Acknowledgements

Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Long term access to and usability of Eurobarometer primary data and documentation is provided in a cooperative arrangement between the Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences (DAS).

Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS through the DBK data catalogue (<http://www.gesis.org/dbk>) and through the ZACAT online data portal (<http://zacat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through the Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

GESIS, Cologne [Publisher]: ZA5596, dataset version 3.0.0, DOI:[10.4232/1.12181](https://doi.org/10.4232/1.12181) (2015).

The registered Digital Object Identifier (DOI) persistently identifies this dataset version with reference to former (or more recent) versions and to the corresponding ERRATA and update documentation in the GESIS data catalogue (DBK).

1.2 Content

1.2.1 Abstract

This round of Eurobarometer surveys covers the standard modules and the following special topics: (1) The Future of Europe, (2) Awareness of Home Affairs, and (3) E-Communications in the Household. Questions pertain to opinions about EU objectives and policy towards social and economic policy and respondents' awareness of social, economic, and political issues in the EU and its member countries. Other questions pertain to the availability, use, and problems with e-communication tools such as telephones and the internet.

Demographic and other background information collected includes age, gender, nationality, marital status, occupation, age when stopped full-time education, household composition, ownership of a fixed or mobile telephone and other durable goods, difficulties paying bills, level within society (self-placed), and Internet use. In addition, country-specific data includes type and size of locality and size of locality, region of residence, and language of interview.

1.2.2 Topic classification

- International Institutions, Relations, Conditions
- Legal system, Legislation, Law
- Communication, Public Opinion, Media
- Technology, Energy

CESSDA Topic Classification

- 6 Law, crime and legal systems
- 9 Information and communication
- 9.1 Information society
- 11.2 International politics and organisations
- 11.3 Conflict, security and peace
- 18.2 Information technology

1.3 Universe

In all, Eurobarometer 76.4 interviewed 26.693 citizens in the 27 countries of the European Union. All respondents were residents in the respective country, nationals and non-nationals but EU-citizens, and aged 15 and over. They were supposed to have sufficient command of one of the respective national language(s) to answer the questionnaire. Separate samples were drawn for Northern Ireland and East Germany.

1.4 Sampling procedure

A multi-stage, random (probability) sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regional units in every country (Statistical Office of the European Community, EUROSTAT NUTS 2 or equivalent). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of starting addresses was selected from each sampled PSU, at random. Further addresses were chosen systematically using standard random route procedures as every Nth address from the initial address. In each household, a respondent was drawn, at random, following the closest birthday rule. No more than one interview was conducted in each household.

The regular sample size (in the sense of completed interviews) is 1000 respondents per country, except the United Kingdom with separate samples for Great Britain (1000) and Northern Ireland (300), Germany with separate samples for the Eastern (500) and the Western part (1000), and Luxembourg and Cyprus (Republic) with 500 interviews each. The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

From December 3 to December 18, 2011, the TNS Opinion & Social, a consortium created between TNS plc and TNS opinion, carried out the fieldwork for this Eurobarometer, at the request of the European Commission, Directorate General Communication. TNS Opinion & Social is based at Avenue Herrmann Debroux, 40, 1160 Brussels, Belgium. TNS Opinion & Social coordinates the fieldwork carried out through its network of national institutes:

1.6 Mode of data collection

In all countries, fieldwork was conducted on the basis of detailed and uniform instructions prepared by TNS Opinion Social. Interviews were conducted face-to-face in people's home in the appropriate national language. As far as the data capture is concerned, CAPI (Computer Assisted Personal Interview) was used in those countries where this technique was available.

Equivalent French and English basic questionnaires were developed for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country. Back-translation procedures were applied for controlling semantic equivalence.

1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all

samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting factors** correct for the fact, that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country or lower level area sample (Great Britain and Northern Ireland, East and West Germany) is represented in proportion to its population size within different groupings according to the historical states of European unification (e.g. founder members, new members, Euro zone countries) in the case of the EUROPEAN WEIGHTS, as well as within the United Kingdom (WEIGHT UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31) or Germany as a whole (WEIGHT GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general all countries or samples which do not belong to the respective group under consideration are excluded from calculation. The special weights for the United Kingdom and Germany do exclude all other countries from calculation starting with Eurobarometer 62. The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

Starting with Eurobarometer 75.4 and in accordance with former practice up to Eurobarometer 61, the archive started to derive (see 1.8. Data preparation) three additional weights W3A, W4A, W3A_W4A in order to provide for the analysis of the United Kingdom and/or Germany as a whole together with all other samples, as separate countries (samples). W3A (WEIGHT RESULT FROM TARGET – UNITED GERMANY) combines the weighting factors for Germany as a whole (redressment factors plus populations size factors East/West) and the redressment factors for all other countries (Great Britain and Northern Ireland separated). W4A (WEIGHT RESULT FROM TARGET – UNITED KINGDOM) combines the weighting factors for the United Kingdom as a whole (redressment factors plus populations size factors) and the redressment factors for all other countries (Germany East and West separated). W3A_W4A (WEIGHT RESULT FROM TARGET – NATION) combines the weighting factors for the United Kingdom as a whole, the weighting factors for Germany as a whole), and the redressment factors for all other countries. Unlike the originating weights, W4 (WEIGHT UNITED KINGDOM ONLY) and W3 (WEIGHT GERMANY ONLY) all countries are included in calculations.

As needed, OVERSAMPLES (see chapter 2.4, table 4) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

Eurobarometer 76.4 provides additional weights for the parts of the questionnaire module on **E-COMMUNICATIONS IN THE HOUSEHOLD (QD)** where respondents are asked to answer for their household, an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices. The total household figures for input in this post-weighting procedure are listed in the technical description annexed to the basic bilingual questionnaire.

Eurobarometer 76.4 provides six (post-stratification) **NATION WEIGHTS: W1 (WEIGHT RESULT FROM TARGET)** for separate analysis or comparison of individual samples (countries or regions on sub-national level), **W4 (WEIGHT UNITED KINGDOM ONLY)** which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole, and **W3 (WEIGHT GERMANY ONLY)**, which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. W3 and W4 exclude all other countries from calculation, but include the post-stratification factors for the United Kingdom and Germany respectively. The corresponding household (HH) weights for the e-communications module are: **W31 (WEIGHT RESULT FROM TARGET – HH)**, **W34 (WEIGHT UNITED KINGDOM ONLY – HH)** and **W33 (WEIGHT UNITED GERMANY ONLY – HH)**.

The **EUROPEAN WEIGHTS** provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries, of accession or candidate countries, and of Euro zone countries, representing different historical states of European integration (e.g. EU6 = six founder members) . All post-stratification factors are included. Corresponding household (HH) weights are available for all European weights, except for euro zone 15 and non-euro zone 16 – EU NMS 12; the population size weights for the accession countries and for euro zone 13 are only available as a household (HH) version.

Table 2: Overview of population size weights on European level (including Household weights)

European Weights in Eurobarometer 76.4	Function
W5 to W9, W11, W14, W22 (HH weights: W35, W36, W37, W38, W39, W41, W44, W52)	grouping EU member countries
W10, W13, W24 (HH weights: W40, W43, W54)	grouping new member countries
(HH weights: W48)	grouping candidate/accession countries
	grouping member + candidate/accession countries
W29 , W30, W81, W82, W84, W84a, W89, W90 (HH weights: W42, W61, W62, W64, W69, W70)	grouping (non-)Eurozone countries

For more detailed information on each individual weight, please see the corresponding variable description.

1.8 Data preparation

The data received by GESIS from TNS Opinion & Social were checked for completeness, missing and duplicate records, for illegal (wild) codes and for (formal) consistency of response patterns and question routing. Errors discovered by these procedures are documented or corrected, as a general rule after consulting related additional documentation (e.g. tabular reports) or the data provider. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable DDI-XML compliant documentation was created for this dataset by GESIS.

Starting with Eurobarometer 76 the traditional variables naming by serial V-numbers (V1 to Vn) has been replaced by a system based on question and item numbers in the questionnaire and elsewhere on standard mnemo-technicals. The dot used in the original TNS variable names for dummy variables is replaced by underscore in view of possible software incompatibility.

The archive identification variables comprise the archive study identification number ('studyno'), the digital object identifier ('doi') of the present dataset version, the version number and date ('version') and the edition type ('edition'). A unique case id ('uniqid') for the complete dataset has been constructed from the TNS country id (digits 1-2) and the TNS case/respondent id (digits 3-8).

Three country/sample identification variables are supplied, maintaining the original country/sample codes ('tncsntry'), applying the established archive standard codes for the Eurobarometer series ('country'), and a alphanumerical variable applying the ISO 3166-1 alpha-2 codes ('isocntry') with adaptations for Great Britain and Northern Ireland (ISO 3166-2), for East and West Germany, and for Northern Cyprus (Turkish Cypriot Community).

GESIS added 'Inappropriate' (INAP) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the original questionnaire was adhered to for (almost) every respondent. An additional INAP category was defined whenever a question or group of questions were not surveyed in one or more countries, or if variables refer to country specific items (e.g. regions).

Users should note that answers to multiple-response questions are (originally) represented by a series of binary 'dummy' variables (i.e. variables which take on values of one and zero only), creating separate 'dummy' variables also to explicitly represent 'Don't know', 'No answer/refusal' or other residual responses, such as 'None of the above'. The archive has recoded these residual responses in the case of uncommon minor inconsistencies with respect to and in favour of the series of substantial answers.

GESIS has recoded the missing answers (NA) represented in the original data set by blanks (system missing) to standard values. Their practically complete absence suggests that eventual cases of any not explicitly coded item non-response, might be collapsed with the DK (don't know) category.

