Acknowledgements

Standard & Special Eurobarometer surveys are conducted on behalf of the Commission of the European Communities, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Ronald Inglehart (University of Michigan), collaborated in the design and analysis of the surveys and helped make the data available to the social science community through the Inter-university Consortium for Political and Social Research (ICPSR). Data cleaning and processing was supported by National Science Foundation grants.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences.

Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (<http://zacat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

1.2 Content

1.2.1 Abstract

Euro-Barometer 17 was conducted by Jacques-Rene Rabier, special advisor to the commission of the European communities; Helene Riffault of Faits et Opinions, and by Ronald Inglehart of the University of Michigan. This study is part of an on-going program of public opinion research sponsored by the European Community. The fieldwork was carried out by a consortium of European organizations in all ten nations of the European Community. Respondents for Euro-Barometer 17 were interviewed in March/April, 1982.

In addition to continuing to monitor attitudes on European integration, life satisfaction, and social goals, this study asks respondents about the sources of their information on the European Community and their opinions concerning media coverage of the EEC. Respondents were asked a series of questions concerning energy problems and use, with particular attention paid to nuclear power. Opinions were also obtained concerning the proper level of government – local, national, or European – to perform various regulatory functions. In addition, a special sample of youths aged 15 through 24 were asked about their education and employment prospects and about their life and interests.

1.3 Universe

The samples of Eurobarometer 17 are designed to be representative for the national population aged 15 years and over of the 10 European Community member countries, resident in and citizen of the respective country. Two separate samples have been drawn in the United Kingdom (Great Britain and Northern Ireland).

In addition a second sample was drawn in each country (except the region of Northern Ireland) which consisted entirely of respondents aged 15 through 24 (youth oversample).

1.4 Sampling procedure

1) Geographical distribution

The survey covers the whole territory of the ten countries, i.e. 127 regions (excluding Corsica and Val d'Aoste). In each country a random selection of sampling points is made in such a way that all types of area (urban, rural, etc.) are represented in proportion of their populations. The interviews are distributed in more or less 1.150 sampling points.

The sampling designs were either multi-stage national probability samples or national stratified quota samples.

2) Choice of respondents

Within these sampling points the individuals to be interviewed are chosen:

a) at random from the population or electoral lists in those countries where access to suitable lists of individuals or households is possible: Belgium, Denmark, Luxembourg, Netherlands;

b) by quota sampling in France, Italy, United Kingdom and Ireland. In these cases the quota are established by sex, age and occupation on the basis of census data.

c) by a 'random route' procedure in Greece.

The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

Each national survey was conducted by a professional polling agency.

1.6 Mode of data collection

Each national survey was conducted by a professional polling agency, face-to-face and in the adequate national language(s).

The study staff at faits et opinions for Euro-Barometer 17 developed an equivalent French and British questionnaire for this study. These questionnaires were translated into other languages by the national polling firms who conducted the surveys.

1.7 Weighting

In general the Eurobarometer datasets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

The **post-stratification weight**, also referred to as redressment or non-response weight, carries out comparisons between the sample composition and a proper universe description with respect to selected attributes such as sex, age or region. The availability of this weight over time and for individual countries is documented in table 2. Until Eurobarometer 31 the corresponding variable is labelled NATION WEIGHT II. Only starting with Eurobarometer 32 post-stratification weights are available continuously and for all samples.

Until Eurobarometer 6 underrepresented rural cases for FRANCE are duplicated; duplicate case indicators (weights) are only available for ECS1970, ECS1971 and Eurobarometer 2. In ECS1971 and ECS1973 a special weighting factor for the NETHERLANDS indicates the number of times that a case is duplicated in the Dutch part of the dataset; the duplication scheme is not documented.

The **population size weighting** factor corrects for the fact that sample sizes do not depend on how large or small the populations are from which they are drawn.

The NATION WEIGHT I (or UK weight) ensures that both samples, Great Britain and Northern Ireland, are represented in proportion to its population size within the United Kingdom as a whole. Starting with

Eurobarometer 19 the UK weight also includes the available post-stratification weighting factors for other countries.

The EUROPEAN WEIGHT adjusts each sample in proportion to its share in the total population, aged 15 and over, of the European Community as a whole in its respective composition. Only starting with Eurobarometer 7 the EUROPEAN WEIGHT includes the available post-stratification weighting factors. Starting with Eurobarometer 32 former states in the enlargement process are also considered (EU6, EU10).

The post-stratification weights are at the users' disposal for descriptive (univariate) analysis. Population size weighting is required to obtain meaningful descriptive results for the United Kingdom or the European Community as a whole. For multivariate analysis weighting is not recommended. Official Eurobarometer reports are based on weighted data.

The YOUTH OVERSAMPLES* in Eurobarometer 17 and 28.1 are weighted separately and across ALL samples as documented in the respective study and weight variable description.

The dataset for Eurobarometer 17 contains three sets of weights, each consisting of a European weight variable and a nation weight variable. Within each set, the nation weight adjusts the samples of each of the ten nations in order to produce a representative sample for each country.

The inclusion of the U.K. weighting factor within the nation weight represents a slight modification of past processing practice. In the administration of the Eurobarometers, samples of Great Britain and of Northern Ireland are drawn independently of each other. Thus, a weighting factor for the United Kingdom is necessary to maintain the representativeness of the United Kingdom sample. By application of this weighting factor, the n for Northern Ireland is very much reduced and that for Great Britain increased somewhat.

In past Eurobarometers, up to and including Baro 16, a separate U.K. weight was created by extracting the U.K. values from the nation weight. In the nation weight, after the extraction of the U.K. weight factor, northern Ireland and great Britain were not weighted (i.e., were given a value of '1') and Northern Ireland was retained as a separate entity in the Nation I.D. variable. Codebook frequencies were generated for each category of the Nation I.D. variable using the revised nation weight which, since the U.K. weight factor was eliminated, produced meaningful frequencies for Northern Ireland's entries.

In Eurobarometer 17 all of the weights provided by faits et opinions weighted all the national samples, including the British and Northern Irish samples. It was thus impossible to extract the U.K. weight factor from the other weight factors employed within each of the two U.K. samples (i.e., Great Britain and Northern Ireland). Even if it had been possible, the creation of such a weight would have rendered even more cumbersome an already complex weighting scheme. Therefore, beginning in Eurobarometer 17, the U.K. weight will no longer be produced as a separate variable. The weighting factor for the U.K. will be left embedded in the nation weights.

In conformity with the practice of the European Commission and the European Survey Archive, Great Britain and Northern Ireland are combined into one code in a ten-category Nation I.D. variable (var. No. 5). Another Nation I.D. variable (var. No. 6) is also included which has 11 separate categories, including separate codes for Great Britain and Northern Ireland.

