Acknowledgements

Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences.

Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (<http://zacat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

1.2 Content

1.2.1 Abstract

This round of Eurobarometer surveys queried respondents on standard Eurobarometer measures such as public awareness of and attitudes toward the European Union (EU), and also focused on expectations and fears regarding the EU.

Respondents were asked whether they feared economic crisis, loss of power for smaller member states, increased crime, more foreign workers, language acculturation, richer member countries paying for less rich countries, slower decisions due to bureaucracy, disappearance of small and midsize farms, businesses, and fisheries, loss of social benefits, transfer of jobs, massive imports, more taxes, decisions being imposed by the bigger member countries, and loss of national identity. Respondents were also asked to evaluate the likelihood of such situations occurring.

Expectations of the EU were assessed through questions concerning whether areas such as defense, employment, culture, environment, consumerism, agriculture and fishing, immigration, border control, transportation, importation, social justice, equality, law, crime, and research should be considered key priorities for the EU.

Opinions were sought on the necessity of various policies to further EU progress, which groups of people (such as students, retirees, the unemployed, large companies, farmers) were in favor of the EU, and which countries and groups benefited most from the EU. Respondents also provided information as to which areas of policy they believed should be decided by the EU and which decided by their national governments.

With respect to further progress in building Europe, respondents not only described their reactions to this concept but also indicated whether they thought it was necessary to implement a single internal market, a common agricultural policy, a European social policy, a European environment policy, one European foreign policy, one army, a European currency, one tax system, an elected European government, and European citizenship in addition to national citizenship.

Demographic and other background information was elicited on the number of people residing in the home, household income, and region of residence, as well as the respondent's age, sex, marital status, occupation, and left-right political self-placement.

1.3 Universe

Eurobarometer 44.2bis covers the population of the respective nationality of the European Union member countries, aged 15 years and over, resident in each of the Member States. The basic sample size of the 44.2bis MEGA-survey is about 3000 respondents in Belgium, Denmark, East Germany, Greece, Ireland, the Netherlands, Austria, Portugal, Finland, and Sweden; about 6000 respondents in West Germany, Spain, France, Italy and Great Britain; about 600 and 1000 respondents in Northern Ireland and Luxembourg respectively. Next to this basic sample an oversample of people working in the sector of agriculture, fishery or forestry was carried out. A minimum number of such interviews per region was imposed.

1.4 Sampling procedure

A multistage, random (probability) basic sample design was applied in all Member States. In each EU country, a number of sampling points was drawn with probability proportional to population size (for a total coverage of the country) and to population density.

For drawing the basic sample, sampling points were drawn systematically from all 'administrative regional units', after stratification by individual unit and type of area. They thus represent the whole territory of the Member States according to the EUROSTAT-NUTS II and according to the distribution of the national resident population of the respective EU-nationalities in terms of metropolitan, urban, and rural areas. In each of the selected sampling points a starting address was drawn at random. Further addresses were selected as every Nth address from the initial address by standard random route procedures. In each household the respondent was drawn at random. All interviews were face-to-face in people's homes and in the appropriate national language. For weighting and analysis these basic regional units were combined in NUTS I areas or equivalent in order to obtain a minimum of 200 cases per region.

COMPARISON BETWEEN SAMPLES AND UNIVERSES AND WEIGHTING OF THE DATA

For each country a comparison between the sample and the universe was carried out. The Universe description was derived from EUROSTAT population data or from national statistics. For all countries a national weighting procedure, using marginal and intercellular weighting, was carried out based on this Universe description. As such, in all countries sex, age, basic region (NUTS II or equivalent), urbanization level, respondent occupation, and marital status were introduced in the iteration procedure.

For all weighting (national and EC averages), INRA (EUROPE) applies the official population figures as published by EUROSTAT - Regional Statistics (1994) or national census data. The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

Between January 28 and March 12, 1996, INRA (EUROPE), a European network of market and public opinion research agencies, carried out the wave 44.2bis of the Standard Eurobarometer, also called MEGA-survey, on request of the European Commission.

1.6 Mode of data collection

All interviews were face-to-face in people's homes and in the appropriate national language.

1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factor corrects for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country as well as each lower level sample (Great Britain and Northern Ireland, East and West Germany) are represented in proportion to its population size within different groupings, or according to the historical states of European unification (e.g. founder members, new members, Euro zone) in the case of the EUROPEAN WEIGHTS, or for the United Kingdom (WEIGHT SPECIAL UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31A) and for Germany as a whole (WEIGHT SPECIAL GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general all samples which do not belong to the respective group of samples under consideration are excluded from calculation.

The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the

actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 3) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

Eurobarometer 44.2BIS provides four (post-stratification) NATION WEIGHTS: NATION WEIGHT IIa (WEIGHT RESULT FROM TARGET) and NATION WEIGHT IIb (WEIGHT ADJUSTED TO STANDARD SIZE) for separate analysis or comparison of individual samples (countries or regions on sub-national level), NATION WEIGHT I (WEIGHT SPECIAL UNITED KINGDOM adjusted to standard size) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole and NATION WEIGHT III (WEIGHT SPECIAL GERMANY adjusted to standard size), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. NATION WEIGHT IV (WEIGHT SPECIAL GERMANY & UNITED KINGDOM) combines NATION WEIGHT I and NATION WEIGHT III. All other samples (nations) are included, likewise all post-stratification factors.

