Kerstin Beck

Introduction and preliminary remarks

The GESIS Variable Report Series on the International Social Survey Programme Studies offers a comprehensive description of data on study and variable level. For each annual module as well as for the cumulated data sets individual Variable Reports are provided.

The reports are structured into six chapters:

Chapter one gives a brief overview of the worldwide ISSP project as a whole.

Chapter two provides the description of the respective ISSP study including bibliographic information, abstract and methodological specifications.

Chapter three contains information on study related survey materials which are absolutely essential to understand the data properly, followed by general information about the structure of ISSP data sets, documentation standards and variable coding frames in chapter four.

Chapter five provides a short explanation of the variable documentation itself.

Chapter six contains the core variable documentation: the documentation of each variable including complete question texts with all answer categories of the Basic Questionnaire enriched with archival remarks. In addition, this Variable Report presents cross tabulations over countries for all substantial and most of the demographic variables. Archive, protocol and country specific variables are usually shown by descriptive statistics or frequency distributions. All cross tabulations, descriptive statistics and frequency distributions are based on unweighted data.

The appendix usually contains two sorts of survey materials: the Study Descriptions and, if available, the Characteristics of National Population, basic statistics for all the participating countries of the corresponding module. The data for the annual ISSP modules are collected by independent institutions in each country. The country data is integrated into one international data file, which is documented, distributed and long-term archived by the ISSP Archive, institutionally, the GESIS Data Archive for the Social Sciences (Leibniz Institute for the Social Sciences) in Cologne, Germany (<http://www.gesis.org>). In every second year from 1997 on, data and documentation have predominantly been prepared by our partners at JDS/ ASEP in Spain (<http://www.jdsurvey.com>).

Data access

Data for statistical analysis along with information about this data such as version history and errata are made available by the Data Catalogue (<https://dbk.gesis.org/dbksearch/>).

The Data Online Platform ZACAT of GESIS (<http://zacat.gesis.org>) provides data documentations and additionally enables users to analyse data online.

Access to the Data Catalogue and ZACAT is free of charge, download of data sets requires registration.

Anonymised data

According to data regulations in participating countries, only anonymised data are made available. Each national team is responsible for carefully checking the data in this respect before the deposit.

Usage requirements

To provide funding agencies with essential information about the use of archival resources and to facilitate the exchange of information about related research activities, all users of ISSP data are requested to send bibliographic citations for each completed manuscript or thesis abstracts to isspservice@gesis.org or if possible, please directly send a copy of the publication to GESIS (GESIS-Leibniz-Institute for the Social Sciences, Dept. Data Archive - ISSP, Unter Sachsenhausen 6-8, D-50667 Cologne, Germany). Please also observe the general notes on the usage regulations of GESIS Data Archive resources (<http://www.gesis.org/en/services/data-analysis/data-archive-service/usage-regulations/>).

Disclaimer

Neither the original collector of the data, nor GESIS or JDS/ ASEP bears any responsibility for the use of ISSP data or any data analyses.

Request

Please, alert us to any errors or problems that you might notice in the data or the documentation. All comments and remarks are very much appreciated to enhance the quality of the data: isspservice@gesis.org

1 ISSP Series Description

1.1 Series name

The International Social Survey Programme (ISSP)

1.2 Series information

The ISSP is a cross-national collaboration programme, which has been continuously conducting annual surveys on diverse social science topics since 1985. The topics for each ISSP survey are proposed by delegates from ISSP member countries. Then, a Basic Questionnaire is composed and improved over several years by a committee, elected by the General Assembly before it is pretested in various countries. Starting in 1984 with four founding nations - Australia, Germany, Great Britain and the United States, the ISSP meanwhile has grown up to almost 50 member countries covering various cultures around the globe.

ISSP Modules 1985 – 2016:

- Citizenship: 2004/ 2014
- Environment: 1993/ 2000/ 2010
- Family and Changing Gender Roles: 1988/ 1994/ 2002/ 2012
- Health and Health Care: 2011
- Leisure Time and Sports: 2007
- National Identity: 1995/ 2003/ 2013
- Religion: 1991/ 1998/ 2008
- Role of Government: 1985/ 1990/ 1996/ 2006/ 2016
- Social Inequality: 1987/ 1992/ 1999/ 2009
- Social Networks: 1986/ 2001 (Social Relations and Support Systems)
- Work Orientations: 1989/ 1997/ 2005/ 2015

All ISSP members agree

1. to jointly develop modules addressing important areas of social science,
2. to field the modules either as an individual survey or as supplements to the regular national surveys and
3. to make the data available to the social science community as quickly as possible.

As the surveys are designed for replication they offer both cross-national and cross-time comparison, creating the base for a vast range of substantive and methodological research. Since there is no external fund agency, ISSP members fund their own surveys. Beyond that, ISSP committee members fund ISSP central coordination, networking, development of source questionnaires, or methodological work.

For more information on the ISSP in general, its working principles, contact addresses of ISSP members and principal investigators, please visit the ISSP web site (<http://www.issp.org>).

2.1.4 Bibliographic citation

Publications based on ISSP data, which are made available through GESIS, should acknowledge those sources by means of bibliographic citations. To ensure that such source attributions are captured for social science bibliographic utilities, citations should appear in footnotes or in the reference section of publications.

How to cite the data: ISSP Research Group (2015): International Social Survey Programme: Health and Health Care – ISSP 2011. GESIS Data Archive, Cologne. ZA5800 Data file Version 3.0.0, doi: 10.4232/1.12252

2.2 Content

2.2.1 Abstract

Health and Health Care (Evaluation of health care system in the country, personal health, health insurance)

2.2.2 Topic classification

Themes: satisfaction with life (happiness); confidence in the educational system and the health system of the country; changes of health care system is needed; justification of better medical supply and better education for people with higher incomes; assessment of the health care system of the country (scale: estimation of improvement of the health care system, usage of health care services more than necessary, government should provide only basic health care services, inefficient health care system); willingness to pay higher taxes to improve the level of health care for all people in the country; attitude towards public funding of: preventive medical checkups, treatment of HIV/AIDS, programs to prevent obesity and conduct organ transplants; attitude towards the access to publicly funded health care for people without citizenship of the country and even if they behave in ways that damage their health; estimated part of people without access to the health care system; causes of severe health problems (behavior that damages health, environment, genes, poverty); evaluation of patients for smoking habits, age and the presence of young children for a needed heart operation; attitude towards alternative (traditional or folk) medicine (provides better solutions for health problems than conventional medicine, promises more than it is able to deliver); assessment of doctors in general in the country (scale: doctors can be trusted, discuss all treatment options with their patients, poor medical skills, more care about their earnings than about their patients, openness in dealing with mistakes during treatment); frequency of difficulties with work or household activities because of health problems, bodily aches or pains, unhappiness and depression, loss of self-confidence and insuperable problems in the past four weeks; frequency of doctor visits and of visiting an alternative (traditional/folk) health care practitioner during the past twelve months; stay in hospital or a clinic as an in-patient overnight during the last year; reasons why the respondent did not receive needed medical treatment (could not pay for it, could not take the time off work or because of other commitments, needed treatment was not available at the place of residence, too long waiting list); likelihood of getting the best treatment available in the country in the case of seriously illness and of treatment from the doctor of own choice; satisfaction with the health care system in the country; satisfaction with treatment at the last visit to a doctor, when attending alternative health care practitioner and with the last hospital stay; number of smoked cigarettes per day; frequency of drinking four or more alcoholic drinks on the same day, strenuous physical activity and of eating fresh fruit or vegetables; assessment of personal health; respondent has a long-standing illness, a chronic condition or a disability; height and weight of respondent; kind of personal health insurance; only respondents with health insurance: assessment of personal health insurance coverage.

Optional items: personal health insurance covers the prescribed drugs, dental health care and in-patient health care in hospital; need of a referral from the family doctor before visiting a medical specialist; limitation of social activities with family or friends because of health problems.

Demography: Sex; age; year of birth; years in school; education (country specific); highest completed degree; work status; hours worked weekly; employment relationship; number of employees; supervision of employees; number of supervised employees; type of organization: for-profit vs. non-profit and public vs. private; occupation (ISCO-88); main employment status; living in steady partnership; union membership; religious affiliation or denomination (country specific); groups of religious denominations; attendance of religious services; top-bottom self-placement; vote in last general election; country specific party voted in last general election; party voted (left-right); ethnicity (country specific); number of children; number of toddlers; size of household; earnings of respondent (country specific); family income (country specific); marital status; place of living: urban – rural; region (country specific).

Information about spouse and about partner on: work status; hours worked weekly; employment relationship; supervises other employees, occupation (ISCO-88); main employment status.

Additionally encoded: date of interview; case substitution flag; mode of data collection; weight.

2.3 Geographic coverage

Australia (AU); Belgium (BE-FLA, BE-WAL); Bulgaria (BG); Chile (CL); China (CN); Croatia (HR); Czech Republic (CZ); Denmark (DK); Finland (FI); France (FR); Germany (DE); Great Britain (GB-GBN); Israel (IL); Italy (IT); Japan (JP); Korea, Republic of (KR); Lithuania (LT); Netherlands (NL); Norway (NO); Philippines (PH); Poland (PL); Portugal (PT); Russian Federation (RU); Slovakia (SK); Slovenia (SI); South Africa (ZA); Spain (ES); Sweden (SE); Switzerland (CH); Taiwan, Province of China (TW); Turkey (TR); United States (US)

2.4 Universe

Age: 18 years old and older (exceptions: Denmark 18-79, Finland: 15-74, Italy: 16 years old or older; Japan: 16 years old or older and Norway: 19-78, Sweden: 18-80, South Africa: 16 years old or older)

2.5 Sampling procedure

Sampling procedures differ for the individual countries: partly simple, partly multi-stage stratified random samples

2.6 Fieldwork and sample sizes

Table: Participating countries (regions) and fieldwork information for ISSP 2011

Country (Region)	ISO	Fieldwork start/ end	Fieldwork Institute	Questionnaire-versions	Sample Size (n of cases)
Australia	AU	1 May 12 – 8 Aug 12	Academic Surveys Australia, Black Rock, Melbourne	AU11	1946
Belgium-Flanders	BE-FLA	2 Apr 11 – 16 Aug 11	Significant GfK, Heverlee	BE-FLA11	1210
Belgium-Wallonia	BE-WAL	24 Sep 12 – 24 Dec 12	Institut Wallon de l'évaluation, de la Prospective et de la Statistique (IWEPS)	BE-WAL11	1873

2.7 Mode of data collection

Mode of interview differs for the individual countries: partly face-to-face interviews (partly CAPI) with standardized questionnaire, partly paper and pencil and postal survey and partly web survey

3 Corresponding survey material

When dealing with international comparative data, data sets and documentation must be seen as two sides of the same coin. Even though ISSP members make huge efforts to produce comparable data in each country, there still remains a remarkable amount of country specific peculiarities in the contributions to the final, international data set. These country specific peculiarities either have to be harmonised or to be documented, as they provide vital information for secondary analysts. Therefore, a set of procedures has been developed to take care for orderly technical preparation of national data sets and to allow for the systematic collection of required context information.

All corresponding survey materials are provided in English, only the national questionnaires are available in the national language(s) of each country.

3.1 Basic Questionnaire

The ISSP General Assembly concludes the design phase of an ISSP module after intensive discussions on the single items of the Basic Questionnaire roughly a year before the module is fielded. Two third of the module questions have to be replications from previous ISSP modules of the same subject. According to this, one third of the questions in each module are new. Subsequent to the mandatory module questions, some pre-selected optional questions can be added. Finally, ISSP member countries translate the British English Basic Questionnaire to their local language as equivalent as possible.

Drafting group for the Basic Questionnaire on the Family and Changing Gender Roles Module 2011:

- Chile
- Germany
- Israel: Lewin-Epstein, Noah and Lucille Cohen (convenor)
- South Africa
- Switzerland
- Taiwan

3.2 Background Variables Standards and Documentation

Apart from the Basic Questionnaire, covering the substantial module variables, countries also have to collect responses on a defined set of ISSP Standard Background Variables, which predominantly contains demographic information. Since the ISSP often runs with larger national surveys, the background variables are mainly taken from these surveys. Thus, demographic issues cannot be asked in a fixed form over all members of the ISSP. They have to meet the demands of the national studies first. As a result, the demographic variables for the ISSP need to be post-harmonised according to a developed set of common standards.

Over the past 30 years, there have been different Background Variable Standards:

The first set of background variables was established in 1985 with the first ISSP survey. Here countries agreed on collecting the same demographic information. This list of variables underwent a revision in 2001, now providing a coding frame for each background variable. It was valid until 2009.

In 2010 a new revision process of the ISSP Background Variables, planned for a three years period, started.

Beginning with the ISSP module 2010, this first revised version of the ISSP Background Variable Standard concentrating mainly on variables containing work, occupational and partnership status information came into effect. The second round of revisions, coming into effect in 2011, had its focus on the education variables, while the last change is going to be made on the variable measuring ethnicity, effective with the module 2013. The new standard is documented in some guidelines (different documents indicating the intermediate steps of revision), providing detailed information and instructions on the variables measurement goals, coding frames, filters and possible question texts. Additionally, the question texts are summarised in a Master Questionnaire on

Background Variables.

Since 2004 countries document the post-harmonisation processes for each variable in a special documentation template provided by the Archive. This template, always adjusted to the current standard, offers detailed country specific information on administration, derivation, and coding of the ISSP Background Variables. All relevant background variable documents are available from the ISSP webpages at GESIS.

3.3 National Study Description

For each country, the original National Study Description is available in the appendix of this Variable Report. The National Study Descriptions are provided by the countries and include information on sample sizes, field dates, modes of data collection, sampling procedures, response rates and weighting processes.

3.4 Characteristics of National Population

The appendix of this Variable Report also includes Characteristics of National Populations for all participating countries from 1989 on. These documents provide statistical data on the composition of national populations in terms of gender, age, education and employment rates and, therefore, allow assessing how representative national samples are.

3.5 Where to find the survey materials and the data set of the ISSP Module of 2011 – Health and Health Care

In the GESIS Data Catalogue on the GESIS web you find

- the Basic Questionnaire of this module together with
- all country questionnaires in the respective local languages,
- the Codebook (Variable Report) with the National Study Descriptions and the Characteristics of National Populations in its appendix
- detailed National Documentations on phrasing and coding of the Background Variables,
- the Study Monitoring Report and
- the integrated data file ZA5800_v3.0.0 for download

under the tab "Data and Documents" of:

<https://dbk.gesis.org/dbksearch/SDESC2.asp?no=5800>

The GESIS online data portal ZACAT provides the documentation of this integrated data file and also further study-related materials for download:

<http://zacat.gesis.org/webview/index.jsp?object=http://zacat.gesis.org/obj/fStudy/ZA5800>

Beyond this, ZACAT enables users to perform basic online analyses like frequency distributions, cross tabulations or regressions.

4 Data set structure and standards

ISSP data sets are processed and documented by the Data Archive of GESIS and by ASEP/ JDS every second year in accordance with agreed standards, which may differ in some details. Despite several changes in the background variables, a certain standard has been established in the course of time.

In order to uniquely identify a data set, to each data set version a GESIS Study No., a Version No., and a Digital Object Identifier (doi) is assigned. The doi is linked to the Study Description in the Data Catalogue (<https://dbk.gesis.org/dbksearch/index.asp>). Metadata filled in the Study Description of ISSP 2012 data and associated with a doi are provided to the registration agency for social science data (da|ra).

The doi: 10.4232/1.12252 is assigned to the ISSP 2011 (v.3.0.0).

4.1 Data set structure

Usually, the ISSP data sets are structured as follows:

1. Archive and Identification Variables

Administrative variables are used for identifying data sets, respondents and countries (GESIS Data Archive Study Number, Version Number, Respondent Number, Country Codes).

The GESIS Archive version variable includes the number of the data set and the respective release date, composed as a string variable with three numbers:

- The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases).
- The minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels).
- The third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

Country codes identify each case as belonging to one country. The country code variable, which was used according to a scheme leaning on international automobile identification codes in the beginning of the ISSP, was replaced by two country code variables based on the ISO Code 3166. One identifies countries as a whole, the other one possible subsamples, such as East and West Germany. The cross tabulations shown in this Variable Report are based on a third, alphanumerical country code variable, which also identifies subsamples.

2. Substantial Variables

The substantial variables contain the mandatory module questions, often supplemented by optional questions.

Variable labels provide keywords based on the question text; these keywords are applied consistently if questions or question items are repeated over time. All substantial variables include the original question number of the Basic Questionnaire in the variable labels.

Generally, all variable names consist of the standard prefix 'V' and the consecutive variable number (beginning with the archive variables).

3. ISSP Background Variables

In the earlier ISSP modules, all variables are numbered consecutively, beginning with the archive variables and followed by substantial and background variables. The last variable of each data set,

usually is the variable on weighting. Later on, the background variables start with V200 et seq.. Nowadays, these variable numbers are expressed by mnemonics with max. 8 characters (SEX, AGE, ...).

4. Country Specific Variables

Variables, which cannot be harmonised for various reasons, are usually presented as country specific variables. As a rule, variable names of country specific variables have country abbreviations as prefixes. In some of the older ISSP studies, the principle of country specific variables is not used. Instead all country specific information is integrated into one variable.

5. Protocol Variables

There are five protocol variables in the latest ISSP modules. The variable 'MODE' indicates the mode of data collection, while 'SUBSCASE' indicates whether a respondent in the sample is an original case or a replacement for an originally selected respondent who was not available. The variables 'DATEYR', 'DATEMO' and 'DATEDY' provide information on the dates and periods of fielding.

ISSP surveys prior to 2010 do not include the three DATE variables for indicating the fielding date and ISSP surveys before 2007 do not contain the SUBSCASE variable.

6. Weight

There is no weight available for the international comparison on the ISSP across countries. Please note that also country subsamples can be over- respectively underrepresented without any weighting factor correcting for the imbalance. This fact has to be taken into account if these countries in question are analysed as one unit.

4.1.1 Deviating data set structure in ZA5800

Within the bloc of substantial variables that relates to the module questions there is one additional variable for China due to the fact that the Chinese questionnaire used a reversed and only 5-point covering scale in contrast to the ISSP 7-point scale for Q1 (see V5, CN_V5). The Chinese data for Q1 is therefore not comparable to the rest of the countries.

4.2 Data preparation

On the basis of the Basic Questionnaire covering the substantial variables and the standard core set of background variables the Archive provides a Standard Setup for each individual ISSP module, which defines the variable and value labels for the integrated data file. All country data sets should be processed and prepared to match the structure of the Standard Setup before the material is deposited to the GESIS Data Archive for integration and archiving.

After conducting the national surveys, all collaborators are supposed to deposit their data at the GESIS Data Archive, where all the deposited data sets are prepared, integrated and merged into one single international data set, which is finally published.

During the data preparation process all national data sets are successively controlled for completeness, missing and duplicate records, for wild codes and for formal consistency of response patterns and question routing. Moreover, national derivation processes from source to target codes in the background variables are controlled. Missing values, especially due to filter instructions are checked and recoded where necessary. Errors, which are discovered during these procedures, are corrected or documented in cooperation with primary investigators. Complete machine-readable DDI-XML (see chapter 4.5) compliant documentation is created for all ISSP data sets by GESIS.

4.3 Coding frames

By general rule, the variables of the module questions adopt the coding frame as specified in the Basic Questionnaire, except for multiple response questions.

GESIS adds 'Not applicable' (NAP) codes for questions that have filters. NAP indicates that only a subsample and not all of the respondents were asked. Also in the case of country specific variables, all the other countries are coded NAP.

GESIS adds 'Not available' (NAV) for variables which in single countries may not have been conducted for whatever reason.

4.3.1 Country specific answer categories

ISSP data include some questions (variables) which have country specific answer categories such as DEGREE, RESPONDENT'S INCOME, FAMILY INCOME, PARTY AFFILIATION (PARTY VOTED LAST ELECTION), REGION and SIZE OF COMMUNITY (until ISSP 2009).

For country specific income variables with answer categories, the data is recoded to midpoints of the categories.

For occupation, official international occupation codes are used. While in the first years of the ISSP many countries used country specific occupation codes, ISCO 1988 has been established as a standard over the years.

Recently additionally provided as country specific variables: RELIGION, ETHNIC GROUP

4.3.2 Missing values

In general, the missing values are standardised across ISSP modules. For all variables a set of missing values is defined:

0: Not applicable (NAP), Not available (NAV)

7 (97, 997, 9997, ...): Refused

8 (98,998, 9998, ...): Don't know

9 (99, 999,9999, ...): No answer

4.4 Weighting

Please note, that there is no total weight usable for international comparison. While all ISSP data sets contain a weighting variable, the weights in this variable do not incorporate a common weighting scheme that can be applied to all countries of the same ISSP module.

In the Study Description and/ or in the Background Variables Documentation of each country you will find more detailed information on the kind of weights that are used. You can see, whether

- a design weight
- weights to adjust for non-response bias or
- a combination of these both weights above or
- different weighting procedures

are applied. However, some countries dispense with weighting factors. If no weight is provided, the variable "Weight" is coded to 1.0. Otherwise the weighting factor is unequal 1.0 (but greater than 0).

It may be advisable to weight data to increase representativeness in certain cases. For ISSP data we strongly recommend consulting the National Study Descriptions for information on the certain weighting factor composition and maybe even the Characteristics of National Population for more context information. An initial overview of the national weighting procedures is provided in this Variable Report in chapter 6.

4.5 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social sciences, established by the Data Documentation Initiative <DDI>. The Variable Reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the Basic Questionnaire with the variable description (variable name, values, and labels) of the data set. General remarks and comments referring to a certain variable are defined as variable notes. Notes mostly include additional information on country specific deviations from the ISSP standard, information about data problems or other specific characteristics.

5 Explanation of the variable documentation

The variable documentation part of this Variable Report describes each variable in the data file including all relevant information for this variable such as the single question components or further notes and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable 'C_ALPHAN'.

AU	Australia	JP	Japan
BE-FLA	Belgium-Flanders	KR	South Korea
BE-WAL	Belgium-Wallonia	LT	Lithuania
BG	Bulgaria	NL	Netherlands
CH	Switzerland	NO	Norway
CL	Chile	PH	Philippines
CN	China	PL	Poland
CZ	Czech Republic	PT	Portugal
DE	Germany	RU	Russia
DK	Denmark	SE	Sweden
ES	Spain	SI	Slovenia
FI	Finland	SK	Slovakia
FR	France	TR	Turkey
GB-GBN	Great Britain	TW	Taiwan
HR	Croatia	US	United States
IL	Israel	ZA	South Africa
IT	Italy		

The example explained below shows the information that for a typical substantial variable appears in the variable documentation part of a Variable Report. Results are usually broken down by country or presented as frequency counts in the case of country specific variables. In the case of variables with long lists of coded "real" values (e.g. age) results are not shown.

The complete question and answer texts are taken from the final Basic Questionnaire as provided. All deviations are documented in this Variable Report.

As there is neither an international weighting factor nor a national weighting factor which would be comparable for all participating countries, all frequencies and tables are calculated from unweighted data.

Header with **DIGITAL OBJECT IDENTIFIER (DOI)** linked to the Study Description in the GESIS Data Catalogue.