The European weight within each set of weights produces a representative sample of the European Community as a whole when used in analysis. This variable adjusts the size of each national sample according to each nation's contribution to the population of the European Community. This weight also adjusts the samples of each of the ten nations in order to produce an internal representative sample for each country.

Three different sets of weights (where a set consists of a) the European weight and b) the nation weight, in which the U.K. weight is embedded) are provided due to the existence in Eurobarometer 17 of a special youth sample as well as the standard cross-section sample. (see sampling design, p. Iv for a fuller explanation of the samples.)

Each of these weights is designed to produce a representative cross-section sample of each nation's population. There are several sets of weights because some questions in the survey were asked of only the cross-section sample and not of the special youth sample. The cross-section sample also included some respondents between the ages of 15 and 25. In order to maintain representativeness, these young cross-section respondents should have one set of weight values (in v9-v10) to be used with questions which were asked of the special youth sample, and another set of weight values (in v7-v8) to be used with questions not asked of the special sample. The third set of weights (v11-v12) was necessary because in Germany a very small number of questions was asked of both the cross-section sample and the special youth sample, while in other countries they were asked only of the cross-section sample.

Which of the three sets of weights should be used with a particular question depends upon which samples were administered that question.

The first set of weights (var. Nos. 7 and 8) is to be used with var. Nos. 150-234. These are the questions which were asked only of those respondents in the standard cross-section sample, i.e. not asked of those in the youth sample.

The second set (var. Nos. 9 and 10) is to be used with var. Nos. 13-142 and 235-254. All of these questions were asked of respondents in the youth sample. Most of these questions were asked of the cross-section sample as well.

The final set of weights (var. Nos. 11 and 12) should be used with var. Nos. 143-149. In Germany, these questions were asked of respondents in both the cross-section and the youth sample. In all other countries, they were asked only of those in the cross-section sample.

1.8 Data preparation

The data received by the ICPSR archive from faits et opinions were first checked for missing or duplicate records. The data were then checked for illegal (wild) codes and inconsistencies were recoded to appropriate values or missing data. The region, province, income and party preference variables were then constructed from individual variables and recoded. Users should be aware that this process produced geographic and income coding schemes for some countries that are not in all cases comparable to those in earlier Euro-Barometers. Machine-readable documentation was created for the dataset, including unweighted frequency tables (in the updated ZA version of the ICPSR codebook). Indices were included as created by the original investigators.

The data are available from the Consortium in two forms, a card image file or an OSIRIS data set. The card image file contains several decks per respondent in a format based on 80 column punched cards. The decks for each respondent are sorted in ascending order. There are two components to the OSIRIS dataset. The OSIRIS dictionary gives the location and format of each variable in the OSIRIS data file. The OSIRIS data file is constructed with a single logical record, with a length of 295, per respondent. The data file can be accessed by software packages which do not use the dictionary by specifying the column location of the desired variables. These locations are contained in the OSIRIS dictionary or in this codebook.

2 Eurobarometer Series Description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

		Norway	NO	1000	

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 4: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.2OVR, 55.1OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.2OVR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 5) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 5: Overview of Eurobarometer surveys with standard EU and trend question modules

Standard and trend surveys	Fieldwork Dates	GESIS ID	Standard Report	Special topic	Subset

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

3 Dataset structure and standards

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 6: ZEUS Party Family Code (slightly modified)

Category		Party Family
0	(001-099)	not affiliated / electoral alliances across "families"
1	(100-199)	Communists
2	(200-299)	Socialists
3	(300-399)	Liberals
4	(400-499)	Christian Democrats
5	(500-599)	Conservatives
6	(600-699)	Extreme Rights / Nationalists
7	(700-799)	Regionalists / Ethnic
8	(800-899)	Environmental parties
9	(900-949)	Agricultural parties
9	(950-989)	other special issue parties (e.g. Eurosceptics) and independents
	990	other (spontaneous)
	994	not voting age
	995	empty ballot (blank) or invalid vote
	996	not voted / would not vote
	997	Refused
	998	DK / DK+NA if NA not coded separately
	999	INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION - ALL SAMPLES ISO 3166).

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (-1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded "real" values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission's official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

CROSS-TABULATION: The absolute frequencies of the occurrence of values (<i>absolute values</i>) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies (<i>row percent</i>) refer to the valid cases (<i>n valid sum</i>), i.e. the total number of cases (<i>n sum</i>) reduced by the number of cases defined as missing data (<i>M</i>). For display and place saving reasons excluded countries or areas may be completely dropped from the table.																																																																																																																																																																																																																																																																																																																																																					
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (<i>M</i>), i.e. <i>percent</i> on the basis of all cases (<i>sum</i>) and <i>valid percent</i> on the basis of the <i>valid cases</i> .																																																																																																																																																																																																																																																																																																																																																					

5 Variable Documentation

Variable, Label

Question Text (English Language)

v1 - ICPSR/ZA STUDY NUMBER

ARCHIVE STUDY NUMBER

v1

Value	Label	Missing	Count	Percent	Valid Percent
1208			11772	100.0	100.0
	Sum		11772	100.0	100.0
	Valid Cases		11772		

v2 - ICPSR EDITION NUMBER

ICPSR EDITION NUMBER-1

THE NUMBER IDENTIFYING THE RELEASE EDITION OF THIS DATASET.

1 FALL 1983 RELEASE

Note:

Please see variable VERSION ("GESIS ARCHIVE VERSION") for further information on the version number of this data set and the corresponding release date.

v2

Value	Label	Missing	Count	Percent	Valid Percent
1	FALL 1983 RELEAS		11772	100.0	100.0
	Sum		11772	100.0	100.0
	Valid Cases		11772		

version - GESIS ARCHIVE VERSION

VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

On occasion of the implementation of this versioning scheme (2010-04-13), the default version number 1.0.0 has been created automatically for this Eurobarometer.

Version 1.0.1 adds the crosstabulation variable ISOCNTRY and the VERSION variable to the otherwise unchanged data set.

