishment; own victimization.

20.) *ALLBUS-Demography*: Details about the respondent: month and year of birth, age, gender, citizenship(s) (nationality), number of citizenships; original citizenship, place of residence (federal state, administrative district, size of municipality, BIK-type of municipality, Boustedt-type of municipality) and length of residence; geographical origin; religious denomination, frequency of church attendance, frequency of attending other place of worship; currently at school or university, school education, vocational training, possession of driver's license, employment status, details about current and former occupation respectively, details about first occupation, industrial sector, fear of unemployment or loss of business, affiliation to public service, length of commute, supervisory functions, date of termination of full- or part-time employment, length of employment, working hours per week (primary and secondary job), size of company, length of unemployment, gaps in occupational biography, desire for work, principal source of livelihood, respondent's income, age when leaving parental home, migration to East or West Germany, interest in migrating to East or West Germany or to another EC country, length of residence (in the FRG, in this federal state, current place of residence), country respondent lived in when young, type of dwelling, self-description of place of residence, telephone, overall health, physical and psychological shape during the last four weeks, overall life satisfaction, height and

weight, marital status, marital biography, desire to have children.

Details about respondent's current spouse: citizenship(s), number of citizenships, original citizenship, age, religious denomination, school education, vocational training, employment status, details about current and former occupation respectively, affiliation to public service, date of termination of full- or part-time employment, length of unemployment, fear of unemployment or loss of business.

Details about respondent's former spouse: age, religious denomination, school education, vocational training, details about current and former occupation respectively.

Details about respondent's steady partner: citizenship(s), number of citizenships, original citizenship, age, common household, distribution of household chores, school education, vocational training, employment status, details about current and former occupation respectively, affiliation to public service, fear of unemployment or loss of business, date of termination of full- or part-time employment. Details about respondent's parents and grandparents: country of origin, school education of father and mother, university education of father and mother, vocational training of father and mother, details about parents' occupation, religious affiliation.

Description of household: size of household, household income, types of income in household, number of persons older than 17 in household (reduced size of household), number of children.

Details about household members: family relation to respondent, gender, month and year of birth, age, marital status, income, German citizenship, baptism, religious affiliation.

Details about children not living in the household: number of children not living in the household, sex, age, baptism, religious affiliation.

Respondent's current memberships (Deutscher Gewerkschaftsbund (DGB) <German Confederation of Trade Unions>, Deutsche Angestelltengewerkschaft (DAG) <German Salaried Employees' Trade Union>, Christlicher Gewerkschaftsbund (CGB) <Christian Federation of Trade Unions>, Union Leitender Angestellter (ULA) <Association of Executive Staff>, Deutscher Beamtenbund (DBB) <German Civil Service Federation>, Deutscher Bauernverband <German Farmers Association>, trade association, Bundesverband der Deutschen Industrie (BDI) <Federation of German Industries>, association of a liberal profession, other occupational association; choral society, sports club, leisure activity club, local citizens club or community club, other social association, association of German expellees or refugees, charitable association, religious/church organization, youth or student organization, political party, citizens' initiative, other club or association); membership status of respondent in various clubs and organizations; previous membership in a trade union.

Friends and acquaintances (ego-centered networks), including information on: gender, age, kinship or type of relationship, school education, employment, occupational position, occupational group, voting behavior, current citizenship and country of origin, spatial distance between alter and ego, comparative economic situation; quality and quantity of contacts, mutual familiarity between friends or acquaintances.

22.) *Data on the interview (paradata)*: Date of interview; beginning and end of interview; length of interview; perceived attractiveness of respondent at beginning and end of interview; taken part in how many interviews; willingness to join panel; reachability of respondent; presence of respondent at home during the last few weekdays; willingness to participate; presence of other persons during interview; presence of spouse, partner or children during interview; presence of other relatives during interview; interference of other persons in the course of the interview; willingness to cooperate and reliability of information from respondent; respondent followed interview on screen; frequency of private Internet use; willingness to participate in an on-line survey; number of attempts to contact the respondent; details about respondent's residential building and assessment of respondent's neighborhood.

Details about the interviewer: gender, age, school education of interviewer; identification number, length of experience as an interviewer.

22.) *Added value:* Body-Mass-Index; Inglehart-Index; family typology, classification of private households (according to Porst and Funk); International Standard Classification of Occupations (ISCO 1968, 1988 and 2008); occupational prestige (according to Treiman); Standard International Occupational Prestige Scale (SIOPS, according to Ganzeboom), International Socio-economic Index of Occupational Status (ISEI, according to Ganzeboom); magnitude prestige (according to Wegener); occupational metaclassification (according to Pappi and Terwey); class position (according to Goldthorpe); weights.

Total Population and Sample:

Universe sampled: Federal Republic of Germany (until 1990: West Germany including West Berlin).

Household samples: From 1980 to 1992 and in 1998, a multi-stage random sample of private households was conducted addressing all persons who were at least 18 years of age (ADM Sample Design).

Person Samples: In 1994, 1996, and from 2000 a two-stage, disproportionate random sample was conducted in West Germany (including West Berlin) and East Germany (including East Berlin), comprising all persons living in private households who were at least 18 years old on 1 January of the year of the survey. In the first sample stage municipalities (Gemeinden) in western Germany and municipalities in eastern Germany were selected with a probability proportional to their number of adult residents; in the second sample stage individual persons were selected at random from the municipal registers of residents.

As of 1991 the ALLBUS sample also includes foreigners living in Germany. Targeted individuals who did not have adequate knowledge of German to conduct the interview were treated as systematic unit non-responses.

Method of Data Collection:

Personal interview with standardized questionnaire (PAPI – Paper and Pencil Interviewing; since 2000: CAPI – Computer Assisted Personal Interviewing), supplementary data from accompanying ISSP surveys (self-completion questionnaires, drop off).

Primary Sampling Units / Sample-Points:

See survey descriptions of individual ALLBUS surveys.

Response Rate:

See survey descriptions of individual ALLBUS surveys.

Data Set:

Number of respondents: 57,723

Number of variables: 1,744

The known literature using ALLBUS-Data is documented in the ALLBUS-Bibliography. This bibliography can be searched online at the [GESIS web presence](#).

Further Notes:

This cumulative data set of 19 ALLBUS surveys contains all ALLBUS time series (i.e. all questions that have been surveyed at least two times). Notes on the special relation between the CAPI- and PAPI-surveys in 2000 can be found in the respective codebooks and in the methodological reports for ALLBUS 2000.

The crosstabulations contained in the data handbook are weighted so as to adjust for the oversample of respondents from the new federal states (East Germany) as of 1991 (design weight). Therefore, the frequencies shown for 1991 and onward are directly interpretable as representative for the specified target population in total Germany. Cross tabulations of the unweighted data are provided in a supplementary documentation file. In these unweighted tables East and West German data is counted separately.

A second version of this data set (912 variables) with a shortened demography module is additionally available as [Cumulated ALLBUS/GGSScompact 1980-2012 \(Study-No. 4581\)](#).

The original German documentation is available under ZA4578 (Kumulierter ALLBUS 1980-2012) and ZA4579 (Kumulierter ALLBUScompact 1980-2012).

How to Read the Variable Report

The following two examples are actual variables from this variable report. They were chosen so as to cover the broadest scope of information possible.

The red numbers in the examples refer to the explanations that follow below, i.e. they are not part of the actual variable documentation in the variable reports.

Example 1: Person-related data (question surveyed during field-work)

1	V934 PRES.SP.: GENERAL SCHOOL LEAVING CERT.
	<p data-bbox="427 813 1018 835">2 <If respondent is married (1994-1998, from 2002: and lives with spouse)></p> <p data-bbox="427 842 949 864">What general school leaving certificate does your spouse have?</p> <p data-bbox="427 871 821 893">Which of the following applies to your spouse?</p> <p data-bbox="427 900 1157 922">(Int.: Please present card. Only one choice possible. Please request highest certificate only.)</p>
	<p data-bbox="427 958 1264 1010">3 0 Respondent is widowed, divorced or never married (code 3-5, 8, 9 in V845), 1994-1998, from 2002 also: respondent is living separated (code 2, 7 in V845); not available 1986</p> <p data-bbox="427 1016 866 1039">1 Finished school without school leaving certificate;</p> <p data-bbox="427 1046 1098 1068">1991 East: Finished school without school leaving certificate, did not finish 8th grade</p> <p data-bbox="427 1075 1281 1097">2 Lowest formal qualification of Germany's tripartite secondary school system, after 8 or 9 years of schooling</p> <p data-bbox="427 1104 780 1126"><Until 1991: Volks-/ Hauptschulabschluß</p> <p data-bbox="427 1133 1091 1155">1991 East: Volksschulabschluß, Polytechnische Oberschule mit Abschluß 8. Klasse</p> <p data-bbox="427 1162 1248 1184">from 1992: Volks-/ Hauptschulabschluß bzw. Polytechnische Oberschule mit Abschluß 8. oder 9. Klasse></p> <p data-bbox="427 1191 971 1214">3 Intermediary secondary qualification, after 10 years of schooling</p> <p data-bbox="427 1220 957 1243"><1991 East: Polytechnische Oberschule mit Abschluß 10. Klasse</p> <p data-bbox="427 1249 1233 1272">from 1992: Mittlere Reife, Realschulabschluß bzw. Polytechnische Oberschule mit Abschluß 10. Klasse</p> <p data-bbox="427 1279 940 1301">until 1991: Mittlere Reife, Realschulabschluß (Fachschulreife)></p> <p data-bbox="427 1308 992 1330">4 Certificate qualifying for studies at a University of Applied Sciences</p> <p data-bbox="427 1337 919 1359"><Fachhochschulreife (Abschluß einer Fachoberschule, etc.)</p> <p data-bbox="427 1366 647 1388">1991 Ost: Fachabitur></p> <p data-bbox="427 1395 866 1417">5 Certificate qualifying for studies at university level</p> <p data-bbox="427 1424 743 1447"><Until 1991: Abitur (Hochschulreife)</p> <p data-bbox="427 1453 1085 1476">1991 East: Abitur, Erweiterte Oberschule mit Abschluß 12. Klasse (Hochschulreife)</p> <p data-bbox="427 1482 1126 1505">from 1992: Abitur bzw. Erweiterte Oberschule mit Abschluß 12. Klasse (Hochschulreife)></p> <p data-bbox="427 1512 732 1534">6 Other school leaving certificate</p> <p data-bbox="427 1541 756 1563"><From 1986: Anderen Schulabschluß</p> <p data-bbox="427 1570 1254 1592">1991 West: Anderen Schulabschluß (auch in der ehemaligen DDR oder im Ausland erworbener Abschluß)</p> <p data-bbox="427 1599 1289 1621">1991 East: Anderen Schulabschluß (auch in den alten Bundesländern oder im Ausland erworbener Abschluß)></p> <p data-bbox="427 1628 692 1650">7 From 1986: Still at school</p> <p data-bbox="427 1657 576 1680">97 Refused</p> <p data-bbox="427 1686 596 1709">98 Don't know</p> <p data-bbox="427 1715 593 1738">99 No answer</p>
4	<p data-bbox="427 1776 616 1798">Derivation of data:</p> <p data-bbox="427 1805 1233 1850">The data for 1980-1984 was derived from a cumulative variable for the respondent's current and former spouses.</p> <p data-bbox="427 1888 560 1910">Comment:</p> <p data-bbox="427 1917 1302 1995">For certain years this variable has been recoded so as to conform with the standardized ALLBUS coding. The sequence of answer categories shown in this documentation may therefore deviate from that actually used in the field.</p>

Example 2: Household-related data (derived variable)

1	V1344 REDUCED SIZE OF HOUSEHOLD
	Additional text not in questionnaire:
2	Until 1990: Number of adult Germans in the household (18 years and older)
	From 1991: Number of adult Germans and foreigners in the household (18 years and older)
3	1 1 person 2 2 persons 3 3 persons 4 4 persons 5 5 persons 6 6 persons 7 7 persons 8 8 persons 9 9 persons 97 Refused 99 No answer
4	Note: This variable contains information about the number of household members belonging to the ALLBUS population in the year of the survey. Until 1990, ALLBUS targeted all adult German citizens living in private households. As of 1991, adult foreign residents were also included in the target population. Due to differences in the sampling procedures, household samples and samples of individuals use different rules for who counts as an adult in the total population. With household samples, the person to be interviewed is only chosen at the time of the actual interview. Therefore, the ALLBUS household samples (1980-1992 and 1998) comprise all members of a given household who were at least 18 years old at the time of the interview. With samples of individuals (1994, 1996 and 2000-2008), on the other hand, the targeted respondents are chosen ahead of the actual interview. Consequently, ALLBUS samples of individuals use 1 January of the survey year as the deadline to determine whether an individual is to be regarded as an adult for the purpose of the sample. Using slightly varying formulations, this data was surveyed directly in 1980, 1982, 1988 and 1990. In 1984, 1986 and as of 1991 the data was derived from the information provided in the list of household members above. The difference in sampling procedures was taken into account.

Explanation

1

Each question unit is assigned a unique variable number and variable label.

2

For variables based directly on questions surveyed in the field (example 1), the complete question text, including interviewer instructions and filtering rules, is documented. As far as possible, the exact notation of the original questionnaires is retained.

Derived variables (example 2), are documented with explanatory notes marked 'Additional text not in questionnaire'.

As of the 1980-2004 edition of the cumulative ALLBUS data handbook, the previous policy of documenting all technical details of the instruments has been dropped, because the wealth of often minute differences that needed to be documented increasingly tended to obscure rather than to clarify survey procedures. Therefore, editorial policy was changed to documenting only those modifications that can be plausibly assumed to influence a respondent's answers. This streamlining of documentation predominantly concerns complex item batteries like the questions on household composition etc. For a full documentation of the technical administration of such questions over the years, please refer to the original questionnaires and data handbooks or variable reports.

As far as possible, the translations used in this variable report were taken from existing, official documents (e.g. official translations of ALLBUS questions by GESIS, ISSP source questionnaires, etc.). When no suitable source material was available, variables were newly translated for this documentation. Following the usual policy for ALLBUS translations, the goal was to let researchers see what was actually asked in the German survey rather than to provide an instrument ready for use in an English-speaking context.

3

Here, the codes of the individual answer categories as they are stored in the data set can be found.

4

Additional information about the data follows below the documentation of answer codes. There are three categories of additional information: derivation of data, comments and notes.

- Derivation of data documents information on how the data in derived variables was prepared (comp. example 2).
- Comments contain short pieces of additional information.
- Notes provide more detailed background information on variables, often including information on theoretical backgrounds or further reading.

5

Most variable descriptions contain crosstabulations by year of survey. Value labels are the same as in the data set. Missing values are documented in absolute values only. They are also marked *M* in the tables (due to technical limitations the column heading Missing is often cut off). Valid responses are documented with absolute frequencies and column percentages. Per default, the data is weighted to adjust for the oversample of respondents from the eastern part of the country. It can therefore be regarded as representative of the intended population in Germany as a whole. For your personal analyses, the weights used in calculating the data documented in this variable report are included in the data set (V1564). Please note, what appear to be minor rounding errors in some of the row sums are due to the weighting procedure. This also applies to the percentages in the tables.

Unweighted cross tabulations that show the actual distributions in the data set are documented in a supplement file. Because of the overrepresentation of East German respondents, the numbers in these tables are calculated by year and region of interview from 1991 onwards.

V7 INTERVIEW: CAPI OR PAPI?

Additional text not in questionnaire:

Interviewing method used for the ALLBUS-survey

- 1 PAPI (Paper and Pencil Interviewing)
- 2 CAPI (Computer Assisted Personal Interviewing)

Comment:

ALLBUS 2006 is classified as a CAPI-Survey here. However, part of the respondents were asked to fill in their responses to a number of items themselves (CASI - Computer Assisted Self-Interviewing). For information as to which variables are concerned please refer to V9.

Note:

Split Questionnaires in ALLBUS

In 1980, 1982, 1988, 1994, 2000, 2006, 2010 and 2012 the ALLBUS surveys used a split questionnaire.

V9 documents the split questionnaire version for 1980, 1982, 1988, 1990, 1994, 2000 and 2006. Split questionnaire versions for 2010 are documented in V10. The three different splits used in 2012 are documented in V11 to V13.

In 1980 the split questionnaire was used to test the influence of alternative question wordings. The split concerned three item batteries that were surveyed in two slightly different versions.

The 1982 survey was conducted using two forms of the questionnaire that varied a) with regard to the sequence of the questions on religiousness and cosmology and b) with regard to the wording of the questions on work orientations, educational goals and the self-assessment of social class.

In 1988 a split questionnaire was used to test for sequence effects in surveying two similar item batteries on political participation. Two forms of the questionnaire varying the order of the items in question were used.

In 1990, two split versions with a partially different program of questions were surveyed so as to increase the overall number of questions in the survey.

In the 1994 survey, the alternate split substituted the previously established term "guest workers" with the politically more neutral expression "the foreigners living in Germany" in the questions on attitudes towards and contacts with foreigners. The term "guest workers" was abandoned in subsequent ALLBUS surveys.

The 2000 survey again used two split versions with a partially different question program so as to increase the total number of questions surveyed.

Since 2000, the ALLBUS-surveys have been conducted using the method of computer assisted interviewing (CAPI), i.e. the interviewer uses a laptop computer to read out the questions and to record the answers. With one notable exception, this was also the case for ALLBUS 2006. To survey the four items on on ethnocentrism (V271-V274), a split questionnaire was used such that one half of the respondents answered the question in the usual CAPI-mode while the other half used the laptop computer to read and answer the questions on their own (CASI - computer assisted self-interviewing). By thus varying the degree of anonymity of the interview situation, the data can be used to test for social desirability effects in the respondents' answers on the topic of ethnocentrism.

In 2010 a split questionnaire was used in the social networks module to field two different network generators. One split version replicated the network generator previously used in ALLBUS. In this case respondents were asked to name the three persons they spend most time with socially. In the other split version a network generator modelled after the one in GSS (General Social Survey) was used. This network generator asks people to name five persons with whom they have discussed important topics during the preceding six months.

A second split used in the 2010 program has not been included in this cumulated data. This split covered the questions on the importance of different job characteristics (V425-V435) and was used to test different methods of randomization (card pack and computerized randomization respectively). Please refer to the ALLBUS 2010 documentation for detailed information on this methodological experiment.

In 2012 three different splits were used, which are documented in V11 to V13:

V11 documents the 2012 split with regard to the questions on abortion. One half of the respondents (split A) was asked to indicate whether abortion should be permissible or not under varying circumstances. The other half of the respondents (split B) was asked to indicate whether abortion should be permissible under varying circumstances and up to what time it should be permissible. Respondents were assigned to each group randomly by the CAPI-software.

V12 documents the 2012 split on the questions regarding gender roles in the context of family. One half of the respondents (split A) was asked about women and their role in the family and in bringing up children. The other half of the respondents (split B) was asked to comment on a set of questions regarding the role of mothers and fathers in a family. Again, respondents were assigned to each group randomly by the CAPI-software.

V13 documents the 2012 split on the frequency of church attendance (split A) or the frequency of attendance at a divine service (split B) as a child.

Here, too, respondents were assigned to each group randomly by the CAPI-software.

Note:

Split Questionnaires in ALLBUS

In 1980, 1982, 1988, 1994, 2000, 2006, 2010 and 2012 the ALLBUS surveys used a split questionnaire.

V9 documents the split questionnaire version for 1980, 1982, 1988, 1990, 1994, 2000 and 2006. Split questionnaire versions for 2010 are documented in V10. The three different splits used in 2012 are documented in V11 to V13.

In 1980 the split questionnaire was used to test the influence of alternative question wordings. The split concerned three item batteries that were surveyed in two slightly different versions.

The 1982 survey was conducted using two forms of the questionnaire that varied a) with regard to the sequence of the questions on religiousness and cosmology and b) with regard to the wording of the questions on work orientations, educational goals and the self-assessment of social class.

In 1988 a split questionnaire was used to test for sequence effects in surveying two similar item batteries on political participation. Two forms of the questionnaire varying the order of the items in question were used.

In 1990, two split versions with a partially different program of questions were surveyed so as to increase the overall number of questions in the survey.

In the 1994 survey, the alternate split substituted the previously established term "guest workers" with the politically more neutral expression "the foreigners living in Germany" in the questions on attitudes towards and contacts with foreigners. The term "guest workers" was abandoned in subsequent ALLBUS surveys.

The 2000 survey again used two split versions with a partially different question program so as to increase the total number of questions surveyed.

Since 2000, the ALLBUS-surveys have been conducted using the method of computer assisted interviewing (CAPI), i.e. the interviewer uses a laptop computer to read out the questions and to record the answers. With one notable exception, this was also the case for ALLBUS 2006. To survey the four items on on ethnocentrism (V271-V274), a split questionnaire was used such that one half of the respondents answered the question in the usual CAPI-mode while the other half used the laptop computer to read and answer the questions on their own (CASI - computer assisted self-interviewing). By thus varying the degree of anonymity of the interview situation, the data can be used to test for social desirability effects in the respondents' answers on the topic of ethnocentrism.

In 2010 a split questionnaire was used in the social networks module to field two different network generators. One split version replicated the network generator previously used in ALLBUS. In this case respondents were asked to

name the three persons they spend most time with socially. In the other split version a network generator modelled after the one in GSS (General Social Survey) was used. This network generator asks people to name five persons with whom they have discussed important topics during the preceding six months.

A second split used in the 2010 program has not been included in this cumulated data. This split covered the questions on the importance of different job characteristics (V425-V435) and was used to test different methods of randomization (card pack and computerized randomization respectively). Please refer to the ALLBUS 2010 documentation for detailed information on this methodological experiment.

In 2012 three different splits were used, which are documented in V11 to V13:

V11 documents the 2012 split with regard to the questions on abortion. One half of the respondents (split A) was asked to indicate whether abortion should be permissible or not under varying circumstances. The other half of the respondents (split B) was asked to indicate whether abortion should be permissible under varying circumstances and up to what time it should be permissible. Respondents were assigned to each group randomly by the CAPI-software.

V12 documents the 2012 split on the questions regarding gender roles in the context of family. One half of the respondents (split A) was asked about women and their role in the family and in bringing up children. The other half of the respondents (split B) was asked to comment on a set of questions regarding the role of mothers and fathers in a family. Again, respondents were assigned to each group randomly by the CAPI-software.

V13 documents the 2012 split on the frequency of church attendance (split A) or the frequency of attendance at a divine service (split B) as a child.

Here, too, respondents were assigned to each group randomly by the CAPI-software.

Note:

Split Questionnaires in ALLBUS

In 1980, 1982, 1988, 1994, 2000, 2006, 2010 and 2012 the ALLBUS surveys used a split questionnaire.

V9 documents the split questionnaire version for 1980, 1982, 1988, 1990, 1994, 2000 and 2006. Split questionnaire versions for 2010 are documented in V10. The three different splits used in 2012 are documented in V11 to V13.

In 1980 the split questionnaire was used to test the influence of alternative question wordings. The split concerned three item batteries that were surveyed in two slightly different versions.

The 1982 survey was conducted using two forms of the questionnaire that varied a) with regard to the sequence of the questions on religiousness and cosmology and b) with regard to the wording of the questions on work orientations, educational goals and the self-assessment of social class.

In 1988 a split questionnaire was used to test for sequence effects in surveying two similar item batteries on political participation. Two forms of the questionnaire varying the order of the items in question were used.

In 1990, two split versions with a partially different program of questions were surveyed so as to increase the overall number of questions in the survey.

In the 1994 survey, the alternate split substituted the previously established term "guest workers" with the politically more neutral expression "the foreigners living in Germany" in the questions on attitudes towards and contacts with foreigners. The term "guest workers" was abandoned in subsequent ALLBUS surveys.

The 2000 survey again used two split versions with a partially different question program so as to increase the total number of questions surveyed.

Since 2000, the ALLBUS-surveys have been conducted using the method of computer assisted interviewing (CAPI), i.e. the interviewer uses a laptop computer to read out the questions and to record the answers. With one notable exception, this was also the case for ALLBUS 2006. To survey the four items on on ethnocentrism (V271-V274), a split questionnaire was used such that one half of the respondents answered the question in the usual CAPI-mode while the other half used the laptop computer to read and answer the questions on their own (CASI - computer assisted self-interviewing). By thus varying the degree of anonymity of the interview situation, the data can be used to test for social desirability effects in the respondents' answers on the topic of ethnocentrism.

In 2010 a split questionnaire was used in the social networks module to field two different network generators. One split version replicated the network generator previously used in ALLBUS. In this case respondents were asked to

name the three persons they spend most time with socially. In the other split version a network generator modelled after the one in GSS (General Social Survey) was used. This network generator asks people to name five persons with whom they have discussed important topics during the preceding six months.

A second split used in the 2010 program has not been included in this cumulated data. This split covered the questions on the importance of different job characteristics (V425-V435) and was used to test different methods of randomization (card pack and computerized randomization respectively). Please refer to the ALLBUS 2010 documentation for detailed information on this methodological experiment.

In 2012 three different splits were used, which are documented in V11 to V13:

V11 documents the 2012 split with regard to the questions on abortion. One half of the respondents (split A) was asked to indicate whether abortion should be permissible or not under varying circumstances. The other half of the respondents (split B) was asked to indicate whether abortion should be permissible under varying circumstances and up to what time it should be permissible. Respondents were assigned to each group randomly by the CAPI-software.

V12 documents the 2012 split on the questions regarding gender roles in the context of family. One half of the respondents (split A) was asked about women and their role in the family and in bringing up children. The other half of the respondents (split B) was asked to comment on a set of questions regarding the role of mothers and fathers in a family. Again, respondents were assigned to each group randomly by the CAPI-software.

V13 documents the 2012 split on the frequency of church attendance (split A) or the frequency of attendance at a divine service (split B) as a child.

Here, too, respondents were assigned to each group randomly by the CAPI-software.

Note:

Split Questionnaires in ALLBUS

In 1980, 1982, 1988, 1994, 2000, 2006, 2010 and 2012 the ALLBUS surveys used a split questionnaire.

V9 documents the split questionnaire version for 1980, 1982, 1988, 1990, 1994, 2000 and 2006. Split questionnaire versions for 2010 are documented in V10. The three different splits used in 2012 are documented in V11 to V13.

In 1980 the split questionnaire was used to test the influence of alternative question wordings. The split concerned three item batteries that were surveyed in two slightly different versions.

The 1982 survey was conducted using two forms of the questionnaire that varied a) with regard to the sequence of the questions on religiousness and cosmology and b) with regard to the wording of the questions on work orientations, educational goals and the self-assessment of social class.

In 1988 a split questionnaire was used to test for sequence effects in surveying two similar item batteries on political participation. Two forms of the questionnaire varying the order of the items in question were used.

In 1990, two split versions with a partially different program of questions were surveyed so as to increase the overall number of questions in the survey.

In the 1994 survey, the alternate split substituted the previously established term "guest workers" with the politically more neutral expression "the foreigners living in Germany" in the questions on attitudes towards and contacts with foreigners. The term "guest workers" was abandoned in subsequent ALLBUS surveys.

The 2000 survey again used two split versions with a partially different question program so as to increase the total number of questions surveyed.

Since 2000, the ALLBUS-surveys have been conducted using the method of computer assisted interviewing (CAPI), i.e. the interviewer uses a laptop computer to read out the questions and to record the answers. With one notable exception, this was also the case for ALLBUS 2006. To survey the four items on on ethnocentrism (V271-V274), a split questionnaire was used such that one half of the respondents answered the question in the usual CAPI-mode while the other half used the laptop computer to read and answer the questions on their own (CASI - computer assisted self-interviewing). By thus varying the degree of anonymity of the interview situation, the data can be used to test for social desirability effects in the respondents' answers on the topic of ethnocentrism.

In 2010 a split questionnaire was used in the social networks module to field two different network generators. One split version replicated the network generator previously used in ALLBUS. In this case respondents were asked to

name the three persons they spend most time with socially. In the other split version a network generator modelled after the one in GSS (General Social Survey) was used. This network generator asks people to name five persons with whom they have discussed important topics during the preceding six months.

A second split used in the 2010 program has not been included in this cumulated data. This split covered the questions on the importance of different job characteristics (V425-V435) and was used to test different methods of randomization (card pack and computerized randomization respectively). Please refer to the ALLBUS 2010 documentation for detailed information on this methodological experiment.

In 2012 three different splits were used, which are documented in V11 to V13:

V11 documents the 2012 split with regard to the questions on abortion. One half of the respondents (split A) was asked to indicate whether abortion should be permissible or not under varying circumstances. The other half of the respondents (split B) was asked to indicate whether abortion should be permissible under varying circumstances and up to what time it should be permissible. Respondents were assigned to each group randomly by the CAPI-software.

V12 documents the 2012 split on the questions regarding gender roles in the context of family. One half of the respondents (split A) was asked about women and their role in the family and in bringing up children. The other half of the respondents (split B) was asked to comment on a set of questions regarding the role of mothers and fathers in a family. Again, respondents were assigned to each group randomly by the CAPI-software.

V13 documents the 2012 split on the frequency of church attendance (split A) or the frequency of attendance at a divine service (split B) as a child.

Here, too, respondents were assigned to each group randomly by the CAPI-software.

V17 ECONOMIC SITUATION I.GERMANY IN ONE YEAR

From 1991:

What do you think the economic situation will be like in one year?

Please use the card for your answers.

(Int.: Please present card.)

Until 1990:

And how will it be in one year? Do you expect that the general economic situation in the Federal Republic will then be considerably better, somewhat better, the same, somewhat worse, or considerably worse than today?

0 Not available 1980, 1988, 1990 (split 1)

1 Considerably better than today

2 Somewhat better than today

3 The same

4 Somewhat worse than today

5 Considerably worse than today

8 Don't know

9 No answer

Comment:

The questions about the economic situation in Germany were surveyed in varying contexts and constellations in the original surveys. Please refer to the original documentation for detailed information.

V24 SELF-PLACEMENT ON LEFT-RIGHT CONTINUUM

Many people use the terms "left" and "right" to describe differing political views. Here we have a scale that runs from left to right. If you think of your own political views, where would you place them on this scale?

1980-1998, 2000 PAPI:

Please tick one of the boxes.

(Int.: Please hand over a pencil and the questionnaire. Respondent should tick the appropriate box himself/herself on the next page. Please make sure that the tick is placed inside the box.)

2000 CAPI, 2002-2012:

Please choose one of the boxes and tell me the letter printed underneath this box.

(Int.: Please present card. Ask for and record the appropriate letter.)

V25 POLITICAL INTEREST, RESPONDENT<ORDINAL>

How interested in politics are you? Very strongly, strongly, middling, very little, or not at all?

(Int.: Please read the categories aloud.)

0 Not available 1982 (split 2), 1988

1 Very strongly

2 Strongly

3 Middling

4 Very little

5 Not at all

9 No answer

Comment:

In ALLBUS 1982 there were two different split version of this question. Split 1 used this 5-point scale, while split 2 used the 10-point scale in V26.

V31 ELIGIBLE TO VOTE LAST FEDERAL ELECTION?

Until 1990:

Interview is conducted in:

- The Federal Republic of Germany (go to V31)
- West-Berlin (go to V36)

(Int.: Choose without asking respondent.)

1984-2004:

The last federal election took place on...

(1984, 1986: 06.03.1983)

(1988, 1990: 25.01.1987)

(1991, 1992: 02.12.1990)

(1998: 16.10.1994)

(2002: 27.09.1998)

(2004: 22.09.2002).

Until 1992:

Were you eligible to vote at this time?

From 1998:

Were you eligible to vote in this election?

0 1984 to 1990: Respondent lives in West Berlin; 2004: no participation in ISSP 'National Identity' or ISSP 'Citizenship';
not available 1980, 1982, 1990 (split 1), 1994, 1996, 2000, 2006-2010

1 Yes

2 No

9 No answer

Comment:

Since 1986, the ALLBUS-interview has usually been accompanied by a self-completion questionnaire for the German ISSP-survey (International Social Survey Programme (ISSP)). As a rule the ISSP-questions are not included in this cumulative data set. However, the question documented here has been part of the ALLBUS-interview several times.

As an exception to the rule, the relevant ISSP-data was therefore included in this data set.

V33	DID YOU VOTE IN LAST FEDERAL ELECTION?
-----	--

Until 2004:

Did you vote?

2006, 2008:

The last federal election took place on 18 September 2005. Did you vote in this election?

2010, 2012:

The last federal election took place in September 2009. Did you vote in this election?

0 2004: No participation in ISSP 'National Identity' or ISSP 'Citizenship';

2012: no participation in ISSP 'Health' or ISSP 'Family, Work and Gender Roles';

not available 1980, 1982, 1990 (split 1), 1994, 2000

1 Yes

2 No

10 Not eligible to vote (filtered out in some original surveys)

11 Foreigner, ineligible to vote (reconstructed from V6, filtered out in some original surveys)

12 Foreigner who nevertheless reported having voted (reconstructed from V6)

13 1984-1990: resident of West-Berlin (filtered out in original surveys)

98 Do not know

99 No answer

Comment:

Since 1986, the ALLBUS-interview has usually been accompanied by a self-completion questionnaire for the German ISSP-survey (International Social Survey Programme (ISSP)). As a rule the ISSP-questions are not included in this cumulative data set. However, the question documented here has been part of the ALLBUS-interview several times. As an exception to the rule, the relevant ISSP-data was therefore included in this data set.

Note:

A number of original surveys used a filter question (V31) to screen out respondents who were not eligible to vote.

Two different sets of filter criteria were used over the years:

From 1984 to 1990 respondents were screened out if they reported being ineligible to vote (code 2 in V31).

Additionally, residents of West-Berlin (code 0 in V31) were screened out, because they were not eligible to vote in national elections.

In 1991, 1992, 1998, 2002 and 2004 only those respondents were screened out who reported being ineligible to vote (code 2 in V31), because by then residents of West-Berlin were regular German citizens and thus eligible to vote in national elections.

No filter question was used in the surveys since 2006. However, in 2006 respondents were offered the option to answer 'Not eligible to vote'.

Since 1986, the ALLBUS-interview has usually been accompanied by a self-completion questionnaire for the German ISSP-survey (International Social Survey Programme (ISSP)). As a rule the ISSP-questions are not included in this cumulative data set. However, the question documented here has been part of the ALLBUS-interview several times.

As an exception to the rule, the relevant ISSP-data was therefore included in this data set.

This variable has been recoded so as to conform with the standardized ALLBUS coding. The sequence of answer categories shown in this documentation therefore deviates from that actually used in the field.

V35 REASONS FOR NOT VOTING IN LAST ELECTION

<If respondent didn't vote>

Why didn't you vote?

Which of the reasons on this list applies best?

(Int.: Please display card.)

0 Respondent voted (code 1 in V33); not available 1980-1994, 1998-2006, 2010, 2012

1 A I wasn't eligible to vote

2 B I wanted to vote but couldn't make it to the polling station

3 C I thought that I didn't know enough about politics

4 D The election didn't interest me enough

5 E I intended to vote but then forgot to

6 F I don't vote out of conviction

7 G I couldn't decide who to vote for

8 H There was nobody I wanted to vote for

9 J Other reason:...

98 I can't really say

V41 CDU SYMPATHY-THERMOMETER

1980:

I would like to know what you think about these political parties today:

CDU, SPD, CSU, FDP, NPD, DKP and The Greens.

1984:

I would like to know what you think about these political parties today:

CDU, SPD, CSU, FDP, The Greens, NPD and DKP.

1994:

I would like to know what you think about these political parties today:

CDU, SPD, CSU, FDP, Alliance 90/The Greens, The Republicans and PDS.

1980-1994:

Here we have something like a thermometer. The further up you go on the white boxes, the more sympathy you feel for a particular party. The further down you go on the black boxes, the more you dislike this particular party.

Let's start with the CDU.

(Int.: Present card "Thermometer" (+5 to -5). Circle the reading chosen for each party and be careful not to confuse + and -.)

Generally speaking, what do you think of the Christian Democratic Union <CDU>?

99 No answer

Comment:

"+5" means great sympathy for this party; "-5" means great dislike for this party.

V41 to V47 were first surveyed in 1980 as part of a list of seven questions. In the following years the sequence of the questions varies slightly. Also, the list of parties was adapted to fit the changing political landscape.

Please refer to the original documentation for detailed information.

V42 SPD SYMPATHY-THERMOMETER

1980:

I would like to know what you think about these political parties today:

CDU, SPD, CSU, FDP, NPD, DKP and The Greens.

1984:

I would like to know what you think about these political parties today:

CDU, SPD, CSU, FDP, The Greens, NPD and DKP.

1994:

I would like to know what you think about these political parties today:

CDU, SPD, CSU, FDP, Alliance 90/The Greens, The Republicans and PDS.

1980-1994:

Here we have something like a thermometer. The further up you go on the white boxes, the more sympathy you feel for a particular party. The further down you go on the black boxes, the more you dislike this particular party.

Let's start with the CDU.

(Int.: Present card "Thermometer" (+5 to -5). Circle the reading chosen for each party and be careful not to confuse + and -.)

Generally speaking, what do you think of the Christian Democratic Union <CDU>?

V41 to V47 were first surveyed in 1980 as part of a list of seven questions. In the following years the sequence of the questions varies slightly. Also, the list of parties was adapted to fit the changing political landscape.

Please refer to the original documentation for detailed information.

The sympathy-thermometer of The Republicans has been combined with that of the NPD to facilitate comparative analyses. Both parties are usually considered to be on the far right of the political spectrum. However, while the two parties are here treated as proponents of a comparable political outlook, this does not imply that their political positions are identical.

V41 to V47 were first surveyed in 1980 as part of a list of seven questions. In the following years the sequence of the questions varies slightly. Also, the list of parties was adapted to fit the changing political landscape.

Please refer to the original documentation for detailed information.

In 1993, the west German party "Die Grünen" and the east German party "Bündnis 90" joined to form one national party.

V48 PROBABILITY: VOTE FOR CDU-CSU

There is a large number of political parties in Germany. Each one of them would like to have your vote at elections.
Please tell me, for each of the following parties, how likely it is that you would ever vote for this party.

Please use this scale.

- 1 on the scale means that it is very unlikely for you.
- 10 on the scale means that it is very likely for you.

You can differentiate your answers using the numbers in between.

(Int.: Please read out statements.

If respondent is not entitled to vote, please ask her/him to answer as if s/he were entitled to vote.)

What about the Christian Democratic/Christian Social Union <CDU/CSU>?

V55 PROBABILITY: VOTE FOR THE REPUBLICANS

There is a large number of political parties in Germany. Each one of them would like to have your vote at elections.
Please tell me, for each of the following parties, how likely it is that you would ever vote for this party.

Please use this scale.

- 1 on the scale means that it is very unlikely for you.
- 10 on the scale means that it is very likely for you.

You can differentiate your answers using the numbers in between.

(Int.: Please read out statements.

If respondent is not entitled to vote, please ask her/him to answer as if s/he were entitled to vote.)

V57 POLIT.ACTIVITY: CITIZENS INITIATIVE

This question deals with types of behaviour that various people have on occasion chosen in order to protest against something or to make the public aware of a particular issue.

I am now going to read out some of these types of behaviour. Please tell me for each one whether you yourself have ever taken part in such an activity.

If you have not yet taken part in such an activity, please tell me whether you would take part in one, whether you would only take part under extraordinary circumstances, or whether you would not take part under any circumstances.

