## Acknowledgements

---

Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences. The data preparation for Eurobarometer 43.01 was realized by the Swedish Social Science Data Services (SSD).

## Introduction and preliminary remarks

---

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

### Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (<http://zacat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

### Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

### Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

# 1 Study Description – Eurobarometer 43.01

---

## 1.1 Bibliographic information

### 1.1.1 Archive study numbers

GESIS: ZA2638

ICPSR: 6661

Under a co-operative arrangement for the archival processing and distribution of Standard & Special Eurobarometer, ICPSR and GESIS employ its own study number to identify each – otherwise congruent – dataset.

### 1.1.2 Title and archive subtitle

Eurobarometer 43.01

Drug Abuse and AIDS

March – May 1995

### 1.1.3 Principal investigators

Karlheinz Reif, Anna Melich

European Commission, Directorate General X – Information, Communication Culture

Surveys, Research, Analyses

### 1.1.4 Bibliographic citation

Publications based on data collections which are made available through ICPSR or GESIS, should acknowledge those sources by means of bibliographic citations. To ensure that such source attributions are captured for social science bibliographic utilities, citations must appear in footnotes or in the reference section of publications. The bibliographic citation for this data collection is:

European Commission, Brussels: Eurobarometer 43.01, March-May 1995.

International Research Associates (INRA), Brussels [Producer];

GESIS, Cologne [Publisher]: ZA2638, dataset version 1.0.1, doi:10.4232/1.10914.

## 1.2 Content

### 1.2.1 Abstract

#### Attitudes to drugs:

registration of respondent in the election register; classification of drug addiction as problem of maturity, social problem, health problem, moral problem, criminal or economic problem; primary consequences of use of drugs; major reasons for use of drugs; degree of familiarity or personal proximity to selected drugs; classification of these drugs as dangerous to health; age at start of use of drugs; assumed frequency of use of drugs on the street, in schools or universities, at parties, in pubs or discotheques, at concerts, in sport clubs, in leisure centers and on vacation; personal opportunities of access to drugs; potential possibilities of personally obtaining drugs; recommendations on elimination of the drug problem; preferred contact for information about drugs; judgement on danger of medications in comparison with drugs; attitude to permitting urine tests to expose drug users by the police, employers, insurance companies etc.

#### Attitudes to AIDS:

significance of the topic AIDS (scale); possibilities of infection and risk groups; fear of blood transfusion, blood donations, injections or operations due to risk of AIDS; most important possibilities to contain or eliminate AIDS; judgement on national efforts in these areas and approval of common efforts through the European Union in the fight against AIDS; most important preventive measures for effective protection against AIDS; personal change of sexual practices and social habits from AIDS.

#### Demographics:

self-classification on a left-right continuum; religiousness; possession of a telephone.

#### Interview protocol:

date of interview; time of start of interview; length of interview; number of persons present during interview; willingness of respondent to cooperate.

This dataset merges the responses to identical questions from two waves of Eurobarometer surveys, Eurobarometer 43.0, March– April 1995, and 43.1, April–May 1995. The Eurobarometer 43.0+ 43.1 datafile includes the results of questions 48 to 68 in Eurobarometer 43.0, of questions 64 to 84 in Eurobarometer 43.1 and a set of relevant demographics.

### 1.2.2 Topic classification

- International Institutions, Relations
- Medicine

### 1.2.3 Related publications

- INRA (Europe) pour la Commission Européenne: Les Européens et la drogue. Bruxelles, juin 1995 (ISBN/ISSN: 9282760960).

### 1.3 Universe

Both Eurobarometer cover the population of the respective nationality of the European Union membercountries, aged 15 years and over, resident in each of the Member States. The questions in Eurobarometer 43.1 were only put to persons up to the age of 24, providing a youth oversample for the integrated data set 43.0+1.

For Norway the sample is reduced to respondents aged 15-24 originating from Eurobarometer 43.1. Norway was not surveyed in the framework of wave 43.0.

### 1.4 Sampling procedure

The basic sample design applied in all Member States is a multi-stage, random (probability) one. In each EU country, a number of sampling points was drawn with probability proportional to population size (for a total coverage of the country) and to population density.

For doing so, the points were drawn systematically from all 'administrative regional units', after a stratification by individual unit and type of area. They thus represent the whole territory of the Member States according to the EUROSTAT-NUTS II (or equivalent) and according to the distribution of the resident population of the respective EU-nationalities in terms of metropolitan, urban and rural areas. In each of the selected sampling points, a starting address was drawn, at random. Further addresses were selected as every Nth address by standard random route procedures, from the initial address. In each household, the respondent was drawn, at random. All interviews were face-to-face in people's home and in the appropriate national language.

For each country a comparison between the sample and the universe was carried out. The Universe description was derived from EUROSTAT population data or from national statistics. For all EU-member countries a national weighting procedure, using marginal and intercellular weighting, was carried out based on this universe description. As such in all countries, minimum sex, age, region NUTS II were introduced in the iteration procedure. For international weighting (i.e. EU averages), INRA (EUROPE) applies the official population figures as published by EUROSTAT in the Regional Statistics Yearbook 1989 or national census data. The total population figures for input in this post-weighting procedure are listed above. The effective number of realized interviews in this round is indicated in table 1.

### 1.5 Fieldwork

Between March 22 and April 21, 1995 (43.0), respectively April 7 and May 18 1995 (43.1), INRA (EUROPE), a European Network of Market- and Public Opinion Research agencies, carried out waves 43.0 and 43.1 of the standard Eurobarometer, on request of the European Commission.

## 1.6 Mode of data collection

All interviews were face-to-face in people's home and in the appropriate national language in the framework of Eurobarometer 43.0 and 43.1.

## 1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting

procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factor corrects for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country as well as each lower level sample (Great Britain and Northern Ireland, East and West Germany) are represented in proportion to its population size within different groupings, or according to the historical states of European unification (e.g. founder members, new members, Euro zone) in the case of the EUROPEAN WEIGHTS, or for the United Kingdom (WEIGHT SPECIAL UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31A) and for Germany as a whole (WEIGHT SPECIAL GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general all samples which do not belong to the respective group of samples under consideration are excluded from calculation.

The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 4) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

**Eurobarometer 43.01** provides four (post-stratification) NATION WEIGHTS: NATION WEIGHT IIa (WEIGHT RESULT FROM TARGET) and NATION WEIGHT IIb (WEIGHT ADJUSTED TO STANDARD SIZE) for separate analysis or comparison of individual samples (countries or regions on sub-national level), NATION WEIGHT I (WEIGHT

SPECIAL UNITED KINGDOM adjusted to standard size) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole and NATION WEIGHT III (WEIGHT SPECIAL GERMANY adjusted to standard size), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. All other samples (nations) are included, likewise all post-stratification factors.