Question text and contingency text appearing in the variable description is taken from English language version of the basic (bilingual) questionnaire (master questionnaire). Coding schemes and other documentation are based on the English language version of the basic questionnaire or on the respective SPSS data definition statements as provided by TNS Opinion & Social. In case of any discrepancy between questionnaires, SPSS definitions and data regarding the coding scheme of a variable, the archive, as a general rule, carried out any correction in agreement with the data provider.

If the documentation for country-specific questions or answer categories is provided in another language than

English, the archive documents the original language wording and supplies the English translation in brackets.

P7 (REGION – NUTS CODES) – variables ‘nuts’ and ‘nutslvl’: The integrated NUTS variable has been derived by the archive from the original TNS country-wise P7 variables in accordance with NUTS units and (alphanumeric) codes defined in the Nomenclature of Territorial Units for Statistics. For each country the lowest subdivision level has been considered insofar consistent with or clearly mappable to one of the NUTS levels as valid for the relevant time period (http://epp.eurostat.ec.europa.eu/portal/page/portal/nuts_nomenclature/history_nuts).

W3A/W4A (NATION WEIGHTS) – variables ‘w3a’/‘cntry_de’, ‘w4a’/‘cntry_gb’, ‘w3a4a’/‘nation’: Starting with Eurobarometer 62 the original SPECIAL WEIGHTS for the UNITED GERMANY (East + West) and the UNITED KINGDOM (Great Britain + Northern Ireland) automatically exclude all other samples/countries from the calculation. In accordance with former practice up to Eurobarometer 61, the archive now started to derive three additional weights (W3A, W4A, W3A_W4A) in order to provide for the analysis of the United Kingdom and/or Germany as a whole together with all other samples, as separate countries (nations). They combine the weights W3 (population size + redressment factor for Germany) or/and W4 (population size + redressment factor for the United Kingdom) with W1 (redressment factor for all other countries).

The original data for the E-COMMUNICATIONS module QC have been provided as a separate dataset. The data have subsequently been matched with the main dataset (QA, QB, demographics and interview protocol) by the archive. The matching was controlled by the unique respondent ID and results were randomly inspected through comparison with findings (cross tabulations) as published in the official report.

The different summary variables provided for module QC have been checked and their derivation been reproduced and documented by the archive.

GERMAN data for variables qc5, qc8, qc9, qc11, qc12, qc14, qc15 and qc16 proved to be erroneous in the original dataset (first TNS delivery). TNS has provided an update which has been integrated accordingly with the archive edition dataset version v2.0.0. (resulting in v3.0.0). The same is true for weighting variables w69 and w70. Weighting variables w84a (formerly not available) and w64 (formerly corrupted) have been added from the TNS update.

More detailed information on data preparation, harmonization or regarding inconsistencies is noted on variable level, if applicable.

1.9 Further remarks

Former surveys on ‘E-communication in the Household’ with partly identical questions are: Eurobarometer 75.1 (ZA5479), 72.5 (ZA4999), 68.2 (ZA4742), 66.3 (ZA4528) and 64.4 (ZA4416).

2 Eurobarometer Series Description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brêthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papacostas as head of unit between 2003 and 2010.

At present Eurobarometer are carried out on the general responsibility of the European Commission Directorate-General Communication, COMM.A.1 'Research and Speechwriting' (starting with 2014: 'Strategy, Corporate Communication Actions and Eurobarometer')

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the

target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizen oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 4: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.2OVR, 55.1OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.2OVR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 5) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 5: Overview of Eurobarometer surveys with standard EU and trend question modules

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

3 Dataset structure and standards

Archive processing and documentation of the Standard and Special Eurobarometer are based on standards agreed between the Inter-university Consortium for Political and Social Research (ICPSR) and the GESIS Data Archive department (formerly Zentralarchiv für Empirische Sozialforschung), which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of administrative/technical variables. These comprise the ARCHIVE and dataset ID variables (studyno1, studyno2, doi, version, edition, survey, split (if applicable), caseid, uniqid), the COUNTRY ID variables with several standard variables identifying the different countries (or sub-national samples) and relevant groups of countries (or sub-national samples) in the dataset, arranged in pairs with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric variable ('isocntry') is provided based on the ISO 3166 country code standard (see 1.8).

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). Starting with Eurobarometer 76.1 the traditional variables naming by serial V-numbers (V1 to Vn) is replaced by a system based on question and item numbers in the questionnaire and elsewhere on standard mnemo-technicals (see 1.8). Likewise from survey 76.1 onwards, constructed total or index variables, usually as provided by the fieldwork institute, are listed right after the question variables on which they are based. The dataset is concluded by three additional weights and their corresponding NATION country variables 'w3a'/'cntry_de', 'w4a'/'cntry_gb', 'w3a4a'/'nation' (see 1.8).

Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 und up to wave 75 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country

specific coding schemes and categories are maintained as a standard over time as long as the category schemes provided in the questionnaire remain comparable.

Starting with Eurobarometer 74.1 an additional standardized REGION variable 'nuts' (REGION – NUTS CODES) is constructed, integrating all participating countries with regional units defined in accordance with the EUROSTAT Nomenclature of Territorial Units for Statistics (NUTS). For each country the lowest available NUTS subdivision level is considered, whereby the hierarchical structure always implies all higher subdivision levels. The official NUTS codes are coded verbatim in accordance with the in each case valid (applicable) NUTS version as documented in the official EUROSTAT classification history (History of NUTS). A second variable indicates the lowest coded NUTS LEVEL 'nutslvl' for each country. All original regional subdivisions and categories remain coded separately and unchanged in the country-wise P7 variables. Details are documented with the respective country specific and/or integrated variable.

3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

3.3 International documentation standard (DDI)

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (COUNTRY CODE - ISO 3166). In the case of Greece the non-ISO abbreviation EL* is used in parallel, as introduced by EUROSTAT as of NUTS version 2010.

AT	Austria	IE	Ireland
BE	Belgium	IT	Italy
BG	Bulgaria	IS	Iceland
CY	Cyprus	LT	Lithuania
CY-TCC	Turkish Cypriote Community	LU	Luxembourg
CZ	Czech Republic	LV	Latvia
DE	Germany (-1989)	ME	Montenegro
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta

GB-GBN	Great Britain	SE	Sweden
GB-NIR	Northern Ireland	SI	Slovenia
GR / EL*	Greece	SK	Slovakia
HR	Croatia	TR	Turkey
HU	Hungary		

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded "real" values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission's official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (<i>M</i>), i.e. <i>percent</i> on the basis of all cases (<i>sum</i>) and <i>valid percent</i> on the basis of the <i>valid cases</i> .																																																																																																																																																																																																																																																																																																																																																					

5 Variable Documentation

Variable, Label

Question Text (English Language)

studyno1 - ARCHIVE STUDY NUMBER - DISTRIBUTOR

ARCHIVE STUDY NUMBER – DISTRIBUTOR

Study Number of the distributing data archive.

5596 GESIS STUDY ID ZA5596

studyno1

Value	Label	Missing	Count	Percent	Valid Percent
5596	GESIS STUDY ID ZA5596		26693	100.0	100.0
	Sum		26693	100.0	100.0
	Valid Cases		26693		

studyno2 - ARCHIVE STUDY NUMBER - PUBLISHER

ARCHIVE STUDY NUMBER – PUBLISHER

Study number of the data archive which is publishing this data set version.

5596 GESIS STUDY ID ZA5596

studyno2

Value	Label	Missing	Count	Percent	Valid Percent
5596	GESIS STUDY ID ZA5596		26693	100.0	100.0
	Sum		26693	100.0	100.0
	Valid Cases		26693		

doi - DIGITAL OBJECT IDENTIFIER**DIGITAL OBJECT IDENTIFIER**

This variable holds the Digital Object Identifier (DOI) for the dataset at hand as registered via the da|ra registration agency for economic and social science data. Each dataset version (see variable 'version') has a unique persistent DOI.

For direct access to the complete archive dissemination package for this study, including new dataset versions, the DOI needs to be appended to the resolver service URL: <http://dx.doi.org/doi:10.4232/1.12181>

In terms of good scientific practice, the DOI is an important element for the correct citation of a dataset.

doi

Value	Label	Missing	Count	Percent	Valid Percent
doi:10.4232/1.12181			26693	100.0	100.0
	Sum		26693	100.0	100.0
	Valid Cases		26693		

version - GESIS ARCHIVE VERSION & DATE

GESIS ARCHIVE VERSION & DATE

3.0.0 '2015-02-20'

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

For details of the version history and for information on errata in current or former dataset versions, please consult the GESIS data catalogue entry (study description) persistently referenced by the dataset DOI (Digital Object Identifier).

version

Value	Label	Missing	Count	Percent	Valid Percent
3.0.0 (2015-02-20)			26693	100.0	100.0
	Sum		26693	100.0	100.0
	Valid Cases		26693		

edition - DATASET EDITION

DATASET EDITION

This variable identifies the type of archive release for the dataset at hand.

- 1 Archive pre-release
- 2 Archive edition

edition

Value	Label	Missing	Count	Percent	Valid Percent
2	ARCHIVE EDITION		26693	100.0	100.0
	Sum		26693	100.0	100.0
	Valid Cases		26693		

survey - SURVEY IDENTIFICATION

SURVEY IDENTIFICATION

The number identifying the Eurobarometer survey.

764 Eurobarometer 76.4 (December 2011)

survey

Value	Label	Missing	Count	Percent	Valid Percent
764	Eurobarometer 76.4 (December 2011)		26693	100.0	100.0
	Sum		26693	100.0	100.0
	Valid Cases		26693		

caseid - TNS CASE ID

TNS CASE ID

The original non-unique case (interview) identification numbers as provided by the fieldwork institute (TNS). The unique respondent identification variable uniqid adds the original country identification codes (tnscntry) as a prefix to the original case ID numbers in order to make them unique.