(Int.: Please present card. Read out the statements.

Please mark one answer for each statement.)

Citizen's action group

V62 WOULD DO: EXPRESS OPINION

(Int.: Please shuffle card pack and give to respondent.)

If you wanted to have political influence or to make your point of view felt on an issue which was important to you:

which of the possibilities listed on these cards would you use? Which of them would you consider?

Please name the corresponding letter.

1988, 1998:

(Int.: Please circle all the letters named by the respondent on the list.)

2008:

(Int.: Please mark all the letters named.)

Express your opinion to friends and acquaintances at work.

V72 WOULD DO: INTIMIDATE POLITICAL OPPONENTS

(Int.: Please shuffle card pack and give to respondent.)

If you wanted to have political influence or to make your point of view felt on an issue which was important to you:

which of the possibilities listed on these cards would you use? Which of them would you consider?

Please name the corresponding letter.

1988, 1998:

(Int.: Please circle all the letters named by the respondent on the list.)

2002:

(Int.: Please record all the letters named by the respondent.)

2008:

(Int.: Please mark all the letters named.)

Intimidate political opponents.

Comment:

This question determines which forms of political action the respondent has already participated in. The range of items varied in the different surveys:

- In 1988, only V80 to V90 were surveyed.

- In 1998, an extended list of items was surveyed using shuffled cards to randomize the sequence of items.

- ALLBUS 2002 surveyed 8 items taken from the extended list of 1998. The sequence of items was again randomized using shuffled cards.

- ALLBUS 2008 surveyed a number of items from the extended list of 1998 as well as two additional items on new forms of political action (critical consumption and online protests). The sequence of items was randomized using shuffled cards.

Please refer to the original documentation for detailed information.

V82 ALREADY DONE: PUBLIC DISCUSSIONS

(Int.: Please shuffle all the cards again and give them to the respondent.)

Which of these things have you already done, what have you already taken part in?

1998, 2008:

Please hand me the corresponding cards.

1988:

Again, please tell me the appropriate letters.

(Int.: Please circle the letters of all selected cards on the list.)

Take part in public discussions at meetings.

Comment:

This question determines which forms of political action the respondent has already participated in. The range of items varied in the different surveys:

- In 1988, only V80 to V90 were surveyed.

- In 1998, an extended list of items was surveyed using shuffled cards to randomize the sequence of items.

- ALLBUS 2002 surveyed 8 items taken from the extended list of 1998. The sequence of items was again randomized using shuffled cards.

- ALLBUS 2008 surveyed a number of items from the extended list of 1998 as well as two additional items on new forms of political action (critical consumption and online protests). The sequence of items was randomized using shuffled cards.

Please refer to the original documentation for detailed information.

Comment:

This question determines which forms of political action the respondent has already participated in. The range of items varied in the different surveys:

- In 1988, only V80 to V90 were surveyed.

- In 1998, an extended list of items was surveyed using shuffled cards to randomize the sequence of items.

- ALLBUS 2002 surveyed 8 items taken from the extended list of 1998. The sequence of items was again randomized using shuffled cards.

- ALLBUS 2008 surveyed a number of items from the extended list of 1998 as well as two additional items on new forms of political action (critical consumption and online protests). The sequence of items was randomized using shuffled cards.

Please refer to the original documentation for detailed information.

V100 LAST 2 YEARS: PUBLIC DISCUSSIONS

<If respondent has been involved in a form of political action before>

(Int.: Please display the cards selected in V80 again.)

And which of these have you also done or taken part in in the last 2 years, i.e. at some time since the beginning of...

(2008: 2006)

(1998: 1996)?

(Int.: Please circle all the letters named in the list.)

Take part in public discussions at meetings.

0 Not selected

1 Selected

6 Respondent has never participated in political action (code 0 in V80-V97);

not available 1980-1996, 2000-2006, 2010, 2012

9 No answer

Comment:

This question determines which forms of political action the respondent has already participated in. The range of items varied in the different surveys:

- In 1988, only V80 to V90 were surveyed.

- In 1998, an extended list of items was surveyed using shuffled cards to randomize the sequence of items.

- ALLBUS 2002 surveyed 8 items taken from the extended list of 1998. The sequence of items was again randomized using shuffled cards.

- ALLBUS 2008 surveyed a number of items from the extended list of 1998 as well as two additional items on new forms of political action (critical consumption and online protests). The sequence of items was randomized using shuffled cards.

Please refer to the original documentation for detailed information.

6 Respondent has never participated in political action (code 0 in V80-V97);

not available 1980-1996, 2000-2006, 2010, 2012

9 No answer

Comment:

This question determines which forms of political action the respondent has already participated in. The range of items varied in the different surveys:

- In 1988, only V80 to V90 were surveyed.

- In 1998, an extended list of items was surveyed using shuffled cards to randomize the sequence of items.

- ALLBUS 2002 surveyed 8 items taken from the extended list of 1998. The sequence of items was again randomized using shuffled cards.

- ALLBUS 2008 surveyed a number of items from the extended list of 1998 as well as two additional items on new forms of political action (critical consumption and online protests). The sequence of items was randomized using shuffled cards.

Please refer to the original documentation for detailed information.

Note:

Views on Political Problems: "The death penalty should be introduced for terrorist acts of violence."

In 1988, V117 was surveyed in a different context than in 1980 and 1990.

Documented here, in V116-V119, is the original item battery used in 1980 and 1990.

In ALLBUS 1988 (ZA1670) the question concerning the death penalty for terrorist acts of violence came third in a battery of four questions (F22.A-F22.D). The two preceding questions asked whether a communist (ZA1670: F.22A) or a Neo-Nazi (ZA1670: F.22B) were fit to teach 15 year old school children. The fourth question asked whether the death penalty should be introduced for child murderers (ZA1670: F22.D).

The following text was used to introduce the item-battery in ALLBUS 1988 (ZA1670):

"Now we would like to hear your views on a number of political problems. Using the scale at the top of this card, please tell me to what extent you agree with the following statements."

V118 PRIVATIZE MORE PUBLIC SERVICES?

Now we would like to hear your views on some political problems. Using this scale, please tell me to what extent you agree with the following statements. Number 1 means that you completely disagree with the statement, number 7 means that you agree completely with it. You can use the numbers between 1 and 7 to qualify your response.

(Int.: Please present card)

More public services, such as, for example, garbage collection, postal services or mass transportation, should be taken over by private firms.

V120 SOCIAL CONFLICTS ARE HARMFUL

We have collected a list of frequently heard assertions reflecting different opinions about people's behaviour. Now we would like to find out what people really think about these assertions. Please, tell us your position on each assertion as follows:

- +3 = Complete agreement
- +2 = Agreement in essential parts
- +1 = Weak agreement
- 1 = Weak disagreement
- 2 = Disagreement in essential parts
- 3 = Complete disagreement

(Int.: Mix cards and present together with list. Circle one answer on each line.)

The conflicts between the various interest groups in our society and their demands on the government harm the general good.

V126 DEMOCRACY NEEDS POLITICAL OPPOSITION

We have collected a list of frequently heard assertions reflecting different opinions about people's behaviour. Now we would like to find out what people really think about these assertions. Please, tell us your position on each assertion as follows:

- +3 = Complete agreement
- +2 = Agreement in essential parts
- +1 = Weak agreement
- 1 = Weak disagreement
- 2 = Disagreement in essential parts
- 3 = Complete disagreement

(Int.: Mix cards and present together with list. Circle one answer on each line.)

A living democracy is unthinkable without a political opposition.

- 0 Not available 1980, 1984, 1986, 1990-2012
- 1 +3 Complete agreement
- 2 +2 Agreement in essential parts
- 3 +1 Weak agreement
- 4 -1 Weak disagreement
- 5 -2 Disagreement in essential parts
- 6 -3 Complete disagreement
- 9 No answer

V140 POLITICAL GOALS: MAINTAIN LAW AND ORDER

(Int.: Please present card and leave on display until the end of the question.)

In politics, too, one can't have everything at once. On this card, there are four goals which can be pursued in politics.

If you had to choose between these different goals, which one would seem to you personally to be the most important?

(Int.: Only one choice possible.)

And which goal would be the second most important to you?

(Int.: Only one choice possible.)

And which goal would be third?

(Int.: Only one choice possible.)

(Int.: Tick remaining option as "fourth.")

To maintain law and order in this country

- 1 Most important goal
- 2 Second most important goal
- 3 Third most important goal
- 4 Fourth most important goal
- 8 Don't know
- 9 No answer

Comment:

ALLBUS 1980 to ALLBUS 1986 used a different method of coding Inglehart's political priorities than the ALLBUS studies from 1988 onward and this cumulation. In 1980 to 1986, the first variable recorded the most important of the political goals in V140, V141, V142 and V143. The following three variables then contained the second, third and fourth most important goal respectively. In 1980 and 1982 the fourth most important goal was assigned without asking. For this cumulative data set, the data from 1980 to 1986 has been recoded in accordance with the survey practice as of 1988. However, because of the different way of recording the data, it is impossible to unambiguously recode codes 7 to 9 into the present format. Therefore, codes 7 to 9 have been uniformly recoded to code 9 in V140 to V143.

V142 POLITICAL GOALS: FIGHT RISING PRICES

(Int.: Please present card and leave on display until the end of the question.)

In politics, too, one can't have everything at once. On this card, there are four goals which can be pursued in politics.

If you had to choose between these different goals, which one would seem to you personally to be the most important?

(Int.: Only one choice possible.)

And which goal would be the second most important to you?

(Int.: Only one choice possible.)

And which goal would be third?

(Int.: Only one choice possible.)

(Int.: Tick remaining option as "fourth.")

To fight rising prices

- 1 Most important goal
- 2 Second most important goal
- 3 Third most important goal
- 4 Fourth most important goal
- 8 Don't know
- 9 No answer

Comment:

ALLBUS 1980 to ALLBUS 1986 used a different method of coding Inglehart's political priorities than the ALLBUS studies from 1988 onward and this cumulation. In 1980 to 1986, the first variable recorded the most important of the political goals in V140, V141, V142 and V143. The following three variables then contained the second, third and fourth most important goal respectively. In 1980 and 1982 the fourth most important goal was assigned without asking. For this cumulative data set, the data from 1980 to 1986 has been recoded in accordance with the survey practice as of 1988. However, because of the different way of recording the data, it is impossible to unambiguously recode codes 7 to 9 into the present format. Therefore, codes 7 to 9 have been uniformly recoded to code 9 in V140 to V143.

V144 INGLEHART-INDEX

Additional text not in questionnaire:

Inglehart-Index

- 1 Postmaterialist
- 2 Postmaterialist mixed-type
- 3 Materialist mixed-type
- 4 Materialist
- 8 Don't know
- 9 No answer

Derivation of data:

This variable was derived from V140, V141, V142 and V143.

Note:

Inglehart-Index

The Inglehart-Index has been constructed with reference to Robert Inglehart's work on 'materialist' and 'postmaterialist' value orientations. It is based on the respondents' statements about their political priorities as given in V140 to V143.

Respondents who rank 'maintaining law and order in this country' as well as 'fighting rising prices' as the two most important issues are classified as 'materialists'. Respondents who consider 'giving citizens more influence on government decisions' and 'protecting the right of free speech' as the two most important goals are categorized as 'postmaterialists'.

All other respondents show ambiguous priorities in terms of this index and are therefore classified as 'mixed types'.

The number of categories for these 'mixed types' can vary. In V144 two such 'mixed types' are differentiated.

Respondents who rank a 'postmaterialist' item first and a 'materialist' item second are grouped into the category 'postmaterialist mixed type', while the reverse order of preferences is assigned to the 'materialist mixed type'.

However, if a missing value occurs in one of the two political preferences relevant for index construction, the index is set to the corresponding missing value, as it is impossible to construct the index according to its own logic in this case.

For further information see:

Inglehart, Ronald 1971:

The Silent Revolution in Europe. Intergenerational Change in Post-Industrial Societies, in: American Political Science Review 65: 991 - 1017.

V147 REUNIFICATION MORE ADVANTAGES FOR WEST

Until 1992:

Here are some statements. Please tell me for each statement whether you: completely agree, tend to agree, tend not to agree or completely disagree.

(Int.: Please present card.)

From 1994:

The following statements are about the situation in the old and new federal states. Please tell me for each statement whether you: completely agree, tend to agree, tend not to agree or completely disagree.

(Int.: Please present card. Please circle one response category per item.)

Reunification has brought more advantages than disadvantages for the people in the old federal states.

V151 NEW STATES: PRESSURE TOO GREAT

Until 1992:

Here are some statements. Please tell me for each statement whether you: completely agree, tend to agree, tend not to agree or completely disagree.

(Int.: Please present card.)

From 1994:

The following statements are about the situation in the old and new federal states. Please tell me for each statement whether you: completely agree, tend to agree, tend not to agree or completely disagree.

(Int.: Please present card. Please circle one response category per item.)

Many people in the new federal states are not up to coping with the pressure to perform in a market economy.

V154 RESP: FAIR SHARE IN STANDARD OF LIVING?

Compared with how others live in Germany (until 1990: in the Federal Republic):

Do you think you get your fair share (1980 - split 1: of the good things in life), more than your fair share, somewhat less or very much less than your fair share?

0 Not available 1984-1988, 1990 (split 1), 1994, 1998, 2012

1 Very much less

2 Somewhat less

3 Fair share

4 More than fair share

7 Refused

8 Don't know

9 No answer

Comment:

This variable has been recoded so as to conform with the standardized ALLBUS coding. For some years, the sequence of answer categories shown in this documentation may therefore deviate from that actually used in the field. Please refer to the original documentation for detailed information.

V155 SELF-ASSESSMENT OF SOCIAL CLASS, RESP.

There is a lot of talk about social class these days. What class would you describe yourself as belonging to?

1980, 1982 (split 1), 1984-2010:

The lower class, the working class, the middle class or the upper class?

1982 (split 2):

The working class, the middle class, the upper middle class or the upper class?

- 1 The lower class <1982 only in split 1>
- 2 The working class
- 3 The middle class
- 4 The upper middle class
- 5 The upper class
- 6 None of these classes (Int.: Don't read aloud.)
- 7 Refused to select a category
- 8 Don't know
- 9 No answer

V156 TOP-BOTTOM-SCALE: SELF-CLASSIFIC., RESP.

In our society there are groups which tend to be towards the top and groups which tend to be towards the bottom.

Below is a scale that runs from top to bottom.

Thinking of yourself, where would you put yourself on this scale?

(Int.: Hand over pencil and questionnaire.

Ask respondent to tick one of the boxes on the scale. Please, make sure that respondent places tick inside the box.)

Comment:

Since 1986, the ALLBUS-interview has usually been accompanied by a self-completion questionnaire for the German ISSP-survey (International Social Survey Programme (ISSP)). As a rule the ISSP-questions are not included in this cumulative data set. However, the question documented here has been part of the ALLBUS-interview several times. As an exception to the rule, the relevant ISSP-data was therefore included in this data set.

Also, this variable has been recoded so as to conform with the standardized ALLBUS coding. For some years, the sequence of answer categories shown in this documentation may therefore deviate from that actually used in the field. Please refer to the original documentation for detailed information.

V160 CONFLICTS: LEFT VS. RIGHT

1980 (split 1), 1982, 1990 (split 2), 2010:

It is often said that there are conflicts of interest between different groups in the Federal Republic - for example between different political groups, between men and women, etc.

However, these conflicts are not all equally strong.

I'll list a few such groups and please tell me whether, in your opinion, these conflicts are very strong, rather strong, fairly weak, or whether you think there is no conflict at all between these groups.

1980 (Split 2):

It is often said that there are oppositions of interest between different groups in the Federal Republic - for example between different political groups, between men and women, etc.

However, these oppositions are not all equally strong.

I'll list a few such groups and please tell me whether, in your opinion, these oppositions are very strong, rather strong, fairly weak, or whether you think there is no opposition at all between these groups.

(Int.: Please present card. Read out the items and circle one answer for each item.)

1980 (split 1), 1982, 1990 (split 2), 2010:

Conflict between people on the political left and people on the political right.

1980 (split 2):

Opposition between people on the political left and people on the political right.

0 Not available 1984-1988, 1990 (split 1), 1991-2008, 2012

1 There is none

V167 CONFLICTS: POLITICIANS VS. CITIZENS

1980 (split 1), 1982, 1990 (split 2), 2010:

It is often said that there are conflicts of interest between different groups in the Federal Republic - for example between different political groups, between men and women, etc.

However, these conflicts are not all equally strong.

I'll list a few such groups and please tell me whether, in your opinion, these conflicts are very strong, rather strong, fairly weak, or whether you think there is no conflict at all between these groups.

1980 (Split 2):

It is often said that there are oppositions of interest between different groups in the Federal Republic - for example between different political groups, between men and women, etc.

However, these oppositions are not all equally strong.

I'll list a few such groups and please tell me whether, in your opinion, these oppositions are very strong, rather strong, fairly weak, or whether you think there is no opposition at all between these groups.

(Int.: Please present card. Read out the items and circle one answer for each item.)

1980 (split 1), 1982, 1990 (split 2), 2010:

Conflict between politicians and ordinary citizens.

1980 (split 2):

Opposition between politicians and ordinary citizens.

V176 CONFLICTS: WEST GERMANS VS. EAST GERMANS

It is often said that there are conflicts of interest between different groups in the Federal Republic - for example between different political groups, between men and women, etc.

However, these conflicts are not all equally strong.

I'll list a few such groups and please tell me whether, in your opinion, these conflicts are very strong, rather strong, fairly weak, or whether you think there is no conflict at all between these groups.

(Int.: Please present card. Read out the items and circle one answer for each item.)

Conflict between people from western Germany and people from eastern Germany.

V180 **EVERYONE SHOULD LOOK OUT FOR THEMSELVES**

Now to something different:

On these cards are some opinions about the state and the economy in Germany (1984: the Federal Republic). For each one I'd like you to tell me whether you completely agree, tend to agree, tend not to agree or completely disagree.

(Int.: Shuffle card pack and hand over cards individually; circle one answer category for each item.)

In our society, everybody must see for themselves that they succeed somehow. Joining others in order to fight for one's cause either politically or with a trade union does not provide much help.

V184 SOCIAL SECURITY BAD FOR WORK ETHOS

Now to something different:

On these cards are some opinions about the state and the economy in Germany (1984: the Federal Republic). For each one I'd like you to tell me whether you completely agree, tend to agree, tend not to agree or completely disagree.

(Int.: Shuffle card pack and hand over cards individually; circle one answer category for each item.)

If social security benefits, such as the continuation of payments in case of illness, unemployment benefits, and early retirement pensions are as high as they are now, then this will only lead to the situation that people do not want to work anymore.

V185 PROFITS ARE SHARED FAIRLY IN THE FRG

Now to something different:

On these cards are some opinions about the state and the economy in Germany (1984: the Federal Republic). For each one I'd like you to tell me whether you completely agree, tend to agree, tend not to agree or completely disagree.

(Int.: Shuffle card pack and hand over cards individually; circle one answer category for each item.)

By and large, economic profits are nowadays distributed fairly in Germany (1984: the Federal Republic).

V201 SUCCESS:DEPENDS ON OWN CLASS POSITION

Here is a card with various views on what social differences in Germany (1984: the Federal Republic) are really like and how things should be.

Please go through the statements one by one and tell me whether you completely agree, tend to agree, tend to disagree or completely disagree.

(Int.: Please present list; circle one answer code for each item.)

In Germany (1984: the Federal Republic), the old differences between those who own and those who work still persist. One's personal status depends on whether one belongs to the upper or the lower class.

0 Not available 1980, 1982, 1986-1992, 1996-2002, 2006-2012

1 Completely agree

2 Tend to agree

3 Tend to disagree

4 Completely disagree

8 Don't know

9 No answer

Comment:

The questions concerning state, economy and social inequality were asked in varying contexts and constellations in the original surveys. Please refer to the original documentation for detailed information.

V202 SUCCESS:DEPENDS ON FAMILY BACKGROUND

Here is a card with various views on what social differences in Germany (1984: the Federal Republic) are really like and how things should be.

Please go through the statements one by one and tell me whether you completely agree, tend to agree, tend to disagree or completely disagree.

(Int.: Please present list; circle one answer code for each item.)

In Germany (1984: the Federal Republic) there are still large differences between social classes. What one can achieve in life substantially depends on one's family background.

V209 PERSONAL PENSION PROVISION ADEQUATE?

What about your personal pension provision or provision for incapacity or illness?

Do you feel you are

- adequately provided for?
- or not adequately provided for?
- or have you not thought about that yet?

0 Not available 1980, 1982, 1986-1992, 1996, 1998, 2002, 2006-2012

1 Adequately provided for

2 Not adequately provided for

3 Have not thought about that yet

V210 FORMED AN OPINION ON SOCIAL SECURITY?

Some people say that we have more than enough social benefits in Germany today and that they should be cut back in the future. Other people think that we should keep the current system of social provision and if necessary extend it. Have you formed an opinion on this issue?

0 Not available 1980, 1982, 1986-1992, 1996, 1998, 2002, 2006, 2008, 2012

V212 RESP.: SPEND MORE OR LESS ON DEFENSE?

Some people believe we should spend much less money for defense. Suppose these people are at the one end of the scale, at point number 1. Others feel that defense spending should be greatly increased. Suppose these people are at the other end, at the point number 7. And, of course, some people have opinions somewhere in between at points 2, 3, 4, 5 or 6.

Where would you place yourself on this scale, or haven't you thought much about this.

(Int.: Please present card and leave on display until V208, fill in the appropriate answer codes.)

V218 TRUST: FEDERAL CONSTITUTIONAL COURT

I am now going to read out a number of public institutions and organisations.

Please tell me for each institution or organisation how much trust you place in it. Please use this scale. 1 means you have absolutely no trust at all, 7 means you have a great deal of trust. You can differentiate your answers using the numbers in between.

(Int.: Please present card.

Read out the items and tick one answer each.)

What about...

the Federal Constitutional Court?

V225 TRUST: TELEVISION

I am now going to read out a number of public institutions and organisations.

Please tell me for each institution or organisation how much trust you place in it. Please use this scale. 1 means you have absolutely no trust at all, 7 means you have a great deal of trust. You can differentiate your answers using the numbers in between.

(Int.: Please present card.

Read out the items and tick one answer each.)

V246 PROUD OF: SECOND MOST IMPORTANT

Since 1991:

<If respondent has German citizenship>

1988, 1991:

(Int.: If at least two answers were selected in the answer scheme for V238-V244 please go on:)

What are you most proud of?

(Int.: Only one choice possible.)

(Int.: If at least three answers were selected in the answer scheme for V238-V244, please go on:)

And what comes second and third?

(Int.: Only one choice possible for second and third place.)

1996, 2000:

(Int.: If at least two cards were selected, please hand these back again.)

What are you most proud of?

(Int.: Only one choice possible.)

(Int.: If at least three cards were selected, please go on:)

And what comes second and third?

(Int.: Only one choice possible for second and third place.)

And what comes second?

0 Not proud of any (code 2 in V238-V244); no second entry in V238-V244; since 1991: foreigner (code 3 in V6);
not available 1980-1986, 1990, 1992, 1994, 1998, 2000 CAPI (split 1), 2002-2006, 2010, 2012

1 The Basic Law

2 The Bundestag <German parliament>

3 The achievements of German athletes

4 Economic successes

5 German art and literature

6 Scientific achievements

7 Social welfare achievements

V270 NATURALIZATION: ACCEPT BASIC LAW VALUES

2006:

I will tell you a few things which may play a role in the decision whether or not to grant German citizenship.

Using the scale, please tell me how important these things should be IN YOUR OPINION.

(Int.: Please display scale.)

Whether the person accepts and affirms the liberal democratic constitutional order.

0 Not available 1980-2004, 2008-2012

1 Not at all important

2 ..

3 ..

4 ..

5 ..

6 ..

7 Very important

99 No answer

Comment:

In 1996, variables V262-V269 were surveyed in random order with the help of a shuffled card pack. In 2006, randomization was carried out by the interviewing software.

Also in 2006, one item (V270) was added to the battery. This item was exempt from randomization and was always asked as the final question of the battery.

V271 FOREIGN.,GUEST WORKERS: ADAPT MORE

From 1994:

<If respondent has German citizenship>

1980:

(Int.: Please hand over card.)

On this card, there are some statements we have all heard at some time or other when talking about guest workers.

Please tell me for each statement to what extent you agree with it. Again please use the scale below to indicate your opinion

(Int.: Record answers here.)

1984 to 1990, 1994 split 1:

(Int.: Please present card.)

This question is about the guest workers who live here in the Federal Republic (1994: in Germany):

On this card, there are some statements we have all heard at some time or other when talking about guest workers.

Please tell me for each statement to what extent you agree with it. 1 on the scale means you 'completely disagree', 7 on the scale means you 'completely agree'. You can use the numbers in between to differentiate your answer.

(Int.: Record answers here.)

1994 split 2, 1996 to 2006 (CAPI split), 2010, 2012:

(Int.: Please present card.)

This question is about the foreigners who live in Germany.

On this card, there are some statements we have all heard at one time or another. Please tell me for each statement to what extent you agree with it.

> 1 on the scale means you 'completely disagree',

> 7 on the scale means you 'completely agree'.

You can use the numbers in between to differentiate your answer.

2006 (CASI split):

(Int.: Please hand over your pen to the respondent and turn the laptop so that the respondent can fill in the answers to the next question on his/her own.)

(Int.: Should there be questions concerning the use of the laptop, feel free to explain. However, don't interfere with the respondent answering the survey questions.)

Please answer the next question on your own. Touch the screen with the pen to mark the answer you think best fits your opinion.

This question is about the foreigners who live in Germany.

On this card, there are some statements we have all heard at one time or another. Please tell me for each statement to what extent you agree with it.

> 1 on the scale means you 'completely disagree',

> 7 on the scale means you 'completely agree'.

You can use the numbers in between to differentiate your answer.

To mark your answer, please touch the screen at the dot below the number of the answer category that best fits your opinion.

Until 1990, 1994 (split 1):

Guest workers should adapt their way of life a little more closely to the German way of life.

1994 (split 2), 1996, 2000, 2002, 2006, 2010, 2012:

The foreigners living in Germany should adapt their way of life a little more closely to the German way of life.

0 From 1994: no German citizenship (code 3 in V6); not available 1982, 1986, 1990 (split 1), 1991, 1992, 1998, 2000

CAPI (split 1), 2004, 2008

1 Completely disagree

2 ..

3 ..

4 ..

5 ..

6 ..

7 Completely agree

97 Refused

98 Don't know

99 No answer

Comment:

In 2006 these variables were subject to the CAPI-CASI split, comp. V9. Here, the data from both splits was consolidated to facilitate comparative analyses.

V272 FOREIGN.,GUEST W.:LEAVE WHEN JOBS SCARCE

From 1994:

<If respondent has German citizenship>

1980:

(Int.: Please hand over card.)

On this card, there are some statements we have all heard at some time or other when talking about guest workers.

Please tell me for each statement to what extent you agree with it. Again please use the scale below to indicate your opinion

(Int.: Record answers here.)

1984 to 1990, 1994 split 1:

(Int.: Please present card.)

This question is about the guest workers who live here in the Federal Republic (1994: in Germany):

On this card, there are some statements we have all heard at some time or other when talking about guest workers.

Please tell me for each statement to what extent you agree with it. 1 on the scale means you 'completely disagree', 7 on the scale means you 'completely agree'. You can use the numbers in between to differentiate your answer.

(Int.: Record answers here.)

1994 split 2, 1996 to 2006 (CAPI split), 2010, 2012:

(Int.: Please present card.)

This question is about the foreigners who live in Germany.

On this card, there are some statements we have all heard at one time or another. Please tell me for each statement to what extent you agree with it.

> 1 on the scale means you 'completely disagree',

> 7 on the scale means you 'completely agree'.

You can use the numbers in between to differentiate your answer.

2006 (CASI split):

(Int.: Please hand over your pen to the respondent and turn the laptop so that the respondent can fill in the answers to the next question on his/her own.)

(Int.: Should there be questions concerning the use of the laptop, feel free to explain. However, don't interfere with the respondent answering the survey questions.)

Please answer the next question on your own. Touch the screen with the pen to mark the answer you think best fits your opinion.

This question is about the foreigners who live in Germany.

On this card, there are some statements we have all heard at one time or another. Please tell me for each statement to what extent you agree with it.

> 1 on the scale means you 'completely disagree',

> 7 on the scale means you 'completely agree'.

You can use the numbers in between to differentiate your answer.

To mark your answer, please touch the screen at the dot below the number of the answer category that best fits your opinion.

Until 1990, 1994 (split 1):

When jobs get scarce, the guest workers should be sent home again.

1994 (split 2), 1996, 2000, 2002, 2006, 2010, 2012:

When jobs get scarce, the foreigners living in Germany should be sent home again.

0 From 1994: no German citizenship (code 3 in V6); not available 1982, 1986, 1990 (split 1), 1991, 1992, 1998, 2000

V273 FOREIGN.,GUEST W.: NO POLIT. ACTIVITIES

From 1994:

<If respondent has German citizenship>

1980:

(Int.: Please hand over card.)

On this card, there are some statements we have all heard at some time or other when talking about guest workers.

Please tell me for each statement to what extent you agree with it. Again please use the scale below to indicate your opinion

(Int.: Record answers here.)

1984 to 1990, 1994 split 1:

(Int.: Please present card.)

This question is about the guest workers who live here in the Federal Republic (1994: in Germany):

On this card, there are some statements we have all heard at some time or other when talking about guest workers.

Please tell me for each statement to what extent you agree with it. 1 on the scale means you 'completely disagree', 7 on the scale means you 'completely agree'. You can use the numbers in between to differentiate your answer.

(Int.: Record answers here.)

1994 split 2, 1996 to 2006 (CAPI split), 2010, 2012:

(Int.: Please present card.)

This question is about the foreigners who live in Germany.

On this card, there are some statements we have all heard at one time or another. Please tell me for each statement to what extent you agree with it.

> 1 on the scale means you 'completely disagree',

> 7 on the scale means you 'completely agree'.

You can use the numbers in between to differentiate your answer.

2006 (CASI split):

(Int.: Please hand over your pen to the respondent and turn the laptop so that the respondent can fill in the answers to the next question on his/her own.)

(Int.: Should there be questions concerning the use of the laptop, feel free to explain. However, don't interfere with the respondent answering the survey questions.)

Please answer the next question on your own. Touch the screen with the pen to mark the answer you think best fits your opinion.

This question is about the foreigners who live in Germany.

On this card, there are some statements we have all heard at one time or another. Please tell me for each statement to what extent you agree with it.

> 1 on the scale means you 'completely disagree',

> 7 on the scale means you 'completely agree'.

You can use the numbers in between to differentiate your answer.

To mark your answer, please touch the screen at the dot below the number of the answer category that best fits your opinion.

Until 1990, 1994 (split 1):

Guest workers should be prohibited from taking part in any kind of political activity.

1994 (split 2), 1996, 2000, 2002, 2006, 2010, 2012:

Foreigners living in Germany should be prohibited from taking part in any kind of political activity.

0 From 1994: no German citizenship (code 3 in V6); not available 1982, 1986, 1990 (split 1), 1991, 1992, 1998, 2000

V274 FOREIGN.,GUEST W.:MARRY AMONG THEMSELVES

From 1994:

<If respondent has German citizenship>

1980:

(Int.: Please hand over card.)

On this card, there are some statements we have all heard at some time or other when talking about guest workers.

Please tell me for each statement to what extent you agree with it. Again please use the scale below to indicate your opinion

(Int.: Record answers here.)

1984 to 1990, 1994 split 1:

(Int.: Please present card.)

This question is about the guest workers who live here in the Federal Republic (1994: in Germany):

On this card, there are some statements we have all heard at some time or other when talking about guest workers.

Please tell me for each statement to what extent you agree with it. 1 on the scale means you 'completely disagree', 7 on the scale means you 'completely agree'. You can use the numbers in between to differentiate your answer.

(Int.: Record answers here.)

1994 split 2, 1996 to 2006 (CAPI split), 2010, 2012:

(Int.: Please present card.)

This question is about the foreigners who live in Germany.

On this card, there are some statements we have all heard at one time or another. Please tell me for each statement to what extent you agree with it.

> 1 on the scale means you 'completely disagree',

> 7 on the scale means you 'completely agree'.

You can use the numbers in between to differentiate your answer.

2006 (CASI split):

(Int.: Please hand over your pen to the respondent and turn the laptop so that the respondent can fill in the answers to the next question on his/her own.)

(Int.: Should there be questions concerning the use of the laptop, feel free to explain. However, don't interfere with the respondent answering the survey questions.)

Please answer the next question on your own. Touch the screen with the pen to mark the answer you think best fits your opinion.

This question is about the foreigners who live in Germany.

On this card, there are some statements we have all heard at one time or another. Please tell me for each statement to what extent you agree with it.

> 1 on the scale means you 'completely disagree',

> 7 on the scale means you 'completely agree'.

You can use the numbers in between to differentiate your answer.

To mark your answer, please touch the screen at the dot below the number of the answer category that best fits your opinion.

Until 1990, 1994 (split 1):

Guest workers should choose to marry people of their own nationality.

1994 (split 2), 1996, 2000, 2002, 2006, 2012:

Foreigners living in Germany should choose to marry people of their own nationality.

0 From 1994: no German citizenship (code 3 in V6); not available 1982, 1986, 1990 (split 1), 1991, 1992, 1998, 2000

CAP1 (split 1), 2004, 2008

V282 RELIG.INSTRUCTION FOR MUSLIMS IN SCHOOLS

(Int.: Please display card.)

It is being debated whether there should be Islamic religious instruction for Muslim children in state schools.

What is your opinion about this:

Should there be Islamic religious instruction in state schools,
 should there only be Christian religious instruction or
 should there be no religious instruction at all in state schools?

In state schools in Germany, there should be -

0 Not available 1980-1994, 1998-2004, 2008, 2010

1 A Islamic religious instruction too

2 B only Christian religious instruction

3 C no religious instruction at all

V309 JEWS:SHAME ABOUT GERMAN CRIMES AGAINST J

(Int.: Please display card.)

Every now and then, one hears different opinions about Jewish people. Some of these are listed on the card.

Using the card, would you please tell me to what extent you agree or disagree with these statements?

I'm ashamed that Germans have committed so many crimes against Jewish people.

V310 JEWS: TAKE ADVANTAGE OF GERMAN NAZI PAST

(Int.: Please display card.)

Every now and then, one hears different opinions about Jewish people. Some of these are listed on the card.

Using the card, would you please tell me to what extent you agree or disagree with these statements?

Many Jewish people try to take personal advantage today of what happened during the Nazi era and make Germans pay for it.

V332 WORKING WOMAN:WARM RELATION TO CHILD OK

People have different opinions about the role of women in the family and in bringing up children. For each of the statements on the card, please tell me whether you completely agree, tend to agree, tend to disagree, or completely disagree.

(Int.: Please present card. Record one answer code for each statement.)

A working mother can establish just as loving and secure a relationship with her children as a mother who doesn't work.

V338 WORKING WOMAN CAN BE GOOD MOTHER

(Int.: Please present card.)

People have different opinions about the role of mothers and fathers.

For each of the following statements, please tell me whether you -

completely agree,

tend to agree,

tend to disagree or

completely disagree.

(Int.: Please make sure you are using the right card.)

A mother working full-time can normally establish just as close a relationship with her small child as a mother who doesn't work.

V344 MAN WORKING FULLTIME IS BAD FATHER

(Int.: Please present card.)

People have different opinions about the role of mothers and fathers.

For each of the following statements, please tell me whether you -

completely agree,

tend to agree,

tend to disagree or

completely disagree.

(Int.: Please make sure you are using the right card.)

A father who works full-time cannot care for his children properly.

V346 WORKING MAN CAN BE GOOD FATHER TOO

(Int.: Please present card.)

People have different opinions about the role of mothers and fathers.

For each of the following statements, please tell me whether you -

completely agree,

tend to agree,

tend to disagree or

completely disagree.

(Int.: Please make sure you are using the right card.)

A father working full-time can normally establish just as close a relationship with his small child as a father who doesn't work.

V354 EDUCATIONAL GOALS: ACCEPT CRITICISM

Our next question concerns the area of education. On these cards there are some characteristics and abilities which can be furthered by education. How important to you personally are these educational goals? Think in terms of a child of about ten years. Once again, please use the scale on the side of the cards.

(Int.: Shuffle card pack and hand over. Please, fill in the answer code for each card.)

V371 DESIRABLE QUALIT.F.CHILDREN: GENDER ROLE

A Which three qualities listed on this card would you say are the most desirable for a child to have?

(Int.: Present card and leave on display until part D of this question. Mark three responses in column A for this question.)

B Which one of these three is the most desirable of all?

(Int.: Read out the three items chosen before. Let respondent pick the most important one. Mark this item in column B.)

C All of the qualities listed on this card may be desirable, but could you tell me which three you consider least important?

(Int.: Mark these three responses in column C.)

D And which one of these three is least important of all?

(Int.: Read out the items marked in column C. Let respondent pick the least important one. Mark this item in column D.)

...that a boy acts like a boy, and a girl acts like a girl

0 Not available 1980, 1982 (split 1), 1984-1991, 1994-2012

1 Least important

2 Among the 3 least important

3 Not rated by respondent

4 Among the 3 most desirable

5 The most desirable

V378 AGREE: SHLD BE GRATEFUL FOR THE LEADERS

1996, 2006:

<If respondent has German citizenship>

1996, 2002, 2006, 2012:

(Int.: Please display card.)

To what extent do you agree with the following statements?

Please answer using the scale on this card.

1 on the scale means you 'completely disagree'.

7 on the scale means you 'completely agree'.

You can differentiate your answers using the numbers in between.

We should be grateful for leaders who can tell us exactly what to do and how to do it.

0 1996, 2006: no German citizenship (code 3 in V6); not available 1980-1994, 1998, 2000, 2004, 2008, 2010

1 Completely disagree

2 ..

3 ..

4 ..

5 ..

6 ..

7 Completely agree

99 No answer

Comment:

In 1996 and 2006 this question was surveyed as the first question in a three item battery. The other items of this battery are documented in V379 (second item) and V312 (third item).

V379 AGREE: BENEFIT FOR CHILD TO BE CONFORM

1996, 2006:

<If respondent has German citizenship>

1996, 2002, 2006, 2012:

(Int.: Please display card.)

To what extent do you agree with the following statements?

Please answer using the scale on this card.

1 on the scale means you 'completely disagree'.

7 on the scale means you 'completely agree'.

You can differentiate your answers using the numbers in between.

In general it will be of benefit for a child in later life if he or she is forced to conform to his or her parents' ideas.

0 1996, 2006: no German citizenship (code 3 in V6); not available 1980-1994, 1998, 2000, 2004, 2008, 2010

1 Completely disagree

2 ..

3 ..

4 ..

5 ..

6 ..

7 Completely agree

99 No answer

Comment:

In 1996 and 2006 this question was surveyed as the second question in a three item battery. The other items of this battery are documented in V378 (first item) and V312 (third item).

V417 IMPORTANCE: OWN FAMILY AND CHILDREN

1980-1998:

The cards here list various spheres of life. We would like to know how important each of these spheres of life is for you.

(Int.: Please shuffle card pack and display.

First explain the response scale using any card.)