The different EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries representing different historical states of European integration (e.g. EURO6 = six founder members). All post-stratification factors are included.

For more detailed information on the individual weights please see the corresponding variable description.

## 1.8 Data preparation

The data received by ZA from INRA (EUROPE) were checked for missing and duplicate records, for illegal (wild) codes and for consistency of response patterns. Errors discovered by these procedures were corrected or noted in this codebook. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable documentation was also created for this dataset by SSD.

To facilitate analyses of the data, SSD created new variables which consolidate information dispersed over two or more variables in the original INRA dataset. Five variables containing condensed information were created by SSD for this Eurobarometer: NATION I, NATION III, AGE RECODED, AGE EDUCATION RECODED and REGION II. Users should be aware that SSD's process of condensing information sometimes produces coding schemes that differ from those in earlier Eurobarometers.

SSD also added "Inappropriate" (Inap.) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the INRA questionnaire was adhered to for (almost) every respondent.

Users should note that INRA has occasionally represented answers to a question by a series of binary "dummy" variables (i.e. variables which take on values of one and zero only) creating separate "dummy" variables to explicitly represent "Don't know", "No answer" or other residual responses, such as "None of the above". SSD has recoded these residual responses in the case of inconsistencies with respect to the series of principal answers.

SSD has recoded the missing answers (NA) represented in the INRA data set by blanks.

Question text and contingency text appearing in this codebook and SSD's machine-readable documentation is taken from INRA's English language version of the basic bilingual questionnaire. Coding schemes and other documentation are based on INRA's English language version of the basic bilingual questionnaire, INRA's codebook (in English) and INRA's SPSS setup for its dataset as received by ZA/SSD.

## 2 Eurobarometer Series Description

---

### 2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

### 2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

### 2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

### 2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

Table 2: EU enlargement and countries covered by Standard and Special Eurobarometer

| EU History   | Survey (start)          | Country (Sample)          | ISO Code Alpha-2 | Standard Sample Size | Remarks                            |

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 3: Oversamples for special topic Eurobarometer

| Topic              | (Over-)Sample            | Eurobarometer Survey              |
|--------------------|--------------------------|-----------------------------------|
| Young Europeans    | Youth aged 15-24         | 17, 28.1, 34.2, 47.2OVR, 55.1OVR  |
| Elderly Europeans  | Elderly aged 60+         | 37.2                              |

| Working Conditions | Professionally active    | 37.0+1, 39.0+1                    |
| Drug Abuse         | Youth aged 15-24         | 43.0+1, 57.2OVR                   |
| Education Issues   | Youth aged 15-24         | 44.0 / 44.1 (data not integrated) |

## 2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 3).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 4) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 4: Overview of Eurobarometer surveys with standard EU and trend question modules

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

## 3 Dataset structure and standards

---

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

### 3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

### 3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

#### 3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 5: ZEUS Party Family Code (slightly modified)

| Category |           | Party Family   |
|----------|-----------|--|
|          |           |  |
| 0        | (001-099) | not affiliated / electoral alliances across "families"           |
| 1        | (100-199) | Communists   |
| 2        | (200-299) | Socialists   |
| 3        | (300-399) | Liberals   |
| 4        | (400-499) | Christian Democrats  |
| 5        | (500-599) | Conservatives  |
| 6        | (600-699) | Extreme Rights / Nationalists                                    |
| 7        | (700-799) | Regionalists / Ethnic  |
| 8        | (800-899) | Environmental parties  |
| 9        | (900-949) | Agricultural parties   |
| 9        | (950-989) | other special issue parties (e.g. Eurosceptics) and independents |
|          |           |  |
|          | 990       | other (spontaneous)  |
|          | 994       | not voting age   |
|          | 995       | empty ballot (blank) or invalid vote                             |
|          | 996       | not voted / would not vote                                       |
|          | 997       | Refused  |
|          | 998       | DK / DK+NA if NA not coded separately                            |
|          | 999       | INAP (inappropriate)   |

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

### 3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

## 3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

## 4 Explanation of the variable documentation

---

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION – ALL SAMPLES ISO 3166).

|        |                            |    |                   |
|--------|----------------------------|----|-------------------|
| AT     | Austria                    | HR | Croatia           |
| BE     | Belgium                    | HU | Hungary           |
| BG     | Bulgaria                   | IE | Ireland           |
| CY     | Cyprus                     | IT | Italy             |
| CY-TCC | Turkish Cypriote Community | LT | Lithuania         |
| CZ     | Czech Republic             | LU | Luxembourg        |
| DE     | Germany (–1989)            | LV | Latvia            |
| DE-W   | Germany West (1990 ff.)    | MK | Macedonia (FYROM) |
| DE-E   | Germany East (1990 ff.)    | MT | Malta             |
| EE     | Estonia                    | NL | The Netherlands   |
| ES     | Spain                      | PL | Poland            |
| FI     | Finland                    | PT | Portugal          |
| FR     | France                     | RO | Romania           |
| GB     | United Kingdom             | SE | Sweden            |
| GB-GBN | Great Britain              | SI | Slovenia          |
| GB-NIR | Northern Ireland           | SK | Slovakia          |
| GR     | Greece                     | TR | Turkey            |

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded “real” values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission’s official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

