Short-term Campaign Panel

ZA5305, Version 5.0.0

Documentation of Questionnaire (wave 3a)

Notes on this questionnaire:

As we had to recruit additional respondents in the second wave of the panel, two different questionnaires had to be designed for the third wave, thus enabling us to ask the new respondents questions concerning social structures that have already been asked in wave 1. For this group of respondents questions on the second discussion partner have been removed, whereas questions on party identification have been moved to the end of the set of questions on the social structure. This is why variants a and b show different numberings.

Attention: This is the questionnaire for respondents who started with wave 1.

Question:

Currently people are discussing pensions and old-age provisions a lot. Some people think that it is the gainfully employed's duty to ensure a fair living standard for elderly people by increased taxes and dues, even if these people must expect a lower living standard once they are old. Others think that the gainfully employed's taxes and dues should decrease in order to enable people to make their own provisions, even if that implies elderly people having a lower living standard.