VARIABLE NAME (serial number assigned by the archive) and **VARIABLE LABEL** as defined in the data set.

QUESTION NUMBER and full **QUESTION TEXT** from the Basic Questionnaire, including interviewer instructions, if applicable. The numbers or letters that may appear together with the original question number, reflect the item order (multiple item or multiple response questions) or indicate if a question was asked only in a single country (country abbreviation).

CODE VALUES occurring in the data for this variable and complete **ANSWER TEXT** from the Basic Questionnaire. Abbreviations commonly used in the code definitions are DK (don't know), NA (no answer), NAP (not applicable) and NAV (not available).

DERIVATION information refers to the construction principle of derived variables.

NOTE delineates additional explanatory text or archive remarks on data processing and other issues relevant for the understanding or application of the variable.

CROSS-TABULATION: The absolute frequencies base on unweighted data. The relative frequencies (*row percent*) refer to the valid cases (*n valid sum*), i.e. the total number of cases (*n sum*) reduced by the number of cases defined as missing data (*M*).

FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (*M*), i.e. *percent* on the basis of all cases (*sum*) and *valid percent* on basis of the *valid cases*.

V34 - Q17 Best describes beliefs about God

Q.17

Which best describes your beliefs about God?

- 1 I don't believe in God now and I never have
- 2 I don't believe in God now, but I used to
- 3 I believe in God now, but I didn't use to
- 4 I believe in God now and I always have
- 8 Can't choose
- 9 No answer

6 Variable documentation

(see next page)

Variable, Label**Fragestext (Englische Sprache)****V1 - ZA Study number**

GESIS Data Archive Study number ZA5800 for the ISSP 2011 on 'Health'.

Study number of the data set producer and archiving number

5800 GESIS Data archive study number ZA5800

V1

Value	Label	Missing	Count	Percent	Valid Percent
5800	GESIS Data Archive Study Number ZA5800		55081	100,0	100,0
	Sum		55081	100,0	100,0
	Valid Cases		55081		

V2 - GESIS Archive version

VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as a string.

The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

V2

Value	Label	Missing	Count	Percent	Valid Percent
3.0.0 (2015-06-10)			55081	100,0	100,0
	Sum		55081	100,0	100,0
	Valid Cases		55081		

DOI - Digital Object Identifier**Digital Object Identifier (DOI)**

This variable holds the Digital Object Identifier (DOI) for the data set at hand as registered via the DAJRA registration agency for economic and social science data. Each data set version (see variable V2) has a unique persistent DOI.

For direct access to the complete archive dissemination package for this study, including new data set versions, the DOI needs to be appended to the resolver service URL:

<http://dx.doi.org/doi:10.4232/1.12252>

In terms of good scientific practice, the DOI is an important element for the correct citation of a data set.

DOI

Value	Label	Missing	Count	Percent	Valid Percent
doi:10.4232/1.12252			55081	100,0	100,0
	Sum		55081	100,0	100,0
	Valid Cases		55081		

V3 - Country/Sample (see V4 for codes for whole nation states)

Country/ Sample (see V4 for codes for whole nation states).

To indicate the subsamples within the ISSP countries a code on the basis of ISO 3166 was constructed. For all countries without subsamples the three digit ISO 3166 Code (as in V4) was used.

For those with subsamples a five digit numeric code is used. The first three-digits are based on the original ISO code (see V4) and indicate the country. The following two-digit numeric appendices (01, 02) indicate the subsamples.

C_ALPHAN - Country Prefix ISO3166 Code - alphanumeric

Sample Prefix ISO 3166 Code - alphanumeric

ISO 3166 Country/ Sample Prefix

This alphanumeric sample identification variable C_ALPHAN includes country codes that are based on ISO 3166.

All countries are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the UK's subsample Great Britain (GB-GBN). No ISO standard codes are available for the "historical" East/ West subdivision of Germany and for the subsamples of Belgium, Flanders and Wallonia. We label East and West Germany "DE-E"/ "DE-W" and the subsamples of Belgium "BE-FLA"/ "BE-WAL".

Concerning Israel, the variable IL_REG can be used as a flag variable to distinguish between the Jewish and Arabic population.

This variable is used for the cross tabulations shown in the Variable Report.

AU = Australia
BE-FLA = Belgium-Flanders
BE-WAL= Belgium-Wallonia
BG = Bulgaria
CH = Switzerland
CL = Chile
CN = China
CZ = Czech Republic
DE-E = Germany-East
DE-W = Germany-West
DK = Denmark
ES = Spain
FI = Finland
FR = France
GB-GBN= Great Britain
HR = Croatia
IL = Israel
IT = Italy
JP = Japan
KR = Korea (South)
LT = Lithuania
NL = Netherlands
NO = Norway
PH = Philippines
PL = Poland
PT = Portugal
RU = Russia
SE = Sweden
SI = Slovenia
SK = Slovak Republic
TR = Turkey
US = United States

ZA = South Africa

V5 - Q1 How happy or unhappy

Q1

If you were to consider your life in general these days, how happy or unhappy would you say you are, on the whole?

(PLEASE TICK ONE BOX ONLY)

- 0 NAV; NAP
- 1 Completely happy
- 2 Very happy
- 3 Fairly happy
- 4 Neither happy nor unhappy
- 5 Fairly unhappy
- 6 Very unhappy
- 7 Completely unhappy
- 98 Can't choose
- 99 No answer

in China (CN):

- 0 NAP: question asked with reversed 5-point scale

in Taiwan (TW):

- 0 Not asked for subsample

Note:

/ For the Chinese data see variable CN_V5, please.

CN_V5 - Q1 How happy or unhappy

Q1

Overall, do you think that your life is happy?

0 NAP: all other countries

1 Very unhappy

2 Quite unhappy

3 I'm not sure, happiness is not happiness

4 Quite happy

5 Very happy

9 No answer

Note:

/ Please, note that the Chinese questionnaire used a reversed and only 5-point covering scale in contrast to the ISSP 7-point scale (see V5).

V11 - Q6a Health care system will improve

Q6

How much do you agree or disagree with the following statements?

(PLEASE TICK ONE BOX ON EACH LINE)

Q6a In the next few years the health care system in [country] will improve

- 1 Strongly agree
- 2 Agree
- 3 Neither agree nor disagree
- 4 Disagree
- 5 Strongly disagree
- 8 Can't choose
- 9 No answer

V15 - Q7 Pay higher taxes to improve health care system

Q7

How willing would you be to pay higher taxes to improve the level of health care for all people in [country]?

(PLEASE TICK ONE BOX ONLY)

- 1 Very willing
- 2 Fairly willing
- 3 Neither willing nor unwilling
- 4 Fairly unwilling
- 5 Very unwilling
- 8 Can't choose
- 9 No answer

V21 - Q9b Access to publicly funded health care: health damaging behaviour

Q9

How much do you agree or disagree with the following statements?

People should have access to publicly funded health care even if they

(PLEASE TICK ONE BOX ON EACH LINE)

Q9b Behave in ways that damage their health

- 1 Strongly agree
- 2 Agree
- 3 Neither agree nor disagree
- 4 Disagree
- 5 Strongly disagree
- 8 Can't choose
- 9 No answer

V24 - Q11b Causes of health problems: environment

Q11

Severe health problems may have many causes. How much do you agree or disagree with the following statements?

People suffer from severe health problems

(PLEASE TICK ONE BOX ON EACH LINE)

Q11b Because of the environment they are exposed to at work or where they live

- 1 Strongly agree
- 2 Agree
- 3 Neither agree nor disagree
- 4 Disagree
- 5 Strongly disagree
- 8 Can't choose
- 9 No answer

V27 - Q12 Heart operation: smoker or non-smoker

Q12

Suppose two equally sick people need the same heart operation. One does not smoke, the other is a heavy smoker. In your opinion who should get the operation first?

(PLEASE TICK ONE BOX ONLY)

- 1 The non-smoker
- 2 The heavy smoker
- 3 Their smoking habits should make no difference
- 8 Can't choose
- 9 No answer

V28 - Q13 Heart operation: 30 or 70 year old

Q13

Now, suppose two other equally sick people need the same heart operation. One is aged 30, the other 70. In your opinion who should get the operation first?

(PLEASE TICK ONE BOX ONLY)

- 1 The 30 year old
- 2 The 70 year old
- 3 Their ages should make no difference
- 8 Can't choose
- 9 No answer

V32 - Q16a Doctors: can be trusted

Q16

How much do you agree or disagree with the following statements about doctors in general in [country]?

(PLEASE TICK ONE BOX ON EACH LINE)

Q16a All things considered, doctors can be trusted

- 1 Strongly agree
- 2 Agree
- 3 Neither agree nor disagree
- 4 Disagree
- 5 Strongly disagree
- 8 Can't choose
- 9 No answer

V36 - Q16e Doctors: tell about mistake during treatment

Q16

How much do you agree or disagree with the following statements about doctors in general in [country]?

(PLEASE TICK ONE BOX ON EACH LINE)

Q16e Doctors would tell their patients if they made a mistake during treatment

- 1 Strongly agree
- 2 Agree
- 3 Neither agree nor disagree
- 4 Disagree
- 5 Strongly disagree
- 8 Can't choose
- 9 No answer

Note:

/ PL: Please note that subquestion Q16e "Doctors WOULD tell their patients if they made a mistake during treatment" in Poland's questionnaire was erroneously translated into "Doctors SHOULD tell their patients if they made a mistake during treatment". As a result, the substantial meaning of this question has changed making the Polish answers incomparable.

V37 - Q17a Past 4 weeks: health problems

Q17

During the past 4 weeks how often

(PLEASE TICK ONE BOX ON EACH LINE)

Q17a Have you had difficulties with work or household activities because of health problems?

- 1 Never
- 2 Seldom
- 3 Sometimes
- 4 Often
- 5 Very often
- 8 Can't choose
- 9 No answer

in Taiwan (TW):

- 0 Not asked for subsample

Note:

/ FR: Approx. 70 percent of the interviewed were not able to respond to this question due to problems in the first version of the printed questionnaire. The NA-rate is therefore very high.

V38 - Q17b Past 4 weeks: bodily aches or pains

Q17

During the past 4 weeks how often

(PLEASE TICK ONE BOX ON EACH LINE)

Q17b Have you had bodily aches or pains?

- 1 Never
- 2 Seldom
- 3 Sometimes
- 4 Often
- 5 Very often
- 8 Can't choose
- 9 No answer

Note:

/ FR: Approx. 70 percent of the interviewed were not able to respond to this question due to problems in the first version of the printed questionnaire. The NA-rate is therefore very high.

V41 - Q17e Past 4 weeks: not overcome problems

Q17

During the past 4 weeks how often

(PLEASE TICK ONE BOX ON EACH LINE)

Q17e Have you felt you could not overcome your problems?

- 1 Never
- 2 Seldom
- 3 Sometimes
- 4 Often
- 5 Very often
- 8 Can't choose
- 9 No answer

Note:

/ FR: Approx. 70 percent of the interviewed were not able to respond to this question due to problems in the first version of the printed questionnaire. The NA-rate is therefore very high.

V50 - Q21b If seriously ill: treatment from doctor of your choice

Q21

How likely is it that if you become seriously ill, you would get or not get

(PLEASE TICK ONE BOX ON EACH LINE)

Q21b Treatment from the doctor of your choice?

- 1 It's certain I would get
- 2 It's likely I would get
- 3 Equal chance of getting or not getting
- 4 It's likely I would not get
- 5 It's certain I would not get
- 8 Can't choose
- 9 No answer

V53 - Q23b Satisfaction with treatment: alternative health care practitioner

Q23

How satisfied or dissatisfied were you with the treatment you received

(PLEASE TICK ONE BOX ON EACH LINE)

Q23b When you last visited an [alternative /traditional/ folk] health care practitioner?

- 1 Completely satisfied
- 2 Very satisfied
- 3 Fairly satisfied
- 4 Neither satisfied nor dissatisfied
- 5 Fairly dissatisfied
- 6 Very dissatisfied
- 7 Completely dissatisfied
- 97 Does not apply
- 98 Can't choose
- 99 No answer

V55 - Q24 Smoking cigarettes

Q24

Do you smoke cigarettes, and if so about how many cigarettes a day?

(PLEASE TICK ONE BOX ONLY)

- 1 Do not smoke and never did
- 2 Do not smoke now but smoked in the past
- 3 Smoke 1-5 cigarettes per day
- 4 Smoke 6-10 cigarettes per day
- 5 Smoke 11-20 cigarettes per day
- 6 Smoke 21-40 cigarettes per day
- 7 Smoke more than 40 cigarettes per day
- 98 Can't choose
- 99 No answer

in Russia (RU):

- 98 Smoke a pipe

in Taiwan (TW):

- 0 Not asked for subsample

V63 - Q29 Kind of health insurance

Q29

What kind of health insurance do you have?

- 1 Have no health insurance
- 2 National/public health insurance (including coverage by publ
- 3 Private insurance (B)
- 4 Employer/union based insurance (C)
- 5 National/public health insurance and private/complementary i
- 6 Public/national and employer/union based insurance (A+C)
- 7 Employer/union based and private/complementary insurance (B+
- 8 Employer/union based, private/complementary and national/pub
- 9 Other (specify)
- 98 Don't know, Can't choose
- 99 No answer

in Belgium/ Wallonia (BE-WAL):

- 0 Not available

in Czech Republic (CZ):

- 0 Not available

in United States of America (US):

- 9 Military/ veterans

Note:

<Note to ISSP members: The following is a module-specific obligatory coding scheme. The question should be asked in a way (wording and categories) relevant to your country. However, please include the category "have no health insurance" even if only a small number of your respondents are likely to place themselves to this category. The answers of each respondent should be coded into one of the following categories>

/ NO: In Norway almost 100% of the population are by default members of the public health insurance scheme. This scheme is so inherent in the Norwegian society that when people are asked about health "insurance", they don't think about this scheme - it is just there. So, if you add the categories in V63 that includes national/public, you find that 52% of the respondents were conscious about the fact that they have this insurance. As many as 13% answered that they have no insurance at all.

BIRTH - Year of birth

BVQ_02. BIRTH

When were you born?

(Please, write in the year of your birth, use four digits for the year.)

COMMENT TO BIRTH: The preferred question is to ask BIRTH
AGE however can be calculated from DATE and BIRTH.

AU IL NL NO PH PL TW: When were you born?

BE-FLA: What's the year and month of your birth?

BE-WAL: What's the year of your birth?

CH: Information automatically taken from sample database

CL US: What is your date of birth?

CN: When is your birthday?

CZ DK FI LT PT SE SI SK: What year were you born?

DE: Please tell me what month and year you were born in.

ES: In which year were you born?

FR: What is your year of birth?

GB-GBN KR ZA: BIRTH is computed from AGE

IT: What is your birthdate (day/month/year)?

JP: Year of birth

RU: Not asked directly, computed by DATEYR minus AGE.

TR: May I learn the year of your birth.

1908 1908

1996 1996

9999 No answer

Note:

/ CL: The answer to this question is the complete date of birth, i.e. day/month/year. Here only year of birth is provided.

/ CN: If the respondent answered by the lunar calendar, Chinese Zodiac or other manners, the answer should be conversed to the calendar year.

/ IL: Interview age 18 and above (year 1993 or less)

/ JP: Respondent's year of birth can be known from the sampling frame.

/ NO: Item non-response replaced by data from Central Register of Persons

/ SE: No missing values. These were later derived from national register

AGE - Age of respondent

AGE

This question can be asked as an alternative to asking about BIRTH. If AGE is not asked directly, it must be computed be DATEYR 'year of the interview' minus BIRTH 'year of birth'. If your country is free to choose between asking BIRTH or AGE directly, the ISSP prefers BIRTH being asked.

AU: Calculated as 2012 -minus- year of birth

BE: Calculated as 2011 - BIRTH

CH CN CZ DK DE ES FI IL LT NO SK TR TW US: Computed from DATEYR minus BIRTH

CL HR: How old are you?

ES: Calculated as 2012-BIRTH

FR IT SE SI: AGE computed from BIRTH.

GB-GBN: What was your age last birthday?

KR: How old is [Person]?

NL: Computed by year of mailback (2011) - year of birth

PH: Actual age of respondent

RU: How old are you? (completed years)

ZA: Age of respondent in completed years

15 15 years

102 102 years

999 No answer

Note:

/ IL: Interview age 18 and above (year 1993 or less)

/ NL: In case of refusal we looked for further cues to determine approximate birth year: year of ending education, year of entering labour force, presence and age of children

/ NO: Item non-response replaced by data from Central Register of Persons

/ SE: Missing values were later derived from National Register.

EDUCYRS - Education I: years of schooling

BVQ_03. EDUCYRS

How many full years of schooling or education have you had? Please include primary and secondary schooling, university and full-time vocational training, but do not include repeated years.

(Please enter number of years or tick a box as applicable.)

AU: Are you currently still in school or studying in higher education? How many full years of schooling or education have you had? Please include primary and secondary schooling, university and full-time vocational training, but do not include repeated years. If you are currently in education count the number of years you have completed so far.

BE: How many years of primary education did you complete? How many years of secondary education did you complete? How many years higher education of short or long type or university did you complete? Variable was calculated as the sum of those three items.

CH: For how many years were you in fulltime education? Don't count the time you possibly spent doing an apprenticeship or repeating years. How many years did it take to do this apprenticeship, not including any possible repeated years?

CL: Without taking into account grade repetitions, how many approved years of study do you have?

CN: Derived from 'What is your highest educational level currently'?

CZ: How many years of schooling or education have you had? Please include all years of full-time study, even if you did not graduate from that school. Do not forget about primary school. Do not include vocational and requalification courses, part-time study or distance learning. Do not include repeated years.

DE: How many full years of schooling or education have you had in total, including primary and secondary schooling, university and full-time vocational training at school, but not including in-firm training. If you have ever repeated a year, please do NOT include these years. If you are currently at school or university, please count the number of years you have already completed at school or university.

DK: How many years of full time schooling do you have? Are you still attending a school education? Are you still attending a vocational training or a higher education?

ES: Have you gone to school or taken any kind of courses? How many years were you at school or taking (official) courses with full-time dedication?

FI: How many years have you gone to school or studied altogether? Include primary education, lower secondary education, general upper secondary education, all full-time education aiming at a vocational qualification and higher education.

FR: Derived from 'How old were you when you stopped your studies'?

GB-GBN: Derived from 'How old were you when you completed your continuous fulltime education'?

HR: How many years of formal education do you have?

IL: How many years (full-time equivalent) have you been in formal education?

IT: Derived from 'At what age did you quit the education system?' and 'Are you currently enrolled in any school grade? If so, which one?'

JP: Please indicate the last school you attended or the school you are currently attending. How many years of education did you receive from the time you entered elementary school to the time you graduated or left your final place of education? Do not include any time spent at higher vocational schools or schools in the miscellaneous category.

KR: Derived from 'What is the highest level of school you have attended?' and 'Did you graduate from this school, or are you currently attending?' and 'In what grade did you drop out?' and 'What grade are you in?'

LT: How many full years of schooling or education have you had? Please indicate how many years of schooling or education in primary, secondary, basic, vocational or gymnasium school, college, university or institute have you completed. If you repeated year or course several times, count only the first year.

NL: How many years of education have you attended after primary school? (If parttime, recalculate to full-time.)

NO: All in all, how many years of education have you completed? Please include all schooling and education, also compulsory school and apprenticeship.

PH: How many full years of schooling or education have you had? Please include primary and secondary schooling, university and full-time vocational training.

PL: How many years did you spent on learning in total in all schools/ universities, which you ever attend? Do not count repeated grades/ years of study gaps in learning and training courses.

PT: Now I would like to ask you some questions about your education level. Please tell me for how many years did you go to school, including the years that you had to repeat and university studies?

RU: How many years have you completed in all educational institutions including primary, secondary and tertiary school but excluding training courses?

SE: How many years of full-time education have you had? Include primary school, and, if applicable, gymnasium (=secondary school) and college/university education.

SI: How long lasted your schooling? Consider all types of schooling from primary school to university, including professional education, training period, but do not count class repetitions.

SK: How long have you been in education so far? Please count all years of full time schooling if you did not finish the school. Don't forget to count basic school. Don't count evening or distance study. Don't include time spent on professional training or requalification. If you still study, please state the years of study finished so far.

TR: What is your education? How many years have you spent in primary, secondary and university education other than professional training?

TW: How many years of formal education do you have?

US: Derived from 'What is the highest grade in elementary school or high school that you finished and got credit for?' and 'Did you ever get a high school diploma or a GED certificate?' and 'Did you ever complete one or more years of college for credit, not including schooling such as business college, technical or vocational school?' and 'How many years did you complete?' and 'Do you have any college degrees? What degree or degrees?'

ZA: How many years of full time education have you completed?

- 0 No formal schooling, no years at school
- 95 Still at school
- 96 Still at college, university, in vocational training
- 97 Refused
- 98 Don't know
- 99 No answer

in Finland (FI):

- 0 I have not gone to school

Note:

/ FR: Age Respondent left school minus 6 years.

/ GB-GBN: Derived by subtracting 5 years from the answer to this question, the school starting age in Britain.

/ IT: Derived by consideration of Italy's school starting age which is 6 years.

/ NL: For calculation 6 years were added. Responses over 30 were recoded to be missing. Note that the variable does not exclude persons still in education.

/ PT: By mistake, a previous version of this question was asked, including codes 95 and 96, as well as considering repeated years. Answer categories 'Don't know' and 'Refused' are not read aloud and do not appear on the accompanying show cards. This is valid for the entire questionnaire.

/ SE: If you are currently in education, count the number of years you have completed so far. Usually people enter the school system (the low stadium) at age 6 or 7.

/ SK: Codes 95 and 96 are derived from a separate country specific question on current status, which included the information if the respondent was still at school or at university.

/ TR: Primary school graduate = Code 5, junior high = Code 8, high school = Code 11, university graduate = Code 15, medical school graduate = Code 17, engineer or architect with MS = Code 16 (engineer or architect with an MS degree literally can be translated as high

engineer/ architect; so, high engineer/ architect answers are coded as 16).

ES_DEGR - Spain: Country specific highest completed degree of education

Which are the highest level official studies that you have done (whether you have finished them or not)? Please specify as much as possible, telling me

- the level (year) you were in, when you finished (or interrupted them),

- and also the name those studies had then (if different).

(Example: 3 years of Primary, Primary, first year of Junior High, Vocational Training, last year of High School, 4th year of former Primary Education, College degree, PhD, first level of Vocational Training, etc)

0 NAP, other countries

1 No formal schooling, did not go to school

2 Less than 5 years of formal schooling

3 Primary School completed

4 Low Secondary School, Junior High

5 Vocational Training, medium level Professional Training

6 High Secondary School completed

7 Vocational Training, high level Professional Training

8 Technical Architecture, technical Engineering, 3 years Tech

9 3 years completed non-technical University

10 Architecture and Engineering, Technical Schools

11 College Degree, 4 years

12 Official Graduate Studies, PhD, Master

99 No answer

Note:

/ ES: Code 6 'Vocational Training, high level' is a degree that gives access only to certain University careers and (University) degrees.

Codes 7 and 8 are University degrees, but only 3 years Univ. Since the full application of the BOLONIA system, most careers are 4 years, but there are not cases in this survey so far. Prior to that, most careers were 5 years and some (Technical Schools) more than 5.