Former version or edition identification variables are maintained unchanged as a reference to former releases.

version

Value	Label	Missing	Count	Percent	Valid Percent
1.0.1 (2012-07-01)			11772	100.0	100.0
	Sum		11772	100.0	100.0
	Valid Cases		11772		

v3 - ICPSR PART NUMBER

ICPSR PART NUMBER

THE NUMBER IDENTIFYING THIS PART OF A 1-PART STUDY.

v3

Value	Label	Missing	Count	Percent	Valid Percent
101			1199	10.2	10.2
102			1210	10.3	10.3
103			1228	10.4	10.4
104			1425	12.1	12.1

108			1181	10.0	10.0
109			1136	9.7	9.7
110			283	2.4	2.4
111			1199	10.2	10.2
	Sum		11772	100.0	100.0
	Valid Cases		11772		

v4 - RESPONDENT ID - APPOINTED BY ICPSR

ICPSR RESPONDENT ID

THIS VARIABLE WAS CREATED BY THE ICPSR TO GIVE A UNIQUE NUMBER TO EACH CASE IN THE DATA FILE. THIS NUMBER REPLACES THE ORIGINAL ID VARIABLE WHICH DID NOT ASSIGN A UNIQUE NUMBER TO EACH CASE.

isocntry - NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

11	GREECE		1199	10.2	10.2
	Sum		11772	100.0	100.0
	Valid Cases		11772		

v7 - NATION WEIGHT I - STAND CROSS

NATION WEIGHT - CROSS SECTION ONLY - Q.228-Q.259

Note:

BEFORE USING THIS VARIABLE, THE USER SHOULD READ CAREFULLY THE INTRODUCTION TO THIS CODEBOOK,
ESPECIALLY THE WEIGHTING INFORMATION SECTION, P.V.

v8 - EUROPEAN WEIGHT - STAND CROSS

EUROPEAN WEIGHT - CROSS SECTION ONLY - Q.228 TO Q.259

Note:

BEFORE USING THIS VARIABLE, THE USER SHOULD READ CAREFULLY THE INTRODUCTION TO THIS CODEBOOK,
ESPECIALLY THE WEIGHTING INFORMATION SECTION, P.V.

v9 - NATION WEIGHT I - YOUTH SAMPLE

NATION WEIGHT - YOUTH AND CROSS SECTION - Q.119 TO Q.220 AND Q.260 TO Q.280

Note:

BEFORE USING THIS VARIABLE, THE USER SHOULD READ CAREFULLY THE INTRODUCTION TO THIS CODEBOOK,
ESPECIALLY THE WEIGHTING INFORMATION SECTION, P.V.

v10 - EUROPEAN WEIGHT - YOUTH SAMPLE

EUROPEAN WEIGHT - YOUTH AND CROSS SECTION - Q.119 TO Q.220 AND Q.260 TO Q.280

Note:

BEFORE USING THIS VARIABLE, THE USER SHOULD READ CAREFULLY THE INTRODUCTION TO THIS CODEBOOK,
ESPECIALLY THE WEIGHTING INFORMATION SECTION, P.V.

v11 - NATION WEIGHT - COMBINATION

NATION WEIGHT - COMBINATION - Q.221 TO Q.227

Note:

BEFORE USING THIS VARIABLE, THE USER SHOULD READ CAREFULLY THE INTRODUCTION TO THIS CODEBOOK,
ESPECIALLY THE WEIGHTING INFORMATION SECTION, P.V.

ACTUAL NUMBER IS CODED.

v12 - EUROPEAN WEIGHT - COMBINATION

EUROPEAN WEIGHT - COMBINATION - Q.221 TO Q.227

Note:

BEFORE USING THIS VARIABLE, THE USER SHOULD READ CAREFULLY THE INTRODUCTION TO THIS CODEBOOK,
ESPECIALLY THE WEIGHTING INFORMATION SECTION, P.V.

ACTUAL NUMBER IS CODED.

v13 - OCCUPATION OF RESPONDENT - YOUTH

Q.119

QUESTIONS 119 TO 141 ARE TO BE ASKED ONLY OF RESPONDENTS AGED 15 TO 24 (IN BOTH THE CROSS-SECTION AND THE YOUTH SAMPLES)

WHAT IS YOUR PRESENT OCCUPATION?

- 0 DK; NA
- 1 FULL-TIME PAID EMPLOYMENT
- 2 PART-TIME PAID EMPLOYMENT
- 3 STILL STUDYING, SCHOOL, COLLEGE, ETC...
- 4 TRAINEE, APPRENTICE, TRAINING ON THE JOB, SPECIALIZED JOB TRAINING CENTER, ETC
- 5 UNEMPLOYED OR LOOKING FOR WORK
- 6 NONE OF THE ABOVE, WITHOUT PAID EMPLOYMENT
- 7 MILITARY SERVICE, NATIONAL SERVICE (IN COUNTRIES WHERE THIS EXISTS)
- 8 OTHER
- 9 INAP; ASKED ONLY OF RESPONDENTS AGED 15 TO 24

Note:

THIS VARIABLE USES WEIGHT VARIABLES 9 AND 10.

v33 - UNEMPLOYED REASON SUMMARY (RECODED)

Q.131R

SUMMARY (IF R IS UNEMPLOYED) WHAT IS THE MAIN REASON YOU ARE UNEMPLOYED?

0 INAP., ASKED ONLY OF UNEMPLOYED RESPONDENTS AGED 15 TO 24

1 THE JOBS I HAVE BEEN OFFERED DO NOT REALLY APPEAL TO ME.

2 I CAN GET AT LEAST AS MUCH MONEY ON THE DOLE AS I COULD IN A JOB.

3 THERE ARE NO JOBS AVAILABLE WHICH SUIT MY TRAINING OR QUALIFICATIONS.

4 THERE ARE ABSOLUTELY NO JOBS AVAILABLE IN MY AREA.

5 OTHER REASONS

9 DK; NA

Note:

THIS VARIABLE WAS CREATED USING THE DATA IN Q.131A-Q.131E IN ORDER TO PROVIDE THE USER WITH A MORE EASILY USABLE VERSION OF THE INFORMATION CONTAINED IN THESE VARIABLES. ONLY TWO RESPONDENTS IN THE DATASET WERE CODED "MENTIONED" IN MORE THAN ONE OF THE VARIABLES IN THE Q.131A-Q.131E SERIES. IN BOTH CASES, THE RESPONDENTS HAD MENTIONED ONE OF THE LISTED SUBSTANTIVE REASONS AND "OTHER REASON." IN THIS VARIABLE, THESE TWO RESPONDENTS ARE CODED ACCORDING TO THE LISTED REASON THEY MENTIONED; THEIR MENTION OF "OTHER REASONS" IS IGNORED.

THIS VARIABLE USES WEIGHT VARIABLES 9 AND 10.

v90 - FUTURE FEARS - MOST WORRYING 1ST

Q.148

QUESTIONS 142-220 TO BE ASKED OF ALL RESPONDENTS -- ADULTS AND YOUNG

HERE ARE SOME KINDS OF FEARS WHICH ARE SOMETIMES EXPRESSED ABOUT THE FUTURE (SAY THE NEXT 10 OR 15 YEARS) OF THE WORLD WE LIVE IN. I WOULD LIKE YOU TO TELL ME WHICH OF THE FOLLOWING REALLY CONCERN YOU OR WORRY YOU?

Q.149

AMONG THOSE THAT DO WORRY YOU, WHICH ONE IS THE MOST WORRYING?

