Acknowledgements

Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences.

Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (<http://zacat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

1.2 Content

1.2.1 Abstract

This round of Eurobarometer surveys queried respondents on standard Eurobarometer measures such as public awareness of and attitudes toward the European Union (EU), and also focused on the European Year of Education and Training Throughout Life, the common European currency, Third World development, food product quality labels, the 1996 InterGovernmental Conference, and the European Parliament.

Questions concerning education and training throughout life were asked only of respondents 15–24 years old and covered topics such as reasons for learning throughout life, the likelihood that continuing training throughout life would improve the respondent's work and personal life, participation in a training course in the last year, the main role of schools, and satisfaction with the way schools help develop children's personalities, broaden their abilities, and teach children to live in society and adapt to changes. Also covered were the most important qualities for a person to have and the importance of the parent, school, and working environment in developing those qualities. Parents' level of involvement in education was also explored, with questions on choosing children's schools, following their school work, talking to teachers, and helping children if they have difficulties. Respondents were also queried on the role businesses should play in schools and vocational training, the role of the EU in continuing education, and the influence of technology and new communication techniques on education and instruction.

Questions on the common European currency included respondents' preference for or against having one currency in all EU member states, how well-informed respondents were about the common European currency, their knowledge of the conditions member countries must meet to join the European Economic and Monetary Union, and their opinions on when European currency would be introduced. Opinions were also elicited on the effects of the European currency on economic growth, jobs, shopping, currency exchange, cross-border travel, the costs of doing business between Monetary Union member states, the degree of turmoil and volatility in international currency markets, inflation, and the disparity between the rich and the poor. In addition, respondents were queried about Third World development, including what the important development problems were and whether decisions about those problems should be made by member countries of the EU acting together or by each country separately, information sources about Third World countries and the main topics covered by those sources, attitudes toward helping Third World countries, what the principal aim should be in relations with Third World countries, whether industrialized countries were currently helping Third World countries to become less poor, to lead the Third World to economic independence, or to enable them to solve their own problems, who provided the most help to Third World countries (the EU, international organizations, the United Nations, private companies, or non-governmental agencies), what conditions should be met before help is given, and whether the major part of the EU's assistance to the Third World was devoted to emergency humanitarian action or to longer-term development. Questions concerning quality labels for food products included how often the household bought various categories of food products, the three most important things people take into account when buying food products, awareness of and trust in quality labels on food products, awareness of and purchase frequency for food products with a 'Designation of Origin' label and what the label

means, willingness to pay more for food products of guaranteed origin, consumption frequency for food products made or produced in the traditional way, and confidence level if a food product were guaranteed by the EU as to origin and traditional method of production. Regarding the 1996 InterGovernmental Conference, respondents were queried on their awareness of the conference and which fundamental objectives the EU should set within the scope of that conference. Further questions probed for respondents' opinions on the degree of influence that big and powerful member states in the EU had, whether trade unions, political parties, professional organizations, newspapers, radio stations, and TV stations represented respondents' views about Europe and the EU, how soon the countries of Central and Eastern Europe such as the Czech Republic, Hungary, Poland, and Slovakia should become members of the EU, and why they should become members. Other conference topics included the preferred effect of granting EU membership to Central and Eastern European countries on aid to farmers, how much weight should go to each vote in the EU Council of Ministers, which rights were most important for citizens of the EU, which aims should be given priority in the EU over the next ten years, the role of the EU in avoiding war between member states, what the level of cuts in Social Security benefits should be, Europe's competitiveness in world markets, how helpful all member states were in working together to fight unemployment and create jobs, the relative influence of the opinions of people like the respondent on the decisions made by their national government versus those made by the institutions of the EU, and the respondent's length of stay in other countries of the EU. Topics relating to the European Parliament (EP) included the extent that its decisions were in the interest of people like the respondent, the EP's importance in the life of the EU, and areas of policy the EP should pay particular attention to. Demographic items include age, gender, marital status, size of household, education, occupation, and household income.

Note: Questions on attitudes towards the Single European Currency (Q.3 and Q.9 to Q.21) are repeated from Eurobarometer 44.0 and should always be analysed in combination. Questions on education and training throughout life and children's education at school (Q.92 TO Q.118) are also repeated from Eurobarometer 44.0, but are only asked to respondents aged 15–24 years. Meaningful results are obtained for the total population on the 44.0 data; for the target group of young people one should combine the 44.1 youth subsample with the corresponding 44.0 data.

1.2.2 Topic classification

- International Institutions, Relations
- Patterns of Consumption
- Education, School Systems

1.3 Universe

In all, Eurobarometer 44.1 interviewed 17.298 citizens of the 15 countries in the European Union (nationals and non-nationals but EU-citizens). Respondents were aged 15 and over. Separate samples were drawn for Northern Ireland and East Germany. In addition, 952 Norwegian citizens aged 15 and over were interviewed with a subset of questions.

1.4 Sampling procedure

A multi-stage sampling design was used for this Euro- barometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regions in every country (i.e., Statistical Office of the European Community, EUROSTAT regions). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of addresses was selected from each sampled PSU. Addresses were chosen systematically using standard random route procedures, beginning with an initial address selected at random. In each household, a respondent was selected, by a random procedure. Up to three recalls were made to obtain an interview with the selected respondent. No more than one interview was conducted in each household. Interviews were conducted face-to-face in respondents' homes in the appropriate national language. Sweden is using a random sample bought at the government census bureau. The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

From November 11 to December 30, 1995, International Research Associates of Europe, INRA (Europe), carried out the fieldwork for this Eurobarometer, at the request of the 'Survey, Research, Analysis' Unit of the Directorate General X, 'Information, Communication and Culture', of the European Commission. INRA (Europe) is a European network of market and public opinion research agencies, co-ordinated by the European Co-ordination Office (ECO), Avenue R.Vandendriessche 18, B-1150 Brussels.

1.6 Mode of data collection

In all member states, fieldwork was conducted on the basis of detailed and uniform instructions prepared by the ECO.

INRA (Europe) developed equivalent French and English questionnaires for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country.

1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factor corrects for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country as well as each lower level sample (Great Britain and Northern Ireland, East and West Germany) are represented in proportion to its population size within different groupings, or according to the historical states of European unification (e.g. founder members, new members, Euro zone) in the case of the EUROPEAN WEIGHTS, or for the United Kingdom (WEIGHT SPECIAL UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31A) and for Germany as a whole (WEIGHT SPECIAL GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general all samples which do not belong to the respective group of samples under consideration are excluded from calculation.