| CROSS-TABULATION: The absolute frequencies of the occurrence of values ( <i>absolute values</i> ) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies ( <i>row percent</i> ) refer to the valid cases ( <i>n valid sum</i> ), i.e. the total number of cases ( <i>n sum</i> ) reduced by the number of cases defined as missing data ( <i>M</i> ). For display and place saving reasons excluded countries or areas may be completely dropped from the table. |   |            |            |            |            |     |       |       |             |       |             |    |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |    |            |            |            |          |            |   |      |      |  |    |            |            |          |          |            |   |      |      |  |    |          |            |            |            |            |    |      |     |  |    |          |            |           |          |            |   |     |     |  |    |            |            |            |          |            |   |      |      |  |      |            |            |           |          |            |  |     |     |  |      |            |            |            |          |            |   |      |      |  |    |            |            |          |          |            |   |      |      |  |    |            |            |            |          |            |    |      |     |  |    |            |            |            |          |          |    |      |     |  |    |            |            |            |          |            |   |      |      |  |    |            |            |            |          |            |    |      |      |  |        |            |            |            |          |            |   |      |      |  |        |           |            |          |         |            |  |     |     |  |    |            |            |            |          |            |  |     |     |  |    |            |            |            |          |            |   |     |     |  |    |            |            |            |          |            |    |      |     |  |    |            |            |            |          |            |    |      |     |  |    |            |            |            |          |            |    |      |     |  |    |           |            |          |          |            |   |     |     |  |    |            |            |            |          |            |    |      |     |  |    |          |            |          |         |            |   |     |     |  |    |            |            |          |          |            |   |     |     |  |    |            |            |            |          |            |    |      |     |  |    |          |            |            |            |            |    |      |     |  |    |          |            |            |            |          |    |      |     |  |    |            |            |          |          |            |   |      |      |  |    |            |            |            |          |            |    |      |      |  |    |            |            |            |          |            |    |      |      |  |       |      |       |      |      |      |     |       |  |  |             |      |       |      |      |      |  |  |       |  |
| FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data ( <i>M</i> ), i.e. <i>percent</i> on the basis of all cases ( <i>sum</i> ) and <i>valid percent</i> on the basis of the <i>valid cases</i> .   |   |            |            |            |            |     |       |       |             |       |             |    |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |    |            |            |            |          |            |   |      |      |  |    |            |            |          |          |            |   |      |      |  |    |          |            |            |            |            |    |      |     |  |    |          |            |           |          |            |   |     |     |  |    |            |            |            |          |            |   |      |      |  |      |            |            |           |          |            |  |     |     |  |      |            |            |            |          |            |   |      |      |  |    |            |            |          |          |            |   |      |      |  |    |            |            |            |          |            |    |      |     |  |    |            |            |            |          |          |    |      |     |  |    |            |            |            |          |            |   |      |      |  |    |            |            |            |          |            |    |      |      |  |        |            |            |            |          |            |   |      |      |  |        |           |            |          |         |            |  |     |     |  |    |            |            |            |          |            |  |     |     |  |    |            |            |            |          |            |   |     |     |  |    |            |            |            |          |            |    |      |     |  |    |            |            |            |          |            |    |      |     |  |    |            |            |            |          |            |    |      |     |  |    |           |            |          |          |            |   |     |     |  |    |            |            |            |          |            |    |      |     |  |    |          |            |          |         |            |   |     |     |  |    |            |            |          |          |            |   |     |     |  |    |            |            |            |          |            |    |      |     |  |    |          |            |            |            |            |    |      |     |  |    |          |            |            |            |          |    |      |     |  |    |            |            |          |          |            |   |      |      |  |    |            |            |            |          |            |    |      |      |  |    |            |            |            |          |            |    |      |      |  |       |      |       |      |      |      |     |       |  |  |             |      |       |      |      |      |  |  |       |  |

## 5 Variable Documentation

**Variable, Label**

**Question Text (English Language)**

**v1 - ARCHIVE STUDY NUMBER**

Archive Study Number

Respective archive study number of the involved archive.

v1

| Value | Label       | Missing | Count | Percent | Valid Percent |
|-------|-------------|---------|-------|---------|---------------|
| 2638  |             |         | 19246 | 100.0   | 100.0         |
|       | Sum         |         | 19246 | 100.0   | 100.0         |
|       | Valid Cases |         | 19246 |         |               |

## v2 - SSD EDITION NUMBER

SSD Edition Identification NR

The number identifying the release edition of this dataset.

1 1ST EDITION AS OF JANUARY 31, 2007

### Note:

Please see variable VERSION ("GESIS ARCHIVE VERSION") for further information on the version number of this data set and the corresponding release date.

v2

| Value | Label                              | Missing | Count | Percent | Valid Percent |
|-------|------------------------------------|---------|-------|---------|---------------|
| 1     | 1ST EDITION AS OF JANUARY 31, 2007 |         | 19246 | 100.0   | 100.0         |
|       | Sum                                |         | 19246 | 100.0   | 100.0         |
|       | Valid Cases                        |         | 19246 |         |               |

version - GESIS ARCHIVE VERSION

VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

On occasion of the implementation of this versioning scheme (2010-04-13), the default version number 1.0.0 has been created automatically for this Eurobarometer.

Version 1.0.1 adds the crosstabulation variable ISOCNTRY and the VERSION variable to the otherwise unchanged data set. Former version or edition identification variables are maintained unchanged as a reference to former releases.

version

| Value              | Label       | Missing | Count | Percent | Valid Percent |
|--------------------|-------------|---------|-------|---------|---------------|
| 1.0.1 (2012-07-01) |             |         | 19246 | 100.0   | 100.0         |
|                    | Sum         |         | 19246 | 100.0   | 100.0         |
|                    | Valid Cases |         | 19246 |         |               |

#### v3 - SSD PART NUMBER

SSD Part Number

The number identifying this part of a 1-part study.

v3

| Value | Label       | Missing | Count | Percent | Valid Percent |
|-------|-------------|---------|-------|---------|---------------|
| 1     |             |         | 19246 | 100.0   | 100.0         |
|       | Sum         |         | 19246 | 100.0   | 100.0         |
|       | Valid Cases |         | 19246 |         |               |

v4 - ID SERIAL NUMBER

Sequential respondent Id number assigned by the archive

A unique serial number is assigned to each respondent.

isocntry - NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

v6 - WEIGHT SPECIAL UNITED KINGDOM

Nation weight I (WEIGHT SPECIAL UNITED KINGDOM)

This variable adjusts the British and Northern Irish samples to their respective proportions in the United Kingdom. All EU nation weights (Nation Weight II) are included.

Unlike the "Nation Weight I" in earlier Eurobarometers up to 31 this weight adjusts all samples to the standard size.

## v7 - NATION II (GB AND NORTHERN IRELAND)

Nation of interview II

The two samples for the United Kingdom - Great Britain and Northern Ireland - are coded separately

- 1 France
- 2 Belgium
- 3 Netherlands
- 4 Germany - West
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 Germany - East
- 15 Norway
- 16 Finland
- 17 Sweden
- 18 Austria

v7

| 11    | Greece           |         | 1213  | 6.3     | 6.3           |
| 12    | Spain            |         | 1208  | 6.3     | 6.3           |
| 13    | Portugal         |         | 1208  | 6.3     | 6.3           |
| 14    | Germany - East   |         | 1185  | 6.2     | 6.2           |
| 15    | Norway           |         | 188   | 1.0     | 1.0           |
| 16    | Finland          |         | 1172  | 6.1     | 6.1           |
| 17    | Sweden           |         | 1192  | 6.2     | 6.2           |
| 18    | Austria          |         | 1213  | 6.3     | 6.3           |

| Value | Label       | Missing | Count | Percent | Valid Percent |
|-------|-------------|---------|-------|---------|---------------|
|       | Sum         |         | 19246 | 100.0   | 100.0         |
|       | Valid Cases |         | 19246 |         |               |

v8 - WEIGHT RESULT FROM TARGET

Nation weight (WEIGHT RESULT FROM TARGET)

This variable contains weights that adjust the weighted samples to make them representative for the countries from which they were drawn. It reproduces the real number of cases for each EU country. Great Britain and Northern Ireland are treated as independent samples.