0 DK; NA

1 MORE AND MORE ARTIFICIAL THINGS ARE COMING INTO THE LIFE WE LEAD (HOUSING, TRAFFIC, FOOD, ETC...)

2 THE DESPOILING OF NATURAL LIFE AND THE COUNTRYSIDE BY POLLUTION OF ALL KINDS

3 INCREASE IN UNEMPLOYMENT AS A CONSEQUENCE OF THE AUTOMATION OF JOBS

4 (YOUR COUNTRY'S) LOSS OF INFLUENCE IN EUROPE

5 A PROLONGED BREAKDOWN IN SUPPLIES OF OIL AND NATURAL GAS

6 THE INVASION OF OUR COUNTRY BY LOW PRICED PRODUCTS FROM THE FAR EAST

7 A CRITICAL DETERIORATION IN INTERNATIONAL RELATIONS

8 A RISE IN TENSIONS BETWEEN DIFFERENT GROUPS IN OUR SOCIETY RESULTING IN SERIOUS AND LASTING DISORDERS

9 A REDUCTION IN THE INFLUENCE OF WESTERN EUROPE IN THE WORLD

10 THE RISK THAT NEW MEDICAL OR PHARMACEUTICAL DISCOVERIES MAY SEVERELY AFFECT THE HUMAN PERSONALITY

11 RISE IN CRIME AND TERRORISM

v129 - EUROPEAN VS NATIONAL GOVERNMENT

Q.211

QUESTIONS 142-220 TO BE ASKED OF ALL RESPONDENTS -- ADULTS AND YOUNG

THERE ARE TWO WAYS OF LOOKING AT THE MORE DISTANT FUTURE OF THE EUROPEAN COMMUNITY: -SOME PEOPLE THINK THE COMMUNITY SHOULD NOT ONLY HAVE A DIRECTLY ELECTED PARLIAMENT, BUT ALSO AN ACTUAL GOVERNMENT WHICH WOULD HAVE THE FINAL SAY IN DECISIONS IN SOME IMPORTANT AREAS. -OTHERS THINK THAT THE INDIVIDUAL GOVERNMENTS OF MEMBER COUNTRIES SHOULD HAVE THE FINAL SAY. WHICH OF THESE TWO COMES NEAREST TO YOUR WAY OF THINKING?

0 DK; NA

1 AN ACTUAL EUROPEAN GOVERNMENT

2 NATIONAL GOVERNMENT TO HAVE THE FINAL SAY

3 OTHER RESPONSE (SPONTANEOUS)

Note:

v138 - SOC MOVEMENT JOIN: ANTI-NUCL POWER

Q.214

QUESTIONS 142-220 TO BE ASKED OF ALL RESPONDENTS -- ADULTS AND YOUNG

THERE ARE A NUMBER OF GROUPS AND MOVEMENTS SEEKING THE SUPPORT OF THE PUBLIC. FOR EACH OF THE FOLLOWING MOVEMENTS, CAN YOU TELL ME--- A) WHETHER YOU APPROVE (STRONGLY OR SOMEWHAT) OR YOU DISAPPROVE (SOMEWHAT OR STRONGLY)? B) WHETHER YOU ARE A MEMBER OR MIGHT PROBABLY JOIN OR WOULD CERTAINLY NOT JOIN?

Q.216B

MOVEMENTS CONCERNED WITH STOPPING THE CONSTRUCTION OR USE OF NUCLEAR POWER PLANTS

0 DK; NA

1 IS A MEMBER

2 MIGHT JOIN

3 WOULD NOT JOIN

Note:

THIS VARIABLE USES WEIGHT VARIABLES 9 AND 10.

v149 - ATTIT TOW USA - PRO/ANTI-AMERICAN

Q.227

Q.221 TO Q.227 WERE ONLY ASKED OF RESPONDENTS IN THE CROSS-SECTION SAMPLES IN FRANCE, ITALY, GREAT BRITAIN AND GREECE AND OF ALL RESPONDENTS IN BOTH SAMPLES IN GERMANY
RECENTLY, THERE HAS BEEN SOME EXPRESSION OF ANTI-AMERICAN FEELINGS AMONG WEST-EUROPEANS. HOW WOULD YOU DESCRIBE YOUR OWN FEELINGS? STRONGLY ANTI-AMERICAN, SOMEWHAT ANTI-AMERICAN, SOMEWHAT PRO-AMERICAN OR STRONGLY PRO-AMERICAN?

0 DK; NA

1 STRONGLY ANTI-AMERICAN

2 SOMEWHAT ANTI-AMERICAN

3 NEITHER ANTI-AMERICAN NOR PRO-AMERICAN (VOLUNTEERED - NOT TO BE READ BY INTERVIEWER)

4 SOMEWHAT PRO-AMERICAN

5 STRONGLY PRO-AMERICAN

Note:

THIS VARIABLE USES WEIGHT VARIABLES 11 AND 12.

v150 - ENERGY PROBLEM - TODAY

Q.228

QUESTIONS 228 TO 258 ASKED IN CROSS-SECTION ONLY IN ALL COUNTRIES

DO YOU THINK THERE IS AN ENERGY PROBLEM IN (YOUR COUNTRY TODAY? IF YES, DO YOU THINK IT IS VERY SERIOUS, FAIRLY SERIOUS OR NOT VERY SERIOUS?

- 0 DK; NA
- 1 VERY SERIOUS
- 2 FAIRLY SERIOUS
- 3 NOT VERY SERIOUS
- 4 NO PROBLEM

Note:

THIS VARIABLE USES WEIGHT VARIABLES 7 AND 8.

v152 - ENERGY PROBLEMS - SOLUTION 1ST

Q.230

QUESTIONS 228 TO 258 ASKED IN CROSS-SECTION ONLY IN ALL COUNTRIES

DIFFERENT POSSIBILITIES CAN BE THOUGHT OF AS SOLUTIONS TO THE PROBLEM OF (YOUR COUNTRY'S) ENERGY SUPPLIES. WHICH SOLUTION DO YOU FEEL IS MOST APPROPRIATE?

0 DK; NA

1 TO BUY OR CONTINUE TO BUY FROM ABROAD TO MAKE UP FOR ANY SHORTFALL IN ENERGY SUPPLIES

2 TO ENCOURAGE THE RESEARCH NEEDED TO SOLVE THE TECHNICAL PROBLEMS OF, AND PUT INTO PRACTICE METHODS OF RENEWABLE ENERGY (SOLAR POWER, ENERGY FROM BIOLOGICAL SOURCES, TIDAL POWER, ETC...)

3 TO DEVELOP OR INCREASE PRODUCTION OF NUCLEAR POWER

4 TO INCREASE OR RENEW EXPLOITATION OF ENERGY FROM TRADITIONAL SOURCES (E.G. COAL, LIGNITE OR BROWN COAL, PEAT)

5 TO SAVE ENERGY

Note:

THIS VARIABLE USES WEIGHT VARIABLES 7 AND 8.

v161 - ENERGY SAVING COULD: ELECTR APPLIANCES

Q.233

QUESTIONS 228 TO 258 ASKED IN CROSS-SECTION ONLY IN ALL COUNTRIES

ON THESE DIFFERENT (ENERGY-SAVING) POINTS, DO YOU FEEL THAT YOU COULD PERSONALLY MAKE MORE SAVINGS THAN YOU DO NOW? COULD YOU ...