The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 3) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

Eurobarometer 44.1 provides four (post-stratification) NATION WEIGHTS: NATION WEIGHT IIa (WEIGHT RESULT FROM TARGET) and NATION WEIGHT IIb (WEIGHT ADJUSTED TO STANDARD SIZE) for separate analysis or comparison of individual samples (countries or regions on sub-national level), NATION WEIGHT I (WEIGHT SPECIAL UNITED KINGDOM adjusted to standard size) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole and NATION WEIGHT III (WEIGHT SPECIAL GERMANY adjusted to standard size), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. All other samples (nations) are included, likewise all post-stratification factors.

The different EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries representing different historical states of European integration (e.g. EURO6 = six founder members). All post-stratification factors are included.

For more detailed information on the individual weights please see the corresponding variable description.

1.8 Data preparation

The data received by ZA from INRA (EUROPE) were checked for missing and duplicate records, for illegal (wild) codes and for consistency of response patterns. Errors discovered by these procedures were corrected or noted in this codebook. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable documentation was also created for this dataset by ZA.

To facilitate analyses of the data, ZA created new variables which consolidate information dispersed over two or more variables in the original INRA dataset. Five variables containing condensed information were created by ZA for this Eurobarometer: NATION I, NATION III and REGION II. Users should be aware that ZA's process of condensing information sometimes produces coding schemes that differ from those in earlier Eurobarometers.

ZA also added "Inappropriate" (Inap.) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the INRA questionnaire was adhered to for (almost) every respondent.

Users should note that INRA has occasionally represented answers to a question by a series of binary "dummy" variables (i.e. variables which take on values of one and zero only) creating separate "dummy" variables to explicitly represent "Don't know", "No answer" or other residual responses, such as "None of the above". ZA has recoded these residual responses in the case of inconsistencies with respect to the series of principal answers.

ZA has recoded the missing answers (NA) represented in the INRA data set by blanks.

Question text and contingency text appearing in this codebook and ZA's machine-readable documentation is taken from INRA's English language version of the basic bilingual questionnaire. Coding schemes and other

documentation are based on INRA's English language version of the basic bilingual questionnaire, INRA's codebook (in English) and INRA's SPSS setup for its dataset as received by ZA. Whenever a discrepancy occurs between INRA's codebook, questionnaires, SPSS setup and dataset with respect to the coding scheme of a variable, ZA has carried out any correction in agreement with INRA.

If the documentation for country-specific questions or coding is provided by INRA in other languages than English, ZA documents the original language wording and supplies the English translation in brackets.

The data file for this Eurobarometer is available from ZA with a single logical record of 1173 columns per respondent. The machine-readable (or hard-copy) codebook and SPSS control cards have also been prepared by ZA. These control cards contain formatting information as well as variable and value labels for all the variables in the collection and document cards for country-specific labelling.

2 Eurobarometer Series Description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 3: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.2OVR, 55.1OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.2OVR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 3).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 4) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 4: Overview of Eurobarometer surveys with standard EU and trend question modules

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

3 Dataset structure and standards

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 5: ZEUS Party Family Code (slightly modified)

Category		Party Family
0	(001-099)	not affiliated / electoral alliances across "families"
1	(100-199)	Communists
2	(200-299)	Socialists
3	(300-399)	Liberals
4	(400-499)	Christian Democrats
5	(500-599)	Conservatives
6	(600-699)	Extreme Rights / Nationalists
7	(700-799)	Regionalists / Ethnic
8	(800-899)	Environmental parties
9	(900-949)	Agricultural parties
9	(950-989)	other special issue parties (e.g. Eurosceptics) and independents
	990	other (spontaneous)
	994	not voting age
	995	empty ballot (blank) or invalid vote
	996	not voted / would not vote
	997	Refused
	998	DK / DK+NA if NA not coded separately
	999	INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION – ALL SAMPLES ISO 3166).

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (–1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded “real” values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission’s official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

Header with DIGITAL OBJECT IDENTIFIER (DOI) linked to the Study Description in the GESIS Data Catalogue.	Eurobarometer 67.1 - February-March 2007 GESIS Study No. 4529 (v3.0.1, http://dx.doi.org/doi:10.4232/1.10983)																																																																																																																																																																																																																																																																																																																																																				
VARIABLE NAME (serial number assigned by the archive) and VARIABLE LABEL as defined in the dataset.	v77 - QA1 FEELING FULFILLED: PROFESSIONAL LIFE Q.A1 ASK Q.A IN EU27 To what extent would you say that the life you live allows you to feel fulfilled in...? Note: Last trend: EB ... , Q. ...																																																																																																																																																																																																																																																																																																																																																				
QUESTION NUMBER and full QUESTION TEXT from the basic questionnaire, including interviewer instructions. The numbers or letters that may appear together with the original question number, reflect the item order (multiple item or multiple response questions) or indicate if a question was recoded (R) or summarized (T), or if asked only in a single country (country abbreviation).																																																																																																																																																																																																																																																																																																																																																					
CODE VALUES occurring in the data for this variable and complete ANSWER TEXT from the basic questionnaire. Code values may differ from the questionnaire specification due to standardization. Abbreviations commonly used in the code definitions are DK (don't know), NA (not ascertained) and INAP (inappropriate).																																																																																																																																																																																																																																																																																																																																																					
DERIVATION information refers to the construction principle of indices or other derived variables (not in the example). NOTE delineates additional explanatory text subsuming trend information (last appearance of the question) or archive remarks on data processing and other issues relevant for the understanding or application of the variable.																																																																																																																																																																																																																																																																																																																																																					
CROSS-TABULATION: The absolute frequencies of the occurrence of values (<i>absolute values</i>) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies (<i>row percent</i>) refer to the valid cases (<i>n valid sum</i>), i.e. the total number of cases (<i>n sum</i>) reduced by the number of cases defined as missing data (<i>M</i>). For display and place saving reasons excluded countries or areas may be completely dropped from the table.																																																																																																																																																																																																																																																																																																																																																					
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (<i>M</i>), i.e. <i>percent</i> on the basis of all cases (<i>sum</i>) and <i>valid percent</i> on the basis of the <i>valid cases</i> .

5 Variable Documentation

Variable	Label
	Question Text (English Language)

v1	STUDY NUMBER
	Archive Study Number
	Respective study number of the involved archive.

v1

Value	Label	Missing	Count	Percent	Valid Percent
2690			17298	100.0	100.0
	Sum		17298	100.0	100.0
	Valid Cases		17298		

v2 EDITION NUMBER

Edition Number

The number identifying the release edition of this dataset.