On the right hand side of each of these cards is a scale with 7 categories. The category at the bottom with the number 1 means this sphere of life is unimportant to you.

Category number 7 at the very top means this sphere of life is very important to you.

You can use the numbers in between to differentiate your answers.

(Int.: Please hand over all the cards together.)

Please look at all the cards first. Then for each card tell me the letter on the card and the number you have chosen.

(Int.: One response category must be circled for each card)

2012:

(Int.: Please present card.)

The card here lists various spheres of life.

We would like to know how important each of these spheres of life is for you.

Please answer using the scale on the card.

The category at the bottom with the number 1 means this sphere of life is unimportant to you.

Category number 7 at the very top means this sphere of life is very important to you.

You can use the numbers in between to differentiate your answers.

Please, have a look at all the items on the list first.

(Int.: First of all, let respondent read through the list, then read out statements and get them rated.)

Own family and children

0 Not available 1984, 1988, 1990 (split 2), 1994, 1996, 2000-2010

1 1 - unimportant

V418 IMPORTANCE: JOB AND WORK

1980-1998:

The cards here list various spheres of life. We would like to know how important each of these spheres of life is for you.

(Int.: Please shuffle card pack and display.

First explain the response scale using any card.)

On the right hand side of each of these cards is a scale with 7 categories. The category at the bottom with the number 1 means this sphere of life is unimportant to you.

Category number 7 at the very top means this sphere of life is very important to you.

You can use the numbers in between to differentiate your answers.

(Int.: Please hand over all the cards together.)

Please look at all the cards first. Then for each card tell me the letter on the card and the number you have chosen.

(Int.: One response category must be circled for each card)

2012:

(Int.: Please present card.)

The card here lists various spheres of life.

We would like to know how important each of these spheres of life is for you.

Please answer using the scale on the card.

The category at the bottom with the number 1 means this sphere of life is unimportant to you.

Category number 7 at the very top means this sphere of life is very important to you.

You can use the numbers in between to differentiate your answers.

Please, have a look at all the items on the list first.

(Int.: First of all, let respondent read through the list, then read out statements and get them rated.)

V423 IMPORTANCE: POLITICS AND PUBLIC LIFE

1980-1998:

The cards here list various spheres of life. We would like to know how important each of these spheres of life is for you.

(Int.: Please shuffle card pack and display.

First explain the response scale using any card.)

On the right hand side of each of these cards is a scale with 7 categories. The category at the bottom with the number 1 means this sphere of life is unimportant to you.

Category number 7 at the very top means this sphere of life is very important to you.

You can use the numbers in between to differentiate your answers.

(Int.: Please hand over all the cards together.)

Please look at all the cards first. Then for each card tell me the letter on the card and the number you have chosen.

(Int.: One response category must be circled for each card)

2012:

(Int.: Please present card.)

The card here lists various spheres of life.

We would like to know how important each of these spheres of life is for you.

Please answer using the scale on the card.

The category at the bottom with the number 1 means this sphere of life is unimportant to you.

Category number 7 at the very top means this sphere of life is very important to you.

You can use the numbers in between to differentiate your answers.

Please, have a look at all the items on the list first.

(Int.: First of all, let respondent read through the list, then read out statements and get them rated.)

V425 ASPECTS OF JOBS: JOB SECURITY

1980, 1982 (split 1), 1991:

On these cards there are various aspects of the world of work and careers. How important to you personally are these job characteristics?

For your answers, please use the scale from 1 to 7.

(Int.: Shuffle card pack and hand over cards individually, one by one, and let respondent choose an answer. Record one answer code for each card.)

2010 (card deck):

On these cards there are various aspects of the world of work and careers. How important to you personally are these job characteristics?

(Int.: Show any card to explain the answer scale.)

On the right hand side of each of these cards is a scale with 7 categories. The category at the bottom with the number 1 means this sphere of life is unimportant to you.

Category number 7 at the very top means this sphere of life is very important to you.

You can use the numbers in between to differentiate your answers.

(Int.: Hand over cards individually.)

2010 (CAPI, computerized randomization):

I will now present you with various aspects of the world of work and careers. How important to you personally are these job characteristics?

(Int.: Present card.)

On this card there is a scale with 7 categories. The category at the bottom with the number 1 means this sphere of life is unimportant to you. Category number 7 at the very top means this sphere of life is very important to you.

You can use the numbers in between to differentiate your answers.

(Int.: Read out items.)

Note:

Importance of Job Characteristics

The questions concerning the importance of various job characteristics were asked in varying contexts and

constellations in the original surveys, item sequence was usually randomized using shuffle cards:

- V425 to V434 were first surveyed as an item battery (F4A-F4K) in ALLBUS 1980.
- In 1982 and 1991, V425 to V437 were surveyed as an extended battery (1982: F6A-F6N, 1991: F8A-F8N).
- A subset of the extended battery (V426, V427, V430, V431, V434 and V435) was again surveyed in ALLBUS 1992 (F6A-F6F) and ALLBUS 2000 (F6A-F6F).
- In 2010, an item battery comprising V425 to V435 was replicated. A split questionnaire was used to test different methods of item randomization (shuffled cards vs. computerized randomization by the interview software). The data from the two split versions has been recoded into single variables and split information has not been documented for this cumulated data set. Users interested in the 2010 split experiment are advised to refer to the original documentation and data.

- In 1982 and 1991, V425 to V437 were surveyed as an extended battery (1982: F6A-F6N, 1991: F8A-F8N).
- A subset of the extended battery (V426, V427, V430, V431, V434 and V435) was again surveyed in ALLBUS 1992 (F6A-F6F) and ALLBUS 2000 (F6A-F6F).
- In 2010, an item battery comprising V425 to V435 was replicated. A split questionnaire was used to test different methods of item randomization (shuffled cards vs. computerized randomization by the interview software). The data from the two split versions has been recoded into single variables and split information has not been documented for this cumulated data set. Users interested in the 2010 split experiment are advised to refer to the original documentation and data.

V428 ASPECTS OF JOBS: RESPECTABLE OCCUPATION

1980, 1982 (split 1), 1991:

On these cards there are various aspects of the world of work and careers. How important to you personally are these job characteristics?

For your answers, please use the scale from 1 to 7.

(Int.: Shuffle card pack and hand over cards individually, one by one, and let respondent choose an answer. Record one answer code for each card.)

2010 (card deck):

On these cards there are various aspects of the world of work and careers. How important to you personally are these job characteristics?

(Int.: Show any card to explain the answer scale.)

On the right hand side of each of these cards is a scale with 7 categories. The category at the bottom with the number 1 means this sphere of life is unimportant to you.

Category number 7 at the very top means this sphere of life is very important to you.

You can use the numbers in between to differentiate your answers.

(Int.: Hand over cards individually.)

2010 (CAPI, computerized randomization):

I will now present you with various aspects of the world of work and careers. How important to you personally are these job characteristics?

(Int.: Present card.)

On this card there is a scale with 7 categories. The category at the bottom with the number 1 means this sphere of life is unimportant to you. Category number 7 at the very top means this sphere of life is very important to you.

You can use the numbers in between to differentiate your answers.

(Int.: Read out items.)

An occupation that is recognized and respected

V432 ASPECTS OF JOBS: RESPONSIBILITY

1980, 1982 (split 1), 1991:

On these cards there are various aspects of the world of work and careers. How important to you personally are these job characteristics?

For your answers, please use the scale from 1 to 7.

(Int.: Shuffle card pack and hand over cards individually, one by one, and let respondent choose an answer. Record one answer code for each card.)

2010 (card deck):

On these cards there are various aspects of the world of work and careers. How important to you personally are these job characteristics?

(Int.: Show any card to explain the answer scale.)

On the right hand side of each of these cards is a scale with 7 categories. The category at the bottom with the number 1 means this sphere of life is unimportant to you.

Category number 7 at the very top means this sphere of life is very important to you.

You can use the numbers in between to differentiate your answers.

(Int.: Hand over cards individually.)

2010 (CAPI, computerized randomization):

I will now present you with various aspects of the world of work and careers. How important to you personally are these job characteristics?

(Int.: Present card.)

On this card there is a scale with 7 categories. The category at the bottom with the number 1 means this sphere of life is unimportant to you. Category number 7 at the very top means this sphere of life is very important to you.

You can use the numbers in between to differentiate your answers.

(Int.: Read out items.)

Note:

Importance of Job Characteristics

The questions concerning the importance of various job characteristics were asked in varying contexts and

constellations in the original surveys, item sequence was usually randomized using shuffle cards:

- V425 to V434 were first surveyed as an item battery (F4A-F4K) in ALLBUS 1980.
- In 1982 and 1991, V425 to V437 were surveyed as an extended battery (1982: F6A-F6N, 1991: F8A-F8N).
- A subset of the extended battery (V426, V427, V430, V431, V434 and V435) was again surveyed in ALLBUS 1992 (F6A-F6F) and ALLBUS 2000 (F6A-F6F).
- In 2010, an item battery comprising V425 to V435 was replicated. A split questionnaire was used to test different methods of item randomization (shuffled cards vs. computerized randomization by the interview software). The data from the two split versions has been recoded into single variables and split information has not been documented for this cumulated data set. Users interested in the 2010 split experiment are advised to refer to the original documentation and data.

V437 ASPECTS OF JOBS: SAFE, HEALTHY CONDITIONS

1982 (split 1), 1991:

On these cards there are various aspects of the world of work and careers. How important to you personally are these job characteristics?

For your answers, please use the scale from 1 to 7.

(Int.: Shuffle card pack and hand over cards individually, one by one, and let respondent choose an answer. Record one answer code for each card.)

Safe and healthful working conditions

0 Not available 1980, 1982 (split 2), 1984-1990, 1992-2010, 2012

1 1 - unimportant

2 ..

3 ..

4 ..

5 ..

6 ..

7 7 - very important

97 Refused

98 Don't know

99 No answer

Note:

Importance of Job Characteristics

The questions concerning the importance of various job characteristics were asked in varying contexts and constellations in the original surveys, item sequence was usually randomized using shuffle cards:

- V425 to V434 were first surveyed as an item battery (F4A-F4K) in ALLBUS 1980.

- In 1982 and 1991, V425 to V437 were surveyed as an extended battery (1982: F6A-F6N, 1991: F8A-F8N).

- A subset of the extended battery (V426, V427, V430, V431, V434 and V435) was again surveyed in ALLBUS 1992 (F6A-F6F) and ALLBUS 2000 (F6A-F6F).

- In 2010, an item battery comprising V425 to V435 was replicated. A split questionnaire was used to test different methods of item randomization (shuffled cards vs. computerized randomization by the interview software). The data from the two split versions has been recoded into single variables and split information has not been documented for this cumulated data set. Users interested in the 2010 split experiment are advised to refer to the original documentation and data.

Since 1986, the ALLBUS-interview has usually been accompanied by a self-completion questionnaire for the German ISSP-survey (International Social Survey Programme (ISSP)). As a rule the ISSP-questions are not included in this cumulative data set. However, the question documented here has been part of the ALLBUS-interview in 2004. As an exception to the rule, the relevant ISSP-data was therefore included in this data set.

V476 WATCH TV: HOW MANY DAYS A WEEK

(Int.: Please display card.)

Generally speaking, how many days a week (i.e. on the seven days from Monday to Sunday) do you watch TV?

1998:

(Int.: Please circle one answer only. If the respondent gives a time span, ask which response category fits best.)

- 0 Never
- 0,5 Less often
- 1 1 day a week
- 2 2 days a week
- 3 3 days a week
- 4 4 days a week
- 5 5 days a week
- 6 6 days a week
- 7 All 7 days a week
- 9,6 Not available 1980-1996, 2000-2002, 2006, 2010, 2012
- 9,9 No answer

V477 WATCH TV: AVERAGE VIEWING TIME PER DAY

<If respondent watches TV>

Thinking about the days when you watch TV, how long on average do you watch TV on these days - I mean in hours and minutes?

1998:

(Int.: If a time span is given, please ask for the average viewing time per day. Note down in hours and minutes.)

0 Respondent never watches TV (code 0 in V476)

9996 Not available 1980-1996, 2000-2002, 2006, 2010, 2012

9999 No answer

Derivation of data:

The viewing time in minutes was calculated from the original data on hours and minutes.

Comment:

Note:

Religion and World View

The questions concerning 'Cosmologies', 'Meaning of Life' and the self-assessment of religiousness were surveyed in varying contexts and constellations and using different methods of collecting the data:

- In ALLBUS 1982 two different split versions with varying sequences were used to survey the thematic module 'Religion and World View':

Split 1:

- Cosmologies

- Meaning of Life

- Self-Assessment of Religiousness

Split 2:

- Self-Assessment of Religiousness

- Cosmologies

- Meaning of Life

This part of the survey was administered as a self-completion questionnaire.

- For ALLBUS 1992, a revised version of the thematic module 'Religion and World View' was designed. For this purpose, the original module from ALLBUS 1982 was both abridged and supplemented by new questions. In the 1992 version, the two thematic batteries 'Cosmologies' and 'Meaning of Life' now comprise six items each. Moreover, the sequence of items concerning the 'Meaning of Life' was modified. As in split 1 of ALLBUS 1982, the self-assessment of religiousness concludes the module. In contrast to ALLBUS 1982, however, the questions were administered in a face-to-face interview.

- In ALLBUS 2000 and 2010 only the self-assessment of religiousness (V502) was replicated. The question was part of the demography section of the interview.

- ALLBUS 2002 and 2012 replicated the module 'Religion and World View' from ALLBUS 1992. The item battery 'Cosmologies' comprises V490-V495, the item battery 'Meaning of Life' comprises V496-V501 and the self-assessment of religiousness is V502. ALLBUS 2012 also introduced a new item: self-assessment of spirituality (V503).

For this purpose, the original module from ALLBUS 1982 was both abridged and supplemented by new questions. In the 1992 version, the two thematic batteries 'Cosmologies' and 'Meaning of Life' now comprise six items each. Moreover, the sequence of items concerning the 'Meaning of Life' was modified. As in split 1 of ALLBUS 1982, the self-assessment of religiousness concludes the module. In contrast to ALLBUS 1982, however, the questions were administered in a face-to-face interview.

- In ALLBUS 2000 and 2010 only the self-assessment of religiousness (V502) was replicated. The question was part of the demography section of the interview.

- ALLBUS 2002 and 2012 replicated the module 'Religion and World View' from ALLBUS 1992. The item battery 'Cosmologies' comprises V490-V495, the item battery 'Meaning of Life' comprises V496-V501 and the self-assessment of religiousness is V502. ALLBUS 2012 also introduced a new item: self-assessment of spirituality (V503).

V495 HUMAN LIFE IS ONLY A PART OF NATURE

1982:

The next part of our interview deals with whether there is a higher reality one can believe in, beyond the world we live in.

(Int.: Please point to the opposite page.)

On this list there are some opinions in this regard. On the top of the page you will find the possible responses you can use to evaluate each of the opinions. As you can see, each of the responses is assigned a number.

Number 1 means: Completely agree

Number 2 means: Tend to agree

Number 3 means: Have no fixed opinion on this

Number 4 means: Tend to disagree

Number 5 means: Completely disagree

Number 6 means: Have never thought about this

For each of the opinions put down the number of the response which comes closest to your own view.

(Int.: Hand over pencil. Ask respondent to fill in the appropriate answer code on the opposite page.)

1992, 2002, 2012:

The next part of our interview deals with whether there is a higher reality one can believe in, beyond the world we live in.

(Int.: Please, present card.)

Using this scale, please tell me for each of the statements on this card to what extent you agree with it.

Human life is only a part of what happens in nature.

0 Not available 1980, 1984-1991, 1994-2000, 2004-2010

1 Completely agree

2 Tend to agree

3 Have no fixed opinion on this

4 Tend to disagree

5 Completely disagree

6 Have never thought about this

Note:

Religion and World View

The questions concerning 'Cosmologies', 'Meaning of Life' and the self-assessment of religiousness were surveyed in varying contexts and constellations and using different methods of collecting the data:

- In ALLBUS 1982 two different split versions with varying sequences were used to survey the thematic module 'Religion and World View':

Split 1:

- Cosmologies
- Meaning of Life
- Self-Assessment of Religiousness

Split 2:

- Self-Assessment of Religiousness
- Cosmologies
- Meaning of Life

This part of the survey was administered as a self-completion questionnaire.

- For ALLBUS 1992, a revised version of the thematic module 'Religion and World View' was designed. For this purpose, the original module from ALLBUS 1982 was both abridged and supplemented by new questions. In the 1992 version, the two thematic batteries 'Cosmologies' and 'Meaning of Life' now comprise six items each. Moreover, the sequence of items concerning the 'Meaning of Life' was modified. As in split 1 of ALLBUS 1982, the self-assessment of religiousness concludes the module. In contrast to ALLBUS 1982, however, the questions were administered in a face-to-face interview.

- In ALLBUS 2000 and 2010 only the self-assessment of religiousness (V502) was replicated. The question was part of the demography section of the interview.

- ALLBUS 2002 and 2012 replicated the module 'Religion and World View' from ALLBUS 1992. The item battery 'Cosmologies' comprises V490-V495, the item battery 'Meaning of Life' comprises V496-V501 and the self-assessment of religiousness is V502. ALLBUS 2012 also introduced a new item: self-assessment of spirituality (V503).

- Meaning of Life

- Self-Assessment of Religiousness

Split 2:

- Self-Assessment of Religiousness

- Cosmologies

- Meaning of Life

This part of the survey was administered as a self-completion questionnaire.

- For ALLBUS 1992, a revised version of the thematic module 'Religion and World View' was designed. For this purpose, the original module from ALLBUS 1982 was both abridged and supplemented by new questions. In the 1992 version, the two thematic batteries 'Cosmologies' and 'Meaning of Life' now comprise six items each. Moreover, the sequence of items concerning the 'Meaning of Life' was modified. As in split 1 of ALLBUS 1982, the self-assessment of religiousness concludes the module. In contrast to ALLBUS 1982, however, the questions were administered in a face-to-face interview.

- In ALLBUS 2000 and 2010 only the self-assessment of religiousness (V502) was replicated. The question was part of the demography section of the interview.

- ALLBUS 2002 and 2012 replicated the module 'Religion and World View' from ALLBUS 1992. The item battery 'Cosmologies' comprises V490-V495, the item battery 'Meaning of Life' comprises V496-V501 and the self-assessment of religiousness is V502. ALLBUS 2012 also introduced a new item: self-assessment of spirituality (V503).

V500	LIFE DOES NOT HAVE MUCH MEANING
------	---------------------------------

1982:

Many people ask themselves what meaning life really has. On this page you can find some opinions about the meaning of life.

(Int.: Point again to the opposite page.)

For each of these opinions put down again the number of the response which comes closest to your own opinion.

Number 1 means: I fully agree with it

Number 2 means: I tend to agree with it

Number 3 means: Have no fixed opinion on this

Number 4 means: I don't agree very much with it

Number 5 means: I don't agree at all with it

Number 6 means: Have never thought about this

(Int.: Hand over pencil. Ask respondent to fill in the appropriate answer code on the opposite page.)

1992, 2002, 2012:

Many people ask themselves what meaning life really has. On this card you can find some opinions about the meaning of life.

(Int.: Please, present card.)

Using this scale, please tell me for each of the statements on this card to what extent you agree with it.

In my opinion, life does not have much meaning.

0 Not available 1980, 1984-1991, 1994-2000, 2004-2010

1 I fully agree with it

2 I tend to agree with it

3 Have no fixed opinion on this

4 I don't agree very much with it

5 I don't agree at all with it

6 Have never thought about this

Note:

Religion and World View

The questions concerning 'Cosmologies', 'Meaning of Life' and the self-assessment of religiousness were surveyed in varying contexts and constellations and using different methods of collecting the data:

- In ALLBUS 1982 two different split versions with varying sequences were used to survey the thematic module 'Religion and World View':

Split 1:

- Cosmologies

- Meaning of Life

- Self-Assessment of Religiousness

Split 2:

- Self-Assessment of Religiousness
- Cosmologies
- Meaning of Life

This part of the survey was administered as a self-completion questionnaire.

- For ALLBUS 1992, a revised version of the thematic module 'Religion and World View' was designed. For this purpose, the original module from ALLBUS 1982 was both abridged and supplemented by new questions. In the 1992 version, the two thematic batteries 'Cosmologies' and 'Meaning of Life' now comprise six items each. Moreover, the sequence of items concerning the 'Meaning of Life' was modified. As in split 1 of ALLBUS 1982, the self-assessment of religiousness concludes the module. In contrast to ALLBUS 1982, however, the questions were administered in a face-to-face interview.

- In ALLBUS 2000 and 2010 only the self-assessment of religiousness (V502) was replicated. The question was part of the demography section of the interview.

- ALLBUS 2002 and 2012 replicated the module 'Religion and World View' from ALLBUS 1992. The item battery 'Cosmologies' comprises V490-V495, the item battery 'Meaning of Life' comprises V496-V501 and the self-assessment of religiousness is V502. ALLBUS 2012 also introduced a new item: self-assessment of spirituality (V503).

V502 SCALE OF RELIGIOUSNESS, RESPONDENT

Would you describe yourself as more religious or more not religious?

We have a scale for this.

Where would you place yourself on this scale?

1982, 1992, 2000 PAPI:

Please tick one of the boxes.

(Int.: Please hand over a pencil and the questionnaire. Respondent should tick the appropriate box himself/herself on the next page. Please make sure that the tick is placed inside the boxes.)

2000 CAPI, 2002, 2010, 2012:

(Int.: Please present card.)

Please choose one of the boxes and tell me the letter under this box.

(Int.: Ask for the appropriate letter and record it.)

Note:

Religion and World View

The questions concerning 'Cosmologies', 'Meaning of Life' and the self-assessment of religiousness were surveyed in varying contexts and constellations and using different methods of collecting the data:

- In ALLBUS 1982 two different split versions with varying sequences were used to survey the thematic module 'Religion and World View':

Split 1:

- Cosmologies
- Meaning of Life
- Self-Assessment of Religiousness

Split 2:

- Self-Assessment of Religiousness
- Cosmologies
- Meaning of Life

This part of the survey was administered as a self-completion questionnaire.

- For ALLBUS 1992, a revised version of the thematic module 'Religion and World View' was designed. For this purpose, the original module from ALLBUS 1982 was both abridged and supplemented by new questions. In the 1992

version, the two thematic batteries 'Cosmologies' and 'Meaning of Life' now comprise six items each. Moreover, the sequence of items concerning the 'Meaning of Life' was modified. As in split 1 of ALLBUS 1982, the self-assessment of religiousness concludes the module. In contrast to ALLBUS 1982, however, the questions were administered in a face-to-face interview.

- In ALLBUS 2000 and 2010 only the self-assessment of religiousness (V502) was replicated. The question was part of the demography section of the interview.

- ALLBUS 2002 and 2012 replicated the module 'Religion and World View' from ALLBUS 1992. The item battery 'Cosmologies' comprises V490-V495, the item battery 'Meaning of Life' comprises V496-V501 and the self-assessment of religiousness is V502. ALLBUS 2012 also introduced a new item: self-assessment of spirituality (V503).

V505 DOES NOT MATTER IF GOD EXISTS

(Int.: Please present card.)

Religious convictions have different meanings for people.

What about you? I am going to read you some statements.

Please indicate to what extent these apply to you or not.

(Int.: Please read statements aloud.)

I don't care if there is a god.

V508 STICK TO WHAT IS RATIONAL

(Int.: Please present card.)

Religious convictions have different meanings for people.

What about you? I am going to read you some statements.

Please indicate to what extent these apply to you or not.

(Int.: Please read statements aloud.)

In my opinion, one should stick to things one can understand rationally and leave everything else as it is.

V553 WOULD YOU HAVE A CHURCH WEDDING TODAY?

1982:

Suppose you were to marry today:

Would you get married in church or not?

1992:

<If respondent does not live with spouse and has a steady partner who is not employed full- or part-time>

Suppose you were to marry today:

Would you get married in church or not?

2002

<If respondent has a steady partner>

Suppose you were to marry today:

Would you get married in church or not?

0 1992: respondent is married and lives with spouse (code 1 in V845), has no steady partner (code 2 in V1021), steady partner is not employed full- or part-time (code 1, 2, 7 in V1061); 2002: respondent is married and lives with spouse (code 1 in V845), has no steady partner (code 2 in V1021); not available 1980, 1984-1991, 1994-2000, 2004-2012

1 Yes, would marry in church

2 No, would not get married in church

8 Don't know

9 No answer

Comment:

Over the years there have been considerable differences in the filtering rules for this question. Therefore a comparison of the data from 1982, 1992 and 2002 should be carefully considered.

V569 BELIEF IN: THE DEVIL

I am now going to read you various things. Please tell me for each one whether you believe in it or not.

(Int.: Please read statements aloud.)

Do you believe...

...in the devil?

0 Not available 1980-2010

1 Yes

2 No

V582 GOVERNMENT AGENCIES WORK TOO SLOWLY

Here is a set of statements about the behavior of civil servants working at government agencies. Think about your personal experiences in dealing with government agencies and tell me the extent to which you agree with each of these views. Use the scale at the bottom of the card to indicate your opinion: The bottom box 1 means that you completely disagree with this statement; the highest box 7 means that you agree completely. Use the numbers in between to qualify your response.

(Int.: Please present card - record answer code.)

The processing of applications and other matters in government agencies usually takes longer than actually necessary.

V606 LIFE IS GETTING WORSE FOR COMMON PEOPLE

Additional text not in questionnaire:

Anomia:

I'm going to read you some statements now. Please tell me after each one whether you have the same or a different opinion.

(Int.: Please present card and read the statements aloud.)

No matter what some people say, life for ordinary people is getting worse rather than better.

V607 WITH SUCH A FUTURE, NO MORE CHILDREN

Additional text not in questionnaire:

Anomia:

I'm going to read you some statements now. Please tell me after each one whether you have the same or a different opinion.

(Int.: Please present card and read the statements aloud.)

With the future looking as it does, it's almost irresponsible to bring children into the world.

V608 POLITICIANS NO INTEREST IN COMMON PEOPLE

Additional text not in questionnaire:

Anomia:

I'm going to read you some statements now. Please tell me after each one whether you have the same or a different opinion.

(Int.: Please present card and read the statements aloud.)

Most politicians are not really interested at all in the problems of ordinary people.

V613 DEVIANT BEHAVIOR: BAR FIGHT

I am now going to hand you some cards which contain statements about various types of behavior.

Using this card, please tell me whether you personally consider the behavior described on each of these cards to be

- very bad
- fairly bad
- not so bad
- definitely not bad.

(Int.: Present card. Shuffle card pack and hand over cards individually.)

A man knocks another man down in a pub because this man has contradicted him.

V627 PROHIBIT BY LAW: HIT DISOBEDIENT CHILD

1990:

And what is your opinion concerning the following types of behaviour?

(Int.: Please present card. Shuffle card pack and hand over cards individually.)

2000:

The next question again deals with some of the types of behaviour described in the previous question. If it was up to you, should these types of behaviour be prohibited by law or should they not be prohibited by law?

(Int.: Please present card. Shuffle card pack and hand over cards individually.)

A man hits his ten-year-old child because she/he was disobedient.

0 Not available 1980-1988, 1990 (split 2), 1991-1998, 2000 CAPI (split 2), 2002-2012

1 Should be prohibited by law

V651 **RESPONDENT: AGE**

Additional text not in questionnaire:

Age of respondent

997 Refused

999 No answer

Derivation of data:

Age was calculated from the date of birth and the date of the interview.

Comment:

Data min./data max.:

18 18 years

...

102 102 years

V652 RESPONDENT: AGE, CATEGORIZED

Additional text not in questionnaire:

Age of respondent, categorized

- 1 18 - 29 Years
- 2 30 - 44 Years
- 3 45 - 59 Years
- 4 60 - 74 Years
- 5 75 - 89 Years
- 6 90 Years and older
- 7 Refused
- 9 No answer

Derivation of data:

This variable was derived from V651.

ZA4580, V652: to V2: (N=57727) (weighted according to V1740)

V654 RESPONDENT: RELIGIOUS DENOMINATION

1980-1984:

What religion do you belong to?

1986-2002:

(Int.: Please present card.)

What religion do you belong to?

From 2004:

(Int.: Please present card.)

May I ask you what religion you belong to?

- 1 The German Protestant church (excluding free churches)
- 2 A Protestant free church
- 3 The Roman Catholic church
- 4 Another Christian denomination
- 5 Another non-Christian denomination
- 6 No religious affiliation
- 7 Refused
- 9 No answer

Comment:

For certain years this variable has been recoded so as to conform with the standardized ALLBUS coding. The sequence of answer categories shown in this documentation may therefore deviate from that actually used in the field.

6 2-3 times a month

7 Nearly every week

8 Every week

9 Several times a week

10 Once a day

11 Several times a day

99 No answer

Comment:

Since 1986, the ALLBUS-interview has usually been accompanied by a self-completion questionnaire for the German ISSP-survey (International Social Survey Programme (ISSP)). As a rule the ISSP-questions are not included in this cumulative data set. However, the question documented here has been part of the ALLBUS-interview in 1994. As an exception to the rule, the relevant ISSP-data was therefore included in this data set.

V667 WHAT KIND OF SCHOOL, UNIV. DO YOU ATTEND?

<If respondent currently attends a school or university>

What kind of school is it?

(Int.: Please present card.)

0 Respondent does not currently attend a school or university (code 2 in V666); not available 1986-2012

1 University <Universität, Hochschule>

2 University of Applied Sciences <Fachhochschule, Ingenieurschule>

3 Vocational or technical college <Berufsfachschule, Fachschule, Technikerschule>

4 Secondary school qualifying for university level <Gymnasium (auch Abendgymnasium)>

5 Secondary school qualifying for vocational level <Real-, Mittelschule (auch Abendrealschule)>

6 Comprehensive secondary school, qualifying for vocational or university level <Integrierte Gesamtschule>

7 Vocational school (as part of apprenticeship) <Berufsschule>

8 Other school (Please specify.)

V668 RESP: GENERAL SCHOOL LEAVING CERTIFICATE

Until 1984:

What general school leaving certificate do you have?

(Int.: Please read out answers. Request highest school leaving certificate only.)

From 1986:

(Int.: Please present card. Only one choice possible. Request highest school leaving certificate only.)

What general school leaving certificate do you have?

1 Until 1984: None of these

From 1986: Finished school without school leaving certificate

1991 East: Finished school without school leaving certificate, did not finish 8th grade

2 Lowest formal qualification of Germany's tripartite secondary school system, after 8 or 9 years of schooling

<Until 1991: Volks-/ Hauptschulabschluß

1991 East: Volksschulabschluß, Polytechnische Oberschule mit Abschluß 8. Klasse

from 1992: Volks-/ Hauptschulabschluß bzw. Polytechnische Oberschule mit Abschluß 8. oder 9. Klasse>

3 Intermediary secondary qualification, after 10 years of schooling

<1991 East: Polytechnische Oberschule mit Abschluß 10. Klasse

from 1992: Mittlere Reife, Realschulabschluß bzw. Polytechnische Oberschule mit Abschluß 10. Klasse

until 1991: Mittlere Reife, Realschulabschluß (Fachschulreife)>

4 Certificate qualifying for studies at a University of Applied Sciences

<Fachhochschulreife (Abschluß einer Fachoberschule, etc.)

1991 East: Fachabitur>

5 Certificate qualifying for studies at university level

<Until 1991: Abitur (Hochschulreife)

1991 East: Abitur, Erweiterte Oberschule mit Abschluß 12. Klasse (Hochschulreife)

from 1992: Abitur bzw. Erweiterte Oberschule mit Abschluß 12. Klasse (Hochschulreife)>

6 Other school leaving certificate

<From 1986: Anderen Schulabschluß

1991 West: Anderen Schulabschluß (auch in der ehemaligen DDR oder im Ausland erworbener Abschluß)

1991 East: Anderen Schulabschluß (auch in den alten Bundesländern oder im Ausland erworbener Abschluß)>

7 From 1986: Still at school

99 No answer

Comment:

For certain years this variable has been recoded so as to conform with the standardized ALLBUS coding. The sequence of answer categories shown in this documentation may therefore deviate from that actually used in the field.

V671 OCCUPATIONAL TRAINING

What occupational training did you complete?

(Int.: Int.: Please present card. Ask for last qualification only.)

- 0 Not available 1991-2012
- 1 No completed vocational training (including vocational school without apprenticeship)
<Keinen beruflichen Ausbildungsabschluß (auch Berufsschule ohne Lehre)>
- 2 Completed trades/crafts or agricultural apprenticeship
<Berufsschulabschluß mit gewerblicher oder landwirtschaftlicher Lehre>
- 3 Completed commercial or other apprenticeship
<Berufsschulabschluß mit kaufmännischer oder sonstiger Lehre>
- 4 Specialized vocational college certificate <Berufsfachschulabschluß>
- 5 Work placement, internship
<Berufliches Praktikum (From 1986: Berufliches Praktikum, Volontariat)>
- 6 Master (craftsman), technician or equivalent college certificate
<Meister-/ Techniker- oder gleichwertiger Fachschulabschluß>
- 7 University of Applied Science degree (or engineering college degree)
<Fachhochschulabschluß (auch Ingenieurschulabschluß)>
- 8 University degree
- 9 From 1986: Completed other occupational training
- 97 Refused
- 99 No answer

Note:

Occupational Training of Respondent

In ALLBUS 1980-84 respondents were asked to indicate their occupational training by choosing their last occupational qualification from a list of categories. Only one answer was permitted. As of 1986, occupational training has been surveyed in a multiple response question (cf. V673-V686).

In 1991, occupational training was surveyed using two different lists of items, one for East Germany and one for West Germany. With ALLBUS 1992 these two lists were combined into a common list for both East and West Germany. However, due to the largely incomparable systems of education in East and West, the practice of reconstructing V671 has been discontinued.

The data for 1986-1990 has been reconstructed from V673-V686, V678-V680 and V682-V686. There are, however, a number of factors to consider when working with the reconstructed data:

- There is no clear information as to which qualification is actually the last one. Therefore, the default assumption has been that the highest qualification is also the last qualification.
- There is a possibility that the extended list of categories used from 1986 onwards has influenced the respondents' answers.
- As of 1986 the list contains the additional code 9 'Completed other occupational training'.

- Until 1984, code 1 explicitly includes respondents who attended a vocational school without being in a traineeship scheme.

- In 1986 code 1 'No completed vocational training' also contains respondents who had not yet finished their training at the time of the interview. As of 1988 the filtering rules were changed, so that respondents who were then in occupational training but had previously earned a different qualification could be assigned their original qualification.

- In 1980-1984 code 3 was 'Completed commercial or other traineeship'. As of 1986 this category has been restricted to 'Completed commercial traineeship' (cf. V679).

These differences in the actual survey practice can lead to a bias in the data. One example is code 1 'Completed commercial or other traineeship'. As of 1986, the (reconstructed) value is lower than in the previous surveys.

V673 RESPONDENT STILL IN VOCATIONAL TRAINING

What vocational or professional training do you have?

Which of the categories on the card apply to you?

Please name the appropriate letter(s).

(Int.: Please present card. Multiple responses possible.)

Respondent is still in training

0 Not selected

1 Selected

6 Respondent is still at school (code 7 in V668); not available 1980-1986, 1990-2012

Note:

Occupational Training of Respondent

The questions concerning the respondent's occupational training were asked in varying contexts and constellations in the original surveys:

- Variables V673 and V674 were surveyed in 1988 only.

- V675 was surveyed as of 1988. The data for 1986 were reconstructed from V672.

- Variables V677 and V681 were added in 1991. In 1991, V677 and V681 were surveyed exclusively in the new federal states while V682 and V684 were only surveyed in the old federal states.

9 No answer

Note:

Occupational Training of Respondent

The questions concerning the respondent's occupational training were asked in varying contexts and constellations in the original surveys:

- Variables V673 and V674 were surveyed in 1988 only.

- V675 was surveyed as of 1988. The data for 1986 were reconstructed from V672.

- Variables V677 and V681 were added in 1991. In 1991, V677 and V681 were surveyed exclusively in the new federal states while V682 and V684 were only surveyed in the old federal states.

V689 RESP.: STATUS OF NON-EMPLOYMENT

<If respondent is not employed full- or part-time>

Please look through this list and tell me what applies to you. Please tell me the appropriate code.

(Int.: Please present card. Only one choice possible.)

- 0 Respondent is employed full- or part-time (code 1, 2, 12 in V688), not available 1980-1988
- 1 A I am a pupil/student
- 2 B I am retired
- 3 C I am currently unemployed
- 4 D I am a housewife/househusband
- 5 E I am doing military/alternative community service; 2012: I am doing voluntary military / community service
- 6 F I am not (full to "half" time) employed for other reasons
- 7 Refused
- 9 No answer

V690 RESPONDENT: CURRENT OCCUPATION

<If respondent is employed full- or part-time>

What is your current occupational position?

Please have a look at these cards, choose the appropriate card and tell me the answer code on the card.

(Int.: Hand over card pack. Only one choice possible. Leave chosen card on table and put other cards to the side.)

- 0 Not employed full- or part-time (until 1986: code 3-5, 7-11 in V688; from 1988: code 3-6 in V688)
- 1 Independent farmer
- 2 Independent professional
- 3 Self-employed in trade or craft, industry, service sector, etc.
- 4 Civil servants/judges/professional soldiers
- 5 Employees
- 6 Workers
- 7 In vocational training
- 8 Family member assisting in family business
- 9 From 1991: Farmer on a cooperative farm <1991: only for respondents from the new federal states>
- 91 Until 1986: Military/alternative community service
- 97 Refused
- 99 No answer

Comment:

In 1980-1986 and as of 1994, occupational position has only been surveyed using the more differentiated reference numbers in the following variable. For the relevant years, the classification in this variable was derived from the more detailed data in V691.

ZA4580, V690: to V2: (N=57718) (weighted according to V1740)

V691	R.: CURRENT OCCUPATION, REFERENCE NUMBER
------	--

<If respondent is employed full- or part-time>

Until 1986, from 1994:

Please classify your occupational position according to this card.

(Int.: Please present card. Record answer code and also tick it off.)

1988-1992:

And which of these descriptions fits your position?

Please tell me the appropriate answer code from this card.

(Int.: Please present the card chosen in V690 again. Only one choice possible.)

Independent farmers with farmland of:

- 10 Less than 10 hectares
- 11 10 ha - less than 20 ha
- 12 20 ha - to less than 50 ha (1980: 20 ha and over)
- 13 From 1982: 50 ha and over

Independent professionals (e.g. doctor in private practice, lawyer)

- 14 from 2010: no employees
- 15 from 2010: 1 employee; until 2008: 1 employee or none
- 16 2-9 employees
- 17 10 or more employees

Self-employed in trade or craft, industry, service sector etc.

