Acknowledgements

Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Long term access to and usability of Eurobarometer primary data and documentation is provided in a cooperative arrangement between the Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences (DAS).

Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS through the DBK data catalogue (<http://www.gesis.org/dbk>) and through the ZACAT online data portal (<http://zacat.gesis.org>). Access to the Eurobarometer primary data is also provided by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, as well as supported by the Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send bibliographic citations for each completed manuscript or thesis abstract to the providing data archive, GESIS or ICPSR. Please indicate in a cover letter which data (surveys and variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

The registered Digital Object Identifier (DOI) persistently identifies this dataset version with reference to former (or more recent) versions and potential errata and update documentation in the GESIS data catalogue (DBK).

1.2 Content

1.2.1 Abstract

This round of Eurobarometer surveys covers the following special topics: (1) European Parliament, (2) Future of Europe, and (3) Consumer behavior in the European Union. In regard to the European Parliament (EP), respondents were asked for their awareness and assessment of the EP, their knowledge about and information behavior regarding the EP. Furthermore they were asked for their priorities regarding EP policies and values to be defended by the EP. In regard to the future of Europe, opinions were collected on the expected quality of life for future generations, main challenges for the EU to face in the future, predictions on whether EU society will place more importance on solidarity or individualism and predictions of whether the EU will be a leading diplomatic power. In regard to consumer behavior, respondents were asked if they had a legitimate cause for complaint during a transaction, what type of action was taken during the interaction, court ruling where a business was taken to court, willingness to go to court, reasons to go to court in another EU member state, and European small claims procedure. Additional information includes respondents' sources of political knowledge and to what extent they feel well informed on political matters.

Demographic and other background information collected includes left-right self-placement, age, gender, nationality, marital status and parental relations, occupation, age when stopped full-time education, household composition, ownership of a fixed or a mobile telephone and other durable goods, difficulties in paying bills, level in society, and Internet use. In addition, country-specific data includes type and size of locality, region of residence, and language of interview.

1.2.2 Topic classification

- International Institutions, Relations, Conditions
- Political Attitudes and Behavior
- Patterns of Consumption
- Legal System, Legislation, Law
- Communication, Public Opinion, Media

CESSDA Topic Classification

1.3 Universe

In all, Eurobarometer 78.2 interviewed 27.739 citizens in the 27 countries of the European Union (enlargement as of 2004/2007) and in Croatia (accession in July 2013). All respondents were residents in the respective country, nationals and non-nationals but EU-citizens, and aged 15 and over. They were supposed to have sufficient command of one of the respective national language(s) to answer the questionnaire. Separate samples were drawn for Great Britain and Northern Ireland as well as for East and West Germany.

1.4 Sampling procedure

A multi-stage, random (probability) sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regional units in every country (Statistical Office of the European Community, EUROSTAT NUTS 2 or equivalent). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of starting addresses was selected from each sampled PSU, at random. Further addresses were chosen systematically using standard random route procedures as every Nth address from the initial address. In each household, a respondent was drawn, at random, following the closest birthday rule. No more than one interview was conducted in each household.

The regular sample size (in the sense of completed interviews) is 1000 respondents per country, except the United Kingdom with separate samples for Great Britain (1000) and Northern Ireland (300), Germany with separate samples for the Eastern (500) and the Western part (1000), and Luxembourg, Cyprus (Republic) and Malta with 500 interviews each. The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

From November 17 to December 2, 2012, TNS opinion carried out the fieldwork for this Eurobarometer, at the request of the European Commission, Directorate General Communication. TNS opinion is based at Avenue Herrmann Debroux, 40, 1160 Brussels, Belgium. TNS opinion coordinates the fieldwork carried out through its network of national institutes:

1.6 Mode of data collection

In all countries, fieldwork was conducted on the basis of detailed and uniform instructions prepared by TNS Opinion. Interviews were conducted face-to-face in people's home in the appropriate national language. As far as the data capture is concerned, CAPI (Computer Assisted Personal Interview) was used in those countries where this technique was available.

Equivalent French and English basic questionnaires were developed for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country. Back-translation procedures were applied for controlling semantic equivalence. Multi-language questionnaires are applied if appropriate (Belgium, Luxembourg, Spain, Finland, Estonia, Latvia and Malta).

In each country only the national language version(s) of the questionnaire is (are) used; in countries with more than one official language, the language version is select at the beginning of the interview.

1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The population size weighting factors correct for the fact, that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country or lower level area sample (Great Britain and Northern Ireland, East and West Germany) is represented in proportion to its population size within different groupings according to the historical states of European unification (e.g. founder members, new members, Euro zone countries) in the case of the EUROPEAN WEIGHTS, as well as within the United Kingdom (WEIGHT UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31) or Germany as a whole (WEIGHT GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTs adjust each sample in proportion to its share in the total population of the European Union (formerly European

Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general all countries or samples which do not belong to the respective group under consideration are excluded from calculation. The special weights for the United Kingdom and Germany do exclude all other countries from calculation starting with Eurobarometer 62. The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 4) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

Eurobarometer 78.2 provides three (post-stratification) NATION WEIGHTS: W1 (WEIGHT RESULT FROM TARGET) for separate analysis or comparison of individual samples (countries or regions on sub-national level), W4 (WEIGHT UNITED KINGDOM ONLY) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole, and W3 (WEIGHT GERMANY ONLY), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. W3 and W4 exclude all other countries from calculation, but include the post-stratification factors for the United Kingdom and Germany respectively.

Starting with Eurobarometer 75.4 and in accordance with former practice up to Eurobarometer 61, the archive started to derive (see 1.8. Data preparation) three additional weights W3A, W4A, W3A_W4A in order to provide for the analysis of the United Kingdom and/or Germany as a whole together with all other samples, as separate countries (samples). W3A (WEIGHT RESULT FROM TARGET – UNITED GERMANY) combines the weighting factors for Germany as a whole (redressment factors plus populations size factors East/West) and the redressment factors for all other countries (Great Britain and Northern Ireland separated). W4A (WEIGHT RESULT FROM TARGET – UNITED KINGDOM) combines the weighting factors for the United Kingdom as a whole (redressment factors plus populations size factors) and the redressment factors for all other countries (Germany East and West separated). W3A_W4A (WEIGHT RESULT FROM TARGET – NATION) combines the weighting factors for the United Kingdom as a whole, the weighting factors for Germany as a whole), and the redressment factors for all other countries. Unlike the originating weights, W4 (WEIGHT UNITED KINGDOM ONLY) and W3 (WEIGHT GERMANY ONLY) all countries are included in calculations.

The EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries, of accession or candidate countries, and of Euro zone countries, representing different historical states of European integration (e.g. EU6 = six founder members) . All post-stratification factors are included. Additional weight variables (W97

to W104) exclude Denmark for selected standard weights. These weights are relevant for the descriptive analysis of items from question module QB which was not surveyed in Denmark.

Table 2: Overview of population size weights on European level

European Weights in Eurobarometer 78.2	Function
W5 to W9, W11, W14, W22	grouping EU member countries
W10, W13, W24	grouping new member countries
W15, W18	grouping candidate/accession countries
W23	grouping member + candidate/accession countries
W29, W30, W81, W82, W84, W89, W90	grouping (non-)Eurozone countries
W97, W98, W101 to W104	excluding Denmark
wextra	extrapolating population size (15+) for each country

For more detailed information on the individual weights please see the corresponding variable description.

1.8 Data preparation

The data received by GESIS from TNS opinion were checked for completeness, missing data and duplicate records, for illegal (wild) codes and for (formal) consistency of response patterns and question routing. Errors discovered by these procedures are documented or corrected, as a general rule after consulting related additional documentation (e.g. tabular reports) or the data provider. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable DDI-XML compliant documentation was created for this dataset by GESIS.

Starting with Eurobarometer 76.1 the traditional variable naming by serial V-numbers (V1 to Vn) has been replaced by a system based on question and item numbers in the questionnaire and elsewhere on standard mnemo-technicals. The dot used in the original TNS variable names for multiple response dummy variables is replaced by underscore in view of potential software incompatibility.

The archive identification variables comprise the archive study identification number ('studyno'), the digital object identifier ('doi') of the present dataset version, the version number and date ('version') and the edition type ('edition'). A unique case id ('unqid') for the complete dataset has been constructed from the TNS country id (digits 1-2) and the TNS case/respondent id (digits 3-8).

Three country/sample identification variables are supplied, maintaining the original country/sample codes ('tncsentry'), applying the established archive standard codes for the Eurobarometer series ('country'), and a alphanumerical variable applying the ISO 3166-1 alpha-2 codes ('isocntry') with adaptations for Great Britain and Northern Ireland (ISO 3166-2), for East and West Germany, and for Northern Cyprus (Turkish Cypriot Community).

GESIS added 'Inappropriate' (INAP) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the original questionnaire was adhered to for (almost) every respondent. An additional INAP category was defined whenever a question or group of questions were not surveyed in one or more countries, or if variables refer to country specific items (e.g. region variable P7).

Users should note that answers to multiple-response questions are (originally) represented by a series of binary

'dummy' variables (i.e. variables which take on values of one and zero only), creating separate 'dummy' variables also to explicitly represent 'Don't know', 'No answer/refusal' or other residual responses, such as 'None of the above'. The archive has recoded these residual responses in the case of uncommon minor inconsistencies with respect to and in favour of the series of substantial answers.

GESIS has recoded the missing answers (NA) represented in the original data set by blanks (system missing) to standard values. Their practically complete absence suggests that eventual cases of any not explicitly coded item non-response, might be collapsed with the DK (don't know) category.

Question text and contingency text appearing in the variable description is taken from English language version of the basic (bilingual) questionnaire (master questionnaire). Coding schemes and other documentation are based on the English language version of the basic questionnaire or on the respective SPSS data definition statements as provided by TNS opinion. In case of any discrepancy between questionnaires, SPSS definitions and data regarding the coding scheme of a variable, the archive, as a general rule, carried out any correction in agreement with the data provider.

If the documentation for country-specific questions or answer categories is provided in another language than English, the archive documents the original language wording and supplies the English translation in brackets.

Question qp13b (INTEREST IN EP/ELECTIONS) was originally provided in the form of six item variables, each representing different country specific issues. In order to facilitate comparative analysis these variables were first split up by countries and country specific items as documented in the national field questionnaires (four to six item variables per country). In a second step comparable items (independent from the item order in the questionnaire) were combined into item variables across countries, whenever applicable (qp13b1 to qp13b15). The decision on cross-country comparability was based on the translation of each item from the national field questionnaires into English. The translation was done by the data archive staff and the generic English language item text is documented with each variable in brackets, accompanied by all relevant country specific texts in the respective national language.