Note:

Actual number is coded.

uniqid - UNIQUE RESPONDENT ID (CASEID BY TNS COUNTRY CODE)

UNIQUE RESPONDENT ID (CASEID BY TNSCNTRY)

This unique respondent identification is composed of the original TNS country code and the original TNS interview number. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 04: Greece; 05: Spain; 06: Finland; 07: France; 08: Ireland; 09: Italy; 10: Luxembourg; 11: Netherlands; 12: Austria; 13: Portugal; 14: Sweden; 20: Germany West; 21: Germany East; 22: Great Britain; 23: Northern Ireland; 31: Bulgaria; 32: Cyprus (Republic); 33: Czech Republic; 34: Estonia; 35: Hungary; 36: Latvia; 37: Lithuania; 38: Malta; 39: Poland; 40: Romania; 41: Slovakia; 42: Slovenia). The remaining digits contain the country-specific questionnaire numbers.

Note:

Actual number is coded.

tnscntry - ORIGINAL TNS COUNTRY/SAMPLE ID

ORIGINAL TNS COUNTRY/SAMPLE ID

The original country identification codes as applied by the fieldwork institute (TNS).

isocntry - COUNTRY CODE - ISO 3166

COUNTRY CODE - ISO 3166

All surveyed countries and regions, i.e. including separate samples for East-/West-Germany, Great Britain/Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East/West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

Note:

Use of weighting factor w1 is optional.

w1 - WEIGHT RESULT FROM TARGET

W1 WEIGHT RESULT FROM TARGET

This POST-STRATIFICATION WEIGHT is based on a comparison for each sample with the respective universe description. As such in all countries, gender, age, region and size of locality are introduced in the iteration procedure carried out by the fieldwork institutes.

British and Northern Irish as well as East and West German samples are weighted separately. The weight reproduces the real number of cases for each country. In terms of its general function it corresponds to former NATION WEIGHT II (until EUROBAROMETER 31).

w5 - WEIGHT EU6

W5 WEIGHT EU6

This POPULATION SIZE WEIGHT refers to the six EC founder members: France, Belgium, Netherlands, West Germany, Italy, and Luxembourg. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w5 must be applied whenever these six EC founder countries are to be analyzed altogether as a group.

w6 - WEIGHT EU9

W6 WEIGHT EU9

This POPULATION SIZE WEIGHT adds Denmark, Ireland, Great Britain and Northern Ireland to the EU6 countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w6 must be applied whenever these nine countries as of the 1973 enlargement are to be analyzed altogether as a group.

w9 - WEIGHT EU12+DE-E

W9 WEIGHT EU12 + DE-E

This POPULATION SIZE WEIGHT equals WEIGHT EU12 but in addition including East Germany (former German Democratic Republic) after the unification of Germany on October 3, 1990 (Eurobarometer 34). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w9 must be applied whenever these twelve member countries are to be analyzed altogether as a group including the Eastern part of Germany (new German federal states).

w13 - WEIGHT EU NMS 10

W13 WEIGHT EU NMS10

This POPULATION SIZE WEIGHT only refers to the group of the ten new members as of the enlargement in 2004: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia and Slovenia. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w13 must be applied whenever these ten countries are to be analyzed altogether as a group.

w14 - WEIGHT EU25

W14 WEIGHT EU25

This POPULATION SIZE WEIGHT adds Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia and Slovenia to the EU15 countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) group of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w14 must be applied whenever these 25 countries as of the 2004 enlargement are to be analyzed altogether as a group.

w22 - WEIGHT EU27

W22 WEIGHT EU27

This POPULATION SIZE WEIGHT includes all 25 member countries after the 2004 enlargement, plus the Accession Countries Bulgaria and Romania. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of the European Union plus Bulgaria and Romania. The post-stratification weighting factors for all samples/countries are included. Weight w22 should be used whenever all 27 countries participating in this wave are to be analysed as a group.

w29 - WEIGHT EURO ZONE 15

W29 WEIGHT EURO ZONE 15

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2008. These are 15 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w29 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

w84 - WEIGHT NON-EURO ZONE 16 - EU NMS 12

W84 WEIGHT NON-EURO ZONE 16 - EU NMS 12

This POPULATION SIZE WEIGHT separates the group of countries (Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Bulgaria, and Romania) belonging to the 12 new members after the enlargement of January 2007 which did not introduce the EURO up to January 1, 2009. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w84 must be applied whenever these 8 countries are to be analyzed altogether as a group.

w89 - WEIGHT EURO ZONE 17

W89 WEIGHT EURO ZONE 17

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2011. These are 17 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008), Slovakia (introduction as of January 1, 2009), and Estonia (introduction as of January 1, 2011). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w89 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

w84a - WEIGHT NON-EURO ZONE 17 - EU NMS 12**W84A WEIGHT NON-EURO ZONE 17 - EU NMS 12**

This POPULATION SIZE WEIGHT separates the group of countries (Czech Republic, Hungary, Latvia, Lithuania, Poland, Bulgaria, and Romania) belonging to the 12 new members after the enlargement of January 2007 which did not introduce the EURO up to January 1, 2011. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w84a must be applied whenever these 7 countries are to be analyzed altogether as a group.

Note:

Weighting factor w84a only available starting with dataset version 3.0.0.

w31 - WEIGHT RESULT FROM TARGET - HH

W31 WEIGHT RESULT FROM TARGET – HOUSEHOLD WEIGHT

This POST-STRATIFICATION WEIGHT is based on a comparison for each sample with the respective universe description in terms of households. British and Northern Irish as well as East and West German samples are weighted separately.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

w35 - WEIGHT EU6 - HH

W35 WEIGHT EU6 - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT refers to the six EC founder members: France, Belgium, Netherlands, West Germany, Italy, and Luxembourg. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. Weight w35 must be applied whenever these six EC founder countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

w36 - WEIGHT EU9 - HH

W36 WEIGHT EU9 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT adds Denmark, Ireland, Great Britain and Northern Ireland to the EU6 countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. Weight w36 must be applied whenever these nine countries as of the 1973 enlargement are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

w37 - WEIGHT EU10 - HH

W37 WEIGHT EU10 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT adds Greece to the EU9 countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. Weight w37 must be applied whenever these ten countries as of the 1981 enlargement are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

w39 - WEIGHT EU12+DE-E - HH

W39 WEIGHT EU12 + DE-E – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT equals WEIGHT EU12 but in addition including East Germany (former German Democratic Republic) after the unification of Germany on October 3, 1990 (Eurobarometer 34). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. Weight w39 must be applied whenever these twelve member countries are to be analyzed altogether as a group including the Eastern part of Germany (new German federal states).

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

w40 - WEIGHT EU NMS 3 - HH

W40 WEIGHT EU NMS 3 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT only refers to the three new members as of January 1995: Finland, Sweden, and Austria. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. All other samples are excluded from calculation. Weight w40 must be applied whenever these three countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

w41 - WEIGHT EU15 - HH

W41 WEIGHT EU15 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT adds Austria, Finland, and Sweden to the EU12+ countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. Weight w41 must be applied whenever these 15 countries as of the 1995 enlargement are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

w42 - WEIGHT EURO ZONE 13 - HH

W42 WEIGHT EURO ZONE 13 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2007. These are 13 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), and Slovenia (introduction as of January 1, 2007). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. Weight w42 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

Note:

WEIGHT EURO ZONE 13 only available as household version.

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

w43 - WEIGHT EU NMS 10 - HH

W43 WEIGHT EU NMS 10 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT only refers to the group of the ten new members as of the enlargement in 2004: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia and Slovenia. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. All other samples are excluded from calculation. Weight w43 must be applied whenever these ten countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

w44 - WEIGHT EU25 - HH

W44 WEIGHT EU25 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT adds Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia and Slovenia to the EU15 countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) group of countries. All other samples are excluded from calculation. Weight w44 must be applied whenever these 25 countries as of the 2004 enlargement are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

w48 - WEIGHT AC (BG RO) - HH

W48 WEIGHT AC (BG RO) – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT refers to Bulgaria and Romania. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of future EU accession countries. All other countries are excluded from calculation. Weight w48 must be applied whenever these two countries are to be analyzed altogether as a group.

Note:

WEIGHT AC only available as household version.

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

w52 - WEIGHT EU27 - HH

W52 WEIGHT EU27 – HOUSEHOLD WEIGHT

WEIGHT EU27 includes all 25 member countries after the 2004 enlargement, plus the remaining Accession Countries Bulgaria and Romania. This POPULATION SIZE WEIGHT adjusts each national sample in proportion to its share in the total population aged 15 and over, of the European Union plus Bulgaria and Romania. Weight w52 should be used whenever all 27 countries participating in this wave are to be analysed as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

w54 - WEIGHT EU NMS 12 - HH

W54 WEIGHT EU NMS 12 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT refers to the group of the 12 new member countries as of the enlargement in January 2007: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia, Bulgaria and Romania. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. All other samples are excluded from calculation. Weight w54 must be applied whenever these 12 countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

w61 - WEIGHT EURO ZONE 16 - HH

W61 WEIGHT EURO ZONE 16 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2009. These are 16 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008), and Slovakia (introduction as of January 1, 2009). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w61 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

w64 - WEIGHT NON-EURO ZONE 17 - EU NMS 12 - HH

W64 WEIGHT NON-EURO ZONE 17 – EU NMS 12 - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT separates the group of countries (Czech Republic, Hungary, Latvia, Lithuania, Poland, Bulgaria, and Romania) belonging to the 12 new members after the enlargement of January 2007 which did not introduce the EURO up to January 1, 2011. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w64 must be applied whenever these 7 countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

Weighting factor w64 only available starting with dataset version 3.0.0.

w69 - WEIGHT EURO ZONE 17 - HH

W69 WEIGHT EURO ZONE 17 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2011. These are 17 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008), Slovakia (introduction as of January 1, 2009), and Estonia (introduction as of January 1, 2011). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w69 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

Note:

Weighting factors for HOUSEHOLD WEIGHT w69 were erroneous in former dataset versions (v1.0.0 and v2.0.0). A new dataset has been provided by TNS and the correct weighting factors have been merged into the present dataset version (v3.0.0).