The different EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries representing different historical states of European integration (e.g. EURO6 = six founder members). All post-stratification factors are included.

For more detailed information on the individual weights please see the corresponding variable description.

1.8 Data preparation

The data received by ICPSR from INRA (Europe) were checked for missing and duplicate records, for illegal (wild) codes and for consistency of response patterns. Errors discovered by these procedures were corrected or noted in this code- book. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-read- able documentation was also created for this dataset by ICPSR.

ICPSR has either added "<NA>" codes to indicate responses that had no code values in the original data (system missing values) or recoded variables to the "<NA>" value if the variable had been inappropriately coded. Illegal (wild) codes which ICPSR has been unable to document have been labeled as "<Undocumented Code>" where they appear in this codebook. Users should also note that on occasion the number of responses to a particular question may exceed the maximum indicated in the interviewer instructions.

Question text and contingency text appearing in this code- book and ICPSR's machine-readable documentation is taken from INRA (Europe)'s English language version of the questionnaire. Whenever a discrepancy occurs between INRA (Europe)'s codebook and its English language questionnaire as to the coding scheme of a variable, the former is followed in the ICPSR documentation.

2 Eurobarometer Series Description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

Table 2: EU enlargement and countries covered by Standard and Special Eurobarometer

		Norway	NO	1000	

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 3: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.2OVR, 55.1OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.2OVR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 3).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 4) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 4: Overview of Eurobarometer surveys with standard EU and trend question modules

Standard and trend surveys	Fieldwork Dates	GESIS ID	Standard Report	Special topic	Subset
Eurobarometer 34.0	Oct-Nov 1990	ZA1960	X

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

3 Dataset structure and standards

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 5: ZEUS Party Family Code (slightly modified)

Category		Party Family
0	(001-099)	not affiliated / electoral alliances across "families"
1	(100-199)	Communists
2	(200-299)	Socialists
3	(300-399)	Liberals
4	(400-499)	Christian Democrats
5	(500-599)	Conservatives
6	(600-699)	Extreme Rights / Nationalists
7	(700-799)	Regionalists / Ethnic
8	(800-899)	Environmental parties
9	(900-949)	Agricultural parties
9	(950-989)	other special issue parties (e.g. Eurosceptics) and independents
	990	other (spontaneous)
	994	not voting age
	995	empty ballot (blank) or invalid vote
	996	not voted / would not vote
	997	Refused
	998	DK / DK+NA if NA not coded separately
	999	INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION – ALL SAMPLES ISO 3166).

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (–1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded “real” values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission’s official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

CROSS-TABULATION: The absolute frequencies of the occurrence of values (<i>absolute values</i>) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies (<i>row percent</i>) refer to the valid cases (<i>n valid sum</i>), i.e. the total number of cases (<i>n sum</i>) reduced by the number of cases defined as missing data (<i>M</i>). For display and place saving reasons excluded countries or areas may be completely dropped from the table.																																																																																																																																																																																																																																																																																																																																																					
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (<i>M</i>), i.e. <i>percent</i> on the basis of all cases (<i>sum</i>) and <i>valid percent</i> on the basis of the <i>valid cases</i> .																																																																																																																																																																																																																																																																																																																																																					

5 Variable Documentation

Variable, Label

Question Text (English Language)

v1 - ICPSR STUDY NUMBER

ICPSR STUDY NUMBER

6748 The ICPSR has attached this as a unique data collection identification number.

v1

Value	Label	Missing	Count	Percent	Valid Percent
6748			65178	100.0	100.0
	Sum		65178	100.0	100.0
	Valid Cases		65178		

v2 - ZA STUDY NUMBER

ZA STUDY NUMBER

2828 The ZA data collection identification number.

v2

Value	Label	Missing	Count	Percent	Valid Percent
2828			65178	100.0	100.0
	Sum		65178	100.0	100.0
	Valid Cases		65178		

v3 - ICPSR EDITION NUMBER

ICPSR EDITION NUMBER

The number identifying the release edition of this dataset.

1 First ICPSR Edition -- January 2001

Note:

Please see variable VERSION ("GESIS ARCHIVE VERSION") for further information on the version number of this data set and the corresponding release date.

v3

Value	Label	Missing	Count	Percent	Valid Percent
1	1ST ICPSR EDITION		65178	100.0	100.0
	Sum		65178	100.0	100.0
	Valid Cases		65178		

version - GESIS ARCHIVE VERSION

VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

On occasion of the implementation of this versioning scheme (2010-04-13), the default version number 1.0.0 has been created automatically for this Eurobarometer.

Version 1.0.1 adds the crosstabulation variable ISOCNTRY and the VERSION variable to the otherwise unchanged data set.

Former version or edition identification variables are maintained unchanged as a reference to former releases.

version

Value	Label	Missing	Count	Percent	Valid Percent
1.0.1 (2012-07-01)			65178	100.0	100.0
	Sum		65178	100.0	100.0
	Valid Cases		65178		

v4 - ICPSR PART NUMBER

ICPSR PART NUMBER

The number identifying this part of a 1-part study.