Variables for question qp14a to qp14e (MEDIA / INTERNET USE) have been maintained in its original form, each representing different country specific items (TV CHANNELS, RADIO STATIONS, DAILY NEWSPAPERS, SOCIAL NETWORKING WEBSITES, OTHER WEBSITES). In view of partly substantial inconsistencies between the data and the available country by country documentation, the variables have not been split into and documented as country specific variables as in the preceding study Eurobarometer 68.1 (<http://dx.doi.org/10.4232/1.10988>). The variables for questions qp14a to qp14e should only be used with caution and under close consideration of the codebook supplement (ZA5686_cdb_supplement_qp14.xlsx), including all country specific coding sheets and documenting the detected inconsistencies and implausibilities.

Region NUTS 2 categories for Portugal have been edited and adapted to changes as of 2002 (NUTS version 2003) which are reflected in Eurobarometer starting with wave 62 (confirmed by TNS). Region NUTS 1 categories for Greece have been edited correcting for the non-coverage of Ionian and Aegean Islands starting with Eurobarometer 62 (confirmed by TNS).

P7 (REGION – NUTS CODES) – variables 'nuts' and 'nutslvl': The integrated NUTS variable has been derived by the archive from the original TNS country-wise P7 variables in accordance with NUTS units and (alphanumeric) codes defined in the Nomenclature of Territorial Units for Statistics. For each country the lowest subdivision level has been considered insofar consistent with or clearly mappable to one of the NUTS levels as valid for the relevant

time period (http://epp.eurostat.ec.europa.eu/portal/page/portal/nuts_nomenclature/history_nuts).

Original coding for p13be (LANGUAGE OF INTERVIEW - BELGIUM) is reversed, coding almost all respondents from NUTS 1 regions Wallonia and Brussels as "Dutch" and almost all respondents in the Flemish region as "French". The coding has been corrected by the archive.

W3A/W4A (NATION WEIGHTS) – variables 'w3a'/'cntry_de', 'w4a'/'cntry_gb', 'w3a4a'/'nation': Starting with Eurobarometer 62 the original SPECIAL WEIGHTS for the UNITED GERMANY (East + West) and the UNITED KINGDOM (Great Britain + Northern Ireland) automatically exclude all other samples/countries from the calculation. In accordance with former practice up to Eurobarometer 61, the archive now started to derive three additional weights (W3A, W4A, W3A_W4A) in order to provide for the analysis of the United Kingdom and/or Germany as a whole together with all other samples, as separate countries (nations). They combine the weights W3 (population size + redressment factor for Germany) or/and W4 (population size + redressment factor for the United Kingdom) with W1 (redressment factor for all other countries).

All INDEX and TOTAL variables have been checked and documented accordingly.

More detailed information on data preparation, harmonization or regarding inconsistencies is noted on variable level, if applicable.

1.9 Further remarks

Question module QA on the FUTURE OF EUROPE almost completely replicates the corresponding module (QA) in Eurobarometer 76.4 [ZA5596]. Module QB was not surveyed in Denmark. Question module QP replicates – amongst others – numerous questions asked in the context of Eurobarometer 76.3 [ZA5567] and/or in the context of Eurobarometer 68.1 [ZA4565]; QP was not surveyed in Croatia.

No data are available for the interview protocol items p8 (postal code), p9 (sample point number), p10 (interviewer number) and p11.

2 Eurobarometer Series Description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; 'Attitudes towards Europe' (GESIS study ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre – Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papacostas as head of unit between 2003 and 2010.

At present Eurobarometer are carried out on the general responsibility of the European Commission Directorate-General Communication, COMM.A.1 'Research and Speechwriting' (starting with 2014: 'Strategy, Corporate Communication Actions and Eurobarometer'), with Ian Barber as head of the unit and David Voidies as head of the Eurobarometer sector.

The special topic modules are requested by the in each case responsible EC Directorate General, as regards the content. Since 2007 the European Parliament is commissioning its own survey ("Parlemeter") through the Public Opinion Monitoring Unit of the European Parliament, in close cooperation with the DG COMM unit and within the same survey framework.

The main survey results are regularly published on the European Commission's Public Opinion website (<http://ec.europa.eu/COMMFrontOffice/PublicOpinion/index.cfm>) in official standard and special topic reports; detailed tabular reports are published through the European Union Open Data Portal (<https://open-data.europa.eu/en/data/>).

2.4 Development of geographical and population coverage

In all European Union (formerly European Communities) member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics, starting in 1999 (EB51.1). Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the Standard Eurobarometer series, even before starting the accession process (e.g. Turkey or Macedonia). Further countries are continuously added in accordance with the EU membership application and accession process.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriot Community (Northern Cyprus) since 2004 for selected standard and topical waves.

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 4: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.20VR, 55.10VR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.30VR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.20VR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues (table 5). Selected subsets of standard trend questions appear in the context of related special topics (e.g. in the European Parliament Eurobarometer).

Table 5: Overview of Eurobarometer surveys with standard EU and trend question modules

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

3 Dataset structure and standards

Archive processing and documentation of the Standard and Special Eurobarometer are based on standards agreed between the Inter-university Consortium for Political and Social Research (ICPSR) and the GESIS Data Archive department (formerly Zentralarchiv für Empirische Sozialforschung), which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structures

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of administrative/technical variables. These comprise the ARCHIVE and dataset ID variables (studyno1, studyno2, doi, version, edition, survey, split (if applicable), caseid, uniqid), the COUNTRY ID variables with several standard variables identifying the different countries (or sub-national samples) and relevant groups of countries (or sub-national samples) in the dataset, arranged in pairs with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric variable ('isocntry') is provided based on the ISO 3166 country code standard (see 1.8).

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). Starting with Eurobarometer 76.1 the traditional variables naming by serial V-numbers (V1 to Vn) is replaced by a system based on question and item numbers in the questionnaire and elsewhere on standard mnemo-technicals (see 1.8). Likewise from survey 76.1 onwards, constructed total or index variables, usually as provided by the fieldwork institute, are listed right after the question variables on which they are based. The dataset is concluded by three additional weights and their corresponding NATION country variables 'w3a'/'cntry_de', 'w4a'/'cntry_gb', 'w3a4a'/'nation' (see 1.8).

Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 und up to wave 75 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country

specific coding schemes and categories are maintained as a standard over time as long as the category schemes provided in the questionnaire remain comparable.

Starting with Eurobarometer 74.1 an additional standardized REGION variable 'nuts' (REGION – NUTS CODES) is constructed, integrating all participating countries with regional units defined in accordance with the EUROSTAT Nomenclature of Territorial Units for Statistics (NUTS). For each country the lowest available NUTS subdivision level is considered, whereby the hierarchical structure always implies all higher subdivision levels. The official NUTS codes are coded verbatim in accordance with the in each case valid (applicable) NUTS version as documented in the official EUROSTAT classification history (History of NUTS). A second variable indicates the lowest coded NUTS LEVEL 'nutslvl' for each country. All original regional subdivisions and categories remain coded separately and unchanged in the country-wise P7 variables. Details are documented with the respective country specific and/or integrated variable.

3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

3.3 International documentation standard (DDI)

The study and variable level documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The variable level documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (COUNTRY CODE - ISO 3166). In the case of Greece the non-ISO abbreviation EL* is used in parallel, as introduced by EUROSTAT as of NUTS version 2010.

AT	Austria	IE	Ireland
BE	Belgium	IT	Italy
BG	Bulgaria	IS	Iceland
CY	Cyprus	LT	Lithuania
CY-TCC	Turkish Cypriote Community	LU	Luxembourg
CZ	Czech Republic	LV	Latvia
DE	Germany (-1989)	ME	Montenegro
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	NO	Norway
FI	Finland	PL	Poland
FR	France	PT	Portugal
GB	United Kingdom	RO	Romania
GB-GBN	Great Britain	RS	Serbia
GB-NIR	Northern Ireland	SE	Sweden
GR / EL*	Greece	SI	Slovenia
HR	Croatia	SK	Slovakia
HU	Hungary	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded "real" values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission's official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

QUESTION NUMBER and full QUESTION TEXT from the basic questionnaire, including interviewer instructions. The numbers or letters that may appear together with the original question number, reflect the item order (multiple item or multiple response questions) or indicate if a question was recoded (R) or summarized (T), or if asked only in a single country (country abbreviation).																																																																																																																																																																																																																																																																																																																																																					
CODE VALUES occurring in the data for this variable and complete ANSWER TEXT from the basic questionnaire. Code values may differ from the questionnaire specification due to standardization. Abbreviations commonly used in the code definitions are DK (don't know), NA (not ascertained) and INAP (inappropriate).																																																																																																																																																																																																																																																																																																																																																					
DERIVATION information refers to the construction principle of indices or other derived variables (not in the example). NOTE delineates additional explanatory text subsuming trend information (last appearance of the question) or archive remarks on data processing and other issues relevant for the understanding or application of the variable.																																																																																																																																																																																																																																																																																																																																																					
CROSS-TABULATION: The absolute frequencies of the occurrence of values (<i>absolute values</i>) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies (<i>row percent</i>) refer to the valid cases (<i>n valid sum</i>), i.e. the total number of cases (<i>n sum</i>) reduced by the number of cases defined as missing data (<i>M</i>). For display and place saving reasons excluded countries or areas may be completely dropped from the table.	<div>Absolute Values (Row Percent), weighted by v8</div> FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (<i>M</i>), i.e. <i>percent</i> on the basis of all cases (<i>sum</i>) and <i>valid percent</i> on the basis of the <i>valid cases</i> .																																																																																																																																																																																																																																																																																																																																																					

5 Variable Documentation

Variable, Label

Question Text (English Language)

studyno1 - ARCHIVE STUDY NUMBER - DISTRIBUTOR

Archive study number – distributor

Study Number of the distributing data archive.

5686 GESIS STUDY ID ZA5686

studyno1

Value	Label	Missing	Count	Percent	Valid Percent
5686	GESIS STUDY ID ZA5686		27739	100.0	100.0
	Sum		27739	100.0	100.0
	Valid Cases		27739		

studyno2 - ARCHIVE STUDY NUMBER - PUBLISHER

Archive study number – publisher

Study number of the data archive which is publishing this data set version.