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

wex_hh - WEIGHT EXTRAPOLATED HOUSEHOLDS

WEX WEIGHT EXTRA POPULATION – HOUSEHOLD WEIGHT

WEIGHT EXTRA extrapolates the actual universe (population aged 15 or more) for each country (sample), i.e. this weight variable integrates all other available weights, but does not reproduce the number of cases in the data set.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.C), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

qa2t_1 - EU IN MIND: POSITIVE PERCEPTIONS

QA2T_1 EU IN MIND: POSITIVE PERCEPTIONS (TOTAL)

qa2t_1 Positive perceptions

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes responses with positive perceptions to qa2. It shows the number of respondents who were coded 1 at least once for the following items of qa2: qa2_1, qa2_4, qa2_6, qa2_11-qa2_12, qa2_21-qa2_23, qa2_25, qa2_27-qa2_28, qa2_30, qa2_32.

Note:

See variable qa2 for complete question text.

The derivation description has been deduced from the summarized variables as provided by TNS. The classification of the items as "negative", "neutral" or "positive" might for particular cases be reviewed, in due consideration of the fact that all items for their part are already summarized and grouped answers to an open ended question.

qa2t_2 - EU IN MIND: NEUTRAL PERCEPTIONS

QA2T_2 EU IN MIND: NEUTRAL PERCEPTIONS (TOTAL)

qa2t_2 Neutral perception

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes responses with neutral perceptions to qa2. It shows the number of respondents who were coded 1 at least once for the following items of qa2: qa2_2-qa2_3, qa2_5, qa2_17-qa2_18, qa2_20, qa2_24.

Note:

See variable qa2 for complete question text.

The derivation description has been deduced from the summarized variables as provided by TNS. The classification of the items as "negative", "neutral" or "positive" might for particular cases be reviewed, in due consideration of the fact that all items for their part are already summarized and grouped answers to an open ended question.

qb6 - DEMOGRAPHIC TREND - ENCOURAGE LABOUR MIGRATION

QB6

When thinking about the demographic challenges ahead (e.g. ageing population) and the need for filling in labour shortages in certain sectors of EU economy (e.g. healthcare, new technologies), some people think that the EU should encourage labour migration from non-EU countries. Would you say you...?

(READ OUT – ONE ANSWER ONLY)

- 1 Totally agree
- 2 Tend to agree
- 3 Tend to disagree
- 4 Totally disagree
- 5 It depends on the circumstances (SPONTANEOUS)
- 6 DK

qb7_4 - ASYLUM - SHARE COSTS AMONG EU MEMBERS

QB7

Asylum is granted to people who, out of fear of being persecuted for reasons of race, religion, nationality or other, are outside their country of origin and are in need of international protection. To what extent do you agree or disagree with each of the following statements?

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE - READ OUT)

QB7_4 The costs of providing asylum should be shared among all EU Member States

- 1 Totally agree
- 2 Tend to agree
- 3 Tend to disagree
- 4 Totally disagree
- 5 DK

qb11 - FORCED LABOUR EXPLOITATION - EU PROBLEM

QB11

Some people are forced into labour or sexual exploitation throughout the world and also in the EU. How important would you say it is for the EU to address this problem?

(READ OUT – ONE ANSWER ONLY)

- 1 Very important
- 2 Fairly important
- 3 Not very important
- 4 Not at all important
- 5 DK

d43t - PHONE AVAILABLE (SUMMARIZED)

D43T PHONE AVAILABLE - LANDLINE/MOBILE - SUMMARIZED

- 1 Mobile only (coded 1 in d43b and 2 in d43a)
- 2 Landline only (coded 1 in d43a and 2 in d43b)
- 3 Landline and mobile (coded 1 in d43a and 1 in d43b)
- 4 No telephone (coded 2 in d43a and 2 in d43b)

Derivation:

This variable summarizes answers to question d43a and d43b.

Respondents coded 2 in d43a and 1 in d43b are coded 1 ("Mobile only") in d43t. Respondents coded 1 in d43a and 2 in d43b are coded 2 ("Landline only") in d43t. Respondents coded 1 in d43a and d43b are coded 3 ("Landline and mobile") in d43t. Respondents coded 2 in d43a and d43b are coded 4 ("No telephone") in d43t.

Note:

See d43a and d43b for complete question text.

qc2_3r - MOBILE PHONES HH - INTERNET CONTRACT (RECODED)

QC2_3R MOBILE PHONE SUBSCRIPTION WITH ACCESS TO INTERNET (HOUSEHOLD) – RECODED

QC2_3R (ONLY IF MOBILE PHONE IN ITEM 1 OR 2) Mobile phone subscription giving access to Internet e.g. for playing or downloading audio / video content or sending and receiving e-mails

- 0 None
- 1 Box 1
- 2 Box 2
- 3 Box 3
- 4 4 or more
- 8 DK
- 9 Inap. No mobile phone in household or DK (coded 0 or 11 in qc2_1 and qc2_2)

Derivation:

This variable groups answers to question qc2_3.

Note:

See qc2 for complete question text.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

qc2t - MOBILE PHONES HH (TOTAL QC2_1+QC2_2)

QC2T MOBILE PHONES HOUSEHOLD – TOTAL QC2_1 + QC2_2

- 1 Households with mobile phone only contract
- 2 Households with mobile phone only pre-paid
- 3 Households with mobile phone access on both (contract & prepaid)
- 4 Households without mobile phone access

Derivation:

Respondents coded 1 to 9 in both qc2_1 and qc2_2 are coded '3' ("Households with mobile phone access on both (contract & prepaid)").

Respondents coded '0' ("None") or '11' ("DK") in both qc2_1 and qc2_2 are summarized in category '4' ("Households without mobile phone access").

Note:

See qc2 for complete question text.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

qc4_1 - TV RECEPTION VIA: AERIAL

QC4

ASK QC4 IF "TELEVISION IN THE HOUSEHOLD", CODE 1 IN D46 – OTHERS GO TO QC5

Does your household receive the television via...?

(SHOW CARD – READ OUT – MULTIPLE ANSWERS POSSIBLE)

QC4_1 An aerial (on the roof or on the top of the TV set)

0 Not mentioned

1 Mentioned

9 Inap. No television in household (coded 0 in d46_1)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qc4_3 - TV RECEPTION VIA: CABLE NETWORK ANALOG

QC4

ASK QC4 IF "TELEVISION IN THE HOUSEHOLD", CODE 1 IN D46 – OTHERS GO TO QC5

Does your household receive the television via...?

(SHOW CARD – READ OUT – MULTIPLE ANSWERS POSSIBLE)

QC4_3 A cable TV network (analog = directly connected to the TV set)

0 Not mentioned

1 Mentioned

9 Inap. No television in household (coded 0 in d46_1)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Data for Germany were not correct in former dataset versions (v1.0.0 and v2.0.0). A new dataset has been provided by TNS and the correct data have been merged into the present dataset version (v3.0.0).

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qc5_7 - INTERNET ACCESS HH: OPTICAL FIBRE LINE

QC5

ASK QC5 TO QC16 IF "INTERNET IN THE HOUSEHOLD", CODE 5 IN D46 – OTHERS GO TO QC17

How does your household access the Internet from home?

(SHOW CARD – READ OUT – MULTIPLE ANSWERS POSSIBLE)

QC5_7 Via an optical fibre line (SPONTANEOUS)

0 Not mentioned

1 Mentioned

9 Inap. No internet in household (coded 0 in d46_5)

Note:

Data for Germany were not correct in former dataset versions (v1.0.0 and v2.0.0). A new dataset has been provided by TNS and the correct data have been merged into the present dataset version (v3.0.0).

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qc5r_4 - INTERNET ACCESS SINGLE HH: MOBILE BROADBAND

QC5R_4 INTERNET ACCESS SINGLE HOUSEHOLD: MOBILE BROADBAND

qc5r_4 Single households with mobile broadband

0 Not mentioned

1 Mentioned

9 Inap. No internet via mobile phone network (not coded 1 in qc5_4)

Derivation:

This variable repeats answers to qc5_4, but only for respondents in single households (coded 1 (number of people in household) in variable d40t).

Note:

Data for Germany were not correct in former dataset versions (v1.0.0 and v2.0.0). A new dataset has been provided by TNS and the correct data have been merged into the present dataset version (v3.0.0).

See qc5 for complete question text.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

qc5r_5 - INTERNET ACCESS MULTPL HH: MOBILE BROADBAND

QC5R_5 INTERNET ACCESS MULTIPLE OCCUPANCY HOUSEHOLD: MOBILE BROADBAND

qc5r_5 Multiple occupancy households with mobile broadband

0 Not mentioned

1 Mentioned

9 Inap. No internet via mobile phone network (not coded 1 in qc5_4)

Derivation:

This variable repeats answers to qc5_4, but only for respondents in multiple occupancy households (coded 2 or more (number of people in household) in variable d40t).

Note:

Data for Germany were not correct in former dataset versions (v1.0.0 and v2.0.0). A new dataset has been provided by TNS and the correct data have been merged into the present dataset version (v3.0.0).

See qc5 for complete question text.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. qc6a - INTERNET SUBSCRIPTION - MAIN FACTOR

ASK QC5 TO QC16 IF "INTERNET IN THE HOUSEHOLD", CODE 5 IN D46

QC6A

When subscribing to an Internet connection what are the main factors you consider? Firstly?