- 20 from 2010: no employees
- 21 from 2010: 1 employee; until 2008: 1 employee or none
- 22 2-9 employees
- 23 10-49 employees (1980: 10 or more employees)
- 24 From 1982: 50 or more employees

Family member assisting in family business

- 30 Family member assisting in family business

Civil servants/judges/professional soldiers

- 40 Civil servants carrying out simple administrative duties
- 41 Civil servants carrying out middle level administrative duties
- 42 Civil servants carrying out senior administrative duties
- 43 Civil servants carrying out executive duties, judges

Military/alternative community service

- 49 Until 1986: Military/alternative community service

Employees

- 50 Plant foreman with employee status
- 51 Employee with simple duties (e.g. salesperson, clerk, typist)
- 52 Employee under loose supervision carrying out complex tasks independently (e.g. senior clerical staff, book-keeper, draughtsman)
- 53 Employee carrying out responsible tasks independently or with limited responsibility for others (e.g. researcher, manager, head of department)
- 54 Employee with wide managerial responsibilities and decision making powers (e.g. head of organisation/association, managing director, executive of large firm or organisation)

Workers

- 60 Unskilled worker
- 61 Semi-skilled worker
- 62 Skilled worker
- 63 Foreman
- 64 Master (crafts- and tradesman), site foreman

Farmer on a cooperative farm

- 65 From 1991: Farmer on a cooperative farm <"Genossenschaftsbauer," 1991 only for respondents from the new federal states>

In vocational training

- 70 Trainee in commercial/administrative sector
- 71 Trainee in trades/crafts sector
- 72 Trainee in domestic/agricultural sector
- 73 Civil servant trainee
- 74 Trainee on short-term work placement/internship

- 0 Not employed full- or part-time (until 1986: code 3-5, 7-11 in V688; since 1988: code 3-6 in V688)

- 97 Refused

- 99 No answer

V692 RESP.: CURRENT OCCUPATION, ISCO 1968

Additional text not in questionnaire:

Classification of occupation according to ISCO 1968

<If respondent is employed full- or part-time>

What work do you do in your main job?

Please describe your work precisely.

(Int.: Please ask for a detailed answer:)

Does this job, this work have a special name?

0 Respondent not employed full- or part-time (code 3-11 in V688); not available 2012

1004 Workers with unclassifiable or inadequately described occupation

1007 Refused

1008 Don't know

1009 No answer

Note:

International Standard Classification of Occupations (ISCO 1968)

0195 Philologists, translators and interpreters
0199 Other scientists, technical and related professions,
n.e.c.

Administrative and managerial workers

0201 Heads of government jurisdiction, legislative officials
0202 Members of legislative bodies, government officials
0211 General managers and businessmen, manager in enterprise
0212 Production managers (except farm)
0219 Managers in private enterprises, industry,
business, n.e.c.

Clerical and related workers

0300 Clerical supervisors
0310 Government executive officials
0321 Stenographers, typists and teletypists
0322 Card- and tapepunching machine operators
0331 Bookkeepers and cashiers
0339 Bookkeepers, cashiers and related workers, n.e.c.
0341 Bookkeeping and calculating machine operators
0342 Automatic data-processing machine operators
0351 Railway station masters
0352 Postmasters
0359 Transport and communications supervisors, n.e.c.

0360 Transport conductors
0370 Mail distribution clerks
0380 Telephone and telegraph operators
0390 Clerical and related workers
0391 Stock clerks
0392 Material and production planning clerks
0393 Correspondence and reporting clerks
0394 Receptionists and travel agency clerks
0395 Library and filing clerks
0399 Clerks n.e.c.

Sales workers

0400 Managers (wholesale and retail trade)
0410 Working proprietors (wholesale and retail trade)
0421 Sales supervisors
0422 Buyers
0431 Technical salesmen and service advisers
0432 Commercial travellers and manufacturers' agents

0441 Insurance, real estate and securities salesmen
0442 Business services salesmen
0443 Auctioneers
0451 Salesmen, shop assistants and demonstrators
0452 Street vendors, canvassers and newsvendors
0490 Sales workers, n.e.c.

Service workers

0500 Managers (catering and lodging services)
0510 Working proprietors (catering and lodging services)
0520 Housekeeping and related service workers
0531 Cooks
0532 Waiters, bartenders and related workers
0540 Maids and related housekeeping service workers, n.e.c.
0551 Building caretakers (general)
0552 Charworkers, cleaners and related workers
0560 Launderers, dry cleaners and pressers
0570 Hairdressers, barbers, beauticians and related workers
0581 Fire fighters
0582 Policemen and detectives
0589 Protective service workers, n.e.c.
0591 Guides
0592 Undertakers and embalmers
0599 Other service workers. n.e.c.

Agricultural, animal husbandry and forestry workers,

fishermen and hunters

- 0600 Farm managers and supervisors
- 0610 Farm manager or director
- 0611 General farmers
- 0612 Specialised farmers
- 0621 General farm workers (including cooperative farmers)
- 0622 Field crop and vegetable farm workers
- 0623 Orchard, vineyard and related tree and shrub crop
workers
- 0624 Livestock workers
- 0625 Dairy farm workers
- 0626 Poultry farm workers
- 0627 Nursery workers and gardeners
- 0628 Farm machinery operators
- 0629 Agricultural and animal husbandry workers, n.e.c.
- 0631 Loggers
- 0632 Forestry workers (except logging)
- 0641 Fishermen
- 0649 Fishermen, hunters and related workers, n.e.c.

Production and related workers, transport equipment operators
and labourers

- 0700 Production supervisors and general foremen
- 0711 Miners and quarrymen
- 0712 Mineral and stone treaters
- 0713 Well drillers, borers and related workers
- 0721 Metal smelting, converting and refining furnacemen
- 0722 Metal rolling-mill workers
- 0723 Metal melters and reheaters
- 0724 Metal casters
- 0725 Metal moulders and coremakers
- 0726 Metal annealers, temperers and case-hardeners
- 0727 Metal drawers and extruders
- 0728 Metal platers and coaters
- 0729 Metal processors, n.e.c.
- 0731 Wood treaters
- 0732 Sawyers, plywood makers and related wood-processing
workers
- 0733 Paper pulp preparers
- 0734 Paper makers
- 0741 Crushers, grinders and mixers
- 0742 Cookers, roasters and related heat-treaters
- 0743 Filter and separator operators
- 0744 Still and reactor operators
- 0745 Petroleum-refining workers

- 0749 Chemical processors and related workers, n.e.c.
- 0751 Fibre preparers
- 0752 Spinners and winders
- 0753 Weaving- and knitting-machine setters and
pattern-card preparers
- 0754 Weavers and related workers
- 0755 Knitters
- 0756 Bleachers, dyers and textile product finishers
- 0759 Spinners, weavers, knitters, dyers and related
workers, n.e.c.
- 0761 Tanners and fellmongers
- 0762 Pelt dressers
- 0771 Grain millers and related workers
- 0772 Sugar processors and refiners
- 0773 Butchers and meat preparers
- 0774 Food preservers
- 0775 Dairy product processors
- 0776 Bakers, pastrycooks and confectionery makers
- 0777 Tea, coffee and cocoa preparers
- 0778 Brewers, wine and beverage makers
- 0779 Food and beverage processors, n.e.c.
- 0781 Tobacco preparers
- 0782 Cigar makers
- 0783 Cigarette makers
- 0789 Tobacco preparers and tobacco product makers, n.e.c.
- 0791 Tailors and dressmakers
- 0792 Fur tailors and related workers
- 0793 Milliners and hatmakers
- 0794 Patternmakers and cutters
- 0795 Sewers and embroiderers
- 0796 Upholsterers and related workers
- 0799 Tailors, dressmakers, sewers, upholsterers and
related workers, n.e.c.

- 0801 Shoemakers and shoe repairers
- 0802 Shoe cutters, lasters, sewers and related workers
- 0803 Leather goods makers
- 0811 Cabinetmakers
- 0812 Woodworking-machine operators
- 0819 Cabinetmakers and related woodworkers, n.e.c.
- 0820 Stone cutters and carvers
- 0831 Blacksmiths, hammersmiths and forging-press operators
- 0832 Toolmakers, metal patternmakers and metal markers
- 0833 Machine-tool setter-operators
- 0834 Machine-tool operators
- 0835 Metal grinders, polishers and tool sharpeners
- 0839 Blacksmiths, toolmakers and machine-tool

operators, n.e.c.

0841 Machinery fitters and machine assemblers

0842 Watch, clock and precision instrument makers

0843 Motor vehicle mechanics

0844 Aircraft engine mechanics

0849 Machinery fitters, machine assemblers and precision
instrument makers (except electrical), n.e.c.

0851 Electrical fitters

0852 Electronics fitters

0853 Electrical and electronic equipment assemblers

0854 Radio and television repairmen

0855 Electrical wiremen

0856 Telephone and telegraph installers

0857 Electric linemen and cable jointers

0859 Electrical fitters and related electrical and
electronics workers, n.e.c.

0861 Broadcasting station operators

0862 Sound equipment operators and cinema projectionists

0871 Plumbers and pipe fitters

0872 Welders and flame cutters

0873 Sheet metal workers

0874 Structural metal preparers and erectors

0880 Jewellery and precious metal workers

0891 Glass formers, cutters, grinders and finishers

0892 Potters and related clay and abrasive formers

0893 Glass and ceramics kilnmen

0894 Glass engravers and etchers

0895 Glass and ceramics painters and decorators

0899 Glass formers, potters and related workers, n.e.c.

0901 Rubber and plastics product makers (except tire
makers and tire vulcanisers)

0902 Tire makers and vulcanisers

0910 Paper and paperboard products makers

0921 Compositors and typesetters

0922 Printing pressmen

0923 Stereotypers and electrotypers

0924 Printing engravers (except photo-engravers)

Note:

Occupational Minor Groups

Categories 01 to 99 correspond to the minor groups of ISCO 1968 while categories 101 to 109 were created by ZUMA:

- 001 Chemists, physicists and related professions
- 002 Architects, engineers and related technicians
- 003 Architects, engineers and related technicians
- 004 Aircraft and ships' officers
- 005 Life scientists and related life science technicians
- 006 Medical, dental, veterinary and related professions
- 007 Medical, dental, veterinary and related professions
- 008 Statisticians, mathematicians, system analysts and related technicians
- 009 Economists
- 011 Accountants
- 012 Jurists
- 013 Teachers
- 014 Workers in religion
- 015 Authors, journalists, and related writers
- 016 Sculptors, painters, photographers and related creative artists
- 017 Musicians, composers, dancers and performing artists
- 018 Athletes, sportsmen and related workers
- 019 Professionals, scientists, technical and related workers not elsewhere classified
- 020 Legislative officials and government administrators
- 021 Managers
- 030 Clerical supervisors
- 031 Government executive officials
- 032 Stenographers, typists, and card- and tape-punching machine operators
- 033 Bookkeepers, cashiers and related workers

- 034 Computing machine operators
- 035 Transport and communication supervisors
- 036 Transport conductors
- 037 Mail distribution clerks
- 038 Telephone and telegraph operators
- 039 Clerical and related workers not elsewhere classified
- 040 Managers (wholesale and retail trade)
- 041 Working proprietors (wholesale and retail trade)
- 042 Sales supervisors and buyers
- 043 Technical salesman, commercial travellers and
manufacturers' agents
- 044 Insurance, real estate, securities and business
services salesman, and auctioneers
- 045 Salesmen, shop assistants and related workers
- 049 Sales workers not elsewhere classified
- 050 Managers (catering and lodging services)
- 051 Working proprietors (catering and lodging services)
- 052 Housekeeping and related service supervisors
- 053 Cooks, waiters, bartenders and related workers
- 054 Maids and related housekeeping service workers
not elsewhere classified
- 055 Building caretakers, charworkers, cleaners and
related workers
- 056 Launderers, dry-cleaners and pressers
- 057 Hairdressers, barbers, beauticians and related
workers
- 058 Protective service workers not elsewhere classified
- 059 Service workers not elsewhere classified
- 060 Farm managers and supervisors
- 061 Farmers (including specialized farmers)
- 062 Agricultural and animal husbandry workers
- 063 Forestry workers
- 064 Fishermen, hunters and related workers
- 070 Production supervisors and general foremen
- 071 Miners, quarrymen, well drillers and related workers
- 072 Metal processors
- 073 Wood preparation workers and paper makers
- 074 Chemical processors and related workers
- 075 Spinners, weavers, knitters, dyers and related
workers
- 076 Tanners, fellmongers and pelt dressers
- 077 Food and beverage processors
- 078 Tobacco preparers and tobacco product managers
- 079 Tailors, dressmakers, sewers, upholsterers and
related workers
- 080 Shoemakers and leather goods makers
- 081 Cabinetmakers and related woodworkers

- 082 Stone cutters and carvers
- 083 Blacksmiths, toolmakers and machine-tool operators
- 084 Machinery fitters, machine assemblers and precision
instrument makers (except electrical)
- 085 Electrical fitters and related electrical and
electronics workers
- 086 Broadcasting station and sound equipment operators
and cinema projectionists
- 087 Plumbers, welders, sheet metal and structural metal
preparers and erectors
- 088 Jewellery and precious metal workers
- 089 Glass formers, potters and related workers
- 090 Rubber and plastics product makers
- 091 Paper and paperboard products makers
- 092 Printers and related workers
- 093 Painters
- 094 Production and related workers not elsewhere
classified

Additional text not in questionnaire:

<Complete question text V692>

<If respondent is employed full- or part-time>

Classification of occupation (ISCO 1968) according to the occupational prestige scale

0 Respondent not employed full- or part-time (code 3-11 in V688); not available 2012

99,7 Refused

99,8 Don't know

99,9 No answer

Note:

Occupational Prestige Scale

The occupational prestige scale is based on the ISCO classification of 1968.

Respondents are assigned prestige values according to their three-digit ISCO occupational categories. If possible, undefinable and not classifiable cases (code 1004) receive prestige values according to their occupational minor group. Cases which cannot be classified according to their occupational minor group receive the average prestige value of their occupational major group. Only the following categories from the occupational major group rest defined as 'missing':

One-digit	Prestige scale	
0	0	Not applicable
97	99.7	Refused
98	99.8	Don't know
99	99.9	No answer

For further explanation see:

999,8 Don't know

999,9 No answer

Comment:

The MPS-scores for 1980-1984 have been newly generated.

Note:

Magnitudeprestige Scale (MPS) for ISCO 1968 and ISCO 1988

The Magnitudeprestige Scale is based on an alternative measurement of social prestige created by Bernd Wegener.

Starting point is a prestige assessment without a list of pre-quoted categories, i.e. respondents were asked to give an implicit ratio estimation of the relative magnitude of prestige. The resulting MPS-scale describes a gradual mapping of social closure.

For further explanation see:

Bernd Wegener 1984:

Gibt es Sozialprestige? Konstruktion und Validität der Magnitude-Prestigeskala, ZUMA Arbeitsbericht 84/02.

Bernd Wegener 1985:

Gibt es Sozialprestige? in: Zeitschrift für Soziologie 14: 209 - 235.

V699 R.: CURRENT OCCUPATION, ISEI ISCO 1968

Additional text not in questionnaire:

<Complete question text V692>

<If respondent is employed full- or part-time>

Classification of occupation (ISCO 1968) according to the International Socio-Economic Index of Occupational Status (ISEI) nach Ganzeboom

0 Respondent not employed full-or part-time (code 3-4 in V688); not available 1980-1998, 2012

99 No answer

Note:

Ganzeboom's ISEI for ISCO 1968 and ISCO 1988

In contrast to social prestige scales, this index of socio-economic status is constructed so as to include information on the educational level and the income connected to an occupational position. For ALLBUS, two versions of the index, based on ISCO 1968 and ISCO 1988 respectively, were constructed.

Please be advised that there are as yet no ISEI-scores for the incomplete codes and the general categories of ISCO.

For further explanation see:

V701 R.: CURRENT OCC. GOLDTHORPE CLASSES, I68

Additional text not in questionnaire:

<If respondent is employed full- or part-time>

Goldthorpe class scheme:

Derived from information on respondent's current occupation

- 0 Not applicable or insufficient occupational information for classification in class scheme; not available 2012
- 1 Higher and middle grades of the service class (higher grade professionals, administrators, officials and managers, large proprietors)
- 2 Lower grades of the service class
- 3 Non-manual employees with routine tasks (mainly clerical occupations, also sales occupations)
- 4 Proprietors, artisans etc. with 2-49 employees
- 5 Small proprietors, artisans etc. with 1 or no employees
- 6 Farmers (self-employed)
- 7 Technicians, supervisors of manual workers (foremen, master craftsmen)
- 8 Skilled workers
- 9 Unskilled and semi-skilled workers
- 10 Agricultural workers
- 11 Subdivision of class 3: Occupations without attachment to an organisational hierarchy and infrastructure. (This category was added when the class scheme was adapted to include women.)
- 12 From 1991: Farmer on a cooperative farm

Derivation of data:

This variable was derived from V691 and V692

Note:

The Goldthorpe Class Scheme

For further information see:

Petra Beckmann and Reiner Trometer 1991:

Neue Dienstleistungen des ALLBUS: Haushalts- und Familientypologien, Klassenschema nach Goldthorpe, in: ZUMA-Nachrichten 28: 7 - 17.

Robert Erikson and John H. Goldthorpe 1992:

The Constant Flux, Oxford: University Press.

Robert Erikson, John H. Goldthorpe, Wolfgang König, Paul Lüttinger and Walter Müller 1989:

The International Mobility Superfile (IMS) - Documentation -, CASMIN-Projekt, Mannheim. (Application of the class scheme to international data.)

John H. Goldthorpe 1980:

Social Mobility and Class Structure in Modern Britain, Oxford: Clarendon Press. (As an explanation of the theoretical background.)

The class scheme by Goldthorpe groups individuals on the basis of their occupational position (reference number)

and their occupational function (using ISCO 1968). By combining these two variables, 12 different class categories are then constituted.

In contrast to an 'hierarchical' scale, based for instance on prestige and status, the Goldthorpe index is rather oriented towards a nominal concept of class structure. This makes it especially useful in analyzing, for example, the development of industrial societies into service societies, because the categories of the Goldthorpe class scheme allow a more precise analysis and description of the growth or decline of different parts of the middle classes or of various groups of dependent employees and civil servants than scales which consist of horizontally differentiated ordinal status or prestige measures.

Moreover, the Goldthorpe class scheme in its present form is especially suitable for internationally comparative analyses (e.g. analyses of social mobility).

10004 Workers with unclassifiable or inadequately described occupation

10009 No answer

Note:

International Standard Classification of Occupations (ISCO 1988)

Source:

International Labour Office (ed.) 1990:

International Standard Classification of Occupations. ISCO-88, Genf.

Until 2010, the categories of the open question on occupations were coded by GESIS based on the official German translation of the source cited above, which was provided by the 'Federal Statistical Office' (Statistisches Bundesamt). Some new Codes, marked '*' in this documentation, were added when ISCO-88 was introduced with ALLBUS 1992.

In 2012, ISCO coding was performed by infas (infas Institut für angewandte Sozialwissenschaft GmbH, Friedrich-Wilhelm-Str. 18, 53113 Bonn).

All codes in the data file are in a four digit format. Where necessary, leading zeros were added.

10009 No answer

Remarks:

(*) new codes added by ZUMA

(1) This occupational group is intended to cover persons who, as directors, chief executives or department managers, manage enterprises, organizations or departments, requiring a total of three or more managers.

(2) This occupational group is intended to include persons who, either on their own behalf or on behalf of the proprietor, manage enterprises or in some cases organizations with the help of non-managerial staff and no more than one other senior staff, who should also be classified in this sub-major group, because this person's responsibilities will usually be more varied than those of a department manager in a larger enterprise or organization. Non-managerial staff should be classified according to their specific tasks.

(3) This code was introduced to supplement the existing ISCO-classification. It was taken from the European Community variant of the classification called ISCO 88 (COM).

99 No answer

Note:

Standard International Occupational Prestige Scale (SIOPS)

The "Standard International Occupational Prestige Scale" is based on the ISCO classification of 1988. It was conceived as an alternative prestige measure to Treiman's occupational prestige scale, which is based on ISCO 1968.

Please be advised that there are as yet no SIOPS-scores for the incomplete codes and the general categories of ISCO.

For further explanation see:

Harry B.G. Ganzeboom and Donald J. Treiman 1996:

Internationally Comparable Measures of Occupational Status for the 1988 International Standard Classification of Occupations, in: Social Science Research 25: 124 - 168.

V705 R.: CURRENT MAGNITUDEPRESTIGE ISCO 1988

Additional text not in questionnaire:

<Complete question text V692>

<If respondent is employed full- or part-time>

Classification of occupation (ISCO 1988) according to the Magnitudeprestige Scale (MPS)

0 Respondent not employed full- or part-time (code 3, 4 in V688); not available 1980-1991, 2012

999,9 No answer

Comment:

The prestige values for 1992-2006 were retroactively prepared for this cumulative data set. Interested persons can obtain the respective SPSS routine from the archive (please contact Michael Terwey).

Note:

Magnitudeprestige Scale (MPS) for ISCO 1968 and ISCO 1988

The Magnitudeprestige Scale is based on an alternative measurement of social prestige created by Bernd Wegener. Starting point is a prestige assessment without a list of pre-quoted categories, i.e. respondents were asked to give an implicit ratio estimation of the relative magnitude of prestige. The resulting MPS-scale describes a gradual mapping of social closure.

For further explanation see:

Bernd Wegener 1984:

Gibt es Sozialprestige? Konstruktion und Validität der Magnitude-Prestigeskala, ZUMA Arbeitsbericht 84/02.

Bernd Wegener 1985:

Gibt es Sozialprestige? in: Zeitschrift für Soziologie 14: 209 - 235.

V707 R.: CURRENT OCCUPATION, ISEI ISCO 1988

Additional text not in questionnaire:

<Complete question text V692>

<If respondent is employed full- or part-time>

Classification of occupation (ISCO 1988) according to the International Socio-Economic Index of Occupational Status (ISEI), Ganzeboom

0 Respondent not employed full- or part-time (code 3-4 in V688); not available 1980-1998

99 No answer

Note:

Ganzeboom's ISEI for ISCO 1968 and ISCO 1988

In contrast to social prestige scales, this index of socio-economic status is constructed so as to include information on the educational level and the income connected to an occupational position. For ALLBUS, two versions of the index, based on ISCO 1968 and ISCO 1988 respectively, were constructed.

Please be advised that there are as yet no ISEI-scores for the incomplete codes and the general categories of ISCO.

For further explanation see:

Harry B.G. Ganzeboom, Paul M. De Graaf, Donald J. Treiman and J. De Leeuw 1992:

A Standard International Socio-Economic Index of Occupational Status, in: Social Science Research 21: 1 - 56.

712 Building finishers and related trades workers
7121 Roofers
7122 Floor layers and tile setters
7123 Plasterers
7124 Insulation workers
7125 Glaziers
7126 Plumbers and pipe fitters
7127 Air conditioning and refrigeration mechanics
713 Painters, building structure cleaners and related trades workers
7131 Painters and related workers
7132 Spray painters and varnishers
7133 Building structure cleaners
72 Metal, machinery and related trades workers
721 Sheet and structural metal workers, moulders and welders, and related workers
7211 Metal moulders and coremakers
7212 Welders and flamecutters
7213 Sheet-metal workers
7214 Structural-metal preparers and erectors
7215 Riggers and cable splicers
722 Blacksmiths, toolmakers and related trades workers
7221 Blacksmiths, hammersmiths and forging press workers

7222 Toolmakers and related workers
7223 Metal working machine tool setters and operators
7224 Metal polishers, wheel grinders and tool sharpeners
723 Machinery mechanics and repairers
7231 Motor vehicle mechanics and repairers
7232 Aircraft engine mechanics and repairers
7233 Agricultural and industrial machinery mechanics and repairers
7234 Bicycle and related repairers
725 Metal workers *
7250 Metal workers *
73 Handicraft and printing workers
731 Handicraft workers
7311 Precision-instrument makers and repairers
7312 Musical instrument makers and tuners
7313 Jewellery and precious-metal workers
7314 Potters and related workers
7315 Glass makers, cutters, grinders and finishers
7316 Sign writers, decorative painters, engravers and etchers
7317 Handicraft workers in wood, basketry and related materials
7318 Handicraft workers in textile, leather and related materials
7319 Handicraft workers not elsewhere classified
732 Printing trades workers
7321 Pre-press technicians
7322 Printers
7323 Print finishing and binding workers
74 Electrical and electronic trades workers
741 Electrical equipment installers and repairers
7411 Building and related electricians
7412 Electrical mechanics and fitters
7413 Electrical line installers and repairers
742 Electronics and telecommunications installers and repairers
7421 Electronics mechanics and servicers
7422 Information and communications technology installers and servicers
75 Food processing, wood working, garment and other craft and related trades workers
751 Food processing and related trades workers
7511 Butchers, fishmongers and related food preparers
7512 Bakers, pastry-cooks and confectionery makers
7513 Dairy-products makers
7514 Fruit, vegetable and related preservers
7515 Food and beverage tasters and graders
7516 Tobacco preparers and tobacco products makers
752 Wood treaters, cabinet-makers and related trades workers
7521 Wood treaters
7522 Cabinet-makers and related workers
7523 Woodworking-machine tool setters and operators
753 Garment and related trades workers
7531 Tailors, dressmakers, furriers and hatters

7532 Garment and related pattern-makers and cutters
7533 Sewing, embroidery and related workers
7534 Upholsterers and related workers
7535 Pelt dressers, tanners and fellmongers
7536 Shoemakers and related workers
754 Other craft and related workers
7541 Underwater divers
7542 Shotfirers and blasters
7543 Product graders and testers (excluding foods and beverages)
7544 Fumigators and other pest and weed controllers
7549 Craft and related workers not elsewhere classified
8 Plant and machine operators and assemblers
81 Stationary plant and machine operators
811 Mining and mineral processing plant operators
8111 Miners and quarriers
8112 Mineral and stone processing plant operators
8113 Well drillers and borers and related workers
8114 Cement, stone and other mineral products machine operators
812 Metal processing and finishing plant operators
8121 Metal processing plant operators
8122 Metal finishing, plating and coating machine operators
813 Chemical and photographic products plant and machine operators
8131 Chemical products plant and machine operators
8132 Photographic products machine operators
814 Rubber, plastic and paper products machine operators
8141 Rubber products machine operators
8142 Plastic products machine operators
8143 Paper products machine operators
815 Textile, fur and leather products machine operators
8151 Fibre preparing, spinning and winding machine operators
8152 Weaving and knitting machine operators
8153 Sewing machine operators
8154 Bleaching, dyeing and fabric cleaning machine operators
8155 Fur and leather preparing machine operators
8156 Shoemaking and related machine operators
8157 Laundry machine operators
8159 Textile, fur and leather products machine operators not elsewhere classified
816 Food and related products machine operators
8160 Food and related products machine operators
817 Wood processing and papermaking plant operators
8171 Pulp and papermaking plant operators
8172 Wood processing plant operators
818 Other stationary plant and machine operators
8181 Glass and ceramics plant operators
8182 Steam engine and boiler operators
8183 Packing, bottling and labelling machine operators
8189 Stationary plant and machine operators not elsewhere classified

82 Assemblers
821 Assemblers
8211 Mechanical machinery assemblers

V710 RESPONDENTS INDUSTRY

<If respondent is employed full- or part time>

For what kind of business or employer do you work?

Is something produced (what?), is it a wholesale or a retail business (what is sold?), or what general designation does your place of work have?

(Int.: Carefully record what industry or trade the respondent's place of work belongs to.)

- 0 Respondent not employed full- or part-time (code 3-11 in V688); not available 1994-2012
- 1 Agriculture, forestry, horticulture
- 2 Fishing, fish farming, animal husbandry
- 3 Utilities (power, water supply)
- 4 Mining
- 5 Chemical industry (incl. coal products manufacturing) and petrochemical manufacturing
- 6 Plastics, rubber and asbestos manufacturing
- 7 Quarrying and manufacturing of stones, sand and clay; ceramics and glass manufacturing
- 8 Iron and non-ferrous metal production, foundries and steel manufacturing
- 9 Steel construction, machinery and motor vehicle manufacturing
- 10 Electronic products, precision mechanics and optics; manufacturing of EBM-products, musical instruments, sporting and athletic goods, toys and jewellery
- 11 Wood product and paper manufacturing, printing
- 12 Leather, textile and apparel manufacturing
- 13 Food, drink and tobacco
- 14 Construction
- 15 Construction - specialty trade contractors
- 16 Wholesale trade
- 17 Wholesale trade agents and brokers
- 18 Retail trade
- 19 Rail transportation
- 20 Postal service (including: banking services)
- 21 Other transportation and other communication services
- 22 Finance and credit intermediation (commercial banking, savings institutions) except postal banking (code 20)
- 23 Insurance (except social security)
- 24 Services provided by companies or professionals, food or laundry services, publishing industries, etc.
- 25 Non-profit organisations (churches, associations, etc.)
- 26 Private households
- 27 Public administration (legislative, executive, justice, military)
- 28 Social security
- 97 Industry cannot be categorized or inadequate description
- 99 No information, refused

Comment:

This classification follows the 'ZUMA-Branchenschlüssel', which is a simplified version of the three digit industry codes from the Federal Statistical Office, Germany (Systematik der Wirtschaftszweige, 1979).

V721 RESPONDENT: LAST OCCUPATION

<If respondent has formerly been employed full- or part-time>

What was your last occupational position?

Please have a look at these cards, choose the appropriate card and tell me the answer code on the card.

(Int.: Hand over card pack. Only one choice possible. Leave chosen card on table and put other cards to the side.)

- 0 Not applicable (code 0, 9996 in V719)
- 1 Independent farmer
- 2 Independent professional
- 3 Self-employed in trade or craft, industry, service sector, etc.
- 4 Civil servants/judges/professional soldiers
- 5 Employees
- 6 Workers
- 7 In vocational training
- 8 Family member assisting in family business
- 9 From 1991: Farmer on a cooperative farm <1991: only for respondents from the new federal states>
- 91 Until 1986: Military/alternative community service
- 97 Refused
- 99 No answer

Comment:

In 1980-1986 and as of 1994, occupational position has only been surveyed using the more differentiated reference numbers in the following variable. For the relevant years, the classification in this variable was derived from the more detailed data in V722.

ZA4580, V721: to V2: (N=57719) (weighted according to V1740)

V722	RESP.: LAST OCCUPATION, REFERENCE NUMBER
------	--

<If respondent has formerly been employed full- or part-time>

Until 1986, from 1994:

Please classify your last occupational position according to this card.

(Int.: Please present card and record answer.)

1988-1992:

And which of these descriptions fits your last position?

Please tell me the appropriate answer code (from 1990: on this card).

(Int.: Please present the card and enter answer code.)

Independent farmers with farmland of:

- 10 Less than 10 hectares
- 11 10 ha - less than 20 ha
- 12 20 ha - to less than 50 ha (1980: 20 ha and over)
- 13 From 1982: 50 ha and over

Independent professionals (e.g. doctor in private practice, lawyer)

- 14 from 2010: no employees
- 15 from 2010: 1 employee; until 2008: 1 employee or none
- 16 2-9 employees
- 17 10 or more employees

Self-employed in trade or craft, industry, service sector etc.

- 20 2010: no employees
- 21 from 2010: 1 employee; until 2008: 1 employee or none
- 22 2-9 employees
- 23 10-49 employees (1980: 10 or more employees)
- 24 From 1982: 50 or more employees

Family member assisting in family business

- 30 Family member assisting in family business

Civil servants/judges/professional soldiers

- 40 Civil servants carrying out simple administrative duties
- 41 Civil servants carrying out middle level administrative duties
- 42 Civil servants carrying out senior administrative duties
- 43 Civil servants carrying out executive duties, judges

Military/alternative community service

- 49 Until 1986: Military/alternative community service

Employees

- 50 Plant foreman with employee status
- 51 Employee with simple duties (e.g. salesperson, clerk, typist)
- 52 Employee under loose supervision carrying out complex tasks independently (e.g. senior clerical staff, book-keeper, draughtsman)
- 53 Employee carrying out responsible tasks independently or with limited responsibility for others (e.g. researcher, manager, head of department)
- 54 Employee with wide managerial responsibilities and decision making powers (e.g. head of organisation/association, managing director, executive of large firm or organisation)

Workers

- 60 Unskilled worker
- 61 Semi-skilled worker
- 62 Skilled worker
- 63 Foreman
- 64 Master (crafts- and tradesman), site foreman

Farmer on a cooperative farm

- 65 From 1991: Farmer on a cooperative farm <"Genossenschaftsbauer," 1991 only for respondents from the new federal states>

In vocational training

- 70 Trainee in commercial/administrative sector
- 71 Trainee in trades/crafts sector
- 72 Trainee in domestic/agricultural sector
- 73 Civil servant trainee
- 74 Trainee on short-term work placement/internship

0 Not applicable (code 0, 9996 in V719)

97 Refused

V723 RESPONDENT: LAST OCCUPATION, ISCO 1968

Additional text not in questionnaire:

Classification of last occupation according to ISCO 1968

<If respondent has formerly been employed full- or part-time>

What work did you do in your last main job?

Please describe your work precisely.

(Int.: Please ask for a detailed answer:)

Does this job, this work have a special name?

0 Not applicable (code 0, 9996 in V719; code 49 in V722); not available 2012

1004 Workers with unclassifiable or inadequately described occupation

1007 Refused

1008 Don't know

1009 No answer

Note:

International Standard Classification of Occupations (ISCO 1968)

(Herbalist, sanitary officer, osteopath)
- 0081 Statisticians
- 0082 Mathematicians and actuaries
- 0083 Systems analysts
- 0084 Statistical and mathematical technicians
- 0090 Economists
- 0110 Accountants (general)
- 0121 Lawyers
- 0122 Judges
- 0129 Jurists, n.e.c.
- 0131 University and higher education teachers and related
- 0132 Secondary education teachers and related
- 0133 Primary education teachers and related

0134 Pre-primary education teachers
0135 Special education teachers
0139 Teachers, n.e.c.
0141 Ministers of religion and related members of
religious orders
0149 Workers in religion, n.e.c.
0151 Authors and critics
0159 Authors, journalists and related writers, n.e.c.
0161 Sculptors, painters and related artists
0162 Commercial artists and designers
0163 Photographers and cameramen
0171 Composers, musicians and singers
0172 Choreographers and dancers
0173 Actors and stage directors
0174 Producers, performing arts (theater, movie, radio, TV)
0175 Circus performers
0179 Performing artists, n.e.c.
0191 Librarians, archivists and curators
0192 Sociologists, anthropologists and related scientists
0193 Social workers
0194 Personnel and occupational specialists
0195 Philologists, translators and interpreters
0199 Other scientists, technical and related professions,
n.e.c.

Administrative and managerial workers

0201 Heads of government jurisdiction, legislative officials
0202 Members of legislative bodies, government officials
0211 General managers and businessmen, manager in enterprise
0212 Production managers (except farm)
0219 Managers in private enterprises, industry,
business, n.e.c.

Clerical and related workers

0300 Clerical supervisors
0310 Government executive officials
0321 Stenographers, typists and teletypists
0322 Card- and tapepunching machine operators
0331 Bookkeepers and cashiers
0339 Bookkeepers, cashiers and related workers, n.e.c.
0341 Bookkeeping and calculating machine operators
0342 Automatic data-processing machine operators
0351 Railway station masters
0352 Postmasters
0359 Transport and communications supervisors, n.e.c.

0360 Transport conductors
0370 Mail distribution clerks
0380 Telephone and telegraph operators
0390 Clerical and related workers
0391 Stock clerks
0392 Material and production planning clerks
0393 Correspondence and reporting clerks
0394 Receptionists and travel agency clerks
0395 Library and filing clerks
0399 Clerks n.e.c.

Sales workers

0400 Managers (wholesale and retail trade)
0410 Working proprietors (wholesale and retail trade)
0421 Sales supervisors
0422 Buyers
0431 Technical salesmen and service advisers
0432 Commercial travellers and manufacturers' agents

0441 Insurance, real estate and securities salesmen
0442 Business services salesmen
0443 Auctioneers
0451 Salesmen, shop assistants and demonstrators
0452 Street vendors, canvassers and newsvendors
0490 Sales workers, n.e.c.

Service workers

0500 Managers (catering and lodging services)
0510 Working proprietors (catering and lodging services)
0520 Housekeeping and related service workers
0531 Cooks
0532 Waiters, bartenders and related workers
0540 Maids and related housekeeping service workers, n.e.c.
0551 Building caretakers (general)
0552 Charworkers, cleaners and related workers
0560 Launderers, dry cleaners and pressers
0570 Hairdressers, barbers, beauticians and related workers
0581 Fire fighters
0582 Policemen and detectives
0589 Protective service workers, n.e.c.
0591 Guides
0592 Undertakers and embalmers
0599 Other service workers. n.e.c.

Agricultural, animal husbandry and forestry workers,

fishermen and hunters

- 0600 Farm managers and supervisors
- 0610 Farm manager or director
- 0611 General farmers
- 0612 Specialised farmers
- 0621 General farm workers (including cooperative farmers)
- 0622 Field crop and vegetable farm workers
- 0623 Orchard, vineyard and related tree and shrub crop
workers
- 0624 Livestock workers
- 0625 Dairy farm workers
- 0626 Poultry farm workers
- 0627 Nursery workers and gardeners
- 0628 Farm machinery operators
- 0629 Agricultural and animal husbandry workers, n.e.c.
- 0631 Loggers
- 0632 Forestry workers (except logging)
- 0641 Fishermen
- 0649 Fishermen, hunters and related workers, n.e.c.

Production and related workers, transport equipment operators
and labourers

- 0700 Production supervisors and general foremen
- 0711 Miners and quarrymen
- 0712 Mineral and stone treaters
- 0713 Well drillers, borers and related workers
- 0721 Metal smelting, converting and refining furnacemen
- 0722 Metal rolling-mill workers
- 0723 Metal melters and reheaters
- 0724 Metal casters
- 0725 Metal moulders and coremakers
- 0726 Metal annealers, temperers and case-hardeners
- 0727 Metal drawers and extruders
- 0728 Metal platers and coaters
- 0729 Metal processors, n.e.c.
- 0731 Wood treaters
- 0732 Sawyers, plywood makers and related wood-processing
workers
- 0733 Paper pulp preparers
- 0734 Paper makers
- 0741 Crushers, grinders and mixers
- 0742 Cookers, roasters and related heat-treaters
- 0743 Filter and separator operators
- 0744 Still and reactor operators
- 0745 Petroleum-refining workers

- 0749 Chemical processors and related workers, n.e.c.
- 0751 Fibre preparers
- 0752 Spinners and winders
- 0753 Weaving- and knitting-machine setters and
pattern-card preparers
- 0754 Weavers and related workers
- 0755 Knitters
- 0756 Bleachers, dyers and textile product finishers
- 0759 Spinners, weavers, knitters, dyers and related
workers, n.e.c.
- 0761 Tanners and fellmongers
- 0762 Pelt dressers
- 0771 Grain millers and related workers
- 0772 Sugar processors and refiners
- 0773 Butchers and meat preparers
- 0774 Food preservers
- 0775 Dairy product processors
- 0776 Bakers, pastrycooks and confectionery makers
- 0777 Tea, coffee and cocoa preparers
- 0778 Brewers, wine and beverage makers
- 0779 Food and beverage processors, n.e.c.
- 0781 Tobacco preparers
- 0782 Cigar makers
- 0783 Cigarette makers
- 0789 Tobacco preparers and tobacco product makers, n.e.c.
- 0791 Tailors and dressmakers
- 0792 Fur tailors and related workers
- 0793 Milliners and hatmakers
- 0794 Patternmakers and cutters
- 0795 Sewers and embroiderers
- 0796 Upholsterers and related workers
- 0799 Tailors, dressmakers, sewers, upholsterers and
related workers, n.e.c.