Note:

This weight corresponds to Nation Weight II in earlier Eurobarometers up to 31.

v9 - WEIGHT ADJUSTED TO STANDARD SIZE

Nation weight IIb (WEIGHT ADJUSTED TO STANDARD SIZE)

This variable corresponds to "Weight Result from Target" adjusting all samples to the standard size of 1000 respectively 300 (Northern Ireland) or 600 (Luxembourg) cases. Great Britain (n=1000) and Northern Ireland (n=300) are weighted as independent samples.

## v10 - NATION III (UNITED GERMANY)

Nation of interview III

East and West Germany are coded together: United Germany

- 1 France
- 2 Belgium
- 3 Netherlands
- 4 Germany
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 Norway
- 15 Finland
- 16 Sweden
- 17 Austria

v10

| Value | Label            | Missing | Count | Percent | Valid Percent |
|-------|------------------|---------|-------|---------|---------------|
| 1     | FRANCE           |         | 1211  | 6.3     | 6.3           |

| 6     | Luxembourg       |         | 599   | 3.1     | 3.1           |
| 7     | Denmark          |         | 1161  | 6.0     | 6.0           |
| 8     | Ireland          |         | 1221  | 6.3     | 6.3           |
| 9     | Great Britain    |         | 1306  | 6.8     | 6.8           |
| 10    | Northern Ireland |         | 372   | 1.9     | 1.9           |
| 11    | Greece           |         | 1213  | 6.3     | 6.3           |
| 12    | Spain            |         | 1208  | 6.3     | 6.3           |
| 13    | Portugal         |         | 1208  | 6.3     | 6.3           |
| 14    | Norway           |         | 188   | 1.0     | 1.0           |
| 15    | Finland          |         | 1172  | 6.1     | 6.1           |
| 16    | Sweden           |         | 1192  | 6.2     | 6.2           |
| 17    | Austria          |         | 1213  | 6.3     | 6.3           |
|       | Sum              |         | 19246 | 100.0   | 100.0         |
|       | Valid Cases      |         | 19246 |         |               |

v11 - WEIGHT SPECIAL GERMANY

Nation weight (WEIGHT SPECIAL GERMANY)

This variable adjusts the East and West German samples to their respective proportions in the united Germany. All EU nation weights are included and all samples adjusted to the standard size.

v12 - WEIGHT EURO 6

European weight (WEIGHT EURO 6)

This variable contains weights that adjusts each national sample in proportion to its nation's share in the total population of the European Union countries in their historical composition:

EURO 6 only refers to the six EU founder-members (France, Belgium, Netherlands, West Germany, Italy and Luxembourg). This weight variable includes the national weights for each sample and contains the adjustment to the standard size.

v13 - WEIGHT EURO 9

European weight (WEIGHT EURO 9)

This variable contains weights that adjusts each national sample in proportion to its nation's share in the total population of the European Union countries in their historical composition:

EURO 9 excludes Greece, Spain, Portugal, East Germany, Finland, Sweden and Austria. This weight variable includes the national weights for each sample and contains the adjustment to the standard size.

v14 - WEIGHT EURO 10

European weight (WEIGHT EURO 10)

This variable contains weights that adjusts each national sample in proportion to its nation's share in the total population of the European Union countries in their historical composition:

EURO 10 excludes Spain, Portugal, East Germany, Finland, Sweden and Austria. This weight variable includes the national weights for each sample and contains the adjustment to the standard size.

v15 - WEIGHT EURO 12

European weight (WEIGHT EURO 12)

This variable contains weights that adjusts each national sample in proportion to its nation's share in the total population of the European Union countries in their historical composition:

EURO 12 excludes East Germany, Finland, Sweden and Austria. This weight variable includes the national weights for each sample and contains the adjustment to the standard size.

v16 - WEIGHT EURO 12+

European weight (WEIGHT EURO 12+)

This variable contains weights that adjusts each national sample in proportion to its nation's share in the total population of the European Union countries in their historical composition:

EURO 12+ excludes Finland, Sweden and Austria. This weight variable includes the national weights for each sample and contains the adjustment to the standard size.

v17 - WEIGHT EURO +3

European weight (WEIGHT EURO +3)

For producing meaningful average results for the three new membercountries who joined on January 1995 (Austria, Finland and Sweden).

v18 - WEIGHT EURO 15

European weight (WEIGHT EURO 15)

This variable contains weights that adjusts each national sample in proportion to its nation's share in the total population of the European Union countries in their historical composition:

EURO 15 includes all fifteen EU members. This weight variable includes the national weights for each sample and contains the adjustment to the standard size.

v19 - WEIGHT TOTAL

European weight (WEIGHT TOTAL)

For producing meaningful average results for the total file.

## v20 - Q1 ELECTORAL REGISTER

Q.1

Are you ... (NATIONALITY)?

Q.1a

IF YES

Do you know whether your name appears in the Electoral Register (the register of people entitled to vote at the next General Election), under your present address, at another address or does it not appear at all?

- 1 At present address
- 2 At another address
- 3 Don't know if registered
- 4 Does not appear at all
- 5 No, is not ... (NATIONALITY)

Note:

## v164 - Q64 AIDS ACTION - FIRST PRIORITY

Q.64\_80

There are various actions that could be taken in order to eliminate the problem of AIDS or at least to slow down its development.

(SHOW CARD)

Q.64a\_80a

Looking at this card, which is the main priority in your view?

0 NA

1 An information campaign on the types of behaviour which expose people to infection by the AIDS virus

2 Try harder to identify the people who are ill

3 Treating those with AIDS and looking after them

4 Funding research to find a vaccine

5 DK

## v173 - Q65 AIDS ACTION EFF: RESEARCH F VACCINE

Q.64\_80

There are various actions that could be taken in order to eliminate the problem of AIDS or at least to slow down its development.

Q.65\_81

For each of these options do you feel that the measures currently being undertaken in (OUR COUNTRY) are very effective, fairly effective, not very effective or not at all effective?

(SHOW CARD)

Q.65d\_81d Funding research to find a vaccine

## v177 - Q66 EU AIDS ACTION: RESEARCH F VACCINE

Q.64\_80

There are various actions that could be taken in order to eliminate the problem of AIDS or at least to slow down its development.

Q.66\_82

Let us look at this same list of possible measures. For each of them do you think it is useful or not to collaborate and to harmonise efforts within the European Union?

v193 - D11 AGE EXACT

D.11

How old are you?

15 15 years

98 98 years

Note:

Actual number is coded

## v194 - D11 AGE RECODED - 4 GROUPS

D.11R1 (R's age - four collapsed categories)

- 1 15-24 years
- 2 25-39 years
- 3 40-54 years
- 4 55 years and older

Note:

See D.11 for complete questiontext

## v197 - D13 HH CHILDREN UNDER 15

## D.13

How many children under 15 living at home?