(SHOW CARD – READ OUT – ROTATE - ONE ANSWER ONLY)

- 1 The maximum download speed
- 2 The maximum amount you can download / upload
- 3 The price of the Internet subscription
- 4 The fact that the Internet subscription is part of a bundle (INT.: IF NEEDED: By bundle, we mean a combined package offering more than one communication service from the same provider at a global price)
- 5 The customer service offered
- 6 The cost of the terminal equipment
- 7 The cost of installation
- 8 Other (SPONTANEOUS)
- 9 DK
- 99 Inap. No internet in household (coded 0 in d46_5)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qc6b_9 - INTERNET SUBSCRIPTION FACTORS: DK

ASK QC5 TO QC16 IF "INTERNET IN THE HOUSEHOLD", CODE 5 IN D46 / DO NOT ASK IF DK IN QC6A

[QC6A

When subscribing to an Internet connection what are the main factors you consider? Firstly?]

QC6B

And then?

(SHOW CARD – READ OUT – ROTATE - MAX. 3 ANSWERS)

QC6B_9 DK

0 Not mentioned

1 Mentioned

9 Inap. No internet in household or DK in qc6a (coded 0 in d46_5 or coded 9 in qc6a)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qc7 - INTERNET USE FOR PHONE CALLS IN HH

ASK QC5 TO QC16 IF "INTERNET IN THE HOUSEHOLD", CODE 5 IN D46

QC7

Does any household member, including yourself, use a PC or a wifi connected device, at home to make phone calls over the Internet?
(READ OUT – ONE ANSWER ONLY)

- 1 No
- 2 Yes, you (or a member of your household) call users who have subscribed to the same Internet phone service as you, for free (INT.: Internet call sites such as SKYPE)
- 3 Yes, you (or a member of your household) make cheap international calls to landlines or mobile phones by means of an Internet phone service
- 4 Yes, both options (SPONTANEOUS)
- 5 DK
- 9 Inap. No internet in household (coded 0 in d46_5)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qc8 - MAXIMUM DOWNLOAD SPEED CONTRACTED MBPS

ASK QC5 TO QC16 IF "INTERNET IN THE HOUSEHOLD", CODE 5 IN D46

QC8

ASK QC8 AND QC9.1 IF "BROADBAND INTERNET ACCESS AT HOME", CODES 2 TO 7 IN QC5 – OTHERS GO TO QC9.2

What is the maximum download speed under the terms of your contract?

(If respondents give an answer in a different unit than 'Mbps', please recode it as a wrong answer, code "998" - IF "DK", PLEASE CODE "999")

0 0 Mbps

900 900 Mbps

996 Incorrect answers (different unit than Mbps)

998 DK

999 Inap. No broadband internet access at home (not coded 1 in qc5_2 to qc5_7)

Note:

Data for Germany were not correct in former dataset versions (v1.0.0 and v2.0.0). A new dataset has been provided by TNS and the correct data have been merged into the present dataset version (v3.0.0).

Original code "999" recoded to "998".

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qc8r - MAXIMUM DOWNLOAD SPEED CONTRACTED (RECODED)

QC8R MAXIMUM DOWNLOAD SPEED CONTRACTED (RECODED)

- 1 Less than 2 Mbps
- 2 2 - 6 Mbps
- 3 7-15 Mbps
- 4 16-30 Mbps
- 5 More than 30 Mbps
- 6 Incorrect answers (different unit than Mbps)
- 8 DK
- 9 Inap. No broadband internet access at home (not coded 1 in qc5_2 to qc5_7)

Derivation:

This variable collapses answers to qc8 into five categories.

Note:

Data for Germany were not correct in former dataset versions (v1.0.0 and v2.0.0). A new dataset has been provided by TNS and the correct data have been merged into the present dataset version (v3.0.0).

See qc8 for complete question text.

qc10 - INTERNET SPEED/CAPACITY - DIFFICULTIES

QC10

ASK QC10 TO QC16 IF "INTERNET IN THE HOUSEHOLD", CODE 5 IN D46 – OTHERS GO TO QC17

Have you experienced difficulties accessing online content and applications due to insufficient speed or downloading data capacity?

(READ OUT - ONE ANSWER ONLY)

- 1 Yes, often
- 2 Yes, sometimes
- 3 No, never
- 4 DK
- 9 Inap. No internet in household (coded 0 in d46_5)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qc11 - INTERNET SPEED/CAPACITY - WOULD PAY MORE

ASK QC10 TO QC16 IF "INTERNET IN THE HOUSEHOLD", CODE 5 IN D46 – OTHERS GO TO QC17

QC11

ASK QC11 AND QC12 IF "BROADBAND INTERNET ACCESS AT HOME", CODES 2 TO 7 IN QC5 – OTHERS GO TO QC13

Would you be prepared to pay more for an Internet connection with a higher speed or downloading data capacity than your current one?
(SHOW CARD – READ OUT – ONE ANSWER ONLY)

- 1 No, you are not prepared to pay more
- 2 Yes, you would be prepared to pay up to 15% more
- 3 Yes, you would be prepared to pay 16 to 33% more
- 4 Yes, you would be prepared to pay more than 33% more
- 5 DK
- 9 Inap. No broadband internet access at home (no code 1 in qc5_2 to qc5_7)

Note:

Data for Germany were not correct in former dataset versions (v1.0.0 and v2.0.0). A new dataset has been provided by TNS and the correct data have been merged into the present dataset version (v3.0.0).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

9 Inap. Not prepared to pay more for higher speed or downloading data capacity (not coded 2 to 4 in qc11)

Note:

Data for Germany were not correct in former dataset versions (v1.0.0 and v2.0.0). A new dataset has been provided by TNS and the correct data have been merged into the present dataset version (v3.0.0).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qc12_9 - INTERNET SPEED/CAPACITY FOR: DK

ASK QC10 TO QC16 IF "INTERNET IN THE HOUSEHOLD", CODE 5 IN D46 / ASK QC11 AND QC12 IF "BROADBAND INTERNET ACCESS AT HOME", CODES 2 TO 7 IN QC5

QC12

ASK QC12 IF "PREPARED TO PAY MORE FOR A HIGHER SPEED OR DOWNLOADING DATA CAPACITY", CODES 2 TO 4 IN QC11 – OTHERS GO TO QC13

Why would you be prepared to pay more for an Internet connection with a higher speed or downloading data capacity?
(SHOW CARD – READ OUT – ROTATE – MULTIPLE ANSWERS POSSIBLE)

QC12_9 DK

- 0 Not mentioned
- 1 Mentioned
- 9 Inap. Not prepared to pay more for higher speed or downloading data capacity (not coded 2 to 4 in qc11)

Note:

Data for Germany were not correct in former dataset versions (v1.0.0 and v2.0.0). A new dataset has been provided by TNS and the correct data have been merged into the present dataset version (v3.0.0).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qc13_6 - INTERNET PROVIDER CHANGE: RISK OF SERVICE LOSS

QC13

ASK QC13 TO QC16 IF "INTERNET IN THE HOUSEHOLD", CODE 5 IN D46 – OTHERS GO TO QC17

Have you or someone in your household ever considered changing Internet service provider?

(SHOW CARD – READ OUT – ROTATE ITEMS 2 TO 11 – MULTIPLE ANSWERS POSSIBLE)

QC13_6 Yes, but you don't want to take the risk of a temporary loss of service during the switching process

0 Not mentioned

1 Mentioned

9 Inap. No internet in household (coded 0 in d46_5)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

ASK QC13 TO QC16 IF "INTERNET IN THE HOUSEHOLD", CODE 5 IN D46 – OTHERS GO TO QC17

Have you or someone in your household ever considered changing Internet service provider?

(SHOW CARD – READ OUT – ROTATE ITEMS 2 TO 11 – MULTIPLE ANSWERS POSSIBLE)

QC13_12 Other (SPONTANEOUS)

0 Not mentioned

1 Mentioned

9 Inap. No internet in household (coded 0 in d46_5)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qc13t_1 - INTERNET PROVIDER CHANGE: INERTIAL CONSUMERS

QC13T_1 INTERNET PROVIDER CHANGE: INERTIAL CONSUMERS

QC13T_1 Inertial consumers

0 Not mentioned

1 Mentioned

9 Inap. Other or DK in qc13 (not coded 1 in qc13_1 to qc13_11)

Derivation:

This variable indicates the group of inertial consumers in qc13. It shows the number of respondents who were coded 1 at least once for the following items of qc13: qc13_1, qc13_2, qc13_5, qc13_10.

Note:

See qc13 for complete question text.

The derivation description has been deduced from the summarized variables as provided by TNS. It does not coincide with the description on page 99 of the official report (TNS Opinion & Social: Special Eurobarometer 381 / Wave 76.4: E-Communications Household Survey. Survey requested by the European Commission, Directorate-General for Information Society and Media, and co-ordinated by Directorate-General for Communication. Brussels, June 2012). In particular the report references question items which have not been asked in the context of Eurobarometer 76.4 but only in the forerunner study 75.1. The frequency results presented in the report do coincide with the variables in the dataset.

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

qc13t - INTERNET PROVIDER CHANGE - YES CONSIDERED (TOTAL)

QC13T INTERNET PROVIDER CHANGE - YES CONSIDERED (TOTAL)

0 Not mentioned

1 Mentioned

9 Inap. No internet in household (coded 0 in d46_5)

Derivation:

This variable summarizes responses to qc13_2 and qc13_11.

Note:

See qc13 for complete question text.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

qc14 - INTERNET CONTENT BLOCKING - EXPERIENCED

ASK QC13 TO QC16 IF "INTERNET IN THE HOUSEHOLD", CODE 5 IN D46

QC14

ASK QC14 TO QC16 IF "BROADBAND INTERNET ACCESS AT HOME", CODES 2 TO 7 IN QC5 – OTHERS GO TO QC17

While surfing on the Internet from home, have you experienced any kind of blocking of certain online content and applications? (INT.: Internet blocking, also known as web filtering, prohibits users from accessing certain online content and applications)

(READ OUT – ONE ANSWER ONLY)

- 1 Yes, often
- 2 Yes, sometimes
- 3 No, never
- 4 DK
- 9 Inap. No broadband internet access at home (not coded 1 in qc5_2 to qc5_7)

Note:

Data for Germany were not correct in former dataset versions (v1.0.0 and v2.0.0). A new dataset has been provided by TNS and the correct data have been merged into the present dataset version (v3.0.0).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Comparability:

In which of the following cases have you experienced blocking online content and applications? When trying to ...

