Kerstin Beck

Introduction and preliminary remarks

The GESIS Variable Report Series on the International Social Survey Programme Studies offers a comprehensive description of data on study and variable level. For each annual module as well as for the cumulated data sets individual Variable Reports are provided.

The reports are structured into six chapters:

Chapter one gives a brief overview of the worldwide ISSP project as a whole.

Chapter two provides the description of the respective ISSP study including bibliographic information, abstract and methodological specifications.

Chapter three contains information on study related survey materials which are absolutely essential to understand the data properly, followed by general information about the structure of ISSP data sets, documentation standards and variable coding frames in chapter four.

Chapter five provides a short explanation of the variable documentation itself.

Chapter six contains the core variable documentation: the documentation of each variable including complete question texts with all answer categories of the Basic Questionnaire enriched with archival remarks. In addition, this Variable Report presents cross tabulations over countries for all substantial and most of the demographic variables. Archive, protocol and country specific variables are usually shown by descriptive statistics or frequency distributions. All cross tabulations, descriptive statistics and frequency distributions are based on unweighted data.

The appendix usually contains two sorts of survey materials: the Study Descriptions and, if available, the Characteristics of National Population, basic statistics for all the participating countries of the corresponding module. The data for the annual ISSP modules are collected by independent institutions in each country. The country data is integrated into one international data file, which is documented, distributed and long-term archived by the ISSP Archive, institutionally, the GESIS Data Archive for the Social Sciences (Leibniz Institute for the Social Sciences) in Cologne, Germany (<http://www.gesis.org>). In every second year from 1997 on, data and documentation have predominantly been prepared by our partners at JDS/ ASEP in Spain (<http://www.jdsurvey.com>).

Data access

Data for statistical analysis along with information about this data such as version history and errata are made available by the Data Catalogue (<https://dbk.gesis.org/dbksearch/>).

The Data Online Platform ZACAT of GESIS (<http://zacat.gesis.org>) provides data documentations and additionally enables users to analyse data online.

Access to the Data Catalogue and ZACAT is free of charge, download of data sets requires registration.

Anonymised data

According to data regulations in participating countries, only anonymised data are made available. Each national team is responsible for carefully checking the data in this respect before the deposit.

Usage requirements

To provide funding agencies with essential information about the use of archival resources and to facilitate the exchange of information about related research activities, all users of ISSP data are requested to send bibliographic citations for each completed manuscript or thesis abstracts to isspservice@gesis.org or if possible, please directly send a copy of the publication to GESIS (GESIS-Leibniz-Institute for the Social Sciences, Dept. Data Archive - ISSP, Unter Sachsenhausen 6-8, D-50667 Cologne, Germany). Please also observe the general notes on the usage regulations of GESIS Data Archive resources (<http://www.gesis.org/en/services/data-analysis/data-archive-service/usage-regulations/>).

Disclaimer

Neither the original collector of the data, nor GESIS or JDS/ ASEP bears any responsibility for the use of ISSP data or any data analyses.

Request

Please, alert us to any errors or problems that you might notice in the data or the documentation. All comments and remarks are very much appreciated to enhance the quality of the data: isspservice@gesis.org

1 ISSP Series Description

1.1 Series name

The International Social Survey Programme (ISSP)

1.2 Series information

The ISSP is a cross-national collaboration programme, which has been continuously conducting annual surveys on diverse social science topics since 1985. The topics for each ISSP survey are proposed by delegates from ISSP member countries. Then, a Basic Questionnaire is composed and improved over several years by a committee, elected by the General Assembly before it is pretested in various countries. Starting in 1984 with four founding nations - Australia, Germany, Great Britain and the United States, the ISSP meanwhile has grown up to almost 50 member countries covering various cultures around the globe.

ISSP Modules 1985 – 2018:

- Citizenship: 2004/ 2014
- Environment: 1993/ 2000/ 2010
- Family and Changing Gender Roles: 1988/ 1994/ 2002/ 2012
- Health and Health Care: 2011
- Leisure Time and Sports: 2007
- National Identity: 1995/ 2003/ 2013
- Religion: 1991/ 1998/ 2008/ 2018
- Role of Government: 1985/ 1990/ 1996/ 2006/ 2016
- Social Inequality: 1987/ 1992/ 1999/ 2009
- Social Networks: 1986/ 2001 (Social Relations and Support Systems)/ 2017
- Work Orientations: 1989/ 1997/ 2005/ 2015

All ISSP members agree

1. to jointly develop modules addressing important areas of social science,
2. to field the modules either as an individual survey or as supplements to the regular national surveys and
3. to make the data available to the social science community as quickly as possible.

As the surveys are designed for replication they offer both cross-national and cross-time comparison, creating the base for a vast range of substantive and methodological research. Since there is no external fund agency, ISSP members fund their own surveys. Beyond that, ISSP committee members fund ISSP central coordination, networking, development of source questionnaires, or methodological work.

For more information on the ISSP in general, its working principles, contact addresses of ISSP members and principal investigators, please visit the ISSP web site (<http://www.issp.org>).

2.1.4 Bibliographic citation

Publications based on ISSP data, which are made available through GESIS, should acknowledge those sources by means of bibliographic citations. To ensure that such source attributions are captured for social science bibliographic utilities, citations should appear in footnotes or in the reference section of publications.

How to cite the data: ISSP Research Group (2015): International Social Survey Programme: National Identity III – ISSP 2013. GESIS Data Archive, Cologne. ZA5950 Data file Version 2.0.0, doi: 10.4232/1.12312

2.2 Content

2.2.1 Abstract

Questions on national consciousness and national identity.

2.2.2 Topic classification

Topics: Identification with the town or the city, the region (county), the country, and with the respective continent; most important characteristics for national identity; identification with one's own nation and national pride (scale); level of personal pride in the way democracy works in the country, its political influence in the world, the country's economic achievements, its social security system, its scientific and technological achievements, its achievements in sports, the achievements in the arts and literature, the armed forces, its history and equal treatment of all social groups in society; attitude towards the relations between one's country and other countries (scale: limitation of the import of foreign products in order to protect the national economy, the right of international institutions to enforce solutions to be accepted nationally (eg. environment pollution), enforcing national interests regardless of evoking conflicts with other countries, rejection of the acquisition of land by foreigners, preference for national films in national television stations); attitude towards selected statements: damage done by large international companies to the local businesses; free trade leads to better products becoming available in the country; in general the country should follow the decisions of international organizations, even if the government does not agree with them; international organizations are taking away too much power from the country; feeling more like a citizen of the world than of the country; attitude towards minorities: fully assimilation is impossible for people who do not share country's customs and traditions; ethnic minorities should be given government assistance to preserve their customs and traditions; preference for assimilation of minorities or retention of their identity; attitude towards immigrants (scale); attitude towards the number of immigrants in the country; immigrants should retain their culture of origin and not adopt country's culture versus also adopt country's culture, versus should give up their culture and adopt country's culture; national pride; attitude towards patriotism (strengthens country's place in the world, leads to intolerance in the country, is needed for the country to remain united, leads to negative attitudes towards immigrants); respondents citizenship; citizenship of parents at the time of the respondent's birth.

Optional questions for countries with an appropriate regional association: knowledge of the regional association like the EU or NAFTA; benefits from EU-membership (NAFTA, etc.); country should follow EU (NAFTA, etc.) decisions, even in the case of disagreement; attitude towards a powerful EU-government; preference for a future EU-membership of the country (for prospective EU members only); country should remain a member of the EU (current EU members only).

Demography: sex; age; year of birth; years in school; education (country specific); highest completed degree; work status; hours worked weekly; employment relationship; number of employees; supervision of employees; number of supervised employees; type of organization: for-profit vs. non-profit and public vs. private; occupation (ISCO-88); main employment status; living in steady partnership; union membership; religious affiliation or denomination (country specific); groups of religious denominations; attendance of religious services; top-bottom self-placement; vote in last general election; country specific party voted in last general election; party voted (left-right); self-assessed affiliation of ethnic group 1 and 2 (country specific); number of children; number of toddlers; size of household; earnings of respondent (country specific); family income (country specific); father's and mother's country of birth; marital status; place of living: urban – rural; region (country specific).

Information about spouse and about partner on: work status; hours worked weekly; employment relationship; supervises other employees; occupation (ISCO-88); main employment status.

Additionally encoded: date of interview; case substitution flag; mode of data collection; weight.

2.3 Geographic coverage

Belgium (BE); Croatia (HR); Czech Republic (CZ); Denmark (DK); Estonia (EE); Finland (FI); France (FR); Georgia (GE); Germany (DE); Great Britain (GB-GBN); Hungary (HU); Iceland (IS); India (IN); Ireland (IE); Israel (IL); Japan (JP); Korea, Republic of (KR), South; Latvia (LV); Lithuania (LT); Mexico (MX); Norway (NO); Philippines (PH); Portugal (PT); Russian Federation (RU); Slovakia (SK); Slovenia (SI); South Africa (ZA); Spain (ES); Sweden (SE); Switzerland (CH); Taiwan, Province of China (TW); Turkey (TR); United States (US)

2.4 Universe

18 years old and older (exceptions: Finland (15-74), Japan (16 years old and older), and South Africa (16 years old and older))

2.5 Sampling procedure

Sampling procedures differ for the individual countries: partly simple, partly multi-stage stratified random samples

2.6 Fieldwork and sample sizes

Table: Participating countries (regions) and fieldwork information for ISSP 2013

Country (Region)	ISO	Fieldwork start/ end	Fieldwork Institute	Questionnaire-versions	Sample Size (n of cases)

2.7 Mode of data collection

Mode of interview differs for the individual countries: partly face-to-face interview: PAPI (Paper and Pencil Interview), partly CAPI (Computer Assisted Personal Interview), partly fixed form self-administered questionnaire: Paper (SAQ), and partly Interactive self-administered questionnaire: CASI (Computer Assisted Self-Interview). (Only in Denmark: If non-response then telephone interviews: CATI (Computer Assisted Telephone Interview) were used).

3 Corresponding survey material

When dealing with international comparative data, data sets and documentation must be seen as two sides of the same coin. Even though ISSP members make huge efforts to produce comparable data in each country, there still remains a remarkable amount of country specific peculiarities in the contributions to the final, international data set. These country specific peculiarities either have to be harmonised or to be documented, as they provide vital information for secondary analysts. Therefore, a set of procedures has been developed to take care for orderly technical preparation of national data sets and to allow for the systematic collection of required context information.

All corresponding survey materials are provided in English, only the national questionnaires are available in the national language(s) of each country.

3.1 Basic Questionnaire

The ISSP General Assembly concludes the design phase of an ISSP module after intensive discussions on the single items of the Basic Questionnaire roughly a year before the module is fielded. Two third of the module questions have to be replications from previous ISSP modules of the same subject. According to this, one third of the questions in each module are new. Subsequent to the mandatory module questions, some pre-selected optional questions can be added. Finally, ISSP member countries translate the British English Basic Questionnaire to their local language as equivalent as possible.

Drafting group for the Basic Questionnaire on the National Identity Module 2013:

- Argentina
- Croatia
- Ireland
- Korea (South)
- Portugal
- United States: Tom W. Smith (Convenor)

3.2 Background Variables Standards and Documentation

Apart from the Basic Questionnaire, covering the substantial module variables, countries also have to collect responses on a defined set of ISSP Standard Background Variables, which predominantly contains demographic information. Since the ISSP often runs with larger national surveys, the background variables are mainly taken from these surveys. Thus, demographic issues cannot be asked in a fixed form over all members of the ISSP. They have to meet the demands of the national studies first. As a result, the demographic variables for the ISSP need to be post-harmonised according to a developed set of common standards.

Over the past 30 years, there have been different Background Variable Standards:

The first set of background variables was established in 1985 with the first ISSP survey. Here countries agreed on collecting the same demographic information. This list of variables underwent a revision in 2001, now providing a coding frame for each background variable. It was valid until 2009.

In 2010 a new revision process of the ISSP Background Variables, planned for a three years period, started. Beginning with the ISSP module 2010, this first revised version of the ISSP Background Variable Standard concentrating mainly on variables containing work, occupational and partnership status information came into effect. The second round of revisions, coming into effect in 2011, had its focus on the education variables, while the last change is going to be made on the variable measuring ethnicity, effective with the module 2013. The new standard is documented in some guidelines (different documents indicating the intermediate steps of revision), providing detailed information and instructions on the variables measurement goals, coding frames, filters and possible question texts. Additionally, the question texts are summarised in a Master Questionnaire on

Background Variables.

Since 2004 countries document the post-harmonisation processes for each variable in a special documentation template provided by the Archive. This template, always adjusted to the current standard, offers detailed country specific information on administration, derivation, and coding of the ISSP Background Variables. All relevant background variable documents are available from the ISSP webpages at GESIS.

3.3 National Study Description

For each country, the original National Study Description is available in the appendix of this Variable Report. The National Study Descriptions are provided by the countries and include information on sample sizes, field dates, modes of data collection, sampling procedures, response rates and weighting processes.

3.4 Characteristics of National Population

The appendix of this Variable Report also includes Characteristics of National Populations for all participating countries from 1989 on. These documents provide statistical data on the composition of national populations in terms of gender, age, education and employment rates and, therefore, allow assessing how representative national samples are.

3.5 Where to find the survey materials and the data set of the ISSP Module of 2013 – National Identity III

In the GESIS Data Catalogue on the GESIS web you find

- the Basic Questionnaire of this module together with
- all country questionnaires in the respective local languages,
- the Codebook (Variable Report) with the National Study Descriptions and the Characteristics of National Populations in its appendix
- detailed National Documentations on phrasing and coding of the Background Variables,
- the Report on Questionnaire Development
- the Study Monitoring Report and
- the integrated data file ZA5950_v2.0.0 for download

under the tab "Data and Documents" of:

<https://dbk.gesis.org/dbksearch/SDESC2.asp?no=5950>

The GESIS online data portal ZACAT provides the documentation of this integrated data file and also further study-related materials for download:

<http://zacat.gesis.org/webview/index.jsp?object=http://zacat.gesis.org/obj/fStudy/ZA5950>

Beyond this, ZACAT enables users to perform basic online analyses like frequency distributions, cross tabulations or regressions.

4 Data set structure and standards

ISSP data sets are processed and documented by the Data Archive of GESIS and by ASEP/ JDS every second year in accordance with agreed standards, which may differ in some details. Despite several changes in the background variables, a certain standard has been established in the course of time.

In order to uniquely identify a data set, to each data set version a GESIS Study No., a Version No., and a Digital Object Identifier (doi) is assigned. The doi is linked to the Study Description in the Data Catalogue (<https://dbk.gesis.org/dbksearch/index.asp>). Metadata filled in the Study Description of ISSP 2013 data and associated with a doi are provided to the registration agency for social science data (da|ra).

The doi: 10.4232/1.12312 is assigned to the ISSP 2013 (v.2.0.0).

4.1 Data set structure

Usually, the ISSP data sets are structured as follows:

1. Archive and Identification Variables

Administrative variables are used for identifying data sets, respondents and countries (GESIS Data Archive Study Number, Version Number, Respondent Number, Country Codes).

The GESIS Archive version variable includes the number of the data set and the respective release date, composed as a string variable with three numbers:

- The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases).
- The minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels).
- The third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

Country codes identify each case as belonging to one country. The country code variable, which was used according to a scheme leaning on international automobile identification codes in the beginning of the ISSP, was replaced by two country code variables based on the ISO Code 3166. One identifies countries as a whole, the other one possible subsamples, such as East and West Germany. The cross tabulations shown in this Variable Report are based on a third, alphanumerical country code variable, which also identifies subsamples.

2. Substantial Variables

The substantial variables contain the mandatory module questions, often supplemented by optional questions.

Variable labels provide keywords based on the question text; these keywords are applied consistently if questions or question items are repeated over time. All substantial variables include the original question number of the Basic Questionnaire in the variable labels.

Generally, all variable names consist of the standard prefix 'V' and the consecutive variable number (beginning with the archive variables).

3. ISSP Background Variables

In the earlier ISSP modules, all variables are numbered consecutively, beginning with the archive variables and followed by substantial and background variables. The last variable of each data set,

usually is the variable on weighting. Later on, the background variables start with V200 et seq.. Nowadays, these variable numbers are expressed by mnemonics with **max. 8 characters** (SEX, AGE, ...).

4. Country Specific Variables

Variables, which cannot be harmonised for various reasons, are usually presented as country specific variables. As a rule, variable names of country specific variables have country abbreviations as prefixes. In some of the older ISSP studies, the principle of country specific variables is not used. Instead all country specific information is integrated into one variable.

5. Protocol Variables

There are five protocol variables in the latest ISSP modules. **The variable 'MODE' indicates the mode of data collection, while 'SUBSCASE' indicates whether a respondent in the sample is an original case or a replacement for an originally selected respondent who was not available.** The variables **'DATEYR', 'DATEMO' and 'DATEDY' provide information on the dates and periods of fielding.**

ISSP surveys prior to 2010 do not include the three DATE variables for indicating the fielding date and ISSP surveys before 2007 do not contain the SUBSCASE variable.

6. Weight

There is no weight available for the international comparison on the ISSP across countries. Please note that also country subsamples can be over- respectively underrepresented without any weighting factor correcting for the imbalance. This fact has to be taken into account if these countries in question are analysed as one unit.

