Acknowledgements

The Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Long term access to and usability of Eurobarometer primary data and documentation is provided in a cooperative arrangement between the Inter-University Consortium for Political and Social Research (ICPSR) and the GESIS Data Archive for the Social Sciences (DAS).

Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Individual level micro data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS through the DBK data catalogue (<https://www.gesis.org/dbk>) and through the ZACAT online data portal (<https://zacat.gesis.org>). Access to the Eurobarometer primary data is also provided by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, as well as supported by the Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send bibliographic citations for each completed manuscript or thesis abstract to the providing data archive, GESIS or ICPSR. Please indicate in a cover letter which data (surveys and variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

1.1.4 Bibliographic citation and DOI reference

Publications based on data collections which are made available through ICPSR or GESIS should acknowledge those sources by means of bibliographic citations. To ensure that such source attributions are captured for social science bibliographic utilities, citations must appear in footnotes or in the reference section of publications. The bibliographic citation for this data collection is:

European Commission, Brussels: Eurobarometer 84.2, October 2015.

TNS opinion, Brussels [Producer];

GESIS, Cologne [Publisher]: ZA6642, dataset version 4.0.0, DOI: [10.4232/1.13216](https://doi.org/10.4232/1.13216) (2019).

The registered Digital Object Identifier (DOI) persistently identifies this dataset version with reference to former (or more recent) versions and potential errata and update documentation in the GESIS data catalogue (DBK).

1.2 Content

1.2.1 Abstract

This round of Eurobarometer surveys covers the following special topics: (1) E-Communications and the Digital Single Market, (2) Awareness and Perceptions of Europeans about EU Customs, and (3) EU Citizens, Agriculture, and the Common Agricultural Policy. Respondents were queried as to their use of telephones and digital electronics, the importance of specific factors in choosing to subscribe to an Internet connection, paid services that can be accessed via the Internet, bundling Internet connection with other services, and switching communication service providers. Questions were also asked regarding respondents' perceptions of EU customs authorities and their activities, the role of EU customs authorities, and how informed respondents were about various aspects of the EU Customs Union. Additional topics included respondents' support of the Common Agricultural Policy (CAP), the primary responsibilities of EU farmers, the effectiveness of the CAP, approval of EU financial support of the CAP, and importance of environmental protection.

Demographic and other background information collected includes age, gender, nationality, marital status, occupation, left-right political self-placement, age when stopped full-time education, household composition, ownership of a fixed or mobile telephone and other goods, difficulties in paying bills, self-assessed social class, and Internet use. In addition, country-specific data includes type and size of locality, region of residence, and language of interview.

1.3 Universe

In all, Eurobarometer 84.2 interviewed 27.822 citizens in the 28 countries of the European Union after the 2013 enlargement (accession of Croatia in July 2013). All respondents were residents in the respective country, nationals and non-national EU-citizens, and aged 15 and over. They were supposed to have sufficient command of one of the respective national language(s) to answer the questionnaire. Separate samples were drawn for Great Britain and Northern Ireland as well as for East and West Germany.

1.4 Sampling procedure

A multi-stage, random (probability) sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regional units in every country (Statistical Office of the European Community, EUROSTAT NUTS 2 or equivalent). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of starting addresses was selected from each sampled PSU at random. Further addresses were chosen systematically using standard random route procedures as every Nth address from the initial address. In each household, a respondent was drawn, at random, following the closest birthday rule. No more than one interview was conducted in each household.

The regular sample size (in the sense of completed interviews) is 1000 respondents per country, except the United Kingdom with separate samples for Great Britain (1000) and Northern Ireland (300), Germany with separate samples for the Eastern (500) and the Western part (1000), and Luxembourg, Cyprus (Republic) and Malta with 500 interviews each. The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

From October 17 to October 26, 2015, TNS opinion carried out the fieldwork for this Eurobarometer, at the request of the European Commission, Directorate-General for Communication. TNS opinion is based in Brussels, Belgium, and co-ordinates the fieldwork carried out through its network of national institutes:

1.6 Mode of data collection

In all countries, fieldwork was conducted on the basis of detailed and uniform instructions prepared by TNS opinion. Interviews were conducted face-to-face in people's home in the respective national language. As far as the data capture is concerned, CAPI (Computer Assisted Personal Interview) was used in those countries where this technique was available.

Equivalent French and English basic questionnaires were developed for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country. Back-translation procedures were applied for controlling semantic equivalence. Multi-language questionnaires are applied if appropriate (Belgium, Luxembourg, Spain, Finland, Estonia, Latvia, Malta).

In each country only the national language version(s) of the questionnaire is (are) used; in countries with more than one official language, the language version is selected at the beginning of the interview.