1 Part one of a one-part study

v4

Value	Label	Missing	Count	Percent	Valid Percent
1	PART 1 (ONE-PART STUDY)		65178	100.0	100.0
	Sum		65178	100.0	100.0
	Valid Cases		65178		

v5 - ICPSR CASE ID

ICPSR CASE ID

Sequential respondent identification number assigned by ICPSR.

A unique identification number is assigned to each respondent.

Note:

Actual number is coded

isocntry - NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

isocntry

v6 - NATION I (UNITED KINGDOM)

Nation of interview

This variable identifies the E.C. nation in which the respondent was interviewed. A unique numeric code is assigned to each of the 15 E.C. countries.

- 1 France
- 2 Belgium
- 3 Netherlands
- 4 West Germany
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 United Kingdom
- 10 Greece
- 11 Spain
- 12 Portugal
- 13 East Germany
- 14 Finland
- 15 Sweden
- 16 Austria

v6

Value	Label	Missing	Count	Percent	Valid Percent
1	France		6369	9.8	9.8

	Sum		65178	100.0	100.0
	Valid Cases		65178		

v7 - WEIGHT SPECIAL UNITED KINGDOM

W2: WEIGHT SPECIAL UNITED KINGDOM

This variable adjusts the British and Northern Irish samples to their respective proportions in the United Kingdom and should be used whenever the United Kingdom is to be analyzed as a whole. All nation weights are included.

Note:

Unlike the "Nation Weight I" in earlier Eurobarometers up to 31, this weight adjusts all samples to the standard size.

v8 - NATION II (GB AND NORTHERN IRELAND)

NATION II (GB AND NORTHERN IRELAND)

- 1 France
- 2 Belgium
- 3 Netherlands
- 4 Germany West
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 Germany East
- 15 Finland
- 16 Sweden
- 17 Austria

v8

Value	Label	Missing	Count	Percent	Valid Percent
1	France		6369	9.8	9.8
2	Belgium		3204	4.9	4.9
3	Netherlands		3597	5.5	5.5
4	Germany West		6423	9.9	9.9
5	Italy		6221	9.5	9.5
6	Luxembourg		1034	1.6	1.6
7	Denmark		3100	4.8	4.8
8	Ireland		3001	4.6	4.6
9	Great Britain		5827	8.9	8.9
10	Northern Ireland		600	0.9	0.9
11	Greece		3205	4.9	4.9
12	Spain		6230	9.6	9.6
13	Portugal		3201	4.9	4.9
14	Germany East		3511	5.4	5.4
15	Finland		3373	5.2	5.2
16	Sweden		3169	4.9	4.9
17	Austria		3113	4.8	4.8
	Sum		65178	100.0	100.0
	Valid Cases		65178		

v9 - WEIGHT RESULT FROM TARGET

W3: WEIGHT RESULT FROM TARGET

This variable contains weights that adjust the weighted samples to make them representative for the countries from which they were drawn. It reproduces the real number of cases for each EC country. Great Britain and Northern Ireland are treated as independent samples.

This weight corresponds to "Nation Weight II" in earlier Eurobarometers up to 31.

v10 - WEIGHT ADJUSTED TO STANDARD SIZE

W4: WEIGHT ADJUSTED TO STANDARD SIZE

This variable corresponds to "WEIGHT RESULT FROM TARGET" adjusting all samples to the standard size of about 3000 for Belgium, Denmark, East Germany, Greece, Ireland, the Netherlands, Austria, Portugal, Finland and Sweden, about 6000 for West Germany, Spain, France, Italy and Great Britain, about 600 for Northern Ireland and 1000 for Luxembourg. Great Britain and Northern Ireland are weighted as independent samples.

v11 - NATION III (UNITED GERMANY)

NATION III (UNITED GERMANY)

East and West Germany are coded together: United Germany.

- 1 France
- 2 Belgium
- 3 Netherlands
- 4 Germany
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 Finland
- 15 Sweden
- 16 Austria

v11

Value	Label	Missing	Count	Percent	Valid Percent
1	France		6369	9.8	9.8
2	Belgium		3204	4.9	4.9
3	Netherlands		3597	5.5	5.5
4	United Germany		9934	15.2	15.2
5	Italy		6221	9.5	9.5
6	Luxembourg		1034	1.6	1.6
7	Denmark		3100	4.8	4.8
8	Ireland		3001	4.6	4.6
9	Great Britain		5827	8.9	8.9
10	Northern Ireland		600	0.9	0.9
11	Greece		3205	4.9	4.9
12	Spain		6230	9.6	9.6
13	Portugal		3201	4.9	4.9
14	Finland		3373	5.2	5.2
15	Sweden		3169	4.9	4.9
16	Austria		3113	4.8	4.8
	Sum		65178	100.0	100.0
	Valid Cases		65178		

v12 - WEIGHT SPECIAL GERMANY

W1: WEIGHT SPECIAL GERMANY

This variable adjusts the East and West German samples to their respective proportions in the united Germany. All EC nation weights are included and all samples adjusted to the standard size.

v13 - WEIGHT EURO 6

W5: WEIGHT EURO 6

This variable contains the weight that adjusts each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition.