- 0 None
- 1 One child
- 2 2 (children)
- 3 3 (children)
- 4 4 (children)
- 5 5 (children)
- 6 6 (children)
- 7 7 (children)
- 8 8 (children)
- 9 9 or more (children)
- 99 NA

v205 - D29 INCOME HH

D.29

We also need some information about the income of this household to be able to analyse the survey results for different types of households. Here is a list of income groups.

(SHOW INCOME CARD)

Please count the total wages and salaries per month of all members of this household; all pensions and social insurance benefits; child allowances and any other income like rents, etc ... Of course, your answer as all other replies in this interview will be treated confidentially and referring back to you or your household will be impossible. Please give me the letter of the income group your household falls into before tax and other deductions.

in France (FR):

French francs per month

- 1 Less Than 4.000
- 2 4.000 to 4.999
- 3 5.000 to 5.999
- 4 6.000 to 6.999
- 5 7.000 to 7.999
- 6 8.000 to 8.999
- 7 9.000 to 9.999
- 8 10.000 to 10.999
- 9 11.000 to 12.499
- 10 12.500 to 14.999
- 11 15.000 to 17.499
- 12 17.500 or More

in Belgium (BE):

Belgian francs per month

- 1 Less Than 20.000
- 2 20.000 to 29.999
- 3 30.000 to 39.999
- 4 40.000 to 49.999
- 5 50.000 to 59.999
- 6 60.000 to 69.999
- 7 70.000 to 79.999
- 8 80.000 to 89.999
- 9 90.000 to 99.999
- 10 100.000 to 109.999
- 11 110.000 to 119.999
- 12 120.000 or More

in Netherlands (NL):

Dutch guilders per month

- 1 Less Than 1.500
- 2 1.500 to 1.999
- 3 2.000 to 2.499
- 4 2.500 to 2.749
- 5 2.750 to 3.249
- 6 3.250 to 3.749
- 7 3.750 to 4.249
- 8 4.250 to 4.749
- 9 4.750 to 5.249
- 10 5.250 to 6.249
- 11 6.250 to 7.249
- 12 7.250 or More

in Germany - West (DE\_W):

German marks per month

- 1 Less Than 1.500 Dem
- 2 1.501 to 1.750
- 3 1.751 to 2.000
- 4 2.001 to 2.250
- 5 2.251 to 2.500
- 6 2.501 to 2.750
- 7 2.751 to 3.000
- 8 3.001 to 3.500
- 9 3.501 to 4.000
- 10 4.001 to 4.500
- 11 4.501 to 5.000
- 12 5.001 or More

in Italy (IT):

Italian lire per month

- 1 Less Than 750.000
- 2 750.000 to 1.000.000
- 3 1.000.001 to 1.500.000
- 4 1.500.001 to 1.750.000
- 5 1.750.001 to 2.000.000
- 6 2.000.001 to 2.500.000
- 7 2.500.001 to 3.000.000
- 8 3.000.001 to 3.500.000
- 9 3.500.001 to 4.000.000
- 10 4.000.001 to 4.500.000
- 11 4.500.001 to 5.000.000
- 12 5.000.000 or More

in Luxembourg (LU):

Luxembourg francs per month

- 1 Less Than 50.000

- 2 50.000 to 59.999
- 3 60.000 to 69.999
- 4 70.000 to 79.999
- 5 80.000 to 89.999
- 6 90.000 to 94.999
- 7 95.000 to 99.999
- 8 100.000 to 109.999
- 9 110.000 to 119.999
- 10 120.000 to 129.999
- 11 130.000 to 139.999
- 12 140.000 or More

in Denmark (DK):

Danish kroner PER YEAR

- 1 Less Than 70000
- 2 70.000 to 99.999
- 3 100.000 to 129.999
- 4 130.000 to 169.999
- 5 170.000 to 199.999
- 6 200.000 to 239.999
- 7 240.000 to 269.999
- 8 270.000 to 299.999
- 9 300.000 to 349.999
- 10 350.000 to 399.999
- 11 400.000 to 449.999
- 12 450.000 or More

in Ireland (IE):

Irish pounds per month

- 1 Less Than 240
- 2 240 to 319
- 3 320 to 399
- 4 400 to 479
- 5 480 to 599
- 6 600 to 729
- 7 730 to 829
- 8 830 to 999
- 9 1.000 to 1.149

- 10 1.150 to 1.664
- 11 1.665 to 2.000
- 12 2.001 And Over

in Greece (GR):

Greek drachmas per month

- 1 Less Than 40.000
- 2 40.001 to 60.000
- 3 60.001 to 80.000
- 4 80.001 to 100.000
- 5 100.001 to 120.000
- 6 120.001 to 140.000
- 7 140.001 to 160.000
- 8 160.001 to 180.000
- 9 180.001 to 200.000
- 10 200.001 to 240.000
- 11 240.001 to 280.000
- 12 280.001 or More

in Spain (ES):

Spanish pesetas per month

- 1 Less Than 50.000
- 2 50.001 to 60.000
- 3 60.001 to 70.000
- 4 70.001 to 80.000
- 5 80.001 to 90.000
- 6 90.001 to 100.000
- 7 100.001 to 125.000
- 8 125.001 to 150.000
- 9 150.001 to 175.000
- 10 175.001 to 200.000
- 11 200.001 to 225.000
- 12 225.001 or More

in Portugal (PT):

Portuguese escudos per month

- 1 Less Than 30.000
- 2 30.000 to 39.999
- 3 40.000 to 49.999
- 4 50.000 to 59.999
- 5 60.000 to 69.999

- 6 70.000 to 79.999
- 7 80.000 to 99.999
- 8 100.000 to 109.999
- 9 110.000 to 129.999
- 10 130.000 to 149.999
- 11 150.000 to 169.999
- 12 170.000 or More

in Germany - East (DE\_E):

German marks per month

- 1 Less Than 750
- 2 751 to 1.000
- 3 1.001 to 1.250
- 4 1.251 to 1.500
- 5 1.501 to 1.750
- 6 1.751 to 2.000
- 7 2.001 to 2.250
- 8 2.251 to 2.500
- 9 2.501 to 2.750
- 10 2.751 to 3.000
- 11 3.001 to 3.250
- 12 3.251 and More

in Norway (NO):

Norwegian kroner per year

- 1 Less than 70.000
- 2 70.000 to 99.999
- 3 100.000 to 129.999
- 4 130.000 to 169.999
- 5 170.000 to 199.999
- 6 200.000 to 239.999
- 7 240.000 to 269.999
- 8 270.000 to 299.999
- 9 300.000 to 349.999
- 10 350.000 to 399.999
- 11 400.000 to 449.999
- 12 450.000 and more

in Finland (FI):

Finnish marks per month

- 1 Less than 60.000
- 2 60.001 -- 90.000
- 3 90.001 -- 120.000
- 4 120.001 -- 150.000
- 5 150.001 -- 180.000
- 6 180.001 -- 210.000
- 7 210.001 -- 240.000