4.1.1 Deviating data set structure in ZA5950

Due to the fact that South Africa used a 5-point scale in question two (Q2a-h/ V9-V16) instead of a 4-point scale there are several additional variables for South Africa (ZA_V9, ZA_V10, etc.). The South African questionnaire additionally contains the answer **category "Neither nor"** in the middle of the scale (code 3). Data thus obtained are not comparable to the rest of the countries.

4.2 Data preparation

On the basis of the Basic Questionnaire covering the substantial variables and the standard core set of background variables the Archive provides a Standard Setup for each individual ISSP module, which defines the variable and value labels for the integrated data file. All country data sets should be processed and prepared to match the structure of the Standard Setup before the material is deposited to the GESIS Data Archive for integration and archiving.

After conducting the national surveys, all collaborators are supposed to deposit their data at the GESIS Data Archive, where all the deposited data sets are prepared, integrated and merged into one single international data set, which is finally published.

During the data preparation process all national data sets are successively controlled for completeness, missing and duplicate records, for wild codes and for formal consistency of response patterns and question routing. Moreover, national derivation processes from source to target codes in the background variables are controlled. Missing values, especially due to filter instructions are checked and recoded where necessary. Errors, which are discovered during these procedures, are corrected or documented in cooperation with primary investigators. Complete machine-readable DDI-XML (see chapter 4.5) compliant documentation is created for all ISSP data sets by GESIS.

4.3 Coding frames

By general rule, the variables of the module questions adopt the coding frame as specified in the Basic Questionnaire, except for multiple response questions.

GESIS adds 'Not applicable' (NAP) codes for questions that have filters. NAP indicates that only a subsample and not all of the respondents were asked. Also in the case of country specific variables, all the other countries are coded NAP.

GESIS adds 'Not available' (NAV) for variables which in single countries may not have been conducted for whatever reason.

4.3.1 Country specific answer categories

ISSP data include some questions (variables) which have country specific answer categories such as DEGREE, RESPONDENT'S INCOME, FAMILY INCOME, PARTY AFFILIATION/ PARTY VOTED LAST ELECTION, REGION and SIZE OF COMMUNITY (until ISSP 2009).

For country specific income variables with answer categories, the data is recoded to midpoints of the categories.

For occupation, official international occupation codes are used. While in the first years of the ISSP many countries used country specific occupation codes, ISCO 1988 has been established as a standard over the years. From ISSP 2014 onwards, this standard will be replaced by ISCO 2008.

Recently additionally provided as country specific variables: RELIGION (2010 onwards), ETHNIC GROUP (ISSP 2010-2012 measured by one variable, ISSP 2013 onwards measured by two variables)

4.3.2 Missing values

In general, the missing values are standardised across ISSP modules. For all variables a set of missing values is defined:

- 0: Not applicable (NAP), Not available (NAV)
- 7 (97, 997, 9997, ...): Refused
- 8 (98,998, 9998, ...): Don't know
- 9 (99, 999,9999, ...): No answer

4.4 Weighting

Please note, that there is no total weight usable for international comparison. While all ISSP data sets contain a weighting variable, the weights in this variable do not incorporate a common weighting scheme that can be applied to all countries of the same ISSP module.

In the Study Description and/ or in the Background Variables Documentation of each country you will find more detailed information on the kind of weights that are used. You can see, whether

- a design weight
- weights to adjust for non-response bias or
- a combination of these both weights above or
- different weighting procedures

are applied. However, some countries dispense with weighting factors. If no weight is provided, the variable "Weight" is coded to 1.0. Otherwise the weighting factor is unequal 1.0 (but greater than 0).

It may be advisable to weight data to increase representativeness in certain cases. For ISSP data we strongly recommend consulting the National Study Descriptions for information on the certain weighting factor composition and maybe even the Characteristics of National Population for more context information. An initial overview of the national weighting procedures is provided in this Variable Report in chapter 6.

4.5 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social sciences, established by the Data Documentation Initiative <DDI>. The Variable Reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the Basic Questionnaire with the variable description (variable name, values, and labels) of the data set. General remarks and comments referring to a certain variable are defined as variable notes. Notes mostly include additional information on country specific deviations from the ISSP standard, information about data problems or other specific characteristics.

5 Explanation of the variable documentation

The variable documentation part of this Variable Report describes each variable in the data file including all relevant information for this variable such as the single question components or further notes and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable 'C_ALPHAN'.

BE	Belgium	JP	Japan
CH	Switzerland	KR	Korea (South)
CZ	Czech Republic	LT	Lithuania
DE	Germany	LV	Latvia
DK	Denmark	MX	Mexico
EE	Estonia	NO	Norway
ES	Spain	PH	Philippines
FI	Finland	PT	Portugal
FR	France	RU	Russia
GB-GBN	Great Britain	SE	Sweden
GE	Georgia	SI	Slovenia
HR	Croatia	SK	Slovakia
HU	Hungary	TR	Turkey
IE	Ireland	TW	Taiwan
IL	Israel	US	United States
IN	India	ZA	South Africa
IS	Iceland		

The example explained below shows the information that for a typical substantial variable appears in the variable documentation part of a Variable Report. Results are usually broken down by country or presented as frequency counts in the case of country specific variables. In the case of variables with long lists of coded values (e.g. ISCO/SPISCO) results are not shown or, if appropriate, reflected by descriptive indicators such as mean or median (e.g. AGE, country specific variables RINC and INC).

The complete question and answer texts are taken from the final Basic Questionnaire as provided.

All deviations are documented in this Variable Report.

As there is neither an international weighting factor nor a national weighting factor which would be comparable for all participating countries, all frequencies and tables are calculated from unweighted data.

Header with **DIGITAL OBJECT IDENTIFIER (DOI)** linked to the Study Description in the GESIS Data Catalogue.

VARIABLE NAME (serial number assigned by the archive) and **VARIABLE LABEL** as defined in the data set.

QUESTION NUMBER and full **QUESTION TEXT** from the Basic Questionnaire, including interviewer instructions, if applicable. The numbers or letters that may appear together with the original question number, reflect the item order (multiple item or multiple response questions) or indicate if a question was asked only in a single country (country abbreviation).

CODE VALUES occurring in the data for this variable and complete **ANSWER TEXT** from the Basic Questionnaire. Abbreviations commonly used in the code definitions are DK (don't know), NA (no answer), NAP (not applicable) and NAV (not available).

DERIVATION information refers to the construction principle of derived variables.
NOTE delineates additional explanatory text or archive remarks on data processing and other issues relevant for the understanding or application of the variable.

CROSS-TABULATION: The absolute frequencies base on unweighted data. The relative frequencies (*row percent*) refer to the valid cases (*n valid sum*), i.e. the total number of cases (*n sum*) reduced by the number of cases defined as missing data (*M*).

FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (*M*), i.e. *percent* on the basis of all cases (*sum*) and *valid percent* on basis of the *valid cases*.

GESIS Study No. 4950 (v2.2.0), <http://dx.doi.org/doi:10.4232/1.11334>

V34 - Q17 Best describes beliefs about God

Q.17

Which best describes your beliefs about God?

- 1 I don't believe in God now and I never have
- 2 I don't believe in God now, but I used to
- 3 I believe in God now, but I didn't use to
- 4 I believe in God now and I always have
- 8 Can't choose
- 9 No answer

6 Variable documentation

(see next page)

Variable, Label**Question Text (Original Language)****V1 - GESIS Data Archive Study Number**

GESIS Data Archive Study number ZA5950 for the ISSP 2013 on 'National Identity III'.

Study number of the data set producer and archiving number

5950 GESIS Data Archive Study Number ZA5950

V1

Value	Label	Missing	Count	Percent	Valid Percent
5950	GESIS Data Archive Study Number ZA5950		45297	100,0	100,0
	Sum		45297	100,0	100,0
	Valid Cases		45297		

V2 - GESIS Archive Version

VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as a string.

The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

V2

Value	Label	Missing	Count	Percent	Valid Percent
2.0.0 (2015-08-14)			45297	100,0	100,0
	Sum		45297	100,0	100,0
	Valid Cases		45297		

DOI - Digital Object Identifier

Digital Object Identifier (DOI)

This variable holds the Digital Object Identifier (DOI) for the data set at hand as registered via the DAJRA registration agency for economic and social science data. Each data set version (see variable V2) has a unique persistent DOI.

For direct access to the complete archive dissemination package for this study, including new data set versions, the DOI needs to be appended to the resolver service URL:

<http://dx.doi.org/10.4232/1.12312>

In terms of good scientific practice, the DOI is an important element for the correct citation of a data set.

DOI

Value	Label	Missing	Count	Percent	Valid Percent
doi.10.4232/1.12312			45297	100,0	100,0
	Sum		45297	100,0	100,0
	Valid Cases		45297		

V3 - Country/Sample (see V4 for codes for whole nation states)

Country/ Sample (see V4 for codes for whole nation states).

To indicate the subsamples within the ISSP countries a code on the basis of ISO 3166 was constructed. For all countries without subsamples the three digit ISO 3166 Code (as in V4) was used.

For those with subsamples a five digit numeric code is used. The first three-digits are based on the original ISO code (see V4) and indicate the country. The following two-digit numeric appendices (01, 02, 03) indicate the subsamples.

PT: The Portuguese ISSP 2013 module was fielded in two rounds, the main sample including 898 interviews and a complementary sample with 103 interviews. The ISSP Methodological Committee approved the sample resulting from pooling the two rounds, which can still be separated using V3 as a FLAG variable. (More information see note).

62002 62002 PT-Portugal 2013: second fieldwork round (complementary sample)

82601 82601 GB-GBN-Great Britain

Note:

/ PT: Due to fieldwork quality problems detected during the final supervision, several interviews were invalidated, leading to a total of 898 interviews validated. In order to achieve the minimum required of 1000 interviews and to correct the sample deviations introduced by the interviews eliminated, a new fieldwork company carried out 103 interviews. These 103 interviews were collected in the original localities where interviews were eliminated. The interviewees were selected in order to correct the systematic known deviations of the main sample concerning Age and Sex. Only residents were considered eligible.

The ISSP Methodological Committee and Standing Committee approved the sample resulting from pooling the two rounds, which can still be separated using variable V3 as a FLAG variable. More detailed information is available on request (Report of the MC/ SC).

C_ALPHAN - Country/ Sample Prefix ISO 3166 code - alphanumeric

Sample Prefix ISO 3166 Code - alphanumeric

ISO 3166 Country/ Sample Prefix

This alphanumeric sample identification variable C_ALPHAN includes country codes that are based on ISO 3166.

All countries are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the UK's subsample Great Britain (GB-GBN). No ISO standard codes are available for the "historical" East/ West subdivision of Germany, for the subsamples of Belgium, Flanders, Wallonia and Brussels and for the subsamples of Israel, Jews and Arabs. We label East and West Germany "DE-E"/ "DE-W", the subsamples of Belgium as "BE-FLA"/ "BE-WAL"/ "BE-BRU" and Israel as "IL-J"/ "IL-A".

This variable is used for the cross tabulations shown in the Variable Report.

V6 - Q1b How close do you feel to: [County]?

Q1

How close do you feel to ...?

(PLEASE, CHECK ONE BOX ON EACH LINE)

Q1b ... your [County]?

- 1 Very close
- 2 Close
- 3 Not very close
- 4 Not close at all
- 8 Can't choose
- 9 No answer

Note:

/ County (or province, state, etc.) is to be understood as the most relevant administrative unit smaller than the entire country/ nation.

V9 - Q2a How important: born in [Country]?

Q2

Some people say that the following things are important for being truly [NATIONALITY].

Others say they are not important.

How important do you think each of the following is ...

(PLEASE, CHECK ONE BOX ON EACH LINE)

Q2a ... to have been born in [COUNTRY]?

0 NAV;ZA: answer categories differ from ISSP standard

1 Very important

2 Fairly important

3 Not very important

4 Not important at all

8 Can't choose

9 No answer

Note:

/ ZA: For the South African data see variable ZA_V9, please.

ZA_V9 - Q2a How important: born in [Country]?

Q2

Some people say that the following things are important for being truly [NATIONALITY].

Others say they are not important.

How important do you think each of the following is ...

(PLEASE, CHECK ONE BOX ON EACH LINE)

Q2a ... to have been born in [COUNTRY]?

- 0 NAP, other countries
- 1 Very important
- 2 Fairly important
- 3 Neither nor
- 4 Not very important
- 5 Not important at all
- 8 Can't choose
- 9 No answer

Note:

/ ZA: The scale in the questionnaire of South Africa differs from the standard ISSP scale using a 5-point scale by including the middle category (Neither nor) instead of the 4-point scale in the variables V9-V16:

- 1 Very important
- 2 Fairly important
- 3 Not very important
- 4 Not important at all

ZA_V11 - Q2c How important: living most of life in [Country]?

Q2

Some people say that the following things are important for being truly [NATIONALITY].

Others say they are not important.

How important do you think each of the following is ...

(PLEASE, CHECK ONE BOX ON EACH LINE)

Q2c ... to have lived in [COUNTRY] for most of one's life?

- 0 NAP, other countries
- 1 Very important
- 2 Fairly important
- 3 Neither nor
- 4 Not very important
- 5 Not important at all
- 8 Can't choose
- 9 No answer

Note:

/ ZA: The scale in the questionnaire of South Africa differs from the standard ISSP scale using a 5-point scale by including the middle category (Neither nor) instead of the 4-point scale in the variables V9-V16:

- 1 Very important
- 2 Fairly important
- 3 Not very important
- 4 Not important at all

ZA_V13 - Q2e How important: to be a [Religion]?

Q2

Some people say that the following things are important for being truly [NATIONALITY].

Others say they are not important.

How important do you think each of the following is ...

(PLEASE, CHECK ONE BOX ON EACH LINE)

Q2e ... to be a [religion]?

- 0 NAP, other countries
- 1 Very important
- 2 Fairly important
- 3 Neither nor
- 4 Not very important
- 5 Not important at all
- 8 Can't choose
- 9 No answer

Note:

/ Country's dominant religion or denomination should be given.

/ ZA: The scale in the questionnaire of South Africa differs from the standard ISSP scale using a 5-point scale by including the middle category (Neither nor) instead of the 4-point scale in the variables V9-V16:

- 1 Very important
- 2 Fairly important
- 3 Not very important
- 4 Not important at all

ZA_V16 - Q2h How important: to have [Country Nationality] ancestry

Q2

Some people say that the following things are important for being truly [NATIONALITY].

Others say they are not important.

How important do you think each of the following is ...

(PLEASE, CHECK ONE BOX ON EACH LINE)

Q2h ... to have [COUNTRY NATIONALITY] ancestry?

0 NAP, other countries

1 Very important

2 Fairly important

3 Neither nor

4 Not very important

5 Not Important at all

8 Can't choose

9 No answer

Note:

/ ZA: The scale in the questionnaire of South Africa differs from the standard ISSP scale using a 5-point scale by including the middle category (Neither nor) instead of the 4-point scale in the variables V9-V16:

1 Very important

2 Fairly important

3 Not very important

4 Not important at all

ZA_V16

Value	Label	Missing	Count	Percent	Valid Percent
0	NAP, other countries	M	42558	94,0

V20 - Q3d [Country] is a better country than most other countries

Q3

How much do you agree or disagree with the following statements?

(PLEASE, CHECK ONE BOX ON EACH LINE)

Q3d Generally speaking, [COUNTRY] is a better country than most other countries.

- 1 Agree strongly
- 2 Agree
- 3 Neither agree nor disagree
- 4 Disagree
- 5 Disagree strongly
- 8 Can't choose
- 9 No answer

V37 - Q5c [Country] should follow its own interests even if conflict

Now we would like to ask a few questions about relations between [COUNTRY] and other countries.

Q5

How much do you agree or disagree with the following statements?

(PLEASE, CHECK ONE BOX ON EACH LINE)

Q5c [COUNTRY] should follow its own interests, even if this leads to conflicts with other nations.

- 1 Agree strongly
- 2 Agree
- 3 Neither agree nor disagree
- 4 Disagree
- 5 Disagree strongly
- 8 Can't choose
- 9 No answer

V46 - Q7b Help minorities to preserve traditions

Now we would like to ask a few questions about minorities in [COUNTRY].

Q7

How much do you agree or disagree with the following statements?

(PLEASE, CHECK ONE BOX ON EACH LINE)

Q7b Ethnic minorities should be given government assistance to preserve their customs and traditions.

- 1 Agree strongly
- 2 Agree
- 3 Neither agree nor disagree
- 4 Disagree
- 5 Disagree strongly
- 8 Can't choose
- 9 No answer

V47 - Q8 Maintain traditions - adapt in society

Q8

Some people say that it is better for a country if different racial and ethnic groups maintain their distinct customs and traditions.

Others say that it is better if these groups adapt and blend into the large society.

Which of these views comes closer to your own?

a) It is better for society if groups maintain their distinct customs and traditions.

b) It is better if groups adapt and blend into the larger society.

1 Maintain traditions

2 Adapt into larger society

8 Don't know

9 No answer

V65 - Q16 Heard or read about [the European Union]

OPTIONAL QUESTION

Q16

ASK QUESTION IF YOU HAVE AN APPROPRIATE REGIONAL ASSOCIATION LIKE THE EU OR NAFTA. IF YOU HAVE NO APPROPRIATE ASSOCIATION, OMIT THE OPTIONAL QUESTIONS

How much have you heard or read about [the European Union, North American Free Trade Agreement, etc.]?

(If "Nothing at all", the rest of the optional items should be skipped.)