This weight includes the six EC founder-members (France, Belgium, Netherlands, West Germany, Italy, and Luxembourg) and includes national weighting for each sample adjusted to the standard size.

v14 - WEIGHT EURO 9

W6: WEIGHT EURO 9

This variable contains weights that adjusts each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition.

This weight variable excludes Greece, Spain, Portugal, East Germany, Finland, Sweden and Austria and includes national weights for each sample with adjustment to the standard size.

v15 - WEIGHT EURO 10

W7: WEIGHT EURO 10

This variable contains the weight that adjusts each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition.

This weight variable excludes Spain, Portugal, East Germany, Finland, Sweden and Austria and includes national weights for each sample with adjustment to the standard size.

v16 - WEIGHT EUROPE 12

W8: WEIGHT EUROPE 12

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of all the European Community countries in their historic composition.

This weight variable excludes East Germany, Finland, Sweden and Austria and includes national weights for each sample with adjustment to the standard size.

v17 - WEIGHT EURO 12 +

W9: WEIGHT EURO 12 +

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of all the European Community countries in their historic composition.

This weight variable is the same as WEIGHT EUROPE 12 but includes East Germany as well as national weights for each sample with adjustment to the standard size. Finland, Sweden and Austria are excluded in this variable.

v18 - WEIGHT EURO +3

W10: WEIGHT EURO +3

This variable contains weights that adjust each national sample of the three new member countries Finland, Sweden and Austria to its nation's share in the total population of these three countries. The respective national weights and the adjustment to the standard size are included. All other countries are weighted by "zero".

v19 - WEIGHT EUROPE 15

W11: WEIGHT EUROPE 15

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of all the European Community countries. East Germany and Northern Ireland are treated as separate samples. The national weights for each sample are included and, unlike the "EUROPEAN WEIGHT" in earlier Eurobarometer up to 31, also contains the adjustment to the standard size.

v20 - Q1 NATIONALITY - BELGIUM

Q.1

What is your nationality? Please tell me the country (or countries) that apply.

(MULTIPLE ANSWERS POSSIBLE)

(If "other countries" or "DK" CLOSE INTERVIEW)

Q.1_1 Belgium

0 Not mentioned

v40 - Q3 PREFERRED NATIONAL TV

Q.3

Could you please tell me what is ...?

(READ OUT)

Q.3_c

... your preferred national TV channel (ONE ANSWER ONLY):

in France (FR):

- 1 TF1
- 2 FRANCE 2/ANTENNE 2
- 3 FRANCE 3/FR3
- 4 CANAL+
- 5 ARTE
- 6 M6
- 7 LA CINQUIEME
- 8 LES CHAINES CABLEES
- 9 RTL
- 98 NE SAIT PAS
- 99 AUTRES
- 100 AUCUNE

in Belgium (BE):

- 1 TV1 (BRT1)
- 2 TV2 (BRT2)
- 3 VTM
- 4 VT4
- 5 Kanaal 2 (Ka2)
- 6 La Une (RTBF)
- 7 21 (Tele 21)
- 8 RTL-TVi
- 9 CLUB RTL
- 99 Autre
- 100 Aucune

in Netherlands (NL):

- 1 Nederland 1
- 2 Nederland 2
- 3 Nederland 3
- 4 Nederland 1 and 2
- 5 Nederland 1 and 3
- 6 Nederland 2 and 3
- 7 Nederland 1, 2 and 3
- 8 Nederland (unspecified)

- 9 Dutch-language channels (unspecified)
- 10 Broadcasting corporation on Nederland 1 (AVRO, KRO, NCRV)
- 11 Broadcasting corporation on Nederland 2 (TROS, EO)
- 12 Broadcasting corporation on Nederland 3 (VARA, VPRO)
- 13 Broadcasting corporation - NOS
- 14 Commercial channels (unspecified)
- 15 RTL 4
- 16 RTL 5
- 17 RTL (unspecified)
- 18 Veronica
- 19 SBS 6
- 20 TV 10 Gold
- 21 Eurosport
- 22 Discovery
- 23 CNN
- 24 MTV
- 25 The Music Factory
- 26 Filmnet
- 27 BRT 1
- 28 BRT 2
- 29 BRT (unspecified)
- 30 BBC 1
- 32 BBC (unspecified)
- 33 Duitsland 1, ARD
- 34 Duitsland 2, ZDF
- 35 Duitsland 3, WDR
- 37 Duitsland 3
- 38 Duitsland (unspecified)
- 99 Others
- 100 None

in Germany - West (DE_W):

- 1 ARD, Erstes Deutsches Fernsehen
- 2 ZDF
- 3 B1, third TV program of SFB
- 4 Bayerisches Fernsehen, third TV program of BR
- 5 Fernsehen Brandenburg, third TV program of ORB
- 7 MDR Fernsehen, third TV program of MDR
- 8 N3, third TV program of NDR and RB (Radio Bremen)
- 9 Sudwest 3, third TV program of SDR, SR and SWF
- 10 WDR Fernsehen, third TV program of WDR
- 11 Austria: ORF 1 Fernsehen
- 12 Austria: ORF 2 Fernsehen
- 13 Switzerland: DRS, SR, SI Fernsehen
- 14 3 SAT
- 15 1A Fernsehen
- 16 Arte, German-French culture channel

