## Acknowledgements

---

The Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Long term access to and usability of Eurobarometer primary data and documentation is provided in a cooperative arrangement between the Inter-University Consortium for Political and Social Research (ICPSR) and the GESIS Data Archive for the Social Sciences (DAS).

## Introduction and preliminary remarks

---

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

### Data access

Individual level micro data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS through the DBK data catalogue (<http://www.gesis.org/dbk>) and through the ZACAT online data portal (<http://zacat.gesis.org>). Access to the Eurobarometer primary data is also provided by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, as well as supported by the Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

### Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send bibliographic citations for each completed manuscript or thesis abstract to the providing data archive, GESIS or ICPSR. Please indicate in a cover letter which data (surveys and variables) were used.

### Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

## 1.1 Bibliographic information

### 1.1.1 Archive study numbers

GESIS: ZA5852

ICPSR: 36038

Under a co-operative arrangement for the archival processing and distribution of Standard & Special Eurobarometer, ICPSR and GESIS employ its own archive study identification number and persistent URL. Apart from that the datasets are completely congruent as far as identified by the same release version.

### 1.1.2 Title and archive subtitle

Eurobarometer 79.4

Social Climate, Development Aid, Cyber Security, Public Transport, Anti-microbial Resistance, and Space technology

May-June 2013

### 1.1.3 Principal investigator(s)

European Commission, Brussels;

DG Communication (COMM.A.1 'Research and Speechwriting')

### 1.1.4 Bibliographic citation and DOI reference

Publications based on data collections which are made available through ICPSR or GESIS should acknowledge those sources by means of bibliographic citations. To ensure that such source attributions are captured for social science bibliographic utilities, citations must appear in footnotes or in the reference section of publications. The bibliographic citation for this data collection is:

European Commission, Brussels: Eurobarometer 79.4, May-June 2013.

TNS opinion, Brussels [Producer];

GESIS, Cologne [Publisher]: ZA5852, dataset version 4.0.0, DOI:[10.4232/1.12730](https://doi.org/10.4232/1.12730) (2017).

The registered Digital Object Identifier (DOI) persistently identifies this dataset version with reference to former (or more recent) versions and potential errata and update documentation in the GESIS data catalogue (DBK).

## 1.2 Content

### 1.2.1 Abstract

This round of Eurobarometer surveys covers the following special topics: (1) social climate, (2) development aid (3) cyber security (4) public transport (5) anti-microbial resistance and (6) space technology.

In regard to social climate, respondents were asked about their life satisfaction, employment, opinions on healthcare and pension provisions, unemployment benefits, cost of living and asked about past present and future options on the affordability of housing and energy. Lastly thoughts were measured on EU investments and knowledge of the European Social Fund. The development aid section includes questions on the importance of helping developing countries, the Millennium Development Goals, future focus of development policy, and practicality of achieving development goals. Questions in the cyber security section asks about frequency of Internet use, devices used to access the Internet, online activities, confidence in the ability to engage in Internet transactions, online banking concerns, adjustments to Internet use based upon concerns, online harassment and knowledge of cybercrime risks. Queries of public transport/ urban mobility special topic asks about use of car, public transportation, cycling and walking, frequency of travel within cities, problems during travel, opinions on problems in the city, ways to improve city travel, measures to improve travel and responsibility for reducing traffic. Measures taken from the anti-microbial resistance section include use of antibiotics, how antibiotics are obtained, reason for taking antibiotics, knowledge about antibiotics, opinions on group responsibility and knowledge and opinions about use of antibiotics. Lastly, the space technology section asks about the role of space derived technologies, opinions on investing in human space exploration, consequences of climate change, opinions on whether linking space activities to education would encourage students to choose STEM careers, ready to use automated vehicles, opinions on whether space investment will lead to job creation, concerns about asteroids and space-based services, reasons for and against investing in space exploration.

Demographic and other background information collected includes age, gender, nationality, marital status and parental relations, occupation, age when stopped full-time education, household composition, ownership of a fixed or a mobile telephone and other durable goods, difficulties in paying bills, level in society, and Internet use. In addition, country-specific data includes type and size of locality, region of residence, and language of interview (select countries).

### 1.2.2 Topic classification

- International Institutions, Relations, Conditions
- Medicine
- Economic Policy, National Economic Situation
- Technology, Energy
- Communication, Public Opinion, Media

## 1.3 Universe

In all, Eurobarometer 79.4 interviewed 27.680 citizens in the 27 countries of the European Union (enlargement as of 2004/2007) and in Croatia (accession in July 2013). All respondents were residents in the respective country, nationals and non-national EU-citizens, and aged 15 and over. They were supposed to have sufficient command of one of the respective national language(s) to answer the questionnaire. Separate samples were drawn for Great Britain and Northern Ireland as well as for East and West Germany.

## 1.4 Sampling procedure

A multi-stage, random (probability) sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regional units in every country (Statistical Office of the European Community, EUROSTAT NUTS 2 or equivalent). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of starting addresses was selected from each sampled PSU at random. Further addresses were chosen systematically using standard random route procedures as every Nth address from the initial address. In each household, a respondent was drawn, at random, following the closest birthday rule. No more than one interview was conducted in each household.

The regular sample size (in the sense of completed interviews) is 1000 respondents per country, except the United Kingdom with separate samples for Great Britain (1000) and Northern Ireland (300), Germany with separate samples for the Eastern (500) and the Western part (1000), and Luxembourg, Cyprus (Republic) and Malta with 500 interviews each. The effective number of realized interviews in this round is indicated in table 1.

## 1.5 Fieldwork

From May 24 to June 9, 2013, TNS opinion carried out the fieldwork for this Eurobarometer, at the request of the European Commission, Directorate General Communication. TNS opinion is based in Brussels, Belgium, and coordinates the fieldwork carried out through its network of national institutes:

Table 1: Participating countries (regions) and fieldwork information for Eurobarometer 79.4

## 1.6 Mode of data collection

In all countries, fieldwork was conducted on the basis of detailed and uniform instructions prepared by TNS opinion. Interviews were conducted face-to-face in people's home in the respective national language. As far as the data capture is concerned, CAPI (Computer Assisted Personal Interview) was used in those countries where this technique was available.

Equivalent French and English basic questionnaires were developed for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country. Back-translation procedures were applied for controlling semantic equivalence. Multi-language questionnaires are applied if appropriate (Belgium, Luxembourg, Spain, Finland, Estonia, Latvia and Malta).

In each country only the national language version(s) of the questionnaire is (are) used; in countries with more than one official language, the language version is selected at the beginning of the interview.

## 1.7 Weighting

In general, the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis, a national weighting procedure, using marginal and intercellular weighting, is applied. As such, in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The population size weighting factors correct for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country or lower level area sample (Great Britain and Northern Ireland, East and West Germany) is represented in proportion to its population size within different groupings according to the historical states of European unification (e.g. founder members, new members, Euro zone countries) in the case of the EUROPEAN WEIGHTS, as well as within the United Kingdom (WEIGHT UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31) or Germany as a whole (WEIGHT GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European

Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general, all countries or samples which do not belong to the respective group under consideration are excluded from calculation. The special weights for the United Kingdom and Germany do exclude all other countries from calculation starting with Eurobarometer 62. The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2, a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 4) are weighted separately, as documented in the respective study and weight variable description. In some surveys, special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

**Eurobarometer 79.4** provides three (post-stratification) NATION WEIGHTS: W1 (WEIGHT RESULT FROM TARGET) for separate analysis or comparison of individual samples (countries or regions on sub-national level), W4 (WEIGHT UNITED KINGDOM ONLY) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole, and W3 (WEIGHT GERMANY ONLY), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. W3 and W4 exclude all other countries from calculation, but include the post-stratification factors for the United Kingdom and Germany respectively.

Starting with Eurobarometer 75.4 and in accordance with former practice up to Eurobarometer 61, the archive started to derive (see 1.8. Data preparation) three additional weights W3A, W4A, W3A\_W4A in order to provide for the analysis of the United Kingdom and/or Germany as a whole together with all other samples, as separate countries (samples). W3A (WEIGHT RESULT FROM TARGET – UNITED GERMANY) combines the weighting factors for Germany as a whole (redressment factors plus populations size factors East/West) and the redressment factors for all other countries (Great Britain and Northern Ireland separated). W4A (WEIGHT RESULT FROM TARGET – UNITED KINGDOM) combines the weighting factors for the United Kingdom as a whole (redressment factors plus populations size factors) and the redressment factors for all other countries (Germany East and West separated). W3A\_W4A (WEIGHT RESULT FROM TARGET – NATION) combines the weighting factors for the United Kingdom as a whole, the weighting factors for Germany as a whole), and the redressment factors for all other countries. Unlike the originating weights, W4 (WEIGHT UNITED KINGDOM ONLY) and W3 (WEIGHT GERMANY ONLY), all countries are included in calculations.

The EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries, of accession or candidate countries, and of Euro zone countries, representing different historical states of European integration (e.g. EU6 = six founding members) . All post-stratification factors are included.

Table 2: Overview of population size weights on European level

European Weights in Eurobarometer 79.4	Function
W5 to W9, W11, W14, W22	grouping EU member countries
W10, W13, W18, W24	grouping new member countries
-	grouping candidate/accession countries
W23	grouping member + candidate/accession countries
W29, W30, W81, W82, W84, W89, W90	grouping (non-)Eurozone countries
wextra	extrapolating population size (15+) for each country

For more detailed information on the individual weights please see the corresponding variable description.

## 1.8 Data preparation

The data received by GESIS from TNS opinion were checked for completeness, missing data and duplicate records, for illegal (wild) codes and for (formal) consistency of response patterns and question routing. Errors discovered by these procedures are documented or corrected, as a general rule after consulting related additional documentation (e.g. tabular reports) or the data provider. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable DDI-XML compliant documentation was created for this dataset by GESIS.

Starting with Eurobarometer 76.1, the traditional variable naming by serial V-numbers (V1 to Vn) has been replaced by a system based on question and item numbers in the questionnaire and elsewhere on standard mnemo-technicals. The dot used in the original TNS variable names for multiple response dummy variables is replaced by underscore in view of potential software incompatibilities.

The archive identification variables comprise the archive study identification number ('studyno'), the digital object identifier ('doi') of the present dataset version, the version number and date ('version') and the edition type ('edition'). A unique case id ('uniqid') for the complete dataset has been constructed from the TNS country id (digits 1-2) and the TNS case/respondent id (digits 3-8).

Three country/sample identification variables are supplied, maintaining the original country/sample codes ('tncntry'), applying the established archive standard codes for the Eurobarometer series ('country'), and an alphanumerical variable applying the ISO 3166-1 alpha-2 codes ('isocntry') with adaptations for Great Britain and Northern Ireland (ISO 3166-2), for East and West Germany, and for Northern Cyprus (Turkish Cypriot Community).

GESIS added 'Inappropriate' (INAP) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the original questionnaire was adhered to for (almost) every respondent. An additional INAP category was defined whenever a question or group of questions were not surveyed in one or more countries, or if variables refer to country specific items (e.g. region variable P7).

Users should note that answers to multiple-response questions are (originally) represented by a series of binary 'dummy' variables (i.e. variables which take on values of one and zero only), creating separate 'dummy' variables also to explicitly represent 'Don't know', 'No answer/refusal' or other residual responses, such as 'None of the above'. The archive has recoded these residual responses in the case of uncommon minor inconsistencies in accordance with the series of substantial answers.

GESIS has recoded the missing answers (NA) represented in the original data set by blanks (system missing) to standard values. Their practically complete absence suggests that eventual cases of any not explicitly coded item non-response might be collapsed with the DK (don't know) category.

Question text and contingency text appearing in the variable description is taken from the English language version of the basic (bilingual) questionnaire (master questionnaire). Coding schemes and other documentation are based on the English language version of the basic questionnaire or on the respective SPSS data definition statements as provided by TNS opinion. In case of any discrepancy between questionnaires, SPSS definitions and data regarding the coding scheme of a variable, the archive, as a general rule, carried out any correction in agreement with the data provider.

If the documentation for country-specific questions or answer categories is provided in another language than English, the archive documents the original language wording and supplies the English translation in brackets.

Region NUTS 2 categories for Portugal have been edited and adapted to changes as of 2002 (NUTS version 2003) which are reflected in Eurobarometer starting with wave 62 (confirmed by TNS). Region NUTS 1 categories for Greece have been edited correcting for the non-coverage of Ionian and Aegean Islands starting with Eurobarometer 62 (confirmed by TNS).

P7 (REGION – NUTS CODES) – variables 'nuts' and 'nutslvl': The integrated NUTS variable has been derived by the archive from the original TNS country-wise P7 variables in accordance with NUTS units and (alphanumeric) codes defined in the Nomenclature of Territorial Units for Statistics. For each country the lowest subdivision level has been considered insofar consistent with or clearly mappable to one of the NUTS levels as valid for the relevant time period ([http://epp.eurostat.ec.europa.eu/portal/page/portal/nuts\\_nomenclature/history\\_nuts](http://epp.eurostat.ec.europa.eu/portal/page/portal/nuts_nomenclature/history_nuts)).

Original coding for p13be (LANGUAGE OF INTERVIEW – BELGIUM) is reversed, coding almost all respondents from NUTS 1 regions Wallonia and Brussels as 'Dutch' and almost all respondents in the Flemish region as 'French'. The coding has been corrected by the archive.

W3A/W4A (NATION WEIGHTS) – variables 'w3a'/'cntry\_de', 'w4a'/'cntry\_gb', 'w3a4a'/'nation': Starting with Eurobarometer 62 the original SPECIAL WEIGHTS for the UNITED GERMANY (East + West) and the UNITED KINGDOM (Great Britain + Northern Ireland) automatically exclude all other samples/countries from the calculation. In accordance with former practice up to Eurobarometer 61, the archive now started to derive three additional weights (W3A, W4A, W3A\_W4A) in order to provide for the analysis of the United Kingdom and/or Germany as a whole together with all other samples, as separate countries (nations). They combine the weights W3 (population size + redressment factor for Germany) or/and W4 (population size + redressment factor for the United Kingdom) with W1 (redressment factor for all other countries).

All INDEX and TOTAL variables have been checked and documented accordingly.

More detailed information on data preparation, harmonization or regarding inconsistencies is noted on variable level, if applicable.

## 1.9 Further remarks

Topical module QA (Social climate) replicates questions asked in the context of Eurobarometer 77.4 (QB) and 73.5 (QB). Topical module QB (Development aid) partly replicates the corresponding module in Eurobarometer 77.4 (QA). Topical module QC (Cyber security) largely replicates the corresponding module in Eurobarometer 77.2 (QE). Topical module QE (Anti-microbial resistance) replicates the corresponding module in Eurobarometer 72.5 (QD).

Weights W15 (WEIGHT EU AC2 + CC1) and W19 (WEIGHT EU CC) were not coded in the original data delivery and have been dropped from the dataset.

No data are available for protocol items p8 (postal code), p9 (sample point number), p10 (interviewer number) and p11.

## 2 Eurobarometer series description

---

### 2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

### 2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general, they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; 'Attitudes towards Europe' (GESIS study ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

### 2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He had the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999, the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papacostas as head of unit between 2003 and 2010.

At present, the Eurobarometer surveys are carried out on the general responsibility of the European Commission Directorate-General Communication, COMM.A.1 'Strategic Communications', with Renaud Soufflot de Magny as acting head of the unit and David Voidies as head of the Eurobarometer sector.

The special topic modules are requested by the respectively responsible EC Directorate General, as regards the content. Since 2007, the European Parliament is commissioning its own survey ("Parlemeter") through the Public Opinion Monitoring Unit of the European Parliament, in close cooperation with the DG COMM unit and within the same survey framework.

The main survey results are regularly published on the European Commission's Public Opinion website

(<http://ec.europa.eu/COMMFrontOffice/PublicOpinion/index.cfm>) in official standard and special topic reports; detailed tabular reports are published through the European Union Open Data Portal (<https://open-data.europa.eu/en/data/>).

## 2.4 Development of geographical and population coverage

In all European Union (formerly European Communities) member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founding members and in accordance with the enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics, starting in 1999 (EB51.1). Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001–2004) and then all included in the Standard Eurobarometer series, even before starting the accession process (e.g. Turkey or Macedonia). Further countries are continuously added in accordance with the EU membership application and accession process.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriot Community (Northern Cyprus) since 2004 for selected standard and topical waves.