1.7 Weighting

In general, the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis, a national weighting procedure, using marginal and intercellular weighting, is applied. As such, in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factors correct for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country or lower level area sample (Great Britain and Northern Ireland, East and West Germany) is represented in proportion to its population size within different groupings according to the historical states of European unification (e.g. founder members, new members, Euro zone countries) in the case of the EUROPEAN WEIGHTS, as well as within the United Kingdom (WEIGHT UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31) or Germany as a whole (WEIGHT GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general, all countries or samples which do not belong to the respective group under consideration are excluded from calculation. The special weights for the United Kingdom and Germany do exclude all other countries from calculation starting with Eurobarometer 62. The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2, a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 4) are weighted separately, as documented in the respective study and weight variable description. In some surveys, special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

Eurobarometer 84.2 provides three (post-stratification) NATION WEIGHTS: W1 (WEIGHT RESULT FROM TARGET) for separate analysis or comparison of individual samples (countries or regions on sub-national level), W4 (WEIGHT UNITED KINGDOM ONLY) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole, and W3 (WEIGHT GERMANY ONLY), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. W3 and W4 exclude all other countries from calculation, but include the post-stratification factors for the United Kingdom and Germany respectively.

Starting with Eurobarometer 75.4 and in accordance with former practice up to Eurobarometer 61, the archive started to derive (see 1.8. Data preparation) three additional weights W3A, W4A, W3A_W4A in order to provide for the analysis of the United Kingdom and/or Germany as a whole together with all other samples, as separate countries (samples). W3A (WEIGHT RESULT FROM TARGET – UNITED GERMANY) combines the weighting factors for Germany as a whole (redressment factors plus populations size factors East/West) and the redressment factors for all other countries (Great Britain and Northern Ireland separated). W4A (WEIGHT RESULT FROM TARGET – UNITED KINGDOM) combines the weighting factors for the United Kingdom as a whole (redressment factors plus populations size factors) and the redressment factors for all other countries (Germany East and West separated). W3A_W4A (WEIGHT RESULT FROM TARGET – NATION) combines the weighting factors for the United Kingdom as a whole, the weighting factors for Germany as a whole, and the redressment factors for all other countries. Unlike the originating weights, W4 (WEIGHT UNITED KINGDOM ONLY) and W3 (WEIGHT GERMANY ONLY), all countries are included in calculations.

Additional HOUSEHOLD WEIGHTS (W31 to W79, WEX_HH) are provided for questions informing about the respondent's household in the E-COMMUNICATIONS module and for these data on household level. Their general function is equivalent to the in each case corresponding standard weight, as for example the post-stratification weights W1 (individual level) and W31 (household level).

The EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries, of accession or candidate countries, and of Euro zone countries, representing different historical states of European integration (e.g. EU6 = six founder members) . All post-stratification factors are included.

Table 2: Overview of population size weights on European level

European Weights in Eurobarometer 84.2	Function
W5 to W9, W11, W14, W22, W23; HH: W35 to W39, W41, W44, W52, W53	grouping EU member countries
W10, W13, W15 (no HH), W24, W94; HH: W40, W43, W54, W74	grouping new member countries
-	grouping candidate/accession countries
-	grouping member + candidate/accession countries
W29, W30, W81, W82, W83, W84, W85, W86, W89,	grouping (non-)Eurozone countries

W90, W98, W99; HH: w42 (only HH), W59, W60, W61, W62, W63, W64, W65, W66, W69, W70, W78, W79, W73 (only HH)	
wextra / HH: wex_hh	extrapolating population size (15+) for each country

For more detailed information on the individual weights please see the corresponding variable description.

1.8 Data preparation

The data received by GESIS from TNS opinion were checked for completeness, missing data and duplicate records, for illegal (wild) codes and for (formal) consistency of response patterns and question routing. Errors discovered by these procedures are documented or corrected, as a general rule after consulting related additional documentation (e.g. tabular reports) or the data provider. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable DDI-XML compliant documentation was created for this dataset by GESIS.

Starting with Eurobarometer 76.1, the traditional variable naming by serial V-numbers (V1 to Vn) has been replaced by a system based on question and item numbers in the questionnaire and elsewhere on standard mnemo-technicals. The dot used in the original TNS variable names for multiple response dummy variables is replaced by underscore in view of potential software incompatibilities.

The archive identification variables comprise the archive study identification number ('studyno'), the digital object identifier ('doi') of the present dataset version, the version number and date ('version') and the edition type ('edition'). A unique case id ('uniqid') for the complete dataset has been constructed from the TNS country id (digits 1-2) and the TNS case/respondent id (digits 3-8).

Three country/sample identification variables are supplied, maintaining the original country/sample codes ('tncsntry'), applying the established archive standard codes for the Eurobarometer series ('country'), and an alphanumerical variable applying the ISO 3166-1 alpha-2 codes ('isocntry') with adaptations for Great Britain and Northern Ireland (ISO 3166-2), for East and West Germany, and for Northern Cyprus (Turkish Cypriot Community).

