

ISSP 2014 Hungary

Hungary

Please name the **ISSP module** which the documentation refers to (e.g., "Health and Health Care / ISSP2011"):

**Citizenship II/ISSP2014**

Please name your **country**:

**HUNGARY**

The hungarian *questionnaire did not include some source variables*:

- Father's country of birth, F\_BORN
- Mother's country of birth M\_BORN
- Old-age / widowed pensioner or an disabled pensioner
- Partners demography and occupation variables (@SPWORK, @SPWRKHS, etc)
- Years of schooling variables (respondent – partner)
- Hours worked weekly
- What is/was the form of your employer? TYPORG1
- Self replacement top-bottom
- ethnic group variables

In this document we marked missing variables with an @.

#### **SEX - Sex of respondent**

	National Language	English Translation
<i>Question no. and text</i>	#3a: neme. A kérdezett neme	Sex of respondent
<i>Codes/ Categories</i>	1 Férfi	1 Male
	2 Nő	2 Female
	X Sysmis	9 No Answer
<i>Interviewer Instruction</i>		
<i>Translation Note</i>		
<i>Note</i>	Interviewer observation was used	

#### **Construction/Recoding:**

Country Variable Codes (in translation)	➔ SEX
compute sex = neme.	1. Male
	2. Female
	9. No answer

### BIRTH – Year of birth

This question can be asked as an alternative to asking about AGE. If BIRTH is not asked directly, it must be computed by DATEYR ‘year of interview’ minus AGE ‘age of respondent’.

	National Language	English Translation
<i>Question no. and text</i>	#3 (szulev): Születésének éve	Year of birth
<i>Codes/ Categories</i>	1922	1922
	...	...
	1996	1996
	X Sysmis	9999 "No answer"
<i>Interviewer Instruction</i>		
<i>Translation Note</i>		
<i>Note</i>	Answer categories are not read aloud.	

**Construction/Recoding:** (list lowest, highest, and ‘missing’ codes only, replace terms in [square brackets] with real numbers)

	Country Variable Codes/Construction Rules	➔BIRTH
<i>Construction</i>		
<i>Codes</i>	1922	[MIN BIRTH]
	1996	[HIGH BIRTH]
	X	9999. No answer

#### *Optional: Recoding Syntax*

```
compute birth = szulev.
```

### AGE - Age of respondent

This question can be asked as an alternative to asking about BIRTH. If AGE is not asked directly, it must be computed by DATEYR ‘year of interview’ minus BIRTH ‘year of birth’.

	National Language	English Translation
<i>Question no. and text</i>		
<i>Codes/ Categories</i>		
<i>Interviewer Instruction</i>		
<i>Translation Note</i>		
<i>Note</i>		

**Construction/Recoding:** (list lowest, highest, and ‘missing’ codes only, replace terms in [square brackets] with real numbers)

	Country Variable Codes/Construction Rules	➔AGE
<i>Construction</i>		
<i>Codes</i>	18	[MIN AGE]
	92	[HIGH AGE]
		999. No answer

**Optional: Recoding Syntax**

Compute age = 2014 – birth .

## @EDUCYRS - Education I: years of schooling

	National Language	English Translation
<i>Question no. and text</i>		
<i>Codes/ Categories</i>		
<i>Interviewer Instruction</i>		
<i>Translation Note</i>		
<i>Note</i>		

## Filter Variable(s) and Conditions:

--

Country Variable Codes/Construction Rules	➔ EDUCYRS
	0. No formal schooling, no years at school
	1. One year
	...
	98. Don't know
	99. No answer

## Optional: Recoding Syntax

--

**nat\_DEGR** - Country-specific highest completed degree of education

	National Language	English Translation
<i>Question no. and text</i>	#1 (iskola). Mi az Ön legmagasabb iskolai végzettsége?	<b>1.</b> What is your highest level of education completed?
<i>Codes/ Categories</i>	1 – kevesebb, mint 8 általános	1 – less than 8th grade
	2 – 8 általános	2 – 8th grade
	3 – szakmunkásképző; szakképzés érettségi nélkül	3 – trade school, vocational training without high-school leaving exam
	4 – szakközépiskolai érettségi; szakképzést követő érettségi	4 – vocational school with leaving exam; vocational training followed by high-school leaving exam
	5 – gimnáziumi érettségi	5 – grammar school, high-school diploma
	6 – érettségit követő, felsőfokra nem akkreditált szakképzés; középfokú technikum	6 – vocational training following high-school leaving exam, not accredited as higher education; secondary technical school
	7 – akkreditált felsőfokú szakképzés; felsőfokú technikum	7 – accredited higher education professional training; tertiary technical school
	8 – főiskola / BA / BSc	8 – college
	9 – egyetem / MA / MSc	9 – university
	X – sysmis	
<i>Interviewer Instruction</i>

### ISCO88 - Occupation ISCO 1988

Please give the text of the source question(s) on the respondent's occupation used in your field questionnaire. If ISCO88-codes are not coded directly from the responses, but derived from a country-specific occupation coding scheme, please provide a table of correspondence between country-specific and ISCO88 codes *attached as a separate file*. Please report which kind of ISCO code you apply. The most common ones are the code developed by the International Labour Organisation (ILO) and the variant developed for the European Union (EU), ISCO-COM. If you apply another variant such as ISCO88-CIS developed by the Statistical Committee of the Commonwealth of Independent States, then please specify.