- 1 Early release version
- 2 1st codebook edition

Note:

Please see variable VERSION ("GESIS ARCHIVE VERSION") for further information on the version number of this data set and the corresponding release date.

v2

Value	Label	Missing	Count	Percent	Valid Percent
2	1ST CODEBOOK EDITION - release April 16, 2007		17298	100.0	100.0
	Sum		17298	100.0	100.0
	Valid Cases		17298		

version	GESIS ARCHIVE VERSION
	VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

On occasion of the implementation of this versioning scheme (2010-04-13), the default version number 1.0.0 has been created automatically for this Eurobarometer.

Version 1.0.1 adds the crosstabulation variable ISOCNTRY and the VERSION variable to the otherwise unchanged data set.

Former version or edition identification variables are maintained unchanged as a reference to former releases.

version					
Value	Label	Missing	Count	Percent	Valid Percent
1.0.1 (2012-07-01)			17298	100.0	100.0
	Sum		17298	100.0	100.0
	Valid Cases		17298		

v3	PART NUMBER
	Part Number
	The number identifying this part of a 1-part study.
	1 EUROBAROMETER 44.1

v3

Value	Label	Missing	Count	Percent	Valid Percent
1			17298	100.0	100.0
	Sum		17298	100.0	100.0
	Valid Cases		17298		

v4	ID SERIAL NUMBER
	Sequential respondent identification number assigned by ZA
	A unique serial number is assigned to each respondent.

isocntry NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)
 NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

v5	NATION I (UNITED KINGDOM)
	Nation of interview I

Fifteen EC countries including separate samples for East and West Germany and with the addition of Norway

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 United Kingdom
- 10 Greece
- 11 Spain
- 12 Portugal
- 13 Germany - east
- 14 Norway
- 15 Finland
- 16 Sweden
- 17 Austria

v5

Value	Label	Missing	Count	Percent	Valid Percent
1	France		1000	5.8	5.8
2	Belgium		1013	5.9	5.9
3	Netherlands		1020	5.9	5.9

Value	Label	Missing	Count	Percent	Valid Percent
	Valid Cases		17298		

v6

WEIGHT SPECIAL UNITED KINGDOM

Nation Weight I (WEIGHT SPECIAL UNITED KINGDOM)

This variable adjusts the British and Northern Irish samples to their respective proportions in the United Kingdom. All EC nation weights are included. Norway is weighted by "zero".

Unlike the "Nation Weight I" in earlier Eurobarometers up to 31 this weight adjusts all samples to the standard size.

v7 NATION II (GB AND NORTHERN IRELAND)

Nation of interview II

The two samples for the United Kingdom - Great Britain and Northern Ireland - are coded separately.

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany - west
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 Germany - east
- 15 Norway
- 16 Finland
- 17 Sweden
- 18 Austria

v7

Value	Label	Missing	Count	Percent	Valid Percent
1	France		1000	5.8	5.8
2	Belgium		1013	5.9	5.9
3	Netherlands		1020	5.9	5.9
4	Germany West		1095	6.3	6.3
5	Italy		1028	5.9	5.9
6	Luxembourg		770	4.5	4.5
7	Denmark		1000	5.8	5.8
8	Ireland		1000	5.8	5.8
9	Great Britain		1070	6.2	6.2
10	Northern Ireland		311	1.8	1.8
11	Greece		1008	5.8	5.8
12	Spain		1000	5.8	5.8
13	Portugal		936	5.4	5.4
14	Germany East		1019	5.9	5.9
15	Norway		952	5.5	5.5
16	Finland		1050	6.1	6.1
17	Sweden		990	5.7	5.7
18	Austria		1036	6.0	6.0

Value	Label	Missing	Count	Percent	Valid Percent
	Sum		17298	100.0	100.0
	Valid Cases		17298		

v8	WEIGHT RESULT FROM TARGET
	Nation Weight IIa (WEIGHT RESULT FROM TARGET)

This variable contains weights that adjust the weighted samples to make them representative for the countries from which they were drawn. It reproduces the real number of cases for each EC country. Great Britain and Northern Ireland are treated as independent samples. Norway is weighted by "zero".

Note:

This weight corresponds to "Nation Weight II" in earlier Eurobarometers up to 31.

v9	WEIGHT ADJUSTED TO STANDARD SIZE
	Nation Weight IIb (WEIGHT ADJUSTED TO STANDARD SIZE)

This variable corresponds to "Weight Result from Target" adjusting all samples to the standard size of 1000 respectively 300 (Northern Ireland) or 500 (Luxembourg). Great Britain (n=1000) and Northern Ireland (n=300) are weighted as independent samples. Norway is weighted by "zero".

v10 NATION III (UNITED GERMANY)

Nation of interview III

East and West Germany are coded together: United Germany.

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 Norway
- 15 Finland
- 16 Sweden
- 17 Austria

v10

Value	Label	Missing	Count	Percent	Valid Percent
1	France		1000	5.8	5.8
2	Belgium		1013	5.9	5.9
3	Netherlands		1020	5.9	5.9
4	Germany		2114	12.2	12.2
5	Italy		1028	5.9	5.9
6	Luxembourg		770	4.5	4.5
7	Denmark		1000	5.8	5.8
8	Ireland		1000	5.8	5.8
9	Great Britain		1070	6.2	6.2
10	Northern Ireland		311	1.8	1.8
11	Greece		1008	5.8	5.8
12	Spain		1000	5.8	5.8
13	Portugal		936	5.4	5.4
14	Norway		952	5.5	5.5
15	Finland		1050	6.1	6.1
16	Sweden		990	5.7	5.7
17	Austria		1036	6.0	6.0
	Sum		17298	100.0	100.0
	Valid Cases		17298		

v11	WEIGHT SPECIAL GERMANY
	Nation Weight III (WEIGHT SPECIAL GERMANY)

This variable adjusts the East and West German samples to their respective proportions in the united Germany. All EC nation weights are included and all samples adjusted to the standard size. Norway is weighted by "zero".

v12	WEIGHT EURO 6
	European Weight 1a (WEIGHT EURO 6)

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 6 only refers to the six EC founder-members (France, Belgium, the Netherlands, West Germany, Italy and Luxembourg). This weight variable includes the national weights for each sample and contains the adjustment to the standard size.