Q.233D ECONOMISE IN LIGHTING OR THE USE OF OTHER ELECTRICAL APPLIANCES YOU HAVE IN YOUR HOME.

1 MENTIONED

2 NOT MENTIONED

Note:

THIS VARIABLE USES WEIGHT VARIABLES 7 AND 8.

v175 - INDUSTR RISK NEAR: HYDRO POWER DAM

Q.235

QUESTIONS 228 TO 258 ASKED IN CROSS-SECTION ONLY IN ALL COUNTRIES

ON THIS LIST YOU WILL FIND A NUMBER OF DIFFERENT KINDS OF INDUSTRIAL INSTALLATIONS. AMONG THESE COULD YOU SELECT 3 WHICH IN YOUR OPINION, CREATE THE GREATEST RISKS FOR PEOPLE LIVING NEARBY? DOES ...

Q.235J A DAM PRODUCING HYDRO ELECTRIC POWER?

1 MENTIONED

2 NOT MENTIONED

v176 - NUCLEAR POWER PLANT - LIVING NEAR

Q.236

QUESTIONS 228 TO 258 ASKED IN CROSS-SECTION ONLY IN ALL COUNTRIES

DO YOU KNOW IF IN THE AREA WHERE YOU LIVE THERE IS A NUCLEAR POWER STATION, ACTUALLY WORKING, OR ONE BEING BUILT, OR ONE IN THE PLANNING STAGES?

- 0 DK; NA
- 1 ACTUALLY WORKING
- 2 ONE BEING BUILT
- 3 ONE IN THE PLANNING STAGES
- 4 NONE

Note:

THIS VARIABLE USES WEIGHT VARIABLES 7 AND 8.

v177 - NUCLEAR POWER PLANT - DISTANCE

Q.237

QUESTIONS 228 TO 258 ASKED IN CROSS-SECTION ONLY IN ALL COUNTRIES

(IF CODED 1, 2 OR 3 IN Q.236)

HOW FAR AWAY FROM YOUR HOME IS THIS ACTUAL OR PLANNED NUCLEAR POWER STATION?

0 DK; NA; INAP., CODED 0 OR 4 IN Q.236

1 LESS THAN 3 MILES

2 3 TO 6 MILES

3 7 TO 30 MILES

4 31 TO 60 MILES

5 MORE THAN 60 MILES

Note:

IF MORE THAN ONE, DISTANCE TO NEAREST PLANT. THIS VARIABLE USES WEIGHT VARIABLES 7 AND 8.

v178 - NUCLEAR POWER - RISK EVALATION

Q.238

QUESTIONS 228 TO 258 ASKED IN CROSS-SECTION ONLY IN ALL COUNTRIES

ALL NEW DEVELOPMENT IN THE INDUSTRIAL FIELD IMPLIES EFFORT, TIME AND MONEY, IT MAY ALSO INVOLVE RISK.

HERE ARE 3 OPINIONS ABOUT THE DEVELOPMENT OF NUCLEAR POWER STATIONS, WHICH USE ATOMIC ENERGY FOR THE PRODUCTION OF ELECTRICITY. WHICH OF THESE 3 STATEMENTS COMES CLOSEST TO YOUR OWN OPINION ON THE DEVELOPMENT OF NUCLEAR POWER?

- 0 DK; NA
- 1 IT IS WORTHWHILE
- 2 NO PARTICULAR INTEREST
- 3 THE RISKS INVOLVED ARE UNACCEPTABLE

Note:

THIS VARIABLE USES WEIGHT VARIABLES 7 AND 8.

Q.239

QUESTIONS 228 TO 258 ASKED IN CROSS-SECTION ONLY IN ALL COUNTRIES

SOME SAY THAT IF WE DON'T CONTINUE TO DEVELOP NUCLEAR POWER, WE SHALL SOON HAVE TO CUT DOWN ON ELECTRICITY CONSUMPTION. DO YOU THINK THIS IS TRUE OR NOT?

- 0 DK; NA
- 1 TRUE
- 2 NOT TRUE

Note:

THIS VARIABLE USES WEIGHT VARIABLES 7 AND 8.

v180 - ELECTR CUT W/O NUCLEAR POWER - SERIOUS

Q.240

QUESTIONS 228 TO 258 ASKED IN CROSS-SECTION ONLY IN ALL COUNTRIES

AND SUPPOSING IT WERE TRUE; DO YOU THINK THIS WOULD BE A VERY SERIOUS SITUATION, SOMEWHAT SERIOUS, NOT SO SERIOUS, OR NOT AT ALL SERIOUS?

- 0 DK; NA
- 1 VERY SERIOUS
- 2 SOMEWHAT SERIOUS
- 3 NOT SO SERIOUS
- 4 NOT AT ALL SERIOUS

v181 - NUCLEAR EXPLOSION - PROBABILITY

Q.241

QUESTIONS 228 TO 258 ASKED IN CROSS-SECTION ONLY IN ALL COUNTRIES

PEOPLE HAVE BEEN TALKING ABOUT THE POSSIBILITY OF ACCIDENTS TAKING PLACE IN NUCLEAR POWER PLANTS.

WHAT ABOUT A NUCLEAR EXPLOSION LIKE THAT OF THE BOMB USED IN JAPAN IN WORLD WAR II. WOULD YOU SAY

THAT AN EXPLOSION OF THIS TYPE IN ONE OF THE NUCLEAR POWER PLANTS NOW OPERATING IS VERY LIKELY,

SOMEWHAT LIKELY, NOT VERY LIKELY, OR TECHNICALLY IMPOSSIBLE?

0 DK; NA

1 VERY LIKELY

2 SOMEWHAT LIKELY

3 NOT VERY LIKELY

4 TECHNICALLY IMPOSSIBLE

Note:

THIS VARIABLE USES WEIGHT VARIABLES 7 AND 8.

v191 - NUCLEAR POWER: NOT WORTHWHILE

Q.244

QUESTIONS 228 TO 258 ASKED IN CROSS-SECTION ONLY IN ALL COUNTRIES

A NUMBER OF OTHER THINGS ARE SAID ABOUT NUCLEAR POWER STATIONS. FOR EACH STATEMENT I READ TO YOU,
COULD YOU TELL ME WHETHER YOU TEND TO AGREE OR DISAGREE?