- 0801 Shoemakers and shoe repairers
- 0802 Shoe cutters, lasters, sewers and related workers
- 0803 Leather goods makers
- 0811 Cabinetmakers
- 0812 Woodworking-machine operators
- 0819 Cabinetmakers and related woodworkers, n.e.c.
- 0820 Stone cutters and carvers
- 0831 Blacksmiths, hammersmiths and forging-press operators
- 0832 Toolmakers, metal patternmakers and metal markers
- 0833 Machine-tool setter-operators
- 0834 Machine-tool operators
- 0835 Metal grinders, polishers and tool sharpeners
- 0839 Blacksmiths, toolmakers and machine-tool

operators, n.e.c.

0841 Machinery fitters and machine assemblers

0842 Watch, clock and precision instrument makers

0843 Motor vehicle mechanics

0844 Aircraft engine mechanics

0849 Machinery fitters, machine assemblers and precision
instrument makers (except electrical), n.e.c.

0851 Electrical fitters

0852 Electronics fitters

0853 Electrical and electronic equipment assemblers

0854 Radio and television repairmen

0855 Electrical wiremen

0856 Telephone and telegraph installers

0857 Electric linemen and cable jointers

0859 Electrical fitters and related electrical and
electronics workers, n.e.c.

0861 Broadcasting station operators

0862 Sound equipment operators and cinema projectionists

0871 Plumbers and pipe fitters

0872 Welders and flame cutters

0873 Sheet metal workers

0874 Structural metal preparers and erectors

0880 Jewellery and precious metal workers

0891 Glass formers, cutters, grinders and finishers

0892 Potters and related clay and abrasive formers

0893 Glass and ceramics kilnmen

0894 Glass engravers and etchers

0895 Glass and ceramics painters and decorators

0899 Glass formers, potters and related workers, n.e.c.

0901 Rubber and plastics product makers (except tire
makers and tire vulcanisers)

0902 Tire makers and vulcanisers

0910 Paper and paperboard products makers

0921 Compositors and typesetters

0922 Printing pressmen

0923 Stereotypers and electrotypers

0924 Printing engravers (except photo-engravers)

0925 Photo-engravers

0926 Bookbinders and related workers

0927 Photographic darkroom workers

0929 Printers and related workers, n.e.c.

0931 Painters, construction

0939 Painters, n.e.c.

0941 Musical instrument makers and tuners

0942 Basketry weavers and brush makers

0943 Non-metallic mineral product makers

0949 Other production and related workers

- 0951 Bricklayers, stonemasons and tile setters
- 0952 Reinforced-concreters, cement finishers and
terrazzo workers
- 0953 Roofers
- 0954 Carpenters, joiners and parquetry workers
- 0955 Plasterers
- 0956 Insulators
- 0957 Glaziers
- 0959 Construction workers, n.e.c.
- 0961 Power-generating machinery operators
- 0969 Stationary engine and related equipment
operators, n.e.c.
- 0971 Dockers and freight handlers
- 0972 Riggers and cable splicers
- 0973 Crane and hoist operators
- 0974 Earth-moving and related machinery operators
- 0979 Material-handling equipment operators, n.e.c.
- 0981 Ships' deck ratings, barge crews and boatmen
- 0982 Ships' engine-room ratings
- 0983 Railway engine drivers and firemen
- 0984 Railway brakemen, signalmen and shunters
- 0985 Motor vehicle drivers
- 0986 Animal and animal-drawn vehicle drivers
- 0989 Transport equipment operators, n.e.c.
- 0999 Labourers, factory workers, unskilled workers
not elsewhere classified

- 0001 Soldier (armed forces)
- 0002 Officer (armed forces)

- 1004 Workers with inadequately described or
undefinable (not classifiable) job

- 1007 Refused
- 1008 Don't know
- 1009 No answer
- 0000 Not applicable

V724 R.: LAST OCCUPAT. MINOR GROUP ISCO 1968

Additional text not in questionnaire:

<Complete question text V617>

<If respondent has formerly been employed full- or part-time>

Classification of last occupation (ISCO 1968) according to the occupational minor group

0 Not applicable (code 0, 9996 in V719; code 49 in V722); not available 2012

Note:

Occupational Minor Groups

Categories 01 to 99 correspond to the minor groups of ISCO 1968 while categories 101 to 109 were created by ZUMA:

- 001 Chemists, physicists and related professions
- 002 Architects, engineers and related technicians
- 003 Architects, engineers and related technicians
- 004 Aircraft and ships' officers
- 005 Life scientists and related life science technicians
- 006 Medical, dental, veterinary and related professions
- 007 Medical, dental, veterinary and related professions
- 008 Statisticians, mathematicians, system analysts and related technicians
- 009 Economists
- 011 Accountants
- 012 Jurists
- 013 Teachers
- 014 Workers in religion
- 015 Authors, journalists, and related writers
- 016 Sculptors, painters, photographers and related creative artists
- 017 Musicians, composers, dancers and performing artists
- 018 Athletes, sportsmen and related workers
- 019 Professionals, scientists, technical and related workers not elsewhere classified
- 020 Legislative officials and government administrators
- 021 Managers
- 030 Clerical supervisors
- 031 Government executive officials
- 032 Stenographers, typists, and card- and tape-punching machine operators
- 033 Bookkeepers, cashiers and related workers

- 034 Computing machine operators
- 035 Transport and communication supervisors
- 036 Transport conductors
- 037 Mail distribution clerks
- 038 Telephone and telegraph operators
- 039 Clerical and related workers not elsewhere classified
- 040 Managers (wholesale and retail trade)
- 041 Working proprietors (wholesale and retail trade)
- 042 Sales supervisors and buyers
- 043 Technical salesman, commercial travellers and
manufacturers' agents
- 044 Insurance, real estate, securities and business
services salesman, and auctioneers
- 045 Salesmen, shop assistants and related workers
- 049 Sales workers not elsewhere classified
- 050 Managers (catering and lodging services)
- 051 Working proprietors (catering and lodging services)
- 052 Housekeeping and related service supervisors
- 053 Cooks, waiters, bartenders and related workers
- 054 Maids and related housekeeping service workers
not elsewhere classified
- 055 Building caretakers, charworkers, cleaners and
related workers
- 056 Launderers, dry-cleaners and pressers
- 057 Hairdressers, barbers, beauticians and related
workers
- 058 Protective service workers not elsewhere classified
- 059 Service workers not elsewhere classified
- 060 Farm managers and supervisors
- 061 Farmers (including specialized farmers)
- 062 Agricultural and animal husbandry workers
- 063 Forestry workers
- 064 Fishermen, hunters and related workers
- 070 Production supervisors and general foremen
- 071 Miners, quarrymen, well drillers and related workers
- 072 Metal processors
- 073 Wood preparation workers and paper makers
- 074 Chemical processors and related workers

Additional text not in questionnaire:

<Complete question text V723>

<If respondent has formerly been employed full- or part-time>

Classification of last occupation (ISCO 1968) according to the occupational prestige scale

0 Not applicable (code 0, 9996 in V719; code 49 in V722); not available 2012

99,7 Refused

99,8 Don't know

99,9 No answer

Note:

Occupational Prestige Scale

The occupational prestige scale is based on the ISCO classification of 1968.

Respondents are assigned prestige values according to their three-digit ISCO occupational categories. If possible, undefinable and not classifiable cases (code 1004) receive prestige values according to their occupational minor group. Cases which cannot be classified according to their occupational minor group receive the average prestige value of their occupational major group. Only the following categories from the occupational major group rest defined as 'missing':

One-digit	Prestige scale	
0	0	Not applicable
97	99.7	Refused
98	99.8	Don't know
99	99.9	No answer

Comment:

The MPS-scores for 1980-1984 have been newly generated.

Note:

Magnitudeprestige Scale (MPS) for ISCO 1968 and ISCO 1988

The Magnitudeprestige Scale is based on an alternative measurement of social prestige created by Bernd Wegener.

Starting point is a prestige assessment without a list of pre-quoted categories, i.e. respondents were asked to give an implicit ratio estimation of the relative magnitude of prestige. The resulting MPS-scale describes a gradual mapping of social closure.

For further explanation see:

Bernd Wegener 1984:

Gibt es Sozialprestige? Konstruktion und Validität der Magnitude-Prestigeskala, ZUMA Arbeitsbericht 84/02.

Bernd Wegener 1985:

Gibt es Sozialprestige? in: Zeitschrift für Soziologie 14: 209 - 235.

Additional text not in questionnaire:

<Complete question text V723>

<If respondent has formerly been employed full- or part-time>

Classification of last occupation (ISCO 1968) according to the International Socio-Economic Index of Occupational Status (ISEI), Ganzeboom

0 Not applicable (code 0, 9996 in V719); not available 1980-1998, 2012

99 No answer

Note:

Ganzeboom's ISEI for ISCO 1968 and ISCO 1988

In contrast to social prestige scales, this index of socio-economic status is constructed so as to include information on the educational level and the income connected to an occupational position. For ALLBUS, two versions of the index, based on ISCO 1968 and ISCO 1988 respectively, were constructed.

Please be advised that there are as yet no ISEI-scores for the incomplete codes and the general categories of ISCO.

V732 R.:LAST OCCUPAT., GOLDTHORPE CLASSES I68

Additional text not in questionnaire:

<If respondent has formerly been employed full- or part-time>

Goldthorpe class scheme:

Derived from information on respondent's last occupation

- 0 Not applicable or insufficient occupational information for classification in class scheme; not available 2012
- 1 Higher and middle grades of the service class (higher grade professionals, administrators, officials and managers, large proprietors)
- 2 Lower grades of the service class
- 3 Non-manual employees with routine tasks (mainly clerical occupations, also sales occupations)
- 4 Proprietors, artisans etc. with 2-49 employees
- 5 Small proprietors, artisans etc. with 1 or no employees
- 6 Farmers (self-employed)
- 7 Technicians, supervisors of manual workers (foremen, master craftsmen)
- 8 Skilled workers
- 9 Unskilled and semi-skilled workers
- 10 Agricultural workers
- 11 Subdivision of class 3: Occupations without attachment to an organisational hierarchy and infrastructure. (This category was added when the class scheme was adapted to include women.)
- 12 From 1991: Farmer on a cooperative farm

Derivation of data:

This variable was derived from V722 and V723.

Note:

The Goldthorpe Class Scheme

For further information see:

Petra Beckmann and Reiner Trometer 1991:

Neue Dienstleistungen des ALLBUS: Haushalts- und Familientypologien, Klassenschema nach Goldthorpe, in: ZUMA-Nachrichten 28: 7 - 17.

Robert Erikson and John H. Goldthorpe 1992:

The Constant Flux, Oxford: University Press.

Robert Erikson, John H. Goldthorpe, Wolfgang König, Paul Lüttinger and Walter Müller 1989:

The International Mobility Superfile (IMS) - Documentation -, CASMIN-Projekt, Mannheim. (Application of the class scheme to international data.)

John H. Goldthorpe 1980:

Social Mobility and Class Structure in Modern Britain, Oxford: Clarendon Press. (As an explanation of the theoretical background.)

The class scheme by Goldthorpe groups individuals on the basis of their occupational position (reference number)

and their occupational function (using ISCO 1968). By combining these two variables, 12 different class categories are then constituted.

In contrast to an 'hierarchical' scale, based for instance on prestige and status, the Goldthorpe index is rather oriented towards a nominal concept of class structure. This makes it especially useful in analyzing, for example, the development of industrial societies into service societies, because the categories of the Goldthorpe class scheme allow a more precise analysis and description of the growth or decline of different parts of the middle classes or of various groups of dependent employees and civil servants than scales which consist of horizontally differentiated ordinal status or prestige measures.

Moreover, the Goldthorpe class scheme in its present form is especially suitable for internationally comparative analyses (e.g. analyses of social mobility).

V733 RESPONDENT: LAST OCCUPATION, ISCO 1988

Additional text not in questionnaire:

<Complete question text V723>

<If respondent has formerly been employed full- or part-time>

Classification of last occupation according to ISCO 1988

0 Not applicable (code 0, 9996 in V719); not available 1980-1991

10004 Workers with unclassifiable or inadequately described occupation

10009 No answer

Note:

International Standard Classification of Occupations (ISCO 1988)

Source:

International Labour Office (ed.) 1990:

International Standard Classification of Occupations. ISCO-88, Genf.

Until 2010, the categories of the open question on occupations were coded by GESIS based on the official German translation of the source cited above, which was provided by the 'Federal Statistical Office' (Statistisches Bundesamt). Some new Codes, marked '*' in this documentation, were added when ISCO-88 was introduced with ALLBUS 1992.

In 2012, ISCO coding was performed by infas (infas Institut für angewandte Sozialwissenschaft GmbH, Friedrich-Wilhelm-Str. 18, 53113 Bonn).

All codes in the data file are in a four digit format. Where necessary, leading zeros were added.

1 Legislators, senior officials and managers in private industry, enterprise and business

11 Legislators and senior officials

111 Legislators

1110 Legislators

112 Senior government officials

1120 Senior government officials

113 Traditional chiefs and heads of villages

1130 Traditional chiefs and heads of villages

114 Senior officials of special-interest organisations

1141 Senior officials of political-party organisations

1142 Senior officials of employers', workers' and other economic-interest organisations

1143 Senior officials of humanitarian and other special-interest organisations

12 Corporate managers in big enterprises (1)

121 Directors and chief executives

- 1210 Directors and chief executives
- 122 Production and operations department managers
 - 1221 Production and operations department managers in agriculture, hunting, forestry and fishing
 - 1222 Production and operations department managers in manufacturing
 - 1223 Production and operations department managers in construction
 - 1224 Production and operations department managers on wholesale and retail trade
 - 1225 Production and operations department managers in restaurants and hotels
 - 1226 Production and operations department managers in transport, storage and communications
 - 1227 Production and operations department managers in business services
 - 1228 Production and operations department managers in personal care, cleaning and related services
 - 1229 Production and operations department managers not elsewhere classified
- 123 Other department managers
 - 1231 Finance and administration department managers
 - 1232 Personnel and industrial relations department managers
 - 1233 Sales and marketing department managers

 - 71 Extraction and building trades workers
 - 711 Miners, shotfirers, stone cutters and carvers
 - 7111 Miners and quarry workers
 - 7112 Shotfirers and blasters
 - 7113 Stone splitters, cutters and carvers
 - 712 Building frame and related trades workers
 - 7121 Builders, traditional materials
 - 7122 Bricklayers and stonemasons
 - 7123 Concrete placers, concrete finishers and related workers
 - 7124 Carpenters and joiners
 - 7129 Building frame and related trades workers not elsewhere classified
 - 713 Building finishers and related trades workers
 - 7131 Roofers
 - 7132 Floor layers and tile setters
 - 7133 Plasterers
 - 7134 Insulation workers
 - 7135 Glaziers
 - 7136 Plumbers and pipe fitters
 - 7137 Building and related electricians

- 714 Painters, building structure cleaners and related trades workers
 - 7141 Painters and related workers
 - 7142 Varnishers and related painters
 - 7143 Building structure cleaners

- 72 Metal, machinery and related trades workers
 - 721 Metal moulders, welders, sheetmetal workers, structural-metal preparers, and related trades workers
 - 7211 Metal moulders and coremakers
 - 7212 Welders and flamecutters
 - 7213 Sheet-metal workers
 - 7214 Structural-metal preparers and erectors
 - 7215 Riggers and cable splicers
 - 7216 Underwater workers
 - 722 Blacksmiths, tool-makers and related trades workers
 - 7221 Blacksmiths, hammer-smiths and forging-press workers
 - 7222 Tool-makers and related workers
 - 7223 Machine-tool setters and setter-operators
 - 7224 Metal wheel-grinders, polishers and tool sharpeners
 - 723 Machinery mechanics and fitters
 - 7231 Motor vehicle mechanics and fitters
 - 7232 Aircraft engine mechanics and fitters
 - 7233 Agricultural- or industrial-machinery mechanics and fitters
 - 724 Electrical and electronic equipment mechanics and fitters
 - 7241 Electrical mechanics and fitters
 - 7242 Electronics fitters
 - 7243 Electronics mechanics and servicers
 - 7244 Telegraph and telephone installers and servicers
 - 7245 Electrical line installers, repairers and cable jointers

- 73 Precision, handicraft, printing and related trades workers
 - 731 Precision workers in metal and related materials
 - 7311 Precision-instrument makers and repairers
 - 7312 Musical-instrument makers and tuners
 - 7313 Jewellery and precious-metal workers
 - 732 Potters, glass-makers and related trades workers
 - 7321 Abrasive wheel formers, potters and

- related workers
- 7322 Glass-makers, cutters, grinders and finishers
- 7323 Glass engravers and etchers
- 7324 Glass, ceramics and related decorative painters
- 733 Handicraft workers in wood, textile, leather and related materials
- 7331 Handicraft workers in wood and related materials
- 7332 Handicraft workers in textile, leather and related materials
- 734 Printing and related trades workers
- 7341 Compositors, typesetters and related workers
- 7342 Stereotypers, and electrotypers
- 7343 Printing engravers and etchers
- 7344 Photographic and related workers
- 7345 Bookbinders and related workers
- 7346 Silk-screen, block and textile printers
- 74 Other craft and related trades workers
- 741 Food processing and related trades workers
- 7411 Butchers, fishmongers and related food preparers
- 7412 Bakers, pastry-cooks and confectionary maker
- 7413 Dairy-products makers
- 7414 Fruit, vegetable and related preservers
- 7415 Food and beverage tasters and graders
- 7416 Tobacco preparers and tobacco products maker
- 742 Wood treaters, cabinet-makers and related trades workers
- 7421 Wood treaters
- 7422 Cabinet-makers and related workers
- 7423 Woodworking-machine setters and setter-operators
- 7424 Basketry weavers, brush makers and related workers
- 743 Textile, garment and related trades workers
- 7431 Fibre preparers

10008 Don't know

10009 No answer

Remarks:

(*) new codes added by ZUMA

(1) This occupational group is intended to cover persons who, as directors, chief executives or department managers, manage enterprises, organizations or departments, requiring a total of three or more managers.

(2) This occupational group is intended to include persons who, either on their own behalf or on behalf of the proprietor, manage enterprises or in some cases organizations with the help of non-managerial staff and no more than one other senior staff, who should also be classified in this sub-major group, because this person's responsibilities will usually be more varied than those of a department manager in a larger enterprise or organization. Non-managerial staff should be classified according to their specific tasks.

(3) This code was introduced to supplement the existing ISCO-classification. It was taken from the European Community variant of the classification called ISCO 88 (COM).

99 No answer

Note:

Standard International Occupational Prestige Scale (SIOPS)

The "Standard International Occupational Prestige Scale" is based on the ISCO classification of 1988. It was conceived as an alternative prestige measure to Treiman's occupational prestige scale, which is based on ISCO 1968.

Please be advised that there are as yet no SIOPS-scores for the incomplete codes and the general categories of ISCO.

For further explanation see:

Harry B.G. Ganzeboom and Donald J. Treiman 1996:

Internationally Comparable Measures of Occupational Status for the 1988 International Standard Classification of Occupations, in: Social Science Research 25: 124 - 168.

999,9 No answer

Comment:

The prestige values for 1992-2006 were retroactively prepared for this cumulative data set. Interested persons can obtain the respective SPSS routine from the archive (please contact Michael Terwey).

Note:

Magnitudeprestige Scale (MPS) for ISCO 1968 and ISCO 1988

The Magnitudeprestige Scale is based on an alternative measurement of social prestige created by Bernd Wegener. Starting point is a prestige assessment without a list of pre-quoted categories, i.e. respondents were asked to give an implicit ratio estimation of the relative magnitude of prestige. The resulting MPS-scale describes a gradual mapping of social closure.

For further explanation see:

Bernd Wegener 1984:

Gibt es Sozialprestige? Konstruktion und Validität der Magnitude-Prestigeskala, ZUMA Arbeitsbericht 84/02.

Bernd Wegener 1985:

Gibt es Sozialprestige? in: Zeitschrift für Soziologie 14: 209 - 235.

<Complete question text V723>

<If respondent has formerly been employed full- or part-time>

Classification of last occupation (ISCO 1988) according to the International Socio-Economic Index of Occupational Status (ISEI), Ganzeboom

0 Not applicable (code 0, 9996 in V719); not available 1980-1998

99 No answer

Note:

Ganzeboom's ISEI for ISCO 1968 and ISCO 1988

In contrast to social prestige scales, this index of socio-economic status is constructed so as to include information on the educational level and the income connected to an occupational position. For ALLBUS, two versions of the index, based on ISCO 1968 and ISCO 1988 respectively, were constructed.

Please be advised that there are as yet no ISEI-scores for the incomplete codes and the general categories of ISCO.

V741 YEAR RESPONDENT BEGAN FIRST OCCUPATION

<If respondent is or was employed full- or part-time>

Now we would like to ask you some questions about your first regular full-time job. This does not refer to your vocational training. When, in what year, did you start working in your first full-time job?

(Int.: Record year.)

0 Never been employed full- or part-time (code 9996 in V719), 1991 also: in training (code 7 in V690); not available
1980, 1982, 1986-1990, 1992, 1996-2002, 2006-2012

9996 1994, 2004: Currently is or has last been in first vocational training

9998 Don't know

9999 No answer

Comment:

Data min./data max.:

1911 1911

...

2004 2004

V742 YEAR RESP. BEGAN FIRST OCCUPATION, CAT.

Additional text not in questionnaire:

Year respondent started working in first full-time job, categorized

0 Never been employed full- or part-time (code 9996 in V719), 1991 also: in training (code 7 in V690); not available
 1980, 1982, 1986-1990, 1992, 1996-2002, 2006-2012

1 1924 and früher

2 1925 - 1934

3 1935 - 1944

4 1945 - 1954

5 1955 - 1964

V743 FIRST OCCUPATION

<If respondent is or was employed full- or part-time>

What was your first occupational position?

Please have a look at these cards, choose the appropriate card and tell me the answer code on the card.

(Int.: Hand over card pack. Only one choice possible. Leave chosen card on table and put other cards to the side.)

0 Never been employed full- or part-time (code 9996 in V719), from 1991 also: in training (1991: code 7 in V690; 1994, 2004: code 9996 in V741); not available 1980, 1982, 1986-1990, 1992, 1996-2002, 2006-2012

1 Independent farmer

2 Independent professional

3 Self-employed in trade or craft, industry, service sector, etc.

4 Civil servants/judges/professional soldiers

5 Employees

6 Workers

7 1984: in vocational training

8 Family member assisting in family business

9 From 1991: Farmer on a cooperative farm <1991: Only for respondents from the new federal states>

91 1984: Military/alternative community service

99 No answer

Comment:

In 1984, 1994 and in 2004, occupational position has only been surveyed using the more differentiated reference numbers in the following variable. For the relevant years, the classification in this variable was derived from the more detailed data in V744.

ZA4580, V743: to V2: (N=57721) (weighted according to V1740)

V2 by V743, Absolute Values (Column Percent)

V744	FIRST OCCUPATION, REFERENCE NUMBER
------	------------------------------------

<If respondent is or was employed full- or part-time>

Please classify your first occupational position according to this card.

(Int.: Please present card and record answer code.)

Independent farmers with farmland of:

- 10 Less than 10 hectares
- 11 10 ha - less than 20 ha
- 12 20 ha - to less than 50 ha (1980: 20 ha and over)
- 13 From 1982: 50 ha and over

Independent professionals (e.g. doctor in private practice, lawyer)

- 14 from 2010: no employees
- 15 from 2010: 1 employee; until 2008: 1 employee or none
- 16 2-9 employees
- 17 10 or more employees

Self-employed in trade or craft, industry, service sector etc.

- 20 2010: no employees
- 21 from 2010: 1 employee; until 2008: 1 employee or none
- 22 2-9 employees
- 23 10-49 employees (1980: 10 or more employees)
- 24 From 1982: 50 or more employees

Family member assisting in family business

- 30 Family member assisting in family business

Civil servants/judges/professional soldiers

- 40 Civil servants carrying out simple administrative duties
- 41 Civil servants carrying out middle level administrative duties
- 42 Civil servants carrying out senior administrative duties
- 43 Civil servants carrying out executive duties, judges

Military/alternative community service

- 49 Until 1986: Military/alternative community service

Employees

- 50 Plant foreman with employee status
- 51 Employee with simple duties (e.g. salesperson, clerk, typist)
- 52 Employee under loose supervision carrying out complex tasks independently (e.g. senior clerical staff, book-keeper, draughtsman)
- 53 Employee carrying out responsible tasks independently or with limited responsibility for others (e.g. researcher, manager, head of department)
- 54 Employee with wide managerial responsibilities and decision making powers (e.g. head of

organisation/association, managing director, executive of large firm or organisation)

Workers

- 60 Unskilled worker
- 61 Semi-skilled worker
- 62 Skilled worker
- 63 Foreman
- 64 Master (crafts- and tradesman), site foreman

Farmer on a cooperative farm

- 65 From 1991: Farmer on a cooperative farm <"Genossenschaftsbauer," 1991 only for respondents from the new federal states>

In vocational training

- 70 Trainee in commercial/administrative sector
- 71 Trainee in trades/crafts sector
- 72 Trainee in domestic/agricultural sector
- 73 Civil servant trainee
- 74 Trainee on short-term work placement/internship

- 0 Never been employed full- or part-time (code 9996 in V719), from 1991 also: in training (1991: code 7 in V690; 1994, 2004: code 9996 in V741); not available 1980, 1982, 1986-1990, 1992, 1996-2002, 2006-2012
- 99 No answer

V745 FIRST OCCUPATION, ISCO 1968

Additional text not in questionnaire:

Classification of first occupation according to ISCO 1968

<If respondent is or was employed full- or part-time>

What work did you do in your first main job?

Please describe your work precisely.

(Int.: Please ask for a detailed answer:)

Does this job, this work have a special name?

0 Never been employed full- or part-time (code 9996 in V719), 1984 also: military/alternative community service (code 49 in V744), from 1991 also: in training (1991: code 7 in V690; 1994, 2004: code 9996 in V741); not available 1980, 1982, 1986-1990, 1992, 1996-2002, 2006-2012

1004 Workers with unclassifiable or inadequately described occupation

1006 1991: Still in first job

1009 No answer

- 0179 Performing artists, n.e.c.
- 0191 Librarians, archivists and curators
- 0192 Sociologists, anthropologists and related scientists
- 0193 Social workers
- 0194 Personnel and occupational specialists
- 0195 Philologists, translators and interpreters
- 0199 Other scientists, technical and related professions,
n.e.c.

Administrative and managerial workers

- 0201 Heads of government jurisdiction, legislative officials
- 0202 Members of legislative bodies, government officials
- 0211 General managers and businessmen, manager in enterprise
- 0212 Production managers (except farm)
- 0219 Managers in private enterprises, industry,
business, n.e.c.

Clerical and related workers

- 0300 Clerical supervisors
- 0310 Government executive officials
- 0321 Stenographers, typists and teletypists
- 0322 Card- and tapepunching machine operators
- 0331 Bookkeepers and cashiers
- 0339 Bookkeepers, cashiers and related workers, n.e.c.
- 0341 Bookkeeping and calculating machine operators
- 0342 Automatic data-processing machine operators
- 0351 Railway station masters
- 0352 Postmasters

0359 Transport and communications supervisors, n.e.c.
0360 Transport conductors
0370 Mail distribution clerks
0380 Telephone and telegraph operators
0390 Clerical and related workers
0391 Stock clerks
0392 Material and production planning clerks
0393 Correspondence and reporting clerks
0394 Receptionists and travel agency clerks
0395 Library and filing clerks
0399 Clerks n.e.c.

Sales workers

0400 Managers (wholesale and retail trade)
0410 Working proprietors (wholesale and retail trade)
0421 Sales supervisors
0422 Buyers
0431 Technical salesmen and service advisers
0432 Commercial travellers and manufacturers' agents

0441 Insurance, real estate and securities salesmen
0442 Business services salesmen
0443 Auctioneers
0451 Salesmen, shop assistants and demonstrators
0452 Street vendors, canvassers and newsvendors
0490 Sales workers, n.e.c.

Service workers

0500 Managers (catering and lodging services)
0510 Working proprietors (catering and lodging services)
0520 Housekeeping and related service workers
0531 Cooks
0532 Waiters, bartenders and related workers
0540 Maids and related housekeeping service workers, n.e.c.
0551 Building caretakers (general)
0552 Charworkers, cleaners and related workers
0560 Launderers, dry cleaners and pressers
0570 Hairdressers, barbers, beauticians and related workers
0581 Fire fighters
0582 Policemen and detectives
0589 Protective service workers, n.e.c.
0591 Guides
0592 Undertakers and embalmers
0599 Other service workers. n.e.c.

Agricultural, animal husbandry and forestry workers,
fishermen and hunters

- 0600 Farm managers and supervisors
- 0610 Farm manager or director
- 0611 General farmers
- 0612 Specialised farmers
- 0621 General farm workers (including cooperative farmers)
- 0622 Field crop and vegetable farm workers
- 0623 Orchard, vineyard and related tree and shrub crop
workers
- 0624 Livestock workers
- 0625 Dairy farm workers
- 0626 Poultry farm workers
- 0627 Nursery workers and gardeners
- 0628 Farm machinery operators
- 0629 Agricultural and animal husbandry workers, n.e.c.
- 0631 Loggers
- 0632 Forestry workers (except logging)
- 0641 Fishermen
- 0649 Fishermen, hunters and related workers, n.e.c.

Production and related workers, transport equipment operators
and labourers

- 0700 Production supervisors and general foremen
- 0711 Miners and quarrymen
- 0712 Mineral and stone treaters
- 0713 Well drillers, borers and related workers
- 0721 Metal smelting, converting and refining furnacemen
- 0722 Metal rolling-mill workers
- 0723 Metal melters and reheaters
- 0724 Metal casters
- 0725 Metal moulders and coremakers
- 0726 Metal annealers, temperers and case-hardeners
- 0727 Metal drawers and extruders
- 0728 Metal platers and coaters
- 0729 Metal processors, n.e.c.
- 0731 Wood treaters
- 0732 Sawyers, plywood makers and related wood-processing
workers
- 0733 Paper pulp preparers
- 0734 Paper makers
- 0741 Crushers, grinders and mixers
- 0742 Cookers, roasters and related heat-treaters
- 0743 Filter and separator operators
- 0744 Still and reactor operators

- 0745 Petroleum-refining workers
- 0749 Chemical processors and related workers, n.e.c.
- 0751 Fibre preparers
- 0752 Spinners and winders
- 0753 Weaving- and knitting-machine setters and
pattern-card preparers
- 0754 Weavers and related workers
- 0755 Knitters
- 0756 Bleachers, dyers and textile product finishers
- 0759 Spinners, weavers, knitters, dyers and related
workers, n.e.c.
- 0761 Tanners and fellmongers
- 0762 Pelt dressers
- 0771 Grain millers and related workers
- 0772 Sugar processors and refiners
- 0773 Butchers and meat preparers
- 0774 Food preservers
- 0775 Dairy product processors
- 0776 Bakers, pastrycooks and confectionery makers
- 0777 Tea, coffee and cocoa preparers
- 0778 Brewers, wine and beverage makers
- 0779 Food and beverage processors, n.e.c.
- 0781 Tobacco preparers
- 0782 Cigar makers
- 0783 Cigarette makers
- 0789 Tobacco preparers and tobacco product makers, n.e.c.
- 0791 Tailors and dressmakers
- 0792 Fur tailors and related workers
- 0793 Milliners and hatmakers
- 0794 Patternmakers and cutters
- 0795 Sewers and embroiderers
- 0796 Upholsterers and related workers
- 0799 Tailors, dressmakers, sewers, upholsterers and
related workers, n.e.c.

V746 FIRST OCCUPATION, OCCUPATIONAL MINOR GRP

Additional text not in questionnaire:

<Complete question text V745>

<If respondent is or was employed full- or part-time>

Classification of first job (ISCO 1968) according to the occupational minor group

0 Never been employed full- or part-time (code 9996 in V719), 1984 also: military/alternative community service (code 49 in V744), from 1991 also: in training (1991: code 7 in V690; 1994, 2004: code 9996 in V741); not available 1980, 1982, 1986-1990, 1992, 1996-2002, 2006-2012

104 Workers with unclassifiable or inadequately described occupation

106 1991: still in first job

109 No answer

Note:

Occupational Minor Groups

Categories 01 to 99 correspond to the minor groups of ISCO 1968 while categories 101 to 109 were created by ZUMA:

- 001 Chemists, physicists and related professions
- 002 Architects, engineers and related technicians
- 003 Architects, engineers and related technicians
- 004 Aircraft and ships' officers
- 005 Life scientists and related life science technicians
- 006 Medical, dental, veterinary and related professions
- 007 Medical, dental, veterinary and related professions
- 008 Statisticians, mathematicians, system analysts and related technicians
- 009 Economists
- 011 Accountants
- 012 Jurists
- 013 Teachers
- 014 Workers in religion
- 015 Authors, journalists, and related writers
- 016 Sculptors, painters, photographers and related creative artists
- 017 Musicians, composers, dancers and performing artists
- 018 Athletes, sportsmen and related workers
- 019 Professionals, scientists, technical and related workers not elsewhere classified
- 020 Legislative officials and government administrators
- 021 Managers
- 030 Clerical supervisors
- 031 Government executive officials
- 032 Stenographers, typists, and card- and tape-punching machine operators

- 033 Bookkeepers, cashiers and related workers
- 034 Computing machine operators
- 035 Transport and communication supervisors
- 036 Transport conductors
- 037 Mail distribution clerks
- 038 Telephone and telegraph operators
- 039 Clerical and related workers not elsewhere classified
- 040 Managers (wholesale and retail trade)
- 041 Working proprietors (wholesale and retail trade)
- 042 Sales supervisors and buyers
- 043 Technical salesman, commercial travellers and
manufacturers' agents
- 044 Insurance, real estate, securities and business
services salesman, and auctioneers
- 045 Salesmen, shop assistants and related workers
- 049 Sales workers not elsewhere classified
- 050 Managers (catering and lodging services)
- 051 Working proprietors (catering and lodging services)
- 052 Housekeeping and related service supervisors
- 053 Cooks, waiters, bartenders and related workers
- 054 Maids and related housekeeping service workers
not elsewhere classified
- 055 Building caretakers, charworkers, cleaners and
related workers
- 056 Launderers, dry-cleaners and pressers
- 057 Hairdressers, barbers, beauticians and related
workers
- 058 Protective service workers not elsewhere classified
- 059 Service workers not elsewhere classified
- 060 Farm managers and supervisors
- 061 Farmers (including specialized farmers)
- 062 Agricultural and animal husbandry workers
- 063 Forestry workers
- 064 Fishermen, hunters and related workers
- 070 Production supervisors and general foremen
- 071 Miners, quarrymen, well drillers and related workers
- 072 Metal processors
- 073 Wood preparation workers and paper makers
- 074 Chemical processors and related workers
- 075 Spinners, weavers, knitters, dyers and related
workers
- 076 Tanners, fellmongers and pelt dressers
- 077 Food and beverage processors
- 078 Tobacco preparers and tobacco product managers
- 079 Tailors, dressmakers, sewers, upholsterers and
related workers
- 080 Shoemakers and leather goods makers

- 081 Cabinetmakers and related woodworkers
- 082 Stone cutters and carvers
- 083 Blacksmiths, toolmakers and machine-tool operators
- 084 Machinery fitters, machine assemblers and precision
instrument makers (except electrical)
- 085 Electrical fitters and related electrical and
electronics workers
- 086 Broadcasting station and sound equipment operators
and cinema projectionists
- 087 Plumbers, welders, sheet metal and structural metal
preparers and erectors
- 088 Jewellery and precious metal workers
- 089 Glass formers, potters and related workers
- 090 Rubber and plastics product makers
- 091 Paper and paperboard products makers
- 092 Printers and related workers
- 093 Painters
- 094 Production and related workers not elsewhere
classified
- 095 Bricklayers, carpenters and other construction
workers
- 096 Stationary engine and related equipment operators
- 097 Material-handling and related equipment operators,
dockers and freight handlers
- 098 Transport equipment operators
- 099 Labourers not elsewhere classified

- 101 Soldiers (Armed forces)
- 102 Officers (Armed forces)

- 104 Workers with undefinable (not classifiable) and
inadequately described job

- 107 Refused
- 108 Don't know
- 109 No answer
- 000 Not applicable

V748 FIRST OCCUPATION, TREIMANPRESTIGE

Additional text not in questionnaire:

<Complete question text V745>

<If respondent is or was employed full- or part-time>

Classification of first job (ISCO 1968) according to the occupational prestige scale

0 Never been employed full- or part-time (code 9996 in V719), 1984 also: military/alternative community service (code 49 in V744), from 1991 also: in training (1991: code 7 in V690; 1994, 2004: code 9996 in V741); not available 1980, 1982, 1986-1990, 1992, 1996-2002, 2006-2012

99,6 1991: still in first job

99,9 No answer

Note:

Occupational Prestige Scale

The occupational prestige scale is based on the ISCO classification of 1968.

Respondents are assigned prestige values according to their three-digit ISCO occupational categories. If possible, undefinable and not classifiable cases (code 1004) receive prestige values according to their occupational minor group. Cases which cannot be classified according to their occupational minor group receive the average prestige value of their occupational major group. Only the following categories from the occupational major group rest defined as 'missing':

One-digit	Prestige scale	
0	0	Not applicable
97	99.7	Refused
98	99.8	Don't know
99	99.9	No answer

For further explanation see:

V750 FIRST OCCUPATION, MAGNITUDEPRESTIGE

Additional text not in questionnaire:

<Complete question text V745>

<If respondent is or was employed full- or part-time>

Classification of first job (ISCO 1968) according to the Magnitudeprestige Scale (MPS)

0 Never been employed full- or part-time (code 9996 in V719), 1984 also: military/alternative community service (code 49 in V744), from 1991 also: in training (1991: code 7 in V690; 1994, 2004: code 9996 in V741); not available 1980, 1982, 1986-1990, 1992, 1996-2002, 2006-2012

999,6 1991: still in first job

999,9 No answer

Comment:

The MPS-scores for 1984 have been newly generated.

Note:

Magnitudeprestige Scale (MPS) for ISCO 1968 and ISCO 1988

The Magnitudeprestige Scale is based on an alternative measurement of social prestige created by Bernd Wegener. Starting point is a prestige assessment without a list of pre-quoted categories, i.e. respondents were asked to give an implicit ratio estimation of the relative magnitude of prestige. The resulting MPS-scale describes a gradual mapping of social closure.

For further explanation see:

Bernd Wegener 1984:

Gibt es Sozialprestige? Konstruktion und Validität der Magnitude-Prestigeskala, ZUMA Arbeitsbericht 84/02.

Bernd Wegener 1985:

Gibt es Sozialprestige? in: Zeitschrift für Soziologie 14: 209 - 235.

V752 FIRST OCCUPATION, GOLDTHORPE CLASSES

Additional text not in questionnaire:

<If respondent is or was employed full- or part-time>

Goldthorpe class scheme:

Derived from information on respondent's first occupation

0 Not applicable or insufficient occupational information for classification in class scheme, not available 1980, 1982, 1986-1990, 1992, 1996-2002, 2006-2012

1 Higher and middle grades of the service class (higher grade professionals, administrators, officials and managers, large proprietors)

2 Lower grades of the service class

3 Non-manual employees with routine tasks (mainly clerical occupations, also sales occupations)

4 Proprietors, artisans etc. with 2-49 employees

5 Small proprietors, artisans etc. with 1 or no employees

6 Farmers (self-employed)

7 Technicians, supervisors of manual workers (foremen, master craftsmen)

8 Skilled workers

9 Unskilled and semi-skilled workers

10 Agricultural workers

11 Subdivision of class 3: Occupations without attachment to an organisational hierarchy and infrastructure. (This category was added when the class scheme was adapted to include women.)