- 0 DE,IL,JP,NO,PT,RU,TW:Not asked/no appropriate regional association
- 1 A lot
- 2 Quite a bit
- 3 Not much
- 4 Nothing at all
- 5 GB:Nothing at all, but answer in V66 to V70
- 8 Can't choose
- 9 No answer

V66 - Q17 Benefits from being member of [the European Union]

OPTIONAL QUESTION

Q17

ASK QUESTION IF YOU HAVE AN APPROPRIATE REGIONAL ASSOCIATION LIKE THE EU OR NAFTA

For MEMBERS of EU, NAFTA, etc.:

Generally speaking, would you say that [COUNTRY] benefits or does not benefit from being a member of [the European Union, the North American Free Trade Agreement, etc.]?

For NON MEMBERS of EU, NAFTA, etc.:

Generally speaking, would you say that [COUNTRY] would benefit or would not benefit from being a member of [the European Union, the North American Free Trade Agreement, etc.]?

0 NAV (DE,IL,JP,KR,NO,SE,SK,RU,TW);NAP,never heard of [the EU]

1 Greatly benefits

2 Largely benefits

3 Somewhat benefits

4 Benefits only a little

5 Does not benefit at all

8 Don't know

9 No answer

SEX - Sex of Respondent

BVQ_01. SEX

BE: Are you a man or a woman?

DK FI FR GE IE IN LV NO: Are you ...?

EE TW: Gender

HR IL IS PH PL: Sex of respondent

CH: Information automatically taken from sample database

CZ ES HU US: Sex of respondent (Interviewer observation was used)

DE GB-GBN RU SK TR: Sex coded directly by interviewer (without asking respondent)

JP: Sex / Please circle the appropriate figure. Respondent's sex can be known also from the sampling frame.

KR: Now I would like to ask about the members of your household. Please include all members who are living in your house and who are temporarily living somewhere else. Answer the following question beginning with yourself: Is [Person] male or female?

LT: Respondent's sex: Interviewer ask all respondents (if it is obvious don't ask this question)

MX: Mark sex of the interviewee

PT: his question was not asked to the respondents. It was selected by interviewers by observation.

SE: Not asked in survey, taken from National Register.

SI: Your sex

ZA: Copy from contact sheet

1 Male

2 Female

9 No answer(IE,BE,ZA)

Note:

/ IS: In the web survey they asked for the sex of the respondent: 'what is your sex?' In other respects the interviewer marked the sex.

BIRTH - Year of birth

BVQ_02. BIRTH

When were you born?

(Please, write in the year of your birth, use four digits for the year)

COMMENT TO BIRTH: The preferred question is to ask BIRTH
AGE however can be calculated from DATE and BIRTH.

BE: What's the month and year of your birth?

CH: Information automatically taken from sample database

CZ DK FI FR IS PT SE SK: What year were you born?

DE: Please tell me what month and year you were born in.

EE GE IE IL IN LV NO PL TW: When were you born?

ES: Please tell me your data of birth.

GB-GBN KR ZA: BIRTH is computed from AGE (calculated as DATEYR - AGE)

HU MX PH: Year of birth

JP: Respondent's year of birth can be known from the sampling frame.

LT: This variable was not asked directly, it was computed by DATEYR (year of interview) minus AGE

RU: Not asked directly, computed by DATEYR minus AGE.

When were you born? Please, tell us year of birth, only.

TR: May I learn the year of your birth.

US: What is your date of birth?

9999 No answer

Note:

/ NO: Item non-response replaced by data from Central Register of Persons

/ SE: No missing values in general. If missing values appear, the age of R was later derived from national register

AGE - Age of respondent

BVQ_02a. AGE

This question can be asked as an alternative to asking about BIRTH. If AGE is not asked directly, it must be computed by DATEYR 'year of the interview' minus BIRTH 'year of birth'. If your country is free to choose between asking BIRTH or AGE directly, the ISSP prefers BIRTH being asked.

BE CZ DK EE ES FI GE HU LT NO PT SK TR TW US: Computed by DATEYR 'year of interview' minus BIRTH 'year of birth'

CH PL TR: Calculated as 2013 minus BIRTH

DE: Calculated by using month and year of birth and month and year of the interview (as reported by interviewer)

FR SE SI: AGE computed from BIRTH.

GB-GBN: What was your age last birthday?

HR: How old are you?

IE IN IS: AGE not directly asked; derived from BIRTH (computed using DATEYR minus BIRTH)

IL: Calculated as 2011 - BIRTH

JP: Respondent's birth year can be known from the sampling frame.

KR: How old is [Person]?

LT: What was your age at your last birthday, in full years?

PH: Actual age of respondent

RU: How old are you? (completed years)

ZA: Age of respondent in completed years

999 No answer

Note:

/ NO: Item non-response replaced by data from Central Register of Persons

EDUCYRS - Education I: years of schooling

BVQ_03. EDUCYRS

How many full years of schooling or education have you had? Please include primary and secondary schooling, university and full-time vocational training, but do not include repeated years.

(Please enter number of years or tick a box as applicable)

BE: How many years of primary education did you complete? How many years of secondary education did you complete? How many years higher education of short or long type or university did you complete?

CH: For how many years were you in fulltime education? Don't count the time you possibly spent doing an apprenticeship or repeating years. How many years did it take to do this apprenticeship, not including any possible repeated years?

CZ: How many years of schooling or education have you had? Please include all years of full-time study, even if you did not graduate from that school. Do not forget about primary school. Do not include vocational and requalification courses, part-time study or distance learning. Do not include repeated years.

DE: How many full years of schooling or education have you had in total, including primary and secondary schooling, university and full-time vocational training at school, but not including in-firm training. If you have ever repeated a year, please do NOT include these years. If you are currently at school or university, please count the number of years you have already completed at school or university. Probe added in ISSP 2013 if respondents' answer equals respondent's age to reduce misunderstanding on question meaning.

DK: How many years of full time schooling do you have? Are you still attending a school education? Are you still attending a vocational training or a higher education?

EE: How many years (full-time equivalent) have you studied in formal education? If you are currently in education, count the number of years you have completed so far.

ES: How many years (full-time equivalent) have you been in formal education?

FI: How many years have you gone to school or studied altogether? Include primary education, lower secondary education, general upper secondary education, all full-time education aiming at a vocational qualification and higher education. If you are still at school or studying, please provide the number of full years of schooling or education you have had so far.

FR: Derived from 'How old were you when you stopped your studies?'

GE: How many years (full-time equivalent) have you been in formal education? Include all primary and secondary schooling, university and other post-secondary education, and full-time vocational training, but do not include repeated years. If you are currently in education, count the number of years you have completed so far.

GB-GBN: Constructed by using the question: 'How old were you when you completed your continuous full-time education?' and subtracting 5 years (school starting age in Britain).

HU: Taking into account all the school systems, how many years you have studied in full-time education? Please, do not count the repetitions of the year included

HR TW: How many years of formal education do you have?

IE: How many years have you been in full-time formal education? Include all primary and secondary schooling, university and other post-secondary education, and full-time vocational training, but do not include repeated years. If you are currently in education, count the number of years you have completed so far.

IL IN: How many years (full-time equivalent) have you been in formal education?

IS: How many years of school have you finished? Are you still in school?

JP: Please indicate the last school you attended or the school you are currently attending. How many years of education did you receive from the time you entered elementary school to the time you graduated or left your final place of education? Do not include any time spent at higher vocational schools or schools in the miscellaneous category.

KR: Derived from 'What is the highest level of school you have attended?' and 'Did you graduate from this school, or are you currently attending?' and 'In what grade did you drop out?' and 'What grade are you in?'

LT: How many full years of schooling or education have you had? Please indicate how many years of schooling or education in primary, secondary, basic, vocational or gymnasium school, college, university or institute have you completed. If you repeated year or course

several times, count only the first year.

LV: How many full-time years have you been in education?

MX: Years of schooling (formal school, excluding training for work)

NO: All in all, how many years of education have you completed? Please include all schooling and education, also compulsory school and apprenticeship.

PH: How many full years of schooling or education have you had? Please include primary and secondary schooling, university and full-time vocational training.

PT: How many years did you go to school, including university studies? Please don't include the years you had to repeat or training courses which are not included in the national education system.

RU: How many years have you completed in all educational institutions including primary, secondary and tertiary school but excluding training courses?

SE: How many years of full-time education have you had? Include primary school, and, if applicable, gymnasium (=secondary school) and college/university education.

SI: How long lasted your schooling? Consider all types of schooling from primary school to university, including professional education, training period, but do not count class repetitions.

SK: How long have you been in education so far? Please count all years of full time schooling if you did not finish the school. Don't forget to count basic school. Don't count evening or distance study. Don't include time spent on professional training or requalification. If you still study, please state the years of study finished so far.

TR: What is your education? How many years have you spent in primary, secondary and university education other than professional training?

US: What is the highest grade in elementary school or high school that you finished and got credit for? Did you ever get a high school diploma or a GED certificate? Did you ever complete one or more years of college for credit, not including schooling such as business college, technical or vocational school? How many years did you complete? Do you have any college degrees? What degree or degrees?

ZA: How many years of full time education have you completed?

0 No formal schooling, no years at school

95 Still at school (GB,TR)

96 Still at college, university, in vocational training (GB)

98 Don't know

99 No answer

Note:

/ FR: Age Respondent left school minus 6 years.

/ GB-GBN: Derived by subtracting 5 years from the answer to this question, the school starting age in Britain.

/ HR: category 95 still at school was recoded to 8 years at school, category 96 still at college to 12 years at school.

/ SE: If you are currently in education, count the number of years you have completed so far. Usually people enter the school system (the low stadium) at age 6 or 7.

/ TR: Take a note of the year given. If the respondent says primary school graduate then code 5, junior high code 8, high school code 11, university graduate code 15. If the respondent is a medical school graduate then code 17, engineer or architect with an MS code 16.

DE_DEGR - Country specific highest completed degree of education: Germany

DE_DEGR - Germany: Country specific highest completed degree of education

What general school leaving certificate do you have? (highest certificate)

(If not still at school) What vocational or professional training do you have?

What is the highest polytechnical degree you have graduated with?

What is the highest university degree you have graduated with?

- 0 NAP, other countries
- 1 No formal education
- 2 Still at school: >= 7 years of schooling
- 3 Left school without certificate
- 4 Lower secondary (Hauptschule)
- 5 Middle school (mittlere Reife)
- 6 Secondary, technical (Fachhochschulreife)
- 7 Higher secondary (Abitur)
- 8 Vocational training, degree from German dual system
- 9 Vocational training, master craftsmen (Meister)
- 10 University of applied sciences (Fachhochschule): bachelor
- 11 University: bachelor
- 12 University of applied sciences (Fachhochschule): master or other degree
- 13 University: master or other degree
- 14 Doctorate
- 98 Other qualification
- 99 No answer

Note:

/ DE: Please note that the original data allowed for multiple answers. Respondents with multiple educational degrees are coded according to their "highest" educational entry in the German ISSP degree variable. For example, respondents with "Abitur" and additional vocational training in the dual system (but no further academic education) are coded 8 "Vocational training, degree from German dual system". Thus, the code 7 "Higher secondary (Abitur)" is only given to respondents who did not receive either any further academic or vocational training.

DEGREE - Highest completed education level: Categories for international comparison

DEGREE: Comparative - Highest completed degree of education: Categories for international comparison

Since DEGREE is a slightly re-arranged subset of ISCED-97, instructions for actually coding ISCED-97 from nat-DEGR in your country can be used to support the coding of DEGREE.

<The aim of this variable is to measure the highest completed education level/ degree of the respondent in order to facilitate international comparison>

BE: What's the highest degree you completed?

CH SK: Which is the highest educational level you achieved?

CZ EE ES GE IE IL IN LV PH RU SE: What is the highest level of education you have attained?

DE: What general school leaving certificate do you have? (highest certificate) (If not still at school) What vocational or professional training do you have? What is the highest polytechnical degree you have graduated with? What is the highest university degree you have graduated with?

DK: What school education do you have? What business training or higher education do you have beyond school education?

FI: What is your education?

FR TW: Without taking into account grade repetitions, what is your educational level?

GB-GBN: Constructed by using two questions: 'Have you passed any of the examinations on this card?' 'And have you passed any of the exams or got any of the qualifications on this card'

HR: Your highest educational level (school completed regularly or part-time).

HU: What is your highest level of education completed?

IS: If you take note of the categorization listed on this card, what is your highest degree of education?

JP: Please indicate the last school you attended or the school you are currently attending.

KR: What is the highest level of school you have attended? Did you graduate from this school, or are you currently attending?

LT: What is the highest level of education that you successfully completed?

MX: Higher school level obtained (finished level)

NO: Which general education have you completed? Which vocational education/training have you completed? Which tertiary education have you achieved?

PT: What is the highest degree of education that you completed?

SI: Name last school that you have finished, regularly or irregularly.

TR: Levels of education/ Highest degree - being held by the respondent

US: What is the highest grade in elementary school or high school that you finished and got credit for? Did you ever get a high school diploma or a GED certificate? Did you ever complete one or more years of college for credit - not including schooling such as business college, technical or vocational school? How many years did you complete? Do you have any college degrees? What degree or degrees?

ZA: What is the highest level of education you have ever completed?

0 No formal education

1 Primary school

2 Lower secondary (secondary education completed that does not allow entry to university: end of obligatory school but also short programs (less than 2 years))

3 Upper secondary (programs that allow entry to university)

4 Post secondary, non-tertiary (other upper secondary programs toward the labour market or technical formation)

5 Lower level tertiary, first stage (also technical schools at a tertiary level)

6 Upper level tertiary (Master, Doctor)

9 No answer

Note:

The DEGREE of education must be asked country-specific. Do not use the ISSP categories given here in your field questionnaires! The harmonised ISSP categories must be computed from the country-specific degrees (nat_DEGREE). Correspondence lists between country specific categories and categories of the ISSP DEGREE variable must be reported in detail in the BV documentation template. Since DEGREE is a slightly re-arranged subset of ISCED-97, instructions for actually coding ISCED-97 from nat-DEGR in your country can be used to support the coding of DEGREE.

/ CH: For MOSAiCH 2013 (including ISSP 2012 and 2013) we have slightly amended the wording of the categories 2 and 3, precisising the number of necessary years of school. We suspected indeed a few errors in the previous edition, because in some cantons, 'Primarschule' (primary school) keeps the same name at the secondary degree (up to 9 years of school). Our suspicion has been confirmed, as it is mainly the following category 3 which has grown.

WORK - Currently, formerly, or never in paid work

BVQ_05. WORK

Are you currently working for pay, did you work for pay in the past, or have you never been in paid work?

BE: Which of the situations is applicable for you?

CH RU SK: Are you currently working for pay, or did you work for pay in the past? Let me just check: are you currently or did you work in the past for your own family's business?

CZ: Are you currently working for pay, did you work for pay in the past, or have you never been in paid work or self-employed?

DE GE IE IL IN IS LT PH SE SI TR TW ZA: Are you currently working for pay, did you work for pay in the past, or have you never been in paid work?

DK: Are you currently employed? Have you ever been employed?

EE: Now we would like to know about your current work or employment. What of the following best describes you? Have you ever been employed?

ES: Would you mind to tell me what is your employment situation at present?

FI: Are you currently in paid work?

FR: What is your situation in relation to work?

GB-GBN: Which of these descriptions applied to what you were doing last week, that is the seven days ending last Sunday? How long ago did you last have a paid job of at least 10 hours a week?

HR: Are you currently employed in paid work or have you never been employed?

HU: Are you currently working/ retired? What is (was) your (last) position or job?

JP: Are you currently working for pay, for at least one hour per week?

KR: Do you have a job that provides income? Have you ever had a paid job?

NO: Are you or have you ever been in paid work?

PT: Which of the following situation applies to your case?

US: Last week were you working full time, part time, going to school, keeping house, or what?

- 1 Currently in paid work,
- 2 Currently not in paid work, paid work in the past
- 3 Never had paid work
- 9 No answer

Note:

/ CZ: It is common in the Czech context to take advantage of a relatively long maternity (28 weeks) and parental (until child turns 3) leave, therefore persons on maternity/ parental leave were not treated as economically active unless they are simultaneously working for pay for at least one hour per week.

TYPORG1 - Type of organization, for-profit/ non profit

BVQ_11. TYPORG1

Do/ did you work for a for-profit organisation or for a non-profit organisation?

BE: Do you work (or used to work) for a for-profit or a non-profit organisation? The goal of a for-profit organisation is making profit. That's not the case with a non-profit organization.

CH: Do/did you work for a for-profit organisation or a non-profit organisation? If Self-employed: Is/ was your enterprise a for-profit organisation or a non-profit organisation?

CZ: In what type of business do you work? If you are currently not in paid work, refer to your last employment.

DE FI GE IE IL IN IS JP LT LV PH SE SI TR ZA: Do/ did you work for a for-profit organisation or for a non-profit organisation?

EE: Are you (were you last) working in public sector or private sector? If you have (had) more than one jobs, please account for your main job here.

ES: Please indicate what type of organization you work/ worked for.

FR: computed from WORK and the country specific variable WRKTYP

GB-GBN: Which of the types of organisation on this card (do you work/did you work/will you be working) for?

HR: Are you currently employed (or have been in the past) in the organisation which main work can be described as

HU: What is/ was the form of your employer? Are/ were you a civil servant, public servant, state, municipal or other corporation employees at work?

KR: Are you employed by the government, a publicly owned firm, a private firm, or a non-profit organization? What type of job did you have lately?

NO: Do/ did you work for an organisation that have/ had profit for it's owners as an objective, or in an organisation without such objective (government, civil service, trust etc.)?