Table 3: EU enlargement and countries covered by Standard and Special Eurobarometer

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 4: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24, 16-30	17, 28.1, 34.2, 47.2OVR, 55.1OVR, 85.2OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.2OVR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)
Sampling experiment	Non-Nationals	41.0

## 2.5 Standard question program and special topics

The Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently, Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990), additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues (table 5). Selected subsets of standard trend questions appear in the context of related special topics (e.g. "The Future of Europe" or "European Parliament Eurobarometer").

Table 5: Overview of Eurobarometer surveys with standard EU and trend question modules

Standard and EU trend surveys	Fieldwork	GESIS Study ID	Standard Report	Subset	Special Topic

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

## 3 Dataset structure and standards

---

Archive processing and documentation of the Standard and Special Eurobarometer are based on standards agreed upon between the Inter-university Consortium for Political and Social Research (ICPSR) and the GESIS Data Archive department (formerly Zentralarchiv für Empirische Sozialforschung), which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable, it was adhered to standards once established for the Eurobarometer series in the course of the years.

### 3.1 Dataset structures

In general, the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of administrative/technical variables. These comprise the ARCHIVE and dataset ID variables (studyno1, studyno2, doi, version, edition, survey, split (if applicable), caseid, uniqid), the COUNTRY ID variables with several standard variables identifying the different countries (or sub-national samples) and relevant groups of countries (or sub-national samples) in the dataset, arranged in pairs with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric variable ('isocntry') is provided based on the ISO 3166 country code standard (see 1.8).

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). Starting with Eurobarometer 76.1, the traditional variables naming by serial V-numbers (V1 to Vn) is replaced by a system based on question and item numbers in the questionnaire and elsewhere on standard mnemo-technicals (see 1.8). Likewise, from survey 76.1 onwards, constructed total or index variables, usually as provided by the fieldwork institute, are listed right after the question variables on which they are based. The dataset is concluded by three additional weights and their corresponding NATION country variables 'w3a'/'cntry\_de', 'w4a'/'cntry\_gb', 'w3a4a'/'nation' (see 1.8).

Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 und up to wave 75 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

### 3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except for multiple response questions (see 1.8), questions with country specific answer categories and missing values.

#### 3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49, the integrated variables are retained but complemented by completely labeled country specific variables. The country

specific coding schemes and categories are maintained as a standard over time as long as the category schemes provided in the questionnaire remain comparable.

Starting with Eurobarometer 74.1, an additional standardized REGION variable 'nuts' (REGION – NUTS CODES) is constructed, integrating all participating countries with regional units defined in accordance with the EUROSTAT Nomenclature of Territorial Units for Statistics (NUTS). For each country the lowest available NUTS subdivision level is considered, whereby the hierarchical structure always implies all higher subdivision levels. The official NUTS codes are coded verbatim in accordance with the in each case valid (applicable) NUTS version as documented in the official EUROSTAT classification history (History of NUTS). A second variable indicates the lowest coded NUTS LEVEL 'nutslvl' for each country. All original regional subdivisions and categories remain coded separately and unchanged in the country-wise P7 variables. Details are documented with the respective country specific and/or integrated variable.

### 3.2.2 Missing values

In general, missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

As noted in chapter 1.8, missing answers (NA) represented in the original data set by blanks (system missing) have been recoded to standard values by GESIS. Their practically complete absence suggests that eventual cases of any not explicitly coded item non-response might be collapsed with the DK (don't know) category.

### 3.3 International documentation standard (DDI)

The study and variable level documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The variable level documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

## 4 Explanation of the variable documentation

---

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (COUNTRY CODE - ISO 3166). In the case of Greece the non-ISO abbreviation EL\* is used in parallel, as introduced by EUROSTAT as of NUTS version 2010.

AT	Austria	IE	Ireland
BE	Belgium	IT	Italy
BG	Bulgaria	IS	Iceland
CY	Cyprus	LT	Lithuania
CY-TCC	Turkish Cypriote Community	LU	Luxembourg
CZ	Czech Republic	LV	Latvia
DE	Germany (-1989)	ME	Montenegro
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	NO	Norway
FI	Finland	PL	Poland
FR	France	PT	Portugal
GB	United Kingdom	RO	Romania
GB-GBN	Great Britain	RS	Serbia
GB-NIR	Northern Ireland	SE	Sweden
GR / EL*	Greece	SI	Slovenia
HR	Croatia	SK	Slovakia
HU	Hungary	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded "real" values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission's official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

Header with DIGITAL OBJECT IDENTIFIER (DOI) linked to the study description in the GESIS Data Catalogue.	Eurobarometer 67.1 - February-March 2007 GESIS Study No. 4529 (v 3.0.1); doi: 10.4232/1.10983																																																																																																																																																																																																																																																																														
VARIABLE NAME (serial number assigned by the archive) and VARIABLE LABEL as defined in the dataset.	v77 - QA1 FEELING FULFILLED: PROFESSIONAL LIFE																																																																																																																																																																																																																																																																														
QUESTION NUMBER and full QUESTION TEXT from the basic questionnaire, including interviewer instructions. The numbers or letters that may appear together with the original question number reflect the item order (multiple item or multiple response questions), or indicate if a question was recoded (R) or summarized (T), or if asked only in a single country (country abbreviation).	Q.A1 ASK Q.A IN EU27  To what extent would you say that the life you live allows you to feel fulfilled in...? (SHOW CARD WITH SCALE - ONE ANSWER PER LINE) (READ OUT)  Q.A1_2 Your professional life  1 Totally fulfilled 2 Fairly fulfilled 3 Not very fulfilled 4 Not at all fulfilled 5 Not applicable (SPONTANEOUS) 6 DK 9 Inap. not EU27 (not coded 1 to 31 in V6)  Derivation: ... Note: ...																																																																																																																																																																																																																																																																														
CODE VALUES occurring in the data for this variable and complete ANSWER TEXT from the basic questionnaire. Code values may differ from the questionnaire specification due to standardization. Abbreviations commonly used in the code definitions are DK (don't know), NA (not ascertained) and INAP (inappropriate).	v77 by v7, Absolute Values (Row Percent), weighted by v8																																																																																																																																																																																																																																																																														
DERIVATION information refers to the construction principle of indices or other derived variables (not in the example). NOTE delineates additional explanatory text subsuming trend information (last appearance of the question) or archive remarks on data processing and other issues relevant for the understanding or application of the variable.	<table><tr><th></th><th>v77</th><th>1</th><th>2</th><th>3</th><th>4</th><th>5</th><th>6</th><th>N Sum</th><th>N Valid FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (M), i.e. percent on the basis of all cases (sum) and valid percent on the basis of the valid cases.																																																																																																																																																																																																																																																																															

## **5 Variable documentation**

**Variable, Label**

**Question Text (English Language)**

studyno1 - ARCHIVE STUDY NUMBER - DISTRIBUTOR

Archive study number – distributor

Study Number of the distributing data archive.

5852 GESIS STUDY ID ZA5852

studyno1

Value	Label	Missing	Count	Percent	Valid Percent
5852	GESIS STUDY ID ZA5852		27680	100.0	100.0
	Sum		27680	100.0	100.0
	Valid Cases		27680		

studyno2 - ARCHIVE STUDY NUMBER - PUBLISHER

Archive study number – publisher

Study number of the data archive which is publishing this data set version.

5852 GESIS STUDY ID ZA5852

studyno2

Value	Label	Missing	Count	Percent	Valid Percent
5852	GESIS STUDY ID ZA5852		27680	100.0	100.0
	Sum		27680	100.0	100.0
	Valid Cases		27680		

**doi - DIGITAL OBJECT IDENTIFIER**

## Digital object identifier

This variable holds the Digital Object Identifier (DOI) for the dataset at hand as registered via the *da|ra* registration agency for economic and social science data. Each dataset version (see variable 'version') has a unique persistent DOI.

For direct access to the complete archive dissemination package for this study, including new dataset versions, the DOI needs to be appended to the resolver service URL: <http://dx.doi.org/doi:10.4232/1.12730>

In terms of good scientific practice, the DOI is an important element for the correct citation of a dataset.

doi

Value	Label	Missing	Count	Percent	Valid Percent
doi:10.4232/1.12730			27680	100.0	100.0
	Sum		27680	100.0	100.0
	Valid Cases		27680		

## version - GESIS ARCHIVE VERSION &amp; DATE

GESIS archive version &amp; date

4.0.0 '2017-02-10'

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

For details of the version history and for information on errata in current or former dataset versions, please consult the GESIS data catalogue entry (study description) persistently referenced by the dataset DOI (Digital Object Identifier).