- 17 CNN International
- 18 DSF, German sports TV
- 19 euroNEWS
- 20 Eurosport
- 24 KABEL 1
- 25 MTV Europe
- 26 NBC Superchannel
- 27 Nickelodeon
- 28 n-tv
- 29 Premiere
- 30 PRO SIEBEN, Pro 7
- 31 RTL Television/RTL Plus
- 32 RTL 2
- 33 Super RTL
- 34 SAT 1
- 35 TV 5
- 38 VIVA
- 39 VIVA 2
- 40 VH-1
- 41 VOX
- 44 Tele Regional Passau
- 98 none of these
- 99 other TV channels
- 100 None

in Italy (IT):

- 1 RAI 1
- 2 RAI 2
- 3 RAI 3
- 4 CANALE 5
- 5 RETE 4
- 6 ITALIA 1
- 7 TELEMONTecARLO
- 8 VIDEOMUSIC
- 9 ODEON
- 10 ITALIA 7
- 13 TELE +1
- 14 TELE +2
- 15 TELE +3
- 16 MTV
- 99 OTHERS
- 100 NONE

in Luxembourg (LU):

- 0 NA

in Denmark (DK):

- 1 DR TV
- 2 TV 2
- 3 TV 3
- 4 Udenlandsk Station/Kanal
- 99 Andre
- 100 Ingen/ubesvaret

in Ireland (IE):

- 1 RTE1
- 2 Network 2
- 3 BBC1
- 4 UTV
- 5 Sky
- 6 Channel 4
- 7 Discovery
- 8 HTV

v44 - Q4 INFORMATION SOURCE 1 - FREQUENCY

Q.4

For each of the following sources of information, please tell me if, nowadays, you use it regularly (every time or nearly every time it appears), occasionally (about half of the times it appears), rarely (less often), or never.

(SHOW CARD / READ OUT)

Q.4_a National (television, radio, newspaper or magazine) issue 1

France: La Marche du siecle, France 3, mercredi 20h30

Belgium: RTBF Mise au point (dimanche midi)

Netherlands: De Telegraaf

West Germany: Tagesthemen (ARD, taglich um 22.30 Uhr)

Italy: Target (Canale 5, ore 22,40)

Luxembourg: 1 bis 7 (Dimanches soirs 19.00-20.00 RTL Tele Letzebuerg)

Denmark: TV-Avisen (DR TV), kl, 18.30 og 21.00

Ireland: Primetime, 9.30 pm RTE 1

Great Britain: Panorama (BBC1, Mon, 9.30 pm)

Northern Ireland: Counterpoint, 10.40 pm UTV

Greece: Antenna L'Heure de la Verite, mercredi, 23,30

Spain: Informe semanal/TVE 1/Sabados a las 21.30

Portugal: Magazine, Acontece (programa diario, 22.35 h, TV2)

East Germany: Tagesthemen (ARD, taglich um 22.30 Uhr)

Finland: MTV3, Huomenta Suomi

Sweden: Striptease

Austria: Kronenzeitung

v116 - Q20 BUILD EUROPE TOGETH REACTION - FIRST

Q.20.a

Concerning this concept; If I say to you "LET'S BUILD EUROPE TOGETHER", which of the following phrases best describes your first reaction?

(SHOW CARD - ONLY ONE ANSWER)

- 0 NA
- 1 This fills me with enthusiasm
- 2 If all the citizens of Europe work together, it will be successful
- 3 It is really what we will have to do
- 4 It is attractive but it seems rather difficult
- 5 It leaves me cold
- 6 It's been talked about for a long time but nothing seems to happen
- 7 It's impossible, it's just a dream
- 8 It irritates me because I'm against European integration
- 9 Other (SPONTANEOUS)
- 10 DK

v431 - Q32 EU REG DEV POL IF EASTERN MEMBERSHIP

Q.32

If countries in Eastern and Central Europe become members of the European Union, what do you think the European Commission should do for all the less developed regions of the European Union? Here are two different opinions, which one comes closest to your own?

(SHOW CARD - READ OUT)

- 1 A. Give aid to all the less developed regions, based on the same criteria as today, even if the costs of this aid will be much higher because countries in Eastern and Central Europe have become members
- 2 B. Give aid to all the less developed regions, based on stricter criteria than today, in order to limit the increased costs of this aid, because countries in Eastern and Central Europe have become members
- 3 Countries in Eastern and Central Europe should not become members of the European Union (SPONTANEOUS)
- 4 DK

v472 - Q40 EU FEDERAL ORGANISATION - YES/NO

Q.40

A number of countries are organized in a "federal" manner. In these countries, for example Austria, Belgium and Germany, the national government and parliament are responsible, among other things, for foreign affairs, defense and monetary policy, while regional governments and parliaments are responsible for certain other policy domains, especially education and cultural affairs. Do you think that on the occasion of the reform of its institutions in 1996, the European Union should be organized in a similar manner or not?

1 Yes

2 No

v475 - Q41 EUROP UNIF FAVOR - OFFICE WORKERS

Q.41

Not everybody shares the same opinion with regard to European unification: some people are generally more in favor of European unification and others are generally less in favor. For each of the following occupations and groups of people, please tell me ...

A) ...if you think that they tend to be more in favor or less in favor of European unification than most people?

B) ...and if you think they are benefiting more or less than most people from European unification?