PT: For what type of organization do/ did you work?

RU: What type of organization do/ did you work for at you (last) main job?

SK: Would you say that the organisation/firm you work/ed for is profit-oriented, or is it not?

0 NAP (Code 3 in WORK); NAV (US)

1 For-profit organization

2 Non-profit organization

8 Don't know

9 No answer

Note:

/ HR: Profit designation is NOT related to the current economic situation and business success of an organization. Examples of profit organizations are those working as a private company, but also those working as a public enterprise that generates income to the owners (HEP, the Croatian forest ...). An example of non-profit organization would be teachers and doctors in the state sector, while teachers and doctors in private schools, clinics and hospitals should define their work in for-profit companies.

/ LT: Non-profit organizations are public agencies, associations, charity and support funds, home owners' communities, political parties, trade unions, organizations of artists and other organizations

ISCO88 - Occupation ISCO/ ILO 1988

BVQ_13. ISCO88: Respondent's Occupation: International Occupation Code 1988

a. What is/ was your occupation - i.e., what is/ was the name or title of your main job?

b. In your main job, what kind of activities do/did you do most of the time?

c. What does/did the firm/organisation you work/worked for mainly make or do - i.e., what kind of production/function is/was performed at your workplace?

BE: What is the name of your current main profession (of former profession if you have no paid work anymore)? Describe as detailed as possible what your (former) profession implies (implied).

CH: What is/ was your current/ last occupation (principal employment)? In your main job, what kind of activities do/ did you do most of the time?

CZ: (Those who ever been in paid work) What is (was) your current (last) occupation, what kind of activity do (did) you do in it? State your job title and describe briefly the job activity you do (did) in this occupation.

DE: What work do you do in your main job? Does this job, this work have a special name? (If respondent not employed in main job) Until what year were you in full to 'half' time employment or have you never been in full to 'half' time employment? What work did you do in your last main job?

DK: What are/ were your accurate occupation? State your full occupation (title) and briefly describe, what you primarily do/did at your workplace

EE: What is (was) your occupation - what is (was) the name or title of your main job? What kind of activities do (did) you do most of the time? What does (did) the firm/organisation you work(worked) for mainly make or do? Please write in and describe as clearly as possible. Please do not use abbreviations.

ES: Could you tell us what is or was your last occupation? Please describe exactly what your tasks are/ were? Could you tell us what the company you work/ worked is engaged in?

FI: What is your current or latest occupation? Write in the job title, not qualification/degree.

FR: If you are working, what is your current occupation? If you do not work but if you have already worked, what was your last occupation?

GB-GBN: Now I want to ask you about your (present/ last/ future) job. What (is/ was/ will) your job (be)? What (is/ was) the name or title of the job? What kind of work (do/ did/ will) you do most of the time? What training or qualifications (are/ were) needed for that job?

GE IE IN LT LV PH: What is/ was your occupation, what is/ was the name or title of your main job? In your main job, what kind of activities do/ did you do most of the time? What does/ did the firm/ organisation you work/ worked for mainly make or do, i.e., what kind of production/function is/was performed at your workplace?

HR: Please state the exact name of your job title and occupation. (Most recent job if respondent currently not employed, retired or unemployed) Describe what you do, what your main tasks are. What are the educational and professional requirements for your job?

HU: What is/ was your job?

IS: What is/was your main job? Which of the categories on this card fits your job most accurately? What kind of tasks do/did you mostly attend to in your main job? What kind of work takes/took place in your place of work?

JP: Please give details about the main type of work you are engaged in.

KR: What kind of work do you normally do? What do you actually do in that job? If currently not working, tell me about your last job.

NO: (If in paid work now or ever) What is/ was your work title (main job)? Please make a short description of your work tasks. Please describe your work tasks as accurately as possible. What does/did the organisation you work/worked for mainly make or do?

PT: What is/ was your occupation/ professional activity?

RU: What is your current occupation? What kind of activities do/did you do most of the time? (Occupation at the most recent work place if no current job)

SE: What is your occupation? If you are retired or not working at the moment, please indicate what your occupation was in your last job. What kind of production/ activity is performed at your current or last workplace?

SI: What profession or work do you do now? If not working at the moment: what was your last (main) occupation before losing your job or becoming retired. Tell detailed name of your position at work and exact profession. What is the main activity of your work organisation?

SK: Please, write the name of your main occupation. Include detailed description of your working activity: what is your principal activity, responsibility etc. If you are not in labour force (retired or unemployed) at the moment, think of your most recent job. If you are self-employed or entrepreneur, please specify the area of your business.

TR: What is/was your occupation? So, what is your title?

TW: What is your main occupation (at present, or prior to retirement)?

US: Did you ever work for as long as one year? What kind of work do/ did you normally do? That is, what is/ was your job called? What do/ did you actually do in that job? Tell me what are/ were some of your main duties? What kind of place do/ did you work for? What do/ did they (make/ do)?

ZA: What is your current occupation? (The name and title of your main job).

 9998 Don't know, inadequately described
 9999 No answer

Note:

/ CZ: Modification of KZAM (Czech national ISCO-88 related classification) recoded into ISCO-88 (ILO).

/ DE: ISCO88 taken from ALLBUS 2014 and constructed from respondent's current occupation (main job): If respondent currently not employed or part time employed but employed in the past then last occupation (main job) taken according to ISCO88 (ILO) with some additional codes which are already recoded.

/ EE: ISCO88 codes are coded directly from the responses

/ FR: French classification of the occupations and the social categories (PCS 1994) were recoded.

/ GB-GBN: ISCO88 (COM) is derived from [XSOC200] using the translation table.

/ NO: STYRK (Standard Classifications of Occupations) based on, but not identical to ISCO88-COM. STYRK codes are recoded into ISCO88 ILO according to the syntax available in the BV documentation.

/ PT: ISCO88 4 digits were coded from open ended question

/ SE: A recoding scheme between the national occupation scheme SSK and ISCO88-COM is available.

/ SK: Slovak national ISCO-88 recoded into ISCO-88 (ILO)

/ TR: Open ended question answers are then coded according to (ISCO) occupation descriptions into ISCO88

/ US: US Occupation Codes OCC80 from GSS are recoded to ISCO88.

MAINSTAT - Main status

BVQ_14. MAINSTAT

Which of the following best describes your current situation?

If you temporarily are not working because of temporary illness/ parental leave/ vacation/ strike etc., please refer to your normal work situation.

BE: Which of the following possibilities describes your current situation as best as possible?

CH DE FI GE IE IL IN IS JP LT LV PH SE SK: Which of the following best describes your current situation? If you are temporarily away from paid work because of parental or other leave, unpaid leave or some other similar reason, please answer according to your normal work situation.

CZ: Which of the following options best describes your job position?

DK: Are you currently employed?

PARTLIV - Living in steady partnership

BVQ_15. PARTLIV

Do you have a spouse or a steady partner and, if yes, do you share the same household?

BE EE: Do you currently have a spouse or partner, if yes, do you live in the same household?

CH: Now, let's talk about your family. Do you have a spouse/ partner? Do you currently live with your husband (wife)/ your partner?

CZ: Do you have a steady partner?

DE: What is your marital status? Do you have a steady partner? For same-sex, formally legalised civil partnerships. Household grid I would like some information about the other people living in this household, that is not counting yourself. Please include toddlers, or people who normally live here but are currently away, e.g. in hospital or on holiday. Please name the persons in order of their age (starting with the oldest person).

ES: Please tell me which of the following statements best describes your current situation.

FI: Are you married, cohabiting or in a registered civil partnership and do you live together?

FR GE IE IL IN JP LT LV NO PH SE TR ZA: Do you have a spouse or a steady partner and, if yes, do you share the same household?

HR: Do you have a husband/ wife (are you married) or steady partner (unmarried)? If so, do you live in the same household?

HU: What is your family status? Are you living with a partner? Not asked if respondent is married and lives with his/ her wife/ husband.

IS: Do you have a spouse or a steady partner? (If yes) do you live together?

KR: Is [PERSON] now married, widowed, divorced, separated, cohabiting, or never married?

PT: Which of the following situations that I will read to you better describes your case? For respondents who do not live in a relationship at the moment, even if they are still legally married (i.e. Separated), please punch the answer 'I am not married and have no partner'.

RU: What is your marital status? Do you share the same household?

SI: Do you have a partner? Do you live together with a partner?

SK: Do you have a steady partner, a husband/ spouse?

US: Which of these statements applies to you? Are you currently married, widowed, divorced, separated, or have you never been married?

0 Not available (GB)

1 Yes, have partner; live in same household

2 Yes, have partner; don't live in same household

3 No partner

SPEMPREL - Spouse, partner: employment relationship

BVQ_18. SPEMPREL

Is/ was your spouse/ partner an employee, self-employed, or working for his/ her own family's business?

BE: If your spouse or partner has currently paid work (of had paid work in the past), what corresponds with his/her work situation?

CH GE IE IN JP LT LV PH SE SK ZA: Is/ was your spouse/ partner an employee, self-employed, or working for his/ her own family's business?

CZ: What is/ was your partner/ spouse's economic status, main source of subsistence?

DE: Please classify your husband's/wife's occupational status according to this card.

DK: Are/ were your spouse/ partner in public or private employment or self-employed?

EE: Now we would like to know about your spouse's/ partner's current work or employment. What of the following best describes your spouse/partner?

ES: Please indicate which best suits to the current situation or last employment of your partner:

FI: If your spouse/ partner has more than one employer or if he/ she is both employed and entrepreneur/ self-employed, answer according to his/her main job. If he/ she is currently not in paid work or is retired/ pensioner, please answer according to his/ her last job. Own-account workers and tradespeople are counted as self-employed. Is /was your partner

GB-GBN: In your (husband's/ wife's/ partner's) (main) job (is/will) (he/she) an employee or self-employed?

HR: Is your husband/ wife or steady partner (or was previously):

HU: Is your partner currently working/ retired? What is (was) your partners (last) position or job? Is your partner self-employed? How many employee/subordinates does (did) your partner have?

IS: Is/ was he/ she an employee, self-employed or working for his/her own family business?

KR: Is/ was your spouse/ partner working for the family, self-employed with no employees, or self-employed with employees? What type of job did he/ she have at that time?

NO: Are/were your spouse/ partner

PT: In his/ her professional activity your partner is/ was:

RU: What type of organization do/did your wife/husband/partner work for?

SI: Is (was) your partner employed (working for others), self-employed or works (worked) in his/her own family business?

TR: Is/ was your wife or your partner a paid worker, self-employed without employees, self-employed with employees or working as an unpaid worker for own family's business?

TW: Is/ Was your spouse (partner) self-employed or a employee?

US: Is/ was s/ he self-employed or does/ did s/ he work for someone else?

0 NAP (Code 0,3 in SPWORK;DE,EE,HU:0,2,3 in SPWORK)

1 Employee

2 Self-employed without employees

3 Self-employed with employees

4 Working for own family's business

5 Self-employed with or without employees (GB)

8 Don't know

9 No answer

Note:

/ US: The US data omit '3: Self-employed with employees' and '4: Working for own family's business' because they were not asked. Please also note that the US questionnaire did not ask about non-married partners' work status.

SPISCO88 - Spouse, partner: occupation ISCO/ ILO 1988

BVQ_20. SPISCO88

Spouse/ partner Occupation: International Occupation Code 1988

a. What is/ was your spouse's/ partner's occupation - i.e., what is/ was the name or title of his/ her main job?

b. In his/ her main job, what kind of activities does/ did he/ she do most of the time?

c. What does/ did the firm/ organisation he/ she work/ worked for mainly make or do - i.e., what kind of production/ function is/ was performed at his/ her workplace?

BE: What is the name of the current (former) main profession of your spouse or partner? Describe what the (former) profession of your partner implies (implied)?

CH: (If respondent has a partner - married or not - and lives with him) What is/ was his/ her current/ last occupation? In his/ her main job, what kind of activities does/ did he/ she do most of the time?

CZ: And what is (was) your partner's current (last) occupation, what kind of activity does (did) he/she do in it? Please state his/her job title and describe briefly the job activity he/she does (did) in this occupation.

DE: (If respondent has spouse or steady partner) Which of the categories on the card applies to your husband/ wife/ partner? What work does your spouse/ partner do in his/ her main job? Please describe this work precisely. Does this job, this work have a special name?

DK: What are/ were your spouse/ partner's accurate occupation? State your wife's/ husbands full occupation (title) and briefly describe, what he/she primarily do/did at his/hers workplace

EE GE: What is (was) your partner's/ spouse's occupation - what is (was) the name or title of his/ her main job? What kind of activities does (did) he/she do most of the time? What does (did) the firm/organisation he/she work (worked) for mainly make or do? Please write in and describe as clearly as possible. Please do not use abbreviations.

ES: Could you tell us what his/her job is or last occupation was? Please describe exactly what his/her tasks are/were? Could you tell us what the company he/she works/worked is/was engaged in?

FI: If you are currently married or cohabiting or in a registered partnership, what is your spouse's current or latest occupation?

FR: What is his/ her occupation or last occupation?

GB-GBN: Now I want to ask you about (husband's/ wife's/ partner's) (present/ future) job. What (is his, her job/ will that job be)? What (is/ was) the name or title of the job? What kind of work (do/ will) (he/ she) do most of the time? What training or qualifications (are/ were) needed for that job?

HR: Please state the exact title of your spouse/ partner's job title and occupation. Describe what he/ she does; what his/ her main tasks are. What are the educational and professional requirements for the job?

HU: What is/ was the job of your spouse/ partner?

IE IL IN LT LV PH: What is/ was your spouse's/ partner's occupation, i.e., what is/ was the name or title of his/ her main job?

IS: What is/was his/hers main job? What kind of activities does/did he/she mostly attend to in his/her main job? What kind of activities takes/took place at his/her workplace?

JP: Please give details about the main type of work your spouse is engaged in.

KR: Does your spouse have a job that provides income? Has your spouse ever worked for pay? What kind of work does your spouse normally do? (If currently working or ever worked for pay) What does (he/ she) actually do in that job? If currently not working, tell me about (his/ her) last job.

NO: What is/ was your spouse/ partner's work title (main job)? Please make a short description of her/his work tasks. Please describe her/his work tasks as accurately as possible. What does/did the organisation he/she work/worked for mainly make or do?

PT: What is/ was the professional activity of your partner?

RU: What is (was) your spouse/partner occupation? What kind of activities does/ did he/ she do most of the time?

SE: What is your husband's/ wife's/ live-in partner's occupation? If he/ she is retired or not working at the moment, please indicate what his/ her occupation was in his/ her last job. Please describe it as clearly as possible. What kind of production/ activity is performed at his/ her current or last workplace?

SI: What profession or work does your partner do now? If he/she is not employed: what was his-her last (main) profession before retirement or before losing his-her job? Tell detailed name of your partner's position at work and exact profession. Please, describe what kind of activities he/ she does, what are his/her main duties at this work. What does/ did the firm/ organisation your partner work/ worked for mainly make or do?

SK: Please, write the name of the main occupation of your spouse/ partner. Include detailed description of his/ her working activity: what is his/ her principal activity, responsibility etc. Use two or more words and exclude abbreviations. If your spouse/ partner is not in labour force at the moment (is retired or unemployed etc), think of his/ her most recent job.

TR: What is your spouse or partner's occupation? So, what is his/her title?

TW: What is your spouse's or partner's main occupation at present? (or prior to retirement)

US: (If married and spouse presently in paid work or ever worked as long as one year) What kind of work does/ did your spouse normally do? That is, what is the job called? What does/ did your spouse actually do in that job? Tell me what are some of his/ her main duties? What kind of place does/ did your spouse work for? What do they (make/ do)?

ZA: What is your spouse/ partner's current occupation?

9998 Don't know, inadequately described
9999 No answer

Note:

/ CZ: Modification of KZAM (Czech national ISCO-88 related classification) recoded into ISCO-88 (ILO).

/ DE: ISCO88 taken from ALLBUS 2014 and constructed from spouse/ partner current occupation (main job): If respondent currently not employed or part time employed but employed in the past then last occupation (main job) taken according to ISCO88 (ILO) with some

additional codes which are already recoded.

/ EE: ISCO88 codes are coded directly from responses

/ FR: French classification of the occupations and the social categories (PCS 1994) were recoded.

/ GB-GBN: ISCO88 (COM) is derived from [XSOC200] using the translation table;

/ NO: STYRK (Standard Classifications of Occupations) based on, but not identical to ISCO88-COM. STYRK codes are recoded into ISCO88 ILO according to the syntax available in the BV documentation.

/ PT: ISCO88 4 digits were coded from open ended question

/ SE: A recoding scheme between the national occupation scheme SSK and ISCO88-COM is available.

/ SK: Slovak national ISCO-88 recoded into ISCO-88 (ILO)

/ TR: Open ended question answers are then coded according to (ISCO) occupation descriptions into ISCO88

/ US: US Occupation Codes OCC80 from GSS are recoded to ISCO88.

SPMAINST - Spouse, partner: main status

BVQ_21. SPMAINST

Which of the following best describes your spouse's/partner's current situation? If he/ she temporarily is not working because of temporary illness/ parental leave/ vacation/ strike etc., please refer to his/ her normal work situation.

BE: Which of the following possibilities describes the current situation of your partner?

CH DE FI GE IE IL JP LT PH SE SK ZA: Which of the following best describes the current situation of your spouse/ partner?

CZ: Which of the following options best describes your partner/ spouse's job position?

DK: Are your spouse/ partner currently employed?