Q.244F TAKING EVERYTHING INTO ACCOUNT, PRODUCING ELECTRICITY BY NUCLEAR POWER IS NOT REALLY
WORTHWHILE

0 DK; NA

1 TEND TO AGREE

2 TEND TO DISAGREE

Note:

THIS VARIABLE USES WEIGHT VARIABLES 7 AND 8.

v192 - NUCLEAR POWER: EXPANSION DANGEROUS

Q.244

QUESTIONS 228 TO 258 ASKED IN CROSS-SECTION ONLY IN ALL COUNTRIES

A NUMBER OF OTHER THINGS ARE SAID ABOUT NUCLEAR POWER STATIONS. FOR EACH STATEMENT I READ TO YOU,
COULD YOU TELL ME WHETHER YOU TEND TO AGREE OR DISAGREE?

Q.244G THE EXPANSION OF THE NUMBER OF NUCLEAR POWER STATIONS IS DANGEROUS.

0 DK; NA

1 TEND TO AGREE

2 TEND TO DISAGREE

Note:

v193 - NUCLEAR POWER: SAFETY MEASURES SUFFIC

Q.244

QUESTIONS 228 TO 258 ASKED IN CROSS-SECTION ONLY IN ALL COUNTRIES

A NUMBER OF OTHER THINGS ARE SAID ABOUT NUCLEAR POWER STATIONS. FOR EACH STATEMENT I READ TO YOU,
COULD YOU TELL ME WHETHER YOU TEND TO AGREE OR DISAGREE?

Q.244H THE SAFETY MEASURES TAKEN AT NUCLEAR POWER STATIONS ELIMINATE NEARLY ALL THE DANGER.

0 DK; NA

1 TEND TO AGREE

2 TEND TO DISAGREE

v194 - NUCLEAR POWER: DANGEROUS BY NATURE

Q.244

QUESTIONS 228 TO 258 ASKED IN CROSS-SECTION ONLY IN ALL COUNTRIES

A NUMBER OF OTHER THINGS ARE SAID ABOUT NUCLEAR POWER STATIONS. FOR EACH STATEMENT I READ TO YOU,
COULD YOU TELL ME WHETHER YOU TEND TO AGREE OR DISAGREE?

Q.244I THE NUMEROUS SYSTEMS OF SECURITY PRECAUTIONS ARE A CLEAR INDICATION THAT BY THEIR VERY NATURE
POWER STATIONS ARE DANGEROUS.

0 DK; NA

1 TEND TO AGREE

2 TEND TO DISAGREE

Note:

THIS VARIABLE USES WEIGHT VARIABLES 7 AND 8.

v200 - ENERGY INFO: RADIO

Q. 247

QUESTIONS 228 TO 258 ASKED IN CROSS-SECTION ONLY IN ALL COUNTRIES

I AM GOING TO MENTION DIFFERENT WAYS IN WHICH WE GET INFORMATION ABOUT ENERGY PROBLEMS IN GENERAL.
FOR EACH ONE, CAN YOU TELL ME WHETHER IN YOUR OPINION THEY KEEP PEOPLE LIKE YOURSELF WELL INFORMED,
BADLY INFORMED OR GIVE NO INFORMATION ON ENERGY PROBLEMS?

Q. 247_3

RADIO

0 DK; NA

1 WELL

2 BADLY

3 NOT AT ALL

v202 - ENERGY INFO: SCHOOL/UNIVERSITY

Q. 247

QUESTIONS 228 TO 258 ASKED IN CROSS-SECTION ONLY IN ALL COUNTRIES

I AM GOING TO MENTION DIFFERENT WAYS IN WHICH WE GET INFORMATION ABOUT ENERGY PROBLEMS IN GENERAL.
FOR EACH ONE, CAN YOU TELL ME WHETHER IN YOUR OPINION THEY KEEP PEOPLE LIKE YOURSELF WELL INFORMED,
BADLY INFORMED OR GIVE NO INFORMATION ON ENERGY PROBLEMS?

Q. 247_5

SCHOOLS AND UNIVERSITIES

- 0 DK; NA
- 1 WELL
- 2 BADLY
- 3 NOT AT ALL

v240 - HOUSEHOLD - SIZE

Q.269

ASKED OF BOTH SAMPLES IN ALL COUNTRIES

HOW MANY PERSONS LIVE IN YOUR HOME, INCLUDING YOURSELF, ALL ADULTS AND CHILDREN?

- 1 ONE
- 2 TWO
- 3 THREE
- 4 FOUR
- 5 FIVE
- 6 SIX
- 7 SEVEN
- 8 EIGHT
- 9 NINE

Note:

THIS VARIABLE USES WEIGHT VARIABLES 9 AND 10.

v246 - INCOME HH

Q.272

ASKED OF BOTH SAMPLES IN ALL COUNTRIES

WE WOULD LIKE TO ANALYSE THE SURVEY RESULTS ACCORDING TO THE INCOME OF PERSONS INTERVIEWED. SHOW
INCOME CARD: HERE IS A SCALE OF INCOMES AND WE WOULD LIKE TO KNOW IN WHAT GROUP YOUR FAMILY IS,
COUNTING ALL WAGES, SALARIES, PENSIONS AND ANY OTHER INCOME THAT COMES IN. JUST GIVE ME THE NUMBER
OF THE GROUP YOUR HOUSEHOLD FALLS INTO BEFORE TAX AND OTHER DEDUCTIONS.

in France (FR):

- 0 DK; NA
- 1 LESS THAN 800 FRANCS PER MONTH
- 2 800-1499 FRANCS
- 3 1500-1999 FRANCS
- 4 2000-2499 FRANCS
- 5 2500-2999 FRANCS

 8 60,001-80,000 DRACHMAS
 9 80,001-100,000 DRACHMAS
 10 100,001-200,000 DRACHMAS
 11 200,001 DRACHMAS AND OVER

Note:

THE FREQUENCIES FOR THIS VARIABLE (AS WELL AS ALL OTHER FREQUENCIES IN THIS CODEBOOK) ARE WEIGHTED USING THE APPROPRIATE NATION WEIGHT (SEE INTRODUCTION, P. V) WHICH WEIGHTS RESPONDENTS FROM GREAT BRITAIN AND NORTHERN IRELAND ACCORDING TO THEIR RESPECTIVE PROPORTIONS WITHIN THE TOTAL UNITED KINGDOM POPULATION. SINCE THE CODE CATEGORIES USED FOR THIS VARIABLE WERE NOT IDENTICAL IN GREAT BRITAIN AND NORTHERN IRELAND, FREQUENCIES FOR THIS VARIABLE ARE REPORTED SEPARATELY FOR THESE TWO AREAS. BEFORE USING THIS VARIABLE IN AN ANALYSIS WHICH TREATS THE UNITED KINGDOM AS A SINGLE UNIT, THE ANALYST SHOULD CONSIDER WHETHER RECODING TO MAKE CODE CATEGORIES COMPATIBLE MIGHT BE NECESSARY.