Q.41A.b office workers

- 1 More in favor
- 2 Less in favor
- 3 DK

v485 - Q41 EUROP UNIF FAVOR - STUDENTS

Q.41

Not everybody shares the same opinion with regard to European unification: some people are generally more in favor of European unification and others are generally less in favor. For each of the following occupations and groups of people, please tell me ...

A) ...if you think that they tend to be more in favor or less in favor of European unification than most people?

B) ...and if you think they are benefiting more or less than most people from European unification?

Q.41A.g pupils and students

- 1 More in favor
- 2 Less in favor
- 3 DK

v502 - Q41 EUROP UNIF BENEFIT - PPL VOTING RGHT

Q.41

Not everybody shares the same opinion with regard to European unification: some people are generally more in favor of European unification and others are generally less in favor. For each of the following occupations and groups of people, please tell me ...

A) ...if you think that they tend to be more in favor or less in favor of European unification than most people?

B) ...and if you think they are benefiting more or less than most people from European unification?

Q.41B.o people who tend to vote for the right

- 1 Benefit more than most people
- 2 Benefit less than most people
- 3 DK

v556 - D11 AGE RECODED - 6 GROUPS

D.11. How old are you? - Recoded: 6 categories

This variable collapses answers to D.11 into six age groups

- 1 15-24 (years)
- 2 25-34 (years)
- 3 35-44 (years)
- 4 45-54 (years)
- 5 55-64 (years)
- 6 65 and more (years)

v591 - D29 INCOME HH

D.29

We also need some information about the income of this household to be able to analyze the survey results for different types of households. Here is a list of income groups.

(SHOW INCOME CARD)

Please count the total wages and salaries PER MONTH of all members of this household; all pensions and social insurance benefits; child allowances and any other income like rents, etc... Of course, your answer as all other replies in this interview will be treated confidentially and referring back to you or your household will be impossible. Please give me the letter of the income group your household falls into before tax and other deductions.

v592 - D29 INCOME HH - HARMONISED

D.29 Household income - HARMONIZED

This variable collapses answers to D.29 into four groups representing approximate quartiles.

- 1 - - (Lowest income quartile)
- 2 - (Next to lowest income quartile)
- 3 + (Next to highest income quartile)
- 4 + + (Highest income quartile)
- 5 DK/refusal

Note:

See D.29 for complete question text

v609 - P6 SIZE OF LOCALITY

P.6. (Objective) Size of locality

0 NA

in France (FR):

- 1 < 2000
- 2 2000 < 20000 Inhabitants
- 3 20001 < 100000 Inhabitants
- 4 > 100000 Inhabitants
- 5 Paris

in Belgium (BE):

- 1 Grand Centre
- 2 Localite Urbaine
- 3 Localite Secondaire
- 4 Autre Localite

in Netherlands (NL):

- 1 < 5000 Inhabitants
- 2 5000 < 10000 Inhabitants
- 3 10000 < 20000 Inhabitants
- 4 20000 < 50000 Inhabitants
- 5 50000 < 100000 Inhabitants
- 6 100000 < 400000 Inhabitants
- 7 > 400000 Inhabitants

in Germany - West (DE_W):

- 1 < 2000 Inhabitants
- 2 2000 < 5000 Inhabitants
- 3 5000 < 20000 Inhabitants
- 4 20000 < 50000 Inhabitants
- 5 50000 < 100000 Inhabitants
- 6 100000 < 500000 Inhabitants
- 7 > 500000 Inhabitants

in Italy (IT):

- 1 < 10000 Inhabitants
- 2 10001 -- 100000 Inhabitants
- 3 100001 -- 250000 Inhabitants
- 4 > 250000 Inhabitants

in Luxembourg (LU):

- 1 < 2500 Inhabitants
- 2 2501 < 5000 Inhabitants

- 3 5001 < 10000 Inhabitants
- 4 10001 < 20000 Inhabitants
- 5 20001 < 50000 Inhabitants
- 6 > 50000 (Luxembourg Ville)

in Denmark (DK):

- 1 < 2000 Inhabitants
- 2 2000 < 4999 Inhabitants
- 3 5000 < 9999 Inhabitants
- 4 10000 < 19999 Inhabitants
- 5 20000 < 49999 Inhabitants
- 6 50000 < 99999 Inhabitants
- 7 > 100000 Inhabitants

in Ireland (IE):

- 1 < 2000 Inhabitants
- 2 2001 < 20000 Inhabitants
- 3 20001 < 100000 Inhabitants
- 4 > 100000 Inhabitants

in Great Britain (GB_GBN):

- 1 Metropolitan Country
- 2 Other 100 % Urban
- 3 Mixed Urban/Rural
- 4 Rural

in Northern Ireland (GB_NIR):

- 1 < 2000 Inhabitants
- 2 2001 < 20000 Inhabitants
- 3 20001 < 100000 Inhabitants
- 4 > 100000 Inhabitants

in Greece (GR):

- 1 < 2000 Inhabitants
- 2 2001 < 10000 Inhabitants
- 3 10001 < 50000 Inhabitants
- 4 50001 < 100000 Inhabitants
- 5 + 100001 Inhabitants

in Spain (ES):