12 From 1991: Farmer on a cooperative farm

Derivation of data:

This variable was derived from V744 and V745.

Note:

Robert Erikson and John H. Goldthorpe 1992:

The Constant Flux, Oxford: University Press.

Robert Erikson, John H. Goldthorpe, Wolfgang König, Paul Lüttinger and Walter Müller 1989:

The International Mobility Superfile (IMS) - Documentation -, CASMIN-Projekt, Mannheim. (Application of the class scheme to international data.)

John H. Goldthorpe 1980:

Social Mobility and Class Structure in Modern Britain, Oxford: Clarendon Press. (As an explanation of the theoretical background.)

The class scheme by Goldthorpe groups individuals on the basis of their occupational position (reference number) and their occupational function (using ISCO 1968). By combining these two variables, 12 different class categories are then constituted.

In contrast to an 'hierarchical' scale, based for instance on prestige and status, the Goldthorpe index is rather oriented towards a nominal concept of class structure. This makes it especially useful in analyzing, for example, the development of industrial societies into service societies, because the categories of the Goldthorpe class scheme allow a more precise analysis and description of the growth or decline of different parts of the middle classes or of various groups of dependent employees and civil servants than scales which consist of horizontally differentiated ordinal status or prestige measures.

Moreover, the Goldthorpe class scheme in its present form is especially suitable for internationally comparative analyses (e.g. analyses of social mobility).

V753 FIRST OCCUPATION, ISCO 1988

Additional text not in questionnaire:

<Complete question text V745>

<If respondent is or was employed full- or part-time>

Classification of first occupation according to ISCO 1988

0 Never been employed full- or part-time (code 9996 in V719, code 9996 in V741); 2010: no participation in ISSP

'Social Inequality'; not available 1980-1992, 1996-2002, 2006-2008, 2012

10004 Workers with unclassifiable or inadequately described occupation

10009 No answer

Comment:

Since 1986, the ALLBUS-interview has usually been accompanied by a self-completion questionnaire for the German ISSP-survey (International Social Survey Programme (ISSP)). As a rule the ISSP-questions are not included in this cumulative data set. However, the ISCO 1988 scores documented here have been part of the ALLBUS-interview before 2010. As an exception to the rule, the relevant ISSP-data from 2010 was therefore included in this data set.

The exact wording of the 2010 ISSP-question differs slightly from the question used in ALLBUS. The ISSP-source questionnaire formulates the question like this:

"In this first job, what was your main occupation?

Describe fully, using two words or more (do not use initials or abbreviations).

Note:

International Standard Classification of Occupations (ISCO 1988)

Source:

International Labour Office (ed.) 1990:

International Standard Classification of Occupations. ISCO-88, Genf.

The categories of the open question on occupations were coded by ZUMA based on the official German translation of the source cited above, which was provided by the 'Federal Statistical Office' (Statistisches Bundesamt). Some new Codes, marked '*' in this documentation, were added when ISCO-88 was introduced with ALLBUS 1992. All codes in the data file are in a four digit format. Where necessary, leading zeros were added.

1 Legislators, senior officials and managers in private industry, enterprise and business

Remarks:

(*) new codes added by ZUMA

(1) This occupational group is intended to cover persons who, as directors, chief executives or department managers, manage enterprises, organizations or departments, requiring a total of three or more managers.

(2) This occupational group is intended to include persons who, either on their own behalf or on behalf of the proprietor, manage enterprises or in some cases organizations with the help of non-managerial staff and no more than one other senior staff, who should also be classified in this sub-major group, because this person's responsibilities will usually be more varied than those of a department manager in a larger enterprise or organization. Non-managerial staff should be classified according to their specific tasks.

(3) This code was introduced to supplement the existing ISCO-classification. It was taken from the European Community variant of the classification called ISCO 88 (COM).

Occupational position: Metaclassification according to Pappi

Independent farmers with farmland of:

- 10 Less than 10 hectares
- 11 10 ha - less than 20 ha
- 12 20 ha - to less than 50 ha (1980: 20 ha and over)
- 13 From 1982: 50 ha and over

Independent professionals (e.g. doctor in private practice, lawyer)

- 15 1 employee or none
- 16 2-9 employees
- 17 10 or more employees

Self-employed in trade or craft, industry, service sector etc.

- 21 1 employee or none
- 22 2-9 employees
- 23 10-49 employees (1980: 10 or more employees)
- 24 From 1982: 50 or more employees

Family member assisting in family business

- 30 Family member assisting in family business

Civil servants/judges/professional soldiers

- 40 Civil servants carrying out simple administrative duties
- 41 Civil servants carrying out middle level administrative duties
- 42 Civil servants carrying out senior administrative duties
- 43 Civil servants carrying out executive duties, judges

Military/alternative community service

- 49 Until 1986: Military/alternative community service

Employees

- 50 Plant foreman with employee status
- 51 Employee with simple duties (e.g. salesperson, clerk, typist)
- 52 Employee under loose supervision carrying out complex tasks independently (e.g. senior clerical staff, book-keeper, draughtsman)
- 53 Employee carrying out responsible tasks independently or with limited responsibility for others (e.g. researcher, manager, head of department)
- 54 Employee with wide managerial responsibilities and decision making powers (e.g. head of organisation/association, managing director, executive of large firm or organisation)

Workers

- 60 Unskilled worker
- 61 Semi-skilled worker
- 62 Skilled worker
- 63 Foreman
- 64 Master (crafts- and tradesman), site foreman

Farmer on a cooperative farm

- 65 From 1991: Farmer on a cooperative farm <"Genossenschaftsbauer," 1991 only for respondents from the new federal states>

In vocational training

- 70 Trainee in commercial/administrative sector
- 71 Trainee in trades/crafts sector
- 72 Trainee in domestic/agricultural sector
- 73 Civil servant trainee
- 74 Trainee on short-term work placement/internship

- 0 Not available 1994-2012

- 96 All individuals relevant for classification without occupational data (= not classifiable)

Note:

Metaclassification of Occupations

For those respondents who are not in the labor force, the metaclassification of occupations allows an indirect occupational classification, e.g. according to the profession or occupation of the respondent's spouse or father. Thus, the purpose of the metaclassification is to arrive at a description of the social circumstance and social positions of otherwise unclassifiable respondents by (indirectly) linking them to positions in the occupational system in a principled way.

For further explanation see:

Pappi, Franz Urban 1979:

Sozialstrukturanalysen mit Umfragedaten. Probleme der standardisierten Erfassung von Hintergrundmerkmalen in allgemeinen Bevölkerungsumfragen, Königstein/Ts.: Athenäum.

Based on the criteria suggested by Pappi, a first meta-classification of occupations was constructed for ALLBUS. The corresponding data can be found in V754 to V762.

The metaclassification was constructed as follows:

- 1) All men and unmarried women were, as far as possible, assigned their own current or previous occupation.
- 2) Women who were married, widowed or divorced were assigned their <ex->spouse's current or previous occupation, even if they had an occupation of their own.

3) School or university students who had never been working full- or part-time were classified according to their fathers' occupation.

4) If rule 1) and 2) do not allow a classification, because of missing information, the respondent is classified according to the occupation of the father.

5) Respondents in military/alternative community service were not regarded as being in full- or part-time employment. Instead they were classified according to their previous occupation (men and unmarried women who had previously been working), according to their spouse's occupation (married or widowed women whose husband was or had been working) or according to their father's occupation.

No occupational metaclassification is possible if one of the relevant sources of occupational data is missing (inadequate description of occupation, refused, don't know or no answer) or if all relevant sources of occupational data register as code 0 'Not applicable'.

Construction of the metaclassification according to Pappi was discontinued with ALLBUS 1994 because the data on the last occupation of spouses who are not working and the data on the occupation of ex-spouses is no longer part of the ALLBUS- demography.

Pappi himself points out that there is probably more than one way of constructing a metaclassification of occupations (Pappi 1979: 297). As an alternative to Pappi's rather male-centered operationalization (e.g. married women are classified according to their husbands' occupation), Michael Terwey has developed a modified metaclassification scheme that gives more weight to women's direct social position (V763-V782). This more recent classification thus takes into account that in contemporary society it is more and more the individual's personal circumstance rather than his or her family's social capital that determines social position.

The construction of Terwey's metaclassification proceeds in the following steps:

1) All respondents who are employed full-time or part-time are classified according to their own current occupation.

2) All respondents who were formerly employed full-time or part-time are categorized according to their last occupational status.

3) Only those married women and men who themselves have never been employed before are classified according to their spouses' occupation. If the spouse is a pupil/student, a housewife/househusband or doing compulsory military/alternative community service, classification is based on the father's occupation. For former ALLBUS-surveys the spouse's last occupation was used for categorization if the spouse was retired, unemployed or out of work for other reasons. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.

4) In previous ALLBUS-surveys, respondents who were widowed, divorced or living in separation and who had never been employed themselves, were categorized according to their previous spouse's occupation. As this

information is not available since ALLBUS 1994, these cases are coded as not classifiable.

5) All unmarried respondents who have never been employed themselves are categorized using their father's occupation.

6) Insofar as they cannot be considered full-time or part-time employed in the sense of this metaclassification, respondents in compulsory military or alternative community service and those in vocational training represent a general exception. For these and for all other respondents who have no identifiable main occupation, the nearest possible occupational position is used. Married respondents in this group are, for example, categorized according to their spouses' current occupation or, if this is impossible, according to their fathers' occupation.

If a missing value ('Refused', 'Don't know' or 'No answer') appears within an occupation code relevant for metaclassification or if, for any other reason, occupational information does not permit a metaclassification according to a main occupation, the case is also coded as not classifiable.

V755 ISCO 1968, METAClassification <PAPPI>

Additional text not in questionnaire:

Metaclassification of occupations according to Pappi, ISCO 1968

0 Not classifiable in the classification scheme; not available 1994-2012

1004 Workers with unclassifiable or inadequately described occupations

Note:

Metaclassification of Occupations

For those respondents who are not in the labor force, the metaclassification of occupations allows an indirect occupational classification, e.g. according to the profession or occupation of the respondent's spouse or father. Thus, the purpose of the metaclassification is to arrive at a description of the social circumstance and social positions of otherwise unclassifiable respondents by (indirectly) linking them to positions in the occupational system in a principled way.

For further explanation see:

Pappi, Franz Urban 1979:

Sozialstrukturanalysen mit Umfragedaten. Probleme der standardisierten Erfassung von Hintergrundmerkmalen in allgemeinen Bevölkerungsumfragen, Königstein/Ts.: Athenäum.

Based on the criteria suggested by Pappi, a first meta-classification of occupations was constructed for ALLBUS.

The corresponding data can be found in V754 to V762.

The metaclassification was constructed as follows:

- 1) All men and unmarried women were, as far as possible, assigned their own current or previous occupation.
- 2) Women who were married, widowed or divorced were assigned their <ex->spouse's current or previous occupation, even if they had an occupation of their own.
- 3) School or university students who had never been working full- or part-time were classified according to their fathers' occupation.
- 4) If rule 1) and 2) do not allow a classification, because of missing information, the respondent is classified according to the occupation of the father.
- 5) Respondents in military/alternative community service were not regarded as being in full- or part-time employment. Instead they were classified according to their previous occupation (men and unmarried women who had previously been working), according to their spouse's occupation (married or widowed women whose husband was or had been working) or according to their father's occupation.

No occupational metaclassification is possible if one of the relevant sources of occupational data is missing (inadequate description of occupation, refused, don't know or no answer) or if all relevant sources of occupational data register as code 0 'Not applicable'.

Construction of the metaclassification according to Pappi was discontinued with ALLBUS 1994 because the data on the last occupation of spouses who are not working and the data on the occupation of ex-spouses is no longer part of the ALLBUS- demography.

Pappi himself points out that there is probably more than one way of constructing a metaclassification of occupations (Pappi 1979: 297). As an alternative to Pappi's rather male-centered operationalization (e.g. married women are classified according to their husbands' occupation), Michael Terwey has developed a modified metaclassification scheme that gives more weight to women's direct social position (V763-V782). This more recent classification thus takes into account that in contemporary society it is more and more the individual's personal circumstance rather than his or her family's social capital that determines social position.

The construction of Terwey's metaclassification proceeds in the following steps:

- 1) All respondents who are employed full-time or part-time are classified according to their own current occupation.
- 2) All respondents who were formerly employed full-time or part-time are categorized according to their last occupational status.
- 3) Only those married women and men who themselves have never been employed before are classified according to their spouses' occupation. If the spouse is a pupil/student, a housewife/househusband or doing compulsory military/alternative community service, classification is based on the father's occupation. For former ALLBUS-surveys the spouse's last occupation was used for categorization if the spouse was retired, unemployed or out of work for other reasons. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 4) In previous ALLBUS-surveys, respondents who were widowed, divorced or living in separation and who had never been employed themselves, were categorized according to their previous spouse's occupation. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 5) All unmarried respondents who have never been employed themselves are categorized using their father's occupation.
- 6) Insofar as they cannot be considered full-time or part-time employed in the sense of this metaclassification, respondents in compulsory military or alternative community service and those in vocational training represent a general exception. For these and for all other respondents who have no identifiable main occupation, the nearest possible occupational position is used. Married respondents in this group are, for example, categorized according to their spouses' current occupation or, if this is impossible, according to their fathers' occupation.

If a missing value ('Refused', 'Don't know' or 'No answer') appears within an occupation code relevant for

metaclassification or if, for any other reason, occupational information does not permit a metaclassification according to a main occupation, the case is also coded as not classifiable.

0551 Building caretakers (general)
0552 Charworkers, cleaners and related workers
0560 Launderers, dry cleaners and pressers
0570 Hairdressers, barbers, beauticians and related workers
0581 Fire fighters
0582 Policemen and detectives
0589 Protective service workers, n.e.c.
0591 Guides
0592 Undertakers and embalmers
0599 Other service workers. n.e.c.

Agricultural, animal husbandry and forestry workers, fishermen and hunters

0600 Farm managers and supervisors
0610 Farm manager or director
0611 General farmers
0612 Specialised farmers
0621 General farm workers (including cooperative farmers)
0622 Field crop and vegetable farm workers
0623 Orchard, vineyard and related tree and shrub crop
workers
0624 Livestock workers
0625 Dairy farm workers
0626 Poultry farm workers

0627 Nursery workers and gardeners
0628 Farm machinery operators
0629 Agricultural and animal husbandry workers, n.e.c.
0631 Loggers
0632 Forestry workers (except logging)
0641 Fishermen
0649 Fishermen, hunters and related workers, n.e.c.

Production and related workers, transport equipment operators
and labourers

0700 Production supervisors and general foremen
0711 Miners and quarrymen
0712 Mineral and stone treaters
0713 Well drillers, borers and related workers
0721 Metal smelting, converting and refining furnacemen
0722 Metal rolling-mill workers
0723 Metal melters and reheaters
0724 Metal casters
0725 Metal moulders and coremakers
0726 Metal annealers, temperers and case-hardeners
0727 Metal drawers and extruders
0728 Metal platers and coaters
0729 Metal processors, n.e.c.
0731 Wood treaters
0732 Sawyers, plywood makers and related wood-processing
workers
0733 Paper pulp preparers
0734 Paper makers
0741 Crushers, grinders and mixers
0742 Cookers, roasters and related heat-treaters
0743 Filter and separator operators
0744 Still and reactor operators
0745 Petroleum-refining workers
0749 Chemical processors and related workers, n.e.c.
0751 Fibre preparers
0752 Spinners and winders
0753 Weaving- and knitting-machine setters and
pattern-card preparers
0754 Weavers and related workers
0755 Knitters
0756 Bleachers, dyers and textile product finishers
0759 Spinners, weavers, knitters, dyers and related
workers, n.e.c.
0761 Tanners and fellmongers
0762 Pelt dressers
0771 Grain millers and related workers

V756 OCCUPATIONAL MINOR GROUP,METACL. <PAPPI>

Additional text not in questionnaire:

Metaclassification of occupation according to Pappi, occupational minor group

0 Not classifiable in the classification scheme, not available 1994-2012

104 Workers with unclassifiable or inadequately described occupation

Note:

Metaclassification of Occupations

For those respondents who are not in the labor force, the metaclassification of occupations allows an indirect occupational classification, e.g. according to the profession or occupation of the respondent's spouse or father. Thus, the purpose of the metaclassification is to arrive at a description of the social circumstance and social positions of otherwise unclassifiable respondents by (indirectly) linking them to positions in the occupational system in a principled way.

For further explanation see:

Pappi, Franz Urban 1979:

Sozialstrukturanalysen mit Umfragedaten. Probleme der standardisierten Erfassung von Hintergrundmerkmalen in allgemeinen Bevölkerungsumfragen, Königstein/Ts.: Athenäum.

Based on the criteria suggested by Pappi, a first meta-classification of occupations was constructed for ALLBUS.

The corresponding data can be found in V754 to V762.

The metaclassification was constructed as follows:

- 1) All men and unmarried women were, as far as possible, assigned their own current or previous occupation.
- 2) Women who were married, widowed or divorced were assigned their <ex->spouse's current or previous occupation, even if they had an occupation of their own.
- 3) School or university students who had never been working full- or part-time were classified according to their fathers' occupation.
- 4) If rule 1) and 2) do not allow a classification, because of missing information, the respondent is classified according to the occupation of the father.
- 5) Respondents in military/alternative community service were not regarded as being in full- or part-time employment. Instead they were classified according to their previous occupation (men and unmarried women who had previously been working), according to their spouse's occupation (married or widowed women whose husband was or had been working) or according to their father's occupation.

No occupational metaclassification is possible if one of the relevant sources of occupational data is missing (inadequate description of occupation, refused, don't know or no answer) or if all relevant sources of occupational data register as code 0 'Not applicable'.

Construction of the metaclassification according to Pappi was discontinued with ALLBUS 1994 because the data on the last occupation of spouses who are not working and the data on the occupation of ex-spouses is no longer part of the ALLBUS- demography.

Pappi himself points out that there is probably more than one way of constructing a metaclassification of occupations (Pappi 1979: 297). As an alternative to Pappi's rather male-centered operationalization (e.g. married women are classified according to their husbands' occupation), Michael Terwey has developed a modified metaclassification scheme that gives more weight to women's direct social position (V763-V782). This more recent classification thus takes into account that in contemporary society it is more and more the individual's personal circumstance rather than his or her family's social capital that determines social position.

The construction of Terwey's metaclassification proceeds in the following steps:

- 1) All respondents who are employed full-time or part-time are classified according to their own current occupation.
- 2) All respondents who were formerly employed full-time or part-time are categorized according to their last occupational status.
- 3) Only those married women and men who themselves have never been employed before are classified according to their spouses' occupation. If the spouse is a pupil/student, a housewife/househusband or doing compulsory military/alternative community service, classification is based on the father's occupation. For former ALLBUS-surveys the spouse's last occupation was used for categorization if the spouse was retired, unemployed or out of work for other reasons. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 4) In previous ALLBUS-surveys, respondents who were widowed, divorced or living in separation and who had never been employed themselves, were categorized according to their previous spouse's occupation. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 5) All unmarried respondents who have never been employed themselves are categorized using their father's occupation.
- 6) Insofar as they cannot be considered full-time or part-time employed in the sense of this metaclassification, respondents in compulsory military or alternative community service and those in vocational training represent a general exception. For these and for all other respondents who have no identifiable main occupation, the nearest possible occupational position is used. Married respondents in this group are, for example, categorized according to their spouses' current occupation or, if this is impossible, according to their fathers' occupation.

If a missing value ('Refused', 'Don't know' or 'No answer') appears within an occupation code relevant for

metaclassification or if, for any other reason, occupational information does not permit a metaclassification according to a main occupation, the case is also coded as not classifiable.

Occupational Minor Groups

Categories 01 to 99 correspond to the minor groups of ISCO 1968 while categories 101 to 109 were created by ZUMA:

- 001 Chemists, physicists and related professions
- 002 Architects, engineers and related technicians
- 003 Architects, engineers and related technicians
- 004 Aircraft and ships' officers
- 005 Life scientists and related life science technicians
- 006 Medical, dental, veterinary and related professions
- 007 Medical, dental, veterinary and related professions
- 008 Statisticians, mathematicians, system analysts and
related technicians
- 009 Economists
- 011 Accountants
- 012 Jurists
- 013 Teachers
- 014 Workers in religion
- 015 Authors, journalists, and related writers
- 016 Sculptors, painters, photographers and related
creative artists
- 017 Musicians, composers, dancers and performing artists
- 018 Athletes, sportsmen and related workers
- 019 Professionals, scientists, technical and related
workers not elsewhere classified
- 020 Legislative officials and government administrators
- 021 Managers
- 030 Clerical supervisors
- 031 Government executive officials
- 032 Stenographers, typists, and card- and tape-punching
machine operators
- 033 Bookkeepers, cashiers and related workers
- 034 Computing machine operators
- 035 Transport and communication supervisors
- 036 Transport conductors
- 037 Mail distribution clerks
- 038 Telephone and telegraph operators
- 039 Clerical and related workers not elsewhere classified
- 040 Managers (wholesale and retail trade)
- 041 Working proprietors (wholesale and retail trade)
- 042 Sales supervisors and buyers

- 043 Technical salesman, commercial travellers and
manufacturers' agents
- 044 Insurance, real estate, securities and business
services salesman, and auctioneers
- 045 Salesmen, shop assistants and related workers
- 049 Sales workers not elsewhere classified
- 050 Managers (catering and lodging services)
- 051 Working proprietors (catering and lodging services)
- 052 Housekeeping and related service supervisors
- 053 Cooks, waiters, bartenders and related workers
- 054 Maids and related housekeeping service workers
not elsewhere classified
- 055 Building caretakers, charworkers, cleaners and
related workers
- 056 Launderers, dry-cleaners and pressers
- 057 Hairdressers, barbers, beauticians and related
workers
- 058 Protective service workers not elsewhere classified
- 059 Service workers not elsewhere classified
- 060 Farm managers and supervisors
- 061 Farmers (including specialized farmers)
- 062 Agricultural and animal husbandry workers
- 063 Forestry workers
- 064 Fishermen, hunters and related workers
- 070 Production supervisors and general foremen
- 071 Miners, quarrymen, well drillers and related workers
- 072 Metal processors
- 073 Wood preparation workers and paper makers

- 8 Others

Note:

Metaclassification of Occupations

For those respondents who are not in the labor force, the metaclassification of occupations allows an indirect occupational classification, e.g. according to the profession or occupation of the respondent's spouse or father. Thus, the purpose of the metaclassification is to arrive at a description of the social circumstance and social positions of otherwise unclassifiable respondents by (indirectly) linking them to positions in the occupational system in a principled way.

For further explanation see:

Pappi, Franz Urban 1979:

Sozialstrukturanalysen mit Umfragedaten. Probleme der standardisierten Erfassung von Hintergrundsmerkmalen in allgemeinen Bevölkerungsumfragen, Königstein/Ts.: Athenäum.

Based on the criteria suggested by Pappi, a first meta-classification of occupations was constructed for ALLBUS. The corresponding data can be found in V754 to V762.

The metaclassification was constructed as follows:

- 1) All men and unmarried women were, as far as possible, assigned their own current or previous occupation.
- 2) Women who were married, widowed or divorced were assigned their <ex->spouse's current or previous occupation, even if they had an occupation of their own.
- 3) School or university students who had never been working full- or part-time were classified according to their fathers' occupation.
- 4) If rule 1) and 2) do not allow a classification, because of missing information, the respondent is classified

according to the occupation of the father.

5) Respondents in military/alternative community service were not regarded as being in full- or part-time employment. Instead they were classified according to their previous occupation (men and unmarried women who had previously been working), according to their spouse's occupation (married or widowed women whose husband was or had been working) or according to their father's occupation.

No occupational metaclassification is possible if one of the relevant sources of occupational data is missing (inadequate description of occupation, refused, don't know or no answer) or if all relevant sources of occupational data register as code 0 'Not applicable'.

Construction of the metaclassification according to Pappi was discontinued with ALLBUS 1994 because the data on the last occupation of spouses who are not working and the data on the occupation of ex-spouses is no longer part of the ALLBUS- demography.

Pappi himself points out that there is probably more than one way of constructing a metaclassification of occupations (Pappi 1979: 297). As an alternative to Pappi's rather male-centered operationalization (e.g. married women are classified according to their husbands' occupation), Michael Terwey has developed a modified metaclassification scheme that gives more weight to women's direct social position (V763-V782). This more recent classification thus takes into account that in contemporary society it is more and more the individual's personal circumstance rather than his or her family's social capital that determines social position.

The construction of Terwey's metaclassification proceeds in the following steps:

1) All respondents who are employed full-time or part-time are classified according to their own current occupation.

2) All respondents who were formerly employed full-time or part-time are categorized according to their last occupational status.

3) Only those married women and men who themselves have never been employed before are classified according to their spouses' occupation. If the spouse is a pupil/student, a housewife/househusband or doing compulsory military/alternative community service, classification is based on the father's occupation. For former ALLBUS-surveys the spouse's last occupation was used for categorization if the spouse was retired, unemployed or out of work for other reasons. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.

4) In previous ALLBUS-surveys, respondents who were widowed, divorced or living in separation and who had never been employed themselves, were categorized according to their previous spouse's occupation. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.

5) All unmarried respondents who have never been employed themselves are categorized using their father's occupation.

6) Insofar as they cannot be considered full-time or part-time employed in the sense of this metaclassification, respondents in compulsory military or alternative community service and those in vocational training represent a general exception. For these and for all other respondents who have no identifiable main occupation, the nearest possible occupational position is used. Married respondents in this group are, for example, categorized according to their spouses' current occupation or, if this is impossible, according to their fathers' occupation.

If a missing value ('Refused', 'Don't know' or 'No answer') appears within an occupation code relevant for metaclassification or if, for any other reason, occupational information does not permit a metaclassification according to a main occupation, the case is also coded as not classifiable.

V758 TREIMANPRESTIGE, METAClassificat.<PAPPI>

Additional text not in questionnaire:

Metaclassification of occupation according to Pappi, occupational prestige scale

0 Not classifiable in the classification scheme, not available 1994-2012

Note:

Metaclassification of Occupations

For those respondents who are not in the labor force, the metaclassification of occupations allows an indirect occupational classification, e.g. according to the profession or occupation of the respondent's spouse or father. Thus, the purpose of the metaclassification is to arrive at a description of the social circumstance and social positions of otherwise unclassifiable respondents by (indirectly) linking them to positions in the occupational system in a principled way.

For further explanation see:

Pappi, Franz Urban 1979:

Sozialstrukturanalysen mit Umfragedaten. Probleme der standardisierten Erfassung von Hintergrundsmerkmalen in allgemeinen Bevölkerungsumfragen, Königstein/Ts.: Athenäum.

Based on the criteria suggested by Pappi, a first meta-classification of occupations was constructed for ALLBUS. The corresponding data can be found in V754 to V762.

The metaclassification was constructed as follows:

- 1) All men and unmarried women were, as far as possible, assigned their own current or previous occupation.
- 2) Women who were married, widowed or divorced were assigned their <ex->spouse's current or previous occupation, even if they had an occupation of their own.
- 3) School or university students who had never been working full- or part-time were classified according to their fathers' occupation.
- 4) If rule 1) and 2) do not allow a classification, because of missing information, the respondent is classified according to the occupation of the father.
- 5) Respondents in military/alternative community service were not regarded as being in full- or part-time employment. Instead they were classified according to their previous occupation (men and unmarried women who had previously been working), according to their spouse's occupation (married or widowed women whose husband was or had been working) or according to their father's occupation.

No occupational metaclassification is possible if one of the relevant sources of occupational data is missing (inadequate description of occupation, refused, don't know or no answer) or if all relevant sources of occupational data register as code 0 'Not applicable'.

Construction of the metaclassification according to Pappi was discontinued with ALLBUS 1994 because the data on the last occupation of spouses who are not working and the data on the occupation of ex-spouses is no longer part of the ALLBUS- demography.

Pappi himself points out that there is probably more than one way of constructing a metaclassification of occupations (Pappi 1979: 297). As an alternative to Pappi's rather male-centered operationalization (e.g. married women are classified according to their husbands' occupation), Michael Terwey has developed a modified metaclassification scheme that gives more weight to women's direct social position (V763-V782). This more recent classification thus takes into account that in contemporary society it is more and more the individual's personal circumstance rather than his or her family's social capital that determines social position.

The construction of Terwey's metaclassification proceeds in the following steps:

- 1) All respondents who are employed full-time or part-time are classified according to their own current occupation.
- 2) All respondents who were formerly employed full-time or part-time are categorized according to their last occupational status.
- 3) Only those married women and men who themselves have never been employed before are classified according to their spouses' occupation. If the spouse is a pupil/student, a housewife/househusband or doing compulsory military/alternative community service, classification is based on the father's occupation. For former ALLBUS-surveys the spouse's last occupation was used for categorization if the spouse was retired, unemployed or out of work for other reasons. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 4) In previous ALLBUS-surveys, respondents who were widowed, divorced or living in separation and who had never been employed themselves, were categorized according to their previous spouse's occupation. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 5) All unmarried respondents who have never been employed themselves are categorized using their father's occupation.
- 6) Insofar as they cannot be considered full-time or part-time employed in the sense of this metaclassification, respondents in compulsory military or alternative community service and those in vocational training represent a general exception. For these and for all other respondents who have no identifiable main occupation, the nearest possible occupational position is used. Married respondents in this group are, for example, categorized according to their spouses' current occupation or, if this is impossible, according to their fathers' occupation.

If a missing value ('Refused', 'Don't know' or 'No answer') appears within an occupation code relevant for metaclassification or if, for any other reason, occupational information does not permit a metaclassification according

to a main occupation, the case is also coded as not classifiable.

Occupational Prestige Scale

The occupational prestige scale is based on the ISCO classification of 1968.

Respondents are assigned prestige values according to their three-digit ISCO occupational categories. If possible, undefinable and not classifiable cases (code 1004) receive prestige values according to their occupational minor group. Cases which cannot be classified according to their occupational minor group receive the average prestige value of their occupational major group. Only the following categories from the occupational major group rest defined as 'missing':

One-digit	Prestige scale	
0	0	Not applicable
97	99.7	Refused
98	99.8	Don't know
99	99.9	No answer

For these and for all other respondents who have no identifiable main occupation, the nearest possible occupational position is used. Married respondents in this group are, for example, categorized according to their spouses' current occupation or, if this is impossible, according to their fathers' occupation.

If a missing value ('Refused', 'Don't know' or 'No answer') appears within an occupation code relevant for metaclassification or if, for any other reason, occupational information does not permit a metaclassification according

to a main occupation, the case is also coded as not classifiable.

Magnitudeprestige Scale (MPS) for ISCO 1968 and ISCO 1988

The Magnitudeprestige Scale is based on an alternative measurement of social prestige created by Bernd Wegener. Starting point is a prestige assessment without a list of pre-quoted categories, i.e. respondents were asked to give an implicit ratio estimation of the relative magnitude of prestige. The resulting MPS-scale describes a gradual mapping of social closure.

For further explanation see:

Bernd Wegener 1984:

Gibt es Sozialprestige? Konstruktion und Validität der Magnitude-Prestigeskala, ZUMA Arbeitsbericht 84/02.

Bernd Wegener 1985:

Gibt es Sozialprestige? in: Zeitschrift für Soziologie 14: 209 - 235.

V762 GOLDTHORPE CLASSES, METAClassif. <PAPPI>

Additional text not in questionnaire:

Metaclassification of occupation according to Pappi, Goldthorpe Class Scheme

- 0 All individuals relevant for classification without occupational data, not available 1994-2012
- 1 Higher and middle grades of the service class (higher grade professionals, administrators, officials and managers, large proprietors)
- 2 Lower grades of the service class
- 3 Non-manual employees with routine tasks (mainly clerical occupations, also sales occupations)
- 4 Proprietors, artisans etc. with 2-49 employees
- 5 Small proprietors, artisans etc. with 1 or no employees
- 6 Farmers (self-employed)
- 7 Technicians, supervisors of manual workers (foremen, master craftsmen)
- 8 Skilled workers
- 9 Unskilled and semi-skilled workers
- 10 Agricultural workers
- 11 Subdivision of class 3: Occupations without attachment to an organisational hierarchy and infrastructure. (This category was added when the class scheme was adapted to include women.)
- 12 From 1991: Farmer on a cooperative farm

Derivation of data:

This variable was derived from V754 and V755.

Note:

Metaclassification of Occupations

For those respondents who are not in the labor force, the metaclassification of occupations allows an indirect occupational classification, e.g. according to the profession or occupation of the respondent's spouse or father. Thus, the purpose of the metaclassification is to arrive at a description of the social circumstance and social positions of otherwise unclassifiable respondents by (indirectly) linking them to positions in the occupational system in a principled way.

For further explanation see:

Pappi, Franz Urban 1979:

Sozialstrukturanalysen mit Umfragedaten. Probleme der standardisierten Erfassung von Hintergrundmerkmalen in allgemeinen Bevölkerungsumfragen, Königstein/Ts.: Athenäum.

Based on the criteria suggested by Pappi, a first meta-classification of occupations was constructed for ALLBUS.

The corresponding data can be found in V754 to V762.

The metaclassification was constructed as follows:

- 1) All men and unmarried women were, as far as possible, assigned their own current or previous occupation.
- 2) Women who were married, widowed or divorced were assigned their <ex->spouse's current or previous occupation, even if they had an occupation of their own.
- 3) School or university students who had never been working full- or part-time were classified according to their fathers' occupation.
- 4) If rule 1) and 2) do not allow a classification, because of missing information, the respondent is classified according to the occupation of the father.
- 5) Respondents in military/alternative community service were not regarded as being in full- or part-time employment. Instead they were classified according to their previous occupation (men and unmarried women who had previously been working), according to their spouse's occupation (married or widowed women whose husband was or had been working) or according to their father's occupation.

No occupational metaclassification is possible if one of the relevant sources of occupational data is missing (inadequate description of occupation, refused, don't know or no answer) or if all relevant sources of occupational data register as code 0 'Not applicable'.

Construction of the metaclassification according to Pappi was discontinued with ALLBUS 1994 because the data on the last occupation of spouses who are not working and the data on the occupation of ex-spouses is no longer part of the ALLBUS- demography.

Pappi himself points out that there is probably more than one way of constructing a metaclassification of occupations (Pappi 1979: 297). As an alternative to Pappi's rather male-centered operationalization (e.g. married women are classified according to their husbands' occupation), Michael Terwey has developed a modified metaclassification scheme that gives more weight to women's direct social position (V763-V782). This more recent classification thus takes into account that in contemporary society it is more and more the individual's personal circumstance rather than his or her family's social capital that determines social position.

The construction of Terwey's metaclassification proceeds in the following steps:

- 1) All respondents who are employed full-time or part-time are classified according to their own current occupation.
- 2) All respondents who were formerly employed full-time or part-time are categorized according to their last occupational status.
- 3) Only those married women and men who themselves have never been employed before are classified according to their spouses' occupation. If the spouse is a pupil/student, a housewife/househusband or doing compulsory military/alternative community service, classification is based on the father's occupation. For former ALLBUS-surveys the spouse's last occupation was used for categorization if the spouse was retired, unemployed or out of work for other reasons. As this information is not available since ALLBUS 1994, these cases are coded as not

classifiable.

4) In previous ALLBUS-surveys, respondents who were widowed, divorced or living in separation and who had never been employed themselves, were categorized according to their previous spouse's occupation. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.

5) All unmarried respondents who have never been employed themselves are categorized using their father's occupation.

6) Insofar as they cannot be considered full-time or part-time employed in the sense of this metaclassification, respondents in compulsory military or alternative community service and those in vocational training represent a general exception. For these and for all other respondents who have no identifiable main occupation, the nearest possible occupational position is used. Married respondents in this group are, for example, categorized according to their spouses' current occupation or, if this is impossible, according to their fathers' occupation.

If a missing value ('Refused', 'Don't know' or 'No answer') appears within an occupation code relevant for metaclassification or if, for any other reason, occupational information does not permit a metaclassification according to a main occupation, the case is also coded as not classifiable.

The Goldthorpe Class Scheme

For further information see:

Petra Beckmann and Reiner Trometer 1991:

Neue Dienstleistungen des ALLBUS: Haushalts- und Familientypologien, Klassenschema nach Goldthorpe, in: ZUMA-Nachrichten 28: 7 - 17.

Robert Erikson and John H. Goldthorpe 1992:

The Constant Flux, Oxford: University Press.

Robert Erikson, John H. Goldthorpe, Wolfgang König, Paul Lüttinger and Walter Müller 1989:

The International Mobility Superfile (IMS) - Documentation -, CASMIN-Projekt, Mannheim. (Application of the class scheme to international data.)

John H. Goldthorpe 1980:

Social Mobility and Class Structure in Modern Britain, Oxford: Clarendon Press. (As an explanation of the theoretical background.)

The class scheme by Goldthorpe groups individuals on the basis of their occupational position (reference number) and their occupational function (using ISCO 1968). By combining these two variables, 12 different class categories are then constituted.

In contrast to an 'hierarchical' scale, based for instance on prestige and status, the Goldthorpe index is rather oriented towards a nominal concept of class structure. This makes it especially useful in analyzing, for example, the development of industrial societies into service societies, because the categories of the Goldthorpe class scheme

allow a more precise analysis and description of the growth or decline of different parts of the middle classes or of various groups of dependent employees and civil servants than scales which consist of horizontally differentiated ordinal status or prestige measures.

Moreover, the Goldthorpe class scheme in its present form is especially suitable for internationally comparative analyses (e.g. analyses of social mobility).

V763 OCCUPATION, METAClassification <TERWEY>

Additional text not in questionnaire:

Occupational position: Metaclassification according to Terwey

- 0 Not available 1980-2000
- 1 Independent farmer
- 2 Independent professional
- 3 Self-employed in trade or craft, industry, service sector, etc.
- 4 Civil servants/judges/professional soldiers
- 5 Employees
- 6 Workers
- 8 Family member assisting in family business
- 9 Farmer on a cooperative farm
- 96 All individuals relevant for classification without occupational data (= not classifiable)

Comment:

This simple classification was reconstructed using the more differentiated reference numbers in V764.

Note:

Metaclassification of Occupations

For those respondents who are not in the labor force, the metaclassification of occupations allows an indirect occupational classification, e.g. according to the profession or occupation of the respondent's spouse or father. Thus, the purpose of the metaclassification is to arrive at a description of the social circumstance and social positions of otherwise unclassifiable respondents by (indirectly) linking them to positions in the occupational system in a principled way.

For further explanation see:

Pappi, Franz Urban 1979:

Sozialstrukturanalysen mit Umfragedaten. Probleme der standardisierten Erfassung von Hintergrundmerkmalen in allgemeinen Bevölkerungsumfragen, Königstein/Ts.: Athenäum.

Based on the criteria suggested by Pappi, a first meta-classification of occupations was constructed for ALLBUS.

The corresponding data can be found in V754 to V762.