(SHOW CARD – READ OUT – ROTATE – MULTIPLE ANSWERS POSSIBLE)

QC15_4 Watch live events (sports, news, etc.)

0 Not mentioned

1 Mentioned

9 Inap. No blocking experienced or DK (not coded 1 or 2 in qc14)

Note:

Data for Germany were not correct in former dataset versions (v1.0.0 and v2.0.0). A new dataset has been provided by TNS and the correct data have been merged into the present dataset version (v3.0.0).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

QC15_10 DK

0 Not mentioned

1 Mentioned

9 Inap. No blocking experienced or DK (not coded 1 or 2 in qc14)

Note:

Data for Germany were not correct in former dataset versions (v1.0.0 and v2.0.0). A new dataset has been provided by TNS and the correct data have been merged into the present dataset version (v3.0.0).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Note:

Data for Germany were not correct in former dataset versions (v1.0.0 and v2.0.0). A new dataset has been provided by TNS and the correct data have been merged into the present dataset version (v3.0.0).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qc17 - MOBILE INTERNET BLOCKING - EXPERIENCED

QC17

ASK QC17 TO QC19 IF "OWN A PERSONAL MOBILE PHONE WITH AN ACCESS TO THE INTERNET", CODE 1 IN QC1 – OTHERS GO TO QC20

While surfing on the Internet using your mobile phone, have you experienced any kind of blocking of certain online content and applications?

(INT.: Internet blocking, also known as web filtering, prohibits users from accessing certain online content and applications)

(READ OUT – ONE ANSWER ONLY)

- 1 Yes, often
- 2 Yes, sometimes
- 3 No, never
- 4 DK
- 9 Inap. No personal mobile phone with Internet access (not coded 1 in qc1)

Note:

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

Comparability:

qc21_7 - COMMUNICATION PACKAGE HH: DK

QC21

ASK ALL

By bundle, we mean a combined package offering more than one communication service from the same provider at a global price. Does your household buy two or more of the following services as part of a bundle?

(READ OUT – MIN. 2 ANSWERS)

QC21_7 DK

0 Not mentioned

1 Mentioned

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

qc21t - COMMUNICATION PACKAGE HH - COMBINATION (TOTAL)

QC21T COMMUNICATION PACKAGE HOUSEHOLD - COMBINATION (TOTAL)

- 1 1+2+3+4
- 2 1+2+3
- 3 1+2+4
- 4 1+3+4
- 5 2+3+4
- 6 1+2
- 7 1+3
- 8 1+4
- 9 2+3
- 10 2+4
- 11 3+4
- 98 No combination
- 99 No service mentioned (coded 1 in qc21_5, qc21_6 or qc21_7)

Derivation:

This variable summarizes answers to qc21 by categorizing the different combinations of services (coded 1 in qc21_1 to qc21_4) contracted in communication packages. All respondents coded 1 only in qc21_5 to qc21_7 ("none", "other" and "DK" answers) are coded 99 (No service mentioned).

Note:

See qc21 for complete question text.

This variable informs about the different composition of communication packages in a household. The numbering of the services are based on the numbering of the subquestions (1 "TV channels", 2 "Fixed phone", 3 "Mobile phone", 4 "Internet").

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

qc23_2c - BUNDLE OFFERS: READ TARIFF COMPARISONS (IF NONE)

QC23_2C BUNDLE OFFERS: TARIFFS EASY TO COMPARE (IF NONE)

QC23_2C You regularly read comparisons of tariff bundles (if none)

- 1 Totally agree
- 2 Tend to agree
- 3 Tend to disagree
- 4 Totally disagree
- 5 Not Applicable (SPONTANEOUS)
- 6 DK
- 9 Inap. Communication package or DK (not coded 1 in qc21_5)

Derivation:

This variable shows the answers to this item of qc22 for respondents who answered "none" to qc21 (qc21_5).

Note:

See qc23 for complete question text.

qc24_1 - BUNDLE PROVIDER CHANGE: NOT CONSIDERED

QC24

ASK QC24 IF "HAVE A BUNDLE", NO CODE 5 OR 7 IN QC21 – OTHERS GO TO QC25

Have you or someone in your household ever considered changing your bundle provider?

(SHOW CARD – READ OUT – ROTATE ITEMS 2 TO 11 – MULTIPLE ANSWERS POSSIBLE)

QC24_1 No, you have never considered it

0 Not mentioned

1 Mentioned

9 Inap. No bundle or DK (coded 1 in qc21_5 or qc21_7)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

qc24_5 - BUNDLE PROVIDER CHANGE: DECIDED NOT TO SWITCH

QC24

ASK QC24 IF "HAVE A BUNDLE", NO CODE 5 OR 7 IN QC21 – OTHERS GO TO QC25

Have you or someone in your household ever considered changing your bundle provider?

(SHOW CARD – READ OUT – ROTATE ITEMS 2 TO 11 – MULTIPLE ANSWERS POSSIBLE)

QC24_5 Yes, but eventually your provider offered you better conditions and you decided not to switch

0 Not mentioned

1 Mentioned

9 Inap. No bundle or DK (coded 1 in qc21_5 or qc21_7)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

qc24_11 - BUNDLE PROVIDER CHANGE: OTHER

QC24

ASK QC24 IF "HAVE A BUNDLE", NO CODE 5 OR 7 IN QC21 – OTHERS GO TO QC25

Have you or someone in your household ever considered changing your bundle provider?

(SHOW CARD – READ OUT – ROTATE ITEMS 2 TO 11 – MULTIPLE ANSWERS POSSIBLE)

QC24_11 Other (SPONTANEOUS)

0 Not mentioned

1 Mentioned

9 Inap. No bundle or DK (coded 1 in qc21_5 or qc21_7)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

qc24t_1 - BUNDLE PROVIDER CHANGE: INERTIAL CONSUMERS

QC24T_1 BUNDLE PROVIDER CHANGE: INERTIAL CONSUMERS

QC24T_1 Inertial consumers

0 Not mentioned

1 Mentioned

9 Inap. No bundle or Other/DK in qc24 (coded 1 in qc21_5 or qc21_7 OR coded 0 in qc24_1 to qc24_10)

Derivation:

This variable indicates the group of inertial consumers in qc24. It shows the number of respondents who were coded 1 at least once for the following items of qc24: qc24_1, qc24_2, qc24_5, qc24_10.

Note:

See qc24 for complete question text.

The derivation description has been deduced from the summarized variables as provided by TNS. It does not coincide with the description on page 104 of the official report (TNS Opinion & Social: Special Eurobarometer 381 / Wave 76.4: E-Communications Household Survey. Survey requested by the European Commission, Directorate-General for Information Society and Media, and co-ordinated by Directorate-General for Communication. Brussels, June 2012). The frequency results presented in the report do coincide with the variables in the dataset.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

qc25 - TELECOM PROVIDER INFO IF PERSONAL DATA LOST

QC25

ASK ALL

Companies like telecom providers collect personal data such as name, address and credit card details. In case any of your personal data was lost, stolen or altered in any way, would you like to be informed or not?

(READ OUT - ONE ANSWER ONLY)

- 1 Yes, under all circumstances
- 2 Yes, but only if you risk financial harm as a result of your data being lost, stolen or altered
- 3 No
- 4 DK

Comparability:

qc26 - NETWORK OPERATOR MONITORING - AWARENESS

QC26

Network operators and service providers may have to monitor traffic data and communications for different reasons. As a result, they may know what types of applications you are using (e.g. VOIP, e-mail, peer-to-peer, video streaming) or what types of content you are downloading (e.g. audio, video etc.). Are you aware of that practice?

(ONE ANSWER ONLY)

- 1 Yes
- 2 No
- 3 DK

ecom_t2 - E-COMM EQUIPMENT HH: TELEPHONE (D43A & QC2T)

ECOM_T2 E-COMMUNICATION EQUIPMENT HOUSEHOLD: TELEPHONE (D43A & QC2T)

ecom_t2 Telephone

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes respondents with telephone access in the household (code 1 in d43a and/or codes 1 to 3 in qc2t).

Note:

See d43 & qc2 for complete question text.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

ecom_t9 - E-COMM EQUIPMENT HH: NO TELEPHONE (D43A & QC2T)

ECOM_T9 E-COMMUNICATION EQUIPMENT HOUSEHOLD: NO TELEPHONE (D43A & QC2T)

ecom_t9 No telephone

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes respondents with no telephone in the household (code 2 in d43a and code 4 in qc2t).

Note:

See d43 & qc2 for complete question text.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

ecom_t10 - E-COMM EQUIPMENT HH: NARROWBAND INTERNET (QC5_1 ONLY)

ECOM_T10 E-COMMUNICATION EQUIPMENT HOUSEHOLD: NARROWBAND INTERNET (QC5_1 ONLY)

ecom_t10 Narrowband internet

0 Not mentioned

1 Mentioned

Derivation:

This variable repeats answers to this item in qc5_1, but only for respondents who did not indicate any other item in qc5_2 to qc5_7.

Note:

Data for Germany were not correct in former dataset versions (v1.0.0 and v2.0.0). A new dataset has been provided by TNS and the correct data have been merged into the present dataset version (v3.0.0).

See qc5 for complete question text.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

d7r1 - MARITAL STATUS: 5 CAT (RECODED)

D7R1 MARITAL STATUS – RECODED STATUS (5 CATEGORIES)

- 1 (Re-)Married (coded 1 to 4 in d7)
- 2 Single living with partner (coded 5 to 8 in d7)
- 3 Single (coded 9 to 10 in d7)
- 4 Divorced or separated (coded 11 to 12 in d7)
- 5 Widow (coded 13 to 14 in d7)
- 6 Other (SPONTANEOUS)
- 7 Refusal (SPONTANEOUS)

Derivation:

This variable collapses answers to d7 into five categories.