- 1 < 2000 Inhabitants
- 2 2001 < 10000 Inhabitants
- 3 10001 < 50000 Inhabitants
- 4 50001 < 100000 Inhabitants
- 5 100001 < 300000 Inhabitants
- 6 300001 < 500000 Inhabitants
- 7 500001 < 1000000 Inhabitants

8 + 1000000 Inhabitants

in Portugal (PT):

- 1 < 100 Inhabitants
- 2 101 < 200 Inhabitants
- 3 201 < 500 Inhabitants
- 4 501 < 1000 Inhabitants
- 5 1001 < 2000 Inhabitants
- 6 2001 < 5000 Inhabitants
- 7 5001 < 10000 Inhabitants
- 8 10001 < 30000 Inhabitants
- 9 30001 < 100000 Inhabitants
- 10 100001 < 500000 Inhabitants
- 11 > 500000 Inhabitants

in Germany - East (DE_E):

- 1 < 2000 Inhabitants
- 2 2000 < 5000 Inhabitants
- 3 5000 < 20000 Inhabitants
- 4 20000 < 50000 Inhabitants
- 5 50000 < 100000 Inhabitants
- 6 100000 < 500000 Inhabitants
- 7 > 500000 Inhabitants

in Finland (FI):

- 1 Helsinki area
- 2 Turku, Tampere
- 3 Other town
- 4 Rural center

in Sweden (SE):

- 1 Less than 5000
- 2 5000 - 10000
- 3 10000 - 30000
- 4 30000 - 50000
- 5 50000 - 100000
- 6 100000 - 150000
- 7 more than 150000

in Austria (AT):

- 1 Rural
- 2 Mixed urban/rural
- 3 Urban
- 4 Metropolitan

Note:

East Germany: Starting with Eurobarometer 44.2bis the Eurobarometer are considering the new East German regional units as resulting from the regional reforms 1992-94. The new regional units on NUTS II level (Regierungsbezirke) for Sachsen-Anhalt are Dessau, Halle, and Magdeburg; the new units for Sachsen (Chemnitz, Dresden, Leipzig) are only considered starting with Eurobarometer 48. REGION I categories used in former surveys up to number 44.1 are based on ex-GDR administrative units (Bezirke) and are not comparable to the new categories even if identical names are used. The almost unchanged NUTS I unit (Bundesland) Sachsen-Anhalt in Eurobarometer REGION II for example was formerly only composed of Halle and Magdeburg The East German federal units (Neue Bundeslander) Brandenburg Mecklenburg-Vorpommern, and Thuringen are not subdivided on

v611 - P7 REGION II

P.7R Region II

Only in the case of West Germany "Region II" corresponds to the variable labelled "Region" in earlier Eurobarometers up to 31. If indicated, "Region II" units are consistent with the EUROSTAT nomenclature for regional statistics (NUTS).

in GB DK LU AT GB PT SE:

99 INAP - No Region II

Note:

East Germany: Starting with Eurobarometer 44.2bis the East German federal units (Neue Bundesländer) are not any more constructed from the ex-GDR administrative regional units (Bezirke). There may be minor changes in the real territorial outline of each unit in comparison with the categories as constructed in former Eurobarometer up to survey number 44.1.

Starting with Eurobarometer 34 and up to survey 61, NUTS 1 level data (REGION II) for the NETHERLANDS are not (re-)coded in accordance with the official EUROSTAT nomenclature of territorial unit statistics. The NUTS 2 level province ZEELAND should be coded as belonging to NUTS 1 region (landsdel) WEST instead of SOUTH Netherlands. Archive releases have been corrected from EB 51 onwards.

v614 - C1 OPINION LEADERSHIP INDEX

C.1. OPINION LEADERSHIP INDEX (Cognitive Mobilization Index)

- 0 NA
- 1 ++ high cognitive mobilization
- 2 +
- 3 -
- 4 -- low cognitive mobilization

Derivation:

This index is based on the answers to the following two questions:

1) Q.6.(V75) "When you hold a strong opinion, do you ever find yourself persuading your friends, relatives or fellow to share your views? Does this happen often, from to time, rarely, or never?"

2) Q.5.(V74) "When you get together with friends, would you say you discuss political matters frequently, occasionally or never?"

Respondents giving affirmative answers to both questions are labeled ++.

Respondents giving negative answers to both questions are labeled --.

Middle categories (+ and -) are constituted correspondingly.

This variable forms an indicator of an individual's potential to take an active role in the political process.

CODE 1: Coded 1 or 2 for V75 and 1 for V74

CODE 2: coded 3, 4, 5 or 0 for V75 and 1 for V74; or coded 1 or 2 for V75 and 2 for V74

CODE 3: coded 3, 4, 5 or 0 for V75 and 2 for V74; or coded 1 or 2 for V75 and 3, 4 or 0 for V74

CODE 4: Coded 3, 4 or 5 for V75 and 3 for V74; or coded 3 or 4 for V75 and 3, 4 or 0 for V74

CODE 0: coded 0 or 5 for V75 and 0 or 4 for V74

For a complete discussion of this variable and its correlates see Ronald Inglehart, THE SILENT REVOLUTION: CHANGING VALUES AND POLITICAL STYLES AMONG WESTERN PUBLICS (Princeton University Press, 1977).

v615 - C3 TYPOLOGY OF EUROPEAN ATTITUDES
 C.3. TYPOLOGY OF EUROPEAN ATTITUDES (TEA)

- 1 Positive
- 2 Ambivalent
- 3 Negative

Derivation:

Typology of European Attitudes is based on the answers to the following two questions:

1) Q.12.(V95) "Generally speaking, do you think that (our country's) membership of the European Union is...? A good thing; A bad thing; Neither good nor bad?" (MEMBERSHIP)

2) Q.11.(V94) "In general, are you for or against efforts being made to unify Europe? Are you...? For - very much; For - to some extent; Against - to some extent; Against - very much?" (UNIFICATION)

Positive Attitude: MEMEBERSHIP=Good + UNIFICATION=For...