v13	WEIGHT EURO 9
	European Weight 1b (WEIGHT EURO 9)

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 9 refers to the EC member countries before the joining of Greece (France, Belgium, the Netherlands, West Germany, Italy, Luxembourg, Denmark, Ireland and the United Kingdom). This weight variable includes the national weights for each sample and contains the adjustment to the standard size.

v14	WEIGHT EURO 10
	European Weight II (WEIGHT EURO 10)

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 10 refers to the EC member countries before the joining of Spain and Portugal (France, Belgium, the Netherlands, West Germany, Italy, Luxembourg, Denmark, Ireland, the United Kingdom and Greece). This weight variables includes the national weights for each sample and contains the adjustment to the standard size.

v15	WEIGHT EURO 12
	European Weight III (WEIGHT EURO 12)

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 12 refers to the EC member countries before the German Unification (France, Belgium, the Netherlands, West Germany, Italy, Luxembourg, Denmark, Ireland, the United Kingdom, Greece, Spain and Portugal). This weight variables includes the national weights for each sample and contains the adjustment to the standard size.

v16	WEIGHT EURO 12 + European Weight IV (WEIGHT EURO 12 +)
-----	---

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of all the European Community countries. It equals EURO12 plus East Germany.

v17	WEIGHT EURO + 3
	European Weight plus 3 (WEIGHT EURO +3)

This variable contains weights that adjust each national sample of the three new member countries Finland, Sweden and Austria in proportion to its nation's share in the total population of these countries.

v18	WEIGHT EURO 15
	European Weight V (WEIGHT EURO 15)

EURO 15 adjusts each national sample in proportion to it's nation's share in the total population (aged 15 and older) of the European Union countries in it's present composition, i.e. including the new members Sweden, Finland and Austria.

Unlike the "EUROPEAN WEIGHT" in earlier Eurobarometers up to 31 this weight contains the adjustment to the standard size.

v19	WEIGHT TOTAL (EURO 15 + NORWAY)
	European Weight VI (WEIGHT EURO 15 +)

WEIGHT 15+ adjusts each national sample in proportion to it's nation's share in the total population (aged 15 and older) of the European Union countries in it's present composition plus the non-member country Norway, i.e. EURO 15 plus Norway.

v132 Q12 EU MONETARY UNION CONDITIONS KNOWN

Q.12

The "Maastricht Treaty" which was signed and ratified by all member states, says that full European Economic and Monetary Union will start by January 1999 at the latest. From then on exchange rates will be locked between the countries which meet the relevant conditions of the Treaty. After that, one European currency will replace national currencies. Do you know any of the conditions member countries must meet in order to join the European Economic and Monetary Union?

(IF YES)

Please tell me which ones.

- 1 No, does not know any of the conditions
- 2 Yes

v136 Q12B EU MONETARY UNION COND - DEBT

Q.12b

The "Maastricht Treaty" which was signed and ratified by all member states, says that full European Economic and Monetary Union will start by January 1999 at the latest. From then on exchange rates will be locked between the countries which meet the relevant conditions of the Treaty. After that, one European currency will replace national currencies. Do you know any of the conditions member countries must meet in order to join the European Economic and Monetary Union?

(IF YES)

Please tell me which ones.

v375 Q41 EU POLICY DEVELOPMENT - PREFERENCE

Q.41

For some time there has been talk of a "TWO SPEED EUROPE". This means that some countries would be ready to intensify the development of a common European policy in certain important areas, while other countries would not. As regards this idea of a "TWO SPEED EUROPE", which of the following comes closest to your personal preference?

(SHOW CARD - READ OUT)

0 NA

1 That those countries which are ready to intensify the development of a common European policy in certain important areas should do so without having to wait for the others ...

2 Or that countries which are ready to intensify the development of a common European policy in certain important areas should wait until all Member States of the European Union are ready for it

v539 Q56 EU DECISIONS AND MEMBER INFLUENCE

Q.56

Here are two statements about how decisions are being taken within the institutions of the European Union, especially in the Council of Ministers in which each member state is represented by a member of its government. Which one best describes things as you see them?

(SHOW CARD - READ OUT)

0 NA

1 All fifteen member states have more or less equal influence

2 A small number of big and economically strong countries dominate

3 None of these (SPONTANEOUS)

4 DK

v564 Q61 EASTERN EU MEMBERS - AID TO FARMERS

Q.61

At present time, farmers in all member states as well as the less developed regions of the European Union, mainly in Greece, Ireland, Southern Italy, Portugal and Spain receive aid from the European Union. Imagine that in ten years from now, several countries from Central and Eastern Europe are members of the European Union. If their level of economic development is lower than the European Union average, and the share of agriculture in their economies is higher than the European Union average: what would you prefer to happen?

1 Increase the amount of money available so that both current and new member states can receive aid according to the same rules as now

2 Keep the total amount of money available the same, and share it out between current and new member states according to stricter rules

3 Exclude the new member states from aid programmes during a transition period

v565 Q62_A EU COUNCIL DECIS - VOTE PREFERENCE

Q.62

SPLIT BALLOT A

When the Minister from Member State governments take joint decisions by vote in the European Union Council of Ministers, which of the following would you prefer?

(SHOW CARD - READ OUT)

0 NA

1 Their votes should have a weight in proportion to the population of each country: if a country has twice as many inhabitants as another, it should have twice as much weight ...

2 Their vote should have a weight which does not only take into account the population of each country: if a country has twice as many inhabitants as another, it should have more weight but not twice as much

3 Each country, big or small, should have one vote

v588 Q65 EU AND THE DANGER OF WAR

Q.65

Which of the following two statements comes closest to your opinion?

(SHOW CARD - READ OUT)

0 NA

1 One of the main reasons for the European Union is to avoid war between member states

2 Even if the European Union were dissolved tomorrow, a future war between any of its current member states is unthinkable

3 I disagree with both (SPONTANEOUS)

v591 Q68 EU ECON COMPETITION VS SOC SECURITY

Q.68

Which one of the following comes closest to your opinion?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

0 NA

1 If we want Europe to be competitive on world markets, we must drastically cut the current levels of social security benefits

2 If we want Europe to be competitive on world markets, we must accept some significant cuts in current levels of social security benefits

3 Europe is capable of being competitive on world markets, while still keeping levels of social security more or less as today

v598 Q74A PROBLEMS: REGIONAL DIFFERENCES

Q.74

Here is a list of problems that people of (NATIONALITY) are interested in to varying degrees.

