- European Values Study 2017: Ukraine (EVS 2017 Country data file) - ZA7539

    Current dataset version: v1-0-0, 2021-05-03
    DOI: 10.4232/1.13714 (URL: http://dx.doi.org/10.4232/1.13714)

# Appendix C: NUTS level 1- 2-3

This document contains only the regional classifications for countries that do not have an official NUTS classification.

## Information provided for:

Armenia, Azerbaijan, Belarus, Bosnia and Herzegovina, Georgia, Montenegro, North Macedonia, Russia, Ukraine.

## Variable name and label:

v275b: 'region where interview was conducted: NUTS code (Q105)'

## Question number and text:

Q105: Region: Write in: ……………

Information provided in the European Values Study (EVS) 2017: Methodological Guidelines, Classification guidelines to construct the regional variable:

- Generally, the NUTS level 1-2-3 codes available for the 27 EU countries, four EFTA countries (Iceland, Liechtenstein, Norway, and Switzerland) and two candidate countries (Croatia and Turkey) will be used[1].

- The most recently updated version of NUTS-classification (2016) is available in EVS2017 Guidelines, Appendix Classifications.

- When no NUTS-codes are available for a country, create own codes based on the regional classifications approved by the Methodology Group.

- The code should resemble NUTS as much as possible.

- The CODE should start with the ISO-code for a country, e.g. RU for Russia.

- Zip and postal codes should be made available (but they will not be published in the data) and then recoded in regions resembling NUTS-1-2-3 (see official classifications in Appendix Classifications).

- Please also provide the Methodology Group with national statistics regional codes that resemble NUTS as much as possible. If already available, please check the classifications retrieved from the material of EVS 2008 (see sheet "Geographical codes" in the Excel classifications package) and provide information if any amendment has to be made.