## version

Value	Label	Missing	Count	Percent	Valid Percent
4.0.0 (2017-02-10)			27680	100.0	100.0
	Sum		27680	100.0	100.0
	Valid Cases		27680		

## edition - DATASET EDITION

## Dataset edition

This variable identifies the type of archive release for the dataset at hand.

1 Archive pre-release

2 Archive edition

## edition

Value	Label	Missing	Count	Percent	Valid Percent
2	ARCHIVE EDITION		27680	100.0	100.0
	Sum		27680	100.0	100.0
	Valid Cases		27680		

## survey - SURVEY IDENTIFICATION

## Survey identification

The number identifying the Eurobarometer survey.

794 Eurobarometer 79.4 (May-June 2013)

## survey

Value	Label	Missing	Count	Percent	Valid Percent
794	Eurobarometer 79.4 (May-June 2013)		27680	100.0	100.0
	Sum		27680	100.0	100.0
	Valid Cases		27680		

caseid - TNS CASE ID

TNS case ID

The original non-unique case (interview) identification numbers as provided by the fieldwork institute (TNS). The unique respondent identification variable uniqid adds the original country identification codes (tnscntry) as a prefix to the original case ID numbers in order to make them unique.

Note:

Actual number is coded.

uniqid - UNIQUE RESPONDENT ID (CASEID BY TNS COUNTRY CODE)

Unique respondent ID (caseid by tnsctntry)

This unique respondent identification is composed of the original TNS country code and the original TNS interview number. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 04: Greece; 05: Spain; 06: Finland; 07: France; 08: Ireland; 09: Italy; 10: Luxembourg; 11: Netherlands; 12: Austria; 13: Portugal; 14: Sweden; 20: Germany West; 21: Germany East; 22: Great Britain; 23: Northern Ireland; 31: Bulgaria; 32: Cyprus (Republic); 33: Czech Republic; 34: Estonia; 35: Hungary; 36: Latvia; 37: Lithuania; 38: Malta; 39: Poland; 40: Romania; 41: Slovakia; 42: Slovenia; 46: Croatia). The remaining digits contain the country-specific questionnaire numbers.

Note:

Actual number is coded.

tnscntry - ORIGINAL TNS COUNTRY/SAMPLE ID

Original TNS country/sample ID

The original country identification codes as applied by the fieldwork institute (TNS).

isocntry - COUNTRY CODE - ISO 3166

Country code - in accordance with ISO 3166-1-alpha-2 country code

All surveyed countries and regions, i.e. including separate samples for East-/West-Germany, Great Britain/Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East/West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

Note:

Use of weighting factor w1 is optional.

## w1 - WEIGHT RESULT FROM TARGET

## w1 Weight result from target

This POST-STRATIFICATION WEIGHT is based on a comparison for each sample with the respective universe description. As such in all countries, gender, age, region and size of locality are introduced in the iteration procedure carried out by the fieldwork institutes.

British and Northern Irish as well as East and West German samples are weighted separately. The weight reproduces the real number of cases for each country. In terms of its general function it corresponds to former NATION WEIGHT II (until EUROBAROMETER 31 (March-April 1989)).

## w5 - WEIGHT EU6

## w5 Weight EU6

This POPULATION SIZE WEIGHT refers to the six EC founder members: France, Belgium, Netherlands, West Germany, Italy, and Luxembourg. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w5 must be applied whenever these six EC founder countries are to be analyzed altogether as a group.

## w9 - WEIGHT EU12+DE-E

## w9 Weight EU12 + DE-E

This POPULATION SIZE WEIGHT equals WEIGHT EU12 but in addition including East Germany (former German Democratic Republic) after the unification of Germany on October 3, 1990 (Eurobarometer 34 (October-November 1990)). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w9 must be applied whenever these twelve member countries are to be analyzed altogether as a group including the Eastern part of Germany (new German federal states).

## w13 - WEIGHT EU NMS 10

## w13 Weight EU NMS 10

This POPULATION SIZE WEIGHT only refers to the group of the ten new members as of the enlargement in 2004: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia and Slovenia. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w13 must be applied whenever these ten countries are to be analyzed altogether as a group.

## w14 - WEIGHT EU25

## w14 Weight EU25

This POPULATION SIZE WEIGHT adds Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia and Slovenia to the EU15 countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) group of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w14 must be applied whenever these 25 countries as of the 2004 enlargement are to be analyzed altogether as a group.

## w23 - WEIGHT EU27+HR (EU28)

## w23 Weight EU27 + HR (EU28)

WEIGHT EU27 + HR includes all 25 member countries after the 2004 enlargement, the new members as of 2007 Romania and Bulgaria, and Croatia as the forthcoming member as of July 2013. This POPULATION SIZE WEIGHT adjusts each national sample in proportion to its share in the total population aged 15 and over, of NATION GROUP EU27 + HR (eu28). The post-stratification weighting factors are included. Weight w23 must be applied whenever these countries are to be analyzed altogether as a group.

## w29 - WEIGHT EURO ZONE 15

## w29 Weight EURO ZONE 15

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2008. These are 15 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w29 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

## w82 - WEIGHT NON-EURO ZONE 16

## w82 Weight NON-EURO ZONE 16

This POPULATION SIZE WEIGHT separates the group of countries (Denmark, United Kingdom, Sweden, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Bulgaria, Romania) which did not introduce the EURO up to January 1, 2009. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w82 must be applied whenever these countries are to be analyzed altogether as a group.

## w84 - WEIGHT NON-EURO ZONE 17 - EU NMS 12

## w84 Weight NON-EURO ZONE 17 - EU NMS 12

This POPULATION SIZE WEIGHT separates the group of countries (Czech Republic, Hungary, Latvia, Lithuania, Poland, Bulgaria, and Romania) belonging to the 12 new members after the enlargement of January 2007 which did not introduce the EURO up to January 1, 2011. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w84 must be applied whenever these 7 countries are to be analyzed altogether as a group.

## wextra - WEIGHT EXTRAPOLATED POPULATION 15+

wextra Weight extrapolated population 15+

Weight wextra extrapolates the actual universe (population aged 15 or more) for each country (sample), i.e. this weight variable integrates all other available weights, but does not reproduce the number of cases in the data set.

## Note:

Extrapolated population figures as calculated by wextra do not always coincide with the population 15+ figures per country indicated in the technical specifications provided by TNS. In the case of EB 79.4 this is especially true for the figures for PT.

qb1 - DEVELOPMENT AID - IMPORTANCE

B. EU DEVELOPMENT AID AND MILLENIUM DEVELOPMENT GOALS

The EU provides development aid to assist certain countries outside the EU in their fight against poverty and in their development. EU development aid consists of the aid provided by both the European Commission and the national Governments of the EU Member States.

QB1

In your opinion, is it very important, fairly important, not very important or not at all important to help people in developing countries?  
(ONE ANSWER ONLY)

- 1 Very important
- 2 Fairly important
- 3 Not very important
- 4 Not at all important
- 5 DK

qb2 - DEVELOPMENT AID - EU AND THE ECONOMIC CRISIS

QB2

The EU (the European Commission and Member States) has promised to increase the level of its aid to developing countries. Given the current economic situation, which of the following statements best describes your opinion?

(READ OUT – ONE ANSWER ONLY)

- 1 We should increase aid to developing countries beyond what is already promised
- 2 We should keep our promise to increase aid to developing countries
- 3 We should not increase aid to developing countries even though it has been promised
- 4 We should reduce aid to developing countries as we can no longer afford it
- 5 DK

qb3 - EXTREME POVERTY IN THE WORLD - ESTIMATION

QB3

The current world population is around 7 billion people. Could you tell me approximately how many people in the world live in extreme poverty, that is on less than 1\$ a day?

(SHOW CARD – READ OUT – ONE ANSWER ONLY)

- 1 Less than 500 million
- 2 Between 500 million and 1 billion
- 3 Between more than 1 billion and 1.5 billions
- 4 Between more than 1.5 billions and 2 billions
- 5 Between more than 2 billions and 2.5 billions
- 6 More than 2.5 billons
- 7 DK

qb3t - EXTREME POVERTY IN THE WORLD - ASCERTAINMENT

Ascertainment of the estimation of extreme poverty in the world

- 1 Under-estimates the number of people living in extreme poverty
- 2 Correct estimation
- 3 Over-estimates the number of people living in extreme poverty
- 8 DK

Derivation:

This variable collapses answers to qb3 into three categories.