Ambivalent Attitude: MEMEBERSHIP=Neither good nor bad, or MEMBERSHIP=Good + UNIFICATION=Against..., or MEMBERSHIP=Bad + UNIFICATION=For..., or DK/NA

Negative Attitude: MEMEBERSHIP=Bad + UNIFICATION=Against...

Note:

Original variable Q.12 recoded 1=1, 2=3, and 3=2 into V95 and is reflected in the following code

CODE 1: coded 1 for V95 and 1 or 2 for V94

CODE 2: coded 0 or 4 for V95; or coded 1 for V95 and 3, 4, 5, or 0 for V94; or coded 2 for V95; or coded 3 for V95 and 1, 2, 5, or 0 for V94; or coded 0 or 4 for V95 and 0 or 5 for V94

CODE 3: coded 3 for V95 and 3 or 4 for V94

v616 - C4 SOCIO PROFESSIONAL STATUS

C.4. SOCIO PROFESSIONAL STATUS

- 0 NA
- 1 Farmer & fisher
- 2 Professionals
- 3 Owner of a shop, craftsmen, other self employed position
- 4 Business proprietors, owner of a company
- 5 Employed professional
- 6 General management
- 7 Middle management
- 8 Employed position, working mainly at a desk
- 9 Employed position , not at a desk but traveling
- 10 Employed position, not at a desk but in a service job
- 11 Supervisors
- 12 Skilled manual workers
- 13 Other (unskilled) manual worker

Derivation:

Roughly half of the representative sample of the European Community public was without paid work. Basing cross-analyses on "occupation" (D.15A) would exclude half of the respondents from analysis. An alternative is to base analyses on a (non-Marxist) concept of "objective social class" using the occupation of the "person who contributes most to the household income" as reference.

In order to classify as many respondents as possible with respect to their socio-professional setting, a new classification was created called: "SOCIO PROFESSIONAL STATUS". For those in paid work it is based on their own present occupation. For those not in paid work, "former occupation" was used where applicable (retired, housewives having been in paid work in the past, temporarily not working, unemployed). For those never having been in paid work the occupation of the "person who contributes most to the household income" was used. If the head of household was not in work at the time of the interview his or her "former occupation" was used, where applicable.

SOCIO PROFESSIONAL STATUS is, consequently, a classification "as close to the respondent himself/herself as possible" but draws upon additional background information, to the extent necessary and available, in order to avoid a single measure of respondent socio-professional setting and to include the maximum number of respondents in the respective analyses.

For more details see standard report EUROBAROMETER 44, April 1996, Brussels, C.11 f.

C.5. (RECODED) EUROPEAN POLITICAL PARTY PREFERENCE

- 0 NA
- 1 PSE (Socialist Group)
- 2 PPE (Group of the European Peoples Party, Christian Democrats)
- 3 ELDR (Group of the European Liberal, Democratic and Reform Party)
- 4 GUE/NGL (Confederal Group of the European United Left / Nordic Green Left)
- 5 UFE (Group Union for Europe)
- 6 RDE (Group of the European Renewal and Democratic Alliance)
- 7 V (The Green Group in the European Parliament)
- 8 ARE (Group of the European Radical Alliance)
- 9 IEDN (Group of Independents for a Europe of Nations)
- 10 NI (Non-affiliated)
- 11 not represented

Note:

This index is based upon the vote intention question D.4: "If there were a "General Election" tomorrow (SAY IF CONTACT UNDER 18 YEARS: and you had a vote), which party would you vote for?" Answers are grouped according to the affiliation of the representatives of the respective party to a group in the European Parliament.

If a party was not represented in the European Parliament at the time the survey was carried out but had been represented before, its supporters are included in the European Parliament group that their party had previously been affiliated with. Supporters of parties represented in the European Parliament whose members (of the European Parliament) are not affiliated with any group are labeled N.I. Supporters of parties not represented in the European Parliament are labeled "other". Labels are presented in the order in which they occur in the "List of Members" of the European Parliament of 1994.

v619 - C20 EU DYNAMOMETER (FUTURE VS PRESENT)

C.20. EU-DYNAMOMETER (DIFFERENCE: FUTURE VERSUS PRESENT)

0 NA
 1 --
 2 -
 3 0
 4 +
 5 ++

Derivation:

Euro-Dynamometer is based on responses to the following two questions:

1) Q.14.a (V97) "In your opinion, how is the European Union, the European unification advancing nowadays?"

2) Q.14.b (V98) "And which corresponds best to what you would like?"