Note:

/ NL: 'Basisschool' would refer to various names of primary (and preprimary) education in the past. Whatever its name has been in the past, this type of education has always ended at age 12, i.e. grade 6 in the old system and grade 8 in the new system. The difference is due to the inclusion of pre-primary education in the accounting. However, holding back students in primary school has been common practice, so some will have stayed in 'basisschool' until a later age, including some who have never finished and left at age 14 or 15.

DEGREE - Highest completed education level: Categories for international comparison

Education II - Highest education level: Harmonized categories of country specific degree and/ or years of education variable.

<The aim of this variable is to measure the highest completed education level/ degree of the respondent in order to facilitate international comparison>

AU: What is the highest level of high school education you have completed? What is the highest level of education you have completed since leaving high school?

BE: What is the highest degree you completed? At this moment you are still in school. What kind of education do you follow?

CH: Which is the highest educational level you achieved?

CL: Without taking into account grade repetitions, what is your educational level?

CZ: What is the highest level of education that you have attained?

CN: What is your highest educational level currently?

DE: What general school leaving certificate do you have? (highest certificate) What vocational or professional training do you have? What is the highest polytechnical degree you have graduated with

DK: What school education do you have? What business training or higher education do you have beyond school education?

ES: Have you gone to school or taken any kind of courses? Which are the highest level official studies that you have done (whether you have finished them or not)? Please specify as much as possible, telling me the level (year) you were in, when you finished (or interrupted them), and also the name those studies had then (if different).

FI: What is your education?

FR: What is your educational level?

GB-GBN: Highest educational qualification obtained - Have you passed any of the examinations on this card?

HR: Your highest educational level (school completed regularly or part-time).

IL: What is the highest level of education that you have attained?

IT: What is the highest degree you attained?

JP: Please indicate the last school you attended or the school you are currently attending.

KR: What is the highest level of school you have attended?

LT: What is the highest level of education that you have attained?

NL: What is your highest completed education? If you are still in education: what is the education in which you are enrolled?

NO: Which general education have you completed? Which vocational education/training have you completed? Which tertiary education have you achieved?

PH: What is the highest level of education that you have attained?

PL: What is the level of education that you have obtained until now?

PT: What is the highest degree of education that you completed? If none of the presented descriptions in the card corresponds to your case, please describe in detail the level of education achieved.

RU: What is your highest educational level that you have attained?

SE: What is your highest level of education that you have attained?

SI: Name last school that you have finished, regularly or irregularly.

SK: What is your highest achieved education level?

TR: Levels of education/ Highest degree - directly coded from EDUCYRS

TW: What is your highest education level?

US: What is the highest grade in elementary school or high school that you finished and got credit for? Did you ever get a high school diploma or a GED certificate? Did you ever complete one or more years of college for credit - not including schooling such as business college, technical or vocational school? How many years did you complete? Do you have any college degrees? What degree or degrees?

ZA: What is the highest level of education you have ever completed?

- 0 No formal education
- 1 Primary school
- 2 Lower secondary (secondary education completed that does not allow entry to university: end of obligatory school but also short programs (less than 2 years))
- 3 Upper secondary (programs that allow entry to university)
- 4 Post secondary, non-tertiary (other upper secondary programs toward the labour market or technical formation)
- 5 Lower level tertiary, first stage (also technical schools at a tertiary level)
- 6 Upper level tertiary (Master, Dr.)
- 9 No answer

in Finland (FI):

- 1 Primary education

in Israel (IL):

- 6 University completed, BA or more

in Slovenia (SI):

- 6 Specialisation, Master degree (also Bologna master), Doctorate degree, PhD

in South Africa (ZA):

- 6 Postgraduate degree or diploma

Note:

The DEGREE of education must be asked country-specific. Do not use the ISSP categories given here in your field questionnaires! The harmonised ISSP categories must be computed from the country-specific degrees (nat_DEGREE). Correspondence lists between country specific categories and categories of the ISSP DEGREE variable must be reported in detail in the BV documentation template. Since DEGREE is a slightly re-arranged subset of ISCED-97, instructions for actually coding ISCED-97 from nat-DEGR in your country can be used to support the coding of DEGREE.

WORK - Currently, formerly, or never in paid work

BVQ_05. WORK

Are you currently working for pay, did you work for pay in the past, or have you never been in paid work?

(Please tick one box only.)

AU DE IL JP LT PH SE SI SK TR TW ZA: Are you currently working for pay, did you work for pay in the past, or have you never been in paid work?

BE-FLA: Are you in paid work at this moment, were you in paid work in the past, or were you never in paid work? With paid work, we mean work for at least an hour a week as an employee or as a self-employed person. This includes GESKO, RVA-internship, PWA, interim, DAC, service cheques, helping in family company. When you are temporarily not working due to sickness, giving birth, parental leave, palliative leave, leave for medical assistance of a sick family member, please consider your normal work routine.

BE-WAL: What is your work situation?

CH: Are you currently working for pay, or did you work for pay in the past? Let me just check: are you currently or did you work in the past for your own family's business?

CL: Which of the following best describe your current situation?

CN: What is your working experience or employment status?

CZ: Are you currently working for pay, did you work for pay in the past, or have you never been in paid work or self-employed?

DK: Are you currently employed?

ES: Which of the following situations applies to you at present? (If student or housework) Are you engaged, besides, in any kind of paid work - part time, occasionally, etc? (If apprentice, practice, scholarship holder - with contract) Do you get any payment for that activity? (If student, unpaid domestic work, apprentice/ practice/ scholarship holder - with contract, leave of absence for sickness/ permanently disabled or other situation) What about the past? Have you ever worked for pay?

FI: Are you currently in paid work?

FR: What is your situation in relation to work?

GB-GBN: Which of these descriptions applied to what you were doing last week, that is the seven days ending last Sunday? How long ago did you last have a paid job of at least 10 hours a week?

HR: Are you currently employed in paid work?

IT: What is your current employment status? What kind of job do you have/had?

KR: Do you have a job that provides income? Have you ever had a paid job?

NL: What is at present your main activity?

NO: Are you or have you ever been in paid work?

PL: What is your current job situation? Are you currently...

PT: Which of the following situations applies to your case?

RU: Are you currently working for pay? Did you work for pay in the past?

US: Last week were you working full time, part time, going to school, keeping house, or what?

- 1 Currently in paid work
- 2 Currently not in paid work, paid work in the past
- 3 Never had paid work
- 9 No answer

in China (CN):

- 1 Engaged in non-agriculture work now
- 2 Engaged in agriculture now, but used to do non-agriculture work/ Unemployed now, but used to do non-agriculture work

3 Engaged in agriculture now, never do non-agriculture work/ Unemployed now, and only engaged in agriculture before/ Never get a job

in Denmark (DK):

1 Yes, full time employed (30 hours or more per week), self-employed (30 hours or more per week), employed part time (10-29 hours per week), self-employed part time (10-29 hours per week), employed less than part time (less than 10 hours per week), employed but temporarily out of work because of illness, employed but temporarily out of work because of maternity leave, parents leave or education leave, helping family member, apprentice or trainee

in Spain (ES):

1 Working for pay/ Student or Domestic work with any kind of paid work/ Apprentice, practice or scholarship holder with contract and payment for that activity

2 Retired or pensioner (previously working)/ Unemployed (previously working)/ Student or Domestic work with currently no engagement but worked for pay in the past/ Apprentice, practice or scholarship holder with contract without payment for that activity, but worked for pay in the past/ Leave of absence for sickness or permanently disabled, Other situations but worked for pay in the past

3 Pensioner (previously not working)/ Unemployed looking for first job/ Student that never worked for pay/ Domestic work and never worked for pay in the past/ Apprentice, practice, scholarship holder that never worked for pay/ Leave of absence for sickness or permanently disabled and never worked for pay/ Other situations but never worked for pay in the past

in Great Britain (GB-GBN):

1 In paid work (or away temporarily) for at least 10 hours in week, waiting to take up paid work already accepted

in Norway (NO):

1 Yes, I am in paid work now, yes, but temporarily away, due to illness, on leave, or similar

in Poland (PL):

1 Work full time (including farmers and others persons working in their own business), working part time, by fits and starts, seasonly, commission, apprentice, maternity / parental leave

Note:

By work we mean doing incomeproducing work, as an employee, self employed or working for your own family's business, for at least one hour per week. If you temporarily are not working for pay because of temporary illness/ parental leave/ vacation/ strike etc, please refer to your normal work situation.

/ CZ: It is common in the Czech context to take advantage of a relatively long maternity (28 weeks) and parental (until child turns 3) leave, therefore persons on maternity/parental leave were not treated as economically active unless they are simultaneously working for pay for at least one hour per week.

/ ES (Code 5): Leave of absence for sickness or permanently disabled should say PERMANENT leave of absence or permanently disabled. As it is, it puts together those who are out of work because of a temporary absence for sickness and those permanently disabled. Therefore, there may be working people who are classified as nonworking.

/ NL: Derived from WRKST

WRKHRS - Hours worked weekly

BVQ_06. WRKHRS

How many hours, on average, do you usually work for pay in a normal week, including overtime?

If you work for more than one employer, or if you are both employed and self-employed, please count the total number of working hours that you do.

(Please write in.)

On average, I work ... hours a week, overtime included.

AU: How many hours, on average, do you usually work for pay in a normal week, including overtime? If you work for more than one employer, or if you are both employed and self-employed, please count the total number of working hours that you do.

BE-FLA: In general, how many hours do you usually work during a week, from Monday until Sunday, with overtime? Work only for your profession.

BE-WAL: In general, how many hours do you usually work during a week?

CH: How many hours, on average, did you usually work for pay in a normal week, including overtime?

CL: Generally, how many hours do you work in a week?

CN: Derived from 'Did you work for more than one hour for income last week?' and answer code 1 'Yes, I worked for xy hours last week.'

CZ: How many hours weekly, on average, do you work in your employment and, if applicable, in your other paid jobs, including overtime?

DE: How many hours per week do you normally work in your main job including overtime? How many hours per week do you normally work in your less than part ('half') time employment?

DK: How many hours do/ did you normally work in a working week?

ES: Derived from 'How many hours, about, do you (or did you) work for a pay, per week, on average, including overtime work?'

FI: How many hours on average do you work in a week, including overtime? If you have more than one employer or if you are both employed and self-employed/ entrepreneur, include all hours.

FR: If you are working, how many hours do you work weekly?

GB-GBN: How many hours do you normally work a week in your main job - including any paid or unpaid overtime?

HR: How many hours you work in a normal week, including overtime?

IL JP: How many hours, on average, do you usually work for pay in a normal week, including overtime?

IT: On average, how many hours a week do you work?

KR: How many hours a week do you usually work?

LT: How many hours, on average, do you usually work for pay in a normal week, including overtime? If you work for more than one employer, or if you are both employed and self-employed, please count the total number of working hours that you do.

NL: How many hours per week do/ did you work on average?

NO: How many hours do/ did you usually work per week in your main job (including paid overtime as well as work hours at home)?

PL: On average, how many hours a week do you work (did you work) at that job?

PH SE SI TW: How many hours, on average, do you usually work for pay in a normal week, including overtime?

PT: How many hours, on average, do you work, in a week?

RU: How many hours, on average, do you usually work for pay in a normal week?

SK: How many hours a week including over time do you work on average in any paid job?

TR: How many hours a week do you normally work?

US: How many hours did you work last week, at all jobs? How many hours a week do you usually work, at all jobs?

ZA: How many hours do/ did you normally work a week (in your main job)?

0 NAP (Code 2 or 3 in WORK)

1 1 hour

96 96 hours and more

98 Don't know

99 No answer

in Denmark (DK):

0 NAP (Code 3 in WORK)

in Italy (IT):

98 Don't know, varies too much

in Taiwan (TW):

98 Time varies

Note:

/ CZ: Round the nearest whole number of hours.

/ NL: Note that the responses peak at 40, which is the traditional length of the work week, but this has been reduced to 38/36 more than a decade ago!

EMPREL - Employment relationship

BVQ_07. EMPREL

Are/ were you an employee, self-employed, or working for your own family's business?

(Please tick one box only.)

AU CL IL JP LT NO PH SE SI TR TW ZA: Are you an employee, self-employed, or working (as an unpaid worker) for your own family's business? If you work for more than one employer, or if you are both employed and self-employed, please refer to your main job. If you are not currently working, please refer to your last main job.

BE: What corresponds with your work situation right now?

CN: Which of the following situation is most suitable to your employment status now?

CZ: Now I would like to learn about what you currently do/ did. What is/ was your current economic status, main source of subsistence?

DE: Please classify your occupational status/ last occupational status according to this card.

DK: Are/ were you in public or private employment or self-employed?

ES: Derived from 'Do/did you (or the person who earns more income in your household) work as ...?'

FR: EMPREL is computed from the former variables on WRKTYP and NEMPLOY.

GB-GBN: In your work or business, (do/did/will) you have any employees, or not? In your (main) job are you/ were you/ will you be an employee or self-employed?

IT: In your current job for whom do you work? If you are not working now, please tell us about your most recent job. (Only for the self-employed) How many dependent workers do you have?

KR: Do you work for someone else? Are you working for the family, self-employed with no employees, or self-employed with employees?

NL: In which type of organisation do you work at present/ did you work in your current/ last job?

PL: What is/ was the form of ownership of this place of work?

Are/ were you self-employed (owner/ co-owner of the firm/ farm), or did you work for someone else?

PT: In your professional activity you are/ were:

RU: Are you currently working? If so are you working for pay (as an employee), or are you self employed with or without employees?

SK: Are you an employee or an entrepreneur, sole trader or do you work for a family business?

US: Did you ever work for as long as one year? Are/were you self-employed or do/did you work for someone else?

0 NAP (Code 3 in WORK)

1 Employee

2 Self-employed without employees

3 Self-employed with employees

2 Work for a government organization, for a public school, for a non-profit organization

in United States of America (US):

0 Not available

Note:

/ IT: By mistake this information has not been collected.

/ HR: Profit designation is NOT related to the current economic situation and business success of an organization. Examples of profit organizations are those working as a private company, but also those working as a public enterprise that generates income to the owners (HEP, the Croatian forest ...). An example of non-profit organization would be teachers and doctors in the state sector, while teachers and doctors in private schools, clinics and hospitals should define their work in for-profit companies.

/ LT: Non-profit organizations are public agencies, associations, charity and support funds, home owners' communities, political parties, trade unions, organizations of artists and other organizations>

ISCO88 - Occupation ISCO/ ILO 1988

BVQ_13. ISCO88

Respondent's Occupation: International Occupation Code 1988

a. What is/ was your occupation - i.e., what is/ was the name or title of your main job?

(Please write in and describe as clearly as possible.)

b. In your main job, what kind of activities do/did you do most of the time?

(Please write in and describe as clearly as possible.)

c. What does/did the firm/organisation you work/worked for mainly make or do - i.e., what kind of production/function is/was performed at your workplace?

(Please write in and describe as clearly as possible.)

AU PH: What is/ was your occupation, what is/ was the name or title of your main job? In your main job, what kind of activities do/ did you do most of the time? What does/ did the firm/ organisation you work/ worked for mainly make or do, i.e., what kind of production/function is/was performed at your workplace?

BE: Can you give me the name of your current (former) profession?

CH: What is/ was your current/ last occupation (principal employment)? In your main job, what kind of activities do/ did you do most of the time?

CL: What is your main activity? What are some of your main duties? These two questions are open-ended. They are recoded using ISCO88.

CN: What is your specific job now? What is your specific job of your last non-agriculture job?

CZ: (Those who ever been in paid work) What is (was) your current (last) occupation, what kind of activity do (did) you do in it? State your job title and describe briefly the job activity you do (did) in this occupation.

DE: What work do you do in your main job? Does this job, this work have a special name? (If respondent not employed in main job) Until what year were you in full to 'half' time employment or have you never been in full to 'half' time employment? What work did you do in your last main job?

DK: What are/ were your accurate occupation?

ES: Derived from 'And which was your last occupation or trade? That is, in what does/ did your work consist of, specifically? We are referring to your main occupation: the one for which you (or the person who earns most in the household) obtains/ obtained your/ his/ her highest earnings.'

FI: What is your current or latest occupation? Write in the job title, not qualification/degree.

FR: If you are working, what is your current occupation? If you do not work but if you have already worked, what was your last occupation?

GB-GBN: Now I want to ask you about your (present/ last/ future) job. What (is/ was/ will) your job (be)? What (is/ was) the name or title of the job? What kind of work (do/ did/ will) you do most of the time? What training or qualifications (are/ were) needed for that job?

HR: Please state the exact name of your job title and occupation. (Most recent job if respondent currently not employed, retired or unemployed) Describe what you do, what your main tasks are. What are the educational and professional requirements for your job?

IT: Can you describe in full details what is your current/last job?

JP: Please give details about the main type of work you are engaged in.

KR: What kind of work do you normally do? What do you actually do in that job? If currently not working, tell me about your last job.

LT: (If in paid work now or ever) What is/ was your occupation? (Occupation, sector, position according to main source of living and if respondent has no current job - retired, unemployed etc. - most recent occupation.)

NL: What is or was your current/ last occupation? Please specify your main activities/ responsibilities.

NO: (If in paid work now or ever) What is/ was your work title (main job)? Please make a short description of your work tasks. Please describe your work tasks as accurately as possible. What does/did the organisation you work/worked for mainly make or do?

PL: What kind of work do you/ did you normally do? That is, what is/was your job called? What do/did you actually do in that job? Tell me what are/were some of your main duties? How is/ was your job title? What do/ did they produce, what services did they provide, what is (was) the main profile of the place you work(ed) in?

PT: What is/ was your professional activity?

RU: What is your current occupation? What kind of activities do/did you do most of the time? (Occupation at the most recent work place if no current job)

SE: What is your occupation? If you are retired or not working at the moment, please indicate what your occupation was in your last job. What kind of production/ activity is performed at your current or last workplace?

SI: What profession or work do you do now? If not working at the moment: what was your last (main) occupation before losing your job or becoming retired. Tell detailed name of your position at work and exact profession. What is the main activity of your work organisation?

SK: Please, write the name of your main occupation. Include detailed description of your working activity: what is your principal activity, responsibility etc. If you are not in labour force (retired or unemployed) at the moment, think of your most recent job. If you are self-employed or entrepreneur, please specify the area of your business.

TR: What is/was your occupation? So, what is your title?

TW: What is your main occupation (at present, or prior to retirement)?

US: Did you ever work for as long as one year? What kind of work do/ did you normally do? That is, what is/ was your job called? What do/ did you actually do in that job? Tell me what are/ were some of your main duties? What kind of place do/ did you work for? What do/ did they (make/ do)?

ZA: What is your current occupation? (The name and title of your main job).

7214 Structural-metal preparers and erectors

7215 Riggers and cable splicers

7216 Underwater workers

7220 BLACKSMITHS, TOOL-MAKERS AND RELATED TRADES WORKERS

7221 Blacksmiths, hammer-smiths and forging-press workers

7222 Tool-makers and related workers

7223 Machine-tool setters and setter-operators

7224 Metal wheel-grinders, polishers and tool sharpeners

7230 MACHINERY MECHANICS AND FITTERS

7231 Motor vehicle mechanics and fitters

7232 Aircraft engine mechanics and fitters

7233 Agricultural- or industrial-machinery mechanics and fitters

7240 ELECTRICAL AND ELECTRONIC EQUIPMENT MECHANICS AND FITTERS

7241 Electrical mechanics and fitters

7242 Electronics fitters

7243 Electronics mechanics and servicers

7244 Telegraph and telephone installers and servicers

7245 Electrical line installers, repairers and cable jointers

7300 PRECISION, HANDICRAFT, PRINTING AND RELATED TRADES WORKERS

7310 PRECISION WORKERS IN METAL AND RELATED MATERIALS

7311 Precision-instrument makers and repairers

7312 Musical instrument makers and tuners

7313 Jewellery and precious-metal workers

7320 POTTERS, GLASS-MAKERS AND RELATED TRADES WORKERS

7321 Abrasive wheel formers, potters and related workers

7322 Glass makers, cutters, grinders and finishers

7323 Glass engravers and etchers

7324 Glass, ceramics and related decorative painters

7330 HANDICRAFT WORKERS IN WOOD,TEXTILE, LEATHER AND RELATED MATERIALS

7331 Handicraft workers in wood and related materials

7332 Handicraft workers in textile, leather and related materials

7340 PRINTING AND RELATED TRADES WORKERS

7341 Compositors, typesetters and related workers

7342 Stereotypers and electrotypers

7343 Printing engravers and etchers

7344 Photographic and related workers

7345 Bookbinders and related workers

7346 Silk-screen, block and textile printers

7400 OTHER CRAFT AND RELATED TRADES WORKERS

7410 FOOD PROCESSING AND RELATED TRADES WORKERS

7411 Butchers, fishmongers and related food preparers

7412 Bakers, pastry-cooks and confectionery makers

7413 Dairy-products makers

7414 Fruit, vegetable and related preservers

7415 Food and beverage tasters and graders

7416 Tobacco preparers and tobacco products makers

7420 WOOD TREATERS, CABINET-MAKERS AND RELATED TRADES WORKERS

7421 Wood treaters

7422 Cabinet makers and related workers

7423 Woodworking machine setters and setter-operators

7424 Basketry weavers, brush makers and related workers

7430 TEXTILE, GARMENT AND RELATED TRADES WORKERS

7431 Fibre preparers

7432 Weavers, knitters and related workers

7433 Tailors, dressmakers and hatters

7434 Furriers and related workers

7435 Textile, leather and related pattern-makers and cutters

7436 Sewers, embroiderers and related workers

7437 Upholsterers and related workers

7440 PELT, LEATHER AND SHOEMAKING TRADES WORKERS

7441 Pelt dressers, tanners and fellmongers

7442 Shoe-makers and related workers

7510 Metal worker not elsewhere classified

7900 Master craftsman, supervisor

8000 PLANT AND MACHINE OPERATORS AND ASSEMBLERS

8100 STATIONARY-PLANT AND RELATED OPERATORS

8110 MINING- AND MINERAL-PROCESSING-PLANT OPERATORS

8111 Mining-plant operators

8112 Mineral-ore- and stone-processing-plant operators

8113 Well drillers and borers and related workers

8120 METAL-PROCESSING-PLANT OPERATORS

8121 Ore and metal furnace operators

8122 Metal melters, casters and rolling-mill operators

8123 Metal-heat-treating-plant operators

8124 Metal drawers and extruders

8130 GLASS, CERAMICS AND RELATED PLANT OPERATORS

8131 Glass and ceramics kiln and related machine operators
8139 Glass, ceramics and related plant operators not elsewhere classified
8140 WOOD-PROCESSING- AND PAPERMAKING-PLANT OPERATORS
8141 Wood-processing-plant operators
8142 Paper-pulp plant operators
8143 Papermaking-plant operators
8150 CHEMICAL-PROCESSING-PLANT OPERATORS
8151 Crushing-, grinding- and chemical-mixing-machinery operators
8152 Chemical-heat-treating-plant operators
8153 Chemical-filtering- and separating-equipment operators
8154 Chemical-still and reactor operators (except petroleum and natural gas)
8155 Petroleum- and natural-gas-refining-plant operators
8159 Chemical-processing-plant operators not elsewhere classified
8160 POWER-PRODUCTION AND RELATED PLANT OPERATORS
8161 Power-production plant operators
8162 Steam-engine and boiler operators
8163 Incinerator, water-treatment and related plant operators
8170 AUTOMATED-ASSEMBLY-LINE AND INDUSTRIAL-ROBOT OPERATORS
8171 Automated-assembly-line operators
8172 Industrial-robot operators
8200 MACHINE OPERATORS AND ASSEMBLERS
8210 METAL- AND MINERAL-PRODUCTS MACHINE OPERATORS
8211 Machine-tool operators
8212 Cement and other mineral products machine operators
8220 CHEMICAL-PRODUCTS MACHINE OPERATORS
8221 Pharmaceutical- and toiletry-products machine operators
8222 Ammunition- and explosive-products machine operators
8223 Metal finishing-, plating- and coating-machine operators
8224 Photographic-products machine operators
8229 Chemical-products machine operators not elsewhere classified
8230 RUBBER- AND PLASTIC-PRODUCTS MACHINE OPERATORS
8231 Rubber-products machine operators
8232 Plastic-products machine operators
8240 WOOD-PRODUCTS MACHINE OPERATORS
8250 PRINTING-, BINDING- AND PAPER-PRODUCTS MACHINE OPERATORS
8251 Printing-machine operators
8252 Bookbinding-machine operators
8253 Paper-products machine operators
8260 TEXTILE-, FUR- AND LEATHER-PRODUCTS MACHINE OPERATORS
8261 Fibre-preparing-, spinning- and winding-machine operators
8262 Weaving- and knitting-machine operators
8263 Sewing-machine operators
8264 Bleaching-, dyeing- and cleaning-machine operators
8265 Fur and leather-preparing-machine operators
8266 Shoemaking- and related machine operators
8269 Textile-, fur- and leather-products machine operators not elsewhere classified
8270 FOOD AND RELATED PRODUCTS MACHINE OPERATORS
8271 Meat- and fish-processing-machine operators