THIS VARIABLE USES WEIGHT VARIABLES 9 AND 10.

80 NATIONAL FRONT
86 DEMOCRATIC UNITY
88 LIBERAL PARTY
90 OTHER PARTY
96 NO PARTY PREFERENCE
99 DK;NA

Note:

THE FREQUENCIES FOR THIS VARIABLE (AS WELL AS ALL OTHER FREQUENCIES IN THIS CODEBOOK) ARE WEIGHTED USING THE APPROPRIATE NATION WEIGHT (SEE INTRODUCTION, P. V) WHICH WEIGHTS RESPONDENTS FROM GREAT BRITAIN AND NORTHERN IRELAND ACCORDING TO THEIR RESPECTIVE PROPORTIONS WITHIN THE TOTAL UNITED KINGDOM POPULATION. SINCE THE CODE CATEGORIES USED FOR THIS VARIABLE WERE NOT IDENTICAL IN GREAT BRITAIN AND NORTHERN IRELAND, FREQUENCIES FOR THIS VARIABLE ARE REPORTED SEPARATELY FOR THESE TWO AREAS. BEFORE USING THIS VARIABLE IN AN ANALYSIS WHICH TREATS THE UNITED KINGDOM AS A SINGLE UNIT, THE ANALYST SHOULD CONSIDER WHETHER RECODING TO MAKE CODE CATEGORIES COMPATIBLE MIGHT BE NECESSARY.

THIS VARIABLE USES WEIGHT VARIABLES 9 AND 10.

v252 - POLITICAL ORIENTATION 7-POINT-TYOLOGY

POLITICAL ORIENTATION TYPOLOGY

- 1 UNMOBILIZED MATERIALIST
- 2 UNMOBILIZED MIXED
- 3 UNMOBILIZED POST MATERIALIST
- 4 MOBILIZED MATERIALIST
- 5 MOBILIZED MIXED
- 6 MOBILIZED POST MATERIALIST
- 7 REVOLUTIONARY

Derivation:

THIS TYPOLOGY WAS CONSTRUCTED FROM RESPONDENT'S SCORES ON THE COGNITIVE MOBILIZATION INDEX (V253), THE MATERIALIST/POST-MATERIALIST VALUES INDEX (V254) AND RESPONSES TO V105. FOR DETAILS ON THE CONSTRUCTION OF THIS TYPOLOGY AND ITS CORRELATES, SEE RONALD INGLEHART AND JACQUES-RENE RABIER "ECONOMIC UNCERTAINTY AND EUROPEAN SOLIDARITY" ANNALS OF THE AMERICAN ACADEMY OF POLITICAL AND SOCIAL SCIENCE (VOL. 440, 1978).

CODE 1: CODED 1 OR 2 IN V253, 1 IN V254 AND EITHER 2 OR 3 IN V105

CODE 2: CODED 1 OR 2 IN V253, 2 IN V254 AND EITHER 2 OR 3 IN V105

CODE 3: CODED 1 OR 2 IN V253, 3 IN V254 AND EITHER 2 OR 3 IN V105

CODE 4: CODED 3 OR 4 IN V253, 1 IN V254 AND EITHER 2 OR 3 IN V105

CODE 5: CODED AS 3 OR 4 IN V253, 2 ON V254 AND EITHER 2 OR 3 IN V105

CODE 6: CODED AS 3 OR 4 IN V253, 3 ON V254 AND EITHER 2 OR 3 IN V105

CODE 7: CODED 1 ON V105

Note:

THIS VARIABLE USES WEIGHT VARIABLES 9 AND 10.

v253 - COGNITIVE MOBILIZATION INDEX

COGNITIVE MOBILIZATION INDEX

- 1 HIGH COGNITIVE MOBILIZATION
- 2 MEDIUM-HIGH COGNITIVE MOBILIZATION
- 3 MEDIUM-LOW COGNITIVE MOBILIZATION
- 4 LOW COGNITIVE MOBILIZATION

Derivation:

THIS VARIABLE COMBINES RESPONSES TO Q.163 AND Q.213 TO FORM AN INDICATOR OF AN INDIVIDUAL'S POTENTIAL TO TAKE AN ACTIVE ROLE IN THE POLITICAL PROCESS. FOR A COMPLETE DISCUSSION OF THIS VARIABLE AND ITS CORRELATES, SEE RONALD INGLEHART, THE SILENT REVOLUTION: CHANGING VALUES AND POLITICAL STYLES AMONG WESTERN PUBLICS (PRINCETON UNIVERSITY PRESS, 1977), CHAPTER 11. THIS VARIABLE IS LABELED THE OPINION LEADERSHIP INDEX IN THE CODEBOOKS FOR BAROMETERS 3, 4, 5, AND 6.

CODE 1: CODED 1 OR 2 IN Q.163 AND CODED 1 IN Q.213

CODE 2: CODED 3, 4 OR 0 IN Q.163 AND CODED 1 IN Q.213 OR CODED 1 OR 2 IN Q.163 AND CODED 2 IN Q.213

v254 - VALUE ORIENTATION (POST-MATERIALISMUS)

MATERIALIST/POST-MATERIALIST VALUES INDEX

- 0 DK; NA
- 1 MATERIALIST
- 2 NEITHER
- 3 POST-MATERIALIST

Derivation:

THIS INDEX WAS CONSTRUCTED FROM RESPONSES TO QUESTIONS 146 AND 147. FOR A COMPLETE DISCUSSION OF THIS VARIABLE SEE RONALD INGLEHART, THE SILENT REVOLUTION: CHANGING VALUES AND POLITICAL STYLES AMONG WESTERN PUBLICS (PRINCETON: PRINCETON UNIVERSITY PRESS, 1977).

CODE 1: CODED 1 OR 3 IN Q.146 AND 1 OR 3 IN Q.147

CODE 2: CODED 1 OR 3 IN Q.146 AND 2 OR 4 IN Q. 147, OR 2 OR 4 IN Q.146 AND 1 OR 3 IN Q.147

CODE 3: CODED 2 OR 4 IN BOTH Q.146 AND Q.147

CODE 0: CODED 0 IN EITHER Q.146 OR Q.147

Note:

THIS VARIABLE USES WEIGHT VARIABLES 9 AND 10.