The metaclassification was constructed as follows:

- 1) All men and unmarried women were, as far as possible, assigned their own current or previous occupation.
- 2) Women who were married, widowed or divorced were assigned their <ex->spouse's current or previous occupation, even if they had an occupation of their own.

3) School or university students who had never been working full- or part-time were classified according to their fathers' occupation.

4) If rule 1) and 2) do not allow a classification, because of missing information, the respondent is classified according to the occupation of the father.

5) Respondents in military/alternative community service were not regarded as being in full- or part-time employment. Instead they were classified according to their previous occupation (men and unmarried women who had previously been working), according to their spouse's occupation (married or widowed women whose husband was or had been working) or according to their father's occupation.

No occupational metaclassification is possible if one of the relevant sources of occupational data is missing (inadequate description of occupation, refused, don't know or no answer) or if all relevant sources of occupational data register as code 0 'Not applicable'.

Construction of the metaclassification according to Pappi was discontinued with ALLBUS 1994 because the data on the last occupation of spouses who are not working and the data on the occupation of ex-spouses is no longer part of the ALLBUS- demography.

Pappi himself points out that there is probably more than one way of constructing a metaclassification of occupations (Pappi 1979: 297). As an alternative to Pappi's rather male-centered operationalization (e.g. married women are classified according to their husbands' occupation), Michael Terwey has developed a modified metaclassification scheme that gives more weight to women's direct social position (V763-V782). This more recent classification thus takes into account that in contemporary society it is more and more the individual's personal circumstance rather than his or her family's social capital that determines social position.

The construction of Terwey's metaclassification proceeds in the following steps:

1) All respondents who are employed full-time or part-time are classified according to their own current occupation.

2) All respondents who were formerly employed full-time or part-time are categorized according to their last occupational status.

3) Only those married women and men who themselves have never been employed before are classified according to their spouses' occupation. If the spouse is a pupil/student, a housewife/househusband or doing compulsory military/alternative community service, classification is based on the father's occupation. For former ALLBUS-surveys the spouse's last occupation was used for categorization if the spouse was retired, unemployed or out of work for other reasons. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.

4) In previous ALLBUS-surveys, respondents who were widowed, divorced or living in separation and who had never been employed themselves, were categorized according to their previous spouse's occupation. As this

information is not available since ALLBUS 1994, these cases are coded as not classifiable.

5) All unmarried respondents who have never been employed themselves are categorized using their father's occupation.

6) Insofar as they cannot be considered full-time or part-time employed in the sense of this metaclassification, respondents in compulsory military or alternative community service and those in vocational training represent a general exception. For these and for all other respondents who have no identifiable main occupation, the nearest possible occupational position is used. Married respondents in this group are, for example, categorized according to their spouses' current occupation or, if this is impossible, according to their fathers' occupation.

If a missing value ('Refused', 'Don't know' or 'No answer') appears within an occupation code relevant for metaclassification or if, for any other reason, occupational information does not permit a metaclassification according to a main occupation, the case is also coded as not classifiable.

V764 OCCUPATION, REF. NR., METAClass.<TERWEY>

Additional text not in questionnaire:

Occupational position, reference number: Metaclassification according to Terwey

Independent farmers with farmland of:

- 10 Less than 10 hectares
- 11 10 ha - less than 20 ha
- 12 20 ha - to less than 50 ha
- 13 50 ha and over

Independent professionals (e.g. doctor in private practice, lawyer)

- 14 from 2010: no employees
- 15 from 2010: 1 employee; until 2008: 1 employee or none
- 16 2-9 employees
- 17 10 or more employees

Self-employed in trade or craft, industry, service sector etc.

- 20 from 2010: no employees
- 21 from 2010: 1 employee; until 2008: 1 employee or none
- 22 2-9 employees
- 23 10-49 employees
- 24 50 or more employees

Family member assisting in family business

- 30 Family member assisting in family business

Civil servants/judges/professional soldiers

- 40 Civil servants carrying out simple administrative duties
- 41 Civil servants carrying out middle level administrative duties
- 42 Civil servants carrying out senior administrative duties
- 43 Civil servants carrying out executive duties, judges

Employees

- 50 Plant foreman with employee status
- 51 Employee with simple duties (e.g. salesperson, clerk, typist)
- 52 Employee under loose supervision carrying out complex tasks independently (e.g. senior clerical staff, book-keeper, draughtsman)
- 53 Employee carrying out responsible tasks independently or with limited responsibility for others (e.g. researcher, manager, head of department)
- 54 Employee with wide managerial responsibilities and decision making powers (e.g. head of organisation/association, managing director, executive of large firm or organisation)

Workers

- 60 Unskilled worker

- 61 Semi-skilled worker
- 62 Skilled worker
- 63 Foreman
- 64 Master (crafts- and tradesman), site foreman

Farmer on a cooperative farm

- 65 From 1991: Farmer on a cooperative farm <"Genossenschaftsbauer," 1991 only for respondents from the new federal states>

- 96 All individuals relevant for classification without occupational data (= not classifiable)

Note:

Metaclassification of Occupations

For those respondents who are not in the labor force, the metaclassification of occupations allows an indirect occupational classification, e.g. according to the profession or occupation of the respondent's spouse or father. Thus, the purpose of the metaclassification is to arrive at a description of the social circumstance and social positions of otherwise unclassifiable respondents by (indirectly) linking them to positions in the occupational system in a principled way.

For further explanation see:

Pappi, Franz Urban 1979:

Sozialstrukturanalysen mit Umfragedaten. Probleme der standardisierten Erfassung von Hintergrundsmerkmalen in allgemeinen Bevölkerungsumfragen, Königstein/Ts.: Athenäum.

Based on the criteria suggested by Pappi, a first meta-classification of occupations was constructed for ALLBUS.

The corresponding data can be found in V754 to V762.

The metaclassification was constructed as follows:

- 1) All men and unmarried women were, as far as possible, assigned their own current or previous occupation.
- 2) Women who were married, widowed or divorced were assigned their <ex->spouse's current or previous occupation, even if they had an occupation of their own.
- 3) School or university students who had never been working full- or part-time were classified according to their fathers' occupation.
- 4) If rule 1) and 2) do not allow a classification, because of missing information, the respondent is classified according to the occupation of the father.
- 5) Respondents in military/alternative community service were not regarded as being in full- or part-time employment. Instead they were classified according to their previous occupation (men and unmarried women who had previously

been working), according to their spouse's occupation (married or widowed women whose husband was or had been working) or according to their father's occupation.

No occupational metaclassification is possible if one of the relevant sources of occupational data is missing (inadequate description of occupation, refused, don't know or no answer) or if all relevant sources of occupational data register as code 0 'Not applicable'.

Construction of the metaclassification according to Pappi was discontinued with ALLBUS 1994 because the data on the last occupation of spouses who are not working and the data on the occupation of ex-spouses is no longer part of the ALLBUS- demography.

Pappi himself points out that there is probably more than one way of constructing a metaclassification of occupations (Pappi 1979: 297). As an alternative to Pappi's rather male-centered operationalization (e.g. married women are classified according to their husbands' occupation), Michael Terwey has developed a modified metaclassification scheme that gives more weight to women's direct social position (V763-V782). This more recent classification thus takes into account that in contemporary society it is more and more the individual's personal circumstance rather than his or her family's social capital that determines social position.

The construction of Terwey's metaclassification proceeds in the following steps:

- 1) All respondents who are employed full-time or part-time are classified according to their own current occupation.
- 2) All respondents who were formerly employed full-time or part-time are categorized according to their last occupational status.
- 3) Only those married women and men who themselves have never been employed before are classified according to their spouses' occupation. If the spouse is a pupil/student, a housewife/househusband or doing compulsory military/alternative community service, classification is based on the father's occupation. For former ALLBUS-surveys the spouse's last occupation was used for categorization if the spouse was retired, unemployed or out of work for other reasons. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 4) In previous ALLBUS-surveys, respondents who were widowed, divorced or living in separation and who had never been employed themselves, were categorized according to their previous spouse's occupation. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 5) All unmarried respondents who have never been employed themselves are categorized using their father's occupation.
- 6) Insofar as they cannot be considered full-time or part-time employed in the sense of this metaclassification, respondents in compulsory military or alternative community service and those in vocational training represent a general exception. For these and for all other respondents who have no identifiable main occupation, the nearest possible occupational position is used. Married respondents in this group are, for example, categorized according to

their spouses' current occupation or, if this is impossible, according to their fathers' occupation.

If a missing value ('Refused', 'Don't know' or 'No answer') appears within an occupation code relevant for metaclassification or if, for any other reason, occupational information does not permit a metaclassification according to a main occupation, the case is also coded as not classifiable.

V765 ISCO 1968, METAClassification <TERWEY>

Additional text not in questionnaire:

Metaclassification of occupation according to Terwey, ISCO 1968

0 Not classifiable in the classification scheme; not available 2012

1004 Workers with unclassifiable or inadequately described occupation

Note:

Metaclassification of Occupations

For those respondents who are not in the labor force, the metaclassification of occupations allows an indirect occupational classification, e.g. according to the profession or occupation of the respondent's spouse or father. Thus, the purpose of the metaclassification is to arrive at a description of the social circumstance and social positions of otherwise unclassifiable respondents by (indirectly) linking them to positions in the occupational system in a principled way.

For further explanation see:

Pappi, Franz Urban 1979:

Sozialstrukturanalysen mit Umfragedaten. Probleme der standardisierten Erfassung von Hintergrundmerkmalen in allgemeinen Bevölkerungsumfragen, Königstein/Ts.: Athenäum.

Based on the criteria suggested by Pappi, a first meta-classification of occupations was constructed for ALLBUS.

The corresponding data can be found in V754 to V762.

The metaclassification was constructed as follows:

- 1) All men and unmarried women were, as far as possible, assigned their own current or previous occupation.
- 2) Women who were married, widowed or divorced were assigned their <ex->spouse's current or previous occupation, even if they had an occupation of their own.
- 3) School or university students who had never been working full- or part-time were classified according to their fathers' occupation.
- 4) If rule 1) and 2) do not allow a classification, because of missing information, the respondent is classified according to the occupation of the father.
- 5) Respondents in military/alternative community service were not regarded as being in full- or part-time employment. Instead they were classified according to their previous occupation (men and unmarried women who had previously been working), according to their spouse's occupation (married or widowed women whose husband was or had been working) or according to their father's occupation.

No occupational metaclassification is possible if one of the relevant sources of occupational data is missing (inadequate description of occupation, refused, don't know or no answer) or if all relevant sources of occupational data register as code 0 'Not applicable'.

Construction of the metaclassification according to Pappi was discontinued with ALLBUS 1994 because the data on the last occupation of spouses who are not working and the data on the occupation of ex-spouses is no longer part of the ALLBUS- demography.

Pappi himself points out that there is probably more than one way of constructing a metaclassification of occupations (Pappi 1979: 297). As an alternative to Pappi's rather male-centered operationalization (e.g. married women are classified according to their husbands' occupation), Michael Terwey has developed a modified metaclassification scheme that gives more weight to women's direct social position (V763-V782). This more recent classification thus takes into account that in contemporary society it is more and more the individual's personal circumstance rather than his or her family's social capital that determines social position.

The construction of Terwey's metaclassification proceeds in the following steps:

- 1) All respondents who are employed full-time or part-time are classified according to their own current occupation.
- 2) All respondents who were formerly employed full-time or part-time are categorized according to their last occupational status.
- 3) Only those married women and men who themselves have never been employed before are classified according to their spouses' occupation. If the spouse is a pupil/student, a housewife/househusband or doing compulsory military/alternative community service, classification is based on the father's occupation. For former ALLBUS-surveys the spouse's last occupation was used for categorization if the spouse was retired, unemployed or out of work for other reasons. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 4) In previous ALLBUS-surveys, respondents who were widowed, divorced or living in separation and who had never been employed themselves, were categorized according to their previous spouse's occupation. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 5) All unmarried respondents who have never been employed themselves are categorized using their father's occupation.
- 6) Insofar as they cannot be considered full-time or part-time employed in the sense of this metaclassification, respondents in compulsory military or alternative community service and those in vocational training represent a general exception. For these and for all other respondents who have no identifiable main occupation, the nearest possible occupational position is used. Married respondents in this group are, for example, categorized according to their spouses' current occupation or, if this is impossible, according to their fathers' occupation.

If a missing value ('Refused', 'Don't know' or 'No answer') appears within an occupation code relevant for

metaclassification or if, for any other reason, occupational information does not permit a metaclassification according to a main occupation, the case is also coded as not classifiable.

Pappi, Franz Urban 1979:

Sozialstrukturanalysen mit Umfragedaten. Probleme der standardisierten Erfassung von Hintergrundmerkmalen in allgemeinen Bevölkerungsumfragen, Königstein/Ts.: Athenäum.

Based on the criteria suggested by Pappi, a first meta-classification of occupations was constructed for ALLBUS.

The corresponding data can be found in V754 to V762.

The metaclassification was constructed as follows:

- 1) All men and unmarried women were, as far as possible, assigned their own current or previous occupation.
- 2) Women who were married, widowed or divorced were assigned their <ex->spouse's current or previous occupation, even if they had an occupation of their own.
- 3) School or university students who had never been working full- or part-time were classified according to their fathers' occupation.
- 4) If rule 1) and 2) do not allow a classification, because of missing information, the respondent is classified according to the occupation of the father.
- 5) Respondents in military/alternative community service were not regarded as being in full- or part-time employment. Instead they were classified according to their previous occupation (men and unmarried women who had previously been working), according to their spouse's occupation (married or widowed women whose husband was or had been working) or according to their father's occupation.

No occupational metaclassification is possible if one of the relevant sources of occupational data is missing (inadequate description of occupation, refused, don't know or no answer) or if all relevant sources of occupational data register as code 0 'Not applicable'.

Construction of the metaclassification according to Pappi was discontinued with ALLBUS 1994 because the data on the last occupation of spouses who are not working and the data on the occupation of ex-spouses is no longer part of the ALLBUS- demography.

Pappi himself points out that there is probably more than one way of constructing a metaclassification of occupations (Pappi 1979: 297). As an alternative to Pappi's rather male-centered operationalization (e.g. married women are classified according to their husbands' occupation), Michael Terwey has developed a modified metaclassification scheme that gives more weight to women's direct social position (V763-V782). This more recent classification thus takes into account that in contemporary society it is more and more the individual's personal circumstance rather than his or her family's social capital that determines social position.

The construction of Terwey's metaclassification proceeds in the following steps:

- 1) All respondents who are employed full-time or part-time are classified according to their own current occupation.
- 2) All respondents who were formerly employed full-time or part-time are categorized according to their last occupational status.
- 3) Only those married women and men who themselves have never been employed before are classified according to their spouses' occupation. If the spouse is a pupil/student, a housewife/househusband or doing compulsory military/alternative community service, classification is based on the father's occupation. For former ALLBUS-surveys the spouse's last occupation was used for categorization if the spouse was retired, unemployed or out of work for other reasons. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 4) In previous ALLBUS-surveys, respondents who were widowed, divorced or living in separation and who had never been employed themselves, were categorized according to their previous spouse's occupation. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 5) All unmarried respondents who have never been employed themselves are categorized using their father's occupation.
- 6) Insofar as they cannot be considered full-time or part-time employed in the sense of this metaclassification, respondents in compulsory military or alternative community service and those in vocational training represent a general exception. For these and for all other respondents who have no identifiable main occupation, the nearest possible occupational position is used. Married respondents in this group are, for example, categorized according to their spouses' current occupation or, if this is impossible, according to their fathers' occupation.

If a missing value ('Refused', 'Don't know' or 'No answer') appears within an occupation code relevant for

metaclassification or if, for any other reason, occupational information does not permit a metaclassification according to a main occupation, the case is also coded as not classifiable.

Occupational Minor Groups

Categories 01 to 99 correspond to the minor groups of ISCO 1968 while categories 101 to 109 were created by ZUMA:

- 001 Chemists, physicists and related professions
- 002 Architects, engineers and related technicians
- 003 Architects, engineers and related technicians
- 004 Aircraft and ships' officers
- 005 Life scientists and related life science technicians
- 006 Medical, dental, veterinary and related professions
- 007 Medical, dental, veterinary and related professions
- 008 Statisticians, mathematicians, system analysts and
related technicians
- 009 Economists
- 011 Accountants
- 012 Jurists
- 013 Teachers
- 014 Workers in religion
- 015 Authors, journalists, and related writers
- 016 Sculptors, painters, photographers and related
creative artists
- 017 Musicians, composers, dancers and performing artists
- 018 Athletes, sportsmen and related workers
- 019 Professionals, scientists, technical and related
workers not elsewhere classified
- 020 Legislative officials and government administrators
- 021 Managers
- 030 Clerical supervisors
- 031 Government executive officials
- 032 Stenographers, typists, and card- and tape-punching
machine operators
- 033 Bookkeepers, cashiers and related workers
- 034 Computing machine operators
- 035 Transport and communication supervisors
- 036 Transport conductors
- 037 Mail distribution clerks
- 038 Telephone and telegraph operators
- 039 Clerical and related workers not elsewhere classified
- 040 Managers (wholesale and retail trade)
- 041 Working proprietors (wholesale and retail trade)
- 042 Sales supervisors and buyers

- 043 Technical salesman, commercial travellers and
 manufacturers' agents
- 044 Insurance, real estate, securities and business
 services salesman, and auctioneers
- 045 Salesmen, shop assistants and related workers
- 049 Sales workers not elsewhere classified
- 050 Managers (catering and lodging services)
- 051 Working proprietors (catering and lodging services)
- 052 Housekeeping and related service supervisors
- 053 Cooks, waiters, bartenders and related workers
- 054 Maids and related housekeeping service workers
 not elsewhere classified
- 055 Building caretakers, charworkers, cleaners and
 related workers
- 056 Launderers, dry-cleaners and pressers
- 057 Hairdressers, barbers, beauticians and related
 workers
- 058 Protective service workers not elsewhere classified
- 059 Service workers not elsewhere classified
- 060 Farm managers and supervisors
- 061 Farmers (including specialized farmers)
- 062 Agricultural and animal husbandry workers
- 063 Forestry workers
- 064 Fishermen, hunters and related workers
- 070 Production supervisors and general foremen
- 071 Miners, quarrymen, well drillers and related workers
- 072 Metal processors
- 073 Wood preparation workers and paper makers
- 074 Chemical processors and related workers
- 075 Spinners, weavers, knitters, dyers and related
 workers
- 076 Tanners, fellmongers and pelt dressers
- 077 Food and beverage processors
- 078 Tobacco preparers and tobacco product managers
- 079 Tailors, dressmakers, sewers, upholsterers and
 related workers
- 080 Shoemakers and leather goods makers
- 081 Cabinetmakers and related woodworkers
- 082 Stone cutters and carvers
- 083 Blacksmiths, toolmakers and machine-tool operators
- 084 Machinery fitters, machine assemblers and precision
 instrument makers (except electrical)
- 085 Electrical fitters and related electrical and
 electronics workers
- 086 Broadcasting station and sound equipment operators
 and cinema projectionists
- 087 Plumbers, welders, sheet metal and structural metal

- preparers and erectors
- 088 Jewellery and precious metal workers
- 089 Glass formers, potters and related workers
- 090 Rubber and plastics product makers
- 091 Paper and paperboard products makers
- 092 Printers and related workers
- 093 Painters
- 094 Production and related workers not elsewhere
classified
- 095 Bricklayers, carpenters and other construction
workers
- 096 Stationary engine and related equipment operators
- 097 Material-handling and related equipment operators,
dockers and freight handlers
- 098 Transport equipment operators
- 099 Labourers not elsewhere classified

- 101 Soldiers (Armed forces)
- 102 Officers (Armed forces)

- 104 Workers with undefinable (not classifiable) and
inadequately described job

- 107 Refused
- 108 Don't know
- 109 No answer
- 000 Not applicable

V767 OCCUPAT. MAJOR GROUP I68,METACL.<TERWEY>

Additional text not in questionnaire:

Metaclassification of occupation (ISCO 1968) according to Terwey, occupational major group

- 0 Not classifiable in the classification scheme; not available 2012
- 1 Professional, technical and related workers
- 2 Administrative and managerial workers in public service and industry
- 3 Clerical and related professions
- 4 Sales professions
- 5 Service professions (incl. members of the armed forces)
- 6 Agricultural, animal husbandry and forestry workers, fishermen and hunters
- 7 Production and related workers, transport equipment operators and laborers
- 8 Others

Note:

Metaclassification of Occupations

For those respondents who are not in the labor force, the metaclassification of occupations allows an indirect occupational classification, e.g. according to the profession or occupation of the respondent's spouse or father. Thus, the purpose of the metaclassification is to arrive at a description of the social circumstance and social positions of otherwise unclassifiable respondents by (indirectly) linking them to positions in the occupational system in a principled way.

For further explanation see:

Pappi, Franz Urban 1979:

Sozialstrukturanalysen mit Umfragedaten. Probleme der standardisierten Erfassung von Hintergrundsmerkmalen in allgemeinen Bevölkerungsumfragen, Königstein/Ts.: Athenäum.

Based on the criteria suggested by Pappi, a first meta-classification of occupations was constructed for ALLBUS. The corresponding data can be found in V754 to V762.

The metaclassification was constructed as follows:

- 1) All men and unmarried women were, as far as possible, assigned their own current or previous occupation.
- 2) Women who were married, widowed or divorced were assigned their <ex->spouse's current or previous occupation, even if they had an occupation of their own.
- 3) School or university students who had never been working full- or part-time were classified according to their fathers' occupation.
- 4) If rule 1) and 2) do not allow a classification, because of missing information, the respondent is classified

according to the occupation of the father.

5) Respondents in military/alternative community service were not regarded as being in full- or part-time employment. Instead they were classified according to their previous occupation (men and unmarried women who had previously been working), according to their spouse's occupation (married or widowed women whose husband was or had been working) or according to their father's occupation.

No occupational metaclassification is possible if one of the relevant sources of occupational data is missing (inadequate description of occupation, refused, don't know or no answer) or if all relevant sources of occupational data register as code 0 'Not applicable'.

Construction of the metaclassification according to Pappi was discontinued with ALLBUS 1994 because the data on the last occupation of spouses who are not working and the data on the occupation of ex-spouses is no longer part of the ALLBUS- demography.

Pappi himself points out that there is probably more than one way of constructing a metaclassification of occupations (Pappi 1979: 297). As an alternative to Pappi's rather male-centered operationalization (e.g. married women are classified according to their husbands' occupation), Michael Terwey has developed a modified metaclassification scheme that gives more weight to women's direct social position (V763-V782). This more recent classification thus takes into account that in contemporary society it is more and more the individual's personal circumstance rather than his or her family's social capital that determines social position.

The construction of Terwey's metaclassification proceeds in the following steps:

1) All respondents who are employed full-time or part-time are classified according to their own current occupation.

2) All respondents who were formerly employed full-time or part-time are categorized according to their last occupational status.

3) Only those married women and men who themselves have never been employed before are classified according to their spouses' occupation. If the spouse is a pupil/student, a housewife/househusband or doing compulsory military/alternative community service, classification is based on the father's occupation. For former ALLBUS-surveys the spouse's last occupation was used for categorization if the spouse was retired, unemployed or out of work for other reasons. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.

4) In previous ALLBUS-surveys, respondents who were widowed, divorced or living in separation and who had never been employed themselves, were categorized according to their previous spouse's occupation. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.

5) All unmarried respondents who have never been employed themselves are categorized using their father's occupation.

6) Insofar as they cannot be considered full-time or part-time employed in the sense of this metaclassification, respondents in compulsory military or alternative community service and those in vocational training represent a general exception. For these and for all other respondents who have no identifiable main occupation, the nearest possible occupational position is used. Married respondents in this group are, for example, categorized according to their spouses' current occupation or, if this is impossible, according to their fathers' occupation.

If a missing value ('Refused', 'Don't know' or 'No answer') appears within an occupation code relevant for metaclassification or if, for any other reason, occupational information does not permit a metaclassification according to a main occupation, the case is also coded as not classifiable.

Additional text not in questionnaire:

Metaclassification of occupation (ISCO 1968) according to Terwey, occupational prestige scale

0 Not classifiable in the classification scheme; not available 2012

Note:

Metaclassification of Occupations

For those respondents who are not in the labor force, the metaclassification of occupations allows an indirect occupational classification, e.g. according to the profession or occupation of the respondent's spouse or father. Thus, the purpose of the metaclassification is to arrive at a description of the social circumstance and social positions of otherwise unclassifiable respondents by (indirectly) linking them to positions in the occupational system in a principled way.

For further explanation see:

Pappi, Franz Urban 1979:

Sozialstrukturanalysen mit Umfragedaten. Probleme der standardisierten Erfassung von Hintergrundsmerkmalen in allgemeinen Bevölkerungsumfragen, Königstein/Ts.: Athenäum.

Based on the criteria suggested by Pappi, a first meta-classification of occupations was constructed for ALLBUS. The corresponding data can be found in V754 to V762.

The metaclassification was constructed as follows:

- 1) All men and unmarried women were, as far as possible, assigned their own current or previous occupation.
- 2) Women who were married, widowed or divorced were assigned their <ex->spouse's current or previous occupation, even if they had an occupation of their own.
- 3) School or university students who had never been working full- or part-time were classified according to their fathers' occupation.
- 4) If rule 1) and 2) do not allow a classification, because of missing information, the respondent is classified according to the occupation of the father.
- 5) Respondents in military/alternative community service were not regarded as being in full- or part-time employment. Instead they were classified according to their previous occupation (men and unmarried women who had previously been working), according to their spouse's occupation (married or widowed women whose husband was or had been working) or according to their father's occupation.

No occupational metaclassification is possible if one of the relevant sources of occupational data is missing (inadequate description of occupation, refused, don't know or no answer) or if all relevant sources of occupational data register as code 0 'Not applicable'.

Construction of the metaclassification according to Pappi was discontinued with ALLBUS 1994 because the data on the last occupation of spouses who are not working and the data on the occupation of ex-spouses is no longer part of the ALLBUS- demography.

Pappi himself points out that there is probably more than one way of constructing a metaclassification of occupations (Pappi 1979: 297). As an alternative to Pappi's rather male-centered operationalization (e.g. married women are classified according to their husbands' occupation), Michael Terwey has developed a modified metaclassification scheme that gives more weight to women's direct social position (V763-V782). This more recent classification thus takes into account that in contemporary society it is more and more the individual's personal circumstance rather than his or her family's social capital that determines social position.

The construction of Terwey's metaclassification proceeds in the following steps:

- 1) All respondents who are employed full-time or part-time are classified according to their own current occupation.
- 2) All respondents who were formerly employed full-time or part-time are categorized according to their last occupational status.
- 3) Only those married women and men who themselves have never been employed before are classified according to their spouses' occupation. If the spouse is a pupil/student, a housewife/househusband or doing compulsory military/alternative community service, classification is based on the father's occupation. For former ALLBUS-surveys the spouse's last occupation was used for categorization if the spouse was retired, unemployed or out of work for other reasons. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 4) In previous ALLBUS-surveys, respondents who were widowed, divorced or living in separation and who had never been employed themselves, were categorized according to their previous spouse's occupation. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 5) All unmarried respondents who have never been employed themselves are categorized using their father's occupation.
- 6) Insofar as they cannot be considered full-time or part-time employed in the sense of this metaclassification, respondents in compulsory military or alternative community service and those in vocational training represent a general exception. For these and for all other respondents who have no identifiable main occupation, the nearest possible occupational position is used. Married respondents in this group are, for example, categorized according to their spouses' current occupation or, if this is impossible, according to their fathers' occupation.

If a missing value ('Refused', 'Don't know' or 'No answer') appears within an occupation code relevant for metaclassification or if, for any other reason, occupational information does not permit a metaclassification according

to a main occupation, the case is also coded as not classifiable.

Occupational Prestige Scale

The occupational prestige scale is based on the ISCO classification of 1968.

Respondents are assigned prestige values according to their three-digit ISCO occupational categories. If possible, undefinable and not classifiable cases (code 1004) receive prestige values according to their occupational minor group. Cases which cannot be classified according to their occupational minor group receive the average prestige value of their occupational major group. Only the following categories from the occupational major group rest defined as 'missing':

One-digit	Prestige scale	
0	0	Not applicable
97	99.7	Refused
98	99.8	Don't know
99	99.9	No answer

V770 MAGNITUDEPRESTIGE I68, METACL. <TERWEY>

Additional text not in questionnaire:

Metaclassification of occupation (ISCO 1968) according to Terwey, Magnitudeprestige Scale (MPS)

0 Not classifiable in the classification scheme; not available 2012

Note:

Metaclassification of Occupations

For those respondents who are not in the labor force, the metaclassification of occupations allows an indirect occupational classification, e.g. according to the profession or occupation of the respondent's spouse or father. Thus, the purpose of the metaclassification is to arrive at a description of the social circumstance and social positions of otherwise unclassifiable respondents by (indirectly) linking them to positions in the occupational system in a principled way.

For further explanation see:

Pappi, Franz Urban 1979:

Sozialstrukturanalysen mit Umfragedaten. Probleme der standardisierten Erfassung von Hintergrundsmerkmalen in allgemeinen Bevölkerungsumfragen, Königstein/Ts.: Athenäum.

Based on the criteria suggested by Pappi, a first meta-classification of occupations was constructed for ALLBUS. The corresponding data can be found in V754 to V762.

The metaclassification was constructed as follows:

- 1) All men and unmarried women were, as far as possible, assigned their own current or previous occupation.
- 2) Women who were married, widowed or divorced were assigned their <ex->spouse's current or previous occupation, even if they had an occupation of their own.
- 3) School or university students who had never been working full- or part-time were classified according to their fathers' occupation.
- 4) If rule 1) and 2) do not allow a classification, because of missing information, the respondent is classified according to the occupation of the father.
- 5) Respondents in military/alternative community service were not regarded as being in full- or part-time employment. Instead they were classified according to their previous occupation (men and unmarried women who had previously been working), according to their spouse's occupation (married or widowed women whose husband was or had been working) or according to their father's occupation.

No occupational metaclassification is possible if one of the relevant sources of occupational data is missing (inadequate description of occupation, refused, don't know or no answer) or if all relevant sources of occupational data register as code 0 'Not applicable'.

Construction of the metaclassification according to Pappi was discontinued with ALLBUS 1994 because the data on the last occupation of spouses who are not working and the data on the occupation of ex-spouses is no longer part of the ALLBUS- demography.

Pappi himself points out that there is probably more than one way of constructing a metaclassification of occupations (Pappi 1979: 297). As an alternative to Pappi's rather male-centered operationalization (e.g. married women are classified according to their husbands' occupation), Michael Terwey has developed a modified metaclassification scheme that gives more weight to women's direct social position (V763-V782). This more recent classification thus takes into account that in contemporary society it is more and more the individual's personal circumstance rather than his or her family's social capital that determines social position.

The construction of Terwey's metaclassification proceeds in the following steps:

- 1) All respondents who are employed full-time or part-time are classified according to their own current occupation.
- 2) All respondents who were formerly employed full-time or part-time are categorized according to their last occupational status.
- 3) Only those married women and men who themselves have never been employed before are classified according to their spouses' occupation. If the spouse is a pupil/student, a housewife/househusband or doing compulsory military/alternative community service, classification is based on the father's occupation. For former ALLBUS-surveys the spouse's last occupation was used for categorization if the spouse was retired, unemployed or out of work for other reasons. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 4) In previous ALLBUS-surveys, respondents who were widowed, divorced or living in separation and who had never been employed themselves, were categorized according to their previous spouse's occupation. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 5) All unmarried respondents who have never been employed themselves are categorized using their father's occupation.
- 6) Insofar as they cannot be considered full-time or part-time employed in the sense of this metaclassification, respondents in compulsory military or alternative community service and those in vocational training represent a general exception. For these and for all other respondents who have no identifiable main occupation, the nearest possible occupational position is used. Married respondents in this group are, for example, categorized according to their spouses' current occupation or, if this is impossible, according to their fathers' occupation.

If a missing value ('Refused', 'Don't know' or 'No answer') appears within an occupation code relevant for metaclassification or if, for any other reason, occupational information does not permit a metaclassification according

to a main occupation, the case is also coded as not classifiable.

Magnitudeprestige Scale (MPS) for ISCO 1968 and ISCO 1988

The Magnitudeprestige Scale is based on an alternative measurement of social prestige created by Bernd Wegener. Starting point is a prestige assessment without a list of pre-quoted categories, i.e. respondents were asked to give an implicit ratio estimation of the relative magnitude of prestige. The resulting MPS-scale describes a gradual mapping of social closure.

For further explanation see:

Bernd Wegener 1984:

Gibt es Sozialprestige? Konstruktion und Validität der Magnitude-Prestigeskala, ZUMA Arbeitsbericht 84/02.

Bernd Wegener 1985:

Gibt es Sozialprestige? in: Zeitschrift für Soziologie 14: 209 - 235.

V772 ISEI I68, METAClassification <TERWEY>

Additional text not in questionnaire:

Metaclassification of occupation according to Terwey, ISEI (ISCO 1968)

0 Not classifiable in the classification scheme, not available 1980-1998, 2012

Note:

Metaclassification of Occupations

For those respondents who are not in the labor force, the metaclassification of occupations allows an indirect occupational classification, e.g. according to the profession or occupation of the respondent's spouse or father. Thus, the purpose of the metaclassification is to arrive at a description of the social circumstance and social positions of otherwise unclassifiable respondents by (indirectly) linking them to positions in the occupational system in a principled way.

For further explanation see:

Pappi, Franz Urban 1979:

Sozialstrukturanalysen mit Umfragedaten. Probleme der standardisierten Erfassung von Hintergrundsmerkmalen in allgemeinen Bevölkerungsumfragen, Königstein/Ts.: Athenäum.

Based on the criteria suggested by Pappi, a first meta-classification of occupations was constructed for ALLBUS. The corresponding data can be found in V754 to V762.

The metaclassification was constructed as follows:

- 1) All men and unmarried women were, as far as possible, assigned their own current or previous occupation.
- 2) Women who were married, widowed or divorced were assigned their <ex->spouse's current or previous occupation, even if they had an occupation of their own.
- 3) School or university students who had never been working full- or part-time were classified according to their fathers' occupation.
- 4) If rule 1) and 2) do not allow a classification, because of missing information, the respondent is classified according to the occupation of the father.
- 5) Respondents in military/alternative community service were not regarded as being in full- or part-time employment. Instead they were classified according to their previous occupation (men and unmarried women who had previously been working), according to their spouse's occupation (married or widowed women whose husband was or had been working) or according to their father's occupation.

No occupational metaclassification is possible if one of the relevant sources of occupational data is missing (inadequate description of occupation, refused, don't know or no answer) or if all relevant sources of occupational data register as code 0 'Not applicable'.

Construction of the metaclassification according to Pappi was discontinued with ALLBUS 1994 because the data on the last occupation of spouses who are not working and the data on the occupation of ex-spouses is no longer part of the ALLBUS- demography.

Pappi himself points out that there is probably more than one way of constructing a metaclassification of occupations (Pappi 1979: 297). As an alternative to Pappi's rather male-centered operationalization (e.g. married women are classified according to their husbands' occupation), Michael Terwey has developed a modified metaclassification scheme that gives more weight to women's direct social position (V763-V782). This more recent classification thus takes into account that in contemporary society it is more and more the individual's personal circumstance rather than his or her family's social capital that determines social position.

The construction of Terwey's metaclassification proceeds in the following steps:

- 1) All respondents who are employed full-time or part-time are classified according to their own current occupation.
- 2) All respondents who were formerly employed full-time or part-time are categorized according to their last occupational status.
- 3) Only those married women and men who themselves have never been employed before are classified according to their spouses' occupation. If the spouse is a pupil/student, a housewife/househusband or doing compulsory military/alternative community service, classification is based on the father's occupation. For former ALLBUS-surveys the spouse's last occupation was used for categorization if the spouse was retired, unemployed or out of work for other reasons. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 4) In previous ALLBUS-surveys, respondents who were widowed, divorced or living in separation and who had never been employed themselves, were categorized according to their previous spouse's occupation. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 5) All unmarried respondents who have never been employed themselves are categorized using their father's occupation.
- 6) Insofar as they cannot be considered full-time or part-time employed in the sense of this metaclassification, respondents in compulsory military or alternative community service and those in vocational training represent a general exception. For these and for all other respondents who have no identifiable main occupation, the nearest possible occupational position is used. Married respondents in this group are, for example, categorized according to their spouses' current occupation or, if this is impossible, according to their fathers' occupation.

If a missing value ('Refused', 'Don't know' or 'No answer') appears within an occupation code relevant for metaclassification or if, for any other reason, occupational information does not permit a metaclassification according

to a main occupation, the case is also coded as not classifiable.

Ganzeboom's ISEI for ISCO 1968 and ISCO 1988

In contrast to social prestige scales, this index of socio-economic status is constructed so as to include information on the educational level and the income connected to an occupational position. For ALLBUS, two versions of the index, based on ISCO 1968 and ISCO 1988 respectively, were constructed.

Please be advised that there are as yet no ISEI-scores for the incomplete codes and the general categories of ISCO.

V774 GOLDTHORPE CLASSES I68, METACL. <TERWEY>

Additional text not in questionnaire:

Metaclassification of occupation (ISCO 1968) according to Terwey, Goldthorpe classes

- 0 All individuals relevant for classification without occupational data; not available 2012
- 1 Higher and middle grades of the service class (higher grade professionals, administrators, officials and managers, large proprietors)
- 2 Lower grades of the service class
- 3 Non-manual employees with routine tasks (mainly clerical occupations, also sales occupations)
- 4 Proprietors, artisans etc. with 2-49 employees
- 5 Small proprietors, artisans etc. with 1 or no employees
- 6 Farmers (self-employed)
- 7 Technicians, supervisors of manual workers (foremen, master craftsmen)
- 8 Skilled workers
- 9 Unskilled and semi-skilled workers
- 10 Agricultural workers
- 11 Subdivision of class 3: Occupations without attachment to an organisational hierarchy and infrastructure. (This category was added when the class scheme was adapted to include women.)
- 12 From 1991: Farmer on a cooperative farm

Derivation of data:

This variable was derived from V764 and V765.

Note:

Metaclassification of Occupations

For those respondents who are not in the labor force, the metaclassification of occupations allows an indirect occupational classification, e.g. according to the profession or occupation of the respondent's spouse or father. Thus, the purpose of the metaclassification is to arrive at a description of the social circumstance and social positions of otherwise unclassifiable respondents by (indirectly) linking them to positions in the occupational system in a principled way.

For further explanation see:

Pappi, Franz Urban 1979:

Sozialstrukturanalysen mit Umfragedaten. Probleme der standardisierten Erfassung von Hintergrundmerkmalen in allgemeinen Bevölkerungsumfragen, Königstein/Ts.: Athenäum.

Based on the criteria suggested by Pappi, a first meta-classification of occupations was constructed for ALLBUS.

The corresponding data can be found in V754 to V762.

The metaclassification was constructed as follows:

- 1) All men and unmarried women were, as far as possible, assigned their own current or previous occupation.
- 2) Women who were married, widowed or divorced were assigned their <ex->spouse's current or previous occupation, even if they had an occupation of their own.
- 3) School or university students who had never been working full- or part-time were classified according to their fathers' occupation.
- 4) If rule 1) and 2) do not allow a classification, because of missing information, the respondent is classified according to the occupation of the father.
- 5) Respondents in military/alternative community service were not regarded as being in full- or part-time employment. Instead they were classified according to their previous occupation (men and unmarried women who had previously been working), according to their spouse's occupation (married or widowed women whose husband was or had been working) or according to their father's occupation.