(SHOW CARD)

A. Could you please tell me for each one whether you personally consider it is a very important problem, quite important, not very important, or not at all important?

B. And for each of these problems, could you tell me whether it is preferable that decisions about it should be taken by the member countries of the European Union acting together or by each country separately?

Q.74Aa Reducing the differences between regions of our country by helping the less developed regions or those in most need

- 0 NA
- 1 Very important
- 2 Quite important
- 3 Not very important
- 4 Not at all important
- 5 DK

v599 Q74B DECISION: REGIONAL DIFFERENCES

Q.74

Here is a list of problems that people of (NATIONALITY) are interested in to varying degrees.

(SHOW CARD)

A. Could you please tell me for each one whether you personally consider it is a very important problem, quite important, not very important, or not at all important?

B. And for each of these problems, could you tell me whether it is preferable that decisions about it should be taken by the member countries of the European Union acting together or by each country separately?

Q.74Ba Reducing the differences between regions of our country by helping the less developed regions or those in most need

- 0 NA
- 1 Countries acting together
- 2 Each Country separately

v606 Q74A PROBLEMS: DEVELOPMENT AID

Q.74

Here is a list of problems that people of (NATIONALITY) are interested in to varying degrees.

(SHOW CARD)

A. Could you please tell me for each one whether you personally consider it is a very important problem, quite important, not very important, or not at all important?

B. And for each of these problems, could you tell me whether it is preferable that decisions about it should be taken by the member countries of the European Union acting together or by each country separately?

Q.74Ae Helping the people in poor countries in Africa, South America, Asia, etc.

- 0 NA
- 1 Very important
- 2 Quite important
- 3 Not very important
- 4 Not at all important
- 5 DK

v613 Q74B DECISION: PROTECTING NATURE

Q.74

Here is a list of problems that people of (NATIONALITY) are interested in to varying degrees.

(SHOW CARD)

A. Could you please tell me for each one whether you personally consider it is a very important problem, quite important, not very important, or not at all important?

B. And for each of these problems, could you tell me whether it is preferable that decisions about it should be taken by the member countries of the European Union acting together or by each country separately?

Q.74Bh Protecting nature and fighting pollution

- 0 NA
- 1 Countries acting together
- 2 Each Country separately
- 3 DK

v935 Q107 LEARNING - FOREIGN LANGUAGES

Q.106

ASK Q.92 TO Q.118 ONLY 15-24 YEARS

Some people say that "learning stops when you leave school and start work". On the other hand, others think that "you have to make the effort to learn throughout your life". Would you personally like to be able to continue to learn or be trained throughout your life, or not?

Q.107

IF YES - CODE 1 IN Q.106

Why?

(SHOW CARD - READ OUT - MAXIMUM 2 ANSWERS)

v944 Q108 LEARNING - DONT WANT

Q.106

ASK Q.92 TO Q.118 ONLY 15-24 YEARS

Some people say that "learning stops when you leave school and start work". On the other hand, others think that "you have to make the effort to learn throughout your life". Would you personally like to be able to continue to learn or be trained throughout your life, or not?

Q.108

Have you done a training course in the past twelve months, or not?

(IF YES)

Did you do the course because your employer asked you to, because it was compulsory in order to get benefits (unemployment or other), or because you wanted to?

(ONE ANSWER ONLY)

- 0 NA
- 1 Yes, your employer asked you to
- 2 Yes it was compulsory in order to get benefits (unemployment or other)
- 3 Yes, you wanted to
- 4 No
- 5 DK
- 9 Inap., (not coded 1 in V1009)

v969 Q116 EU ROLE IN LEARNING - SUPPORT

Q.115

ASK Q.92 TO Q.118 ONLY 15-24 YEARS

Do you think that the European Union could play a role or not in continuing education or training courses?

Q.116

IF YES - CODE 1 OR 2 IN Q.115

How do you think the European Union could play this role?

(SHOW CARD - READ OUT - TWO ANSWERS POSSIBLE)

Q.116_3 By supporting actions specifically aimed at those who currently cannot take advantage of these courses

v974 Q118A INFORM SOCIETY - SCHOOLS PREPARE

Q.118a

ASK Q.92 TO Q.118 ONLY 15-24 YEARS

Information is playing a bigger part in our daily and working lives. Information and communication techniques are multiplying. For example, you can now link up computers, telephone, televisions, videos and communication satellites. Do you think today's schools prepare children definitely, probably, probably not or definitely not for the new requirements imposed by the "information society"?

v1036

D29 INCOME HH

D.29

We also need some information about the income of this household to be able to analyse the survey results for different types of households. Here is a list of income groups.

(SHOW CARD)

Please count the total wages and salaries per month of all members of this household; all pensions and all social insurance benefits; child allowances and any other income like rents, etc... Of course, your answer as all other replies in this interview will be treated confidentially and referring back to you or your household will be impossible. Please give me the letter (non-alphabetical, irregular order) of the income group your household falls into before tax and other deductions.

- 9 140.000 to 149.999
- 10 150.000 to 159.999
- 11 160.000 to 169.999
- 12 170.000 Francs l. and more

in Denmark (DK):

Danish kroner PER YEAR

- 1 Less Than 70000
- 2 70.000 to 99.999
- 3 100.000 to 129.999
- 4 130.000 to 169.999
- 5 170.000 to 199.999
- 6 200.000 to 239.999
- 7 240.000 to 269.999
- 8 270.000 to 299.999
- 9 300.000 to 349.999
- 10 350.000 to 399.999
- 11 400.000 to 449.999
- 12 450.000 or More

in Ireland (IE):

Irish pounds per month

- 1 Less Than 240
- 2 240 to 319
- 3 320 to 399
- 4 400 to 479
- 5 480 to 599
- 6 600 to 729
- 7 730 to 829
- 8 830 to 999
- 9 1.000 to 1.149
- 10 1.150 to 1.664
- 11 1.665 to 2.000
- 12 2001 And Over

in United Kingdom (GB):

U.K. pounds per month

- 1 Less Than 240
- 2 240 to 319

- 3 320 to 399
- 4 400 to 479
- 5 480 to 599
- 6 600 to 729
- 7 730 to 829
- 8 830 to 999
- 9 1.000 to 1.149
- 10 1.150 to 1.664
- 11 1.665 to 2.000
- 12 2.001 And Over

in Greece (GR):