8272 Dairy-products machine operators
8273 Grain- and spice-milling-machine operators
8274 Baked-goods, cereal and chocolate-products machine operators
8275 Fruit-, vegetable- and nut-processing-machine operators
8276 Sugar production machine operators
8277 Tea-, coffee-, and cocoa-processing-machine operators
8278 Brewers, wine and other beverage machine operators
8279 Tobacco production machine operators
8280 ASSEMBLERS
8281 Mechanical-machinery assemblers
8282 Electrical-equipment assemblers
8283 Electronic-equipment assemblers
8284 Metal-, rubber- and plastic-products assemblers
8285 Wood and related products assemblers
8286 Paperboard, textile and related products assemblers
8290 OTHER MACHINE OPERATORS AND ASSEMBLERS
8300 DRIVERS AND MOBILE-PLANT OPERATORS
8310 LOCOMOTIVE-ENGINE DRIVERS AND RELATED WORKERS
8311 Locomotive-engine drivers
8312 Railway brakemen, signallers and shunters
8320 MOTOR-VEHICLE DRIVERS
8321 Motor-cycle drivers
8322 Car, taxi and van drivers
8323 Bus and tram drivers
8324 Heavy-truck and lorry drivers
8330 AGRICULTURAL AND OTHER MOBILE-PLANT OPERATORS
8331 Motorised farm and forestry plant operators
8332 Earth-moving- and related plant operators
8333 Crane, hoist and related plant operators
8334 Lifting-truck operators
8340 SHIPS DECK CREWS AND RELATED WORKERS
8341 Deck crew, ship
8342 Engine crew, ship
9000 ELEMENTARY OCCUPATIONS
9100 SALES AND SERVICES ELEMENTARY OCCUPATIONS
9110 STREET VENDORS AND RELATED WORKERS
9111 Street food vendors
9112 Street vendors, non-food products
9113 Door-to-door and telephone salespersons
9120 SHOE CLEANING AND OTHER STREET SERVICES ELEMENTARY OCCUPATIONS
9130 DOMESTIC AND RELATED HELPERS, CLEANERS AND LAUNDERERS
9131 Domestic helpers and cleaners
9132 Helpers and cleaners in offices, hotels and other establishments
9133 Hand-launders and pressers
9140 BUILDING CARETAKERS, WINDOW AND RELATED CLEANERS
9141 Building caretakers
9142 Vehicle, window and related cleaners
9150 MESSENGERS, PORTERS, DOORKEEPERS AND RELATED WORKERS

9151 Messengers, package and luggage porters and deliverers
 9152 Doorkeepers, watchpersons and related workers
 9153 Vending-machine money collectors, meter readers and related workers
 9160 GARBAGE COLLECTORS AND RELATED LABOURERS
 9161 Garbage collectors
 9162 Sweepers and related labourers
 9200 AGRICULTURAL, FISHERY AND RELATED LABOURERS
 9210 AGRICULTURAL, FISHERY AND RELATED LABOURERS
 9211 Farm-hands and labourers
 9212 Forestry labourers
 9213 Fishery, hunting and trapping labourers
 9300 LABOURERS IN MINING, CONSTRUCTION, MANUFACTURING AND TRANSPORT
 9310 MINING AND CONSTRUCTION LABOURERS
 9311 Mining and quarrying labourers
 9312 Construction and maintenance labourers: roads, dams and similar constructions
 9313 Building construction labourers
 9320 MANUFACTURING LABOURERS
 9321 Assembling labourers
 9322 Hand packers and other manufacturing labourers
 9330 TRANSPORT LABOURERS AND FREIGHT HANDLERS
 9331 Hand or pedal vehicle drivers
 9332 Drivers of animal-drawn vehicles and machinery
 9333 Freight handlers
 9998 Don't know, inadequately described
 9999 No answer

Note:

/ AU: The above three questions were used to code the variable j7_anzsco_l3 (unit group level) and j7_anzsco_l4 (occupation level) according to the Australian Bureau of Statistic's Australian and New Zealand Standard Classification of Occupations (ANZSCO) First Edition, 2006. The recoding of occupations from ANZSCO to ISCO-88 took place in 3 stages.

1. ANSCO codes were recoded to ISCO-88 codes at the occupation level (6 digit ANSZCO codes) if there was a direct match.
2. If a respondent had not been coded up to the occupation level, or if there was no direct match at the occupation level, ANSZCO codes were recoded at the unit group level (4 digit ANZSCO codes).
3. If a recode was not possible in either steps 1 or 2 above, occupations were coded manually to ISCO-88 codes by referring to the original responses and descriptions of the occupations as provided by the respondent.

/ CZ: Modification of KZAM (Czech national ISCO-88 related classification) recoded into ISCO-88 (ILO).

/ DE: ISCO88 taken from ALLBUS 2012 and constructed from respondent's current occupation (main job): If respondent currently not employed or part time employed but employed in the past then last occupation (main job) taken according to ISCO88 (ILO) with some additional codes which are already recoded.

/ ES: Spanish questionnaire has a double coding of occupation: ISCO 88-ILO and the Spanish National Classification of Occupations (CNO-94), which is an official adaptation of ISCO 88.

/ FR: French classification of the occupations and the social categories (PCS 1994) were recoded. Because of incomplete information to describe the occupation, a code with 1 zero at the end corresponds to the 2 digits ISCO code and a code with 2 zeros at the end corresponds to the one digit ISCO code.

/ GB-GBN: ISCO88 (COM) is derived from [XSOC200] using the translation table; where the frequency of any 4 digit ISCO code in the ISSP dataset is less than 5, the code is reduced to 2 digits.

/ NL: ISCO-88 codes are converted from national occupation codes, provided by Statistics Netherlands 1984, which is very close to ISCO-68.

/ NO: STYRK (Standard Classifications of Occupations) based on, but not identical to ISCO88-COM. STYRK codes are recoded into ISCO88 ILO according to the syntax available in the BV documentation.

/ SE: A recoding scheme between the national occupation scheme SSYK and ISCO88-COM is available.

/ SK: Slovak national ISCO-88 recoded into ISCO-88 (ILO)

/ TR: Open ended question answers are then coded according to (ISCO) occupation descriptions into ISCO88

/ US: US Occupation Codes OCC80 from GSS are recoded to ISCO88.

MAINSTAT - Main status

BVQ_14. MAINSTAT

Which of the following best describes your current situation?

If you temporarily are not working because of temporary illness/ parental leave/ vacation/ strike etc., please refer to your normal work situation.

(Please tick one box only.)

AU CH DE FI IL JP LT PH SE SK TW: Which of the following best describes your current situation? If you are temporarily away from paid work because of parental or other leave, unpaid leave or some other similar reason, please answer according to your normal work situation.

BE: Which of the possibilities describes your current situation?

CL: Please choose one of the following alternatives, depending whether you are working or not working.

CN: Derived from 'Did you work for more than one hour for income last week?' and 'You did not work last week, what is the reason?'

CZ: Which of the following options best describes your job position?

DK: Are you currently employed?

ES: Which of the following situations applies to you at present?

FR: Currently, which one of those situations best fits you?

GB-GBN: Which of these descriptions applied to what you were doing last week, that is the seven days ending last Sunday?

TR: Which of the following is the most appropriate for you?

US: Last week were you working full time, part time, going to school, keeping house, or what?

ZA: What is your current employment status?

- 1 In paid work
- 2 Unemployed and looking for a job
- 3 In education
- 4 Apprentice or trainee
- 5 Permanently sick or disabled
- 6 Retired
- 7 Domestic work
- 8 In compulsory military service or community service
- 9 Other
- 99 No answer

in Belgium (BE):

- 1 Paid work (as employee, self-employed, GESKO, RVA-apprenticeship, interim, DAC, service cheques, helping family member), maternity

leave, sick leave, unpaid leave, fulltime career break (also parental break, palliative break, medical support of a sick relative)

2 Unemployed with and without benefit, looking for a job

7 Housekeeper

in Switzerland (CH):

1 Paid work (as an employee, self-employed, or working for your own family's business)

3 In education (not paid for by employer), in school/student/pupil even if on vacation

7 Doing housework, looking after the home, children or other persons

in Chile (CL):

1 Employed full time, employed half time, employed less than half time, employed helping a family member

2 Unemployed, looking for a job, looking for a job for the first time

7 Home duties, housewife

in China (CN):

1 Yes, I worked for xy hours last week

2 Never engaged in any work on the purpose of making money & No job after graduation or Units lose original work or Original work lost for personal reasons

3 I had a paid leave, studied, stopped working temporarily, seasonally closed the business etc./ I had a suspended salary leave, studied, stopped working temporarily, seasonally closed the business etc./ Never engaged in any work on the purpose of making money & Learning at school

5 Never engaged in any work on the purpose of making money & Lost the ability to work

6 Never engaged in any work on the purpose of making money & Retired

7 Never engaged in any work on the purpose of making money & Housekeeping

9 Never engaged in any work on the purpose of making money & Land is expropriated

in Czech Republic (CZ):

1 Employed (employee, self-employed, in family business)

3 Student

9 On maternal or parental leave

in Germany (DE):

1 Paid work (as an employee, self-employed, or working for own family's business)

3 In education (not paid for by employer), in school/ student/ pupil even if on vacation

7 Doing housework, looking after the home, children or other persons

in Denmark (DK):

1 Full time employed (30 hours or more per week), self-employed (30 hours or more per week), employed part time (10-29 hours per week), self-employed part time (10-29 hours per week), employed less than part time (less than 10 hours per week), employed but temporarily out of work because of illness, employed but temporarily out of work because of maternity leave, parents leave or education leave, helping family member

3 Pupil (without wage), student (without wage)

5 Early retirement

6 Old age retirement, job release scheme etc (pension benefits payable between early retirement and normal retirement pension)

in Spain (ES):

9 Including previously not working pensioners

in Finland (FI):

- 1 Employee, entrepreneur/ self-employed, working for own family's business
- 3 Pupil, student (also includes those on leave from an educational institution)
- 7 Housewife, house husband or carer

in Great Britain (GB-GBN):

- 1 In paid work (or away temporarily) for at least 10 hours in week, waiting to take up paid work already accepted
- 2 Unemployed and registered at a JobCentre or JobCentre Plus, unemployed, not registered, but actively looking for a job (of at least 10 hrs a week), unemployed, wanting a job (of at least 10 hrs per week) but not actively looking for a job
- 4 On government training/ employment programme
- 7 Looking after the home

in Croatia (HR):

- 1 Employed
- 3 In formal education system (not paid by employer)
- 7 Domestic work, caring for children or other persons

in Israel (IL):

- 1 In paid work (as an employee, self-employed, or working for your own family's business)
- 3 In education (not paid for by employer), in school/ student/ pupil even if on vacation
- 7 Doing housework, looking after the home, children or other persons

in Italy (IT):

- 1 Employed full-time, part-time or less than part-time/ Family helper
- 2 Unemployed/ Seeking 1st job

in Japan (JP):

- 1 In paid work (including working for your own family's business)

in Lithuania (LT):

- 1 In paid work (employed, self-employed or working in family's business)
- 3 In education (except those cases if the studies were paid by the employer) or I am in academic, summer or similar vacation
- 7 Domestic work, looking after children or other persons

in Netherlands (NL):

- 1 Paid work (employed, self-employed or working in family firm)
- 7 Taking care of household or others

in Norway (NO):

- 5 On social security, permanently sick or disabled
- 7 At home doing housework/ taking care of others

in Poland (PL):

- 1 Work full time (including farmers and others persons working in their own business), part time, by fits and starts, seasonally, commission, maternity/ parental leave
- 5 Retired/ disability
- 7 Not working/ keeping house

in Portugal (PT):

- 1 Paid work (as an employee, self-employed, or working for own family's business)
- 4 Internship/ professional training
- 5 Permanent disability (receiving a pension or not)
- 6 Retired and pre-retired (except in case of retirement by disability)
- 7 Takes care of the house work, of children or other people

in Sweden (SE):

- 1 Employee, self-employed, or working for your own family's business

in Slovenia (SI):

- 1 In paid work (as employee, self-employed or employed in family business)
- 7 Domestic work, taking care for children or other persons

in Slovakia (SK):

- 1 Work (as an employee, entrepreneur or in a family business)
- 7 Doing housework, looking after the home, children or other persons

in Turkey (TR):

- 1 Paid work (public employee, worker, has his own business or in family work)

in Taiwan (TW):

- 1 Full-time job, part-time job, odd job; temporarily unemployed, worked for the family business with paid salary or without paid salary, full time student/ trainee/ or pursuing further education with doing job, in alternative service
- 5 Aged, handicapped physically or mentally, sick and cannot work

in United States of America (US):

- 1 Working full time, part time
- 2 With a job, but not at work because of temporary illness, vacation, strike, unemployed, laid off, looking for work

in South Africa (ZA):

- 1 Employed full time, part time, less than part time (casual work/ piecework)
- 3 Student/ learner
- 7 Housewife, not working at all, not looking for work

Note:

/ ES (Code 5): Leave of absence for sickness or permanently disabled should say PERMANENT leave of absence or permanently disabled. As it is, it puts together those who are out of work because of a temporary absence for sickness and those permanently disabled. Therefore, there may be working people who are classified as nonworking.

/ ZA: Categories 'In education' and 'Apprentice or trainee' are combined in the questionnaire

PARTLIV - Living in steady partnership

BVQ_15. PARTLIV

Do you have a spouse or a steady partner and, if yes, do you share the same household?

(Please tick one box only.)

AU BE-WAL FR IL JP LT NO PH SE TR ZA: Do you have a spouse or a steady partner and, if yes, do you share the same household?

BE-FLA: What situation on card 12 describes your own situation?

CH: Now, let's talk about your family. Do you have a spouse/ partner? Do you currently live with your husband (wife)/ your partner?

CL: Do you have a spouse or steady partner?

CN: Derived from 'What's your marital status now?'

CZ: Do you have a steady partner?

DE: What is your marital status? Do you have a steady partner? For same-sex, formally legalised civil partnerships.

DK: Are you living with a steady life-partner?

ES: In which of these situations are you at present?

FI: Are you married, cohabiting or in a registered civil partnership and do you live together?

HR: Do you have a husband/ wife (are you married) or steady partner (unmarried)? If so, do you live in the same household?

IT: Do you live with your husband/wife, or with you partner?

KR: Is [PERSON] now married, widowed, divorced, separated, cohabiting, or never married?

NL: Do you actually live with a stable partner?

PL: What is your marital status? Do your husband/ wife lives in the same household with you? Are you staying currently in any relationship with a partner who is not your formal husband/ wife? Do you live with this person in same household?

PT: Which of the following situations that I will read to you better describes your case?

RU: What is your marital status? Do you live with somebody as a husband or a wife but without legal registration?

SI: Are you married, have a steady partner? Do you share common household?

SK: Do you have a steady partner, a husband/ spouse?

TW: What is your current marital status?

US: Derived from 'Which of these statements applies to you?' and 'Are you currently married, widowed, divorced, separated, or have you never been married?'

- 1 Yes, have partner; live in same household
- 2 Yes, have partner; don't live in same household
- 3 No partner
- 7 Refused
- 9 No answer

in Belgium/ Flanders (BE-FLA):

- 2 I have a partner, but we don't live together all the time (LAT), I have a partner, but we don't live together

in China (CN):

- 1 Married and having a spouse/ Remarried and having a spouse/ Cohabit
- 2 Separation but no divorce
- 3 Not married yet/ Divorced/ Widowed

in Denmark (DK):

0 Not available

in Finland (FI):

3 I'm not in a steady relationship

in Great Britain (GB-GBN):

0 Not available

in South Korea (KR):

1 Married or cohabiting

in Netherlands (NL):

1 Yes, I do live with a stable partner

2 No, I do not cohabit, but I do have a stable partner

3 No, I have no stable partner

in Taiwan (TW):

1 Married or cohabiting

in United States of America (US):

1 Married and living in the same household as my husband or wife, I am living as married and my partner and I together live in the same household

SPWORK - Spouse, partner: currently, formerly or never in paid work

BVQ_16. SPWORK

(If you have a spouse/ partner)

Is your spouse/partner currently working for pay, did he/she work for pay in the past, or has he/she never been in paid work?

(Please tick one box only.)

AU DE IL JP LT PH SE SI SK TR TW ZA: Is your spouse/ partner currently working for pay, did he/she work for pay in the past, or has he/she never been in paid work?

BE-FLA: Is your partner in paid work at this moment, was your partner in paid work in the past, or was your partner never in paid work? With paid work, we mean work for at least an hour a week as an employee or as a self-employed person. This includes GESKO, RVA-internship, PWA, interim, DAC, service cheques, helping in family company. When he/she is temporarily not working due to sickness, giving birth, parental leave, palliative leave, leave for medical assistance of a sick family member, please consider the normal work routine.

BE-WAL: What is the work situation of your partner?

CH: Is your spouse/ partner currently working for pay or did he/she work for pay in the past? Is he/she currently or did he/she work in the past for his/her own family's business?

CL: Which of the following best describe your spouse/partner current situation?

CN: What is the working experience or employment status of your spouse or partner?

CZ: Is your partner currently working for pay, did he/she work for pay in the past, or has he/she never been in paid work?

DE: Is your spouse/partner currently working for pay, did he/she work for pay in the past, or has he/she never been in paid work?

DK: Are your spouse/partner currently employed?

ES: Which of the following situations applies to your spouse/ partner at present?

FI: Is your spouse/partner in paid work?

FR: If you have a spouse or a steady partner today, what is his/her situation in relation to work?

GB-GBN: Which of these descriptions applied to what your (wife/husband/partner) was doing last week, that is the seven days ending last Sunday?

HR: Does your spouse/ steady partner is currently working for an income?

IT: What is the current employment status of your husband/wife/partner? What kind of job does your husband/wife or partner have?

KR: Does your spouse/ partner has a job that provides income? Has he/ she ever had a paid job?

NL: What is at present the main activity of your partner?

NO: Is your spouse/partner, or has she/he ever been, in paid work?

PL: What is your wife/ husband/ partner current job situation? Is he/ she currently?

PT: Which of the following situations applies to the case of your partner?

RU: Is your spouse (partner) currently working for pay? If no, what is his/ her status? Did your spouse/ partner work for pay in the past?

US: Last week was your spouse working full time, part time, going to school, keeping house, or what?

0 NAP (Code 3 or 7 in PARTLIV)

1 Currently in paid work

2 Currently not in paid work, paid work in the past

3 Never had paid work

7 Refused

8 Don't know

9 No answer

in Belgium (BE):

- 1 Currently in paid work (or temporarily not present)

in China (CN):

- 1 Engaged in non-agriculture work now
- 2 Engaged in agriculture now, but used to do non-agriculture work/ Unemployed now, but used to do non-agriculture work
- 3 Engaged in agriculture now, never do non-agriculture work/ Unemployed now, and only engaged in agriculture before/ Never get a job

in Denmark (DK):

- 1 Yes, full time employed (30 hours or more per week), self-employed (30 hours or more per week), employed part time (10-29 hours per week), self-employed part time (10-29 hours per week), employed less than part time (less than 10 hours per week), employed but temporarily out of work because of illness, employed but temporarily out of work because of maternity leave, parents leave or education leave, helping family member, apprentice or trainee

in Spain (ES):

- 1 Working for pay
- 2 Retired or pensioner (previously working)/ Unemployed (previously working)/ Student or Domestic work with currently no engagement but worked for pay anytime/ Apprentice, practice or scholarship holder with contract without payment for that activity, but worked for pay anytime/ Leave of absence for sickness or permanently disabled, Other situations but worked for pay anytime
- 3 Pensioner (previously not working)/ Unemployed looking for first job/ Student that never worked for pay/ Domestic work and never worked for pay in the past/ Apprentice, practice, scholarship holder that never worked for pay/ Leave of absence for sickness or permanently disabled and never worked for pay/ Other situations but never worked for pay anytime
- 9 Don't know/ No answer

in Great Britain (GB-GBN):

- 1 In paid work (or away temporarily) for at least 10 hours in week, waiting to take up paid work already accepted

in Norway (NO):

- 1 Yes, she/he is in paid work now, yes, but temporarily away, due to illness, on leave, or similar

in Poland (PL):

- 1 Work full time (including farmers and others persons working in their own business), working part time, by fits and starts, seasonally, commission, apprentice, maternity / parental leave

in Russia (RU):

- 1 Paid work (full time employment: 35 and more hours per week, paid work (part time employment: 15-35 hours per week), paid work (part time employment: less than 15 hours per week)

in United States of America (US):

- 1 Working full time, part time

Note:

/ ES (Code 5): Leave of absence for sickness or permanently disabled should say PERMANENT leave of absence or permanently disabled. As it is, it puts together those who are out of work because of a temporary absence for sickness and those permanently disabled. Therefore, there may be working people who are classified as nonworking.

/ NL: Derived from SPWRKST; note that the word partner in the context of the questionnaire may refer to someone with whom one is not married or cohabiting!

SPISCO88 - Spouse, partner: occupation ISCO/ ILO 1988

BVQ_20. SPISCO88

Spouse/ partner Occupation: International Occupation Code 1988

a. What is/ was your spouse's/ partner's occupation - i.e., what is/ was the name or title of his/ her main job?

(Please write in and describe as clearly as possible.)

His/ her occupation is/ was:

b. In his/ her main job, what kind of activities does/ did he/ she do most of the time?