EE: Now we would like to know about your spouse's/ partner's current work or employment. What of the following best describes your spouse/ partner?

ES: Of the following options, which is the one that best describes the current situation of your partner?

FR: Currently, which one of those situations best fits him/her?

GB-GBN: Which of these descriptions applied to what your (wife/husband/partner) was doing last week, that is the seven days ending last Sunday?

HR: What is the work status of your spouse/partner (which of following best describes his/her current situation)?

HU: Is your partner currently working/ retired? Is your partner currently looking for a job? Is your partner working as an apprentice or as a trainee?

KR: Does your spouse/ partner has a job that provides income? (If not working) What is the primary reason for unemployment?

NO: What is your spouse/ partner's current main activity? If she/he is on sick leave, parental leave etc., refer to her/his normal situation.

PT: What is the current professional situation of your partner?

RU: Is your spouse (partner) currently working for pay? If no, what is his/her status? Did your spouse/partner work for pay in the past?

SI: What best describes your partner's current employment status? If he/ she is not working at the moment, because of an illness, maternity leave, strike etc., think of her/ his usual employment status.

TR: Which of the following does suit your wife or partner best?

TW: Does your spouse (partner) currently have a job?

US: Last week was your spouse working full time, part time, going to school, keeping house, or what?

0 NAP (Code 3, 7 in PARTLIV;US:3-6 in MARITAL)

1 In paid work

2 Unemployed and looking for a job

3 In education

4 Apprentice or trainee

5 Permanently sick or disabled

6 Retired

7 Domestic work

8 In compulsory military service or community service

ATTEND - Attendance of religious services

BVQ_24. ATTEND

Apart from such special occasions as weddings, funerals, etc., how often do you attend religious services?

BE: Not including services such as marriage, funeral, baptism, how many times do you attend religious services?

CH CZ EE GE HR IE IL IN IS LT LV SE SI: Apart from such special occasions as weddings, funerals, etc., how often do you attend religious services?

DE: As a rule, how often do you go to church resp. to the mosque, synagogue or to another house of prayer?

DK HU KR PH RU US: How often do you attend to religious services?

ES: How often do you attend religious services? Please disregard special occasions like weddings, funerals, etc ...

FI: Apart from weddings, how often do you attend worship services or other religious services or church ceremonies?

FR: Except the marriages, the funerals and the baptisms, how often do you attend a religious cult?

GB-GBN: Apart from such special occasions as weddings, funerals and baptisms, how often nowadays do you attend services or meetings connected with your religion?

JP: How often do you attend a place of worship or prayer? Exclude ceremonial occasions, such as wedding or funerals.

NO: How often do you attend religious services or other religious meetings? (Do not include weddings, funerals, or baptisms or similar).

PT: Not counting special occasions such as marriages, funerals and baptisms, how often do you take part in religious services?

SK: How often do you participate in religious services (such as masses and church services)?

TR: How often do you pray, if you consider last one year?

TW: How often do you participate in any religious group at present? (e.g. pilgrim group, practicing Zen, Sunday service, spirit-cultivation meeting, sermon-delivering meeting, volunteer work, etc.)? Please answer this question regardless of whether you have a religious belief or not.

ZA: Apart from special occasions such as weddings, funerals and baptisms, how often do you attend services or meetings connected with your religion?

0 ES:NAP(Code 0 in ES_RELIG);TR:Not available

1 Several times a week or more often (incl. every day, several times a day)

2 Once a week

3 2 or 3 times a month

4 Once a month

5 Several times a year

6 Once a year

7 Less frequently than once a year

8 Never

97 Refused

98 Don't know

99 No answer

Note:

/ DE: Attendance of religious services taken from ALLBUS 2014; church attendance answer categories deviate from ISSP ATTEND categories: German category 3 collapses ISSP categories 3 and 4; German category 5 implicitly includes ISSP category 6.

TOPBOT - Top-Bottom self-placement

BVQ_25. TOPBOT Top - Bottom self-placement (10 pt scale)

In our society, there are groups which tend to be towards the top and groups which tend to be towards the bottom. Below is a scale that runs from the top to the bottom.

Where would you put yourself on this scale?

BE: In our society there are groups at the top of society and others at the bottom of society. Where would you place yourself on this scale?

CH DE GE IE IL IN KR LT LV NO RU SE SI TW ZA: In our society there are groups which tend to be towards the top and groups which tend to be towards the bottom. Below is a scale that runs from top to bottom. Where would you put yourself now on this scale?

CZ: In our society, there are groups which tend to be associated with high social status and, in contrast, groups which tend to be associated with low social status. Where would you put yourself on this scale?

DK: In our society one sometimes talk about, that there are some groups which are perceived as higher ranked in society and other groups which are perceived as lower ranked. Below there is a scale which runs from top to bottom. If you should place yourself on this scale where 1 is bottom of society and 10 is top of society, where would it be?

EE: In our society, there are groups which tend to be towards the top and groups which tend to be towards the bottom. Below is a scale that runs from the top to the bottom. Where would you put yourself on this scale of 1...10?

Note: 1 is the lowest level, there are those at the margins of society, 10 is the highest level, there are those with most wealth and power.

ES: In a 10-point scale where 0 means the lowest social class and 10 means the highest social class, where would you stand (see Note below)?

FI: There are different classes in our society. Some social classes are higher and some lower. On a scale from 1 to 10 where 10 is the highest class and 1 the lowest, where would you place yourself? Please circle only one number.

FR: In our society, there are groups which are rather at the top of the society and the others which are rather below. Here is a scale which goes of the highest at the lowest. Where do you think you stand on this scale?

HR: In our society there are groups of people that hold higher or lower social position. Where would you locate yourself on the scale, that ranges from 10 (top) to 1 (bottom)?

IS: Some groups tend to be near the top of the social ladder and some groups tend to be near the bottom of the social ladder. In this card there is a scale that runs from the top stair of the social ladder to the bottom stair. Where would you place yourself on this scale?

JP: If current Japanese society were divided into 10 strata (1 being the lowest, and 10 being the highest), to which stratum do you think you belong?

PH: At present, where will you put yourself on this card regarding your current situation in life?

PT: In general, some people are at the top of our society and other people are at the bottom. The scale of this card represents the top and the bottom. At which scale point do you think you currently are?

SK: In our society there are people who have a higher position but there are also people which are closer to lower positions. The enclosed scale is arranged from top (code 10) to bottom (code 1). Where would you put yourself on this scale?

TR: Some people have a high some others have a low social status in society. Where would you place yourself on a ladder of social status where 1 represents the lowest and 10 the highest social status?

99 No answer

Note:

/ ES: The scale in the Spanish questionnaire differs from the standard ISSP scale using a 11-point scale instead of the 10-point scale.

Category '0' and '1' in the Spanish scale have been combined in order to create variable TOPBOT with ISSP standard scale 1-10.

VOTE_LE - Did respondent vote in last general election

BVQ_27. VOTE_LE

Some people don't vote nowadays for one reason or another. Did you vote in the last [country] national election in [month/year]?

BE: For which party did you vote for the last federal (national) elections on June, 13th 2010?

CH: Some people don't vote nowadays for one reason or another. Did you vote in the last federal elections in October 2011?

CZ: Let's go back to the last elections to the Chamber of Deputies, which took place on October 25 to 26, 2013. Did you participate in these elections?

DE: The last general election took place in September 2013. Did you vote in that election?

DK: Did you vote in the previous election the 15 September 2011, or were there some reason that you didn't have opportunity or desire to vote?

EE: Did you vote in the last Estonian parliamentary elections for Riigikogu in 2011?

ES: Did you vote in the last general elections of 2011?

FI: Did you vote in the last parliamentary elections in April 2011?

FR: Did you vote or do you intend to vote in first round of the 2012's French Presidential Election?

GE: Some people do not take part in the elections as voters (not using the right to vote). Did you vote in the last Georgian parliamentary national election on October 1, 2012?

HR: Some people do not vote in parliamentary elections for different reasons. Did you vote in the last parliamentary elections held in December 2013?

HU: Did you vote in the last general election in April 2010?

IE: Some people don't vote nowadays for one reason or another. Did you vote in the last general election in February 2011?

IL: Some people do not vote in elections for one reason or another, did you vote in the last Knesset elections that were held in January 2013?

IN: Some people don't vote nowadays for one reason or another. Did you vote in the last general election (Lok Sabha) 2009?

IS: Some people don't vote nowadays for one reason or another. Did you vote in the last general election in Iceland in April 2013?

JP: Did you vote in the last Japanese House of Councillors election in July 2013?

KR: Did you vote in the 18th South Korean Presidential Election on December 19, 2012?

LT: Some people don't vote nowadays for one reason or another. Did you vote in the last Seimas election in October 2012?

LV: Some people don't vote nowadays for one reason or another. Did you vote in the election of 11th Saeima that took place on October 2nd 2011?

MX: Did you vote in the federal elections of 2012?

NO: Did you vote in the last parliamentary election in 2013?

PH: Some people don't vote nowadays for one reason or another. Did you vote in the last Philippine national election in May 2013?

PT: Did you vote in the last elections for the Assembleia da República on 05 of June of 2011?

RU: Did you vote in the last elections of the State Duma of Russia in December 4, 2011? If yes, for whom did you vote?

SE: Some people don't vote nowadays for one reason or another. Did you vote in the last national election?

SI: Some people do not participate in elections for various reasons. Did you vote in the last election (in December 2011) for the National Assembly?

SK: Some people vote, others do not. Did you vote in the last parliamentary elections which took place in March 2012?

TR: Some people do not vote due to several reasons. Did you vote in the last general elections, on June, 12th 2011?

TW: Did you vote in the Presidential election held in January 2012? Which candidate did you vote for?

US: In 2012, you remember that Obama ran for President on the Democratic ticket against Romney for the Republicans. Do you remember for sure whether or not you voted in that election?

ZA: Some people don't vote nowadays for one reason or another. Did you vote in the last national election in 2009?

0 NAP, not eligible to vote at last election

1 Yes

2 No

7 Refused

8 Don't know

9 No answer

Note:

/ PT: Option 0 was not directly presented to respondents. If date of birth was equal or inferior to 1992, it was recoded automatically 0 (Not eligible to vote at last election)

PARTY_LR - R: Party voted for in last general election: left-right (derived from nat_PRTY)

Party voted for in last general election: left/ right scale

Based on 'party voted for in last general election' and derived by expert judgement from the country-specific parties (nat_PRTY) into the left-right scheme except:

GB-GBN: (If R is no closer to one party than others) If there were a general election tomorrow, which political party do you think you would be most likely to support?

<Question text see nat_PRTY>

0 NAP (Code 0, 2, 7 in VOTE_LE); NAV (GE,IL,TW)

1 Far left (communist etc.)

2 Left, center left

3 Center, liberal

4 Right, conservative

5 Far right (fascist etc.)

6 Other

7 Invalid ballot, Vote blank, No party affiliation (PH)

97 Refused

98 Insufficient information to code into scheme

99 No answer

Note:

/ GB: Left-right scale does not refer on party voted at last election, but on party supporting at next election

/ IL: The left/ right placement is not available since the traditional left-right issues are not central to most political parties.

/ TW: A kind of classification into the left-right scheme does not fit for Taiwan's political situation

DK_ETHN1 - Country specific ethnic group 1: Denmark

DK_ETHN1 - Denmark: Country specific ethnic group 1

Where are you born?

Where is your mother born?

Where is your father born?

Danish origin is given if:

- Respondent is born in Denmark with at least one of the parents also born in Denmark.
- Respondent is born in a foreign country with at least one of the parents born in Denmark.

Foreign country's origin is given if:

- Respondent is born in Denmark with both parents born in a foreign country. If the parents are born in different foreign countries the mother's country of origin is determinant.
- Respondent is born in a foreign country with both parents also born in a foreign country. If all three are born in different foreign countries the mother's country of origin is determinant.

IL_ETHN1 - Country specific ethnic group 1: Israel

IL_ETHN1 - Israel: Country specific ethnic group 1

The ethnic measures used in Israel typically address ethnicity as country of birth (in Israel we ask for the country of birth of the respondent and his parents) and religion.

The measures are based on objective information of reported religion and country of origin.

ZA_ETHN1 - Country specific ethnic group 1: South Africa

ZA_ETHN1 - South Africa: Country specific ethnic group 1

Race of respondent

- 0 NAP, other countries
- 1 Black African
- 2 Coloured
- 3 Indian/Asian
- 4 White
- 5 Other
- 99 No answer

Note:

/ ZA: Given the apartheid history in South Africa, the race categorization of white, black (African), Indian and coloured is very commonly understood in South Africa. This is the most common variable used to categorise the various races. Among the African people there are various tribes, and the most common way – although this is seldom used-to ethnise the African group would be to use the African language that they speak, i.e. Sesotho, Setswana, Sepedi, Siswati, IsiNdebele, IsiXhosa, IsiZulu, Xitsonga, Tshivenda. In terms of the White groups (Europeans) it is fairly uncommon to ask origin country and the only further distinction is again based on language, that is the Afrikaans speakers and the English speakers. Coloured people and the Indian population are generally treated as a homogenous group with no further distinction.

HHCHILDR - How many children in household: children between [school age] and 17 years of age

BVQ_30. HHCHILDR

Including yourself, how many people - including children - usually live in your household?

How many children in household: children between school age and 17 years old

BE: Including yourself, your partner, your children and others, how many people live here as members of your household? Complete number by age group: number of adults of 18 years and older, number of children between 6 and 17 years old, number of children until 5 years old, total number of household members

CH: Would you please indicate the first name, the year of birth and the sex of each person, children included, living in the household, beginning with the oldest one?

CZ: Of those, how many dependent children aged 7-17 live in your household?

DE: Please tell me what month and what year (person 1) was born in?

DK: How many persons in your household are under 18 years, i.e. between 0 and 17 years?

EE: Children between 7 and 17 years of age

ES: How many of these people are between 6 and 17 years?

FI: Including yourself, how many people usually live in your household aged 7 - 17 years?

FR GE JP: How many persons live currently in your household, including yourself? Children between 6-17 years of age

GB-GBN: What was (name)'s age last birthday? Asked for all members of household after respondent

HR: How many children from 7 to 17 years old do live in your household?

HU: I would like to ask some questions about the members of your family. Let's start with you! ... Date of birth

IE: How many children aged between 6 to 17 usually live in your household?

IL: Including yourself, how many people - including children - usually live in your household? How many children between [school age] - 17 years of age?

IN: How many children between 5 to 17 years of age live in your household?

IS: Including yourself, how many ... Adults, 18 years and older, usually live in your household? And children in the age of 6-17? And children in the age of 5 years or younger? How many then usually live in your home in total?

JP: Children between 6 to 17 years of age

KR: Now I would like to ask about your family members. Please include all family members who are living in your house and who are temporarily living somewhere else. Answer the following question beginning with yourself: How old is person?

LT: Including yourself, how many people - including children - usually live in your household: children between 7 and 17 years of age. Household grid

LV: Including yourself, how many persons – including children – usually live in your household?: Children between 7 -17 years of age

NO: Number of children 6-17 years old

PH: Number of children 7-17 years old

PT: From these, how many are between 6 and 17 years old?

RU: How many children of school age live in your household?

SE: How many persons are between 7 and 17?

SI: Children and teens from 6 to 17 years of age

SK: How many children between 6 and 17 years live in your household?

TW: Among those who live in your residence, how many of them are aged 7 to 17?

US: Teens from 13 to 17 years, children from 6 to 12 years

ZA: Derived from household roster: children 6-17 years

HHTODD - How many toddlers in household: children up to [school age -1] years

BVQ_31. HHTODD

How many children in household: Children up to the age of school age.

BE: Including yourself, your partner, your children and others, how many people live here as members of your household? Complete number by age group: number of adults of 18 years and older, number of children between 6 and 17 years old, number of children until 5 years old, total number of household members

CH: Would you please indicate the first name, the year of birth and the sex of each person, children included, living in the household, beginning with the oldest one?

CZ: Of that total number, how many dependent children aged 0-6 live in your household?

DE: Please tell me what month and what year (person 1) was born in.

DK: How many of the children are below school-age?

EE: Children between 3 and 6 years of age; children between 1 and 2 years of age; children up to the age of 1 year

ES: And how many children aged 0 to 5 years?

FI: Including yourself, how many people usually live in your household aged 6 years or under?

FR JP: How many persons live currently in your household, including yourself? Children up to the age of 5 years

GE SI: Children up to the age of 6

GB-GBN: What was (name)'s age last birthday? Asked for all members of household after respondent

HR: How many children from 0 to 6 years old do live in your household?

HU: I would like to ask some questions about the members of your family. Let's start with you! ... Date of birth (2008-2013)

IE: How many children up to the age of 5 usually live in your household?

IL: Including yourself, how many people - including children - usually live in your household? How many children up to the age of [school age - 1] years are?

IN: How many toddlers up to the age of 4 years live in your household?

IS: Including yourself, how many ... Adults, 18 years and older, usually live in your household? And children in the age of 6-17? And children in the age of 5 years or younger? How many then usually live in your home in total?

KR: How old is person?

LT: Including yourself, how many people - including children - usually live in your household: children up to the age of 6 (inclusive)?

LV: Including yourself, how many persons - including children - usually live in your household?: Children up to the age of 7 years

NO US: Number of children less than 6 years old

PH: Number of children up to 6 years old (including step children/ temporarily away)

PT: From these, how many are children aged less than 6 years old?

RU: How many children up to the age of 6 live in your household?

SE: How many persons are below 7 years?

SK: How many children younger than 6 years live in your household?