Note:

See d7 for complete question text.

d8 - AGE EDUCATION

D8

How old were you when you stopped full-time education?

(IF "STILL STUDYING", CODE '00' – IF "NO EDUCATION" CODE '01' – IF "REFUSAL" CODE '98' – IF "DK" CODE '99')

0 Refusal

2 2 years

62 62 years

97 No full-time education

98 Still studying

99 DK

Note:

Original code "00" recoded to "98".

Original code "01" recoded to "97".

Original code "98" recoded to "0".

Please notice that pre-school ages (outliers) might be considered as with "no full-time education" or be excluded from valid answers.

Actual number is coded.

Comparability:

Last trend: EB76.3, D8

d8r1 - AGE EDUCATION: 11 CAT (RECODED)

D8R1 AGE WHEN FINISHED FULL-TIME EDUCATION – RECODED (11 CATEGORIES)

- 1 Up to 14 years
- 2 15 years
- 3 16 years
- 4 17 years
- 5 18 years
- 6 19 years
- 7 20 years
- 8 21 years
- 9 22 years and older
- 10 Still studying
- 11 No full-time education
- 97 Refusal
- 98 DK

Derivation:

This variable groups answers to question d8.

Note:

See d8 for complete question text.

d8r2 - AGE EDUCATION: 5 CAT (RECODED)

D8R2 AGE WHEN FINISHED FULL-TIME EDUCATION – RECODED (5 CATEGORIES)

- 1 Up to 15 years
- 2 16-19 years
- 3 20 years and older
- 10 Still studying
- 11 No full-time education
- 97 Refusal
- 98 DK

Derivation:

This variable groups answers to question d8.

Note:

See d8 for complete question text.

d11r2 - AGE: 6 GROUPS (RECODED)

D11R2 AGE – RECODED IN SIX CATEGORIES

- 1 15 - 24 years
- 2 25 - 34 years
- 3 35 - 44 years
- 4 45 - 54 years
- 5 55 - 64 years
- 6 65 years and older

Derivation:

This variable collapses answers to d11 into six categories.

Note:

See d11 for complete question text.

d15a_r1 - OCCUPATION OF RESPONDENT (REC)

D15A_R1 OCCUPATION OF RESPONDENT – RECODED

- 1 Self-employed (coded 5 to 9 in d15a)
- 2 Employed (coded 10 to 18 in d15a)
- 3 Not working (coded 1 to 4 in d15a)

Derivation:

This variable collapses answers to d15a into three categories.

Note:

See d15a for complete question text.

d15b - OCCUPATION OF RESPONDENT - LAST JOB

D15B

ASK D15B IF "NOT DOING ANY PAID WORK CURRENTLY", CODES 1 to 4 in D15A

Did you do any paid work in the past? What was your last occupation?

SELF EMPLOYED

- 1 Farmer
- 2 Fisherman
- 3 Professional (lawyer, medical practitioner, accountant, architect, etc.)
- 4 Owner of a shop, craftsmen, other self-employed person
- 5 Business proprietors, owner (full or partner) of a company

EMPLOYED

- 6 Employed professional (employed doctor, lawyer, accountant, architect)
- 7 General management, director or top management (managing directors, director general, other director)
- 8 Middle management, other management (department head, junior manager, teacher, technician)
- 9 Employed position, working mainly at a desk
- 10 Employed position, not at a desk but travelling (salesmen, driver, etc.)
- 11 Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, etc.)
- 12 Supervisor
- 13 Skilled manual worker
- 14 Other (unskilled) manual worker, servant

15 Never did any paid work

99 Inap. Currently doing paid work (not coded 1 to 4 in d15a)

Note:

In accordance with former waves coding has been (correctly) shifted compared to the questionnaire.

Comparability:

d15b_r - OCCUPATION OF RESPONDENT - LAST JOB (REC)

D15B_R OCCUPATION OF RESPONDENT – LAST JOB (RECODED)

- 1 Self-employed (coded 1 to 5 in d15b)
- 2 Employed (coded 6 to 14 in d15b)
- 3 Never paid work (code 15 in d15b)
- 9 Inap. (not coded 1 to 4 in d15a)

Derivation:

This variable collapses answers to d15b into three categories.

Note:

See d15b for complete question text.

d40c_r - HOUSEHOLD COMPOSITION: AGED 10-14 (REC)

D40C_R HOUSEHOLD COMPOSITION: AGED 10-14 (RECODED)

n of people in household

- 0 None
- 1 One
- 2 Two
- 3 Three
- 4 Four or more

Derivation:

This variable groups answers to question d40c.

Note:

See d40c for complete question text.

d40t - HOUSEHOLD COMPOSITION: SIZE (SUMMARIZED)

D40T HOUSEHOLD COMPOSITION: SIZE A+B+C

n of people in household

- 1 One
- 2 Two
- 3 Three
- 4 Four
- 5 Five
- 6 Six
- 7 Seven
- 8 Eight
- 9 Nine
- 10 Ten
- 11 Eleven
- 12 Twelve
- 13 Thirteen
- 14 Fourteen
- 20 Twenty

Derivation:

This variable summarizes d40a, d40b, and d40c.

Note:

See d40a, d40b, and d40c for complete question text.

Generated by the Archive in accordance with former surveys.

d60 - DIFFICULTIES PAYING BILLS - LAST YEAR

D60

During the last twelve months, would you say you had difficulties to pay your bills at the end of the month...?

(SHOW CARD – READ OUT – ONE ANSWER ONLY)

- 1 Most of the time
- 2 From time to time
- 3 Almost never/never
- 7 Refusal (SPONTANEOUS)

Note:

Original code "4" recoded to "7".

Comparability:

Last trend: EB76.3, D60

d61 - LEVEL IN SOCIETY - SELF PLACEMENT

D61

On the following scale, step '1' corresponds to "the lowest level in the society"; step '10' corresponds to "the highest level in the society".

Could you tell me on which step you would place yourself?

(SHOW CARD – ONE ANSWER ONLY)

- 1 Box 1 - The lowest level in the society
- 2 Box 2
- 3 Box 3
- 4 Box 4
- 5 Box 5
- 6 Box 6
- 7 Box 7
- 8 Box 8
- 9 Box 9
- 10 Box 10 - The highest level in the society
- 97 Refusal (SPONTANEOUS)

Note:

Original code "11" recoded to "97".

d61r - LEVEL IN SOCIETY - SELF PLACEMENT (RECODE)

D61R LEVEL IN SOCIETY - SELF PLACEMENT (RECODED)

- 1 Lower level (coded 1 to 4 in d61)
- 2 Middle level (coded 5 to 6 in d61)
- 3 Upper level (coded 7 to 10 in d61)
- 7 Refusal (SPONTANEOUS)

Derivation:

This variable collapses answers to d61 into three categories.

Note:

See d61 for complete question text.

d62_3 - INTERNET USE FREQ: SOMEWHERE ELSE

D62

Could you tell me if...?

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE - READ OUT)

D62_3 You use the Internet somewhere else (school, university, cyber-café, etc.)

- 1 Everyday/Almost everyday
- 2 Two or three times a week
- 3 About once a week
- 4 Two or three times a month
- 5 Less often
- 6 Never
- 7 No Internet access (SPONTANEOUS)

Comparability:

Last trend: EB76.3, D62

d62t1 - INTERNET USE - INDEX 1 (3 CAT)

D62T1 INTERNET USE – INDEX 1 (3 CATEGORIES)

- 1 Everyday/Almost everyday
- 2 Often/sometimes
- 3 Never to all (coded 6 in d62_1 to d62_3)
- 9 Inap. Never and/or no access (codes 6 and/or 7 in d62_1 to d62_3)

Derivation:

This variable summarizes responses to d62.

Respondents coded 1 at least once in d62_1 to d62_3 are coded 1 in d62t1 ("Everyday/Almost everyday"). Respondents coded 2, 3, 4 or 5 in each variable d62_1 to d62_3 are coded 2 ("Often/sometimes") in d62t1. Respondents coded 6 ("Never") in each variable d62_1 to d62_3 are coded 3 ("Never to all") in d62t1. Respondents coded 6 at least once in d62_1 to d62_3 and coded 7 ("No internet access") in the other variable(s), or respondents coded 7 ("No internet access") in each variable d62_1 to d62_3 are coded 9 ("Inap. Never and/or no access (codes 6 and/or 7 in d62_1 to d62_3)") in d62t1.

Note:

See d62 for complete question text.

d62t2 - INTERNET USE - INDEX 2 (7 CAT)

D62T2 INTERNET USE – INDEX 2 (7 CATEGORIES)

- 1 Everyday/Almost everyday
- 2 Two or three times a week
- 3 About once a week
- 4 Two or three times a month
- 5 Less often
- 6 Never/No access
- 7 No Internet access at all

Derivation:

This variable summarizes responses to d62.

Respondents coded 1 at least once in d62_1 to d62_3 are coded 1 in d62t2 ("Everyday/Almost everyday"). Respondents coded 2 at least once in d62_1 to d62_3 and not coded 1, are coded 2 in d62t2 ("Two or three times a week"). Respondents coded 3 at least once in d62_1 to d62_3 and not coded 1 or 2, are coded 3 in d62t2 ("About once a week"). Respondents coded 4 at least once in d62_1 to d62_3 and not coded 1 to 3, are coded 4 in d62t2 ("Two or three times a month"). Respondents coded 5 at least once in d62_1 to d62_3 and not coded 1 to 4, are coded 5 in d62t2 ("Less often"). Respondents coded 6 ("Never") in each variable d62_1 to d62_3, or at least once coded 6 in d62_1 to d62_3 and coded 7 ("No internet access") in the other variable(s), are coded 6 ("Never/No access") in d62t2. Respondents coded 7 ("No internet access") in each variable d62_1 to d62_3 are coded 7 ("No internet access at all") in d62t2.