- 8 240.001 -- 270.000
- 9 270.001 -- 300.000
- 10 300.001 and More
- 11 27.501 to 30.000
- 12 30.001 or more

in Sweden (SE):

Swedish kronor per month

- 1 Less than 5.000
- 2 5.001 to 7.500
- 3 7.501 to 10.000
- 4 10.001 to 12.500
- 5 12.501 to 15.000
- 6 15.001 to 17.500
- 7 17.501 to 20.000
- 8 20.001 to 22.500
- 9 22.501 to 25.000
- 10 25.001 to 27.500
- 11 27.501 to 30.000
- 12 30.001 or more

in Austria (AT):

Austrian schilling per month

- 1 Less than 6.000
- 2 6.001 to 8.000
- 3 8.001 to 10.000
- 4 10.001 to 12.000
- 5 12.001 to 14.000
- 6 14.001 to 16.000
- 7 16.001 to 20.000
- 8 20.001 to 25.000
- 9 25.001 to 30.000
- 10 30.001 to 35.000
- 11 35.001 to 40.000
- 12 40.001 or more

## v206 - D29 INCOME HH - QUARTILES

D.29\_2 (Household income - approximate quartiles)

- 1 - - (Lowest income quartile)
- 2 - (Next to lowest income quartile)
- 3 + (Next to highest income quartile)
- 4 ++ (Highest income quartile)
- 5 DK/REFUSAL

Derivation:

This variable collapses answers to D.29 into four groups representing approximate quartiles.

Note:

See D.29 for complete questiontext

v209 - P6 SIZE OF COMMUNITY

P.6 (Objective ) Size of locality

in France (FR):

- 1 Less than 2.000
- 2 2.000 - less than 20.000
- 3 20.000 - less than 100.000
- 4 100.000 and more inhabitants
- 5 Paris

in Belgium (BE):

- 1 Grand centre
- 2 Localite urbaine
- 3 Localite secondaire
- 4 Autre localite

in Netherlands (NL):

- 1 Less than 5.000
- 2 5.000 - less than 10.000
- 3 10.000 - less than 20.000
- 4 20.000 - less than 50.000
- 5 50.000 - less than 100.000
- 6 100.000 - less than 400.000
- 7 400.000 and more inhabitants

in Germany - West (DE\_W):

- 1 Less than 2.000
- 2 2.000 - less than 5.000
- 3 5.000 - less than 20.000
- 4 20.000 - less than 50.000
- 5 50.000 - less than 100.000
- 6 100.000 - less than 500.000
- 7 500.000 and more inhabitants

in Italy (IT):

- 1 Less than 10.000
- 2 10.000 - less than 100.000
- 3 100.000 - less than 250.000
- 4 250.000 and more inhabitants

in Luxembourg (LU):

- 1 Less than 2.500
- 2 2.500 - less than 5.000
- 3 5.000 - less than 10.000

- 4 10.000 - less than 20.000
- 5 20.000 - less than 50.000
- 6 50.000 and more inhabitants (Luxembourg ville)

in Denmark (DK):

- 1 Less than 2.000
- 2 2.000 - less than 5.000
- 3 5.000 - less than 10.000
- 4 10.000 - less than 20.000
- 5 20.000 - less than 50.000
- 6 50.000 - less than 100.000
- 7 100.000 and more inhabitants

in Ireland (IE):

- 1 Less than 2.000
- 2 2.000 - less than 20.000
- 3 20.000 - less than 100.000
- 4 100.000 and more inhabitants

in Great Britain (GB\_GBN):

- 1 Metropolitan
- 2 Other 100 % urban
- 3 Mixed urban/rural
- 4 Rural

in Northern Ireland (GB\_NIR):

- 1 Less than 2.000
- 2 2.000 - less than 20.000
- 3 20.000 - less than 100.000
- 4 100.000 and more inhabitants

in Greece (GR):

- 1 Less than 2.000
- 2 2.000 - less than 10.000
- 3 10.000 - less than 50.000
- 4 50.000 - less than 1.000.000
- 5 1.000.000 and more inhabitants

in Spain (ES):

- 1 Less than 2.000
- 2 2.000 - less than 10.000
- 3 10.000 - less than 50.000
- 4 50.000 - less than 100.000
- 5 100.000 - less than 300.000
- 6 300.000 - less than 500.000
- 7 500.000 - less than 1.000.000
- 8 1.000.000 and more inhabitants

in Portugal (PT):

- 1 Less than 100
- 2 100 - less than 200
- 3 200 - less than 500
- 4 500 - less than 1.000
- 5 1.000 - less than 2.000
- 6 2.000 - less than 5.000
- 7 5.000 - less than 10.000
- 8 10.000 - less than 30.000
- 9 30.000 - less than 100.000
- 10 100.000 - less than 500.000
- 11 500.000 and more inhabitants

in Germany - East (DE\_E):

- 1 Less than 2.000
- 2 2.000 - less than 5.000
- 3 5.000 - less than 20.000
- 4 20.000 - less than 50.000
- 5 50.000 - less than 100.000
- 6 100.000 - less than 500.000
- 7 500.000 and more inhabitants

in Norway (NO):

- 1 Oslo
- 2 Bergen, Trondheim and other cities
- 3 Densely populated
- 4 Scattered populated

in Finland (FI):

- 1 Helsinki area
- 2 Turku, Tampere
- 3 Other town
- 4 Rural center

in Sweden (SE):

- 1 Stockholm and suburbs
- 2 Goteborg, Malmo and suburbs
- 3 Urban
- 4 Rural

in Austria (AT):

- 1 Rural
- 2 Mixed urban/rural
- 3 Urban
- 4 Metropolitan

v210 - P7 REGION I

P.7 Region I

in France (FR):

France (EUROSTAT NUTS II LEVEL) / (Regions)

- 1 Ile de France
- 2 Champagne-Ardenne
- 3 Picardie
- 4 Haute-Normandie
- 5 Centre
- 6 Basse-Normandie
- 7 Bourgogne
- 8 Nord Pas de Calais
- 9 Lorraine
- 10 Alsace
- 11 Franche-Comte
- 12 Pays de la Loire
- 13 Bretagne
- 14 Poitou-Charentes
- 15 Aquitaine
- 16 Midi-Pyrenees
- 17 Limousin
- 18 Rhone-Alpes
- 19 Auvergne
- 20 Languedoc-Roussillon
- 21 Provence-Alpes-Cote d'Azur

in Belgium (BE):

Belgium (EUROSTAT NUTS II LEVEL - modified) / (Provinces)