TW: Among those who live in your residence, how many of them are aged 0 to 6?

US: I need to know each person's age.

ZA: Derived from household roster: children up to 5 years (including)

HOMPOP - How many persons in household

BVQ_29. HOMPOP

Including yourself, how many people - including children - usually live in your household?

Adults of 18 years and older

Children between [school age] - 17 years of age

Children up to the age of [school age - 1] years

This makes a total of how many people?

BE: Including yourself, your partner, your children and others, how many people live here as members of your household? Complete number by age group: number of adults of 18 years and older, number of children between 6 and 17 years old, number of children until 5 years old, total number of household members

CH: How many persons constantly are living in your household, including yourself?

CZ: Including yourself, how many people live in your household? By household we mean people living in the same apartment or family house and who share resources.

DE: Apart from yourself, are there other people living in your household? Please count toddlers or people who normally live here but are currently absent, e.g. in hospital or on holiday.

DK: How many persons live in your household - including yourself?

EE: Including yourself, how many people live in your household?

ES: How many people, including yourself, live in your home altogether?

FI FR HR IN JP LT LV SI SK: Including yourself, how many people -including children - usually live in your household?

GE: Including yourself, how many people – including children – usually live in your household? Adults 18 years and older

GB-GBN: Thinking now of everyone living in this household, including children: Including yourself, how many people live here regularly as members of this household?

HU: Altogether how many persons, including you, live in your family (household)?

IE: Constructed as sum of responses to 3 questions: How many adults of 18 years and older, including yourself, usually live in your household? And HHCHILDR and HHTODD.

IL: Adults of 18 years and older living in your household

IS: Including yourself, how many ... Adults, 18 years and older, usually live in your household? And children in the age of 6-17? And children in the age of 5 years or younger? How many then usually live in your home in total?

KR: How many family members, including yourself, presently reside in your home? Do not include those who are temporarily living elsewhere due to schooling, employment, military service, etc.

NO: Including yourself, how many people live normally in your household, and how are the household members distributed on age groups? Number of people 18 years or more.

PH: Total number of persons in household including servants, transients, or boarders.

PL: How many people live in your house? (including you and people who are not part of your family, for example, guests, employees, etc.)

RU: How many people usually live in your household including yourself, children and temporarily away members?

SE: How many people - children and adults - usually live in your household (include yourself)? How many persons are 18 or older? How many persons are between 7 and 17 years? How many persons are below 7 years?

TW: Including yourself, how many people live in your residence?

US: Please tell me the names of the people who usually live in this household. Let's start with the person or one of the persons who own or rent this home. Does (PERSON IN ROW A) have a spouse or unmarried partner who lives in the household? Now, who else lives here? Are there any people currently staying here -visitors, friends or relatives - who do not usually live here? (Now that I have everyone who is currently staying here), I need to know each person's age.

ZA: Derived from household roster

EE_RINC - Country specific personal income: Estonia

EE_RINC - Estonia: Country specific personal income

Not asked. Only asked subjective income relative to average:

In your main job, is your salary (taxes deducted) above or below Estonian average? If you are not employed, please consider your last job.

(IN THE FOURTH QUARTER OF 2012, AVERAGE SALARY (TAXES DEDUCTED) IN ESTONIA WAS 729 EUROS)

- 1 Much less than average
- 2 A little less than average
- 3 About the average
- 4 A little more than average
- 5 Much more than average
- 6 Never had a job
- 7 Refuse
- 8 Do not know

INSTEAD, for personal income nat_RINC only income per household member is used, from the following question:

After taxes and other deductions, what on average is the total monthly income of your household, per each member of household?

- 100 Up to 200 EUR per month
- 250 201-300 EUR
- 350 301-400 EUR
- 450 401-500 EUR
- 575 501-650 EUR
- 725 651-800 EUR
- 900 More than 800 EUR per month
- 999990 NAP, all other countries
- 999997 Refused
- 999998 Don't know

Note:

/ EE: To get to the EE_INC, the medium in each 'income bracket' (100 for the first group, 250 for the second, 350 for the third, etc) was taken to be the 'value' of the income for household member (as in nat_RINC), and then this was multiplied with the number of household members (HOMPOP).

BE_INC - Country specific household income: Belgium

BVQ_33. nat_INC

Before taxes and other deductions, what on average is the total monthly income of your household?

BE_INC - Belgium: Country specific household income

What on average is the net monthly income of your household?

By net monthly income of the household we mean the total sum of the earnings, after tax deduction, everything included such as salaries, child benefits, retirement pay, replacement benefits (accident, disease, unemployment) or other incomes from capital or real estates, etc.

Note:

/ EE: To get to the EE_INC, the medium in each 'income bracket' (100 for the first group, 250 for the second, 350 for the third, etc) was taken to be the 'value' of the income for household member (as in nat_RINC), and then this was multiplied with the number of household members (HOMPOP).

SK_INC - Country specific household income: Slovakia

SK_INC - Slovakia: Country specific household income

Now we would like to ask about the income of your HOUSEHOLD.

By household we mean a shared household of spouses or partners, who live alone, with children, eventually with parents as well as households of independently living persons who share a common budget.

From the following list, please, choose the option that represents the size of net monthly income of all household members together when you include wages, pensions, scholarships and all other working and non-working incomes? Count in your income too please.

- 75 Up to 150 EUR per month, net
- 225 151-300 EUR
- 375 301-450 EUR
- 525 451-600 EUR
- 675 601-750 EUR
- 825 751-900 EUR
- 1050 901-1.200 EUR
- 1350 1.201-1.500 EUR
- 1750 1.501-2.000 EUR
- 2500 2.001-3.000 EUR
- 3500 More than 3.000 EUR per month

MARITAL - Legal partnership status

BVQ_34. MARITAL

What is your current legal marital status?

<The aim of this variable is to measure the current 'legal' marital status 'Living as married' or 'de facto married' is no legal partnership status and therefore not of relevance to this variable

Note that MARITAL must not be filtered by responses to PARTLIV.>

BE: What is your current legal partnership status?

CZ DK ES PT RU: What is your marital status?

CH: Here is a card with possible family situations. Can you please tell me which letter corresponds best to your actual situation?

DE: What is your legal marital status? Are you ...

EE GE IE IL IN IS JP LT LV NO PH SE SI: What is your current legal marital status?

ES: Could you tell me what is your marital status?

FI FR: Are you currently?

GB-GBN: derived from two country-specific variables and shows the legal marital status for all respondents who gave it.

HR: Marital status of respondent (legal status)

HU: What is your family status? Are you living with a partner?

KR: Is [PERSON] now married, widowed, divorced, separated, cohabiting, or never married?

SK TW ZA: What is your current marital status?

TR: May I learn your marital status? Despite being legally not married, like having only a religious wedding, do you live together with a partner?

US: Are you currently - married, widowed, divorced, separated, or have you never been married

- 1 Married
- 2 Civil partnership
- 3 Separated from spouse/ civil partner (still legally married/ still legally in a civil partnership)
- 4 Divorced from spouse/ legally separated from civil partner
- 5 Widowed/ civil partner died
- 6 Never married/ never in a civil partnership, single
- 7 Refused
- 9 No answer

Note:

/ PT: 'Civil partnership' was not asked

/ US: 'Civil partnership' was not an option listed in the US question about marital status.

F_BORN - Father's country of birth

BVQ_35. F_BORN

In which country was your father born?

Countries were recoded according to the numerical 3 digits ISO3166 code

BE: In which country are your parents born? Your father?

EE: Which country where you born in? Where were your parents born? Your father

ES: Can you tell me in which country your father was born?

GE HU PT: In which country was your father born?

SK: In which country was your father born? If he was born in Czechoslovakia, please specify, if he was born in Slovakia or Czechia.

US: Were both your parents born in this country? Respondents are not asked for parents' country of birth, only if their parents were born in the United States or not.

M_BORN - Mother's country of birth

BVQ_36. M_BORN

In which country was your mother born?

Countries were recoded according to the 3 digits ISO3166 codes

BE: In which country are your parents born? Your mother?

EE: Which country where you born in? Where were your parents born? Your mother

ES: And your mother?

GE HU PT: In which country was your mother born?

SK: In which country was your mother born? If she was born in Czechoslovakia, please specify, if she was born in Slovakia or Czechia.

US: Were both your parents born in this country? Respondents are not asked for parents' country of birth, only if their parents were born in the United States or not.

URBRURAL - Place of living: urban - rural

BVQ_37. URBRURAL

Would you describe the place where you live as...

<Based on self-assessment by Respondent.>

BE: Finally, which description suits your living environment the best?

CH: Which expression of this card describes best the place where you live?

CZ IS LT PT SK: How would you describe the place/ location you live in?

DE: Which of the categories of this list applies best to the place where you are living?

DK HU: Is the place you live a?

EE: Type of residence

ES GE GB-GBN IE IL IN LV PH: Would you describe the place where you live as ...

FI NO: Do you live in?

FR: You would say that you live in

HR RU: Where do you live in?

JP: What kind of community do you currently live in?

KR: Which of the categories below comes closest to the type of place you are living in now?

SE: The place where you live, is it?

SI: Type of a settlement, community. Size of a settlement

TR: Settlement type where the interview was undertaken.

TW: Do you think of the place you live as an urban or rural area?

US: Constructed by using XNORCSIZ and SRCBELT in US GSS. The XNORCSIZ indicates NORC size of place and SRCBELT stands for Survey Research Center New Belt Code.

ZA: Derived from geotype

- 1 A big city
- 2 The suburbs or outskirts of a big city
- 3 A town or a small city
- 4 A country village
- 5 A farm or home in the country
- 7 Other answer (GB)
- 9 No answer

SUBSCASE - Case substitution flag

Case substitution flag

Substitution in this survey

SUBSCASE is to indicate whether a respondent is from the original sampling frame or is substituted for some reason (interview not obtained because of invalid address, no contact, refusal, etc.)

0 No substitution in this survey

1 Case from original sample

2 Case substituted

Note:

/ DE PH: Case substitution used

WEIGHT - Weight

Weighting factor

No total weight usable for international comparism.

NATIONAL weighting procedures/ variables used for calculation of NATIONAL weights:

CH DK GE IL IS JP MX NO SE SI TR: No weighting

BE: In order to deliver one integrated harmonized data file for Belgium post stratification weights were calculated based upon age (three age groups: 18-39; 40-59; 60+), sex, and geographical classification (NUTS1 Flemish Region, Walloon Region, Brussels Capital Region). These characteristics are known for all sampled units and the population distributions are published by the Belgian Institute for National Statistics (ADS). The age-sex distribution in each region is reproduced by the weights as well as the distribution over the regions. The result of this weighting procedure in combination with the sampling design is that the weights for respondents of the Brussels Capital Region are much smaller than the weights for the respondents of the Flemish and Walloon regions. The use of adequate software is always necessary when analysing data with weights, but with these data it is vitally important when comparing the regions or analysing only one region separately.

DE: Two separate German samples: the sample for Eastern Germany deliberately over-samples the five Eastern federal states. If all of Germany is taken as the unit of analysis (rather than the eastern and western states), design weight is necessary: weighting factor for Western Germany: 1.188888; weighting factor for Eastern Germany: 0.5804064; recoding of the country variable is necessary (Scholz and Jutz forthcoming); The two weighting factors are stored in the weight variable.

EE: Weighting was performed based on the national population census 2011 data and weights are added for gender, age, ethnicity, urban/rural, and regions.

ES: Used variables: Sex (two categories) and Age (four age groups).

FI: gender; age classes (15–24, ..., 65–74); NUTS3 regions with following modifications: the Greater Helsinki Area was dealt as a separate region; type of community (urban - semi-urban - rural). Weight expands the results to the population level (the sum of the weights is the size of the population aged 15 to 74).

FR: Post stratification weighting computed on sex, age (4 groups: 18 to 29 years old, 30 to 39 years old, 40 to 54 years old, 55 years old or more) and occupation (6 groups : Farmers, Tradesmen, Shopkeepers and Business Owners; Managers and Secondary/University Teachers, Intermediate Professions, White Collar Workers, Blue Collar Workers, Unemployed)

GB-GBN: The weighting reflects the relative selection probabilities of the individual at the three main stages of selection: address, DU and individual. A number of area level and interviewer observation variables were used to model response. Weights needed to be applied to correct for unequal probability to be selected (one person interviewed at each address independently from household size). Non-response weighting then applied to correct for unequal probability of response in different sub-groups in population. The final stage of weighting was to adjust the final non-response weight so that the weighted respondent sample matched the population in terms of age, sex and region. Very large weights were capped and were scaled to make the weighted sample size equal to the unweighted sample size.

HU: Variables used for calculation of weight: sex, age, education, degree, type of settlement

IE: Post-Stratified weights. Information on the known characteristics of the national population including sex distribution, age distribution, employment status and education level were gleaned from the 'Quarterly National Household Survey, Quarter 4: 2012' as published by the Central Statistics Office (CSO) of Ireland. The figures for each of these categories in the net sample were pro-rated to the national population sample.

IN: Multiple weighting done on following variables: Age, gender, social status, income, education.

LT: Design weight based on sex, age and type of settlement rescaled to net sample size.

LV: Data were weighted according to the inverse probability of respondent being selected and to account for different non-response patterns in various age (10-year) and gender groups. Variables used: Sex and age.

PH: Weighting variable is based on people aged 18 and above and region (NCR, Balance Luzon, Visayas, Mindanao). The weight applied was based on the 2010 census population. Computed by area.

PT: Calculation of weight by using AGE, SEX, PT_DEGR

RU: Variables age, sex and education used for calculation of weight. The weighting procedure is based on the Census 2010.

SK: Weight constructed according the population characteristics sex, age groups, education, ethnicity (nationality), size of community and region. The un-weighted sample under-represents younger respondents (25-34 and 18-24) and over-represents residents in settlements with 1001 to 5000 inhabitants and under-represents respondents in settlements with more than 100 thousands inhabitants.

TW: Weighting factor is designed on sex, age, urbanization and education degree groups. Weights were then generated to match the population characteristics of Taiwan area.

US: The weight variable takes into consideration the sub-sampling of non-respondents and the number of adults in the household. The GSS uses a sub-sampling design to focus resources on a smaller set of the difficult cases for further attempts, thereby reducing non-response bias. It also essentially maintains the original sample size. It also adjusts for attrition.

ZA: Explicit stratification variables: Province, population group and geography type (viz. urban formal, urban informal, tribal and rural formal, including commercial farms). Non-response adjustment = number of drawn HHs per EA / number of responding HHs (i.e. where a person 16+ is successfully interviewed) provided that at least 50% of households responded. Otherwise two similar (i.e. in the same explicit stratum) and neighbouring EAs are combined and a combined adjustment factor calculated

1 No weighting

Note:

/ DE: * Own calculation based on data of Microcensus 2011; figures provided by the German Federal Statistical Office.

ISSP Study Description Form – Belgium

- Study title:* ISSP modules Family and Changing Gender Roles and National Identity
- Fieldwork dates:* November 13th, 2013 – February 24th, 2014
- Principal investigators:* Vlaamse Overheid, Studiedienst van de Vlaamse Regering (Research Centre of the Flemish Government) (Ann Carton)
Walloon Institute of Assessment, Forecasting and Statistics (IWEPS) (Françoise Vanderkelen)
- Sample type:* Target population: Persons 18 years or more, Belgian and non-Belgian nationality, resident within private households, in Belgium.
- Sampling design: Simple random sampling procedure
N=7.500 with 2.500 selected units in each region (Flemish Region, Walloon Region, Brussels Capital Region)
- No substitution.
- The National Register is a national governmental institution that stores data on all residents in Belgium: name, address, gender, date of birth, nationality, and composition of the family.
- Fieldwork institute:* Research Centre of the Flemish Government and IWEPS – mailing by the National Register
- Fieldwork methods:* ISSP-modules: questionnaire send by mail, self-completion by respondent and mailed back by respondent to Research Centre of the Flemish Government (questionnaires send out to the Flemish Region and questionnaires from Dutch speaking people in the Brussels Capital Region) and to IWEPS (questionnaires send out to the Walloon Region and questionnaires from French speaking people in the Brussels Capital Region).
- Total of 4 mailings:
- 1) Introduction letter, questionnaire, preprint and prepaid envelope to send the completed questionnaire back to the Research Centre of the Flemish Government (Flemish Region and Brussels Capital Region – questionnaires in Dutch) or IWEPS (Walloon Region and Brussels Capital Region – questionnaires in French)
 - 2) 1st thank you / reminder card
 - 3) New Introduction letter, questionnaire, preprint and prepaid envelope to send the completed questionnaire back to the Research Centre of the Flemish Government (Flemish Region and Brussels Capital Region – questionnaires in Dutch) or IWEPS (Walloon Region and Brussels Capital Region – questionnaires in French)
 - 4) 2nd thank you / reminder card

2015-01-30

N. of respondents: N=2.202 completed the questionnaire

<i>Details about issued sample:</i> Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: http://www.aapor.org/uploads/standarddefs_4.pdf . The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.	1. Total number of starting or issued names/addresses (gross sample size) *	7.500
	2. Interviews (1.0)	2.202
	3. Eligible, Non-Interview	
	A. Refusal/Break-off (2.10)	79
	B. Non-Contact (2.20)	0
	C. Other	0
	i. Language Problems (2.33)	23
	ii. Miscellaneous Other (2.31, 2.32, 2.35)	116
	3. Unknown Eligibility, Non-Interview (3.0)	5.070
	4. Not Eligible	
	A. Not a Residence (4.50)	
	B. Vacant Residence (4.60)	
	C. No Eligible Respondent (4.70)	
	D. Other (4.10,4.90)	10

* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

Remark: we used table 3 for Mail Surveys of Specifically Named Persons

2015-01-30

respons_def

		Frequency	Percent	Valid Percent	Cumulative Percent

	Total	7500	100,0	100,0	

2015-01-30

Language(s): Dutch and French

Weight present: yes

Weighting procedure: In order to deliver one integrated harmonized data file for Belgium post stratification weights were calculated based upon age (three age groups: 18-39; 40-59; 60+), sex, and geographical classification (NUTS1 Flemish Region, Walloon Region, Brussels Capital Region). These characteristics are known for all sampled units and the population distributions are published by the Belgian Institute for National Statistics (ADS). The age-sex distribution in each region is reproduced by the weights as well as the distribution over the regions.