Greek drachmas per month

- 1 Less Than 40.000
- 2 40.001 to 70.000
- 3 70.001 to 100.000
- 4 101.001 to 130.000
- 5 130.001 to 160.000
- 6 160.001 to 190.000
- 7 190.001 to 220.000
- 8 220.001 to 250.000
- 9 250.001 to 280.000
- 10 280.001 to 310.000
- 11 310.001 to 340.000
- 12 340.001 or More

in Spain (ES):

Spanish pesetas per month

- 1 Less Than 50.000
- 2 50.001 to 60.000
- 3 60.001 to 70.000
- 4 70.001 to 80.000
- 5 80.001 to 90.000
- 6 90.001 to 100.000
- 7 100.001 to 125.000
- 8 125.001 to 150.000
- 9 150.001 to 175.000
- 10 175.001 to 200.000
- 11 200.001 to 225.000
- 12 225.001 or More

in Portugal (PT):

Portuguese escudos per month

- 1 up to 60.000
- 2 60.001 to 90.000
- 3 90.001 to 120.000
- 4 120.001 to 150.000

- 5 150.001 to 200.000
- 6 200.001 to 250.000
- 7 250.001 to 300.000
- 8 300.001 or more

in Germany - East (DE_E):

German marks per month

- 1 Less Than 750
- 2 751 to 1.000
- 3 1.001 to 1.250
- 4 1.251 to 1.500
- 5 1.501 to 1.750
- 6 1.751 to 2.000
- 7 2.001 to 2.250
- 8 2.251 to 2.500
- 9 2.501 to 2.750
- 10 2.751 to 3.000
- 11 3.001 to 3.250
- 12 3.251 and More

in Norway (NO):

Norwegian kroner per month

- 1 Less than 5.000 NKR
- 2 5.000 to 7.999 NKR
- 3 8.000 to 9.999 NKR
- 4 10.000 to 13.999 NKR
- 5 14.000 to 16.999 NKR
- 6 17.000 to 19.999 NKR
- 7 20.000 to 22.999 NKR
- 8 23.000 to 25.999 NKR
- 9 26.000 to 29.999 NKR
- 10 30.000 to 34.999 NKR
- 11 35.000 to 39.999 NKR
- 12 40.000 NKR and more

in Finland (FI):

Finmarks per month

- 1 Up to 5.000 FMK
- 2 5.001 to 7.500 FMK
- 3 7.501 to 10.000 FMK
- 4 10.001 to 12.500 FMK
- 5 12.501 to 15.000 FMK
- 6 15.001 to 17.500 FMK
- 7 17.501 to 20.000 FMK
- 8 20.001 to 22.500 FMK
- 9 22.501 to 25.000 FMK
- 10 25.001 to 27.500 FMK

- 11 27.501 to 30.000 FMK
 12 More than 30.000 FMK

in Sweden (SE):

Swedish kroner per month

- 1 Less than 5.000 SKR
 2 5.000 to 10.000 SKR
 3 10.001 to 15.000 SKR
 4 15.001 to 20.000 SKR
 5 20.001 to 25.000 SKR
 6 25.001 to 30.000 SKR
 7 30.001 to 35.000 SKR
 8 35.001 to 40.000 SKR
 9 40.001 to 45.000 SKR
 10 45.001 to 50.000 SKR
 11 50.001 to 55.000 SKR
 12 55.001 SKR and more

in Austria (AT):

Austrian shilling per month

- 1 up to 6.000 ÖS
 2 6.001 to 8.000 ÖS
 3 8.001 to 10.000 ÖS
 4 10.001 to 12.000 ÖS
 5 12.001 to 14.000 ÖS
 6 14.001 to 16.000 ÖS
 7 16.001 to 20.000 ÖS
 8 20.001 to 25.000 ÖS
 9 25.001 to 30.000 ÖS
 10 30.001 to 35.000 ÖS
 11 35.001 to 40.000 ÖS
 12 More than 40.000 ÖS

v1037 D29 INCOME HH QUANTILES (HARMONISED)
 D.29R (Household income - HARMONISED)

- 1 - - (Lowest income quartile)
- 2 - (Next to lowest income quartile)
- 3 + (Next to highest income quartile)
- 4 + + (Highest income quartile)
- 5 DK/refusal

Derivation:

This variable collapses answers to D.29 into four groups representing approximate quartiles.

Note:

See D.29 for complete question text

v1043	P6 SIZE OF COMMUNITY
	P.6 (Objective) Size of locality

in France (FR):

- 1 less than 2.000
- 2 2.000 - less than 20.000
- 3 20.000 - less than 100.000
- 4 100.000 and more inhabitants
- 5 Paris

in Belgium (BE):

- 1 Grands centres
- 2 Localites urbaine
- 3 Localites secondaire
- 4 Autres localites

in Netherlands (NL):

- 1 less than 5.000
- 2 5.000 - less than 10.000
- 3 10.000 - less than 20.000
- 4 20.000 - less than 50.000
- 5 50.000 - less than 100.000
- 6 100.000 - less than 400.000
- 7 400.000 and more inhabitants

in Germany (DE):

- 1 less than 2.000
- 2 2.000 - less than 5.000
- 3 5.000 - less than 20.000
- 4 20.000 - less than 50.000
- 5 50.000 - less than 100.000
- 6 100.000 - less than 500.000
- 7 500.000 and more inhabitants

in Italy (IT):

- 1 less than 10.000
- 2 10.000 - less than 100.000
- 3 100.000 - less than 250.000
- 4 250.000 and more inhabitants

in Luxembourg (LU):

- 1 less than 2.500
- 2 2.500 - less than 5.000
- 3 5.000 - less than 10.000

- 4 10.000 - less than 20.000
- 5 20.000 - less than 50.000
- 6 50.000 and more inhabitants (Luxembourg ville)

in Denmark (DK):

- 1 less than 2.000
- 2 2.000 - less than 5.000
- 3 5.000 - less than 10.000
- 4 10.000 - less than 20.000
- 5 20.000 - less than 50.000
- 6 50.000 - less than 100.000
- 7 100.000 and more inhabitants

in Ireland (IE):

- 1 less than 2.000
- 2 2.000 less than 20.000
- 3 20.000 less than 100.000
- 4 100.000 and more inhabitants

in Great Britain (GB_GBN):

- 1 Metropolitan
- 2 Other 100 % urban
- 3 Mixed urban/rural
- 4 Rural

in Northern Ireland (GB_NIR):

- 1 less than 2.000
- 2 2.000 - less than 20.000
- 3 20.000 - less than 100.000
- 4 100.000 and more inhabitants

in Greece (GR):

