IF RESPONDENT IS AGED 15-24

Thank you very much for your help and your responses; we are done with the first part. The European Union is especially interested what young people think. I have some more questions to ask, if you don't mind devoting another 10 minutes from your time.

PROCEED TO THE YOUTH QUESTIONNAIRE

IF (D5C + D5B) < D5A AND RESPONDENT IS NOT BETWEEN 15 AND 24 YEARS OF AGE.

(IF THERE IS ONLY ONE YOUNG HOUSEHOLD MEMBER)

Thank you very much for your help and your responses.

From your previous responses it appears that there is somebody in your household who is between 15 and 24 years of age. I have a list of questions that I have to ask from young people. Can I talk to that person?

(IF THERE ARE MORE YOUNG HOUSEHOLD MEMBERS)

Thank you very much for your help and your responses.

From your previous responses it appears that there are people in your household who are between 15 and 24 years of age. I have a list of questions that I have to ask from young people. Can I talk to that young member of this household who had the closest birthday?

IF THE YOUNG RESPONDENT IS AVAILABLE, PROCEED WITH THE **YOUTH QUESTIONNAIRE**, IF NOT, ARRANGE A REVISIT AND MARK ON YOUR ADMIN SHEET.

C.3 Sample Specifications

Between the 20th of March and the 4th of May 2003, The Gallup Organization Hungary carried out wave 2003.1 of the Candidate Countries Eurobarometer, at the common request of the EUROPEAN COMMISSION, Directorate-Generals Press and Communication and Directorate-Generals Education and Culture.

The Candidate Countries Eurobarometer 2003.1 covers citizens of each of the countries that are applying for European Union membership aged 15 and over, with the exception of Estonia and Cyprus. In Estonia, the survey covered permanent residents aged 15 and over. In Cyprus, the sample covered the territory of the Republic of Cyprus only. The basic sample design applied in all Candidate Countries is a multi-stage, random (probability) one. In each country, a number of sampling points were drawn with probability proportional to population size (for a total coverage of the country) and to population density.

For doing so, the points were drawn systematically from each of the "administrative regional units", after stratification by individual unit and type of area. They thus represent the whole territory of the Candidate Countries Region according to the EUROSTAT NUTS 2 (or equivalent; if there are no such regions, we used NUTS 3 or equivalent regions for sampling) and according to the distribution of the resident population of the respective nationalities in terms of metropolitan, urban and rural areas. In each of the selected sampling points, a starting address was drawn, at random. Further addresses were selected as every Nth address by standard random route procedures, from the initial address. In each household, the respondent was drawn, at random. All interviews were face-to-face in people's home and in the appropriate national language. In countries with significant minorities the respondents had a chance to respond in their mother tongue (in Estonia, Latvia and Lithuania in Russian, and in Romania in Hungarian).

Countries	Institutes	Number of Interviews	Field Work Dates	Population (x 000)
Bulgaria	VITOSHA RESEARCH	1000	23-March – 15-Apr	7,891
(Republic of) Cyprus	CYMAR MARKET RESEARCH	500	22-March – 15-Apr	689

Romania	THE GALLUP ORGANIZATION, ROMANIA	1044	27-March – 19-Apr	22,435
Slovakia	FOCUS CENTER FOR SOCIAL AND MARKET ANALYSIS	1029	26-March – 24-Apr	5,331
Slovenia	CATI D.O.O.	1000	31-March – 4-May	1,980
Turkey	KONSENSUS RESEARCH & CONSULTANCY	1000	28-March – 27-Apr	67,803
Total number of interviews		12124		172,748

For each country a comparison between the sample and the universe was carried out. The Universe description was derived from population data from national statistics. For all Candidate Countries a weighting procedure, using marginal and intercellular weighting, was carried out, based on this Universe description. As such in all countries, gender, age, region NUTS 2, settlement size, household size, and education level were introduced in the iteration procedure. For international weighting (i.e. CC-13 averages), Gallup applies the official population figures as provided by national statistics. The total population figures for input in this post-weighting procedure are listed above.

The results of the Candidate Countries Eurobarometer studies are reported in the form of tables, datafiles and analyses. Per question a table of results is given with the full question text in English. The results are expressed as a percentage of the total. The results of the Eurobarometer surveys are analysed and made available through the Directorate-General Press and Communication, Opinion Polls of the European Commission, Office: Brey 7/41, B-1049 Brussels. The results are published on the Internet server of the European Commission: http://europa.eu.int/comm/public_opinion/. All Eurobarometer datafiles are stored at the "Zentral Archiv" (Universität Köln, Bachemer Strasse, 40, D-50869 Köln-Lindenthal), available through the CESSDA Database <http://www.nsd.uib.no/cessda/europe.html>. They are at the disposal of all institutes members of the European Consortium for Political Research (Essex), of the Inter-University Consortium for Political and Social Research (Michigan) and of all those interested in social science research.

Readers are reminded that survey results are estimations, the accuracy of which, everything being equal, rests upon the sample size and upon the observed percentage. With samples of about 1,000 interviews, the real percentages vary within the following confidence limits (in case of a sample of 1000 people – confidence intervals for N=500 sample are larger):

Observed percentages	10% or 90%	20% or 80%	30% or 70%	40% or 60%	50%
Confidence intervals	± 1.9%	± 2.5%	± 2.7%	± 3.0%	± 3.2%