The result of this weighting procedure in combination with the sampling design is that the weights for respondents of the Brussels Capital Region are much smaller than the weights for the respondents of the Flemish and Walloon regions.

The use of adequate software is always necessary when analysing data with weights, but with these data it is vitally important when comparing the regions or analysing only one region separately.

The weights were scaled to make the weighted sample size equal to the unweighted sample size.

Known systematic properties of sample: Realized sample versus population:
Following groups are (slightly) under represented:
- Men between 18 and 39 years old

Following group is (slightly) over represented:
- Men aged 60 or older

Deviations from ISSP questionnaire: none

Publications: Technical report about the fieldwork.

ISSP Study Description Form

Study title: MOSAiCH 2013, containing:
ISSP 2012 'Family and changing gender roles IV' and ISSP 2013
'National Identity III'

Fieldwork dates: From 2013-02-12 to 2013-07-30

Principal investigators: FORS, c/o University of Lausanne, Géopolis, CH-1015 Lausanne, Switzerland

Sample type: Simple random sampling from national register of residents

Fieldwork institute: M.I.S. Trend SA, Institut de recherches sociales et économiques, Pont-Bessièrès 3, 1005 Lausanne, Switzerland

Fieldwork methods: CAPI

N. of respondents: 1237

Details about issued sample:

Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: http://www.aapor.org/uploads/standarddefs_4.pdf. The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.

1. Total number of starting or issued names (gross sample size) *	2406
2. Interviews (1.0)	1237
3. Eligible, Non-Interview	
A. Refusal/Break-off (2.10)	706
B. Non-Contact (2.20)	197
C. Other	
i. Language Problems (2.33)	68
ii. Miscellaneous Other (2.31, 2.32, 2.35)	70
3. Unknown Eligibility, Non-Interview (3.0)	114
4. Not Eligible	
A. Not a Residence (4.50)	1
B. Vacant Residence (4.60)	
C. No Eligible Respondent (4.70)	
D. Other (4.10,4.90)	13

* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

Language(s): German, French, Italian

Weight present: No weighting, all weight=1, according to the sample design (all respondents have the same probability to be selected)

Weighting procedure: none

Known systematic none

ISSP Study Description Form*Please use this form for reporting on Module 2006 and later!**Study title:* National Identity - ISSP 2013*Fieldwork dates:* 2013-11-01 – 2014-01-10*Principal investigators:* Dr. Klára Plecítá, Institute of Sociology AS CR

Sample type: Three stage stratified probability sampling was used:

1. In the first step 340 basic settlement units (PSUs) were sampled by systematic sampling with probabilities proportional to the number of households living in the settlement unit.
2. In the second step the addresses of households were selected from the list of addresses of houses and apartments.
3. In the third step the sampling of respondent in household was made using next birthday method.

Fieldwork institute: ppm Factum*Fieldwork methods:* Face-to-face, paper-and-pencil*N. of respondents:* 1909*Details about issued sample:*

Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: http://www.aapor.org/uploads/standarddefs_4.pdf. The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.

1. Total number of starting or issued names/addresses (gross sample size) *	2763
2. Interviews (1.0)	1909
3. Eligible, Non-Interview	
A. Refusal/Break-off (2.10)	586
B. Non-Contact (2.20)	108
C. Other	
i. Language Problems (2.33)	10
ii. Miscellaneous Other (2.31, 2.32, 2.35)	59
3. Unknown Eligibility, Non-Interview (3.0)	-
4. Not Eligible	91
A. Not a Residence (4.50)	
B. Vacant Residence (4.60)	
C. No Eligible Respondent (4.70)	
D. Other (4.10,4.90)	

* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

Senior Researcher & International Consultant Torben Fridberg

Sample type:

Sampling-procedure: A representative sample (simple random sample) was drawn from the Central Population Register (CPR) – which is a national register of all Danish citizens – from which respondent's name and address were identified. Thus, the sampled unit was 'named individuals'. No stratification, clustering etc. was employed.

Fieldwork institute:

Rambøll Denmark A/S
 Hannemanns Allé 53
 DK-2300 København S
 T +45 5161 1000 - F +45 5161 1001
 E ramboll@ramboll.dk
 W www.ramboll.dk

Fieldwork methods:

Web based (self-completion). If non-response then telephone interviews were used.

For the 18 to 65 years old an introduction letter was posted including a link to a web-enquete and a personal code to activate the survey. A self-completion paper-based questionnaire can be sent if requested.

N. of respondents:

1473

Details about issued sample:

Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: http://www.aapor.org/uploads/standarddefs_4.pdf. The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.

1. Total number of starting or issued names/addresses (gross sample size) *	<u>2499</u>
2. Interviews (1.0)	<u>1390</u>
A. Complete Interviews (1.1)	1325
B. Partial interviews (1.2)	65
3. Eligible, Non-Interview	<u>1109</u>
A. Refusal/Break-off (2.10)	374
B. Non-Contact (2.20)	517
C. Other	218
i. Language Problems (2.33)	36
ii. Physically or mentally unable (2.32)	16
iii. Miscellaneous Other (2.31, 2.35)	166
3. Unknown Eligibility, Non-Interview (3.0)
4. Not Eligible	
A. Not a Residence (4.50)
B. Vacant Residence (4.60)
C. No Eligible Respondent (4.70)
D. Other (4.10,4.90)

* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all

2014-06-19

substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

Language(s): Danish

Weight present: No

Weighting procedure: None

*Known systematic
properties of sample:* None

*Deviations from ISSP
questionnaire:* The ISSP module was the main part of a larger survey.

MODE has been added two options - 50. CAWI, Computer assisted web interview and 60. CATI, Computer assisted telephone interview.

Language(s): Estonian, Russian

Weight present: yes

Weighting procedure: Weighting was performed based on the national population census 2011 data and weights are added for gender, age, ethnicity, urban/rural, and regions.
Multilevel weighting was performed, considering all the pre-defined subgroups. For each of the structural subgroup (such as men aged 15-20) the weights within the group were calculated following the equation

2015-01-19

$$kg = \frac{X}{Y}$$

where

kg = weight of this group

X = expected number of respondents in the group

Y = actual (weighted) number of respondents in the group

Within each group the weight of each respondent is corrected individually, following the equation:

$$k = k * kg$$

The procedure will start when for every respondent k=1 and it is repeated by groups (and within each group by respondents) until within each group the difference between X and Y is close to zero (< 0.00%).

Details about issued sample:

Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: http://www.aapor.org/uploads/standarddefs_4.pdf. The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.

1. Total number of starting or issued names/addresses (gross sample size) *	2500
2. Interviews (1.0)
3. Eligible, Non-Interview	
A. Refusal/Break-off (2.10)	7
B. Non-Contact (2.20)	7
C. Other	
i. Language Problems (2.33)	1
ii. Miscellaneous Other (2.31, 2.32, 2.35)	1240
3. Unknown Eligibility, Non-Interview (3.0)
4. Not Eligible	
A. Not a Residence (4.50)
B. Vacant Residence (4.60)
C. No Eligible Respondent (4.70)	2
D. Other (4.10,4.90)

* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

Language(s): Finnish, Swedish

Weight present: Yes

Weighting procedure: The design of the survey was systematic sampling. In order to improve the efficiency of estimation and to reduce bias due to non-response a calibration method was used for the creation of the weights.

2014-09-03

The following marginal distributions of the population were used:

- 1) gender (male, female),
- 2) age classes (15–24, 25–34,..., 65–74),
- 3) NUTS3 regions with following modifications: the Greater Helsinki Area was dealt as a separate region,
- 4) type of community (urban - semi-urban - rural).

Weight expands the results to the population level (the sum of the weights is the size of the population aged 15 to 74).

*Known systematic
properties of sample:*

Sampling frame is updated and covers total population with the appropriate language restriction. A cross-sectional sample does not contain attrition by definition.

After having used our standard sampling procedures for over 20 years, we have not encountered any bias due to using systematic sampling. Design effect of the sampling procedure ≤ 1 by definition.

*Deviations from ISSP
questionnaire:*

List of deviations and coding specifications compared to ISSP source questionnaire:

- 1) AGE (at the end of year 2013)

Age is computed from a variable for year of birth in the Finnish questionnaire. The Finnish questionnaire did not include a question for this.

- 2) FI_REG

Added from register data on regions. The Finnish questionnaire did not include a question for this.

- 3) Variables ISCO88 and SPISCO88 coded from ISCO08 classification. See file ISSP 2013 FI Correspondence of Occupations.docx.

Language(s): English*Weight present:* yes

Weighting procedure: Selection weights are required because not all the units covered in the survey had the same probability of selection. The weighting reflects the relative selection probabilities of the individual at the three main stages of selection: address, DU and individual. First, because addresses in Scotland were selected using the MOI, weights were needed to compensate for the greater probability of an address with an MOI of more than one being selected, compared with an address with an MOI of one. (This stage was omitted for the English and Welsh data). Secondly, data were weighted to compensate for the fact that a DU at an address that contained a large number of DUs was less likely to be selected for inclusion in the survey

2014-05-30

than a DU at an address that contained fewer DUs. (We used this procedure because in most cases where the MOI is greater than one, the two stages will cancel each other out, resulting in more efficient weights). Thirdly, data were weighted to compensate for the lower selection probabilities of adults living in large households, compared with those in small households.

At each stage the selection weights were trimmed to avoid a small number of very high or very low weights in the sample; such weights would inflate standard errors, reducing the precision of the survey estimates and causing the weighted sample to be less efficient. Less than one per cent of the selection weights were trimmed at each stage.

Sample excludes Scotland north of the Great Glen

Sample type: Four stage sampling procedure was employed. As the frame of areas electoral units from 2010 Self-Governance Elections by National Department for Statistics (GeoStat) was used. The electoral units (clusters) were identified in each stratum (urban/rural settings) based on the following principle: On average 8 interviews were supposed to be conducted in each electoral unit. In the selected election units/polling stations (PSU) one randomly selected starting address is given to the interviewer who is also instructed to select every 8th household both in urban and rural areas. S/he is also given instruction in which direction to move. Each 8th household was identified at selected streets. In case no one was available at a selected household, the interviewer returned later. In case of three unsuccessful visits to a specific household, the latter was excluded from the survey without substitution by a neighboring household. Interviewing continued with the next 8th household (e.g. 16th from the previous valid interview). Respondent was identified within a selected household.

Fieldwork institute: The Center for Social Sciences*Fieldwork methods:* Face-to-face structured interviews*N. of respondents:* 1498*Details about issued sample:*

Sample type: Sampling frame: list of settlements derived from Census 2011.
 Stratified random multi-staged sample: level of settlements, level of household, level of individual.
 Two-way stratification: by 6 regions (defined as the traditional groups of counties) and 4 settlement sizes (defined by the number of residents). The size of each stratum is based on the proportion of the number of 18+ residents within the stratum in the total 18+ population.

Multistage sampling procedure:

1. Selection of primary sampling units (settlements) was conducted by the “probability proportionate to size” method. Each settlement had a probability of being in the sample proportionate to its population size. The selection of settlements was based on a random sampling procedure. All settlements in a stratum were alphabetically ordered and their respective populations were cumulated. Assignment of random numbers from cumulative population of all settlement was conducted. Those settlements under which randomly assigned numbers fell into were chosen. Within each primary sampling unit, the “random starting points method” was used to select starting points. There were 100 starting points in total. On average allocation of 10 respondents was assigned to each starting point.
2. Selection of households within the starting points was conducted by the “random walk method”. Interviewers were instructed to follow a specified route from the starting point, conducting an interview at every 6th dwelling/housing unit (systematic sampling). Non-contacts were re-visited 5 times before being declared as non-response.
3. Selection of the respondent within a household was conducted by random selection by last birthday key.

Fieldwork institute: GFK market research*Fieldwork methods:* Face to face interview*N. of respondents:* 1000

<i>Details about issued sample:</i>	1. Total number of starting or issued names/addresses (gross sample size) *	2828
	2. Interviews (1.0)	1000
	3. Eligible, Non-Interview	2704
	A. Refusal/Break-off (2.10)	1534

National Identity III
Study Description**

ISSP Study Description Form

Study title: **IRELAND: National Identity III (2013)**

Fieldwork dates: 2012-12-21 to 2013-05-20

Principal investigators: Dr. Iarfhlaith Watson: University College Dublin, Ireland

Sample type: A simple random sample of residential of household addresses was drawn from the November 2012 release of the GeoDirectory database. In addition to the address components (locality, town-land, ED, county, geographic coordinates) the database includes other information such as: building use (residential, commercial, mixed, if the building has a residential/commercial delivery point, as well as if it is vacant, derelict or under construction. At first, the buildings with at least one residential delivery point were selected. Then vacant, derelict, invalid and under construction buildings were excluded from this set. The remaining set of the buildings were then joined to the addresses table in the GeoDirectory. Furthermore, the addresses where the Organisation Name or Department Name was not empty were also excluded. The result of this approach was that from the total number of 2,170,959 addresses in Republic of Ireland, only 1,860,095 addresses were left. Finally, using simple random sampling with integer distribution 5,000 addresses were randomly selected in ArcGIS 10 software environment (using `arccgis.rand('Integer 1 1860095')` command in the table field calculator.

Fieldwork institute: Social Science Research Centre, University College Dublin

Fieldwork methods: Self-completed Postal Questionnaire with online option

N. of respondents: 1215 respondents

Language(s): English/Gaeilge (Irish)

Weight present: A weighting variable has been provided

Weighting procedure:

Known systematic properties of sample: Men and younger persons generally are underrepresented in the net sample compared to women and older persons. The sample design – permitting substitution - and relying on self-completed mailed (and online) responses - may have contributed to this bias in responses (see further comment in Survey Monitoring Questionnaire)

Deviations from ISSP questionnaire: This module was fielded simultaneously with the ISSP Family and Changing Gender Roles IV (2012) module. The research team added a further seven questions: two regarding health; three on bilingualism and two on political attitudes and beliefs.

Publications: None

¹ Sum of: ‘Refusal by selected respondent’ (27), ‘implicit refusals’ (36), and Partially completed returned questionnaires (33)

² Sum of: ‘too sick/incapacitated to respond’ (5), ‘deceased’ (1), ‘away during survey period’ (21)

³ Sum of: ‘address which could not be traced’ (138), ‘addresses with no letter boxes’ (18), and ‘no contact’ (3488)

⁴ Addresses established as empty, demolished or containing no private dwelling (18)

ISSP National Identity

Fieldwork dates: start and end dates of field-work, please use format yyyy-mm-dd
2013-11-16 to 2013-11-24

Principal investigators: name and institution
Toshiyuki KOBAYASHI, Hiroko MURATA, and Hiroshi ARAMAKI (NHK Broadcasting Culture Research Institute)

Sample type: description of the sampling procedure
Two-stage stratified random sample of residents of Japan 16 or older. First, urban and rural areas are divided into a number of groups (strata) based on similarities in local features and industrial structures. From each of those groups, streets and village-sections are again grouped together to form sampling units. From among such sampling units, 150 survey spots are selected at random. Then, from *the Basic Resident Registers* for these spots, 12 sample individuals aged 16 or over are selected according to a fixed random number.

Fieldwork institute: institute which conducted the survey
Central Research Services, Inc.