No occupational metaclassification is possible if one of the relevant sources of occupational data is missing (inadequate description of occupation, refused, don't know or no answer) or if all relevant sources of occupational data register as code 0 'Not applicable'.

Construction of the metaclassification according to Pappi was discontinued with ALLBUS 1994 because the data on the last occupation of spouses who are not working and the data on the occupation of ex-spouses is no longer part of the ALLBUS- demography.

Pappi himself points out that there is probably more than one way of constructing a metaclassification of occupations (Pappi 1979: 297). As an alternative to Pappi's rather male-centered operationalization (e.g. married women are classified according to their husbands' occupation), Michael Terwey has developed a modified metaclassification scheme that gives more weight to women's direct social position (V763-V782). This more recent classification thus takes into account that in contemporary society it is more and more the individual's personal circumstance rather than his or her family's social capital that determines social position.

The construction of Terwey's metaclassification proceeds in the following steps:

- 1) All respondents who are employed full-time or part-time are classified according to their own current occupation.
- 2) All respondents who were formerly employed full-time or part-time are categorized according to their last occupational status.
- 3) Only those married women and men who themselves have never been employed before are classified according to their spouses' occupation. If the spouse is a pupil/student, a housewife/househusband or doing compulsory military/alternative community service, classification is based on the father's occupation. For former ALLBUS-surveys the spouse's last occupation was used for categorization if the spouse was retired, unemployed or out of work for other reasons. As this information is not available since ALLBUS 1994, these cases are coded as not

classifiable.

4) In previous ALLBUS-surveys, respondents who were widowed, divorced or living in separation and who had never been employed themselves, were categorized according to their previous spouse's occupation. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.

5) All unmarried respondents who have never been employed themselves are categorized using their father's occupation.

6) Insofar as they cannot be considered full-time or part-time employed in the sense of this metaclassification, respondents in compulsory military or alternative community service and those in vocational training represent a general exception. For these and for all other respondents who have no identifiable main occupation, the nearest possible occupational position is used. Married respondents in this group are, for example, categorized according to their spouses' current occupation or, if this is impossible, according to their fathers' occupation.

If a missing value ('Refused', 'Don't know' or 'No answer') appears within an occupation code relevant for metaclassification or if, for any other reason, occupational information does not permit a metaclassification according to a main occupation, the case is also coded as not classifiable.

The Goldthorpe Class Scheme

For further information see:

Petra Beckmann and Reiner Trometer 1991:

Neue Dienstleistungen des ALLBUS: Haushalts- und Familientypologien, Klassenschema nach Goldthorpe, in: ZUMA-Nachrichten 28: 7 - 17.

Robert Erikson and John H. Goldthorpe 1992:

The Constant Flux, Oxford: University Press.

Robert Erikson, John H. Goldthorpe, Wolfgang König, Paul Lüttinger and Walter Müller 1989:

The International Mobility Superfile (IMS) - Documentation -, CASMIN-Projekt, Mannheim. (Application of the class scheme to international data.)

John H. Goldthorpe 1980:

Social Mobility and Class Structure in Modern Britain, Oxford: Clarendon Press. (As an explanation of the theoretical background.)

The class scheme by Goldthorpe groups individuals on the basis of their occupational position (reference number) and their occupational function (using ISCO 1968). By combining these two variables, 12 different class categories are then constituted.

In contrast to an 'hierarchical' scale, based for instance on prestige and status, the Goldthorpe index is rather oriented towards a nominal concept of class structure. This makes it especially useful in analyzing, for example, the development of industrial societies into service societies, because the categories of the Goldthorpe class scheme

allow a more precise analysis and description of the growth or decline of different parts of the middle classes or of various groups of dependent employees and civil servants than scales which consist of horizontally differentiated ordinal status or prestige measures.

Moreover, the Goldthorpe class scheme in its present form is especially suitable for internationally comparative analyses (e.g. analyses of social mobility).

V775 ISCO 1988, METAClassification <TERWEY>

Additional text not in questionnaire:

Metaclassification of occupation according to Terwey, ISCO 1988

0 Not classifiable in the classification scheme; not available 1980-1991

10004 Workers with unclassifiable or inadequately described occupation

Note:

Metaclassification of Occupations

For those respondents who are not in the labor force, the metaclassification of occupations allows an indirect occupational classification, e.g. according to the profession or occupation of the respondent's spouse or father. Thus, the purpose of the metaclassification is to arrive at a description of the social circumstance and social positions of otherwise unclassifiable respondents by (indirectly) linking them to positions in the occupational system in a principled way.

For further explanation see:

Pappi, Franz Urban 1979:

Sozialstrukturanalysen mit Umfragedaten. Probleme der standardisierten Erfassung von Hintergrundmerkmalen in allgemeinen Bevölkerungsumfragen, Königstein/Ts.: Athenäum.

Based on the criteria suggested by Pappi, a first meta-classification of occupations was constructed for ALLBUS.

The corresponding data can be found in V754 to V762.

The metaclassification was constructed as follows:

- 1) All men and unmarried women were, as far as possible, assigned their own current or previous occupation.
- 2) Women who were married, widowed or divorced were assigned their <ex->spouse's current or previous occupation, even if they had an occupation of their own.
- 3) School or university students who had never been working full- or part-time were classified according to their fathers' occupation.
- 4) If rule 1) and 2) do not allow a classification, because of missing information, the respondent is classified according to the occupation of the father.
- 5) Respondents in military/alternative community service were not regarded as being in full- or part-time employment. Instead they were classified according to their previous occupation (men and unmarried women who had previously been working), according to their spouse's occupation (married or widowed women whose husband was or had been working) or according to their father's occupation.

No occupational metaclassification is possible if one of the relevant sources of occupational data is missing (inadequate description of occupation, refused, don't know or no answer) or if all relevant sources of occupational data register as code 0 'Not applicable'.

Construction of the metaclassification according to Pappi was discontinued with ALLBUS 1994 because the data on the last occupation of spouses who are not working and the data on the occupation of ex-spouses is no longer part of the ALLBUS- demography.

Pappi himself points out that there is probably more than one way of constructing a metaclassification of occupations (Pappi 1979: 297). As an alternative to Pappi's rather male-centered operationalization (e.g. married women are classified according to their husbands' occupation), Michael Terwey has developed a modified metaclassification scheme that gives more weight to women's direct social position (V763-V782). This more recent classification thus takes into account that in contemporary society it is more and more the individual's personal circumstance rather than his or her family's social capital that determines social position.

The construction of Terwey's metaclassification proceeds in the following steps:

- 1) All respondents who are employed full-time or part-time are classified according to their own current occupation.
- 2) All respondents who were formerly employed full-time or part-time are categorized according to their last occupational status.
- 3) Only those married women and men who themselves have never been employed before are classified according to their spouses' occupation. If the spouse is a pupil/student, a housewife/househusband or doing compulsory military/alternative community service, classification is based on the father's occupation. For former ALLBUS-surveys the spouse's last occupation was used for categorization if the spouse was retired, unemployed or out of work for other reasons. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 4) In previous ALLBUS-surveys, respondents who were widowed, divorced or living in separation and who had never been employed themselves, were categorized according to their previous spouse's occupation. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 5) All unmarried respondents who have never been employed themselves are categorized using their father's occupation.
- 6) Insofar as they cannot be considered full-time or part-time employed in the sense of this metaclassification, respondents in compulsory military or alternative community service and those in vocational training represent a general exception. For these and for all other respondents who have no identifiable main occupation, the nearest possible occupational position is used. Married respondents in this group are, for example, categorized according to their spouses' current occupation or, if this is impossible, according to their fathers' occupation.

If a missing value ('Refused', 'Don't know' or 'No answer') appears within an occupation code relevant for

metaclassification or if, for any other reason, occupational information does not permit a metaclassification according to a main occupation, the case is also coded as not classifiable.

International Standard Classification of Occupations (ISCO 1988)

Source:

International Labour Office (ed.) 1990:

International Standard Classification of Occupations. ISCO-88, Genf.

Until 2010, the categories of the open question on occupations were coded by GESIS based on the official German translation of the source cited above, which was provided by the 'Federal Statistical Office' (Statistisches Bundesamt). Some new Codes, marked '*' in this documentation, were added when ISCO-88 was introduced with ALLBUS 1992.

In 2012, ISCO coding was performed by infas (infas Institut für angewandte Sozialwissenschaft GmbH, Friedrich-Wilhelm-Str. 18, 53113 Bonn).

All codes in the data file are in a four digit format. Where necessary, leading zeros were added.

Remarks:

(*) new codes added by ZUMA

(1) This occupational group is intended to cover persons who, as directors, chief executives or department managers, manage enterprises, organizations or departments, requiring a total of three or more managers.

(2) This occupational group is intended to include persons who, either on their own behalf or on behalf of the proprietor, manage enterprises or in some cases organizations with the help of non-managerial staff and no more than one other senior staff, who should also be classified in this sub-major group, because this person's responsibilities will usually be more varied than those of a department manager in a larger enterprise or organization. Non-managerial staff should be classified according to their specific tasks.

(3) This code was introduced to supplement the existing ISCO-classification. It was taken from the European Community variant of the classification called ISCO 88 (COM).

Metaclassification of occupation (ISCO 1988) according to Terwey, SIOPS

0 Not classifiable in the classification scheme, not available 1980-1998

Note:

Metaclassification of Occupations

For those respondents who are not in the labor force, the metaclassification of occupations allows an indirect occupational classification, e.g. according to the profession or occupation of the respondent's spouse or father. Thus, the purpose of the metaclassification is to arrive at a description of the social circumstance and social positions of otherwise unclassifiable respondents by (indirectly) linking them to positions in the occupational system in a principled way.

For further explanation see:

Pappi, Franz Urban 1979:

Sozialstrukturanalysen mit Umfragedaten. Probleme der standardisierten Erfassung von Hintergrundsmerkmalen in allgemeinen Bevölkerungsumfragen, Königstein/Ts.: Athenäum.

Based on the criteria suggested by Pappi, a first meta-classification of occupations was constructed for ALLBUS. The corresponding data can be found in V754 to V762.

The metaclassification was constructed as follows:

- 1) All men and unmarried women were, as far as possible, assigned their own current or previous occupation.
- 2) Women who were married, widowed or divorced were assigned their <ex->spouse's current or previous occupation, even if they had an occupation of their own.
- 3) School or university students who had never been working full- or part-time were classified according to their fathers' occupation.
- 4) If rule 1) and 2) do not allow a classification, because of missing information, the respondent is classified according to the occupation of the father.
- 5) Respondents in military/alternative community service were not regarded as being in full- or part-time employment. Instead they were classified according to their previous occupation (men and unmarried women who had previously been working), according to their spouse's occupation (married or widowed women whose husband was or had been working) or according to their father's occupation.

No occupational metaclassification is possible if one of the relevant sources of occupational data is missing (inadequate description of occupation, refused, don't know or no answer) or if all relevant sources of occupational data register as code 0 'Not applicable'.

Construction of the metaclassification according to Pappi was discontinued with ALLBUS 1994 because the data on the last occupation of spouses who are not working and the data on the occupation of ex-spouses is no longer part of the ALLBUS- demography.

Pappi himself points out that there is probably more than one way of constructing a metaclassification of occupations (Pappi 1979: 297). As an alternative to Pappi's rather male-centered operationalization (e.g. married women are classified according to their husbands' occupation), Michael Terwey has developed a modified metaclassification scheme that gives more weight to women's direct social position (V763-V782). This more recent classification thus takes into account that in contemporary society it is more and more the individual's personal circumstance rather than his or her family's social capital that determines social position.

The construction of Terwey's metaclassification proceeds in the following steps:

- 1) All respondents who are employed full-time or part-time are classified according to their own current occupation.
- 2) All respondents who were formerly employed full-time or part-time are categorized according to their last occupational status.
- 3) Only those married women and men who themselves have never been employed before are classified according to their spouses' occupation. If the spouse is a pupil/student, a housewife/househusband or doing compulsory military/alternative community service, classification is based on the father's occupation. For former ALLBUS-surveys the spouse's last occupation was used for categorization if the spouse was retired, unemployed or out of work for other reasons. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 4) In previous ALLBUS-surveys, respondents who were widowed, divorced or living in separation and who had never been employed themselves, were categorized according to their previous spouse's occupation. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 5) All unmarried respondents who have never been employed themselves are categorized using their father's occupation.
- 6) Insofar as they cannot be considered full-time or part-time employed in the sense of this metaclassification, respondents in compulsory military or alternative community service and those in vocational training represent a general exception. For these and for all other respondents who have no identifiable main occupation, the nearest possible occupational position is used. Married respondents in this group are, for example, categorized according to their spouses' current occupation or, if this is impossible, according to their fathers' occupation.

If a missing value ('Refused', 'Don't know' or 'No answer') appears within an occupation code relevant for metaclassification or if, for any other reason, occupational information does not permit a metaclassification according

to a main occupation, the case is also coded as not classifiable.

Standard International Occupational Prestige Scale (SIOPS)

The "Standard International Occupational Prestige Scale" is based on the ISCO classification of 1988. It was conceived as an alternative prestige measure to Treiman's occupational prestige scale, which is based on ISCO 1968.

Please be advised that there are as yet no SIOPS-scores for the incomplete codes and the general categories of ISCO.

For further explanation see:

Harry B.G. Ganzeboom and Donald J. Treiman 1996:

Internationally Comparable Measures of Occupational Status for the 1988 International Standard Classification of Occupations, in: Social Science Research 25: 124 - 168.

If the spouse is a pupil/student, a housewife/househusband or doing compulsory military/alternative community service, classification is based on the father's occupation. For former ALLBUS-surveys the spouse's last occupation was used for categorization if the spouse was retired, unemployed or out of work for other reasons. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 4) In previous ALLBUS-surveys, respondents who were widowed, divorced or living in separation and who had never been employed themselves, were categorized according to their previous spouse's occupation. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 5) All unmarried respondents who have never been employed themselves are categorized using their father's occupation.
- 6) Insofar as they cannot be considered full-time or part-time employed in the sense of this metaclassification, respondents in compulsory military or alternative community service and those in vocational training represent a general exception. For these and for all other respondents who have no identifiable main occupation, the nearest possible occupational position is used. Married respondents in this group are, for example, categorized according to

their spouses' current occupation or, if this is impossible, according to their fathers' occupation.

If a missing value ('Refused', 'Don't know' or 'No answer') appears within an occupation code relevant for metaclassification or if, for any other reason, occupational information does not permit a metaclassification according to a main occupation, the case is also coded as not classifiable.

Magnitudeprestige Scale (MPS) for ISCO 1968 and ISCO 1988

The Magnitudeprestige Scale is based on an alternative measurement of social prestige created by Bernd Wegener. Starting point is a prestige assessment without a list of pre-quoted categories, i.e. respondents were asked to give an implicit ratio estimation of the relative magnitude of prestige. The resulting MPS-scale describes a gradual mapping of social closure.

For further explanation see:

Bernd Wegener 1984:

Gibt es Sozialprestige? Konstruktion und Validität der Magnitude-Prestigeskala, ZUMA Arbeitsbericht 84/02.

Bernd Wegener 1985:

Gibt es Sozialprestige? in: Zeitschrift für Soziologie 14: 209 - 235.

V780 ISEI I88, METAClassification <TERWEY>

Additional text not in questionnaire:

Metaclassification of occupation (ISCO 1988) according to Terwey, ISEI

0 Not classifiable in the classification scheme; not available 1980-1998

Note:

Metaclassification of Occupations

For those respondents who are not in the labor force, the metaclassification of occupations allows an indirect occupational classification, e.g. according to the profession or occupation of the respondent's spouse or father. Thus, the purpose of the metaclassification is to arrive at a description of the social circumstance and social positions of otherwise unclassifiable respondents by (indirectly) linking them to positions in the occupational system in a principled way.

For further explanation see:

Pappi, Franz Urban 1979:

Sozialstrukturanalysen mit Umfragedaten. Probleme der standardisierten Erfassung von Hintergrundmerkmalen in allgemeinen Bevölkerungsumfragen, Königstein/Ts.: Athenäum.

Based on the criteria suggested by Pappi, a first meta-classification of occupations was constructed for ALLBUS. The corresponding data can be found in V754 to V762.

The metaclassification was constructed as follows:

- 1) All men and unmarried women were, as far as possible, assigned their own current or previous occupation.
- 2) Women who were married, widowed or divorced were assigned their <ex->spouse's current or previous occupation, even if they had an occupation of their own.
- 3) School or university students who had never been working full- or part-time were classified according to their fathers' occupation.
- 4) If rule 1) and 2) do not allow a classification, because of missing information, the respondent is classified according to the occupation of the father.
- 5) Respondents in military/alternative community service were not regarded as being in full- or part-time employment. Instead they were classified according to their previous occupation (men and unmarried women who had previously been working), according to their spouse's occupation (married or widowed women whose husband was or had been working) or according to their father's occupation.

No occupational metaclassification is possible if one of the relevant sources of occupational data is missing (inadequate description of occupation, refused, don't know or no answer) or if all relevant sources of occupational data register as code 0 'Not applicable'.

Construction of the metaclassification according to Pappi was discontinued with ALLBUS 1994 because the data on the last occupation of spouses who are not working and the data on the occupation of ex-spouses is no longer part of the ALLBUS- demography.

Pappi himself points out that there is probably more than one way of constructing a metaclassification of occupations (Pappi 1979: 297). As an alternative to Pappi's rather male-centered operationalization (e.g. married women are classified according to their husbands' occupation), Michael Terwey has developed a modified metaclassification scheme that gives more weight to women's direct social position (V763-V782). This more recent classification thus takes into account that in contemporary society it is more and more the individual's personal circumstance rather than his or her family's social capital that determines social position.

The construction of Terwey's metaclassification proceeds in the following steps:

- 1) All respondents who are employed full-time or part-time are classified according to their own current occupation.
- 2) All respondents who were formerly employed full-time or part-time are categorized according to their last occupational status.
- 3) Only those married women and men who themselves have never been employed before are classified according to their spouses' occupation. If the spouse is a pupil/student, a housewife/househusband or doing compulsory military/alternative community service, classification is based on the father's occupation. For former ALLBUS-surveys the spouse's last occupation was used for categorization if the spouse was retired, unemployed or out of work for other reasons. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 4) In previous ALLBUS-surveys, respondents who were widowed, divorced or living in separation and who had never been employed themselves, were categorized according to their previous spouse's occupation. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 5) All unmarried respondents who have never been employed themselves are categorized using their father's occupation.
- 6) Insofar as they cannot be considered full-time or part-time employed in the sense of this metaclassification, respondents in compulsory military or alternative community service and those in vocational training represent a general exception. For these and for all other respondents who have no identifiable main occupation, the nearest possible occupational position is used. Married respondents in this group are, for example, categorized according to their spouses' current occupation or, if this is impossible, according to their fathers' occupation.

If a missing value ('Refused', 'Don't know' or 'No answer') appears within an occupation code relevant for metaclassification or if, for any other reason, occupational information does not permit a metaclassification according

to a main occupation, the case is also coded as not classifiable.

Ganzeboom's ISEI for ISCO 1968 and ISCO 1988

In contrast to social prestige scales, this index of socio-economic status is constructed so as to include information on the educational level and the income connected to an occupational position. For ALLBUS, two versions of the index, based on ISCO 1968 and ISCO 1988 respectively, were constructed.

Please be advised that there are as yet no ISEI-scores for the incomplete codes and the general categories of ISCO.

V813 RESP: MONTHLY NET INCOME <OPEN QUESTION>

How high is your own net monthly income (2002: in EUROS)? By this I mean the amount remaining after deductions for tax and social security contributions

Until 1992:

(Int.: For independent farmers and respondents who are self-employed, please ask for the average net monthly income.)

From 1994:

(Int.: For respondents who are self-employed, please ask for average net monthly income after deductions for overheads.)

2002:

(Int.: If respondent can only give a figure in DM, divide that figure by 2.)

0 No personal income

99997 Refused

99998 Don't know

99999 No answer

Comment:

Data min./data max.:

1 1 Euro

... ..

60000 60000 Euro

Note:

Income Variables

In 2002, income was surveyed in EURO for the first time in ALLBUS. In order to maintain the intercomparability of the data and with a view to future ALLBUS-surveys, the income data from ALLBUS 1980 to 2000 has been converted from DM to EURO values for this cumulated data set. As practiced in ALLBUS 2002 (cf. the interviewer instructions in V813 and V818 or #S61_1 and #S64_1 in the questionnaire for ZA No. 3700 ALLBUS 2002), the income was divided by two and the result subsequently rounded to integers.

The collection of income data has been modified over time in order to maximize the number of valid responses.

When analyzing income data, please decide for yourself whether you want to include as valid data persons or households that report a zero income. By default, these cases are already coded as 0, but are defined as missing data.

Respondent's personal income

The respondent's income was surveyed using a single, open question (V813) in 1980 and 1982. From 1984, a second question using a list of categories (V814) was added as a follow up for those who refused to answer the open question (V813). From 1986 to 1992 only respondents who lived in multi-person households were asked to specify their personal income. For respondents living in one-person households, household income (V818) was assumed to equal personal income.

Variable V813 contains the consolidated information of all open questions concerning the respondent's personal income, including the responses of one-person households (V818) from the years 1986-1992. Categorization and integration of this data with the data from the list query was forgone, because there is no unequivocal way of mapping the data from one variable onto the second. V815 provides an example for a consolidation of all data on the respondent's personal income. This variable also includes data from the list query. For each of the listed categories the mid-point of class entered into the summary. The lowest income category 'Under 200 EURO' received the value 150 EURO, while the highest open category of '7500 EURO and over' was coded as 8750 EURO.

Household income

From 1980 to 1984, household income (V820) was calculated from the collection of data on the individual household members. As of 1986, household income was surveyed as a separate question accompanied by a follow up list query to minimize refusals (V818 and V819). From 1994, respondent's living in one-person households no longer received a separate question on their household income on the assumption that household income equals personal income. In these cases, the data from V813 and V814 was recoded into V818 and V819.

V820 contains a consolidation of the data on household income. For 1980 to 1984, the data in V820 was calculated as the sum of the respondent's personal income (V815) and the income of further household members (V1248, V1261, V1274, V1287, V1300, V1313, V1326). If one of these variables contained a missing value ('Refused', 'Don't know' or 'No answer'), no valid income could be calculated. From 1986 onwards, the data in V818 and V819 could be directly included. For each of the listed categories the mid-point of class entered into the summary. The open categories at the beginning ('Under 200 EURO') and at the end ('7500 EURO and over') of the list were coded as 150 EURO and 8750 EURO respectively.

V814 RESP.: MONTHLY NET INCOME <LIST QUERY>

Additional text not in questionnaire:

Net monthly income, list query

How high is your own net monthly income (2002: in EUROS)? By this I mean the amount remaining after deductions for tax and social security contributions

(Int.: If answer refused, please mention anonymity and present card. Please ask respondent for answer code.)

- 0 No personal income (code 0 in V813)

- 98 Don't know
- 99 No answer

Note:

Income Variables

In 2002, income was surveyed in EURO for the first time in ALLBUS. In order to maintain the intercomparability of the data and with a view to future ALLBUS-surveys, the income data from ALLBUS 1980 to 2000 has been converted from DM to EURO values for this cumulated data set. As practiced in ALLBUS 2002 (cf. the interviewer instructions in V813 and V818 or #S61_1 and #S64_1 in the questionnaire for ZA No. 3700 ALLBUS 2002), the income was divided by two and the result subsequently rounded to integers.

The collection of income data has been modified over time in order to maximize the number of valid responses.

When analyzing income data, please decide for yourself whether you want to include as valid data persons or households that report a zero income. By default, these cases are already coded as 0, but are defined as missing data.

Respondent's personal income

The respondent's income was surveyed using a single, open question (V813) in 1980 and 1982. From 1984, a second question using a list of categories (V814) was added as a follow up for those who refused to answer the open question (V813). From 1986 to 1992 only respondents who lived in multi-person households were asked to specify their personal income. For respondents living in one-person households, household income (V818) was assumed to equal personal income.

Variable V813 contains the consolidated information of all open questions concerning the respondent's personal income, including the responses of one-person households (V818) from the years 1986-1992. Categorization and integration of this data with the data from the list query was forgone, because there is no unequivocal way of mapping the data from one variable onto the second. V815 provides an example for a consolidation of all data on the respondent's personal income. This variable also includes data from the list query. For each of the listed categories the mid-point of class entered into the summary. The lowest income category 'Under 200 EURO' received the value 150 EURO, while the highest open category of '7500 EURO and over' was coded as 8750 EURO.

Household income

From 1980 to 1984, household income (V820) was calculated from the collection of data on the individual household members. As of 1986, household income was surveyed as a separate question accompanied by a follow up list query to minimize refusals (V818 and V819). From 1994, respondent's living in one-person households no longer received a separate question on their household income on the assumption that household income equals personal income. In these cases, the data from V813 and V814 was recoded into V818 and V819.

V820 contains a consolidation of the data on household income. For 1980 to 1984, the data in V820 was calculated as the sum of the respondent's personal income (V815) and the income of further household members (V1248, V1261, V1274, V1287, V1300, V1313, V1326). If one of these variables contained a missing value ('Refused', 'Don't know' or 'No answer'), no valid income could be calculated. From 1986 onwards, the data in V818 and V819 could be directly included. For each of the listed categories the mid-point of class entered into the summary. The open categories at the beginning ('Under 200 EURO') and at the end ('7500 EURO and over') of the list were coded as 150 EURO and 8750 EURO respectively.

This variable was derived from V813 and V814.

Comment:

Data min./data max.:

1 1 Euro

...

60000 60000 Euro

Note:

Income Variables

In 2002, income was surveyed in EURO for the first time in ALLBUS. In order to maintain the intercomparability of the data and with a view to future ALLBUS-surveys, the income data from ALLBUS 1980 to 2000 has been converted from DM to EURO values for this cumulated data set. As practiced in ALLBUS 2002 (cf. the interviewer instructions in V813 and V818 or #S61_1 and #S64_1 in the questionnaire for ZA No. 3700 ALLBUS 2002), the income was divided by two and the result subsequently rounded to integers.

The collection of income data has been modified over time in order to maximize the number of valid responses.

When analyzing income data, please decide for yourself whether you want to include as valid data persons or households that report a zero income. By default, these cases are already coded as 0, but are defined as missing data.

Respondent's personal income

The respondent's income was surveyed using a single, open question (V813) in 1980 and 1982. From 1984, a second question using a list of categories (V814) was added as a follow up for those who refused to answer the open question (V813). From 1986 to 1992 only respondents who lived in multi-person households were asked to specify their personal income. For respondents living in one-person households, household income (V818) was assumed to equal personal income.

Variable V813 contains the consolidated information of all open questions concerning the respondent's personal income, including the responses of one-person households (V818) from the years 1986-1992. Categorization and

integration of this data with the data from the list query was forgone, because there is no unequivocal way of mapping the data from one variable onto the second. V815 provides an example for a consolidation of all data on the respondent's personal income. This variable also includes data from the list query. For each of the listed categories the mid-point of class entered into the summary. The lowest income category 'Under 200 EURO' received the value 150 EURO, while the highest open category of '7500 EURO and over' was coded as 8750 EURO.

Household income

From 1980 to 1984, household income (V820) was calculated from the collection of data on the individual household members. As of 1986, household income was surveyed as a separate question accompanied by a follow up list query to minimize refusals (V818 and V819). From 1994, respondent's living in one-person households no longer received a separate question on their household income on the assumption that household income equals personal income. In these cases, the data from V813 and V814 was recoded into V818 and V819.

V820 contains a consolidation of the data on household income. For 1980 to 1984, the data in V820 was calculated as the sum of the respondent's personal income (V815) and the income of further household members (V1248, V1261, V1274, V1287, V1300, V1313, V1326). If one of these variables contained a missing value ('Refused', 'Don't know' or 'No answer'), no valid income could be calculated. From 1986 onwards, the data in V818 and V819 could be directly included. For each of the listed categories the mid-point of class entered into the summary. The open categories at the beginning ('Under 200 EURO') and at the end ('7500 EURO and over') of the list were coded as 150 EURO and 8750 EURO respectively.

For respondents living in one-person households, household income (V818) was assumed to equal personal income.

Variable V813 contains the consolidated information of all open questions concerning the respondent's personal income, including the responses of one-person households (V818) from the years 1986-1992. Categorization and integration of this data with the data from the list query was forgone, because there is no unequivocal way of mapping the data from one variable onto the second. V815 provides an example for a consolidation of all data on the respondent's personal income. This variable also includes data from the list query. For each of the listed categories the mid-point of class entered into the summary. The lowest income category 'Under 200 EURO' received the value 150 EURO, while the highest open category of '7500 EURO and over' was coded as 8750 EURO.

Household income

From 1980 to 1984, household income (V820) was calculated from the collection of data on the individual household members. As of 1986, household income was surveyed as a separate question accompanied by a follow up list query to minimize refusals (V818 and V819). From 1994, respondent's living in one-person households no longer received a separate question on their household income on the assumption that household income equals personal income. In these cases, the data from V813 and V814 was recoded into V818 and V819.

V820 contains a consolidation of the data on household income. For 1980 to 1984, the data in V820 was calculated as the sum of the respondent's personal income (V815) and the income of further household members (V1248, V1261, V1274, V1287, V1300, V1313, V1326). If one of these variables contained a missing value ('Refused', 'Don't know' or 'No answer'), no valid income could be calculated. From 1986 onwards, the data in V818 and V819 could be directly included. For each of the listed categories the mid-point of class entered into the summary. The open categories at the beginning ('Under 200 EURO') and at the end ('7500 EURO and over') of the list were coded as 150 EURO and 8750 EURO respectively.

V818 HOUSEHOLD NET INCOME: OPEN QUESTION

How high is the total monthly net income of your household (2002: in EURO)?

By this I mean the amount remaining after deductions for tax and social security contributions.

(Int.: For self-employed, please ask for average monthly net income after deductions for overheads.)

2002:

(Int.: If respondent can only give a figure in DM, divide that figure by 2.)

0 No income

Data min./data max.:

20 20 EURO

...

60000 60000 EURO

Note:

Income Variables

In 2002, income was surveyed in EURO for the first time in ALLBUS. In order to maintain the intercomparability of the data and with a view to future ALLBUS-surveys, the income data from ALLBUS 1980 to 2000 has been converted from DM to EURO values for this cumulated data set. As practiced in ALLBUS 2002 (cf. the interviewer instructions in V813 and V818 or #S61_1 and #S64_1 in the questionnaire for ZA No. 3700 ALLBUS 2002), the income was divided by two and the result subsequently rounded to integers.

The collection of income data has been modified over time in order to maximize the number of valid responses.

When analyzing income data, please decide for yourself whether you want to include as valid data persons or households that report a zero income. By default, these cases are already coded as 0, but are defined as missing data.

Respondent's personal income

The respondent's income was surveyed using a single, open question (V813) in 1980 and 1982. From 1984, a second question using a list of categories (V814) was added as a follow up for those who refused to answer the open question (V813). From 1986 to 1992 only respondents who lived in multi-person households were asked to specify their personal income. For respondents living in one-person households, household income (V818) was assumed to equal personal income.

Variable V813 contains the consolidated information of all open questions concerning the respondent's personal income, including the responses of one-person households (V818) from the years 1986-1992. Categorization and integration of this data with the data from the list query was forgone, because there is no unequivocal way of mapping the data from one variable onto the second. V815 provides an example for a consolidation of all data on the respondent's personal income. This variable also includes data from the list query. For each of the listed categories the mid-point of class entered into the summary. The lowest income category 'Under 200 EURO' received the value 150 EURO, while the highest open category of '7500 EURO and over' was coded as 8750 EURO.

Household income

From 1980 to 1984, household income (V820) was calculated from the collection of data on the individual household members. As of 1986, household income was surveyed as a separate question accompanied by a follow up list query to minimize refusals (V818 and V819). From 1994, respondent's living in one-person households no longer received a separate question on their household income on the assumption that household income equals personal income. In these cases, the data from V813 and V814 was recoded into V818 and V819.

V820 contains a consolidation of the data on household income. For 1980 to 1984, the data in V820 was calculated as the sum of the respondent's personal income (V815) and the income of further household members (V1248, V1261, V1274, V1287, V1300, V1313, V1326). If one of these variables contained a missing value ('Refused', 'Don't know' or 'No answer'), no valid income could be calculated. From 1986 onwards, the data in V818 and V819 could be directly included. For each of the listed categories the mid-point of class entered into the summary. The open categories at the beginning ('Under 200 EURO') and at the end ('7500 EURO and over') of the list were coded as 150 EURO and 8750 EURO respectively.

V819 HOUSEHOLD NET INCOME: LIST QUERY

How high is the total monthly net income of your household (2002: in EURO)?

By this I mean the amount remaining after deductions for tax and social

Note:

Income Variables

In 2002, income was surveyed in EURO for the first time in ALLBUS. In order to maintain the intercomparability of the data and with a view to future ALLBUS-surveys, the income data from ALLBUS 1980 to 2000 has been converted from DM to EURO values for this cumulated data set. As practiced in ALLBUS 2002 (cf. the interviewer instructions in V813 and V818 or #S61_1 and #S64_1 in the questionnaire for ZA No. 3700 ALLBUS 2002), the income was divided by two and the result subsequently rounded to integers.

The collection of income data has been modified over time in order to maximize the number of valid responses.

When analyzing income data, please decide for yourself whether you want to include as valid data persons or households that report a zero income. By default, these cases are already coded as 0, but are defined as missing data.

Respondent's personal income

The respondent's income was surveyed using a single, open question (V813) in 1980 and 1982. From 1984, a second question using a list of categories (V814) was added as a follow up for those who refused to answer the open question (V813). From 1986 to 1992 only respondents who lived in multi-person households were asked to specify their personal income. For respondents living in one-person households, household income (V818) was assumed to equal personal income.

Variable V813 contains the consolidated information of all open questions concerning the respondent's personal income, including the responses of one-person households (V818) from the years 1986-1992. Categorization and integration of this data with the data from the list query was forgone, because there is no unequivocal way of mapping the data from one variable onto the second. V815 provides an example for a consolidation of all data on the respondent's personal income. This variable also includes data from the list query. For each of the listed categories the mid-point of class entered into the summary. The lowest income category 'Under 200 EURO' received the value 150 EURO, while the highest open category of '7500 EURO and over' was coded as 8750 EURO.

Household income

From 1980 to 1984, household income (V820) was calculated from the collection of data on the individual household members. As of 1986, household income was surveyed as a separate question accompanied by a follow up list query to minimize refusals (V818 and V819). From 1994, respondent's living in one-person households no longer received a separate question on their household income on the assumption that household income equals personal income. In these cases, the data from V813 and V814 was recoded into V818 and V819.

V820 contains a consolidation of the data on household income. For 1980 to 1984, the data in V820 was calculated as the sum of the respondent's personal income (V815) and the income of further household members (V1248, V1261, V1274, V1287, V1300, V1313, V1326). If one of these variables contained a missing value ('Refused', 'Don't know' or 'No answer'), no valid income could be calculated. From 1986 onwards, the data in V818 and V819 could be directly included. For each of the listed categories the mid-point of class entered into the summary. The open categories at the beginning ('Under 200 EURO') and at the end ('7500 EURO and over') of the list were coded as 150 EURO and 8750 EURO respectively.

V820 HH INCOME <OPEN QUESTION+LIST QUERY>

Additional text not in questionnaire:

Consolidated net income of household

0 No income

99997 Refused

99998 Don't know

99999 No answer

Derivation of data:

This variable was derived from V818 and V819.

Comment:

Data min./data max.:

20 20 Euro

... ..

60000 60000 Euro

Note:

Income Variables

In 2002, income was surveyed in EURO for the first time in ALLBUS. In order to maintain the intercomparability of the data and with a view to future ALLBUS-surveys, the income data from ALLBUS 1980 to 2000 has been converted from DM to EURO values for this cumulated data set. As practiced in ALLBUS 2002 (cf. the interviewer instructions in V813 and V818 or #S61_1 and #S64_1 in the questionnaire for ZA No. 3700 ALLBUS 2002), the income was divided by two and the result subsequently rounded to integers.

The collection of income data has been modified over time in order to maximize the number of valid responses.

When analyzing income data, please decide for yourself whether you want to include as valid data persons or households that report a zero income. By default, these cases are already coded as 0, but are defined as missing data.

Respondent's personal income

The respondent's income was surveyed using a single, open question (V813) in 1980 and 1982. From 1984, a second question using a list of categories (V814) was added as a follow up for those who refused to answer the open question (V813). From 1986 to 1992 only respondents who lived in multi-person households were asked to specify their personal income. For respondents living in one-person households, household income (V818) was assumed to equal personal income.

Variable V813 contains the consolidated information of all open questions concerning the respondent's personal income, including the responses of one-person households (V818) from the years 1986-1992. Categorization and

integration of this data with the data from the list query was forgone, because there is no unequivocal way of mapping the data from one variable onto the second. V815 provides an example for a consolidation of all data on the respondent's personal income. This variable also includes data from the list query. For each of the listed categories the mid-point of class entered into the summary. The lowest income category 'Under 200 EURO' received the value 150 EURO, while the highest open category of '7500 EURO and over' was coded as 8750 EURO.

Household income

From 1980 to 1984, household income (V820) was calculated from the collection of data on the individual household members. As of 1986, household income was surveyed as a separate question accompanied by a follow up list query to minimize refusals (V818 and V819). From 1994, respondent's living in one-person households no longer received a separate question on their household income on the assumption that household income equals personal income. In these cases, the data from V813 and V814 was recoded into V818 and V819.

V820 contains a consolidation of the data on household income. For 1980 to 1984, the data in V820 was calculated as the sum of the respondent's personal income (V815) and the income of further household members (V1248, V1261, V1274, V1287, V1300, V1313, V1326). If one of these variables contained a missing value ('Refused', 'Don't know' or 'No answer'), no valid income could be calculated. From 1986 onwards, the data in V818 and V819 could be directly included. For each of the listed categories the mid-point of class entered into the summary. The open categories at the beginning ('Under 200 EURO') and at the end ('7500 EURO and over') of the list were coded as 150 EURO and 8750 EURO respectively.

V844 SELF-ASSESSMENT OF PLACE WHERE R LIVES

2000, 2004:

Which of the following categories best describes the place where you live?

Please tick only one answer.

From 2006:

(Int.: Please display card.)

Which of the categories on this card best describes where you live?

Please tell me the appropriate letter.

0 2000: no participation in ISSP 'Environment'; 2004: no participation in ISSP 'National Identity' or ISSP 'Citizenship'; not available 1980-1998, 2002

- 1 A Big city
- 2 B Suburbs or outskirts of a big city
- 3 C Small city or town
- 4 D Country village
- 5 E Farm or home in the country
- 9 No answer

Comment:

Since 1986, the ALLBUS-interview has usually been accompanied by a self-completion questionnaire for the German ISSP-survey (International Social Survey Programme (ISSP)). As a rule the ISSP-questions are not included in this cumulative data set. However, the question documented here has been part of the ALLBUS-interview since 2006.

As an exception to the rule, the relevant ISSP-data was therefore included in this data set.