5686 GESIS STUDY ID ZA5686

studyno2

Value	Label	Missing	Count	Percent	Valid Percent
5686	GESIS STUDY ID ZA5686		27739	100.0	100.0
	Sum		27739	100.0	100.0
	Valid Cases		27739		

doi - DIGITAL OBJECT IDENTIFIER

Digital object identifier

This variable holds the Digital Object Identifier (DOI) for the dataset at hand as registered via the da|ra registration agency for economic and social science data. Each dataset version (see variable 'version') has a unique persistent DOI.

For direct access to the complete archive dissemination package for this study, including new dataset versions, the DOI needs to be appended to the resolver service URL: <http://dx.doi.org/doi:10.4232/1.12367>

In terms of good scientific practice, the DOI is an important element for the correct citation of a dataset.

doi

Value	Label	Missing	Count	Percent	Valid Percent
doi:10.4232/1.12367			27739	100.0	100.0
	Sum		27739	100.0	100.0
	Valid Cases		27739		

version - GESIS ARCHIVE VERSION & DATE

GESIS archive version & date

3.0.0 '2015-11-20'

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

For details of the version history and for information on errata in current or former dataset versions, please consult the GESIS data catalogue entry (study description) persistently referenced by the dataset DOI (Digital Object Identifier).

version

Value	Label	Missing	Count	Percent	Valid Percent
3.0.0 (2015-11-20)			27739	100.0	100.0
	Sum		27739	100.0	100.0
	Valid Cases		27739		

edition - DATASET EDITION

Dataset edition

This variable identifies the type of archive release for the dataset at hand.

1 Archive pre-release

2 Archive edition

edition

Value	Label	Missing	Count	Percent	Valid Percent
2	ARCHIVE EDITION		27739	100.0	100.0
	Sum		27739	100.0	100.0
	Valid Cases		27739		

survey - SURVEY IDENTIFICATION

Survey identification

The number identifying the Eurobarometer survey.

782 Eurobarometer 78.2 (November-December 2012)

survey

caseid - TNS CASE ID

TNS case ID

The original non-unique case (interview) identification numbers as provided by the fieldwork institute (TNS). The unique respondent identification variable uniqid adds the original country identification codes (tnscntry) as a prefix to the original case ID numbers in order to make them unique.

Note:

Actual number is coded.

uniqid - UNIQUE RESPONDENT ID (CASEID BY TNS COUNTRY CODE)

Unique respondent ID (caseid by tnsctnry)

This unique respondent identification is composed of the original TNS country code and the original TNS interview number. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 04: Greece; 05: Spain; 06: Finland; 07: France; 08: Ireland; 09: Italy; 10: Luxembourg; 11: Netherlands; 12: Austria; 13: Portugal; 14: Sweden; 20: Germany West; 21: Germany East; 22: Great Britain; 23: Northern Ireland; 31: Bulgaria; 32: Cyprus (Republic); 33: Czech Republic; 34: Estonia; 35: Hungary; 36: Latvia; 37: Lithuania; 38: Malta; 39: Poland; 40: Romania; 41: Slovakia; 42: Slovenia; 46: Croatia). The remaining digits contain the country-specific questionnaire numbers.

Note:

Actual number is coded.

tnscntry - ORIGINAL TNS COUNTRY/SAMPLE ID

Original TNS country/sample ID

The original country identification codes as applied by the fieldwork institute (TNS).

isocntry - COUNTRY CODE - ISO 3166

Country code - in accordance with ISO 3166-1-alpha-2 country code

All surveyed countries and regions, i.e. including separate samples for East-/West-Germany, Great Britain/Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East/West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

Note:

Use of weighting factor w1 is optional.

w1 - WEIGHT RESULT FROM TARGET

w1 Weight result from target

This POST-STRATIFICATION WEIGHT is based on a comparison for each sample with the respective universe description. As such in all countries, gender, age, region and size of locality are introduced in the iteration procedure carried out by the fieldwork institutes.

British and Northern Irish as well as East and West German samples are weighted separately. The weight reproduces the real number of cases for each country. In terms of its general function it corresponds to former NATION WEIGHT II (until EUROBAROMETER 31).

w5 - WEIGHT EU6

w5 Weight EU6

This POPULATION SIZE WEIGHT refers to the six EC founder members: France, Belgium, Netherlands, West Germany, Italy, and Luxembourg. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w5 must be applied whenever these six EC founder countries are to be analyzed altogether as a group.

w6 - WEIGHT EU9

w6 Weight EU9

This POPULATION SIZE WEIGHT adds Denmark, Ireland, Great Britain and Northern Ireland to the EU6 countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w6 must be applied whenever these nine countries as of the 1973 enlargement are to be analyzed altogether as a group.

w9 - WEIGHT EU12+DE-E

w9 Weight EU12 + DE-E

This POPULATION SIZE WEIGHT equals WEIGHT EU12 but in addition including East Germany (former German Democratic Republic) after the unification of Germany on October 3, 1990 (Eurobarometer 34). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w9 must be applied whenever these twelve member countries are to be analyzed altogether as a group including the Eastern part of Germany (new German federal states).

w11 - WEIGHT EU15

w11 Weight EU15

This POPULATION SIZE WEIGHT adds Austria, Finland, and Sweden to the EU12+DE-E countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w11 must be applied whenever these 15 countries as of the 1995 enlargement are to be analyzed altogether as a group.

w22 - WEIGHT EU27

w22 Weight EU27

This POPULATION SIZE WEIGHT includes all 25 member countries after the 2004 enlargement, plus the new members as of 2007 Bulgaria and Romania. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of the European Union. The post-stratification weighting factors for all samples/countries are included. Weight w22 should be used whenever all 27 countries participating in this wave are to be analysed as a group.

w24 - WEIGHT EU NMS 12

w24 Weight EU NMS 12

This POPULATION SIZE WEIGHT refers to the group of the 12 new member countries as of the enlargement in January 2007: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia, Bulgaria and Romania. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w24 must be applied whenever these 12 countries are to be analyzed altogether as a group.

w29 - WEIGHT EURO ZONE 15

w29 Weight EURO ZONE 15

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2008. These are 15 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w29 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

w30 - WEIGHT NON-EURO ZONE 15

w30 Weight NON-EURO ZONE 15

This POPULATION SIZE WEIGHT separates the group of countries (Denmark, United Kingdom, Sweden, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Slovakia, Bulgaria, Romania) which did not introduce the EURO up to January 1, 2008. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w30 must be applied whenever these countries are to be analyzed altogether as a group.

w84 - WEIGHT NON-EURO ZONE 17 - EU NMS 12

w84 Weight NON-EURO ZONE 17 - EU NMS 12

This POPULATION SIZE WEIGHT separates the group of countries (Czech Republic, Hungary, Latvia, Lithuania, Poland, Bulgaria, and Romania) belonging to the 12 new members after the enlargement of January 2007 which did not introduce the EURO up to January 1, 2011. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w84 must be applied whenever these 7 countries are to be analyzed altogether as a group.

w97 - WEIGHT SPECIAL QB - EU27 EXCL DK

w97 Weight Special QB - EU27 excluding Denmark

This POPULATION SIZE WEIGHT equals WEIGHT w22 but excluding Denmark. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of the European Union. The post-stratification weighting factors for all samples/countries are included. Croatia is also excluded from calculation. Weight w97 must be applied whenever these countries are to be analyzed altogether as a group.

Note:

Weight variables w97, w98, w101, w102, w103, and w104 exclude Denmark for selected standard weights. These weights are relevant for the descriptive analysis of question module QB which was not surveyed in Denmark.

w103 - WEIGHT SPECIAL QB - EU25 EXCL DK

w103 Weight Special QB - EU25 excluding Denmark

This POPULATION SIZE WEIGHT equals WEIGHT w14 but excluding Denmark. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors for all samples/countries are included. Weight w103 must be applied whenever these countries are to be analyzed altogether as a group.

Note:

Weight variables w97, w98, w101, w102, w103, and w104 exclude Denmark for selected standard weights. These weights are relevant for the descriptive analysis of question module QB which was not surveyed in Denmark.

wextra - WEIGHT EXTRAPOLATED POPULATION 15+

wextra Weight extrapolated population 15+

Weight wextra extrapolates the actual universe (population aged 15 or more) for each country (sample), i.e. this weight variable integrates all other available weights, but does not reproduce the number of cases in the data set.

Note:

Extrapolated population figures as calculated by WEXTRA do not always coincide with the population 15+ figures per country indicated in the technical specifications provided by TNS. Only the figures for LU, GR, PT, HU, MT, SK, RO, and HR are reproduced accordingly. For all other countries the calculation of WEXTRA is based on the population figures as indicated in the technical specifications of former Eurobarometer surveys (77.2 and before).

qp9a - EP POLICY PRIORITIES - FIRSTLY

ASK QUESTIONS P ONLY IN EU27 – OTHERS GO TO QA1

QP9A

The European Parliament promotes the development of certain policies at EU level. In your opinion which of the following policies should be given priority? Firstly?

(SHOW CARD – READ OUT – ROTATE – ONE ANSWER ONLY)

- 1 A foreign policy that enables the EU to speak with one voice on the international stage
- 2 A security and defence policy that enables the EU to face up to international crisis
- 3 Combating climate change
- 4 A common energy policy intended to ensure the EU's energy independence
- 5 Improving consumer and public health protection
- 6 An agricultural policy that is environmentally friendly and contributes to the global food balance
- 7 Combating terrorism while respecting individual freedoms
- 8 Coordinating economic, budget and tax policies
- 9 A research and development (R&D) policy that ensures competitiveness and innovation
- 10 The assertion of a European social model
- 11 Tackling poverty and social exclusion
- 12 An immigration policy implemented in consultation with countries of origin
- 13 Other (SPONTANEOUS)

qp9t_15 - EP POL PRIORITIES: DK (QP9A ONLY)

[QP9A

The European Parliament promotes the development of certain policies at EU level. In your opinion which of the following policies should be given priority? Firstly?

QP9B

And then?]

QP9T_15 DK (QP9A ONLY)

0 Not mentioned

1 Mentioned

9 Inap. (HR in isocntry)

Derivation:

This variable repeats answers to category '15' (DK) in qp9a, while all other answers to qp9a are summarized with qp9b in variables qp9t_1 to qp9t_14.