Fieldwork methods: mode of interview
Self-completion

N. of respondents: number of respondents in the final ISSP file: 1,234

Fieldwork dates: *Start: 2013-10-05
End: 2013-11-14*

Principal investigators: *Prof. Algis Krupavičius, Policy and Public Administration Institute, Kaunas University of technology*

Sample type: *description of the sampling procedure
Multistage. First stage - The territory of the Republic of Lithuania divided into 10 administrative units (counties) based on Nomenclature of Territorial Units as used in the official EU statistics. Each county is represented in the sample proportionally to its population size. Second stage - The total number of interviews in each survey region (county) allocated to 5 strata in proportion to the population of each stratum. The stratum is defined on the basis of a settlement size. Number of PSU's ("PSU" -clusters) allocated by size of settlement depending on the share of population living in a certain type of settlement. PSU's selected randomly from each stratum (county and settlement size combination cell) list. In total 246 for this survey. Selection to identify household - addresses register; respondent – last birthday.*

<i>Weight present:</i>	yes or no, whether a weighting factor exists in the data-set Yes
<i>Weighting procedure:</i>	exact description of the weighting procedure / algorithm <i>Weighting factor: Interlocking grid: sex by age by type of settlement</i> <i>Three above variables used for data weighting. Statistics on percentage of males and females of different age groups counted and used in counts of weighing factor as required total. Weighting factor is counted by required total for the group (e.g. males aged 20-29y. living in rura area) by the achieved survey sample total for this group. Weight factor makes survey sample representative of the total population by gender, age and urban/rural population. Second step: weighting data by the settlement size. At this step percentage of the residents of major cities (Vilnius, Kaunas, Klaipeda, Siauliai and Panevezys), other towns and rural area is counted based on official statistics as required total. Finally weighting factor is counted by dividing the required total for each city or settlement size. This weight makes survey sample representative of the population by gender, age and settlement size.</i>
<i>Known systematic properties of sample:</i>	description of biases or other deviations of the sample None.
<i>Deviations from ISSP questionnaire:</i>	esp. questions omitted, or added, or asked in a different format than the Basic Questionnaire prescribes <i>The ISSP2013 module was a part of a larger survey. The structure of the questionnaire is following:</i> <i>SP1-SP13: "Social Policy".</i> <i>KT1: question about cultural life.</i> <i><u>Q1-Q21: ISSP module "National Identity 2013".</u></i> <i><u>SD1-SD13: ISSP background questions</u> (in the middle of the ISSP background questions, i.e. between SD13c and SD14, we included questions about respondent's work orientations with special emphasis on virtual workplaces (questions VD1-VD9), also SD28 – Lithuanian specific question about respondent's subjective identification on the political left-right scale; SD29 – Lithuanian specific question about modes of political participation; SD30 – Lithuanian specific question closeness to certain political parties; SD41 - Lithuanian specific question whether respondents received the social benefits during the last 12 months; SD42 and SD43 – Lithuanian specific questions about whether respondents received the financial support from their relatives living abroad during the last 12 months and what part of their income it represents; SD44 - Lithuanian specific question about the amount of income needed to maintain the wholesome living standard).</i> <i>VD1-VD9: "Work orientations" (with special emphasis on virtual workplaces).</i> <i>V1-V10: "Medicalization".</i> <i>ST1-ST5: "e.social networks".</i>

The partition within each stratum the universe was divided by urban (more than 2,500 inhabitants) and rural zones (less than 2,500 inhabitants).

First selection stage: After the assigned cases for stratum, AGEB's were selected.

Second selection stage: Within each selected AGEB were chosen the households.

Third selection stage: It was selected the individual respondent by using the Kish Grid Method.

The AGEB means Basic Geo-Statistic Area, they are perfectly defined geographical units and with inhabitants group with known demographic and economic variables, its delimitation is smaller than the municipality and it facilitates studies for clusters.

Fieldwork institute: Instituto de Mercadotecnia y Opinión (IMO).*Fieldwork methods:* Face to face interviews.*N. of respondents:* 1,062*Details about issued sample:*Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: http://www.aapor.org/uploads/standarddefs_4.pdf. Study Description**

ISSP Study Description Form
ISSP 2012 /ISSP 2013
Portugal

<i>Study title:</i>	Inquérito Social Internacional
<i>Fieldwork dates:</i>	29 th June 2014 to 31 st January 2015
<i>Principal investigators:</i>	Jorge Vala, Instituto de Ciências Sociais – Universidade de Lisboa Alice Ramos, Instituto de Ciências Sociais – Universidade de Lisboa
<i>Sample type:</i>	<p>Target Population Population coverage</p> <p>All persons aged 18 and over who are resident in the mainland of Portugal and who are not permanently living in institutions or in similar environments. There are also some population groups which cannot be reached and factually will be excluded from the target population:</p> <ul style="list-style-type: none"> - people living in localities with less than 10 dwellings - homeless people, - people who are residents of Portugal but work most of time outside the country, - people living in special residences. <p>Sampling frame</p> <p>For stratification: The frame covers municipalities (these are administrative areas with varying sizes; e.g. Lisboa is one municipality) in all regions of the mainland of Portugal, except municipalities with less than 10 dwellings.</p> <p style="text-align: center;">Area Sampling</p> <p>Sampling design</p> <p><u>Stage 1: Selection of Municipalities</u> In total, 100 municipalities were selected.</p> <ul style="list-style-type: none"> - Random selection of 94 municipalities (out of 26.293). The selection is a probabilistic one, taking into account the region (NUTS II: North, Center, Lisbon, Alentejo, Algarve) and the number of inhabitants (less than 2.000, 2.000-9.999, 10.000-19.999, 20.000-99.999). - The 6 largest cities (Porto, Vila Nova de Gaia, Braga, Coimbra, Lisboa and Amadora) are all included in the sample. These municipalities have 100.000 or more inhabitants. <p>The number of interviews by strata (23 because there are no municipalities with more than 100.000 inhabitants in Alentejo and Algarve) is proportional to the distribution of the population.</p> <p><u>Stage 2: Selection of Households</u> Since we do not have lists of households or individuals, the selection of households is done conducting a street study (random-route method).</p>

In each locality starting points were randomly selected. In total, 300 starting points were selected, 3 in each locality. Households are selected following fixed intervals (ranging from 5 in small localities to 20 in big cities).

Stage 3: Selection of Respondent

Last birthday method

Fieldwork institute: TNS Portugal*

Fieldwork methods: Face-to-face interviews (CAPI, with visuals)

N. of respondents: 1001*

Details about issued sample:

1. Total number of starting or issued names/addresses (gross sample size)	2694
2. Interviews (1.0)	1001
3. Eligible, Non-Interview	
A. Refusal/Break-off (2.10)	343
B. Non-Contact (2.20)	765

C. No Eligible Respondent (4.70)	2
D. Other (4.10,4.90)	28

Language(s): Portuguese

Weight present: Yes

Weighting procedure: The weight variable was computed in order to correct the sample according to the distribution by sex, gender and level of education observed in the resident population of the Mainland of Portugal (excluding Azores and Madeira), with 18 or more years old. The data from the population used to estimate the weighting factor was the one obtained in the Censos 2011. Source: National Institute of Statistics.

1 - Calculation of the distribution on the sample and population of 3 variables: gender (M/F); age groups (18-24; 25-34; 35-44; 45-64; 65-74; 75+); level of education (none; basic; secondary; superior).

2 - $K = n/N$

3 - Cross tables between gender*age groups*level of education

4 - For each cell different from 0, weight = $N_{hij}/n_{hij} \cdot K$

Known systematic properties of sample: More women in the sample than in the population; more people between 45 and 74 years old and less people in the younger groups

(18-24 and 25-34)

*Deviations from ISSP
questionnaire:*

Country specific questions for Portugal were incorrect in the Standard Setup syntax, and do not correspond to the final variables. Several other questions related to National Identity were added after the corresponding ISSP module (see questionnaire).

Publications:

* - Due to fieldwork quality problems detected during supervision, several interviews were invalidated, leading to a total of 898 interviews. In order to achieve the minimum required of 1000 interviews a new company carried out 103 interviews. These 103 interviews were collected in the original localities where interviews were eliminated. A quota sampling procedure was used, considering Age (18-34; 35-54; 55 and +) and Sex and the selection of respondents was made in order to correct the systematic known deviations of the sample. Only residents were considered eligible.

**Russia
ISSP 2013 –
National Identity III
Study Description**

ISSP Study Description Form

Study title: Module 2013 “National Identity III” has been added to the regular omnibus “Vestnik”

Fieldwork dates: start date: 2012-10-03; end date: 2012-10-22

Principal investigators: L.Khakhulina, Levada-Center

Sample type: The omnibus survey is based on the nationwide, four-stage, stratified and probability sample (N=1500) that represents the adult population in age 18+.

Stratification. The nationwide sample (N=1500) was divided among:

- a) 8 large geographical macro regions (Federal Okrugs) proportionate to the size of the local population aged 18+ of each macro region
- b) 5 types of urban settlements and rural districts in each of 8 macro regions proportionate to the size of the local population aged 18+ of each type.
 - 1) cities > 1,000 000 residents
 - 2) cities > 500 000 - 1,000 000
 - 3) cities > 100 000 – 500 000
 - 4) cities and small urban settlements < 100 000
 - 5) rural districts

If to take into account that in the North-West region there are no cities of 500-1,000 thousands of residents, in the Far East region there are no cities of more than 1,000 thousands of residents, in North Caucasus there are no cities more than 500,000 residents the total number of strata is 36.

Selection of primary sampling units (PSUs). On the **first stage** urban settlements and rural administrative regions as primary sampling units were selected.

All cities over 500, 000 inhabitants were included in the sample as self-representative units.

Urban settlements and rural administrative regions were considered as primary sample units (PSUs). In each stratum (except strata of cities over 500,000 and cities over 1,000 000) the number of PSUs was calculated with the limitation of 10-12 interviews per PSU and the PSUs as well were selected with the probability proportionally to its size (PPS). The total number of interviews accounted for a stratum was distributed approximately equally among selected PSUs. Totally **148** PSUs were selected including 109 urban and 39 rural primary sampling points.

Selection of secondary sampling units (SSUs). On the **second stage** the secondary sampling units (SSU) were selected from the lists of electoral districts in urban settlements and localities (villages) in rural administrative regions.

In the cities and in the rural administrative regions 1-2 SSUs (electoral districts or localities) were randomly selected from the list of all potential secondary sampling points (electoral districts and localities). 10 SSUs were selected in Moscow, 5 SSUs - in S-Petersburg.

Totally **168** secondary sample points were selected.

Selection of households. On the **third stage** the households were

selected systematically from the list of addresses. For that addresses has been registered by streets within selected electoral districts. Then the sample of addresses for the selection of households was randomly selected from the full lists of registered addresses of sampled electoral districts and sampled rural localities. The sample of households was obtained from the sample of addresses by taking every household at each selected address.

Selection of respondents. On the **fourth stage** within a household a respondent was selected among eligible household members by the nearest birthday to the date of interviewing. If nobody at home or a member of a household selected as a respondent refused to participate in the survey, or if a household or a respondent was not achieved for 3 visits, the interviewer was required to visit the next address from the list of addresses. Substitutions of addresses were not allowed.

Fieldwork institute: Levada Analytical Center (Levada-Center)

Fieldwork methods: face-to-face interview

N. of respondents: number of respondents in the final ISSP file: 1516.

<i>Details about issued sample:</i> Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: http://www.aapor.org/uploads/standarddefs_4.pdf . The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.	1. Total number of starting or issued names/addresses (gross sample size) *	3111
	2. Interviews (1.0)	1516

	B. Vacant Residence (4.60)
	C. No Eligible Respondent (4.70)
	D. Other (4.10,4.90)

* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

Language(s): Russian

Weight present: Yes, exists

Weighting procedure: The expected number N of respondents for a region/stratum was treated equal
 $N = N_0 * P$,
where N_0 - the sample size, P - the share of the population of a region/stratum in the entire population.

The procedure of weighting was aimed at minimization of sum of squares of deviation of weighted survey data and statistical data by each of 9 socio-demographic groups by sex, age, education in each region/strata.

As a result of correction, every respondent $X[k]$ becomes supplied with definite weight coefficient $W[k]$ being within the limits $0 <$

$W[k] < \sim 5$, so that the following conditions were valid :

1) the value of $\sum(W[k])$ for a region/stratum concerned was equal to N

and

2) for every controlled socio-demographic group $G[i]$ the value $Q[i]$ - a proportion of a group $G(i)$ in the weighted survey data - was equal to

$Q[i] = \sum(W[i_k]) / N$, where $[i_k]$ means that respondent X_k belongs to a group $G[i]$, and $Q[i] \sim P[i]$, $i=1,2,\dots,9$; i.e. $Q[i]$ is close to $P[i]$ where $P[i]$ was a proportion of a group $G[i]$ in the population of a region/stratum

The value of J serves as the criterion for minimization of the weights' coefficient variety

being equal to the sum of squares:

$$J = \sum((Q[i]-P[i])**2) + (\sum(W[k])/N - 1)**2.$$

The set of values of J depends on the deviation of the survey data from the statistics. Used software programs are aimed at selecting the minimum value of J among them.

The weighting procedure is based on the Census 2010.

* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

Language(s): language or languages of the field instrument
Mandarin Chinese, Fukien dialect, or Hakka dialect

Weight present: yes or no, whether a weighting factor exists in the data-set
Yes

Weighting procedure: exact description of the weighting procedure / algorithm
The data was weighted using an iterative proportional raking scheme. For each respondent, sample data were weighted by sex, age, urbanization and education-degree groups. Weights were then generated to match the population characteristics of Taiwan area

Known systematic properties of sample: description of biases or other deviations of the sample: **A non-response bias comes from the use of household registration data in which some household members in fact do not live in the household.**

Deviations from ISSP questionnaire: esp. questions omitted, or added, or asked in a different format than the Basic Questionnaire prescribes

Publications: list of publications using the present data set

Study Description**

ISSP Study Description Form

Please use this form for reporting on Module 2006 and later!

Study title: South African Social Attitudes Survey (SASAS)

Fieldwork dates: start dates: 2013-11-01, end date 2014-01-15

Principal investigators: Jare Struwig –Human Sciences Research Council

Sample type: A sample of 3500 respondents was selected throughout South Africa in 500 census enumerator areas (EAs) as determined in the 2001 census. Each EA was classified in terms of the dominant lifestyle category by the Human Sciences Research Council (HSRC) in its analysis of the 2011 census data. In order to ensure adequate representation in the sample from each province and from each of the four dominant population groups, the sample was stratified by province and by population group. Disproportionately large samples were selected from areas known to be inhabited by the two smallest components of the population, namely (i) areas with dominantly Indian populations and (ii) the Northern Cape. Within the EAs, the households were randomly selected and within the household, the respondent were selected using a Kish grid.

Fieldwork institute: Human Sciences Research Council

Fieldwork methods: Face to face

N. of respondents: 3550- realised 2739:

<i>Details about issued sample:</i> Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: http://www.aapor.org/uploads/standarddefinitions_4.pdf . 	D. Other (4.10,4.90)	0

* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10

for further clarification.

<i>Language(s):</i>	English, Afrikaans, Tsonga, Tswana, Xhosa, Zulu
<i>Weight present:</i>	Yes
<i>Weighting procedure:</i>	<p>Explicit stratification variables: Province, population group and geography type (viz. urban formal, urban informal, tribal and rural formal, including commercial farms).</p> <p>The EA (census enumerator area) is used as PSU (primary sampling unit) and the number of households (HHs) in the EA as the MOS (measure of size). EA's are drawn within the explicit strata pps and a fixed number of households drawn per drawn EA. Within each drawn HH one person 16 years or older is drawn at random using Kish's grid.</p> <p>Non-response adjustment = number of drawn HHs per EA / number of responding HHs (i.e. where a person 16+ is successfully interviewed) provided that at least 50% of households responded. Otherwise two similar (i.e. in the same explicit stratum) and neighbouring EAs are combined and a combined adjustment factor calculated.</p> <p>Person and household weights are benchmarked using the SAS CALMAR macro and province, population group, gender and 5 age groups (i.e. 16-19, 20-29, 30-39, 40-49, 50-59, 60-69 and 70 years and older) as benchmark variables for persons and province and population group of the respondent in the household for households as benchmark variables. The marginal totals for the benchmark variables are obtained from the applicable midyear estimates as published by Statistics South Africa. In other words, the estimated South African population for the applicable year is used as target population.</p> <p>Rescaling not explicitly but only implicitly I assume that this question relates to whether sample sizes are rescaled with the view to do cross-tabulating analyses using STATA. Sub-class analyses are done by using SAS surveymeans, using the "domain" facility.</p>
<i>Known systematic properties of sample:</i>	Disproportionately large samples were selected from areas known to be inhabited by the two smallest components of the population, namely (i) areas with dominantly Indian populations and (ii) the Northern Cape

The *unemployed* comprise all persons of working age who were: a) without work during the reference period, i.e. were not in paid employment or self-employment; b) currently available for work, i.e. were available for paid employment or self-employment during the reference period; and c) seeking work, i.e. had taken specific steps in a specified recent period to seek paid employment or self-employment. For purposes of international comparability, the period of job search is often defined as the preceding four weeks, but this varies from country to country.

The specific steps taken to seek employment may include registration at a public or private employment exchange; application to employers; checking at worksites, farms, factory gates, market or other assembly places; placing or answering newspaper advertisements; seeking assistance of friends or relatives; looking for land, building, machinery or equipment to establish own enterprise; arranging for financial resources; and applying for permits and licences.

Characteristics of National Population

ISSP Characteristics of National Population

Each ISSP member is asked to include to the documentation the following information about known characteristics of its national population, from census or the best available estimates from government surveys or other high-quality data-sources:

- sex distribution of the population
- age distribution of the population
- education (years of schooling) of the population
- employment rate of the population

Source no. 1	Source no. 2	Source no. 3	Source no. 4
	Slovak LFS 3 / 2014 (employed and unemployed) and Census 2011 (18+ population)		
Census 2011			

SEX

Male	48,1			
Female	51,9			

AGE (groups)

18 – 24 rokov	12,6			
25 – 34 rokov	20,5			
35 – 44 rokov	18,0			
45 – 54 rokov	17,3			
55 – 64 rokov	16,0			
65 a viac rokov	15,6			

YEARS OF SCHOOLING (groups)

Lowest formal qualification (Základné)	15,3			
Lower secondary (Stredné bez maturity)	29,4			
Higher secondary completed (Stredné s maturitou)	37,7			
University degree (Vysokoškolské)	17,6			

EMPLOYMENT STATUS

Employed		2376,3	54,3*	
Unemployed		350,6	8,0*	
Not in labor force		4 374,6 – 2376,3 - 350,6 =1647,7	37,7	

* A small overestimate of employed and unemployed is probable as the LFS figures include persons aged 15+, while the not in labour force is estimated using total Census 18+ population.