- 1 Hainaut
- 2 Limburg
- 3 Namur
- 4 Oost-Vlaanderen
- 5 West-Vlaanderen
- 6 Liege
- 7 Luxembourg
- 8 Brabant flamand
- 9 Antwerpen
- 10 Bruxelles
- 11 Brabant wallon

in Netherlands (NL):

Netherland (EUROSTAT NUTS II LEVEL) / (Provinces)

- 1 Groningen
- 2 Friesland
- 3 Drenthe
- 4 Overijssel
- 5 Gelderland
- 6 Flevoland
- 7 Utrecht
- 8 Noord-Holland
- 9 Zuid-Holland
- 10 Zeeland
- 11 Noord Brabant
- 12 Limburg

in Germany - West (DE\_W):

Germany West (EUROSTAT NUTS II LEVEL) / (Regierungsbezirke)

- 10 Schleswig-Holstein
- 20 Hamburg
- 31 Braunschweig
- 32 Hannover
- 33 Lüneburg
- 34 Weser-Ems
- 40 Bremen
- 51 Düsseldorf
- 53 Köln
- 55 Münster
- 57 Detmold
- 59 Arnsberg
- 64 Darmstadt
- 65 Giessen
- 66 Kassel
- 71 Koblenz
- 72 Trier
- 73 Rheinhessen-Pfalz
- 81 Nord Württemberg=Stuttgart
- 82 Nordbaden=Karlsruhe
- 83 Südbaden=Freiburg
- 84 Süd Württemberg=Tübingen
- 91 Oberbayern
- 92 Niederbayern
- 93 Oberpfalz
- 94 Oberfranken
- 95 Mittelfranken
- 96 Unterfranken
- 97 Schwaben
- 100 Saarland
- 110 Berlin (West)

in Italy (IT):

Italy (EUROSTAT NUTS II LEVEL - modified) / (Regioni)

- 1 Valle d'Aosta e Piemonte
- 2 Liguria
- 3 Lombardia
- 4 Milano
- 5 Trentino
- 6 Veneto
- 7 Friuli-Venezia Giulia
- 8 Emilia-Romagna
- 9 Toscana
- 10 Marche
- 11 Umbria
- 12 Lazio
- 13 Molise e Abruzzi
- 14 Campania
- 15 Puglia
- 16 Basilicata
- 17 Calabria
- 18 Sicilia
- 19 Sardegna

in Luxembourg (LU):

- 1 Centre
- 2 South
- 3 North
- 4 East

in Denmark (DK):

- 1 Hovedstodomradet (Kobenhavens area)
- 2 Sjaellands, Lolland-Falster, Bornholms (excl. hovedstodomradet)
- 3 Fyns
- 4 Jyllands

in Ireland (IE):

Ireland (EUROSTAT NUTS III LEVEL) / (Planning Regions)

- 1 Donegal
- 2 North west (Sligo/Leitrim)
- 3 North east (Cavan/Monaghan/Louth)
- 4 West (Mayo/Galway)
- 5 Midlands (Westmeath/Roscommon/Longford/Laois/Offaly)
- 6 East (Dublin/Meath/Kildare/Wicklow)
- 7 Mid west (Limerick/Clare/Tipperary North Riding)
- 8 South east (Waterford/Wexford/Carlow/Kilkenny/Tipperary South Riding)
- 9 South west (Kerry/Cork)

in United Kingdom (GB):

United Kingdom (EUROSTAT NUTS II LEVEL) / (Groups of Counties)

- 1 Cleveland, Durham
- 2 Cumbria
- 3 Northumberland, Tyne and Wear
- 4 Humberside
- 5 North Yorkshire
- 6 South Yorkshire
- 7 West Yorkshire
- 8 Derbyshire, Nottinghamshire
- 9 Leicestershire, Northamptonshire
- 10 Lincolnshire
- 11 East Anglia
- 12 Bedfordshire, Hertfordshire
- 13 Berkshire, Buckinghamshire, Oxfordshire
- 14 Surrey, East-West Sussex
- 15 Essex
- 16 Greater London
- 17 Hampshire, Isle of Wight
- 18 Kent
- 19 Avon, Gloucestershire, Wiltshire
- 20 Cornwall, Devon
- 21 Dorset, Somerset
- 22 Hereford and Worcester, Warwickshire
- 23 Shropshire, Staffordshire
- 24 West Midlands (County)
- 25 Cheshire
- 26 Greater Manchester
- 27 Lancashire
- 28 Merseyside
- 29 Clwyd, Dyfed, Gwynedd, Powys
- 30 Gwent, Mid-South-West Glamorgan
- 31 Borders, Central, Fife, Lothian, Tayside
- 32 Dumfriesshire and Galloway, Strathclyde
- 33 Highlands, Islands
- 34 Grampian
- 35 Northern Ireland

in Greece (GR):

Greece (EUROSTAT NUTS II LEVEL - modified) / (Development Regions)

- 1 Kentriki Makedonia kai Dytiki Makedonia
- 2 Thessalia
- 3 Anatoliki Makedonia
- 4 Thraki
- 5 Anatoliki Sterea kai Nisia
- 6 Peloponnisos kai Dytiki Sterea
- 7 Ipeiros
- 8 Kriti

9 Nisia Anatolikou Aigaiou

in Spain (ES):

Spain (EUROSTAT NUTS II LEVEL) / (Comunidades Autonomas)

- 1 Andalucia
- 2 Aragon
- 3 Asturias
- 4 Baleares
- 5 Canarias
- 6 Cantabria
- 7 Castilla-Leon
- 8 Castilla-La Mancha
- 9 Cataluna
- 10 Extremadura
- 11 Galicia
- 12 Madrid
- 13 Murcia
- 14 Navarra
- 15 La Rioja
- 16 Comunidad Valenciana
- 17 Pais Vasco

in Portugal (PT):

Portugal (EUROSTAT NUTS II LEVEL) / (Comissaoes de Coordinacao Regional, Regioes Autonomas)

- 1 Norte
- 2 Centro
- 3 Lisboa e Vale do Tejo
- 4 Alentejo
- 5 Algarve
- 6 Acores
- 7 Madeira

in Germany - East (DE\_E):

Germany - East (Ex-GDR administrative regional units)

- 1 Rostock
- 2 Schwerin
- 3 Neubrandenburg
- 4 Potsdam
- 5 Frankfurt
- 6 Cottbus
- 7 Magdeburg
- 8 Halle
- 9 Erfurt
- 10 Gera
- 11 Suhl
- 12 Dresden
- 13 Leipzig

14 Chemnitz (Karl-Marx-Stadt)

15 Berlin (Ost)

in Finland (FI):

1 Uusimaa

2 Varsinais-Suomi

3 Satakunta

4 Häme

5 Pirkanmaa

6 Päijät-Häme

7 Kymenlaakso

8 Etelä-Karjala

9 Etelä-Savo

10 Pohjois-Savo

11 Pohjois-Karjala

12 Keski-Suomi

13 Etelä-Pohjanmaa

14 Vaasan rannikkoseutu

15 Keski-Pohjanmaa

16 Pohjois-Pohjanmaa

17 Kainuu

18 Lappi

in Sweden (SE):