Respondents coded 1 or 2 in qb3 are coded 1 ("Under-estimates ...") in variable qb3t. Respondents who are coded 3 in qb3 are coded 2 ("Correct estimation") in qb3t. Respondents coded 4 to 6 in qb3 are coded 3 ("Over-estimates ...") in qb3t.

Note:

See qb3 for complete question text.

qb7\_1 - DEVELOPMENT GOALS: ERADICATE POVERTY AND HUNGER

In the year 2000, Heads of State or Government representing nearly all countries in the world agreed on Millennium Development Goals to improve the lives of people in developing countries by the year 2015.

QB7

For the following goals, please tell me if you think that it is fully achievable, partially achievable or not achievable worldwide in the next 10 years?

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE - READ OUT)

QB7\_1 Eradicate extreme poverty and hunger

- 1 Yes, it is fully achievable
- 2 Yes, it is partially achievable
- 3 No, it is not achievable
- 4 DK

qc4 - INTERNET USE ABILITY - SELF CONFIDENCE

ASK QC2 TO QC6 IF "EVER USE THE INTERNET", CODE 1 TO 7 IN QC1 – OTHERS GO TO QC7

QC4

How confident are you about your ability to use the Internet for things like online banking or buying things online?

(SHOW CARD – READ OUT – ONE ANSWER ONLY)

- 1 Very confident
- 2 Fairly confident
- 3 Not very confident
- 4 Not at all confident
- 5 DK
- 9 Inap. Never use the internet or DK (coded 8 or 9 in qc1)

Comparability:

qc10\_8 - CYBERCRIME CONCERN: BANKING FRAUD ONLINE

ASK QC9 TO QC13 IF "EVER USE THE INTERNET" CODE 1 TO 7 IN QC1 – OTHERS GO TO QD1

QC10

And how concerned are you personally about experiencing or being a victim of the following cybercrimes?

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE - READ OUT – ROTATE)

QC10\_8 Being a victim of credit card or banking fraud online

- 1 Very concerned
- 2 Fairly concerned
- 3 Not very concerned
- 4 Not at all concerned
- 5 DK
- 9 Inap. Never use the internet or DK (coded 8 or 9 in qc1)

Comparability:

qc13t - CHANGED PASSWORD LAST12M (SUMMARIZED)

Changed password during the past 12 months (summarized)

0 Not mentioned (none / DK)

1 Total 'Has changed'

9 Inap. Never use the internet or DK (coded 8 or 9 in qc1)

Derivation:

This variable summarizes responses to qc13\_1 to qc13\_4.

[qc13 Have you changed your password to access to any of the following online services during the past 12 months?

qc13\_1 Web-based e-mail

qc13\_2 Online social networks

qc13\_3 Shopping website (e.g. travel agents)

qc13\_4 Online banking websites]

Note:

See qc13 for complete question text.

qd7\_3 - URBAN TRAVEL EFFECTVNSS: ROAD USE CHARGES

QD7

How effective do you think each of the following measures would be to improve travel within cities...?

(SHOW CARD WITH SCALE - ONE ANSWER PER LINE – READ OUT)

QD7\_3 Additional charges for the use of specific roads at specific times

- 1 Very effective
- 2 Fairly effective
- 3 Not very effective
- 4 Not effective at all
- 5 DK

qe2a\_r3 - ANTIBIOTICS KNOWLEDGE: 1 CORRECT ANSWER

Knowledge about antibiotics: One correct answer

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes answers to qe2a\_1 to qe2a\_4. It resumes respondents who are coded one correct answer.

[qe2a For each of the following statements, please tell me whether you think it is true or false.

qe2a\_1 Antibiotics kill viruses

qe2a\_2 Antibiotics are effective against cold and flu

qe2a\_3 Unnecessary use of antibiotics make them become ineffective

qe2a\_4 Taking antibiotics often has side-effects such as diarrhea]

Note:

See qe2a for complete question text.

qe3b\_t - ANTIBIOTICS WARNING INFO: ADVICE (SUMMARIZED)

Source of warning information about antibiotics - advice (summarized)

- 1 Advice from a professional
- 2 Advice from family or friends
- 3 Advice from media or communication campaigns
- 9 Inap. Other or DK (coded 10 or 11 in qe3b)
- 99 Inap. Not receive information about not taking antibiotics in last 12 months (coded 2 in qe3a)

Derivation:

This variable collapses answers to qe3b into three categories.

Respondents coded 1 to 3 in qe3b are coded 1 (Advice from a professional) in variable qe3b\_t. Respondents who are coded 4 in qe3b are coded 2 (Advice from family or friends) in qe3b\_t. Respondents coded 5 to 9 in qe3b are coded 3 (Advice from media or communication campaigns) in qe3b\_t.

Note:

See qe3b for complete question text.

qf1\_1 - EU PRIORITIES FUTURE: HEALTH

F. SPACE DERIVED ACTIVITIES

This survey is about needs of European citizens in about 20 years. It envisages what technologies and services derived from space activities could be available in order to improve daily life and to address "grand challenges" that the world will face for the future.

QF1

ASK ALL

Which of the following, in 20 years' time, do you think should be the main priorities of the EU?

(SHOW CARD – READ OUT – ROTATE – MAX. 4 ANSWERS)

qf1\_5 - EU PRIORITIES FUTURE: ENERGY

F. SPACE DERIVED ACTIVITIES

This survey is about needs of European citizens in about 20 years. It envisages what technologies and services derived from space activities could be available in order to improve daily life and to address "grand challenges" that the world will face for the future.

QF1

ASK ALL

Which of the following, in 20 years' time, do you think should be the main priorities of the EU?

(SHOW CARD – READ OUT – ROTATE – MAX. 4 ANSWERS)

qf2\_16 - SPACE TECHNOLOGY ROLE: DK

QF2

In which of the following areas do you think space derived technologies and services will play an important role in 20 years' time?

qf5 - SPACE OBSERVATION HELPS PLANNING OUTDOOR ACTIVITIES

In 20 years' time, Earth observation from space and other technologies should help to create maps that indicate the probability of threats such as air pollution, water quality or contagious diseases.

QF5

To what extent would you be interested in using such information to plan travels and outdoor activities for you and your family?

(READ OUT – ONE ANSWER ONLY)

qf10 - SATELLITE BASED VEHICLE NAVIGATION - READY IN 20 Y

In 20 years' time, vehicles (e.g. cars, trucks, trains, ships, planes) will be able to operate without any direct human control. They will be guided by satellite based navigation systems.

QF10

In 20 years' time, to what extent would you be ready to use automated vehicles guided by satellite based navigation systems?

qf12 - SPACE OBSERVATION MONITORING COMMUNICATIONS

QF12

Which of the following statements best describes your view about the use of observations from satellites and unmanned aerial vehicles and the monitoring of communications to manage border control and fight organised crime in the EU?

(READ OUT - ONE ANSWER ONLY)

- 1 The use of this technology will improve security in the EU
- 2 The use of this technology will be a threat to privacy
- 3 Both of them (SPONTANEOUS)
- 4 None of them (SPONTANEOUS)
- 5 DK

qf15 - SPACE TECHNOLOGY REDUCING THREADS FRM ASTEROIDS ETC

QF15

To what extent do you think that space technologies can play a role in reducing threats like asteroids and comets impacts and space debris?

(READ OUT - ONE ANSWER ONLY)

- 1 A very important role
- 2 A fairly important role
- 3 Not a very important role
- 4 Not an important role at all
- 5 DK

qf16 - SPACE EXPLORATION - IMPORTANCE OF EU INVESTMENT

Now let's talk specifically about space exploration.

QF16

How important is it for you that the EU invests further in space exploration?

(READ OUT – ONE ANSWER ONLY)

- 1 Very important
- 2 Fairly important
- 3 Not very important
- 4 Not at all important
- 5 DK

d7r1 - MARITAL STATUS: 5 CAT (RECODED)

Marital status recoded to five categories with focus on partnership

- 1 (Re-)Married (coded 1 to 4 in d7)
- 2 Single living with partner (coded 5 to 8 in d7)
- 3 Single (coded 9 to 10 in d7)
- 4 Divorced or separated (coded 11 to 12 in d7)
- 5 Widow (coded 13 to 14 in d7)
- 6 Other (SPONTANEOUS)
- 7 Refusal (SPONTANEOUS)

Derivation:

This variable collapses answers to d7 into five categories.