(Please write in and describe as clearly as possible.)

c. What does/ did the firm/ organisation he/ she work/ worked for mainly make or do - i.e., what kind of production/ function is/ was performed at his/ her workplace?

(Please write in and describe as clearly as possible.)

AU PH: What is/ was your spouse's/ partner's occupation, i.e., what is/ was the name or title of his/ her main job?

BE: Can you give me the name of the present (former) profession of your partner? Can you give me a detailed description what the profession of your partner implies?

CH: (If respondent has a partner - married or not - and lives with him) What is/ was his/ her current/ last occupation? In his/ her main job, what kind of activities does/ did he/ she do most of the time?

CL: (If respondent has spouse or partner) What is/ was your spouse or partner main activity? What are/ were your spouse/ partner main duties?

CN: What is the specific job of your spouse or partner now?

CZ: And what is (was) your partner's current (last) occupation, what kind of activity does (did) he/she do in it? Please state his/her job title and describe briefly the job activity he/she does (did) in this occupation.

DE: (If respondent has spouse or steady partner) Which of the categories on the card applies to your husband/ wife/ partner? What work does your spouse/ partner do in his/ her main job? Please describe this work precisely. Does this job, this work have a special name?

DK: What are/ were your spouse/ partner's accurate occupation?

ES: And which was his/ her last occupation or trade? That is, in what does/ did his/ her work consist of, specifically? We are referring to his/ her main occupation: the one for which he/ she obtains/obtained his/ her highest earnings.

FI: If you are currently married or cohabiting or in a registered partnership, what is your spouse's current or latest occupation?

FR: What is his/ her occupation or last occupation?

GB-GBN: Now I want to ask you about (husband's/ wife's/ partner's) (present/ future) job. What (is his, her job/ will that job be)? What (is/ was) the name or title of the job? What kind of work (do/ will) (he/ she) do most of the time? What training or qualifications (are/ were) needed for that job?

HR: Please state the exact title of your spouse/ partner's job title and occupation. Describe what he/ she does; what his/ her main tasks are. What are the educational and professional requirements for the job?

IL: What is/ was your spouse's/ partner's occupation, i.e., what is/ was the name or title of his/ her main job?

IT: Can you describe in full details what is your wife/husband/partner current/last job?

JP: Please give details about the main type of work your spouse is engaged in.

KR: Does your spouse have a job that provides income? Has your spouse ever worked for pay? What kind of work does your spouse normally do? (If currently working or ever worked for pay) What does (he/ she) actually do in that job? If currently not working, tell me about (his/ her) last job.

LT: What is/ was your spouse's/ partner's occupation? (Occupation, sector, position according to main source of living and if respondent has no current job - retired, unemployed etc. - most recent occupation.)

NL: What exactly is or was your partner's occupation? Please specify his/her main activities / responsibilities.

NO: What is/ was your spouse/ partner's work title (main job)? Please make a short description of her/his work tasks. Please describe her/his work tasks as accurately as possible. What does/did the organisation he/she work/worked for mainly make or do?

PL: What is/was the professional activity of your partner?

RU: What is your spouse/ partner's current occupation? (Occupation at most recent work place if spouse/ partner no current job) What kind of activities does/did he/she do most of the time?

SE: What is your husband's/ wife's/ live-in partner's occupation? If he/ she is retired or not working at the moment, please indicate what his/ her occupation was in his/ her last job. Please describe it as clearly as possible. What kind of production/ activity is performed at his/ her current or last workplace?

SI: What kind of work or occupation does your partner do? If not working at the moment: what was his/ her last (main) occupation? Tell detailed name of his/her position at work and exact profession. Describe what does he/she do, what are his/her main duties; What is the main activity of his/her work organisation?

SK: (If married or respondent has got steady partner) Please, write the name of the main occupation of your spouse/ partner. Include detailed description of his/ her working activity: what is his/ her principal activity, responsibility etc. Use two or more words and exclude abbreviations. If your spouse/ partner is not in labour force at the moment (is retired or unemployed etc), think of his/ her most recent job.

TR: What is your spouse or partner's occupation? So, what is his/her title?

TW: What is your spouse's or partner's main occupation at present? (or prior to retirement)

US: (If married and spouse presently in paid work or ever worked as long as one year) What kind of work does/ did your spouse normally do? That is, what is the job called? What does/ did your spouse actually do in that job? Tell me what are some of his/ her main duties? What kind of place does/ did your spouse work for? What do they (make/ do)?

ZA: What is your spouse/ partner's current occupation?

9332 Drivers of animal-drawn vehicles and machinery
9333 Freight handlers
9998 Don't know, inadequately described
9999 No answer, refused

in China (CN):

0 NAP (Code 0, 2, 3 in SPWORK)

Note:

/ CZ: Modification of KZAM (Czech national ISCO-88 related classification) recoded into ISCO-88 (ILO).

/ DE: ISCO88 taken from ALLBUS 2012 and constructed from spouse/ partner current occupation (main job): If respondent currently not employed or part time employed but employed in the past then last occupation (main job) taken according to ISCO88 (ILO) with some additional codes which are already recoded.

/ ES: Spanish questionnaire has a double coding of occupation: ISCO 88-ILO and the Spanish National Classification of Occupations (CNO-94), which is an official adaptation of ISCO 88.

/ FR: French classification of the occupations and the social categories (PCS 1994) were recoded. Because of incomplete information to describe the occupation, a code with 1 zero at the end corresponds to the 2 digits ISCO code and a code with 2 zeros at the end corresponds to the one digit ISCO code.

/ GB-GBN: ISCO88 (COM) is derived from [XSOC200] using the translation table; where the frequency of any 4 digit ISCO code in the ISSP dataset is less than 5, the code is reduced to 2 digits.

/ NL: ISCO-88 codes are converted from national occupation codes, provided by Statistics Netherlands 1984, which is very close to ISCO-68.

/ NO: STYRK (Standard Classifications of Occupations) based on, but not identical to ISCO88-COM. STYRK codes are recoded into ISCO88 ILO according to the syntax available in the BV documentation.

/ SE: A recoding scheme between the national occupation scheme SSK and ISCO88-COM is available.

/ SK: Slovak national ISCO-88 recoded into ISCO-88 (ILO)

/ TR: Open ended question answers are then coded according to (ISCO) occupation descriptions into ISCO88

/ US: US Occupation Codes OCC80 from GSS are recoded to ISCO88.

SPMAINST - Spouse, partner: main status

BVQ_21. SPMAINST

Which of the following best describes your spouse's/partner's current situation? If he/ she temporarily is not working because of temporary illness/ parental leave/ vacation/ strike etc., please refer to his/ her normal work situation.

(Please tick one box only.)

AU DE FI IL JP LT PH SE SK TW ZA: Which of the following best describes the current situation of your spouse/ partner?

BE: Which of the possibilities on card 17 describes the current situation of your partner?

CL: Please choose one of the following alternatives, depending on whether your spouse/partner is working or not working.

ATTEND - Attendance of religious services

BVQ_24. ATTEND

Apart from such special occasions as weddings, funerals, etc., how often do you attend religious services?

(Please tick one box only.)

AU CH CZ HR IL LT SE SI: Apart from such special occasions as weddings, funerals, etc., how often do you attend religious services?

BE: People tend to participate in religious services due to a marriage, funeral etc. If we do not include these services, how many times do you attend religious services?

CL DK KR RU PH US: How often do you attend a religious service/ religious services?

CN: How often do you participate in religious activities?

DE: As a rule, how often do you go to church resp. to the mosque, synagogue or to another house of prayer?

ES: How often do you go to mass or other religious services, excluding the occasions related to social ceremonies, such as weddings, first communions or , funerals?

FI: How often do you attend worship services or other religious services or church ceremonies?

FR: Except the marriages, the funerals and the baptisms, how often do you attend a religious cult?

GB-GBN: Apart from such special occasions as weddings, funerals and baptisms, how often nowadays do you attend services or meetings connected with your religion?

IT: How often do you attend the mass or other religious services? Do not count special occasions as weddings, funerals and the like.

JP: How often do you attend a place of worship or prayer? Exclude ceremonial occasions, such as wedding or funerals.

NL: How often have you on average over the last years attended a ceremony or service of a religious community?

NO: How often do you attend religious services or other religious meetings? (Do not include weddings, funerals, or baptisms or similar).

PL: How often do you attend mass and religious services?

PT: Not counting special occasions such as marriages, funerals and baptisms, how often do you take part in religious services?

SK: How often do you participate in religious services (such as masses and church services)?

TR: Taking the last year into account, how often were you able to perform salaah and worship?

TW: How often do you participate in any religious group at present? (e.g. pilgrim group, practicing Zen, Sunday service, spirit-cultivation meeting, sermon-delivering meeting, volunteer work, etc.)? Please answer this question regardless of whether you have a religious belief or not.

ZA: Apart from special occasions such as weddings, funerals and baptisms, how often do you attend services or meetings connected with your religion?

- 1 Several times a week or more often (incl. every day, several times a day)
- 2 Once a week
- 3 2 or 3 times a month
- 4 Once a month
- 5 Several times a year
- 6 Once a year
- 7 Less frequently than once a year
- 8 Never
- 97 Refused
- 98 Don't know
- 99 No answer

in Belgium/ Flanders (BE-FLA):

5 Only on holidays like Christmas and Eastern

6 Not used

7 Very rarely

in China (CN):

2 Almost every week/ Every week

6 Once or twice a year

7 No more than once a year

in Germany (DE):

3 Between one and three times a month

in Israel (IL):

1 Several times a week or more, once a day or more

in Italy (IT):

98 Don't know, varies too much

in Portugal (PT):

0 Not applicable, no religion

in Turkey (TR):

0 Not applicable, no religion

Note:

/ DE: Attendance of religious services taken from ALLBUS 2012; church attendance answer categories deviate from ISSP ATTEND categories: German category 3 collapses ISSP categories 3 and 4; German category 5 implicitly includes ISSP category 6.

TOPBOT - Top-Bottom self-placement

BVQ_25. TOPBOT Top - Bottom self-placement (10 pt scale)

In our society, there are groups which tend to be towards the top and groups which tend to be towards the bottom. Below is a scale that runs from the top to the bottom.

(Please tick one box only.)

Where would you put yourself on this scale?

AU DE CH IL KR LT NO RU SE SI TW ZA: In our society there are groups which tend to be towards the top and groups which tend to be towards the bottom. Below is a scale that runs from top to bottom. Where would you put yourself now on this scale?

BE: The scale (on card 24) represents the place that someone can have in society. The number 1 represents a place on the bottom of society. The number 10 a place on the top of society. Where would you place yourself on this scale? You can give a number from 1 to 10.

CL: In our society there are groups that place themselves on the highest levels, and groups that place themselves on the lowest levels. Here is a scale that goes from the lowest to the highest level. Where on this scale would you place yourself?

CN: What level do you think you belong to now? Record Score - Note: 10 stands for the highest class and 1 stands for the lowest class.

CZ: In our society, there are groups which tend to be associated with high social status and, in contrast, groups which tend to be associated with low social status. Where would you put yourself on this scale?

DK: In our society one sometimes talk about, that there are some groups which are perceived as higher ranked in society and other groups which are perceived as lower ranked. Below there is a scale which runs from top to bottom. If you should place yourself on this scale where 1 is bottom of society and 10 is top of society, where would it be?

ES: In our society, there are groups that tend to occupy a high or very high position, while others occupy middle or low positions. In a scale where number 1 represents the lowest position and 10 the highest, where would you place yourself?

FI: There are different classes in our society. Some social classes are higher and some lower. On a scale from 1 to 10 where 10 is the highest class and 1 the lowest, where would you place yourself? Please circle only one number.

FR: In our society, there are groups which are rather at the top of the society and the others which are rather below. Here is a scale which goes of the highest at the lowest. Where do you think you stand on this scale?

HR: In our society there are groups of people that hold higher or lower social position. Where would you locate yourself on the scale, that ranges from 10 (top) to 1 (bottom)?

IT: Not asked.

JP: If current Japanese society were divided into 10 strata (1 being the lowest, and 10 being the highest), to which stratum do you think you belong?

NL: Her is a picture of the social ladder. At which step do you think you are at the moment?

PH: At present, where will you put yourself on this card regarding your current situation in life?

PL: In our society there are social groups that occupy higher positions and others that occupy lower positions. Below is a scale that runs from top to bottom.

Where would you put yourself on this scale?

PT: In general, some people are at the top of our society and other people are at the bottom. The scale of this card represents the top and the bottom. At which scale point do you think you currently are?

SK: In our society there are people who have a higher position but there are also people which are closer to lower positions. The enclosed scale is arranged from top (code 10) to bottom (code 1). Where would you put yourself on this scale?

TR: Some people have a high some others have a low social status in society. Where would you place yourself on a ladder of social status where 1 represents the lowest and 10 the highest social status?

- 2 02
- 3 03
- 4 04
- 5 05
- 6 06
- 7 07
- 8 08

VOTE_LE - Did respondent vote in last general election?

BVQ_27. VOTE_LE

Some people don't vote nowadays for one reason or another. Did you vote in the last [country] national election in [month/year]?

(Please tick one box only.)

AU: Did you vote in Australia's federal election in August 2010?

BE: Did you vote for the federal (national) elections on June, 13th 2010?

CH: For which party did you vote at the last federal elections in October 2007?

CL: Are you registered to vote? (If yes) Did you vote on the last presidential and parliamentary elections of 2009?

CN: Did you vote in the last neighborhood committee/ village committee election?

CZ: Let's look back at the last elections to the Chamber of Deputies, which took place on May 28 and 29, 2010. Did you vote in those elections?

PARTY_LR - Party voted for in last general election: left-right (derived from nat_PRTY)

Party voted for in last general election: left/ right scale

Based on 'party voted for in last general election' and derived by expert judgement from the country-specific parties (nat_PRTY) into the left-right scheme.

<Question text see nat_PRTY>

- 0 NAP (Code 0, 2, 7 in VOTE_LE), NAV
- 1 Far left (communist etc.)
- 2 Left, center left
- 3 Center, liberal
- 4 Right, conservative
- 5 Far right (fascist etc.)
- 6 Other
- 7 None
- 96 Invalid ballot
- 97 Refused
- 98 Insufficient information to code into scheme
- 99 No answer

in Chile (CL):

- 0 Not available

in China (CN):

- 0 Not available

in Great Britain (GB-GBN):

- 7 No party affiliation

in Israel (IL):

- 0 Not available

in South Korea (KR):

- 0 Not available

in Taiwan (TW):

- 0 Not available

Note:

/ ES: Parties with codes 5 to 13 are regionalist/ nationalist parties and, thus, their main axis of identification/ electoral competition is not the left-right one, but centre-periphery.

/ GB: Left-right scale does not refer to party voted at last election, but on party affiliation.

/ IL: The left/ right placement is not available since the traditional left-right issues are not central to most political parties.

/ IT: Left-right scale does not refer to party voted at last election, but on party affiliation.

/ TW: A kind of classification into the left-right scheme does not fit for Taiwan's political situation

/ US: Based on party identification or affiliation and not on party voted at last election.

AU_ETHN - Country specific: origin country/ ethnic group/ ethnic identity/ family origin: Australia

BVQ_28. nat_ETHN

<TN: The aim of this variable is to measure country-specific concepts concerning the respondent's ethnic background or sense of belonging to an ethnic group/community. This can be determined by the respondent's citizenship, family's country of origin, ethnic group, ethnic identity or race, both self-assessed or by interviewer observation. Please focus on the most relevant concept for your country. If several concepts are equally relevant, a multi-dimensional typology based on the relevant concepts should be constructed and coded into one single variable. For more information please see the BV document.>

AU_ETHN - Australia: Country specific origin country/ ethnic group/ ethnic identity/ family origin

What country were you born in?

What country was your mother born in?

What country was your father born in?

- 0 NAP, other countries

FI_ETHN - Country specific: origin country/ ethnic group/ ethnic identity/ family origin: Finland

FI_ETHN - Finland: Country specific origin country/ ethnic group/ ethnic identity/ family origin

Not asked in the questionnaire. Added from the registers of the fieldwork institute (Statistics Finland).

- 0 NAP, other countries
- 1 Finnish speaking finns
- 2 Swedish speaking finns
- 3 Other
- 99 No answer

Note:

/ FI: Mother tongue is considered to be the most distinguishing feature of different population groups in Finland. Finland has two official languages: Finnish (the dominant language) and Swedish. The variable measures mother tongue and has three categories: Finnish, Swedish and other languages. The proportion of non-Finnish-speakers is very small.

What is your nationality/ ethnicity?

0 NAP, other countries

1 Lithuanian

2 Polish

3 Russian

4 Other

97 Refused

Note:

/ LT: In Lithuanian there is a single term "tautybė" for both English terms "nationality" and "ethnicity". The term "tautybė" in its many grammatical forms is used in questionnaires by numerous research and statistical programs.

Thus the use of Lithuanian term "tautybė" as a translation of English terms "ethnicity" or "nationality" has its methodological grounding and tradition.

The concept of "citizenship" is not used, as in Lithuania there is a rule that restricts having citizenship of only one country and in 2011 residents with Lithuanian citizenship constituted 99,2% of the population (Statistics Lithuania, www.stat.gov.lt).

Similarly the concept of race is not applicable within Lithuanian contextual settings as there is lack of racial diversity. Race is not even measured by Statistics Lithuania.

The concepts of "family origin" or "respondent's country of origin" are also not widely used in Lithuania, as Lithuania did not witness great waves of immigration in the past decades and thus even residents with non-Lithuanian ethnicity would indicate they or their parents were born in Lithuania.

Race of respondent

0 NAP, other countries

1 Black African

2 Coloured

3 Indian

4 White

99 No answer

Note:

/ ZA: Given the apartheid history in South Africa, the race categorization of white, black (African), Indian and coloured is very commonly understood in South Africa. This is the most common variable used to categorise various the races. Among the African people there are various tribes, and the most common way -although this is seldom used- to ethnize the African group would be to use the African language that they speak, i.e. Sesotho, Setswana, Sepedi, Siswati, IsiNdebele, Isixhosa, Isizulu, Xitsonga, Tshivenda.

In terms of the White groups (Europeans) it is fairly uncommon to ask origin country and the only further distinction is again based on language, that is the Afrikaans speakers and the English speakers. Coloured people and the Indian population are generally treated as a homogenous group with no further distinction.

HHCHILDR - How many children in household: children between [school age] and 17 years of age

BVQ_30. HHCHILDR

Including yourself, how many people - including children - usually live in your household?

(Please write in.)

How many children in household: children between school age and 17 years old

AU: Including yourself, how many people-including children-usually live in your household: children between 5 and 17 years old

BE: How many people currently live with you, for each person, give his sex and age? 6-17 years

CH: Would you please indicate the firstname, the year of birth and the sex of each person, children included, living in the household, beginning with the oldest one?

CL: How many children between 6 years old and 17 years old live in your household?

CN: Derived from 'How many children do you have? (including stepchildren)'

CZ: Of those, how many dependent children aged 7-17 live in your household?

DE: Please tell me what month and what year (person 1) was born in?

DK: How many persons in your household are under 18 years, i.e. between 0 and 17 years?

ES: Could you tell me: the sex, age and kinship relation that you have with each of those people, beginning by the eldest person?

FI: Including yourself, how many people usually live in your household aged 7 - 17 years?

FR: Independently of you, for every person of your household, could you say to me what are their age and their sex, by beginning with the youngest? HHCHILDR is computed from variables of the household list.

GB-GBN: What was (name)'s age last birthday? Asked for all members of household after respondent

HR: How many children from 7 to 17 years old do live in your household

IL JP: Children between 6 to 17 years of age

IT: Now we wish to ask you some questions concerning the persons living with you, such as their gender, age, job, etc. Please start from the oldest person in the household as person no. 1, and end with the youngest one (still excluding yourself and your wife/husband/partner).

KR: Now I would like to ask about your family members. Please include all family members who are living in your house and who are temporarily living somewhere else. Answer the following question beginning with yourself: How old is person?

LT: Including yourself, how many people - including children - usually live in your household: children between 7 and 17 years of age.

NL: Please, we want know about all these other persons in your household, other than you and your partner, what is their sex and age, in which relationship they are to you and what their education and main activity are? Start with the oldest person and continue to the youngest person (5-17 years).

NO: Number of children 6-17 years old

PH: Number of children 7-17 years old

PL: How many people living with you in your household are aged: 6 to 17 years?

PT: How many underage children (less than 18 years old) from your family, live in your house?

RU: How many children in age 18 years old and younger live in your household including temporarily away children?

SE: How many persons are between 7 and 17?

SI: Children and teens from 11 to 17 years; children from 6 to 10 years

SK: How many children between 6 and 17 years live in your household?

TR: Children between school age and 17 years old?

TW: Children between 7 -17 years of age

US: Teens from 13 to 17 years, children from 6 to 12 years

ZA: Derived from household roster: children 6-17 years

0 No children

- 1 1 child

HHTODD - How many toddlers in household: children up to [school age -1] years

BVQ_31. HHTODD

How many children in household: Children up to the age of school age.

AU: Including yourself, how many people-including children-usually live in your household: children up to and including the age of 4

BE: How many people currently live with you, for each person, give his sex and age? less than 6 years

CH: Would you please indicate the firstname, the year of birth and the sex of each person, children included, living in the household, beginning with the oldest one?

CL: How many children less than 6 years old live in your household?

CN: Derived from 'How many minor children do you have? (including stepchildren)'

CZ: Of that total number, how many dependent children aged 0-6 live in your household?

DE: Please tell me what month and what year (person 1) was born in.

ES: Could you tell me: the sex, age and kinship relation that you have with each of those people, beginning by the eldest person?

FI: Including yourself, how many people usually live in your household aged 6 years or under?

FR: HHTODD is computed from variables of the household list.

GB-GBN: What was (name)'s age last birthday? Asked for all members of household after respondent

HR: How many children from 0 to 6 years old do live in your household?

IL: Children up to the age of 0 to 6 years

IT: Now we wish to ask you some questions concerning the persons living with you, such as their gender, age, job, etc. Please start from the oldest person in the household as person no. 1, and end with the youngest one (still excluding yourself and your wife/husband/partner).

JP: Up to the age of 5 years

KR: How old is person?

LT: Including yourself, how many people - including children - usually live in your household: children up to the age of 6 (inclusive)?

NL: Household box: 0-4 years

NO US: Number of children less than 6 years old

PH: Number of children up to 6 years old

PL: How many people living with you in your household are aged: 0 to 5 years?

PT: How children with less than 7 years old, from your family, including you, live in your house?

RU: How many toddlers in household?

SE: How many persons are below 7 years?

SI: Children 6 years and younger

SK: How many children younger than 6 years live in your household?

TR: Children under age 7 (schooling age)

TW: Children up to the age of 6 years

ZA: Derived from household roster: children up to 5 years (including)

0 No toddlers

1 1 toddler

11 11 toddlers

96 NAP (Code 0 in HOMPOP)

99 No answer, refused

Note:

/ SE: This is the first time we apply pre-coded alternatives in the quex. The good thing is that these questions seem easier for the respondent to fill in. The bad thing is the category "5 or more persons". However only very few people select this alternative, especially with respect to

family members below 18 years of age.

HOMPOP - How many persons in household

BVQ_29. HOMPOP

Including yourself, how many people - including children - usually live in your household?