Note:

See qp9a and qp9b for complete question text.

qp12t_3 - EP INFO SOURCES - INTERNET (SUM)

Preferred sources of information about the European Parliament - Internet (summarized)

QP12T_3 Internet (summarized)

0 Not mentioned

1 Mentioned

9 Inap. (not coded 1 in qp12_3/qp12_4 and qp12_6 to qp12_11)

99 Inap. (HR in isocntry)

Derivation:

This variable summarizes responses for internet information resources (qp12_8 to qp12_11). Respondents which neither mentioned any television nor press nor internet information sources are coded 9.

[qp12 If you were looking for information on the European Parliament, which of the following sources would you use?

qp12_8 News websites

qp12_9 Websites of the European Parliament

qp12_10 Blogs

qp12_11 Online social networks]

Note:

See qp12 for complete question text.

qp13bsk1 Mnohé nové zákony na Slovensku sa najprv prijali v Európskom parlamente a členských štátoch]

Note:

The items in the original cross country variables qp13b_1 to qp13b_6 differ by country with regard to content and order. New integrated variables have been produced by the Archive for items which can be considered as functional equivalent across countries. The details are documented in the context of the corresponding country specific variables. For integration the original country specific item order has considerably been altered.

For meaningful (descriptive) results this variable needs to be used for West and East Germany separately (select if '4' OR '14' in country) or be weighted by special weighting variable w3a for GERMANY as a whole together with all other countries. Please see variable w3a for more information.

qp13b6 - INTEREST IN EP/ELECTIONS: IMPACT ON EVERYDAY LIFE (INTEGR)

Interest in European Parliament and in next European Elections being aware of following issue: IMPACT ON EVERYDAY LIFE
(integrated)

QP13B6 [European Parliament and Member States take decisions that affect the everyday life of citizens directly and concretely, such as toy safety, food safety, prices for roaming or emissions from cars / like the reform of the Common Agricultural Policy, regional policy, education and culture, innovation and research]

- 1 Yes, definitely
- 2 Yes, probably
- 3 No, probably not
- 4 No, definitely not
- 5 DK
- 9 Inap. (not IE GR FI CZ HU MT SK RO in isocntry)

Derivation:

This variable integrates countries with comparable items in question qp13b.

[qp13b

For each of the following, please tell me if being aware of it would raise, or not, your interest in the European Parliament and in the next European elections? Knowing that...

qp13bie1 The European Parliament and Member States take decisions which affect citizen's everyday life directly and concretely, like the reform of the Common Agricultural Policy, regional policy, education and culture, innovation and research

qp13bgr4 The European Parliament and the Member States shall take decisions having a direct and specific impact on the daily lives of citizens, such as toy safety, food safety, roaming prices or car emissions

qp13bfi1 FI-FI: Euroopan parlamentti ja jäsenvaltiot tekevät päätöksiä, jotka vaikuttavat kansalaisten arkielämään suoraan ja konkreettisesti –
tällaisia asioita ovat esimerkiksi lelujen ja elintarvikkeiden turvallisuus, roaming-hinnat ja autojen
saastepäästöt / FI-SE: Europaparlamentet och medlemsstaterna fattar beslut som direkt och konkret påverkar medborgarnas vardag, till
exempel om leksaksäkerhet, livsmedelssäkerhet, roamingpriser och utsläpp från bilar

qp13bcz4 Evropský parlament a členské státy přijímají rozhodnutí, která mají přímý a konkrétní vliv na každodenní život, jako je bezpečnost
hraček, bezpečnost potravin, ceny roamingu nebo emise automobilů

qp13bhu3 Az Európai Parlament és a tagállamok hoznak döntéseket arról, hogy mi van hatással az állampolgárok mindennapi életére
közvetlenül és konkrétan, úgymint a játékok biztonsága, az élelmiszerbiztonság, a roaming díjak vagy a
gépkocsik kibocsátása

qp13bmt4 MT-MT: Il-Parlament Ewropew u l-Istati Membri jiehdu deċiżjonijiet li jaffettwaw ilhajja ta' kuljum taċ-ċittadini b'mod dirett u konkret,
bħassigurtà tal-ġugarelli, issigurtà tal-ikel, prezzijiet tarroaming jew emissjonijiet minn karożzi - MT-EN: The European Parliament and the
Member States take decisions which affect citizens' everyday life directly and concretely, like safety of toys, food safety, roaming prices or
emissions from cars

qp13bsk4 Európsky parlament a členské štáty prijímajú rozhodnutia, ktoré priamo a konkrétne ovplyvňujú bežný život občanov, napríklad
rozhodnutia o bezpečnosti hračiek, bezpečnosti potravín, cenách v roamingu alebo o emisiách z
automobilov

qp13bro1 Parlamentul European și statele membre iau decizii care afectează viața de zi cu zi a cetățenilor în mod direct și concret, cum ar fi siguranța jucăriilor, siguranța produselor alimentare, prețurile pentru roaming sau emisiile de gaze auto]

Note:

The items in the original cross country variables qp13b_1 to qp13b_6 differ by country with regard to content and order. New integrated variables have been produced by the Archive for items which can be considered as functional equivalent across countries. The details are documented in the context of the corresponding country specific variables. For integration the original country specific item order has considerably been altered.

I tilfældet om EUdirektivet om køle/fryseapparater (CFC) var der enighed blandt alle de danske medlemmer af Europa-Parlamentet på tværs af partitilhørsforhold om at stemme for et forbud

qp13bfi3 FI-FI: Euroopan parlamentissa äänestetään pääasiassa poliittisten aatteiden pohjalta, mutta usein myös kansallisten intressien ohjaamana. Niin sanotun rikkidirektiivin tapauksessa jotkut Suomen edustajista pitivät tärkeimpänä Itämeren suojelua, kun taas toiset korostivat teollisuuden kilpailukykyä / FI-SE: Europaparlamentet huvudsakligen röstar utifrån politiska idéer, men ofta även utifrån nationella intressen: i fråga om "svaveldirektivet" prioriterade några finska ledamöter skyddet av Östersjön, andra näringslivets konkurrenskraft]

Note:

The items in the original cross country variables qp13b_1 to qp13b_6 differ by country with regard to content and order. New integrated variables have been produced by the Archive for items which can be considered as functional equivalent across countries. The details are documented in the context of the corresponding country specific variables. For integration the original country specific item order has considerably been altered.

qp13b15 - INTEREST IN EP/ELECTIONS: RIGHT OF LEGISLATIVE INITIATIVE (INTEGR)

Interest in European Parliament and in next European Elections being aware of following issue: RIGHT OF LEGISLATIVE INITIATIVE (integrated)

QP13B15 [MEPs can ask the European Commission to propose a new law on matters where they consider that EU legislative action is required]

- 1 Yes, definitely
- 2 Yes, probably
- 3 No, probably not
- 4 No, definitely not
- 5 DK
- 9 Inap. (not MT RO in isocntry)

Derivation:

This variable integrates countries with comparable items in question qp13b.

[qp13b

For each of the following, please tell me if being aware of it would raise, or not, your interest in the European Parliament and in the next European elections? Knowing that...

qp13bmt3 MT-MT: MEPs jistgħu jitolbu lill-Kummissjoni Ewropea biex tipproponi liġi ġdida dwar kwistjonijiet fejn huma jikkunsidraw li l-azzjoni leġiżlattiva tal-Unjoni Ewropea hija meħtieġa - MT-EN: MEPs can ask the European Commission to propose a new law on matters where they consider that EU legislative action is required

qp13bro3 MPE pot cere Comisiei Europene să propună o nouă lege asupra chestiunilor pe care ei consideră că sunt necesare măsuri legislative din partea UE]

Note:

The items in the original cross country variables qp13b_1 to qp13b_6 differ by country with regard to content and order. New integrated variables have been produced by the Archive for items which can be considered as functional equivalent across countries. The details are documented in the context of the corresponding country specific variables. For integration the original country specific item order has considerably been altered.

Note:

In view of partly substantial data and documentation inconsistencies for questions qp14a to qp14e, the original cross-country variables have not been split up and documented country by country. The variables should only be used with caution and under close consideration of the supplementary documentation provided in a separate EXCEL document: ZA5686_cdb_supplement_qp14.xlsx.

Variable qp14c162 has been deleted in the data set at hand, since the original variable did not have any response and was not listed in the corresponding coding sheets (EXCEL documentation supplement).

Note:

In view of partly substantial data and documentation inconsistencies for questions qp14a to qp14e, the original cross-country variables have not been split up and documented country by country. The variables should only be used with caution and under close consideration of the supplementary documentation provided in a separate EXCEL document: ZA5686_cdb_supplement_qp14.xlsx.

Variables qp14d51 to qp14d65 have been deleted in the data set at hand, since the original variables did not have any response and were not listed in the corresponding coding sheets (EXCEL documentation supplement).

Note:

In view of partly substantial data and documentation inconsistencies for questions qp14a to qp14e, the original cross-country variables have not been split up and documented country by country. The variables should only be used with caution and under close consideration of the supplementary documentation provided in a separate EXCEL document: ZA5686_cdb_supplement_qp14.xlsx.

Variables qp14d90 and qp14d91 have been deleted in the data set at hand, since the original variables did not have any response and were not listed in the corresponding coding sheets (EXCEL documentation supplement).

9 Inap. (HR in isocntry)

Note:

In view of partly substantial data and documentation inconsistencies for questions qp14a to qp14e, the original cross-country variables have not been split up and documented country by country. The variables should only be used with caution and under close consideration of the supplementary documentation provided in a separate EXCEL document: ZA5686_cdb_supplement_qp14.xlsx.

Variable qp14e100 has been deleted in the data set at hand, since the original variable did not have any response and was not listed in the corresponding coding sheets (EXCEL documentation supplement).

qa10t_10 - POSITIVE EU RESULTS: NONE (SUM)

[QA10A

Which of the following do you think is the most positive result of the EU? Firstly?

QA10B

And then?]

QA10T_10 None (SPONTANEOUS)

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes answers to this item in qd10a and qd10b.

Note:

See qd10a and qd10b for complete question text.

qb1t - INTERNET PURCHASE (SUMMARIZED)

Respondents who purchased goods or services over the Internet in the last 12 months - summarized

- 0 Not mentioned
- 1 Total 'Shop online'
- 9 Inap. (DK in isocntry)

Derivation:

This variable summarizes answers to qb1_1 to qb1_3 and qb1_5.