- 1 less than 2.000
- 2 2.000 - less than 10.000
- 3 10.000 - less than 50.000
- 4 50.000 - less than 1.000.000
- 5 1.000.000 and more inhabitants

in Spain (ES):

- 1 less than 2.000
- 2 2.000 - less than 10.000
- 3 10.000 - less than 50.000
- 4 50.000 - less than 100.000
- 5 100.000 - less than 300.000
- 6 300.000 - less than 500.000
- 7 500.000 - less than 1.000.000
- 8 1.000.000 and more inhabitants

in Portugal (PT):

- 1 less than 100
- 2 100 - less than 200
- 3 200 - less than 500
- 4 500 - less than 1.000
- 5 1.000 - less than 2.000
- 6 2.000 - less than 5.000
- 7 5.000 - less than 10.000
- 8 10.000 - less than 30.000
- 9 30.000 - less than 100.000
- 10 100.000 - less than 500.000
- 11 500.000 and more inhabitants

in Norway (NO):

- 1 Oslo
- 2 Bergen, Trondheim
- 3 Other cities
- 4 Densely populated
- 5 Scattered populated

in Finland (FI):

- 1 Helsinki area
- 2 Turku/Tampere
- 3 Other cities
- 4 Rural centre
- 5 Open rural area

in Sweden (SE):

- 1 less than 5.000
- 2 5.000 - less than 10.000
- 3 10.000 - less than 30.000
- 4 30.000 - less than 50.000
- 5 50.000 - less than 100.000
- 6 100.000 - less than 150.000
- 7 150.000 and more inhabitants

in Austria (AT):

- 1 Rural
- 2 Mixed urban/rural
- 3 Urban
- 4 Metropolitan

P7 REGION II

P.7R Region II

99 INAP - NO REGION II

in France (FR):

France (EUROSTAT NUTS I LEVEL) / (Zeal)

- 1 Ile de France
- 2 Bassin Parisien
- 3 Nord-pas-de-Calais
- 4 Est
- 5 Ouest
- 6 Sud-Ouest
- 7 Centre-Est
- 8 Mediterranee

in Belgium (BE):

Belgium (EUROSTAT NUTS I LEVEL) / (Regions)

- 1 Region Wallonne
- 2 Bruxelles-Brussel
- 3 Vlaanderen

in Netherlands (NL):

Netherland (EUROSTAT NUTS I LEVEL) / (Landsdelen)

- 1 Noord-Nederland
- 2 Oost-Nederland
- 3 West-Nederland
- 4 Zuid-Nederland

in Germany - West (DE_W):

West Germany (EUROSTAT NUTS I LEVEL) / (Bundesländer)

- 1 Schleswig Holstein
- 2 Hamburg
- 3 Niedersachsen
- 4 Bremen
- 5 Nordrhein-Westfalen
- 6 Hessen
- 7 Rheinland-Pfalz
- 8 Baden-Wuerttemberg
- 9 Bayern
- 10 Saarland
- 11 Berlin (West)

in Italy (IT):

Italy (EUROSTAT NUTS I LEVEL) / (Gruppi di regioni (grouping for Community purposes))

- 1 Nord Ovest
- 2 Lombardia
- 3 Nord Est
- 4 Emilia-Romagna
- 5 Centro
- 6 Lazio
- 7 Abruzzi-Molise
- 8 Campania
- 9 Sud
- 10 Sicilia
- 11 Sardegna

in United Kingdom (GB):

United Kingdom (EUROSTAT NUTS I LEVEL - modified) / (Standard Regions)

- 1 Scotland
- 2 North, Yorkshire, Humberside and North West
- 3 East and West Midlands, East Anglia
- 4 Wales
- 5 South East
- 6 South West
- 7 Northern Ireland

in Spain (ES):

Spain (Agrupacion de comunidades autonomas)

- 1 Galicia
- 2 North
- 3 North-East
- 4 Aragon, Rioja
- 5 Madrid
- 6 Centre
- 7 Cataluna
- 8 East
- 9 South
- 10 Canarias

in Germany - East (DE_E):

East Germany (EUROSTAT NUTS I LEVEL)

- 11 Berlin (Ost)
- 12 Brandenburg
- 13 Mecklenburg-Vorpommern
- 14 Sachsen
- 15 Sachsen-Anhalt
- 16 Thüringen

in Finland (FI):

Finland (EUROSTAT NUTS II LEVEL) / (Suuralueet)

- 1 Uusimaa

- 2 Etelä-Suomi
- 3 Itä-Suomi
- 4 Väli-Suomi
- 5 Pohjois-Suomi

Note:

Only in the case of West Germany "Region II" corresponds to the variable labelled "Region" in earlier Eurobarometers up to 31. If indicated, "Region II" units are consistent with the EUROSTAT nomenclature for regional statistics (NUTS).

East Germany: The East German federal units ("Neue Bundesländer") are constructed from the ex-GDR administrative regional units which only give a rough idea of their real outline.

Starting with Eurobarometer 34 and up to survey 61, NUTS 1 level data (REGION II) for the NETHERLANDS are not (re-)coded in accordance with the official EUROSTAT nomenclature of territorial unit statistics. The NUTS 2 level province ZEELAND should be coded as belonging to NUTS 1 region (landsdel) WEST instead of SOUTH Netherlands. Archive releases have been corrected from EB 51 onwards.

v1048 C1 OPINION LEADERSHIP INDEX
 C.1 OPINION LEADERSHIP INDEX

Cognitive Mobilisation Index 1

- 0 DK / NA
- 1 - - low
- 2 -
- 3 +
- 4 + + high

Derivation:

This index is based on the answers to the following two questions: "When you, yourself hold a strong opinion, do you ever find yourself persuading your friends, relatives or fellow workers to share your views? If so, does this happen often, from time to time or rarely?" (Q.5) and "When you get together with your friends, would you say you discuss political matters frequently, occasionally or never?" (Q.4). Interviewees giving affirmative answers to both questions are labelled + +. Interviewees giving negative answers to both questions are labelled - -. Middle categories (+ and -) are constituted correspondingly.