Adults of 18 years and older

Children between [school age] - 17 years of age

Children up to the age of [school age - 1] years

This makes a total of how many people?

AU JP: Including yourself, how many people-including children-usually live in your household?

BE: Including yourself, your partner, your children and others, how many people live here as members of this household?

CH: How many persons constantly are living in your household, including yourself?

CN: How many people live together in your home? Record people.

CL: How many people live in your household?

CZ: Including yourself, how many people live in your household? By household we mean people living in the same apartment or family house and who share resources.

DE: Apart from yourself, are there other people living in your household? Please count toddlers or people who normally live here but are currently absent, e.g. in hospital or on holiday.

DK FR TW: How many persons live in your household, including yourself?

ES: How many people do live in your household, including yourself, and any servants you may have, if they sleep at home?

FI: Including yourself, how many people usually live in your household altogether?

GB-GBN: Including yourself, how many people live here regularly as members of this household?

HR: Including you how many persons (including children) live in your household?

IL: Adults of 18 years and older living in your household

IT: How many people live in your household, excluding you and your spouse/partner, and also excluding domestic helpers, roomers, and relatives who have been away for six months or more? Do you live with your husband/wife, or with you partner?

KR: How many family members, including yourself, presently reside in your home? Do not include those who are temporarily living elsewhere due to schooling, employment, military service, etc.

LT: Including yourself, how many persons - including children - usually live in your household: persons in household in total?

NL: How many people are in your household, other than you and your partner? (all who use the same kitchen, so also living-in children and other occupants). Variable was primarily constructed from household box.

NO: Including yourself, how many people live normally in your household, and how are the household members distributed on age groups? Number of people 18 years or more.

PH: Total number of persons in household including servants, transients, or boarders.

PL: Please think about all persons living together with you in your household. How many people, including yourself, live in your household?

PT: How many people live in your house (including you and people who are not part of your family, for example guests, employees, etc.)

RU: How many people usually live in your household including yourself, children and temporarily away members?

SE: How many people - children and adults - usually live in your household (include yourself)? How many persons are 18 or older?

SI SK: Including yourself, how many people live with you in your household, all people in household?

TR: May I learn how many people, in the age groups that I will read, live in the household that you live?

US: Please tell me the names of the people who usually live in this household.

ZA: Derived from household roster

- 0 Not a private household
- 1 1 Person (only respondent)
- 25 25 Persons
- 99 No answer, refused

in Slovenia (SI):

- 9 9 or more persons

Note:

/ IT: This variable has been added 1 to account for respondent. In case respondent lives with spouse/partner, this variable has been added 2.

AU_RINC - Country specific personal income: Australia

BVQ_32. nat_RINC

Before taxes and other deductions, what on average is your own total monthly income?

AU_RINC - Australia: Country specific personal income

Before taxes and other deductions, what on average is your own total monthly income?

0 No income

1 1 AUD per month

300000 300.000 AUD per month

999990 NAP, all other countries

999999 999999 No answer

Note:

/ AU: Monthly income before taxes in Australian Dollar (AUD); exact unclassified amount of income is coded.

*This variable was misinterpreted by many people. For example some people put their yearly income. Where it was obvious that a yearly income had been stated, this was corrected. This variable should be used with caution.

BE_RINC - Country specific personal income: Belgium

BE_RINC - Belgium: Country specific personal income

BE-FLA: It is important that we can get an accurate picture of your income. We make a difference between your personal income and the income of your household. Do you have a personal income through a job, a pension, unemployment benefit, sickness benefit, job as a student, income from capital, from real estates or other incomes?

(If personal income)

By personal net monthly income we mean the total sum of your personal earnings, after tax deduction, everything included such as salary, meal tickets, retirement pay or other incomes from capital or real estates. Is your personal net monthly income higher than 2.000 Euro or 80.000 Belgian Francs?

(If personal income lower than 2.000 Euro)

When you take a look at the categories on card 19, in which category do you place your net monthly income?

(If personal income 2.000 Euro or higher)

When you take a look at the income categories on card 20, in which category do you place your net monthly income?

BE-WAL: How much, by mean, is your net monthly income?

BE_INC - Country specific household income: Belgium

BE_INC - Belgium: Country specific household income

BE-FLA: Now I want to ask you something about the income of your household. By household we understand the household of married persons or persons living together, a person living alone or someone who still lives with his/ her parents.

By net monthly income of the household we mean the total sum of the earnings, after tax deduction, everything included such as salaries, meal tickets, child benefits, retirement pay or other incomes from capital or real estates. Is the net monthly income of your household larger than 2.000 Euro or 80.000 Belgian Francs?

(If income lower than 2.000 Euro)

When you take a look at the categories on card 21, in which category do you place your net monthly income of the household?

(If income 2.000 Euro or larger)

When you take a look at the income categories on card 22, in which category do you place your net monthly income of your household?

BE-WAL: What is your net monthly income of the household?

DE_INC - Country specific household income: Germany

DE_INC - Germany: Country specific household income

How high is the total net monthly income of your household? By this I mean the amount remaining after deductions for tax and social security contributions. For self-employed, please ask for average net monthly income, after deductions for overheads.

(If answer refused, anonymity mentioned, card with income categories displayed and respondent asked for alphabet letter.)

0 No income

100 100 EUR per month

28000 28.000 EUR per month

999990 NAP, all other countries

999997 Refused

999998 Don't know

999999 No answer

Note:

/ DE: If respondent refused to answer open ended question then income categories prompted; alphabet letter and answer categories randomly assigned: if categorical question answered then mean coded. Continuous and categorical variable coded into one. If single household then respondents income coded.

MARITAL - Legal partnership status

BVQ_34. MARITAL

What is your current legal marital status?

(Please tick one box only.)

<The aim of this variable is to measure the current 'legal' marital status 'Living as married' or 'de facto married' is no legal partnership status and therefore not of relevance to this variable

Note that MARITAL must not be filtered by responses to PARTLIV.>

AU DK HR IL JP LT NO PH SE SI: What is your current legal marital status?

BE: What category on card 13 describes best your current legal partnership status?

CH: Here is a card with possible family situations. Can you please tell me which letter corresponds best to your actual situation?

CL SK TW ZA: What is your current marital status?

CN: What's your marital status now?

CZ IT PL PT RU: What is your marital status?

DE: What is your legal marital status?

ES: Which is your marital status?

FI FR: Are you currently?

GB-GBN: Derived variable, shows the legal marital status.

KR: Is [PERSON] now married, widowed, divorced, separated, cohabiting, or never married?

NL: What is your official marital status?

TR: May I learn your marital status? Despite being legally not married, like having only a religious wedding, do you live together with a partner?

US: Are you currently - married, widowed, divorced, separated, or have you never been married?

- 1 Married
- 2 Civil partnership
- 3 Separated from spouse/ civil partner (still legally married/ still legally in a civil partnership)
- 4 Divorced from spouse/ legally separated from civil partner
- 5 Widowed/ civil partner died
- 6 Never married/ never in a civil partnership, single
- 7 Refused
- 8 Don't know
- 9 No answer

in China (CN):

- 1 Married and having a spouse/ Remarried and having a spouse
- 6 Not married yet/ Cohabit

in Finland (FI):

- 6 I have never had a spouse/ registered partner, cohabiting, none of these

in South Korea (KR):

- 6 Including cohabiting

in Netherlands (NL):

2 Registered partnership

in Russia (RU):

6 Including living together (but unmarried)

in Turkey (TR):

6 Including living together

Note:

/ Code 2, 'Civil Partnership', also referred to by a variety of other names, is a legally recognized arrangement similar to marriage. This arrangement varies from one country to another and can apply for heterosexual partners as well as for same-sex partners.

/ AU CN DK IT JP KR LT PH PL TR ZA: Civil partnership not asked.

/ CL: Up to 2004 there was no law regulating divorce in Chile. The legal way to end up a marriage was thru a process of annulment (code 3 in the question). There is no civil partnership in Chile.

/ FR: Code 2 - French contract of civil partnership

/ HR: It includes civil partnership which is legally defined as living in common household in minimum period of 3 years and/or joint parenthood.

URBRURAL - Place of living: urban - rural

BVQ_35. URBRURAL

Would you describe the place where you live as...

(Please tick one box only.)

<Based on self-assessment by Respondent.>

AU GB-GBN IL PH: (Can I just check,) Would you describe the place where you live as ...

BE: Which description suits your living environment the best?

CH: Which expression of this card describes best the place where you live?

CL FI NO: Do you live in?

CN: Type of respondents living in the region: xy

CZ LT PL PT SI SK: How would you describe the place/ location you live in?

DE: Which of the categories of this list applies best to the place where you are living?

DK: Is the place you live a?

ES IT: Would you describe the place where you live as ...?

FR: You would say that you live in

HR RU: Where do you live in?

JP: What kind of community do you currently live in?

KR: Which of the categories below comes closest to the type of place you are living in now?

NL: How would you describe your place of residence?

SE: The place where you live, is it?

TR: Settlement type where the interview was undertaken.

TW: Do you think of the place you live as an urban or rural area?

US: Derived from GSS New Belt Code.

ZA: Derived from geotype variable.

- 1 A big city
- 2 The suburbs or outskirts of a big city
- 3 A town or a small city
- 4 A country village
- 5 A farm or home in the country
- 7 Refused
- 8 Don't know
- 9 No answer

in Australia (AU):

- 3 A larger country town (over 10,000 people), a large town (over 25,000 people)
- 4 A small country town (under 10,000 people)

in China (CN):

- 1 The city center of city/ county
- 2 The edge or fringe of city/ county
- 3 The town outside city/ county area

- 4 Rural
- 5 Not used

in Italy (IT):

- 2 A suburban town, or a town nearby a big city

in South Africa (ZA):

- 1 Urban, formal
- 2 Urban, informal
- 4 Tribal
- 5 Rural, formal

Note:

/ CN: recorded by supervisor

/ TR: filled in by interviewer

/ US: constructed by using Survey Research Center New Belt Code

/ ZA: derived from geotype variable:

- 1=Urban, formal
- 2=Urban, informal
- 3=Tribal
- 4=Rural, formal

CASEID - ID Number of Respondent

CASEID - Respondent Identification Number

This variable contains the original identification numbers of the respondents. This variable attaches a unique identification number to each respondent with year of the module, country/ subsample (V3) and ID number (CASEID).

Note:

For Slovakia, identification numbers of respondents were generated by the Archive.

WEIGHT - Weighting factor

Weighting factor

No total weight usable for international comparism.

NATIONAL weighting procedures/ variables used for calculation of NATIONAL weights:

AU: The three-way tabulation of age group, sex and highest schooling was compared to the equivalent three-way tabulation of those characteristics from the 2011 Census data of Australian Citizens. More information is available in the study description document.

BE: In Flanders the ISSP-questionnaire 2011 was an addition (drop-off questionnaire) to a general face-to-face survey. In Wallonia the ISSP questionnaire 2011 including the standard background variables was a postal survey in 2012. In order to deliver one integrated harmonized data file for Belgium post stratification weights were calculated based upon age, sex, nationality, and geographical classification (NUTS2). All these characteristics are known for all sampled units. The weights were scaled to make the weighted sample size equal to the unequal sample size.

BG: Weighting variable has been computed and accounts for sex, settlement and age-groups. There are twenty coefficients - 4 groups (male and female for towns and villages) multiplied by five age groups (18-24 years, 25-34 years, 35-44 years, 45-54 years, 55-64 years, 65-84 years, 85 years and over).

CH IL JP KR SE SI TR: No weighting.

CL: Weight to adjust for non-response bias on gender, age and urbanity.

CN: Design weight used to adjust for unequal selection probabilities and final weights rescaled to net sample size.

CZ: WEIGHT include total weight, which was constructed from design and post-stratification weights. Design weights based on proportion of household sizes. Post-stratification weight based on region, community size, sex, age and education. The weights were derived from data of the Czech Statistical Office.

DE: Two separate German samples: the sample for eastern Germany deliberately over-samples the five eastern federal states. If all of Germany is taken as the unit of analysis (rather than the eastern and western states), design weight is necessary: weighting factor for Western Germany: 1.23472181*; weighting factor for Eastern Germany: 0.53513429*; recoding of the country variable is necessary. The two weighting factors are not stored in the weight variable.

ES: Weights have been elaborated from the response rates, and have been calculated using two variables: Autonomous Communities and Size of Municipalities .

FI: Weight used for calculation by calibration method considering gender, age classes, NUTS3 regions with Greater Helsinki as separate region and type of community. Weight doesn't have the expansion property (the mean of the weights is 1 and the sum of the weights is the number of accepted responses, i.e. the size of the data).

FR: Post stratification weighting computed on sex, age (4 groups: 18 to 29 years old, 30 to 39 years old, 40 to 54 years old, 55 years old or more) and occupation (6 groups : Farmers, Tradesmen, Shopkeepers and Business Owners; Managers and Secondary/University Teachers, Intermediate Professions, White Collar Workers, Blue Collar Workers, Unemployed)

GB-GBN: A number of area level and interviewer observation variables were used to model response. Weights needed to be applied to correct for unequal probability to be selected (one person interviewed at each address independently from household size). Non-response weighting then applied to correct for unequal probability of response in different sub-groups in population. The final stage of weighting was to adjust the final non-response weight so that the weighted respondent sample matched the population in terms of age, sex and region. Very large weights were capped and were scaled to make the weighted sample size equal to the unweighted sample size.

IT: Weight used (based on gender, age (18 groups) and place of residence (14 groups) to adjust data for non-response bias. Final weights were rescaled to the net sample size.

LT: Design weight based on sex, age and type of settlement rescaled to net sample size.

NL: Three different weights are merged together.

NO: No weighting procedure (in net sample younger people, single (never married) and people with lower education underrepresented).

PH: Weighting variable is based on people aged 18 and above and region (NCR, Balance Luzon, Visayas, Mindanao).

PL: Calculation of weight using IPF (Iterative Proportional Fitting) algorithm including sex, age categories (18-24, 25-34, 35-49, 50-59, 60 and

more years), type of the place of living and voivodship.

PT: Calculation of the distribution on the sample and population of 3 variables: gender, age groups (18-24; 25-34; 35-44; 45-64; 65-74; 75+), level of education. Population: people aged 18 and more living in the mainland of Portugal (excluding Azores and Madeira islands) at the time of the last Census of the population in 2011.

RU: Variables age, sex and education used for calculation of weight.

SK: Weight constructed according the population characteristics sex, age groups, education, ethnicity (nationality), size of community and region. The un-weighted sample under-represents younger respondents (25-34 and 18 - 24) and over-represents residents in settlements with 1001 to 5000 inhabitants and under-represents respondents in settlements with more than 100 thousands inhabitants.

TW: Weighting factor is designed on sex, age, urbanization and education degree groups. Weights were then generated to match the population characteristics of Taiwan area.

US: The weight variable takes into consideration the sub-sampling of non-respondents and the number of adults in the household (men and those under 25/ over 65 undersampled). The GSS uses a sub-sampling design to focus resources on a smaller set of the difficult cases for further attempts, thereby reducing non-response bias. It also essentially maintains the original sample size. It also adjusts for attrition.

ZA: Person and household weights are benchmarked using the SAS CALMAR macro and province, population group, gender and 5 age groups (i.e. 16-24, 25-34, 35-49, 50-59 and 60 and older) as benchmark variables for persons and province and population group of the respondent in the household for households as benchmark variables.

1 No weighting: BE, CH, DE, DK, HR, IL, JP, KR, NO, SE, SI, TR

Note:

/ GB-GBN: this applies to the whole BSA dataset, of which the ISSP dataset is a part, thus, for the ISSP data, weighted base=934 and unweighted base=928.

/ NL: Weight is based on 3 different weights:

- weight 1: adjusts for difference from sample frame with respect to location, no name, no phone, foreign name, type of dwelling,
- weight 2: adjusts for difference due to within-household replacement (relative to sample implied by household box) - with respect to age, sex, position in household, education, main activity
- weight 3: adjust for differences with turnout and results of last national elections

/ PH: The weight applied was based on the 2007 census population and rescaled on sample size.

/ SK: The un-weighted sample under-represents younger respondents (25-34 and 18-24) and over-represents residents in settlements with 1001 to 5000 inhabitants and under-represents respondents in settlements with more than 100 thousands inhabitants.

ISSP Study Description Form***Please use this form for reporting on Module 2006 and later!****Study title:* ISSP 2010 Environment III*Fieldwork dates:* Start: 1 May 2012
End: 8 August 2012*Principal investigators:* Ann Evans, The Australian National University*Sample type:* The sample comprised 6,250 named respondents selected at random from the electoral role*Fieldwork institute:* Academic Surveys Australia*Fieldwork methods:* Self-completion, paper and pencil, mailed to, mailed back by respondent*N. of respondents:* 1,946*Details about issued sample:*

Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: http://www.aapor.org/uploads/standarddefs_4.pdf. The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.

1. Total number of starting or issued names/addresses (gross sample size) *	6,250
2. Interviews (1.0)	1,946
3. Eligible, Non-Interview	
A. Refusal/Break-off (2.10)	833
B. Non-Contact (2.20)	15
C. Other	
i. Language Problems (2.33)	5
ii. Miscellaneous Other (2.31, 2.32, 2.35)	50
3. Unknown Eligibility, Non-Interview (3.0)	3,396
4. Not Eligible	
A. Not a Residence (4.50)	
B. Vacant Residence (4.60)	
C. No Eligible Respondent (4.70)	
D. Other (4.10,4.90)	5

* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

Language(s): English*Weight present:* Yes

Weighting procedure: A post-stratification or non-response weight was calculated with the aim of rebalancing the Australian sample so the weighted sample frequencies are equal to the expected frequencies in population in a the three-way tabulation by age group (five groups), sex, and highest level of education (five levels) .

The cross tabulation by age, sex and highest level of education from the Australian population was done using the 2011 Census Table Builder. A table was created using sex and age (single years) in the rows, and Australian Citizenship, and education in the columns. The final table was created by excluding those who did not have Australian citizenship (this included those who did not state their citizenship). Individuals with no stated year of schooling and schooling up to and including year 12 were combined into one category.

In the sample not all individuals had complete information on both age, sex and year of schooling. However imputations of weight were used to deal so

2010-06-18

that all individuals were assigned a weight even if they had missing data. When age was missing, in some cases, this was imputed from other information available in the questionnaire. If age was missing but the person was retired, the respondent's age was estimated to be equal to the mean for retired people of that sex. For people who were missing on gender, they had a weight allocated to them that was the average of the weights over gender for their level of education and age.

To avoid extreme weights, the weights were trimmed at the 1 per cent and 99 per cent level, before being rescaled so that they averaged to one across all cases in each subsample.

*Known systematic
properties of sample:*

Gross sample

Using a sampling frame derived from the AEC Electoral Roll (2011) excludes permanent and temporary residents of Australia (who are not citizens) and any other adults in Australia who are non-citizens except for British subjects on a Commonwealth electoral roll as at 25 January 1984. These exclusions amount to approximately 8 percent of the adult population. Citizens are able to provisionally enrol at the age of 17 but are unable to vote until they turn 18.

Net sample

The sample demographics were compared with statistics available from the Australian Bureau of Statistics (ABS) including the 2011 Census. The major biases are: age (median age is older than the Census population), education (under-representation of persons who had only completed year 10 or below).

*Deviations from ISSP
questionnaire:*

ISSP Study Description Form – Flanders - Belgium

<i>Study title:</i>	Sociaal-culturele verschuivingen in Vlaanderen 2011 (Social-Cultural Changes in Flanders 2011)
<i>Fieldwork dates:</i>	April 2 nd – August 16 th , 2011
<i>Principal investigators:</i>	Vlaamse Overheid, Studiedienst van de Vlaamse Regering (Research Centre of the Flemish Government) (SVR) (Ann Carton) Supported by a scientific committee: Prof. dr. G. Loosveldt (K.U.Leuven), Prof. dr. J. Lievens (U.Gent), Prof. dr. M. Swyngedouw (K.U.Leuven/H.U.Brussel), Prof. dr. M. Elchardus (V.U.Brussel), Prof. dr. I. Glorieux (V.U.Brussel), Prof. dr. G. Molenberghs (U.Hasselt), Prof. dr. P. Thijssen (U.Antwerpen)
<i>Sample type:</i>	Target population: Persons 18 years or more, Belgian and non-Belgian nationality, resident within private households, in Flanders and Brussels (selection on Dutch addresses in Brussels). Sampling design: Stratified two-stage random sampling procedure Regional stratification, 5 provinces in Flanders and Brussels 1st stage: PSU are clusters of addresses localized in postcodes. The number of clusters for each postcode is proportional to the population size in each province. 2nd stage: using the National Register N=2.521 addresses (2.417 in Flanders and 104 in Brussels) were randomly selected within the groups born in 1993 or before in the randomly selected postcodes. No substitution but in order to cope with non-response and to reach about 1.500 face-to-face interviews: oversampling within certain postcodes depending on differential regional non-response rates. The National Register is a national governmental institution that stores data on all residents in Belgium: name, address, gender, date of birth, nationality, and composition of the family.
<i>Fieldwork institute:</i>	Significant GfK, Heverlee
<i>Fieldwork methods:</i>	<ul style="list-style-type: none"> - Survey social-cultural changes in Flanders including the standard background variables: CAPI face-to-face interviews with trained interviewers (1 day training). - ISSP-module: drop-off questionnaire arrives with interviewer, self-completion by respondent and mailed back by respondent to Research Centre of the Flemish Government. Follow-up of drop-off questionnaire by Research Centre of the Flemish Government.
<i>N. of respondents:</i>	N=1.446 respondents in Survey social-cultural changes in Flanders of which 1.210 respondents completed the drop-off questionnaire

2013-04-11

<i>Details about issued sample:</i> Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: http://www.aapor.org/uploads/standarddefs_4.pdf . The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.	1. Total number of starting or issued names/addresses (gross sample size) *	2.521
	2. Interviews (1.0)	1.210
	3. Eligible, Non-Interview	
	A. Refusal/Break-off (2.10)	774
	B. Non-Contact (2.20)	194
	C. Other	
	i. Language Problems (2.33)	140
	ii. Miscellaneous Other (2.31, 2.32, 2.35)	97
	3. Unknown Eligibility, Non-Interview (3.0)	24
	4. Not Eligible	
	A. Not a Residence (4.50)	
	B. Vacant Residence (4.60)	
	C. No Eligible Respondent (4.70)	
	D. Other (4.10,4.90)	82

* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

3A=refusal face to face interview by respondent (n=508) + refusal by proxy (n=30) + face to face interview but no drop-off (n=236)

3B=no contact with respondent after minimum 5 attempts (n=156) + holidays during fieldwork period (n=38)

3C ii)= dead (=5) + physically or mentally unable/incompetent (n=80) + bad quality face to face interview (n=6) + other (n=6)

Language(s): Dutch

Weight present: yes

Weighting procedure: In Flanders the ISSP-questionnaire 2011 was an addition (drop-off questionnaire) to a general face-to-face survey.
In Wallonia the ISSP questionnaire 2011 including the standard background variables was a postal survey in 2012.
In order to deliver one integrated harmonized data file for Belgium post stratification weights were calculated based upon age, sex, nationality, and geographical classification (NUTS2). All these characteristics are known for all sampled units. The weights were scaled to make the weighted sample size equal to the unequal sample size.