[qb1 In the last 12 months did you buy or order any goods or services over the Internet for private purposes from...?

qb1_1 Sellers based in (OUR COUNTRY)

qb1_2 Sellers based in other EU countries

qb1_3 Sellers based in the rest of the world

qb1_5 Country of origin of sellers not known (SPONTANEOUS)]

Note:

See qb1 for complete question text.

Question module QB has not been surveyed in Denmark. Weight variables w97, w98, w101, w102, w103, and w104 exclude Denmark for selected standard weights, and are relevant for the descriptive analysis of module QB. For more information see w97, w98, w101, w102, w103, and w104.

qb4t - CONSUMER COMPL ACTION (SUMMARIZED)

Respondents who encountered a problem with businesses and took action - summarized

0 Not mentioned

1 Total 'Yes'

9 Inap. No problem encountered or DK (not coded 1 in qb3)

99 Inap. (DK in isocntry)

Derivation:

This variable summarizes answers to qb4_1 to qb4_5.

[qb4 As a consequence of the problem(s) you encountered, did you take any of the following actions?

qb4_1 Yes, you took the business(es) concerned to an out-of-court dispute settlement body (ADR)

qb4_2 Yes, you took the business(es) concerned to court

qb4_3 Yes, you made a complaint to the retailer / provider / business transaction partner

qb4_4 Yes, you negotiated with the retailer / provider / business transaction partner by yourself

qb4_5 Yes, you negotiated with the retailer / provider / business transaction partner with the assistance of a consumer organisation or a professional association]

Note:

See qb4 for complete question text.

Question module QB has not been surveyed in Denmark. Weight variables w97, w98, w101, w102, w103, and w104 exclude Denmark for selected standard weights, and are relevant for the descriptive analysis of module QB. For more information see w97, w98, w101, w102, w103, and w104.

qb7a_r - CONSUMER COMPLAINTS - <2000 EURO (RECODED)

Respondents who encountered a problem with businesses and had a claim (or more) under 2.000 euros - recoded

- 0 None
- 1 One problem under the amount of 2000 euros
- 2 Two problems under the amount of 2000 euros
- 3 Three or more problems under the amount of 2000 euros
- 6 (Not relevant)
- 7 Refusal
- 8 DK
- 9 Inap. No problem encountered or DK (not coded 1 in qb3)
- 99 Inap. (DK in isocntry)

Derivation:

This variable collapses answers to qb7a into three categories.

[qb7a Thinking about any problem you have encountered in the last 12 months, how many were under 2.000 euros?]

Note:

See qb7a for complete question text.

Code 6 ("Not relevant") is not documented in the questionnaire. The value label is provided with the original TNS dataset for variable qb7a.

Question module QB has not been surveyed in Denmark. Weight variables w97, w98, w101, w102, w103, and w104 exclude Denmark for selected standard weights, and are relevant for the descriptive analysis of module QB. For more information see w97, w98, w101, w102, w103, and w104.

qb8_9_t - WILLINGNESS TO GO TO COURT (SUMMARIZED)

Respondents who are willing to go to court over a disagreement / dispute for under 2.000 euros - summarized

- 1 Total 'Willing to go to court for less than 2000 EUR'
- 2 Total 'Not willing to go to court for less than 2000 EUR'
- 9 Inap. DK (coded 5 in qb8_1, qb8_2 and qb9)
- 99 Inap. (DK in isocntry)

Derivation:

This variable summarizes answers to qb8_1, qb8_2, and qb9.

Respondents who are coded at least once 1 or 2 ("Yes") in qb8_1, qb8_2, or qb9 are coded 1 in summarized variable qb8_9_t. Respondents who are not coded 1 or 2 ("Yes") in qb8_1, qb8_2, or qb9 are coded 2 in summarized variable qb8_9_t. Respondents coded 5 ("DK") in qb8_1, qb8_2, and qb9 are coded 9 in summarized variable qb8_9_t.

[qb8 Would you be willing to go to court in (OUR COUNTRY) over a disagreement / dispute for under 2.000 euros with a retailer, provider or business transaction partner located...?

qb8_1 In (OUR COUNTRY)

qb8_2 In another EU Member State]

[qb9 And would you be willing to go to court in another EU Member State over a disagreement / dispute for under 2.000 euros with a retailer, provider or business transaction partner?]

Note:

See qb8 and qb9 for complete question text.

Modified by the Archive (code 9 generated in addition).

Question module QB has not been surveyed in Denmark. Weight variables w97, w98, w101, w102, w103, and w104 exclude Denmark for selected standard weights, and are relevant for the descriptive analysis of module QB. For more information see w97, w98, w101, w102, w103, and w104.

qb10a - GO TO CNTRY COURT NAT PROVIDER - AMOUNT

ASK ALL EXCEPT IN DK

QB10A

ASK QB10A IF "YES, WILLING TO GO TO COURT IN (OUR COUNTRY) WITH A RETAILER, PROVIDER OR BUSINESS TRANSACTION PARTNER LOCATED IN (OUR COUNTRY) FOR A DISAGREEMENT / DISPUTE FOR UNDER 2.000 EUROS", CODE 1 OR 2 IN QB8.1 – OTHERS GO TO QB10B

What would be the minimum amount for which you would be willing to go to court in (OUR COUNTRY) over a disagreement / dispute with a retailer, provider or business transaction partner located in (OUR COUNTRY)?

(WRITE DOWN - ONE ANSWER ONLY - IF "ZERO" CODE '000000' - IF "IT DEPENDS" CODE '999997' - IF "REFUSAL" CODE '999998' - IF "DK" CODE '999999')

10 10 euros

2000 2000 euros

9995 It depends

9996 (Not relevant)

9997 Refusal

9998 DK

9999 Inap. Not willing or DK (not coded 1 or 2 in qb8_1)

99999 Inap. (DK in isocntry)

Note:

Original code "999997" recoded to "9995".

Original code "999998" recoded to "9997".

Original code "999999" recoded to "9998".

Actual number is coded.

Code 9996 ("Not relevant") is not documented in the questionnaire. The value label is provided with the original TNS dataset for variable qb10a.

Question module QB has not been surveyed in Denmark. Weight variables w97, w98, w101, w102, w103, and w104 exclude Denmark for selected standard weights, and are relevant for the descriptive analysis of module QB. For more information see w97, w98, w101, w102, w103, and w104.

qb10a_r - GO TO CNTRY COURT NAT PROVIDER - AMOUNT (REC)

Minimum amount for which respondents are willing to go to court in "(OUR COUNTRY)" over a disagreement / dispute for under 2.000 euros with businesses in "(OUR COUNTRY)" - recoded

- 1 1-399 euros
- 2 400-799 euros
- 3 800-1199 euros
- 4 1.200-1.599 euros
- 5 1.600-2.000 euros
- 95 It depends
- 96 (Not relevant)
- 97 Refusal
- 98 DK
- 99 Inap. Not willing or DK (not coded 1 or 2 in qb8_1)
- 999 Inap. (DK in isocntry)

Derivation:

This variable collapses answers to qb10a into five categories.

[qb10a What would be the minimum amount for which you would be willing to go to court in (OUR COUNTRY) over a disagreement / dispute with a retailer, provider or business transaction partner located in (OUR COUNTRY)?]

Note:

See qb10a for complete question text.

Code 96 ("Not relevant") is not documented in the questionnaire. The value label is provided with the original TNS dataset for variable qb10a.

Question module QB has not been surveyed in Denmark. Weight variables w97, w98, w101, w102, w103, and w104 exclude Denmark for selected standard weights, and are relevant for the descriptive analysis of module QB. For more information see w97, w98, w101, w102, w103, and w104.

qb10b - GO TO CNTRY COURT EU PROVIDER - AMOUNT

ASK ALL EXCEPT IN DK

QB10B

ASK QB10B IF "YES, WILLING TO GO TO COURT IN (OUR COUNTRY) WITH A RETAILER, PROVIDER OR BUSINESS TRANSACTION PARTNER LOCATED IN ANOTHER EUMEMBER STATE FOR A DISAGREEMENT 7 DISPUTE FOR UNDER 2.000 EUROS", CODE 1 OR 2 IN QB8.2 – OTHERS GO TO QB11

What would be the minimum amount for which you would be willing to go to court in (OUR COUNTRY) over a disagreement / dispute with a retailer, provider or business transaction partner located in another EU Member State?

(WRITE DOWN - ONE ANSWER ONLY - IF "ZERO" CODE '000000' - IF "IT DEPENDS" CODE '999997' - IF "REFUSAL" CODE '999998' - IF "DK" CODE '999999')

10 10 euros

2000 2000 euros

9995 It depends

9996 (Not relevant)

9997 Refusal

9998 DK

9999 Inap. Not willing or DK (not coded 1 or 2 in qb8_2)

99999 Inap. (DK in isocntry)

Note:

Original code "999997" recoded to "9995".

Original code "999998" recoded to "9997".

Original code "999999" recoded to "9998".

Actual number is coded.

Code 9996 ("Not relevant") is not documented in the questionnaire. The value label is provided with the original TNS dataset for variable qb10b.

Question module QB has not been surveyed in Denmark. Weight variables w97, w98, w101, w102, w103, and w104 exclude Denmark for selected standard weights, and are relevant for the descriptive analysis of module QB. For more information see w97, w98, w101, w102, w103, and w104.

qb10b_r - GO TO CNTRY COURT EU PROVIDER - AMOUNT (REC)

Minimum amount for which respondents are willing to go to court in "(OUR COUNTRY)" over a disagreement / dispute for under 2.000 euros with businesses in "another EU Member State" - recoded

- 1 1-399 euros
- 2 400-799 euros
- 3 800-1199 euros
- 4 1.200-1.599 euros
- 5 1.600-2.000 euros
- 95 It depends
- 96 (Not relevant)
- 97 Refusal
- 98 DK
- 99 Inap. Not willing or DK (not coded 1 or 2 in qb8_2)
- 999 Inap. (DK in isocntry)

Derivation:

This variable collapses answers to qb10b into five categories.

[qb10b What would be the minimum amount for which you would be willing to go to court in (OUR COUNTRY) over a disagreement / dispute with a retailer, provider or business transaction partner located in another EU Member State?]

Note:

See qb10b for complete question text.

Code 96 ("Not relevant") is not documented in the questionnaire. The value label is provided with the original TNS dataset for variable qb10b.