Sweden (Län)

1 Stockholm

3 Uppsala

4 Södermanland

5 Östergötland

6 Jönköping

7 Kronoberg

8 Kalmar

9 Gotland

10 Blekinge

11 Kristianstad

12 Malmöhus

13 Halland

14 Göteborg and Bohus

15 Älvsborg

16 Skaraborg

17 Värmland

18 Örebro

19 Västmanland

20 Kopparberg

21 Gävleborg

22 Västernorrland

23 Jämtland

24 Vasterbotten

25 Norrbotten

in Austria (AT):

1 Vorarlberg

2 Tirol

3 Salzburg

4 Upper Austria

5 Styria

6 Carinthia

7 Lower Austria

8 Burgenland

9 Vienna

Note:

In the cases of France, West Germany, Italy, Ireland and the United Kingdom "Region I" corresponds to the variable "Province" in earlier Eurobarometers up to number 31. If indicated, "Region I" units are consistent with the EUROSTAT nomenclature for the regional statistics (NUTS).

v211 - P7 REGION II

P.7\_2 Region II

0 Inap., not stated in Luxembourg, Denmark, Great Britain, Northern Ireland, Greece, Portugal, Finland, Sweden, and Austria

in France (FR):

France (EUROSTAT NUTS I LEVEL)

- 1 Ile de France
- 2 Bassin Parisien
- 3 Nord-pas-de-Calais
- 4 Est
- 5 Ouest
- 6 Sud-Ouest
- 7 Centre-Est
- 8 Mediterranee

in Belgium (BE):

Belgium (EUROSTAT NUTS I LEVEL) / (Regions)

- 1 Region Wallonne
- 2 Bruxelles-Brussel
- 3 Vlaanderen

in Netherlands (NL):

Netherlands (EUROSTAT NUTS I LEVEL) / (Landsdelen)

- 1 Noord-Nederland
- 2 Oost-Nederland
- 3 West-Nederland
- 4 Zuid-Nederland

in Germany - West (DE\_W):

Germany West (EUROSTAT NUTS I LEVEL) / (Bundesländer)

- 1 Schleswig Holstein
- 2 Hamburg
- 3 Niedersachsen
- 4 Bremen
- 5 Nordrhein-Westfalen
- 6 Hessen
- 7 Rheinland-Pfalz
- 8 Baden-Wuerttemberg
- 9 Bayern
- 10 Saarland
- 11 Berlin (West)

in Italy (IT):

Italy (EUROSTAT NUTS I LEVEL) / (Gruppi di regioni)

- 1 Nord Ovest
- 2 Lombardia
- 3 Nord Est
- 4 Emilia-Romagna
- 5 Centro
- 6 Lazio
- 7 Abruzzi-Molise
- 8 Campania
- 9 Sud
- 10 Sicilia
- 11 Sardegna

in Ireland (IE):

- 1 Dublin
- 2 Rest of Leinster
- 3 Munster
- 4 Connaught/Ulster

in Spain (ES):

Spain (Agrupacion de comunidades autonomas)

- 1 Galicia
- 2 North
- 3 North-East
- 4 Aragon, Rioja
- 5 Madrid
- 6 Centre
- 7 Cataluna
- 8 East
- 9 South
- 10 Canarias

in Germany - East (DE\_E):

Germany - East (EUROSTAT NUTS I LEVEL)

- 11 Berlin (Ost)
- 12 Brandenburg
- 13 Mecklenburg-Vorpommern
- 14 Sachsen
- 15 Sachsen-Anhalt
- 16 Thüringen

Note:

Only in the case of West Germany "Region II" corresponds to the variable "Region" in earlier Eurobarometers up to 31. If indicated "Region II" units are consistent with the EUROSTAT nomenclature for regional statistics (NUTS).

The East German federal units ("Neue Bundesländer") are constructed from the ex-GDR administrative regional units which only give a rough idea of their real outline.

Starting with Eurobarometer 34 and up to survey 61, NUTS 1 level data (REGION II) for the NETHERLANDS are not (re-)coded in accordance with the official EUROSTAT nomenclature of territorial unit statistics. The NUTS 2 level province ZEELAND should be coded as belonging to NUTS 1 region (landsdel) WEST instead of SOUTH Netherlands. Archive releases have been corrected from EB 51 onwards.

v213 - C1 OPINION LEADERSHIP INDEX

C.1 OPINION LEADERSHIP INDEX

Cognitive Mobilization Index 1

- 1 - - low
- 2 -
- 3 +
- 4 ++ high

Derivation:

This index is based on the answers to the following two questions: "When you get together with friends, would you say you discuss political matters frequently, occasionally or never? (Q.2) and "When you hold a strong opinion, do you ever find yourself persuading your friends, relatives or fellow workers to share your views? (Q.3). Interviewees giving affirmative answers to both questions are labelled ++. Interviewees giving negative answers to both questions are labelled - -. Middle categories (+ and -) are constituted correspondingly.

This variable forms an indicator of the individual's potential to take an active role in the political process. For a complete discussion of this variable and its correlates see Ronald Inglehart, *The Silent Revolution: Changing values and Political Styles among Western Publics* (Princeton University Press, 1977).

v214 - C3 EC SUPPORT TYPOLOGY - EUROP ATTITUDES

C.3 TYPOLOGY OF EUROPEAN ATTITUDES

- 1 Positive
- 2 Ambivalent
- 3 Negative

Derivation:

The Typology of European Attitudes is based upon answers to the following questions: "In general, are you for or against efforts being made to unify Western Europe? Are you for, very much; for, to some extent; against, to some extent; against, very much? (Q.5 = UNIFICATION) and "Generally speaking, do you think that (your country's) membership of the European Union is: a good thing, a bad thing, or neither good nor bad?" (Q.17 = MEMBERSHIP). Positive attitudes: MEMBERSHIP "good" and UNIFICATION: "for ...".

Ambivalent attitudes:

MEMBERSHIP "neither good nor bad" or MEMBERSHIP "good" and UNIFICATION: "against ..." or MEMBERSHIP "bad" and UNIFICATION "for ..." or DK/NA. Negative attitudes:

MEMBERSHIP "bad" and UNIFICATION: "against ...".

## v215 - C14 OCCUPATION OF RESPONDENT - SCALE

## C.14 Respondent Occupation Scale

- 0 Other answers
- 1 Self employed
- 2 Managers
- 3 Other white collars
- 4 Manual workers
- 5 House persons
- 6 Unemployed

## Derivation:

This scale is based on a combination / selection of the current respondent occupation variable
