1 Overview

This documenation refers to the dataset ZA5989_Household_14 and is part of the project PIAAC-L. PIAAC-L was funded by the Federal Ministry of Education and Research (Bundesministerium für Bildung und Forschung, BMBF; project reference number: 01 JP 1301 A, B, C). The codebook lists all variables contained in the dataset and gives information on a) the question(s) associated with the variable, b) additional information, especially for derived variables. For all variables with value labels, frequencies of these value labels are displayed. No frequencies are displayed for unlabeled numerical variables (e.g., years) or alphanumerical variables.
The variables in this dataset contain information about an anchor person's household. Data are available for 3,737 cases. Thus, in case of 21 anchor persons no household interview was carried out. The codebook is organized in 14 sections including this overview. Section 2 contains the identifier. The order of the variables in sections 3-12 follows the order of questions in the household-questionnaire. In section 13, some generated variables (SOEP: hgen) including information on how they were generated can be found. Section 14 contains information about the interview.

2 Identifier

The section on identifiers entails four identifier. One for the current household (hnrid), one to identifiy the person who answered the questions in the household-interview (pnr), and two for the PIAAC anchor person (pnrfestid and seqid). See codebook ZA5989_Persons_14 for further information on identifier in PIAAC-L.

pnrfestid – Permanent person ID Anchor (randomly derived)

-1	Don't know	0
-2	Refused	0
-3	Don't know or refused	0
-4	Valid skip	0
-5	Not applicable	0
-6	Not reached or not attempted	0
-7	Implausible value or not determinable	0
-8	Anonymized	0
-9	Longitudinal missing	0

Global identifier in all PIAAC-L datasets for PIAAC-L anchor person and each person living in a household of a PIAAC anchor person. Note that in case of the dataset ZA5989_Household_14, the pnrfestid of the PIAAC-L anchor person is included, no matter whether the anchor person was the interviewed person in the household questionnaire (see pnr for this information).

hnrid – Household ID (randomly derived)

This variable reflects the so-called Einkommensschaukel ("income swing") question in the questionnaire. As household income is important information, people who do not answer the question with an exact figure (-3 in hnetto_14) are asked in a series of subsequent questions whether their income is higher or lower than a certain benchmark. This is done starting with the question of whether their income is higher or lower than 1500 euros. Depending on the answer, the following question is either "Is your income higher or lower than 2500 euros?" or "Is your income higher or lower than 750 euros?". If the person completes all the questions, this results in the categories 1 to 6 of the variable znetto_14. If he or she decides to stop at some point, this results in the categories 21-51. The information from znetto_14 and hnetto_14 is combined in the derived variable hinccat_14.

13 Generated Variables

The variables in this section are similar to variables in the correspondig SOEP-dataset "HGEN" and provide a set of time-consistent variables generated from the household questionnaire. In this first wave of PIAAC-L, the content is mostly identical to the corresponding variables in sections 3-12. In wave three, the information will be updated as information will be asked again for those who have moved to a new home. For all other respondents, the information will be carried forward in these generated variables.