v143	ATTIT TOW USA - GENERAL OPINION	148
v144	ATTIT TOW USA - CONFIDENCE	149
v145	FOREIGN POLICY AND USA INTERESTS	150
v146	NAT SECURITY AND USA DECISIONS	151
v147	USA POLICY EFFECTS ON PEACE	152
v148	USSR POLICY EFFECTS ON PEACE	153
v149	ATTIT TOW USA - PRO/ANTI-AMERICAN	154
v150	ENERGY PROBLEM - TODAY	155
v151	ENERGY PROBLEM - NEXT 10 YEARS	156
v152	ENERGY PROBLEMS - SOLUTION 1ST	157
v153	ENERGY PROBLEMS - SOLUTION 2ND	158
v154	ENERGY SAVING DONE: INSULATION	159
v155	ENERGY SAVING DONE: HOME HEAT	160
v156	ENERGY SAVING DONE: PATROL USE	161
v157	ENERGY SAVING DONE: ELECTR APPLIANCES	162
v158	ENERGY SAVING COULD: INSULATE HOME	163
v159	ENERGY SAVING COULD: HOME HEAT	164
v160	ENERGY SAVING COULD: PATROL USE	165
v161	ENERGY SAVING COULD: ELECTR APPLIANCES	166
v162	ENERGY SAVING NEIGHB: INSULATION	167
v163	ENERGY SAVING NEIGHB: HOME HEAT	168
v164	ENERGY SAVING NEIGHB: PATROL USE	169
v165	ENERGY SAVING NEIGHB: ELECTR APPLIANCES	170
v166	INDUSTR RISK NEAR: PETROL REFINERY	171
v167	INDUSTR RISK NEAR: COAL POWER PLANT	172
v168	INDUSTR RISK NEAR: AIRPORT	173
v169	INDUSTR RISK NEAR: FOOD FACTORY	174
v170	INDUSTR RISK NEAR: NUCLEAR POWER PL	175
v171	INDUSTR RISK NEAR: CHEMICAL FACTORY	176
v172	INDUSTR RISK NEAR: EXPLOSIVES FACT	177
v173	INDUSTR RISK NEAR: NATURAL GAS FACT	178
v174	INDUSTR RISK NEAR: FURNITURE FACTORY	179
v175	INDUSTR RISK NEAR: HYDRO POWER DAM	180
v176	NUCLEAR POWER PLANT - LIVING NEAR	181
v177	NUCLEAR POWER PLANT - DISTANCE	182
v178	NUCLEAR POWER - RISK EVALATION	183
v179	ELECTR CUT W/O NUCLEAR POWER - TRUE	184
v180	ELECTR CUT W/O NUCLEAR POWER - SERIOUS	185
v181	NUCLEAR EXPLOSION - PROBABILITY	186
v182	NUCLEAR RISKS: EXPLOSION OF PLANT	187
v183	NUCLEAR RISKS: RADIOACTIVE EMISSIONS	188
v184	NUCLEAR RISKS: RADIOACTIVE WASTE	189

v185	NUCLEAR RISKS - TECHNICAL/HUMAN CAUSE	190
v186	NUCLEAR POWER: EXTRA ELECTR RESOURCES	191
v187	NUCLEAR POWER: TERRORISM THREAT	192
v188	NUCLEAR POWER: CHEAPER ELECTRICITY	193
v189	NUCLEAR POWER: MILITARY USE POSSIBLE	194
v190	NUCLEAR POWER: FAVOURABLE FOR ECONOMY	195
v191	NUCLEAR POWER: NOT WORTHWHILE	196
v192	NUCLEAR POWER: EXPANSION DANGEROUS	197
v193	NUCLEAR POWER: SAFETY MEASURES SUFFIC	198
v194	NUCLEAR POWER: DANGEROUS BY NATURE	199
v195	NUCLEAR POWER: CLEAN ENERGY	200
v196	NUCLEAR POWER: DANGEROUS FOR WORKER	201
v197	NUCLEAR POWER PLANT - NEAREST DISTANCE	202
v198	ENERGY INFO: NEWSPAPERS	203
v199	ENERGY INFO: MAGAZINES	204
v200	ENERGY INFO: RADIO	205
v201	ENERGY INFO: TELEVISION	206
v202	ENERGY INFO: SCHOOL/UNIVERSITY	207
v203	NATURE CONSERV RESP: LOCAL	208
v204	NATURE CONSERV RESP: NATIONAL	209
v205	NATURE CONSERV RESP: EC	210
v206	AIR POLLUTION RESP: LOCAL	211
v207	AIR POLLUTION RESP: NATIONAL	212
v208	AIR POLLUTION RESP: EC	213
v209	WATER POLLUTION RESP: LOCAL	214
v210	WATER POLLUTION RESP: NATIONAL	215
v211	WATER POLLUTION RESP: EC	216
v212	NUCLAER SAFETY RESP: LOCAL	217
v213	NUCLEAR SAFETY RESP: NATIONAL	218
v214	NUCLEAR SAFETY RESP: EC	219
v215	SPECIES PROTECT RESP: LOCAL	220
v216	SPECIES PROTECT RESP: NATIONAL	221
v217	SPECIES PROTECT RESP: EC	222
v218	INDUSTR REGULAT RESP: LOCAL	223
v219	INDUSTR REGULAT RESP: NATIONAL	224
v220	INDUSTR REGULAT RESP: EC	225
v221	ENERGY RESEARCH RESP: LOCAL	226
v222	ENERGY RESEARCH RESP: NATIONAL	227
v223	ENERGY RESEARCH RESP: EC	228
v224	HH EQUIPMENT: CAR	229
v225	HH EQUIPMENT: MOTORBIKE	230
v226	HH EQUIPMENT: CENTRAL HEATING	231
v227	HH EQUIPMENT: WASHING MACHINE	232
v228	HH EQUIPMENT: DISHWASHER	233
v229	HH EQUIPMENT: WATER HEATER	234
v230	HH EQUIPMENT: REFRIGERATOR	235
v231	HH EQUIPMENT: DEEP-FREEZE	236

v232	HH EQUIPMENT: ELECTR POWER TOOLS	237
v233	HH EQUIPMENT: COLOR TV	238
v234	HH EQUIPMENT: TELEPHONE	239
v235	HEAD OF HOUSEHOLD	240
v236	HOUSEHOLD - CHILDREN 8 TO 15	241
v237	HOUSEHOLD - CHILDREN UNDER 8	242
v238	AGE EDUCATION	243
v239	TYPE OF COMMUNITY (SUBJECTIVE SIZE)	245
v240	HOUSEHOLD - SIZE	246
v241	OCCUPATION HEAD OF HH	247
v242	OCCUPATION OF RESPONDENT	249
v243	AGE EXACT	251
v244	AGE RECODED - 6 GROUPS	254
v245	INCOME HH - QUARTILES	255
v246	INCOME HH	256
v247	SEX	261
v248	MARITAL STATUS	262
v249	PROVINCE	263
v250	REGION	266
v251	VOTE INTENTION (I: PARTY ATTACHMENT)	270
v252	POLITICAL ORIENTATION 7-POINT-TYPELOGY	276
v253	COGNITIVE MOBILIZATION INDEX	278
v254	VALUE ORIENTATION (POST-MATERIALISMUS)	279
v255	SPLIT - STANDARD CROSS/YOUTH OVERSAMPLE	280