[d7 Could you give me the letter which corresponds best to your own current situation?]

Note:

See d7 for complete question text.

d7r2 - MARITAL STATUS: 4 CAT (RECODED)

Marital status recoded to four categories with focus on marriage

- 1 Unmarried (coded 9 to 10 in d7)
- 2 (Re)Married/Single with partner (coded 1 to 8 in d7)
- 3 Divorced or separated (coded 11 to 12 in d7)
- 4 Widow (coded 13 to 14 in d7)
- 5 Other (SPONTANEOUS)
- 7 Refusal (SPONTANEOUS)

Derivation:

This variable collapses answers to d7 into four categories.

[d7 Could you give me the letter which corresponds best to your own current situation?]

Note:

See d7 for complete question text.

d8r1 - AGE EDUCATION: 11 CAT (RECODED)

Age when finished full-time education - recoded to 11 categories

- 1 Up to 14 years
- 2 15 years
- 3 16 years
- 4 17 years
- 5 18 years
- 6 19 years
- 7 20 years
- 8 21 years
- 9 22 years and older
- 10 Still studying
- 11 No full-time education
- 97 Refusal
- 98 DK

Derivation:

This variable collapses answers to question d8 for indicated ages lowest (2) to 14 and 22 to highest (66).

[d8 How old were you when you stopped full-time education?]

Note:

See d8 for complete question text.

d11r1 - AGE: 4 GROUPS (RECODED)

Age of respondent - recoded to four categories

- 1 15 - 24 years
- 2 25 - 39 years
- 3 40 - 54 years
- 4 55 years and older

Derivation:

This variable collapses answers to d11 into four categories.

[d11 How old are you?]

Note:

See d11 for complete question text.

d11r2 - AGE: 6 GROUPS (RECODED)

Age of respondent - recoded to six categories

- 1 15 - 24 years
- 2 25 - 34 years
- 3 35 - 44 years
- 4 45 - 54 years
- 5 55 - 64 years
- 6 65 years and older

Derivation:

This variable collapses answers to d11 into six categories.

[d11 How old are you?]

Note:

See d11 for complete question text.

d15a\_r1 - OCCUPATION OF RESPONDENT (RECODED)

Occupation of respondent - recoded to employment status

- 1 Self-employed (coded 5 to 9 in d15a)
- 2 Employed (coded 10 to 18 in d15a)
- 3 Not working (coded 1 to 4 in d15a)

Derivation:

This variable collapses answers to d15a into three categories.

[d15a What is your current occupation?]

Note:

See d15a for complete question text.

d15a\_r2 - RESPONDENT OCCUPATION SCALE (C14)

Occupation of respondent - scale (C14)

- 1 Self-employed (coded 5 to 9 in d15a)
- 2 Managers (coded 10 to 12 in d15a)
- 3 Other white collars (coded 13 or 14 in d15a)
- 4 Manual workers (coded 15 to 18 in d15a)
- 5 House persons (coded 1 in d15a)
- 6 Unemployed (coded 3 in d15a)
- 7 Retired (coded 4 in d15a)
- 8 Students (coded 2 in d15a)

Derivation:

This scale is based on a combination/selection of answers to variable d15a.

[d15a What is your current occupation?]

Note:

See d15a for complete question text.

d15b - OCCUPATION OF RESPONDENT - LAST JOB

D15B

ASK D15B IF "NOT DOING ANY PAID WORK CURRENTLY", CODES 1 to 4 in D15A

Did you do any paid work in the past? What was your last occupation?

SELF EMPLOYED

- 1 Farmer
- 2 Fisherman
- 3 Professional (lawyer, medical practitioner, accountant, architect, etc.)
- 4 Owner of a shop, craftsmen, other self-employed person
- 5 Business proprietors, owner (full or partner) of a company

EMPLOYED

- 6 Employed professional (employed doctor, lawyer, accountant, architect)
- 7 General management, director or top management (managing directors, director general, other director)
- 8 Middle management, other management (department head, junior manager, teacher, technician)
- 9 Employed position, working mainly at a desk
- 10 Employed position, not at a desk but travelling (salesmen, driver, etc.)
- 11 Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, etc.)
- 12 Supervisor
- 13 Skilled manual worker
- 14 Other (unskilled) manual worker, servant

15 Never did any paid work

99 Inap. Currently doing paid work (not coded 1 to 4 in d15a)

Note:

In accordance with former waves coding has been (correctly) shifted compared to the questionnaire.

Comparability:

Last trend: EB79.3, D15B

d15b\_r - OCCUPATION OF RESPONDENT - LAST JOB (RECODED)

Occupation of respondent: last job - recoded to employment status

- 1 Self-employed (coded 1 to 5 in d15b)
- 2 Employed (coded 6 to 14 in d15b)
- 3 Never paid work (coded 15 in d15b)
- 9 Inap. Currently doing paid work (not coded 1 to 4 in d15a)

Derivation:

This variable collapses answers to d15b into three categories.

[d15b Did you do any paid work in the past? What was your last occupation?]

Note:

See d15b for complete question text.

d40a\_r - HOUSEHOLD COMPOSITION: AGED 15+ (RECODED)

n of people in household aged 15 years or more - recoded to four categories

- 1 One
- 2 Two
- 3 Three
- 4 Four or more

Derivation:

This variable groups answers to question d40a.

[d40a Could you tell me how many people aged 15 years or more live in your household, yourself included?]

Note:

See d40a for complete question text.

d40t - HOUSEHOLD COMPOSITION: SIZE (SUMMARIZED)

n of people in household - summarized

- 1 One
- 2 Two
- 3 Three
- 4 Four
- 5 Five
- 6 Six
- 7 Seven
- 8 Eight
- 9 Nine
- 10 Ten
- 11 Eleven
- 12 Twelve
- 13 Thirteen
- 15 Fifteen

Derivation:

This variable summarizes d40a, d40b, and d40c.

[d40a Could you tell me how many people aged 15 years or more live in your household, yourself included?

d40b Could you tell me how many children aged 10 to 14 years old live in your household?

d40c Could you tell me how many children less than 10 years old live in your household?]

Note:

See d40a, d40b, and d40c for complete question text.

Generated by the Archive in accordance with former surveys.

d40t\_r - HOUSEHOLD COMPOSITION: SIZE A+B+C (RECODED)

n of people in household - recoded to four categories

- 1 One
- 2 Two
- 3 Three
- 4 Four or more

Derivation:

This variable groups the summarized variable d40t.

[d40a Could you tell me how many people aged 15 years or more live in your household, yourself included?

d40b Could you tell me how many children aged 10 to 14 years old live in your household?

d40c Could you tell me how many children less than 10 years old live in your household?]

Comparability:

See d40a, d40b, and d40c for complete question text.

d43t - PHONE AVAILABLE (SUMMARIZED)

Availability of mobile and/or landline phones - summarized

- 1 Mobile only (coded 1 in d43b and 2 in d43a)
- 2 Landline only (coded 1 in d43a and 2 in d43b)
- 3 Landline and mobile (coded 1 in d43a and 1 in d43b)
- 4 No telephone (coded 2 in d43a and 2 in d43b)

Derivation:

This variable summarizes answers to question d43a and d43b.

[d43a Do you own a fixed telephone in your household?

d43b Do you own a personal mobile telephone?]

Respondents coded 2 in d43a and 1 in d43b are coded 1 ("Mobile only") in d43t. Respondents coded 1 in d43a and 2 in d43b are coded 2 ("Landline only") in d43t. Respondents coded 1 in d43a and d43b are coded 3 ("Landline and mobile") in d43t. Respondents coded 2 in d43a and d43b are coded 4 ("No telephone") in d43t.

Note:

See d43a and d43b for complete question text.

d61r - LEVEL IN SOCIETY - SELF PLACEMENT (RECODED)

Self placement on level in society - recoded to three categories

- 1 Lower level (coded 1 to 4 in d61)
- 2 Middle level (coded 5 to 6 in d61)
- 3 Upper level (coded 7 to 10 in d61)
- 7 Refusal (SPONTANEOUS)

Derivation:

This variable collapses answers to d61 into three categories.