Known systematic properties of sample: Realized drop-off versus realized total sample:
The realized drop-off sample (N=1.210) is representative for the realized total face-to-face sample (N=1.446) for the variables age, sex, and level of education.

Realized drop-off versus population:
Following groups are (slightly) under represented:
- 25-34 years old men
- non-Belgian nationality

2013-04-11

Following group is slightly over represented:

- 65-74 years old men

ISSP'2010-2012 Study Description Form

Study title: 'official' title of the study/survey in your country
**Международна програма за социални изследвания
 (Three ISSP modules were conducted together –
 Environment'2010, Health'2011 and Gender and family'2012)**

Fieldwork dates: start and end dates of field-work, please use format yyyy-mm-dd
2011.08.16 – 2011.09.20

Principal investigators: name and institution
Agency for Social Analyses (ASA)

Sample type: description of the sampling procedure
 Three stage random sampling with starting point and random route was used to conduct the survey.
 The first stage of the sampling procedure was based on the list of electoral sections from the General Election 2009. Electoral sections cover the whole territory of the country and respectively provide access to the whole Bulgarian population aged 18 and over. Selection of units was based on the procedure of systematic random selection. In each of the 100 selected cluster/units, one address was drawn at random, which was an exact address and starting point.
 The second step was to stand on the street at the starting address facing towards the end of the street. It was chosen the right side of the street and the walking-direction was towards the end of the street. In this direction the third door had to be found. Only dwelling units were chosen.
 The last step was to select the respondent on the basis of the 'last birthday' approach for respondents who were 18 of age and over.

Fieldwork institute: institute which conducted the survey
ESI Center did the field work

Fieldwork methods: mode of interview
PAPI face-to-face

N. of respondents: number of respondents in the final ISSP file: **1003**

ISSP Study Description Form

Please use this form for reporting on Module 2006 and later!

Study title: National Public Opinion Study N°36

Fieldwork dates: Start date: 2011-11-11
End date: 2011-12-11

Principal investigators: Carolina Segovia / Centro de Estudios Públicos (CEP)

Sample type:

The guiding methodological principle underlying CEP's public opinion surveys is that effective and accurate survey research must be based on a truly representative sample of the universe in question. For CEP's purpose, this universe is made up of Chilean adults 18 years of age and older. Our studies use a probability multistage cluster sample.

The sample is designed in three stages, such that all adult individuals throughout the country have a calculable probability of being included. The 2002 Census data is consulted to determine the regional population structure of people 18 years of age and older. This makes it possible firstly to establish regional stratification and then each region is stratified by rural and urban zone.

Sampling Stages

First Stage

The first stage of the sampling process sets the number of completed interviews per cluster at 6; a cluster is defined as a block (*manzana*) or populated entity (*entidad*).¹ The application of 6 interviews per cluster to the total number of interviews targeted in the sample (1,872) yields 312 primary sampling units (PSUs) to be identified in the first stage of sample selection.

The PSUs are proportionally distributed throughout the regions of the country, taking into account the region's contribution to population (both urban and rural).

Using the most reliable digital information on hand, i.e. 2002 census data, a cumulative listing of population by province (*provincia*), borough (*comuna*), district (*distrito*), zone (*zona*) and block (*manzana*) was prepared in the urban case; and by province, borough, district, locality (*localidad*) and entity (*entidad*) in the rural case (geographically arranged).

In both the rural and the urban case a fixed interval is set for each region by dividing the total population for that region by the number of PSU's assigned to it. Within each region, a purely random selection process is followed, such that each individual (as represented by population statistics) has a calculable probability of being selected as the reference point for a PSU.

¹ Blocks (*manzanas*) are used in urban areas, while in rural areas the census equivalent is the entity (*entidad*).

2007-09-25

This is carried out through a computerised, random, proportionate-to-population process to select blocks in the urban areas and entities in the rural areas. A computer program is developed to select the urban blocks and the rural entities for the sample. All the blocks and entities are identified by number and located on a census map.

Second Stage

The second stage in the sampling process is to select households (dwellings) within PSUs. Selection rules for households within chosen blocks and entities are provided to interviewers, to enable them to select households randomly within each cluster. After taking a census of each selected block and entity, a random walk or systematic sampling procedure is followed, whereby every *n*th dwelling is included in the sample until a total of 6 households are identified.

Third Stage

The third stage is to select, within each household, a person to be interviewed. Interviewers are instructed to apply a random selection process (random number table) to identify the person to be interviewed.

N. of respondents: 1559

Details about issued sample:

Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: http://www.aapor.org/uploads/standarddefs_4.pdf. The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.

1. Total number of starting or issued names/addresses (gross sample size) *	1872
2. Interviews (1.0)	1559
3. Eligible, Non-Interview	
A. Refusal/Break-off (2.10)	...143.....
B. Non-Contact (2.20)153.....
C. Other	
i. Language Problems (2.33)
ii. Miscellaneous Other (2.31, 2.32, 2.35)	...17.....
3. Unknown Eligibility, Non-Interview (3.0)
4. Not Eligible	
A. Not a Residence (4.50)
B. Vacant Residence (4.60)
C. No Eligible Respondent (4.70)
D. Other (4.10,4.90)

* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

Weighting procedure: A weighting procedure is applied in order to correct for distortions in

2007-09-25

the representativeness of the sample as regards three variables of interest: Gender, Age, (grouped in five categories: 18-24 years, 25-34, 35-44, 45-54, 55 or older) and Urbanity (classification of place of residence as urban or rural). This makes it possible to obtain a sample with characteristics similar to those of the population. The weights are constructed by calculating the quotient between the expected distribution and that observed in the cross between Urbanity, Gender and Age. The expected distribution is obtained from the 2002 census data provided by the National Institute of Statistics. The result of the weighting slightly corrects for problems of under- and over-representation among certain specific groups of the population

Study Description

ISSP Study Description Form

<i>Study title:</i>	ISSP 2011 on Health
<i>Fieldwork dates:</i>	24.02.– 30.03. 2012
<i>Principal investigators:</i>	PhDr. Dana Hamplová, Ph.D
<i>Sample type:</i>	<p>Four stage stratified probability sampling:</p> <ol style="list-style-type: none"> 1. UTJ (Regional technical unit) was the primary sampling unit in the first stage. From the more than 9600 UTJs in the Czech Republic (approximately 450 households per UTJ in average) 360 was selected by stratified random sampling using regions (NUTS 3, 14 categories) and settlements size (4 categories) as combined strata. Probability of UTJ selection corresponded to its size (e.g. UTJ with 400 HH is twice as likely to be selected then UTJ with 200 HH). The sample of 360 UTJ was divided to main sample (300 UTJ) and reserve sample (60 UTJ) by stratified random sampling. Reserve sample was to be used if the response rate got lower than expected and the main sample was not sufficient to get required min. number of interviews (N=1800). However, it was not the case. Hence, only the main sample was used. 2. In the second stage, Statistical Districts were selected as a secondary sampling unit within selected UTJ using systematic random sampling. With more than 52 000 Statistical District (SD) in the Czech Republic there are approximately 5,4 SD per UTJ. 3. In the third stage, household addresses were randomly selected within the selected Statistical Districts. Systematic random sampling is again applied for the selection. 4. In the fourth stage, individuals within the households were selected using Kish grid.
<i>Fieldwork institute:</i>	MEDIAN research age
<i>Fieldwork methods:</i>	Face to face interview
<i>N. of respondents:</i>	1804
<i>Language(s):</i>	Czech
<i>Weight present:</i>	Yes
<i>Weighting procedure:</i>	<p>Data weighting was used to ensure full representativity of sample in terms of:</p> <ul style="list-style-type: none"> • Basic sociodemographic factors – one-dimensional = sex (2) , age (6), education (4) • Stratification factors – one-dimensional = region (14), settlement size (4) • Stratification factors – two-dimensional = region (3) x settlement size (4) • Job/economic status of the respondents (7)

Details about issued sample:

Total number of starting or issued names/addresses (gross sample size) *	3230
1. Interviews (1.0)	1804
2. Eligible, Non-Interview	
A. Refusal/Break-off (2.10)	711

Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: http://www.aapor.org/uploads/standarddefs_4.pdf . The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions	
<p>* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.</p> <p>** Including 16 finished interviews which were not included to final sample (due to high rate of refusal/DK/missing values in substantial variables or other flaws).</p> <p>*** Research agency used a probability-based method for eliminating part of the selected one-member households before the interviewing process, which serves to reduce higher probability of interviewing old one-member HH respondents in address-based probability sampling. Eliminated unused addresses are included in category 4.D – Other.</p>	

Known systematic properties of sample:

Information from the Czech Housing and Population Census 2011 and the Labor Force Survey 2011 by Czech Statistical Bureau were used for defining theoretical frequencies.

Modified Deming-Stephan method is used in the process of weighting. Range of weights and number of weighting interactions were limited in the weighting process (range 0,5 – 2; 5 interactions). Chi-square test with 0,05 significance level was used as goodness-of-fit criteria of weighted frequencies.

Impact of weights on effective sample size (neff) was analysed and considered as sufficiently minor in relation to the net sample size (reduction by 15 %).

Deviations from ISSP questionnaire:

It might be useful to know that this module was combined with module on Family

Senior Researcher & International Consultant Torben Fridberg

Sample type:

Sampling-procedure: A representative sample (simple random sample) of 2.352 individuals between the age of 18 to 79 years of age was drawn from the Central Population Register (CPR) –which is a national register of all Danish citizens – from which respondent's name and address were identified.

In previous surveys it has been found, that the response rate among young men is significantly lower than the rest of the population. Therefore an extra sample of 148 men between the ages of 18 to 35 years was drawn. This bringing the total sample to 2.500 named "named individuals".

Fieldwork institute:

Rambøll Denmark A/S

Language(s): Spanish*Weight present:* yes

2014-06-06

Weighting procedure:

Weights have been elaborated from the response rates, and have been calculated using two variables: Autonomous Communities, CCAA–*h*–, (E_REG), and Size of Municipalities –*k*– (Tamaño de Habitat) (E_SIZE).

Algorithm:

$$\hat{P} = \frac{1}{n^r} \cdot \sum_{h=1}^H \sum_{k=1}^K \sum_{i=1}^{n_{h,k}^r} w_{i,h,k} \cdot y_{i,h,k}$$

where,

n^r , is the size of the sample collected

$n_{h,k}^r$, is the size of the sample collected in strata h,k

$w_{i,h,k}$: final weight, defined as

$$w_{i,h,k} = \frac{1}{N} \cdot \frac{1}{\pi_{i,h,k}^*} \cdot n^r = \frac{1}{N} \cdot \frac{1}{\pi_{i,h,k} \cdot r_{h,k}} \cdot n^r = \frac{n^r}{N} \cdot \frac{N_{h,k}}{n_{h,k}^r}$$

where,

π_i , is the inclusion probability for i element

$r_{h,k}$, is the response rate in the strata h,k

$N_{h,k}$, is the population size in the strata h, k ; and,

N , is the population size.

*nown systematic
properties of sample:*

11,7% of the original sample are foreigners living in Spain, but only 7,1% are part of the real sample, due to the inherent difficulties to locate certain groups of foreigners (27,3% of the people in the sample who were “not found” were foreigners).

*Deviations from ISSP
questionnaire:*

The Spanish Template shows every deviation from ISSP BV in the Spanish questionnaire and describes the recoding used to match the ISSP BV (socio-demographics) some deviations in two opinion variables.

E_SIZE is constructed by a 7 category variable based on size of municipalities (from Less than 2.000 inhabitants to More than 1 million)

ISSP Study Description Form

Study title: Terveys Suomessa (in Finnish)
Hälsa i Finland (in Swedish)

Fieldwork dates: 28.8.2011 - 9.12.2011

Principal investigators: Prof. Raimo Blom, University of Tampere
Prof. Harri Melin, University of Tampere

Sample type: Target population: household population aged 15 to 74.
Sampling design: a systematic random sample of individuals.
Sampling frame: population register, sorting order: domicile code and birth date. Stratification: implicit geographic stratification. No clustering.

Fieldwork institute: Statistics Finland, Social Survey Unit, Helsinki
Researcher responsible: Markku Nieminen
(markku.nieminen(at)stat.fi)

Fieldwork methods: Postal (both directions), self-completion, paper & pencil OR internet

N. of respondents: number of respondents in the final ISSP file: 1340

Details about issued sample:

1. Total number of starting or issued names/addresses (gross sample size) *	2500
2. Interviews (1.0)
3. Eligible, Non-Interview	
A. Refusal/Break-off (2.10)	12
B. Non-Contact (2.20)	7
C. Other	
i. Language Problems (2.33)	2
ii. Miscellaneous Other (2.31, 2.32, 2.35)	1136
3. Unknown Eligibility, Non-Interview (3.0)
4. Not Eligible	
A. Not a Residence (4.50)	
B. Vacant Residence (4.60)	1
C. No Eligible Respondent (4.70)	2
D. Other (4.10,4.90)	

Language(s): Finnish questionnaire (95,1 % of total sample)
Swedish questionnaire (4,9 % of total sample)

Weight present: Yes

Weighting procedure: The design of the survey was systematic sampling. In order to improve the efficiency of estimation and to reduce bias due to non-response a calibration method was used for the creation of the weights.

The following marginal distributions of the population were used:

- 1) gender (male, female),
- 2) age classes (15–24, 25–34, ..., 65–74),
- 3) NUTS3 regions with following modifications: the Greater Helsinki Area was dealt as a separate region,
- 4) type of community (urban - semi-urban - rural).

There are two weights available for calculations:

- 1) a weight that expands the results to the population level (the sum of the weights is the size of the population aged 15 to 74) and 2) a

weight that doesn't have the expansion property (the mean of the weights is 1 and the sum of the weights is the number of accepted responses, i.e. the size of the data). Both of the weights are based on the same calibration process, only the scale differs.

*Known systematic
properties of sample:*

Sampling frame is updated and covers total population with the appropriate language restriction. A cross-sectional sample does not contain attrition by definition.

After having used our standard sampling procedures for over 20 years, we have not encountered any bias due to using systematic sampling. Design effect of the sampling procedure ≤ 1 by definition.

*Deviations from ISSP
questionnaire:*

List of deviations and coding specifications compared to ISSP source questionnaire:

1) AGE (at the end of year 2011)

Age is computed from a variable for year of birth in the Finnish questionnaire.

2) FI_ETHN

Added from register data on mother tongue. The Finnish questionnaire did not include a question for this.

3) FI_REG

Added from register data on regions. The Finnish questionnaire did not include a question for this.

4) WEIGHT and WEIGHT _2

- [weight] is a weight that expands the results to the population level (the sum of the weights is the size of the 15-74 population) and

- [weight_2] is a weight that does not have the expansion property (the mean of the weights is 1 and the sum of the weights is the number of accepted responses, i.e. the size of the data).

Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

Language(s): English*Weight present:* yes

Weighting procedure: Selection weights are required because not all the units covered in the survey had the same probability of selection. The weighting reflects the relative selection probabilities of the individual at the three main stages of selection: address, DU and individual. First, because addresses in Scotland were selected using the MOI, weights were needed to compensate for the greater probability of an address with an MOI of more than one being selected, compared with an address with an MOI of one. (This stage was omitted for the English and Welsh data). Secondly, data were weighted to compensate for the fact that a DU at an address that contained a large number of DUs was less likely to be selected for inclusion in the survey

2011-09-01

than a DU at an address that contained fewer DUs. (We used this procedure because in most cases where the MOI is greater than one, the two stages will cancel each other out, resulting in more efficient weights). Thirdly, data were weighted to compensate for the lower selection probabilities of adults living in large households, compared with those in small households.

At each stage the selection weights were trimmed to avoid a small number of very high or very low weights in the sample; such weights would inflate standard errors, reducing the precision of the survey estimates and causing the weighted sample to be less efficient. Less than one per cent of the selection weights were trimmed at each stage.

Sample excludes Scotland north of the Great Glen

ISSP Study Description Form***Please use this form for reporting on Module 2006 and later!****Study title:* Health ISSP2011*Fieldwork dates:* 2011-05-20 – 2011-06-20*Principal investigators:* Dinka Marinović Jerolimov, Institute for Social Research, Zagreb Croatia

Sample type: Sampling frame: list of settlements derived from Census 2011. Stratified random multi-staged sample: level of settlements, level of household, level of individual.

Two-way stratification: by 6 regions (defined as the traditional groups of counties) and 4 settlement sizes (defined by the number of residents). The size of each stratum is based on the proportion of the number of 18+ residents within the stratum in the total 18+ population.

Multistage sampling procedure:

1. Selection of primary sampling units (settlements) was conducted by the “probability proportionate to size” method. Each settlement had a probability of being in the sample proportionate to its population size. The selection of settlements was based on a random sampling procedure. All settlements in a stratum were alphabetically ordered and their respective populations were cumulated. Assignment of random numbers from cumulative population of all settlement was conducted. Those settlements under which randomly assigned numbers fell into were chosen. Within each primary sampling unit, the “random starting points method” was used to select starting points. There were 102 starting points in total. On average allocation of 10 respondents was assigned to each starting point.
2. Selection of households within the starting points was conducted by the “random walk method”. Interviewers were instructed to follow a specified route from the starting point, conducting an interview at every 6th dwelling/housing unit (systematic sampling). Non-contacts were re-visited 5 times before being declared as non-response.
3. Selection of the respondent within a household was conducted by random selection by last birthday key.

Study title: **“Monitoring of Social Problems”**(parts of the survey: “Social Policy”, ISSP module “Health 2011”, “e.social networks”).

Fieldwork dates: **Start: 2011-11-22**
End: 2011-12-19

Principal investigators: **Prof. Algis Krupavičius, Policy and Public Administration Institute, Kaunas University of technology**

Sample type: **Multistage. First stage - The territory of the Republic of Lithuania divided into 10 administrative units (counties) based on Nomenclature of Territorial Units as used in the official EU statistics. Each county is represented in the sample proportionally to its population size. Second stage - The total number of interviews in each survey region (county) allocated to 5 strata in proportion to the population of each stratum. The stratum is defined on the basis of a settlement size. Number of PSU's ("PSU" -clusters) allocated by size of settlement depending on the share of population living in a certain type of settlement. PSU's selected randomly from each stratum (county and settlement size combination cell) list. In total 231 for this survey. Selection to identify household - addresses register; respondent – last birthday.**

Language(s): **Lithuanian**

Weight present: **Yes**

Weighting procedure: **Weighting factor: Interlocking grid: sex by age by type of settlement**
Three above variables used for data weighting. Statistics on percentage of males and females of different age groups counted and used in counts of weighing factor as required total. Weighting factor

is counted by required total for the group (e.g. males aged 20-29y. living in rura area) by the achieved survey sample total for this group. Weight factor makes survey sample representative of the total population by gender, age and urban/rural population. Second step: weighting data by the settlement size. At this step percentage of the residents of major cities (Vilnius, Kaunas, Klaipeda, Siauliai and Panevezys), other towns and rural area is counted based on official statistics as required total. Finally weighting factor is counted by dividing the required total for each city or settlement size. This weight makes survey sample representative of the population by gender, age and settlement size.

Known systematic

None.

properties of sample:

Deviations from ISSP questionnaire:

The ISSP2011 module was a part of a larger survey. The structure of the questionnaire is following:

Q1-Q11: "Social Policy".

SV1-SV29: ISSP module "Health 2011".

SD1-SD38: ISSP background questions (except SD23 – Lithuanian specific question about modes of political participation, SD34 – Lithuanian specific question about the fairness of respondent's earnings, SD36 - Lithuanian specific question about the amount of income needed to maintain the wholesome living standard).

SD39-SD41: questions about self-evaluation of respondent's social position.

ST1-ST10: "e.social networks".

STUDY DESCRIPTION

Study title:	“ISSP-NL 2010+2011: Milieu & Gezondheid”
Fieldwork dates:	March–December 2011
PI:	Harry B.G. Ganzeboom Heike Schroeder (fieldwork manager)
Sample type	(Step 1:) Simple random address sample, (Step 2:) random date selection of household member (*)
Response:	33.6% (*)
Fieldwork agency	VU University Amsterdam
Fieldwork Methods	Postal survey
Sample size	1472
Language	Dutch
Weights	post-stratification (*)

(*) See further below.

The data will appear in the ISSP publicly released data as two independent data-files. The user should be aware that the units are identical between these modules.

The complete data file (described in this documentation), including all the collected information on demography and social background, as well as the standardized ISSP variables has been archived at DANS [Data Archiving and Networked Services] in The Hague, the successor to the Steinmetz Archive. The appropriate bibliographic reference to this file will be:

Ganzeboom, Harry B.G. [principal investigator] & Heike Schroeder, “ISSP 2010 + 2011: Environment & Health” [machine-readable data file]. The Hague: DANS. To be archived.

Introduction

The modules 2010 (“Environment III”) and 2011 (“Health”) of the International Social Survey Programme in the Netherlands [ISSP-NL] were conducted in 2011 as a stand-alone postal survey at the VU University Amsterdam [VUA] (Faculty of Social Sciences, Department of Social Research Methodology) by Harry B.G. Ganzeboom [principal investigator] and Heike Schroeder [fieldwork manager]. Note that this combined dataset is more elaborate than the Dutch part of the international ISSP file, archived at GESIS - Leibniz Institute for the Social Sciences, Cologne, Germany.

The data-collection followed very much the same methodology as for the ISSP_NL 2003&2004, ISSP-NL 2005&2006 and ISSP-NL 2007&2008. The data collection process can be summarized as follows:

- The two ISSP modules were combined in one single questionnaire. Data for the two modules share the same social background questions (starting with Z). The Environment III variables start with G, the Health variables with H. Variables are numbered in the same way as the ISSP source questionnaires.
- Translation of the ISSP questionnaire documents was conducted by ourselves, in consultation with our Belgian ISSP colleague Ann Carton. The translation for the items in the Environment module was copied from the earlier versions, when applicable.
- The standard ISSP questions are complemented with a large number of demographic variables, most of them on social mobility.
- A simple random sample was drawn from the complete list of addresses in the Netherlands, maintained by Cendris, a subsidiary of the national postal service. The sampling frame [i.e. the list of addresses] is known to be very accurate and complete.
- All respondents were approached using (A) advance letter, (B) first questionnaire, (C) first postcard reminder, (D) second reminder by letter, (E) second questionnaire.
- All the questionnaires received were screened on completeness and double responses. All alphanumerical information was transferred to a coding file.
- The remaining (numerical) information was keypunched (single punching) by a professional agency (InDat).
- The alphanumerical information for country of origin and occupations was coded using standard international classifications.
- The keypunched data were checked and labelled and merged with the coded alphanumerical information.
- A post-stratification weight was developed using (A) information from the sampling frame, (B) information from the household roster (C) comparison with election results. No other national benchmark was used.

Respons

Table 1 details the various steps taken to (re)approach the respondents and its results in terms of received questionnaires.

Throughout the fieldwork, respondents could call (in fact: call an answering machine) to ask further information, refuse participation or make comments. Once respondents had expressed non-willingness to participate, either by phone or (e-)mail, they were not contacted again. General information on the ISSP project and the data-collection was also provided on a website, that was referred to on the questionnaire and all the information sent to the respondent.