Please do **not** enter **standard** ISCO88 codes here. But please report if your country **adds** or **changes** codes compared to ISCO88, if any.

Occupations should be coded on the 4-digit level of ISCO88. Occupational area 0 (Armed Forces occupations) needs some special attention. Since the ISCO variable is numeric, the 4-digit code 0110 will usually appear as 110 in the data file. It is therefore suggested that the only valid 3-digit code in the data file is 110 (Armed Forces).

In some special cases information concerning the occupation may be insufficient for 4-digit coding. Instead of coding these cases as [9998] "inadequately described" use 3-digit coding. In those very special cases where 3-digit coding is applied, fill in a zero for the missing digit. Example: code 131 is coded as 1310.

**@SPISCO88 – Spouse, partner: occupation ISCO 1988**

Please give the text of the source question(s) on the spouse's occupation used in your field questionnaire. If ISCO88-codes are not coded directly from the responses, but derived from a country-specific occupation coding scheme, please provide a table of correspondence between country-specific and ISCO88 codes *attached as a separate file*. Please report which kind of ISCO code you apply. The most common ones are the code developed by the International Labour Organisation (ILO) and the variant developed for the European Union (EU), ISCO-COM. If you apply another variant such as ISCO88-CIS developed by the Statistical Committee of the Commonwealth of Independent States, then please specify.

Please do **not** enter **standard** ISCO88 codes here. But please report if your country **adds** or **changes** codes compared to ISCO88, if any.

Occupations should be coded on the 4-digit level of ISCO88. Occupational area 0 (Armed Forces occupations) needs some special attention. Since the ISCO variable is numeric, the 4-digit code 0110 will usually appear as 110 in the data file. It is therefore suggested that the only valid 3-digit code in the data file is 110 (Armed Forces).

In some special cases information concerning the occupation may be insufficient for 4-digit coding. Instead of coding these cases as [9998] “inadequately described” use 3-digit coding. In those very special cases where 3-digit coding is applied, fill in a zero for the missing digit. Example: code 131 is coded as 1310.

	2. Case substituted

**Optional: Recoding Syntax**

compute subcase = 0.
----------------------

### WEIGHT – Weighting factor

Please report on whether you calculate any weighting variables. If you adjust for non-response bias, please enter the variable(s) on which the sample's distribution(s) is (are) adjusted to the population distribution(s). Please, also report if you apply any kind of rescaling.

<i>Design weight to adjust for unequal selection probabilities</i>	No [ X ] Yes [ ]
<i>Weight to adjust for non-response bias</i>	No [ ] Yes [ X ] → please specify variables used for calculation of weight Sex, age, education, type of settlement
<i>Are the final weights rescaled to net sample size (thus weighted sample size=unweighted sample size)?</i>	No [ ] → please specify target population represented by sum of all case weights _____
<i>Note</i>	[ X ]

	14. F2f/PAPI, interpreter or translator – visuals
	20. CAPI, no visuals
	21. CAPI, visuals
	22. CAPI, respondent reading questionnaire (paper or on monitor)
	23. CAPI, interpreter or translator – no visuals
	24. CAPI, interpreter or translator – visuals
	30. SC, arrives with interviewer, interviewer attending
	31. SC, arrives with interviewer, drops-off, picks up later
	32. SC, arrives with interviewer, drops off, mailed back by R
	33. SC, mailed to, completed by R and hold for pick up
	34. SC, mailed to, mailed back by R
	40. CASI, self-completion, computer-assisted

#### **4. Country Questionnaire**

Please provide the part(s) of your country questionnaire that relate(s) to the background variables reported in this template. If these variables are already covered by your country's field questionnaire delivered with your national ISSP data file, then just tick on the last page of this document. (PDF or MS Word format preferred.)

- Already included in field questionnaire provided with the country data file.  
 Attached file: ISSP\_kerdoiv\_Demoval\_1406.pdf

#### **5. Frequency Distributions of Source Variables**

Please supply frequency distributions with absolute and relative frequencies, missing values *included*, for **all source** variables. *Source variables* are the country-specific variables **before** recodes into ISSP standard variables are done. (MS Word or simple ASCII file preferred.)

Attached file: issp\_hu2014\_source\_variables.txt

#### **6. Correspondence list ISCO88<->national occupation codes**

If your country derives ISCO88 codes from a national occupation coding scheme, please supply a correspondence list of national codes and ISCO88 codes. (MS Word or simple ASCII file preferred.)

- ISCO88 is used to code responses directly.  
 Conversion of national coding scheme to ISCO88. Attached file: feor08\_isc88.txt.