[d61 On the following scale, step '1' corresponds to "the lowest level in the society"; step '10' corresponds to "the highest level in the society". Could you tell me on which step you would place yourself?]

Note:

See d61 for complete question text.

d62\_3 - INTERNET USE FREQ: SOMEWHERE ELSE

D62

Could you tell me if...?

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE - READ OUT)

D62\_3 You use the Internet somewhere else (school, university, cyber-café, etc.)

- 1 Everyday/Almost everyday
- 2 Two or three times a week
- 3 About once a week
- 4 Two or three times a month
- 5 Less often
- 6 Never
- 7 No Internet access (SPONTANEOUS)

Comparability:

Last trend: EB79.3, D62

d62t1 - INTERNET USE - INDEX 1 (3 CAT)

Frequency of internet use - index with three categories

- 1 Everyday/Almost everyday (at least once coded 1 in d62\_1 to d62\_3)
- 2 Often/sometimes (at least once coded 2 to 5 in d62\_1 to d62\_3)
- 3 Never to all (coded 6 in d62\_1 to d62\_3)
- 9 Inap. Never and/or no access (codes 6 and/or 7 in d62\_1 to d62\_3)

Derivation:

This variable summarizes responses to d62 in three categories.

[d62 Could you tell me if...?

d62\_1 You use the Internet at home

d62\_2 You use the Internet at your place of work

d62\_3 You use the Internet somewhere else (school, university, cyber-café, etc.)]

Respondents coded 1 at least once in d62\_1 to d62\_3 are coded 1 in d62t1 ("Everyday/Almost everyday"). Respondents coded 2, 3, 4 or 5 in each variable d62\_1 to d62\_3 are coded 2 ("Often/sometimes") in d62t1. Respondents coded 6 ("Never") in each variable d62\_1 to d62\_3 are coded 3 ("Never to all") in d62t1. Respondents coded 6 at least once in d62\_1 to d62\_3 and coded 7 ("No internet access") in the other variable(s), or respondents coded 7 ("No internet access") in each variable d62\_1 to d62\_3 are coded 9 ("Inap. Never and/or no access (codes 6 and/or 7 in d62\_1 to d62\_3)") in d62t1.

Note:

See d62 for complete question text.

d62t2 - INTERNET USE - INDEX 2 (7 CAT)

Frequency of internet use - index with seven categories

- 1 Everyday/Almost everyday (at least once coded 1 in d62\_1 to d62\_3)
- 2 Two or three times a week (not coded 1 and at least once coded 2 in d62\_1 to d62\_3)
- 3 About once a week (not coded 1 to 2 and at least once coded 3 in d62\_1 to d62\_3)
- 4 Two or three times a month (not coded 1 to 3 and at least once coded 4 in d62\_1 to d62\_3)
- 5 Less often (not coded 1 to 4 and at least once coded 5 in d62\_1 to d62\_3)
- 6 Never/No access (coded 6/7 or coded 6 in d62\_1 to d62\_3)
- 7 No Internet access at all (coded 7 in d62\_1 to d62\_3)

Derivation:

This variable summarizes responses to d62.

[d62 Could you tell me if...?

d62\_1 You use the Internet at home

d62\_2 You use the Internet at your place of work

d62\_3 You use the Internet somewhere else (school, university, cyber-café, etc.)]

Respondents coded 1 at least once in d62\_1 to d62\_3 are coded 1 in d62t2 ("Everyday/Almost everyday"). Respondents coded 2 at least once in d62\_1 to d62\_3 and not coded 1, are coded 2 in d62t2 ("Two or three times a week"). Respondents coded 3 at least once in d62\_1 to d62\_3 and not coded 1 or 2, are coded 3 in d62t2 ("About once a week"). Respondents coded 4 at least once in d62\_1 to d62\_3 and not coded 1 to 3, are coded 4 in d62t2 ("Two or three times a month"). Respondents coded 5 at least once in d62\_1 to d62\_3 and not coded 1 to 4, are coded 5 in d62t2 ("Less often"). Respondents coded 6 ("Never") in each variable d62\_1 to d62\_3, or at least once coded 6 in d62\_1 to d62\_3 and coded 7 ("No internet access") in the other variable(s), are coded 6 ("Never/No access") in d62t2. Respondents coded 7 ("No internet access") in each variable d62\_1 to d62\_3 are coded 7 ("No internet access at all") in d62t2.

Note:

See d62 for complete question text.

## p6gb - SIZE OF COMMUNITY - UNITED KINGDOM

p6gb Objective size of community: United Kingdom

- 1 Rural
- 2 Urban
- 3 Metropolitan
- 99 Inap. (not GB-GBN/GB-NIR in isocntry)

Note:

The original variable separates data for Northern Ireland (codes 1-3) and Great Britain (codes 4-6). In order to facilitate analysis for the United Kingdom (GB) as a whole, corresponding categories have been coded together (matched).

For meaningful (descriptive) results this variable needs to be used for Great Britain and Northern Ireland separately (select if '9' OR '10' in country) or be weighted by special weighting variables for the UNITED KINGDOM (GB) w4 or w4a.

Comparability:

Last trend: EB79.3, P6

p6gb, weighted by w4

Value	Label	Missing	Count	Percent	Valid Percent
1	Rural		218	16.6	16.6
2	Urban		648	49.3	49.3
3	Metropolitan		448	34.1	34.1
99	Inap. (not GB-GBN/GB-NIR in isocntry)	M	0	0.0	
	Sum		1314	100.0	100.0
	Valid Cases		1314		

## p6gr - SIZE OF COMMUNITY - GREECE

p6gr Objective size of community: Greece

- 1 Rural
- 2 Semi-urban
- 3 Urban
- 4 Thessaloniki
- 5 Athens
- 99 Inap. (not GR in isocntry)

Comparability:

Last trend: EB79.3, P6

p6gr, weighted by w1

Value	Label	Missing	Count	Percent	Valid Percent
1	Rural		258	0.9	25.7
2	Semi-urban		126	0.5	12.6
3	Urban		224	0.8	22.4

p7it - REGION - ITALY NUTS 2 MOD

p7it Italy (EUROSTAT NUTS 2 LEVEL – modified) – Regioni

- 1 Piemonte & Valle d'Aosta / Vallée d'Aoste
- 2 Liguria
- 3 Lombardia (Lombardy)
- 5 Provincia Autonoma di Trento & Provincia Autonoma di Bolzano / Bozen
- 6 Veneto
- 7 Friuli-Venezia Giulia
- 8 Emilia-Romagna
- 9 Toscana (Tuscany)
- 10 Marche
- 11 Umbria
- 12 Lazio
- 13 Abruzzo & Molise
- 14 Campania
- 15 Puglia & Basilicata
- 17 Calabria
- 18 Sicilia (Sicily)
- 19 Sardegna (Sardinia)
- 99 Inap. (not IT in isocntry)

Note:

The combination of regions (Piemonte & Valle d'Aosta / Vallee d'Aoste; Abruzzo & Molise; Puglia & Basilicata) does not comply with the official EUROSTAT specifications for NUTS 2.

Starting with Eurobarometer wave 77 (NUTS version 2010 with regular amendment as of January 1, 2012) NUTS 1 codes for Italy have changed for North-East (ITH instead of ITD) and Center (ITI instead of ITE). The reason for this are minor boundary shifts on NUTS 2 and 3 level (ITI3: Marche and ITH5: Emilia Romagna).

Comparability:

Last trend: EB79.3, P7

## p7pt - REGION - PORTUGAL NUTS 2

p7pt Portugal (EUROSTAT NUTS 2 LEVEL) – Comissaoes de Coordenação regional + Regioes autonomas

- 1 Norte (North) [PT]
- 2 Centro (Center) [PT]
- 3 Lisboa (Lisbon)
- 4 Alentejo (Alentejo Region)
- 5 Algarve
- 99 Inap. (not PT in isocntry)

## Note:

The autonomous regions of the Azores (PT20 - Região Autónoma dos Açores) and of Madeira (PT30 - Região Autónoma da Madeira) are not covered.

Since 2002 the region “Lisboa e vale do tejo” is split up and the subregion “Lezíria do Tejo” reinstated to the “Alentejo” Region and the “Médio Tejo” and “Oeste” reinstated to the “Centro” Region. The relative frequencies for each region indicate that this is reflected in the Eurobarometer P.7 regions starting with Eurobarometer 62.0. The original label for category ‘3’ (“Lisboa e vale do Tejo”) has been edited accordingly. According to the NUTS 2 specifications for Portugal this now only includes “Grande Lisboa” and “Península de Setúbal”.

