

Dear User,

The European Value Survey (EVS) and the World Value Survey (WVS) are two large-scale, cross-national and longitudinal survey research programs. They include a large number of questions, which have been replicated since the early eighties. About 113 countries/regions with altogether 507.773 respondents participated in the six waves conducted up to now: 1981-1984, 1989-1993, 1994-1998, 1999-2004, 2005-2009, and 2010-2014. Apart from a few exceptions, a country participated either in an EVS wave or in a WVS wave but not in both.

The EVS is being processed by the [University of Tilburg](#) and [GESIS Dept. Data Archive for the Social Sciences in Cologne](#), the WVS by ASEP/JDS in Madrid. Each group, EVS and WVS, has constructed a longitudinal data file which is distributed through their website and retrieval systems.

- The EVS Longitudinal Data File 1981-2008 has been constructed from the waves 1981, 1990, 1999, and 2008. Study and variable related documentation on the waves including information on version history and errata can be accessed on the [EVS website](#). The data file and accompanying documentation can be downloaded from the [GESIS Data Catalogue](#). If you wish to search for, browse, or analyze the data, please go to [ZACAT](#).
- The WVS longitudinal file 1981-2014 has been constructed from the waves 1981-1984, 1990-1994, 1995-1998, and 1999-2004, 2005-2009, 2010-2014. The data file as well as accompanying study and variable related documentation including information on version history and errata can be downloaded on the [WVS website](#). If you wish to access the complete value studies results online, go to the [ASEP/JDS Online Data Analysis](#) system.

In order to broaden the range of comparison, both projects agreed on harmonization of variables and data on basis of a common dictionary. Further, they are going to provide up to date information and assistance to users on constructing an Integrated Values Surveys 1981-2014 on basis of both longitudinal files:

- EVS Longitudinal Data File 1981-2008, ZA4804: v3.0.0 (2015-10-30) [doi:10.4232/1.12253](https://doi.org/10.4232/1.12253).
- World Value Survey 1981-2014 official aggregate v.20150418, 2015.

Therefore, both groups are going to provide regular information on the source data files, release version, and documentation on the [EVS website](#) and [WVS website](#). There you will also find information and assistance, so that you can merge the longitudinal data files easily. An overview of countries participating in EVS and WVS waves and variable correspondence lists are accessible there, too.

An overview of the different sources of data and documentation is given in the document 'Values Surveys Data File Information'. For instruction on how to refer to the Integrated Values Surveys and ways to make publications visible to the scientific community, please also see the document 'Values Surveys Conditions of Use'.

Consultation and advice

For EVS: Tilburg University (EVS@uvt.nl) and [GESIS Dept. Data Archive](#) (EVService@gesis.org) in Cologne.

For WVS: ASEP/JDS (asep.jds@jdsurvey.net) in Madrid.