Table 1: Mailings and response pattern

Week	Event Date	Action	Received			
2		Advance letter				
3		First Questionnaire				
4			46.3%			
5		Reminder postcard	60.0%			
6		Reminder letter	68.7%			
7			72.3%			
8			73.1%			
9		Second questionnaire	73.2%			
10			83.5%			
11			90.6%			
12			92.6%			
13			86.4%			
14			97.8%			
18			99.7%			
22			100.0%			

Sample

The sample was drawn from the national addresses list of Cendris, a subsidiary of TNT, the Dutch national postal agency. The specifications called for a systematic random sample of N=4500. For over 66%, the addresses are associated with a family name – the remaining 34% were addressed as “To main occupant [hoofdbewoner]”.

Sampling within households was conducted by random date selection. The addresses were stratified in 12 random date groups and the addressee was invited to have the questionnaire completed by the household member whose birthday was first after the date specified.

Table 2: Response and non-response

	2007&2008		2010&2011			
	N	%	N	%		
Initial sample	9000	100.0%	4500	100%		
Undeliverable	289	3.2%	125	2.8%		
Net sample	8711	100.0%	4384	100%		
Valid response	2843	32.6%	1472	33.6%		
Explicit refusal	983	11.3%	552	12.6%		
No response	4885	56.1%	2360	53.8%		

POST-STRATIFICATION WEIGHTS

There are three sources of information that can inform us about selectivity that occurs because of non-response, and can be used to post-stratify the data.

Sample-frame information

- Location of the sampled address. It is to be expected that response in urban areas, and in particular in the four major cities (Amsterdam, Rotterdam, The Hague, Utrecht) is lower than elsewhere.
- Name: for about 33.6% of the sample there was no access to a name of the inhabitants. This has decreased the response.

- Phone: for about 72.3% of the sample there was no access to a phone number. Apart from obstructing the opportunity to use the third (phone) reminders, it is to be expected that not being listed in the phone-register is a strong correlate of willingness to participate.
- Foreign family name: Family names in the Netherlands can with considerable accuracy be classified as foreign and non-foreign. In particular Moroccan and Turkish names are easy to recognize, this is much harder for Surinamese and Antillean names. 3.2% of the units in the sample frame were categorized as having foreign name.

In 9 cases, the respondents had removed their identification number from the mailed back questionnaire, although they supplied useable information. These questionnaires cannot be connected to the sample frame information and thus cannot be post-stratified in this respect (and these respondents kept receiving reminders to the very end...)

Household box information

Selectivity may also occur within responding households. Each respondent was asked to complete a household box, which gives access to information of all household members with respect to:

- Sex
- Age
- Position in household
- Main activity
- Highest completed / current education.

In addition, we have information on:

- Total number of persons in household eligible for the sample (i.e. all household members of 18 and older).

Using this information, a synthetic population can be formed that consists of all household members in the designated age bracket (18-75+). The actual sample should be representative of this synthetic population. All this information was used to develop the post-stratification weight.

The weights have been constructed by taking the inverse of the expected probabilities from a logistic regression that predicted response from (A) sample frame characteristics, (B) constructed sample from household roster

Election result

Respondents report on their voting behavior at the most recent election, which happened to have been on June 9th 2010. Two exactly known population characteristics can be used as benchmark: turnout (75,4%), and the distribution of voting over parties. As in other surveys, voter turnout is considerably overestimated by the survey (at 88%), which is assumed to be caused by lower response to surveys among non-voters. Unlike in earlier ISSP-NL issues there was a significant difference between the population benchmark for one party, PVV (Lijst Wilders), which may be due to lower survey participation among the PVV-voters, or misreporting. The former seems the more plausible interpretation. The post-stratification weight *www3* was developed by iterative proportional fitting.

Table 4: Benchmark distributions, unweighted sample data and weights

	2007/2008	www1	www2	www3	weight
URBANIZATION*	Weight				
1 minder dan 5000 inwoners	0.925	0.853	0.915	0.885	0.686

7 Partner in couple hh	0.944	0.978	0.907	0.975	0.862

In summary, it can be said that one group was severely underrepresented in our effective sample: young adults, in particular in as far as they live in their parents' households. However, the highest marginal weight (2.7) is generated for respondents with foreign names. Note on the other hand, that the obtained sample is fairly representative with respect to education and main activity, even before post-stratification.

In publications (printed and electronic), lectures etc. using data from the survey, please give full reference, and send a printed or electronic copy to the Norwegian Social Science Data Services (NSD).

ISSP Study Description Form

Study title: International survey on Health

Fieldwork dates: 07.03.2012– 04.05.2012

Principal investigators: Kirstine Kolsrud and Knut Kalgraff Skjåk, NSD.

Sample type: The sample was a random sample of 3 800 individuals from the Central Register of Persons, born 1934 - 1993.

Fieldwork institute: TNS Gallup (contact and paper questionnaire administration) and NSD (web questionnaire administration)

Fieldwork methods: The main survey was conducted as a combined mail survey and web survey. A split ballot design testing contact procedures and mode preferences was used. See the SMQ for further details.

N. of respondents:

<i>Details about issued sample:</i> Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: http://www.aapor.org/uploads/standarddefs_4.pdf . The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.	1. Total number of starting or issued names/addresses (gross sample size) *	3800
	2. Returned questionnaire (1.0)	1834
	3. Eligible, Non-Interview	
	A. Refusal (2.11)	39
	B. Implicit refusal (blank questionnaire) (2.113)	8
	C. Break-off questionnaire too incomplete (2.12)	34
	D. Death (2.31)	1
	E. Physically or mentally unable (2.32)	
	F. Other (wrong person answered) (2.30)	9
	4. Unknown Eligibility, Non-Interview	
	G. Nothing ever returned (3.19)	1775
	H. Unknown Whereabouts, Mailing Returned Undelivered (3.30)	98
	I. Other (3.90)	
	5. Not Eligible	
	J. Abroad during fieldwork period (4.70)	2

* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

Study title: International Social Survey Programme 2011

Fieldwork dates: 13.04.2013
25.04.2013

Principal investigators: Marcin W. Zielinski, Institute for Social Studies, Warsaw University (ISS UW)

Sample type: Multi-stage area probability sample.
The sample was drawn from The Common Electronic Population Evidence System - PESEL (a governmental agency).
Sampling procedure consists of the three stages:

1. In each of the 16 voivodeships in Poland places of living were divided up into three categories
 - 1) capital of the region
 - 2) other cities
 - 3) villages
2. In the second stage in CBOS (Public Opinion Research Center) cities and villages communes were sampled. After that some small areas of the cities and villages communes were sampled.
3. In the third stage persons to be interviewed were chosen from the PESEL data-base from the previously selected areas. In cities, small areas covered some streets and it's neighborhood and in villages the areas of one village and/or some of it's streets.

Fieldwork institute: Public Opinion Research Center (CBOS), Warsaw

Fieldwork methods: Computer Assisted Personal Interview (CAPI)

N. of respondents: number of respondents in the final ISSP file:

Details about issued sample:

Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: http://www.aapor.org/uploads/standarddefs_4.pdf. The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.

1. Total number of starting or issued names/addresses (gross sample size) *	2640

ISSP 2011 – Health and Health Care
Study Description

2013-06-25

ISSP Study Description Form***Please use this form for reporting on Module 2006 and later!****Study title:* Inquérito Social Internacional*Fieldwork dates:* 2012-11-03 to 2013-04-03*Principal investigators:* Jorge Vala, Instituto de Ciências Sociais-Universidade de Lisboa
Alice Ramos, Instituto de Ciências Sociais-Universidade de Lisboa*Sample type:*

Target Population, Population coverage, Geographic coverage	<p>All persons aged 18 and over who are resident in the mainland of Portugal (this excludes Azores and Madeira) and who are not permanently living in institutions or in similar environments. There are also some population groups that cannot be reached and will be excluded from the target population:</p> <ul style="list-style-type: none"> - people living in localities with less than 10 dwellings - homeless people, - people who are residents of Portugal but work most of time outside the country, - people living in institutions and group quarters
Sampling frame (areas, starting points, registers)	<p>For stratification: The frame covers municipalities (these are administrative areas with varying sizes; e.g. Lisboa is one municipality) in all regions of the mainland of Portugal, except municipalities with less than 10 dwellings. For each municipality the number of households and persons 18 years and older is known. For selection of households: list of households included in the street studies. Census 2001 were used because the more recent (2011) were not available at the time of the sampling process. Next samples will be designed from the 2011 Census.</p> <p>Area sampling</p>
Sampling design (sampling stages, clusters, primary/secondary sampling units, selection procedures)	<p>Stage 1: selection of localities</p> <p>Random selection of 101 municipalities (out of 26192). The selection is a probabilistic one, taking into account the region (NUTS II: North, Center, Lisbon, Alentejo, Algarve) and the number of inhabitants (less than 2000, 2000-9999, 10000-19999, 20000-99999, more than 100000). The number of interviews by strata (23 because there are no municipalities with more than 100000 inhabitants in Alentejo and Algarve) is proportional to the distribution of the population.</p> <p>Stage 2: selection of households</p> <p>Since we do not have lists of households or individuals, the selection of households is done according to a street study (random-route method).</p> <p>In each locality starting points were randomly selected (one or more according to the dimension of the locality). Each starting point (323 on the whole) corresponds to a fixed number of interviews.</p> <p>Households are selected following fixed intervals (ranging from 6 in small localities to 20 in big cities).</p> <p>Stage 3: selection of respondent</p>

2013-06-25

	<p>Last birthday method</p> <p>The interview records date of birth of all members of the household, and selects the respondent among the eligible. Are considered non-eligible people with less than 18 years old, people with mental disabilities, people that do not speak Portuguese, people that are away from the household during the fieldwork period, people that are permanently sick.</p>
Remark (problems, deviations, modifications, substitution)	Substitutions are not allowed in any stage of the selection.

Fieldwork institute: CESOP, Centro de Estudos e Sondagens de Opinião

Fieldwork methods: CAPI

N. of respondents: 1022

<p><i>Details about issued sample:</i></p> <p>Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: http://www.aapor.org/uploads/standarddefs_4.pdf. The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.</p>	1. Total number of starting or issued names/addresses (gross sample size) *	2256
	2. Interviews (1.0)	1022
	3. Eligible, Non-Interview	
	A. Refusal/Break-off (2.10)	917
	B. Non-Contact (2.20)	117
	C. Other	
	i. Language Problems (2.33)	8.....
	ii. Miscellaneous Other (2.31, 2.32, 2.35)	.
	3. Unknown Eligibility, Non-Interview (3.0)
	4. Not Eligible	
	A. Not a Residence (4.50)	13
	B. Vacant Residence (4.60)	146

	D. Other (4.10,4.90)	12

* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

Language(s): Portuguese

Weight present: yes

Weighting procedure: Calculation of the distribution on the sample and population of 3 variables: gender (M/F); age groups (18-24; 25-34; 35-44; 45-64; 65-74; 75+); level of education (none; basic; secondary; superior). Population: people aged 18 and more living in the mainland of Portugal (excluding Azores and Madeira islands) at the time of the last Census of the population in 2011. Source: National Institute of Statistics.

1 - $K = n/N$

2 - Cross tables between gender X age groups X level of education

3 - for each cell different from 0, weight = $N_{hij}/n_{hij}.K$

2013-06-25

Known systematic properties of sample:

More women than in the population; more people between 45 and 74 years old and less people in the younger groups (18-24 and 25-34)

Deviations from ISSP questionnaire:

PT_RINC and PT_INC : the questions asked about income **after** taxes, and not before as in the ISSP questionnaire

Q27. Do you have a long-standing illness, a chronic condition or a disability ?. Yes/No.

PT : We probe the Yes answers and asked 'Which one ?'

Q29 What kind of national insurance do you have ?

Publications:

PT: We decomposed the original question in order to adapt the question to the Portuguese context. Nevertheless PT categories are easily and logically converted into the original classification. In Portugal the hypothesis 'no health insurance' is empty because everyone is covered by the National Health System'.

Russia
ISSP 2011 – Health and Health Care
Study Description

2012-11-06

Please use this form for reporting on Module 2006 and later!

Study title: 'official' title of the study/survey in your country
Module **2011 "Health"** has been added to **the regular omnibus "Vestnik"**

Fieldwork dates: start and end dates of field-work, please use format yyyy-mm-dd
start date: 2011-12-05; end date: 2011-12-23

Principal investigators: name and institution
L.Khakhulina, Levada-Center

Sample type: **Description of the sampling procedure**
The omnibus survey is based on the nationwide, four-stage, stratified and probability sample (N=1600) that represents the adult population in age 18+ .

Stratification. The nationwide sample (N=1500) was divided among:

- a) 8 large geographical macro regions (Federal Okrugs) proportionate to the size of the local population aged 18+ of each macro region
- b) 6 types of urban settlements and rural districts * in each of 8 macro regions proportionate to the size of the local population aged 18+ of each type.
 - 1) cities > 1,000 000 residents
 - 2) cities > 500 000 - 1,000 000
 - 3) cities > 100 000 – 500 000
 - 4) cities and small urban settlements < 100 000
 - 5) rural districts

If to take into account that in the North-West region there are no cities of 500-1,000 thousands of residents, in the Far East region there are no cities of more then 1,000 thousands of residents, in North Caucasia there are no cities more then 500,000 residents the total number of strata is 36.

Selection of primary sampling units (PSUs). On the **first stage** urban settlements and rural administrative regions as primary sampling units were selected.

All cities over 500, 000 inhabitants were included in the sample as self-representative units.

Urban settlements and rural administrative regions were considered as primary sample units (PSUs). In each stratum (except strata of cities over 500,000 and cities over 1,000 000) the number of PSUs was calculated with the limitation of 10-12 interviews per PSU and the PSUs as well were selected with the probability proportionally to its size (PPS). The total number of interviews accounted for a stratum was distributed approximately equally among selected PSUs. Totally **135** PSUs were selected including 96 urban and 39 rural primary sampling points.

Selection of secondary sampling units (SSUs). On the **second stage** the secondary sampling units (SSU) were selected from the lists of electoral districts in urban settlements and localities (villages) in rural administrative regions.

2012-11-06

In the cities and in the rural administrative regions 1-2 SSUs (electoral districts or localities) were randomly selected from the list of all potential secondary sampling points (electoral districts and localities). 10 SSUs were selected in Moscow, 5 SSUs - in S-Petersburg.

Totally **148** secondary sample points were selected.

Selection of households. On the **third stage** the households were selected systematically from the list of addresses. For that addresses has been registered by streets within selected electoral districts. Then the sample of addresses for the selection of households was randomly selected from the full list of registered addresses of sampled electoral districts and sampled rural localities. The sample of households was obtained from the sample of addresses by taking every household at each selected address.

Selection of respondents. On the **fourth stage** within a household a respondent was selected among eligible household members by the nearest birthday to the date of interviewing. If nobody at home or a member of a household selected as a respondent refused to participate in the survey, or if a household or a respondent was not achieved for 3 visits, the interviewer was required to visit the next address from the list of addresses. Substitutions of addresses are not allowed.

Fieldwork institute: institute which conducted the survey
Analytic Levada Center (Levada-Center)

Russian

Weight present: yes or no, whether a weighting factor exists in the data-set

Yes, exists

Weighting procedure: exact description of the weighting procedure / algorithm

The expected number N of respondents for a region/stratum was treated equal

$$N = N_0 * P,$$

where N_0 - the sample size, P - the share of the population of a region/stratum in the entire population.

The procedure of weighting was aimed at minimization of sum of squares of deviation of weighted survey data and statistical data by each of 9 socio-demographic groups by sex, age, education in each region/strata.

As a result of correction, every respondent $X[k]$ becomes supplied with definite weight coefficient $W[k]$ being within the limits $0 < W[k] < \sim 5$, so that the following conditions were valid:

1) the value of $\text{sum}(W[k])$ for a region/stratum concerned was equal to N and

2) for every controlled socio-demographic group $G[i]$ the value $Q[i]$ - a proportion of a group $G(i)$ in the weighted survey data - was equal to

$Q[i] = \text{sum}(W[ik]) / N$, where $[ik]$ means that respondent X_k belongs to a group $G[i]$, and $Q[i] \sim P[i]$, $i=1,2,\dots,9$; i.e. $Q[i]$ is close to $P[i]$ where $P[i]$ was a proportion of a group $G[i]$ in the population of a region/stratum

The value of J serves as the criterion for minimization of the weights' coefficient variety

being equal to the sum of squares:

$$J = \text{sum}((Q[i]-P[i])**2) + (\text{sum}(W[k])/N - 1)**2.$$

The set of values of J depends on the deviation of the survey data from the statistics. Used software programs are aimed at selecting the minimum value of J among them.

The weighting procedure is based on the Census 2010.

ISSP Study Description Form (Slovenia – ISSP 2010 and ISSP 2011)***Please use this form for reporting on Module 2006 and later!***

Study title: *Slovene Public Opinion Survey 2011/1 (Slovensko javno mnenje 2011/1): International Survey on Environment, Health and Slovenian public opinion*

Fieldwork dates: *start: 2011-03-09; end: 2011-06-15*

Principal investigators: *Mitja Hafner-Fink, Brina Malnar; Public Opinion and Mass Communication Research Centre (CJMMK), University of Ljubljana.*

Sample type: *Universe: The adult residents of SR Slovenia, older than 18 years, living on permanent address.*

Excluded: Institutionalised people.

Central Register of Population (a list of names and addresses constantly updated by public administration) is employed as a sampling frame.

*Sampling procedure: The sample is two-stage stratified random sample from Central Register of Population, where every population unit has equal probability of selection. First stage PSU selection is made by probability proportional to size of CEA (Clusters of Enumeration Areas) (150 PSUs). CEA are stratified according to 12 regions*6 type of settlement. At second stage systematic random selection inside CEA brings fixed numbers of persons (150x24) with name and address. Split-halves samples were used for parallel SJM surveys (2x1800).*

Fieldwork institute: *Public Opinion and Mass Communication Research Centre (CJMMK), University of Ljubljana.*

Fieldwork methods: *Personal interviews (pencil and paper with visuals)*

N. of respondents: *1082*

Details about issued sample:

Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: http://www.aapor.org/uploads/standarddefs_4.pdf. The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.

ISSP Study Description Form***Please use this form for reporting on Module 2006 and later!****Study title:* “Health Study-Turkey (Türkiye Sağlık Araştırması)”*Fieldwork dates:* **2011-11-26 to 2012-01-22***Principal investigators:* Istanbul Policy Center-IPC*Sample type:*

Sample observations are distributed across 26 NUT-2 regions according to population distribution. Then urban and rural population shares are applied to each region and urban and rural observations are obtained. From each region Statistical Institute of Turkey (SIT) was contacted to provide address blocks for urban settlements.

Each block contained 300 household addresses and 10 addresses were selected from each block on a simple random selection basis. For rural areas all rural settlements in every NUT region all villages were used to randomly select villages according to population weights of the villages. In every village the pre allotted number of interviews was 10 and thus villages are treated as city blocks. The number of villages to be contacted is determined accordingly.

Since no replacement was to be used we selected approximately twice the number of targeted interview household addresses. Every address is contacted at most 4 times to obtain a completed interview. Within the households all residents above the age of 18 are listed and a respondent from within this list is randomly selected. No quotas of any kind was applied.

Language(s): language or languages of the field instrument
Mandarin Chinese, Fukien dialect, or Hakka dialect

Weight present: yes or no, whether a weighting factor exists in the data-set
Yes

Weighting procedure: exact description of the weighting procedure / algorithm
The data was weighted using an iterative proportional raking scheme. For each respondent, sample data were weighted by sex, age, urbanization and education-degree groups. Weights were then generated to match the population characteristics of Taiwan area

Known systematic properties of sample: description of biases or other deviations of the sample
A non-response bias comes from the use of household registration data in which some household members in fact do not live in the household.

Deviations from ISSP esp. questions omitted, or added, or asked in a different format than the Basic Questionnaire prescribes

Study title: South African Social Attitudes Survey (SASAS)

Fieldwork dates: start dates: 2011-09-20, end date 2011-10-30

Principal investigators: Jare Struwig –Human Sciences Research Council

Sample type: A sample of 3500 respondents was selected throughout South Africa in 500 census enumerator areas (EAs) as determined in the 2001 census. Each EA was classified in terms of the dominant lifestyle category by the Human Sciences Research Council (HSRC) in its analysis of the 1996 census data. In order to ensure adequate representation in the sample from each province and from each of the four dominant population groups, the sample was stratified by province and by population group. Disproportionately large samples were selected from areas know to be inhabited by the two smallest components of the population, namely (i) areas with dominantly Indian populations and (ii) the Northern Cape. Within the EAs, the households were randomly selected and within the household, the respondent were selected using a Kish grid.

Fieldwork institute: Human Sciences Research Council

Fieldwork methods: Face to face

N. of respondents: 3004:

Details about issued sample:

In case of questions about the survey, please contact

Knut Kalgraff Skjåk or Kirstine Kolsrud,
E-mail: issp@nsd.uib.no

Norwegian Social Science Data Services,
Harald Hårfagresgt. 29
N 5007 Bergen
Norway

In publications (printed and electronic), lectures etc. using data from the survey, please give full reference, and send a printed or electronic copy to the Norwegian Social Science Data Services (NSD).

ISSP Study Description Form

Study title: International survey on Health

Fieldwork dates: 07.03.2012– 04.05.2012

Principal investigators: Kirstine Kolsrud and Knut Kalgraff Skjåk, NSD.

Sample type: The sample was a random sample of 3 800 individuals from the Central Register of Persons, born 1934 - 1993.

Fieldwork institute: TNS Gallup (contact and paper questionnaire administration) and NSD (web questionnaire administration)

Fieldwork methods: The main survey was conducted as a combined mail survey and web survey. A split ballot design testing contact procedures and mode preferences was used. See the SMQ for further details.

N. of respondents:

<i>Details about issued sample:</i> Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: http://www.aapor.org/uploads/standarddefs_4.pdf . The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.	1. Total number of starting or issued names/addresses (gross sample size) *	3800
	2. Returned questionnaire (1.0)	1834
	3. Eligible, Non-Interview	
	A. Refusal (2.11)	39
	B. Implicit refusal (blank questionnaire) (2.113)	8
	C. Break-off questionnaire too incomplete (2.12)	34
	D. Death (2.31)	1
	E. Physically or mentally unable (2.32)	
	F. Other (wrong person answered) (2.30)	9
	4. Unknown Eligibility, Non-Interview	
	G. Nothing ever returned (3.19)	1775
	H. Unknown Whereabouts, Mailing Returned Undelivered (3.30)	98
	I. Other (3.90)	
	5. Not Eligible	
	J. Abroad during fieldwork period (4.70)	2

* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

Language(s): Norwegian

Weight present: No

Weighting procedure:

Known systematic properties of sample: Gross sample:
No bias with respect to gender, age, marital status and place of living.
Net sample:

Younger people, single (never married) and people with lower education underrepresented.

*Deviations from ISSP
questionnaire:
Publications:*

Date and month of interview not provided

Characteristics of National Population

ISSP Characteristics of National Population

Each ISSP member is asked to include to the documentation the following information about known characteristics of its national population, from census or the best available estimates from government surveys or other high-quality data-sources:

- sex distribution of the population
- age distribution of the population
- education (years of schooling) of the population
- employment rate of the population