The official NUTS categories are coded and documented in the integrated alphanumeric NUTS CODES variable 'nuts'.

p7fi - REGION - FINLAND NUTS 3

p7fi Finland (EUROSTAT NUTS 3 LEVEL 2010) – Maakunnat / Landskap

- 1 Helsinki-Uusimaa
- 2 Varsinais-Suomi (Southwest Finland)
- 3 Satakunta
- 4 Kanta-Häme (Tavastia Proper)
- 5 Pirkanmaa (Tampere Region)
- 6 Päijät-Häme (Paijanne Tavastia)
- 7 Kymenlaakso (Kymi Valley)
- 8 Etelä-Karjala (South Karelia)
- 9 Etelä-Savo (Southern Savonia)
- 10 Pohjois-Savo (Northern Savonia)
- 11 Pohjois-Karjala (North Karelia)
- 12 Keski-Suomi (Central Finland)
- 13 Etelä-Pohjanmaa (Southern Ostrobothnia)
- 14 Pohjanmaa (Ostrobothnia)
- 15 Keski-Pohjanmaa (Central Ostrobothnia)
- 16 Pohjois-Pohjanmaa (Northern Ostrobothnia)
- 17 Kainuu
- 18 Lappi (Lapland) (not coded)
- 99 Inap. (not FI in isocntry)

Note:

The Åland Islands (FI200 - Landskapet Åland / Avenanmaan maakunta) are not covered.

Former regions of "Uusimaa" (FI181) and "Itä-Uusimaa" (FI182) have been consolidated to the region of "Helsinki-Uusimaa" (FI1B1) on January 1, 2011. The official NUTS codes have changed accordingly starting with NUTS version 2010 (regular amendment as of January 1, 2012). Eurobarometer did never code "Itä-Uusimaa" (East Uusimaa) separately. "Uusimaa" always included the capital area of Helsinki. For this reason the NUTS CODES variable 'nuts' is already coded in accordance with NUTS version 2010.

The NUTS version history documents a minor boundary shift between "Satakunta" (NUTS 2003: FI191; NUTS 2006/2010: FI196) and "Pirkanmaa" (NUTS 2003: FI192; NUTS 2006/2010: FI197). One municipality has been transferred between these NUTS level 3 regions. Please notice that the NUTS CODES variable 'nuts' is based on the NUTS 2006/2010 codes for "Satakunta" and "Pirkanmaa" although it could not be verified if and when the boundary shift is actually reflected in Eurobarometer data.

Please notice that weighted relative frequencies may vary considerably over time (compared across surveys). Weighted frequencies for NUTS2 are adjusted.

The official NUTS categories are coded and documented in the integrated alphanumeric NUTS CODES variable 'nuts'.

Comparability:

## p7fi\_r1 - REGION - FINLAND NUTS 2 (2003/2006)

p7fi\_r1 Finland (EUROSTAT NUTS 2 LEVEL 2003 / 2006) – Suuralueet / Storområden

- 1 Itä-Suomi (East Finland)
- 2 Etelä-Suomi (South Finland)
- 3 Länsi-Suomi (West Finland)
- 4 Pohjois-Suomi (North Finland)
- 99 Inap. (not FI in isocntry)

## Note:

The Åland Islands (FI200 - Landskapet Åland / Avenanmaan maakunta) are not covered.

This variable corresponds to the NUTS 2 breakdown in accordance with NUTS versions 2003 und 2006, i.e. before separating "Helsinki-Uusimaa" (NUTS version 2010: FI1B) from "Etelä-Suomi" (NUTS 2003/2006: FI18; NUTS 2010: FI1C), and before merging "Pohjois-Suomi" (NUTS 2003/2006: FI1A) with "Itä-Suomi" (NUTS 2003/2006: FI13) to "Pohjois- ja Itä-Suomi" (NUTS 2010: FI1D). This coding corresponds to former Eurobarometer waves (p7fi\_r).

The NUTS CODES variable 'nuts' and the new recoded variable p7fi\_r2 represent NUTS version 2010 with regular amendment as of January 1, 2012.

The official NUTS categories are coded and documented on NUTS 3 level in the integrated alphanumeric NUTS CODES variable 'nuts'.

Non-NUTS subdivisions

HR Croatia

Derivation:

This additional alphanumeric NUTS CODES variable is produced by the archive. It integrates all country specific p7 variables given that the regional units are defined in accordance with the EUROSTAT Nomenclature of Territorial Units for Statistics (NUTS) respectively in accordance with the Statistical Regions for Candidate and EFTA Countries 2010. For each country the lowest available NUTS subdivision level is considered.

Note:

The official NUTS codes are coded verbatim in accordance with the in each case valid (applicable) NUTS version. All version details and changes are documented in the official EUROSTAT classification history (History of NUTS). A second variable (regunit) indicates the coded NUTS LEVEL for each country.

France:

The territorial unit of Corse (FR83) and the Oversea departments (Départements d'outre-mer: FR9) are not covered.

Italy:

Starting with Eurobarometer wave 77 (NUTS version 2010 with regular amendment as of January 1, 2012) NUTS 1 codes for Italy have changed for North-East (ITH instead of ITD) and Center (ITI instead of ITE). The reason for this are minor boundary shifts on NUTS 2 and 3 level (ITI3: Marche and ITH5: Emilia Romagna).

Greece:

The Aegean Islands (EL41 - Βόρειο Αιγαίο/Voreio Aigaio and EL42 - Νότιο Αιγαίο/Notio Aigaio) as well as the Ionian Islands (EL22 - Ιόνια Νησιά/Ionia Nisia) are not covered.

Starting with Eurobarometer wave 77 (NUTS version 2010 with regular amendment as of January 1, 2012) the standard country prefix 'GR' is replaced by 'EL'. The remaining numerical part of the codes remains unaffected.

Spain:

The autonomous cities of Ceuta (ES63 - Ciudad Autónoma de Ceuta) and Melilla (ES64 - Ciudad Autónoma de Melilla) are not covered.

Portugal:

The autonomous regions of the Azores (PT20 - Região Autónoma dos Açores) and of Madeira (PT30 - Região Autónoma da Madeira) are not covered.

Finland:

The Åland Islands (FI200 - Landskapet Åland / Avenanmaan maakunta) are not covered.

Former regions of "Uusimaa" (FI181) and "Itä-Uusimaa" (FI182) have been consolidated to the region of "Helsinki-Uusimaa" (FI1B1) on January 1, 2011. The official NUTS codes have changed accordingly starting with NUTS version 2010 (regular amendment as of January 1, 2012). Eurobarometer did never code "Itä-Uusimaa" (East Uusimaa) separately. "Uusimaa" always included the capital area of Helsinki. For this reason the NUTS CODES variable 'nuts' for Finland is already coded in accordance with NUTS version 2010. Only the country specific NUTS 2 variable (p7fi\_r) is still coded in accordance with NUTS version 2003/2006 in order to remain consistent with former Eurobarometer waves.

The NUTS version history documents a minor boundary shift between "Satakunta" (NUTS 2003: FI191; NUTS 2006/2010: FI196) and "Pirkanmaa" (NUTS 2003: FI192; NUTS 2006/2010: FI197). One municipality has been transferred between these NUTS level 3 regions. Please notice that NUTS CODES variable 'nuts' is based on the NUTS 2006/2010 codes for "Satakunta" and "Pirkanmaa" although it could not be verified if and when the boundary shift is actually reflected in Eurobarometer data.

w3a - WEIGHT RESULT FROM TARGET - UNITED GERMANY

w3a Weight result from target - United Germany

This weight combines the weighting factors for Germany as a whole (redressment factors plus populations size factors East/West) and the redressment factors for all other countries (Great Britain and Northern Ireland separated). This weight has been derived by the archive from original TNS weights w1 and w3. Unlike weighting variable w3 (WEIGHT UNITED GERMANY (ONLY)) the other countries/samples are not excluded from calculation.

Note:

Starting with Eurobarometer 75.4 and according to available weights up to Eurobarometer 61, the archive is deriving three additional weights (w3a, w4a, w3a4a) in order to provide for the analysis of the United Kingdom and/or Germany, each as a whole and together with all other countries. Minimal deviations in frequencies for weighted data are possible due to rounding differences.