CODE 1: coded 3, 4, 5 or 0 for V66 and 3 for V65; or coded 3 or 4 for V66 and 3, 4 or 0 for V65

CODE 2: coded 3, 4, 5 or 0 for V66 and 2 for V65; or coded 1 or 2 for V66 and 3, 4 or 0 for V65

CODE 3: coded 3, 4, 5 or 0 for V66 and 1 for V65; or coded 1 or 2 for V66 and 2 for V65

CODE 4: coded 1 or 2 for V66 and 1 for V65

CODE 0: coded 0 or 5 for V66 and 0 or 4 for V65

This variable forms an indicator of the individual's potential to take an active role in the political process. For a complete discussion of this variable and its correlates see Ronald Inglehart, *The Silent Revolution: Changing Values and Political Styles among Western Publics* (Princeton University Press, 1977).

v1049	C4 SOCIO PROF STATUS (OCCUPATION RECODE) C.4 SOCIO PROFESSIONAL STATUS
-------	---

- 0 Other answers (never any payed work, NA)
- 1 Farmer and fisher
- 2 Professionals
- 3 Owner of a shop, craftsmen, other self employed position
- 4 Business proprietors, owner of a company
- 5 Employed professional
- 6 General management
- 7 Middle management
- 8 Employed position, working mainly at a desk
- 9 Employed position , not at a desk but travelling
- 10 Employed position, not at a desk but in a service job
- 11 Supervisors
- 12 Skilled manual workers
- 13 Other (unskilled) manual worker

Derivation:

Roughly half of the representative sample of the European Community public was without paid work. Basing cross-analyses on "occupation" (D.15A) would exclude half of the respondents from analysis. An alternative is to base analyses on (non-marxist) concept of "objective social class" using "occupation of the head of household" as reference. In order to classify as many respondents as possible with respect to their socio-professional setting, a new classification was created called "socio-professional status" of the main income earner (MIE).

The following standard was used if the respondent is the MIE: For those in paid work it is based on the respondents' own present occupation (D.15A). For those not in paid work, "former occupation" (D.15B) was used, if applicable. If the respondent is not the MIE, the occupation of the "person who contributes most to the household income" (D.21A) was used and if the head of household was not performing paid works at the time of the interview, his or her "former occupation" (D.21B) was used, if applicable.

Consequently, socio-professional status is a classification "that comes as close to the respondent himself/herself as possible" but that draws upon additional background information to the extent necessary and available, in order to avoid a single measure of interviewees' socio-professional setting and to include the maximum number of respondents in the respective analyses. For more details see standard report EUROBAROMETER 44, April 1996, Brussels, C.11 f.

v1050	C5 EUROPEAN POL PARTY PREFERENCE
	C.5 EUROPEAN PARTY PARLIAMENTARY PREFERENCE INDEX

- 0 Other answers (including NA)
- 1 (PSE) Socialist Group
- 2 (PPE) Group of the European People's Party (Christian Democratic Group)
- 3 (UFE) Group Union for Europe
- 4 (ELDR) Group of the European Liberal, Democrat and Reform Party
- 5 (GUE/NGL) Confederal Group of the European United Left / Nordic Green Left
- 6 (V) The Green Group in the European Parliament
- 7 (ARE) Group of the European Radical Alliance
- 8 (IEDN) Group of Independents for a Europe of Nations
- 9 (N.I.) Non-affiliated
- 10 Not represented (other parties)
- 99 Inap., not available for Norway (coded 15 in V7)

Derivation:

This index is based upon the vote intention question D.4: "If there were a "General Election" tomorrow (SAY IF CONTACT UNDER 18 YEARS: and you had a vote), which party would you vote for?"

Answers are grouped according to the affiliation of the representatives of the respective party to a group in the European Parliament.

If a party was not represented in the European Parliament at the time the survey was carried out but had been represented before, its supporters are included in the European Parliament group their party has previously been affiliated with. Supporters of parties represented in the European Parliament whose members (of the European Parliament) are not affiliated with any group are labelled N.I., supporters of parties not represented in the European Parliament are labelled "other". Labels are presented in the order in which they occur in the "list of members" of the European Parliament of 1994.

v1051	C12 EUROP SOCIAL GRADE
	C.12 European Social Grade (ESOMAR 7-point scale)

- 0 NA
- 1 A
- 2 B
- 3 C
- 4 D
- 5 E1
- 6 E2
- 7 E3

Derivation:

This scale is based on the recommendation of the European Society for Opinion and Marketing Research to harmonise the measurement of social grade across borders. This approach uses three different types of input variables:

I) Occupation of the main income earner (MIE) is based on 16 occupation groups E1 to E16:

- E1 General management, director or top management (6 employees or more)
- E2 Self employed professional
- E3 Employed professional
- E4 General management, director or top management (5 employees or less)
- E5 Middle management, other management (6 employees or more)
- E6 Middle management, other management (5 employees or less)
- E7 Business proprietors, owner (full/partner) of company and owner of a shop, craftsmen, other self employed (6 employees or more)
- E8 employed position, working mainly at a desk
- E9 business proprietors, owner (full/partner) of company (5 employees or less)
- E10 student
- E11 employed position, not at a desk but travelling or in a service job
- E12 farmer and fisherman
- E13 responsible for ordinary shopping and looking after the home, housewife
- E14 supervisor and skilled manual worker
- E15 other (unskilled) manual worker, servant
- E16 retired or unable to work through illness, unemployed or temporarily not working

II) The education level of the main income earner (MIE) is based on a classification into 6 groups of education level (adjusting the finishing age of general education in accordance with extra general education or specific apprenticeship and/or professional training): 1) up to 14 years; 2) 15-16 years; 3) 17-18 years; 4) 19-20 years; 5) 21-24 years; 6) 25 years and over.

III) Household ownership of selected durable is based on ownership in terms of number of products owned (D.14): a colour TV set - a video recorder - a video camera - a radio-clock - a PC/home computer - a still camera - an electric drill - an electric deep fat fryer - two or more cars - a second home or a holiday home/flat.

The combination of these input variables results in a new social grade classification with, as categories (upper to lower): A B C D E1 E2 E3. For more details see standard report EUROBAROMETER 44, April 1996, Brussels, C.15 f.

SCALE on the basis of all active and non-active main income earners as constructed by the original investigator.

v1052 C14 OCCUPATION OF RESPONDENT - SCALE

C.14 Respondent Occupation Scale

- 0 Other answers (Coded 2, 4 or 0 for V576)
- 1 Self employed (Coded 5 to 9 for V576)
- 2 Managers (Coded 10 to 12 for V576)
- 3 Other white collars (Coded 13 or 14 for V576)
- 4 Manual workers (Coded 15 to 18 for V576)
- 5 House persons (Coded 1 for V576)
- 6 Unemployed (Coded 3 for V576)

Derivation:

This scale is based on a combination / selection of the current respondent occupation variable D.15A.