Note:

See d62 for complete question text.

p7pt - P7 REGION - PORTUGAL NUTS 2

P7PT REGION

Portugal (EUROSTAT NUTS 2 LEVEL) – Comissaoes de Coordenação regional + Regioes autonomas

- 1 Norte (North)
- 2 Centro (Center)
- 3 Lisboa (Lisbon)
- 4 Alentejo (Alentejo Region)
- 5 Algarve
- 99 Inap. (not PT in isocntry)

Note:

The autonomous regions of the Azores (PT20 - Região Autónoma dos Açores) and of Madeira (PT30 - Região Autónoma da Madeira) are not covered.

Since 2002 the region “Lisboa e vale do tejo” is split up and the subregion “Lezíria do Tejo” reinstated to the “Alentejo” Region and the “Médio Tejo” and “Oeste” reinstated to the “Centro” Region. The relative frequencies for each region indicate that this is reflected in the Eurobarometer P.7 regions starting with Eurobarometer 62.0. The original label for category ‘3’ (“Lisboa e vale do Tejo”) has been edited accordingly. According to the NUTS 2 specifications for Portugal this now only includes “Grande Lisboa” and “Península de Setúbal”.

The official NUTS categories are coded and documented in the integrated alphanumeric NUTS CODES variable 'nuts'.

p7fi - P7 REGION - FINLAND NUTS 3

P7FI REGION

Finland (EUROSTAT NUTS 3 LEVEL 2010) – Maakunnat / Landskap

- 1 Helsinki-Uusimaa
- 2 Varsinais-Suomi (Southwest Finland)
- 3 Satakunta
- 4 Kanta-Häme (Tavastia Proper)
- 5 Pirkanmaa (Tampere Region)
- 6 Päijät-Häme (Paijanne Tavastia)
- 7 Kymenlaakso
- 8 Etelä-Karjala (South Karelia)
- 9 Etelä-Savo (Southern Savonia)
- 10 Pohjois-Savo (Northern Savonia)
- 11 Pohjois-Karjala (North Karelia)
- 12 Keski-Suomi (Central Finland)
- 13 Etelä-Pohjanmaa (Southern Ostrobothnia)
- 14 Pohjanmaa (Ostrobothnia)
- 15 Keski-Pohjanmaa (Central Ostrobothnia) [category not covered]
- 16 Pohjois-Pohjanmaa (Northern Ostrobothnia)
- 17 Kainuu
- 18 Lappi (Lapland)
- 99 Inap. (not FI in isocntry)

Note:

The Åland Islands (FI200 - Landskapet Åland / Avenanmaan maakunta) are not covered.

Former regions of "Uusimaa" (FI181) and "Itä-Uusimaa" (FI182) have been consolidated to the region of "Helsinki-Uusimaa" (FI1B1) on January 1, 2011. The official NUTS codes have changed accordingly starting with NUTS version 2010 (regular amendment as of January 1, 2012). Eurobarometer did never code "Itä-Uusimaa" (East Uusimaa) separately. "Uusimaa" always included the capital area of Helsinki. For this reason the NUTS CODES variable 'nuts' is already coded in accordance with NUTS version 2010.

The NUTS version history documents a minor boundary shift between "Satakunta" (NUTS 2003: FI191; NUTS 2006/2010: FI196) and "Pirkanmaa" (NUTS 2003: FI192; NUTS 2006/2010: FI197). One municipality has been transferred between these NUTS level 3 regions. Please notice that the NUTS CODES variable 'nuts' is based on the NUTS 2006/2010 codes for "Satakunta" and "Pirkanmaa" although it could not be verified if and when the boundary shift is actually reflected in Eurobarometer data.

Please notice that weighted relative frequencies may vary considerably over time (compared across surveys). Weighted frequencies for NUTS2 are adjusted.

The official NUTS categories are coded and documented in the integrated alphanumeric NUTS CODES variable 'nuts'.

p7fi_r - P7 REGION - FINLAND NUTS 2

P7FI_R REGION

Finland (EUROSTAT NUTS 2 LEVEL 2003 / 2006) – Suuralueet / Storområden

- 1 Itä-Suomi (East Finland)
- 2 Etelä-Suomi (South Finland)
- 3 Länsi-Suomi (West Finland)
- 4 Pohjois-Suomi (North Finland)
- 99 Inap. (not FI in isocntry)

Note:

The Åland Islands (FI200 - Landskapet Åland / Avenanmaan maakunta) are not covered.

This variable corresponds to the NUTS 2 breakdown in accordance with NUTS versions 2003 und 2006, i.e. before separating "Helsinki-Uusimaa" (NUTS version 2010: FI1B) from "Etelä-Suomi" (NUTS 2003/2006: FI18; NUTS 2010: FI1C), and before merging "Pohjois-Suomi" (NUTS 2003/2006: FI1A) with "Itä-Suomi" (NUTS 2003/2006: FI13) to "Pohjois- ja Itä-Suomi" (NUTS 2010: FI1D). This coding corresponds to former Eurobarometer waves. Unlike the present NUTS 2 variable, the NUTS CODES variable 'nuts' represents NUTS version 2010.

RO42 Vest (West)

Derivation:

This additional alphanumeric NUTS CODES variable is produced by the archive. It integrates all country specific p7 variables given that the regional units are defined in accordance with the EUROSTAT Nomenclature of Territorial Units for Statistics (NUTS) respectively in accordance with the Statistical Regions for Candidate and EFTA Countries 2010. For each country the lowest available NUTS subdivision level is considered.

2013-03-01 http://ec.europa.eu/eurostat/ramon/documents/nuts/Statistical_Regions_2010.zip)

Note:

The official NUTS codes are coded verbatim in accordance with the in each case valid (applicable) NUTS version. All version details and

changes are documented in the official EUROSTAT classification history (History of NUTS). A second variable (regunit) indicates the coded NUTS LEVEL for each country.

France:

The territorial unit of Corse (FR83) and the Oversea departments (Départements d'outre-mer: FR9) are not covered.

Italy:

Starting with NUTS version 2010 NUTS 1 codes for Italy have changed for North-East (ITH instead of ITD) and Center (ITI instead of ITE).

The reason for this are minor boundary shifts on NUTS 2 and 3 level (Marche and Emilia Romagna).

Greece:

The Aegean Islands (GR41 - Βόρειο Αιγαίο/Voreio Aigaio and GR42 - Νότιο Αιγαίο/Notio Aigaio) as well as the Ionian Islands (GR22 - Ιόνια Νησιά/Ionia Nisia) are not covered.

Starting with NUTS version 2010 (regular amendment as of January 1, 2012) the standard country prefix 'GR' is exchanged by 'EL'. The remaining numerical part of the codes is not affected.

Spain:

The autonomous cities of Ceuta (ES63 - Ciudad Autónoma de Ceuta) and Melilla (ES64 - Ciudad Autónoma de Melilla) are not covered.

Portugal:

The autonomous regions of the Azores (PT20 - Região Autónoma dos Açores) and of Madeira (PT30 - Região Autónoma da Madeira) are not covered.

Finland:

The Åland Islands (FI200 - Landskapet Åland / Avenanmaan maakunta) are not covered.

Former regions of "Uusimaa" (FI181) and "Itä-Uusimaa" (FI182) have been consolidated to the region of "Helsinki-Uusimaa" (FI1B1) on January 1, 2011. The official NUTS codes have changed accordingly starting with NUTS version 2010 (regular amendment as of January 1, 2012). Eurobarometer did never code "Itä-Uusimaa" (East Uusimaa) separately. "Uusimaa" always included the capital area of Helsinki. For this reason the NUTS CODES variable 'nuts' for Finland is already coded in accordance with NUTS version 2010. Only the country specific NUTS 2 variable (p7fi_r) is still coded in accordance with NUTS version 2003/2006 in order to remain consistent with former Eurobarometer waves.

The NUTS version history documents a minor boundary shift between "Satakunta" (NUTS 2003: FI191; NUTS 2006/2010: FI196) and "Pirkanmaa" (NUTS 2003: FI192; NUTS 2006/2010: FI197). One municipality has been transferred between these NUTS level 3 regions. Please notice that NUTS CODES variable 'nuts' is based on the NUTS 2006/2010 codes for "Satakunta" and "Pirkanmaa" although it could not be verified if and when the boundary shift is actually reflected in Eurobarometer data.

Austria:

The value labels in the original TNS dataset document East Tyrol (Osttirol) as coded together with Carinthia (Kärnten; AT21). According to the official NUTS 2 territorial classification for Austria, East Tyrol (AT333) belongs to Tyrol (AT33), being an inner-Austrian exclave of this federal state. It borders on Austrian federal states Carinthia and Salzburg. Carinthia belongs to NUTS1 region South Austria (AT2) while Tyrol belongs to NUTS 1 region West Austria (AT3).

w3a - WEIGHT RESULT FROM TARGET - UNITED GERMANY

W3A WEIGHT RESULT FROM TARGET - UNITED GERMANY

This weight combines the weighting factors for Germany as a whole (redressment factors plus populations size factors East/West) and the redressment factors for all other countries (Great Britain and Northern Ireland separated). This weight has been derived by the archive from original TNS weights w1 and w3. Unlike weighting variable w3 (WEIGHT UNITED GERMANY (ONLY)) the other countries/samples are not excluded from calculation.

Note:

Starting with Eurobarometer 75.4 and according to available weights up to Eurobarometer 61, the archive is deriving three additional weights (w3a, w4a, w3a4a) in order to provide for the analysis of the United Kingdom and/or Germany, each as a whole and together with all other countries. Minimal deviations in frequencies for weighted data are possible due to rounding differences.

w3a