Question module QB has not been surveyed in Denmark. Weight variables w97, w98, w101, w102, w103, and w104 exclude Denmark for selected standard weights, and are relevant for the descriptive analysis of module QB. For more information see w97, w98, w101, w102, w103, and w104.

qb16 - EUROP SMALL CLAIMS PROCEDURE - HEARD BEFORE

ASK ALL EXCEPT IN DK

The European Small Claims Procedure is intended to improve access to justice by simplifying cross-border small claims litigation and by reducing costs. "Small claims" are cases about amounts under 2.000 euros, excluding interest, expenses and disbursements.

QB16

Before this interview, have you ever heard of the European Small Claim Procedure or not?

(READ OUT – ONE ANSWER ONLY)

- 1 Yes, you heard about it and used it
- 2 Yes, you have heard about it but never used it
- 3 No, you have not heard about it
- 4 DK
- 9 Inap. (DK in isocntry)

Note:

Question module QB has not been surveyed in Denmark. Weight variables w97, w98, w101, w102, w103, and w104 exclude Denmark for selected standard weights, and are relevant for the descriptive analysis of module QB. For more information see w97, w98, w101, w102, w103, and w104.

qb25 - SMALL CROSS-BORDER CLAIM - MAXIMUM AMOUNT

ASK ALL EXCEPT IN DK

QB25

Do you think that the maximum amount of a claim considered as a small cross-border claim eligible for a simplified court procedure should be...?

(SHOW CARD – READ OUT – ONE ANSWER ONLY)

- 1 1.000 euros
- 2 2.000 euros
- 3 5.000 euros
- 4 10.000 euros
- 5 20.000 euros
- 6 More than 20.000 euros
- 7 Other (SPONTANEOUS)
- 8 DK
- 9 Inap. (DK in isocntry)

Note:

Question module QB has not been surveyed in Denmark. Weight variables w97, w98, w101, w102, w103, and w104 exclude Denmark for selected standard weights, and are relevant for the descriptive analysis of module QB. For more information see w97, w98, w101, w102, w103, and w104.

d1r1 - LEFT-RIGHT PLACEMENT: 3 CAT (RECODED)

Left-right placement - recoded to three categories

- 1 (1 - 4) Left
- 2 (5 - 6) Centre
- 3 (7 -10) Right
- 9 DK/Refusal
- 99 Inap. (HR in isocntry)

Derivation:

This variable collapses answers to d1 into three categories.

[d1 In political matters people talk of "the left" and "the right". How would you place your views on this scale?]

Note:

See d1 for complete question text.

d1r2 - LEFT-RIGHT PLACEMENT: 5 CAT (RECODED)

Left-right placement - recoded to five categories

- 1 (1 - 2) Left
- 2 (3 - 4)
- 3 (5 - 6) Centre
- 4 (7 - 8)
- 5 (9 -10) Right
- 9 DK/Refusal
- 99 Inap. (HR in isocntry)

Derivation:

This variable collapses answers to d1 into five categories.

[d1 In political matters people talk of "the left" and "the right". How would you place your views on this scale?]

Note:

See d1 for complete question text.

NO QUESTIONS D2 TO D6

d7 - MARITAL STATUS

D7

ASK ALL

Could you give me the letter which corresponds best to your own current situation?

(SHOW CARD – READ OUT – ONE ANSWER ONLY)

MARRIED OR REMARRIED

- 1 Living without children
- 2 Living with the children of this marriage
- 3 Living with the children of a previous marriage
- 4 Living with the children of this marriage and of a previous marriage

SINGLE LIVING WITH A PARTNER

- 5 Living without children
- 6 Living with the children of this union
- 7 Living with the children of a previous union
- 8 Living with the children of this union and of a previous union

SINGLE

- 9 Living without children
- 10 Living with children

DIVORCED OR SEPARATED

- 11 Living without children
- 12 Living with children

WIDOW

- 13 Living without children
- 14 Living with children

15 Other (SPONTANEOUS)

97 Refusal (SPONTANEOUS)

Note:

Original code "16" recoded to "97".

d7r1 - MARITAL STATUS: 5 CAT (RECODED)

Marital status recoded to five categories with focus on partnership

- 1 (Re-)Married (coded 1 to 4 in d7)
- 2 Single living with partner (coded 5 to 8 in d7)
- 3 Single (coded 9 to 10 in d7)
- 4 Divorced or separated (coded 11 to 12 in d7)
- 5 Widow (coded 13 to 14 in d7)
- 6 Other (SPONTANEOUS)
- 7 Refusal (SPONTANEOUS)

Derivation:

This variable collapses answers to d7 into five categories.

[d7 Could you give me the letter which corresponds best to your own current situation?]

Note:

See d7 for complete question text.

d7r2 - MARITAL STATUS: 4 CAT (RECODED)

Marital status recoded to four categories with focus on marriage

- 1 Unmarried (coded 9 to 10 in d7)
- 2 (Re)Married/Single with partner (coded 1 to 8 in d7)
- 3 Divorced or separated (coded 11 to 12 in d7)
- 4 Widow (coded 13 to 14 in d7)
- 5 Other (SPONTANEOUS)
- 7 Refusal (SPONTANEOUS)

Derivation:

This variable collapses answers to d7 into four categories.

[d7 Could you give me the letter which corresponds best to your own current situation?]

Note:

See d7 for complete question text.

d7r3 - MARITAL STATUS: HH&CHILDREN (RECODED)

Marital status recoded to four categories with focus on children (family status)

- 1 Single household without children (coded 9, 11, and 13 in d7)
- 2 Single household with children (coded 10, 12, and 14 in d7)
- 3 Multiple occupancy household without children (coded 1 and 5 in d7)
- 4 Multiple occupancy household with children (coded 2 to 4 and 6 to 8 in d7)
- 5 Other (SPONTANEOUS)
- 7 Refusal (SPONTANEOUS)

Derivation:

This variable collapses answers to d7 into four categories.

[d7 Could you give me the letter which corresponds best to your own current situation?]

Note:

See d7 for complete question text.

d8 - AGE EDUCATION

D8

How old were you when you stopped full-time education?

(IF "STILL STUDYING", CODE '00' – IF "NO EDUCATION" CODE '01' – IF "REFUSAL" CODE '98' – IF "DK" CODE '99')

0 Refusal

2 2 years

84 84 years

97 No full-time education

98 Still studying

99 DK

Note:

Original code "00" recoded to "98".

Original code "01" recoded to "97".

Original code "98" recoded to "0".

Please notice that pre-school ages (outliers) might be considered as with "no full-time education" or be excluded from valid answers.

Actual number is coded.

Comparability:

Last trend: EB78.1, D8

d8r1 - AGE EDUCATION: 11 CAT (RECODED)

Age when finished full-time education - recoded to 11 categories

- 1 Up to 14 years
- 2 15 years
- 3 16 years
- 4 17 years
- 5 18 years
- 6 19 years
- 7 20 years
- 8 21 years
- 9 22 years and older
- 10 Still studying
- 11 No full-time education
- 97 Refusal
- 98 DK

Derivation:

This variable collapses answers to question d8 for indicated ages lowest (2) to 14 and 22 to highest (84).

[d8 How old were you when you stopped full-time education?]

Note:

See d8 for complete question text.

d8r2 - AGE EDUCATION: 5 CAT (RECODED)

Age when finished full-time education - recoded to five categories

- 1 Up to 15 years
- 2 16-19 years
- 3 20 years and older
- 10 Still studying
- 11 No full-time education
- 97 Refusal
- 98 DK

Derivation:

This variable collapses answers to question d8 to three age groups.

[d8 How old were you when you stopped full-time education?]

Note:

See d8 for complete question text.

d11 - AGE EXACT

D11

How old are you?

15 15 years

97 97 years

99 NA (originally coded 98 for IE)

Note:

24 cases were originally coded 98, all from Ireland. For plausibility considerations these cases have been recoded by the archive to missing value 99 (NA). Derived variables d11r1 and d11r2 have been adjusted accordingly.

Actual number is coded.

d15a_r1 - OCCUPATION OF RESPONDENT (REC)

Occupation of respondent - recoded to employment status

- 1 Self-employed (coded 5 to 9 in d15a)
- 2 Employed (coded 10 to 18 in d15a)
- 3 Not working (coded 1 to 4 in d15a)

Derivation:

This variable collapses answers to d15a into three categories.

[d15a What is your current occupation?]

Note:

See d15a for complete question text.

d15a_r2 - OCCUPATION SCALE (C14)

Occupation of respondent - scale (C14)

- 1 Self-employed (coded 5 to 9 in d15a)
- 2 Managers (coded 10 to 12 in d15a)
- 3 Other white collars (coded 13 or 14 in d15a)
- 4 Manual workers (coded 15 to 18 in d15a)
- 5 House persons (coded 1 in d15a)
- 6 Unemployed (coded 3 in d15a)
- 7 Retired (coded 4 in d15a)
- 8 Students (coded 2 in d15a)

Derivation:

This scale is based on a combination/selection of answers to variable d15a.

[d15a What is your current occupation?]

Note:

See d15a for complete question text.

d15b - OCCUPATION OF RESPONDENT - LAST JOB

D15B

ASK D15B IF "NOT DOING ANY PAID WORK CURRENTLY", CODES 1 to 4 in D15A

Did you do any paid work in the past? What was your last occupation?

SELF EMPLOYED

- 1 Farmer
- 2 Fisherman
- 3 Professional (lawyer, medical practitioner, accountant, architect, etc.)
- 4 Owner of a shop, craftsmen, other self-employed person
- 5 Business proprietors, owner (full or partner) of a company

EMPLOYED

- 6 Employed professional (employed doctor, lawyer, accountant, architect)
- 7 General management, director or top management (managing directors, director general, other director)
- 8 Middle management, other management (department head, junior manager, teacher, technician)
- 9 Employed position, working mainly at a desk
- 10 Employed position, not at a desk but travelling (salesmen, driver, etc.)
- 11 Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, etc.)
- 12 Supervisor
- 13 Skilled manual worker
- 14 Other (unskilled) manual worker, servant

15 Never did any paid work

99 Inap. Currently doing paid work (not coded 1 to 4 in d15a)

Note:

In accordance with former waves coding has been (correctly) shifted compared to the questionnaire.

Comparability:

Last trend: EB78.1, D15B

d15b_r - OCCUPATION OF RESPONDENT - LAST JOB (REC)

Occupation of respondent: last job - recoded to employment status

- 1 Self-employed (coded 1 to 5 in d15b)
- 2 Employed (coded 6 to 14 in d15b)
- 3 Never paid work (coded 15 in d15b)
- 9 Inap. Currently doing paid work (not coded 1 to 4 in d15a)

Derivation:

This variable collapses answers to d15b into three categories.

[d15b Did you do any paid work in the past? What was your last occupation?]

Note:

See d15b for complete question text.

d40a_r - HOUSEHOLD COMPOSITION: AGED 15+ (REC)

n of people in household aged 15 years or more - recoded to four categories

- 1 One
- 2 Two
- 3 Three
- 4 Four or more

Derivation:

This variable groups answers to question d40a.

[d40a Could you tell me how many people aged 15 years or more live in your household, yourself included?]

Note:

See d40a for complete question text.

d40b_r - HOUSEHOLD COMPOSITION: AGED <10 (REC)

n of people in household less than 10 years old - recoded to five categories

- 0 None
- 1 One
- 2 Two
- 3 Three
- 4 Four or more

Derivation:

This variable groups answers to question d40b.

[d40b Could you tell me how many children less than 10 years old live in your household?]

Note:

See d40b for complete question text.

d40t_r - HOUSEHOLD COMPOSITION: SIZE A+B+C (REC)

n of people in household - recoded to four categories

- 1 One
- 2 Two
- 3 Three
- 4 Four or more

Derivation:

This variable groups the summarized variable d40t.

[d40a Could you tell me how many people aged 15 years or more live in your household, yourself included?

d40b Could you tell me how many children aged 10 to 14 years old live in your household?

d40c Could you tell me how many children less than 10 years old live in your household?]

Note:

See d40a, d40b, and d40c for complete question text.

NO QUESTIONS D41 TO D45

d46t - OWNERSHIP APPARTM/HOUSE (D46_7+D46_8)

Ownership of an apartment or house - summarized

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes responses to d46_7 and d46_8.

[d46 Which of the following goods do you have?

d46_7 An apartment / a house which you have finished paying for

d46_8 An apartment / a house which you are paying for]

Note:

See variable d46 for complete question text.

d61r - LEVEL IN SOCIETY - SELF PLACEMENT (RECODE)

Self placement on level in society - recoded to three categories

- 1 Lower level (coded 1 to 4 in d61)
- 2 Middle level (coded 5 to 6 in d61)
- 3 Upper level (coded 7 to 10 in d61)
- 7 Refusal (SPONTANEOUS)

Derivation:

This variable collapses answers to d61 into three categories.

[d61 On the following scale, step '1' corresponds to "the lowest level in the society"; step '10' corresponds to "the highest level in the society". Could you tell me on which step you would place yourself?]

Note:

See d61 for complete question text.

d62_2 - INTERNET USE FREQ: AT PLACE OF WORK

D62

Could you tell me if...?

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE - READ OUT)

D62_2 You use the Internet at your place of work

- 1 Everyday/Almost everyday
- 2 Two or three times a week
- 3 About once a week
- 4 Two or three times a month
- 5 Less often
- 6 Never
- 7 No Internet access (SPONTANEOUS)

Comparability:

Last trend: EB78.1, D62

d62t1 - INTERNET USE - INDEX 1 (3 CAT)

Frequency of internet use - index with three categories

- 1 Everyday/Almost everyday (at least once coded 1 in d62_1 to d62_3)
- 2 Often/sometimes (at least once coded 2 to 5 in d62_1 to d62_3)
- 3 Never to all (coded 6 in d62_1 to d62_3)
- 9 Inap. Never and/or no access (codes 6 and/or 7 in d62_1 to d62_3)

Derivation:

This variable summarizes responses to d62 in three categories.

[d62 Could you tell me if...?

d62_1 You use the Internet at home

d62_2 You use the Internet at your place of work

d62_3 You use the Internet somewhere else (school, university, cyber-café, etc.)]

Respondents coded 1 at least once in d62_1 to d62_3 are coded 1 in d62t1 ("Everyday/Almost everyday"). Respondents coded 2, 3, 4 or 5 in each variable d62_1 to d62_3 are coded 2 ("Often/sometimes") in d62t1. Respondents coded 6 ("Never") in each variable d62_1 to d62_3 are coded 3 ("Never to all") in d62t1. Respondents coded 6 at least once in d62_1 to d62_3 and coded 7 ("No internet access") in the other variable(s), or respondents coded 7 ("No internet access") in each variable d62_1 to d62_3 are coded 9 ("Inap. Never and/or no access (codes 6 and/or 7 in d62_1 to d62_3)") in d62t1.

Note:

See d62 for complete question text.

d62t2 - INTERNET USE - INDEX 2 (7 CAT)

Frequency of internet use - index with seven categories

- 1 Everyday/Almost everyday (at least once coded 1 in d62_1 to d62_3)
- 2 Two or three times a week (not coded 1 and at least once coded 2 in d62_1 to d62_3)
- 3 About once a week (not coded 1 to 2 and at least once coded 3 in d62_1 to d62_3)
- 4 Two or three times a month (not coded 1 to 3 and at least once coded 4 in d62_1 to d62_3)
- 5 Less often (not coded 1 to 4 and at least once coded 5 in d62_1 to d62_3)
- 6 Never/No access (coded 6/7 or coded 6 in d62_1 to d62_3)
- 7 No Internet access at all (coded 7 in d62_1 to d62_3)

Derivation:

This variable summarizes responses to d62.

[d62 Could you tell me if...?

d62_1 You use the Internet at home

d62_2 You use the Internet at your place of work

d62_3 You use the Internet somewhere else (school, university, cyber-café, etc.)]

Respondents coded 1 at least once in d62_1 to d62_3 are coded 1 in d62t2 ("Everyday/Almost everyday"). Respondents coded 2 at least once in d62_1 to d62_3 and not coded 1, are coded 2 in d62t2 ("Two or three times a week"). Respondents coded 3 at least once in d62_1 to d62_3 and not coded 1 or 2, are coded 3 in d62t2 ("About once a week"). Respondents coded 4 at least once in d62_1 to d62_3 and not coded 1 to 3, are coded 4 in d62t2 ("Two or three times a month"). Respondents coded 5 at least once in d62_1 to d62_3 and not coded 1 to 4, are coded 5 in d62t2 ("Less often"). Respondents coded 6 ("Never") in each variable d62_1 to d62_3, or at least once coded 6 in d62_1 to d62_3 and coded 7 ("No internet access") in the other variable(s), are coded 6 ("Never/No access") in d62t2. Respondents coded 7 ("No internet access") in each variable d62_1 to d62_3 are coded 7 ("No internet access at all") in d62t2.

Note:

See d62 for complete question text.

999 DK (NOT DOCUMENTED)

Note:

Please notice that for six respondents an interview duration of more than four hours (252, 345, 378, 429, and 446 minutes) is coded. For plausibility considerations one case with an interview duration of 15 hours (902 minutes) has been defined as missing value by the archive.

p6dk - SIZE OF COMMUNITY - DENMARK

p6dk Objective size of community: Denmark

- 1 Municipalities without built-up area
- 2 Municipalities with less than 33% in built-up area
- 3 Municipalities with 33-50% in built-up area
- 4 Municipalities with at least 50% in built-up area
- 5 Municipalities (10.000 - 19.999 inhabitants)
- 6 Municipalities (20.000 - 39.999 inhabitants)
- 7 Municipalities (40.000 - 99.999 inhabitants)
- 8 Municipalities (more than 100.000 inhabitants)
- 9 Remaining groups in metropolitan area [category not coded]
- 10 Other municipalities in metropolitan area - minimum 10.000 inhabitants [category not coded]
- 11 Metropolitan suburbs
- 12 The capital
- 99 Inap. (not DK in isocntry)

Note:

The categories "Other municipalities in metropolitan area - minimum 10.000 inhabitants" (original code 3) and "Remaining groups in metropolitan area" (original code 4) were not coded. Both were possibly collapsed to "Metropolitan suburbs" (original code 2). Irrespective of that and according to routine adaptation of this variable to former coding standards the following recodes have been executed by the archive: (1=12) (2=11) (3=10) (4=9) (5=8) (6=7) (7=6) (8=5) (9=4) (10=3) (11=2) (12=1).

Comparability:

p6gb - SIZE OF COMMUNITY - UNITED KINGDOM

p6gb Objective size of community: United Kingdom

- 1 Rural
- 2 Urban
- 3 Metropolitan
- 99 Inap. (not GB-GBN/GB-NIR in isocntry)

Note:

The original variable separates data for Northern Ireland (codes 1-3) and Great Britain (codes 4-6). In order to facilitate analysis for the United Kingdom (GB) as a whole, corresponding categories have been coded together (matched).

For meaningful (descriptive) results this variable needs to be used for Great Britain and Northern Ireland separately (select if '9' OR '10' in country) or be weighted by special weighting variables for the UNITED KINGDOM (GB) w4 or w4a.

Comparability:

Last trend: EB78.1, P6

p6gb, weighted by w4

p7it - REGION - ITALY NUTS 2 MOD

p7it Italy (EUROSTAT NUTS 2 LEVEL – modified) – Regioni

- 1 Piemonte & Valle d'Aosta / Vallée d'Aoste
- 2 Liguria
- 3 Lombardia (Lombardy)
- 5 Provincia Autonoma di Trento & Provincia Autonoma di Bolzano / Bozen
- 6 Veneto
- 7 Friuli-Venezia Giulia
- 8 Emilia-Romagna
- 9 Toscana (Tuscany)
- 10 Marche
- 11 Umbria
- 12 Lazio
- 13 Abruzzo & Molise
- 14 Campania
- 15 Puglia & Basilicata
- 17 Calabria
- 18 Sicilia (Sicily)
- 19 Sardegna (Sardinia)
- 99 Inap. (not IT in isocntry)

Note:

The combination of regions (Piemonte & Valle d'Aosta / Vallee d'Aoste; Abruzzo & Molise; Puglia & Basilicata) does not comply with the official EUROSTAT specifications for NUTS 2.

Starting with Eurobarometer wave 77 (NUTS version 2010 with regular amendment as of January 1, 2012) NUTS 1 codes for Italy have changed for North-East (ITH instead of ITD) and Center (ITI instead of ITE). The reason for this are minor boundary shifts on NUTS 2 and 3 level (ITI3: Marche and ITH5: Emilia Romagna).

Comparability:

Last trend: EB78.1, P7

- 99 Inap. (not GB-GBN/GB-NIR in isocntry)

Note:

This variable has been generated by the Archive in accordance with former waves. The combination of regions and NUTS levels does not comply with official EUROSTAT specifications.

For meaningful (descriptive) results this variable needs to be used for Great Britain and Northern Ireland separately (select if '9' OR '10' in country) or be weighted by special weighting variables for the UNITED KINGDOM (GB) w4 or w4a.

Comparability:

p7pt - REGION - PORTUGAL NUTS 2

p7pt Portugal (EUROSTAT NUTS 2 LEVEL) – Comissaoes de Coordenação regional + Regioes autonomas

- 1 Norte (North)
- 2 Centro (Center)
- 3 Lisboa (Lisbon)
- 4 Alentejo (Alentejo Region)
- 5 Algarve
- 99 Inap. (not PT in isocntry)

Note:

The autonomous regions of the Azores (PT20 - Região Autónoma dos Açores) and of Madeira (PT30 - Região Autónoma da Madeira) are not covered.

Since 2002 the region “Lisboa e vale do tejo” is split up and the subregion “Lezíria do Tejo” reinstated to the “Alentejo” Region and the “Médio Tejo” and “Oeste” reinstated to the “Centro” Region. The relative frequencies for each region indicate that this is reflected in the Eurobarometer P.7 regions starting with Eurobarometer 62.0. The original label for category ‘3’ (“Lisboa e vale do Tejo”) has been edited accordingly. According to the NUTS 2 specifications for Portugal this now only includes “Grande Lisboa” and “Península de Setúbal”.

The official NUTS categories are coded and documented in the integrated alphanumeric NUTS CODES variable 'nuts'.

p7fi - REGION - FINLAND NUTS 3

p7fi Finland (EUROSTAT NUTS 3 LEVEL 2010) – Maakunnat / Landskap

- 1 Helsinki-Uusimaa
- 2 Varsinais-Suomi (Southwest Finland)
- 3 Satakunta
- 4 Kanta-Häme (Tavastia Proper)
- 5 Pirkanmaa (Tampere Region)
- 6 Päijät-Häme (Paijanne Tavastia) [category not coded]
- 7 Kymenlaakso (Kymi Valley)
- 8 Etelä-Karjala (South Karelia)
- 9 Etelä-Savo (Southern Savonia)
- 10 Pohjois-Savo (Northern Savonia)
- 11 Pohjois-Karjala (North Karelia)
- 12 Keski-Suomi (Central Finland)
- 13 Etelä-Pohjanmaa (Southern Ostrobothnia)
- 14 Pohjanmaa (Ostrobothnia)
- 15 Keski-Pohjanmaa (Central Ostrobothnia)
- 16 Pohjois-Pohjanmaa (Northern Ostrobothnia)
- 17 Kainuu
- 18 Lappi (Lapland)
- 99 Inap. (not FI in isocntry)

Note:

The Åland Islands (FI200 - Landskapet Åland / Avenanmaan maakunta) are not covered.

Former regions of "Uusimaa" (FI181) and "Itä-Uusimaa" (FI182) have been consolidated to the region of "Helsinki-Uusimaa" (FI1B1) on January 1, 2011. The official NUTS codes have changed accordingly starting with NUTS version 2010 (regular amendment as of January 1, 2012). Eurobarometer did never code "Itä-Uusimaa" (East Uusimaa) separately. "Uusimaa" always included the capital area of Helsinki. For this reason the NUTS CODES variable 'nuts' is already coded in accordance with NUTS version 2010.

The NUTS version history documents a minor boundary shift between "Satakunta" (NUTS 2003: FI191; NUTS 2006/2010: FI196) and "Pirkanmaa" (NUTS 2003: FI192; NUTS 2006/2010: FI197). One municipality has been transferred between these NUTS level 3 regions. Please notice that the NUTS CODES variable 'nuts' is based on the NUTS 2006/2010 codes for "Satakunta" and "Pirkanmaa" although it could not be verified if and when the boundary shift is actually reflected in Eurobarometer data.

Please notice that weighted relative frequencies may vary considerably over time (compared across surveys). Weighted frequencies for NUTS2 are adjusted.

The official NUTS categories are coded and documented in the integrated alphanumeric NUTS CODES variable 'nuts'.

Comparability:

p7fi_r1 - REGION - FINLAND NUTS 2 (2003/2006)

p7fi_r1 Finland (EUROSTAT NUTS 2 LEVEL 2003 / 2006) – Suuralueet / Storområden

- 1 Itä-Suomi (East Finland)
- 2 Etelä-Suomi (South Finland)
- 3 Länsi-Suomi (West Finland)
- 4 Pohjois-Suomi (North Finland)
- 99 Inap. (not FI in isocntry)

Note:

The Åland Islands (FI200 - Landskapet Åland / Avenanmaan maakunta) are not covered.

This variable corresponds to the NUTS 2 breakdown in accordance with NUTS versions 2003 und 2006, i.e. before separating "Helsinki-Uusimaa" (NUTS version 2010: FI1B) from "Etelä-Suomi" (NUTS 2003/2006: FI18; NUTS 2010: FI1C), and before merging "Pohjois-Suomi" (NUTS 2003/2006: FI1A) with "Itä-Suomi" (NUTS 2003/2006: FI13) to "Pohjois- ja Itä-Suomi" (NUTS 2010: FI1D). This coding corresponds to former Eurobarometer waves (p7fi_r).

The NUTS CODES variable 'nuts' and the new recoded variable p7fi_r2 represent NUTS version 2010 with regular amendment as of January 1, 2012.

The official NUTS categories are coded and documented on NUTS 3 level in the integrated alphanumeric NUTS CODES variable 'nuts'.

HR Croatia

Derivation:

This additional alphanumeric NUTS CODES variable is produced by the archive. It integrates all country specific p7 variables given that the regional units are defined in accordance with the EUROSTAT Nomenclature of Territorial Units for Statistics (NUTS) respectively in accordance with the Statistical Regions for Candidate and EFTA Countries 2010. For each country the lowest available NUTS subdivision level is considered.

Eurostat: RAMON Eurostat Metadata Server. NUTS (Nomenclature of Territorial Units for Statistics), by country. Webdownload: 2013-03-01

(http://ec.europa.eu/eurostat/ramon/documents/nuts/NUTS_2010.zip)

Eurostat: RAMON Eurostat Metadata Server. Statistical Regions for Candidate countries and EFTA countries, by country. Webdownload: 2013-03-01 http://ec.europa.eu/eurostat/ramon/documents/nuts/Statistical_Regions_2010.zip

Note:

The official NUTS codes are coded verbatim in accordance with the in each case valid (applicable) NUTS version. All version details and changes are documented in the official EUROSTAT classification history (History of NUTS). A second variable (nutslvl) indicates the coded NUTS LEVEL for each country.

France:

The territorial unit of Corse (FR83) and the Oversea departments (Départements d'outre-mer: FR9) are not covered.

Italy:

Starting with Eurobarometer wave 77 (NUTS version 2010 with regular amendment as of January 1, 2012) NUTS 1 codes for Italy have changed for North-East (ITH instead of ITD) and Center (ITI instead of ITE). The reason for this are minor boundary shifts on NUTS 2 and 3 level (ITI3: Marche and ITH5: Emilia Romagna).

Greece:

The Aegean Islands (EL41 - Βόρειο Αιγαίο/Voreio Aigaio and EL42 - Νότιο Αιγαίο/Notio Aigaio) as well as the Ionian Islands (EL22 - Ιόνια Νησιά/Ionia Nisia) are not covered.

Starting with Eurobarometer wave 77 (NUTS version 2010 with regular amendment as of January 1, 2012) the standard country prefix 'GR' is replaced by 'EL'. The remaining numerical part of the codes remains unaffected.

Spain:

The autonomous cities of Ceuta (ES63 - Ciudad Autónoma de Ceuta) and Melilla (ES64 - Ciudad Autónoma de Melilla) are not covered.

Portugal:

The autonomous regions of the Azores (PT20 - Região Autónoma dos Açores) and of Madeira (PT30 - Região Autónoma da Madeira) are not covered.

Finland:

The Åland Islands (FI200 - Landskapet Åland / Avenanmaan maakunta) are not covered.

Former regions of "Uusimaa" (FI181) and "Itä-Uusimaa" (FI182) have been consolidated to the region of "Helsinki-Uusimaa" (FI1B1) on January 1, 2011. The official NUTS codes have changed accordingly starting with NUTS version 2010 (regular amendment as of January 1, 2012). Eurobarometer did never code "Itä-Uusimaa" (East Uusimaa) separately. "Uusimaa" always included the capital area of Helsinki. For this reason the NUTS CODES variable 'nuts' for Finland is already coded in accordance with NUTS version 2010. Only the country specific NUTS 2 variable (p7fi_r) is still coded in accordance with NUTS version 2003/2006 in order to remain consistent with former Eurobarometer waves.

The NUTS version history documents a minor boundary shift between "Satakunta" (NUTS 2003: FI191; NUTS 2006/2010: FI196) and "Pirkanmaa" (NUTS 2003: FI192; NUTS 2006/2010: FI197). One municipality has been transferred between these NUTS level 3 regions. Please notice that NUTS CODES variable 'nuts' is based on the NUTS 2006/2010 codes for "Satakunta" and "Pirkanmaa" although it could not be verified if and when the boundary shift is actually reflected in Eurobarometer data.

Austria:

The value labels in the original TNS dataset document East Tyrol (Osttirol) as coded together with Carinthia (Kärnten; AT21). According to the official NUTS 2 territorial classification for Austria, East Tyrol (AT333) belongs to Tyrol (AT33), being an inner-Austrian exclave of this federal state. It borders on Austrian federal states Carinthia and Salzburg. Carinthia belongs to NUTS1 region South Austria (AT2) while

Tyrol belongs to NUTS 1 region West Austria (AT3).

w3a - WEIGHT RESULT FROM TRAGET - UNITED GERMANY

w3a Weight result from target - United Germany

This weight combines the weighting factors for Germany as a whole (redressment factors plus populations size factors East/West) and the redressment factors for all other countries (Great Britain and Northern Ireland separated). This weight has been derived by the archive from original TNS weights w1 and w3. Unlike weighting variable w3 (WEIGHT UNITED GERMANY (ONLY)) the other countries/samples are not excluded from calculation.

Note:

Starting with Eurobarometer 75.4 and according to available weights up to Eurobarometer 61, the archive is deriving three additional weights (w3a, w4a, w3a4a) in order to provide for the analysis of the United Kingdom and/or Germany, each as a whole and together with all other countries. Minimal deviations in frequencies for weighted data are possible due to rounding differences.