GESIS added 'Inappropriate' (INAP) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the original questionnaire was adhered to for (almost) every respondent. An additional INAP category was defined whenever a question or group of questions were not surveyed in one or more countries, or if variables refer to country specific items (e.g. region variable P7).

Users should note that answers to multiple-response questions are (originally) represented by a series of binary 'dummy' variables (i.e. variables which take on values of one and zero only), creating separate 'dummy' variables also to explicitly represent 'Don't know', 'No answer/refusal' or other residual responses, such as 'None of the above'. The archive has recoded these residual responses in the case of uncommon minor inconsistencies in accordance with the series of substantial answers.

GESIS has recoded the missing answers (NA) represented in the original data set by blanks (system missing) to standard values. Their practically complete absence suggests that eventual cases of any not explicitly coded item non-response might be collapsed with the DK (don't know) category.

Question text and contingency text appearing in the variable description is taken from the English language version of the basic (bilingual) questionnaire (master questionnaire). Coding schemes and other documentation are based on the English language version of the basic questionnaire or on the respective SPSS data definition statements as provided by TNS opinion. In case of any discrepancy between questionnaires, SPSS definitions and data regarding the coding scheme of a variable, the archive, as a general rule, carried out any correction in agreement with the data provider.

If the documentation for country-specific questions or answer categories is provided in another language than English, the archive documents the original language wording and supplies the English translation in brackets.

Region NUTS 2 categories for Portugal have been edited and adapted to changes as of 2002 (NUTS version 2003) which are reflected in Eurobarometer starting with wave 62 (confirmed by TNS). Region NUTS 1 categories for Greece have been edited correcting for the non-coverage of Ionian and Aegean Islands starting with Eurobarometer 62 (confirmed by TNS).

P7 (REGION – NUTS CODES) – variables ‘nuts’ and ‘nutslvl’: The integrated NUTS variable has been derived by the archive from the original TNS country-wise P7 variables in accordance with NUTS units and (alphanumeric) codes defined in the Nomenclature of Territorial Units for Statistics. For each country the lowest subdivision level has been considered insofar consistent with or clearly mappable to one of the NUTS levels as valid for the relevant time period (<https://ec.europa.eu/eurostat/web/nuts/history>).

W3A/W4A (NATION WEIGHTS) – variables ‘w3a’/‘cntry_de’, ‘w4a’/‘cntry_gb’, ‘w3a4a’/‘nation’: Starting with Eurobarometer 62 the original SPECIAL WEIGHTS for the UNITED GERMANY (East + West) and the UNITED KINGDOM (Great Britain + Northern Ireland) automatically exclude all other samples/countries from the calculation. In accordance with former practice up to Eurobarometer 61, the archive now started to derive three additional weights (W3A, W4A, W3A_W4A) in order to provide for the analysis of the United Kingdom and/or Germany as a whole together with all other samples, as separate countries (nations). They combine the weights W3 (population size + redressment factor for Germany) or/and W4 (population size + redressment factor for the United Kingdom) with W1 (redressment factor for all other countries).

All INDEX and TOTAL variables have been checked and documented accordingly.

More detailed information on data preparation, harmonization or regarding inconsistencies is noted on variable level, if applicable.

1.9 Further remarks

Module QA on ‘E-Communications’ replicates a lot of questions asked in the context of Eurobarometer 81.1 (ZA5878). For part of the e-communications questions, the respondents are asked to answer for their household. Alternative weighting variables are suited for the descriptive analysis of the corresponding variables on household level (w31 to w79 and wex_hh). Question module QB on “EU customs” is newly introduced. Module QC on “Agriculture” largely replicates questions asked in the context of Eurobarometer 80.2 (ZA5877) and/or 72.5 (ZA4999).

Starting with Eurobarometer 81.3 (with 84.1 for Germany), the category scheme for country specific protocol variables P6 (SIZE OF COMMUNITY) has changed considerably. Categories for all countries have been harmonized among each other to three values (Rural area – Towns and suburbs/small urban area – Cities/large urban areas).

Starting with Eurobarometer 81.3 the category scheme for country specific protocol variables P7 (REGION) has changed for some countries, in particular introducing NUTS categories for Ireland, Estonia, and Croatia.

Data for protocol variables p8 (postal code), p9 (sample point number) and p10 (interviewer number) have not been made available.

Extrapolated population figures as calculated by WEXTRA differ slightly from the population 15+ figures per country indicated in the technical specifications provided by TNS.

The coding error in dataset version v2-0-0 for the Greek sample was corrected in the course of a new dataset delivery from TNS. The following variables have been corrected in version v3-0-0: phone1 phone2 phone3 phone4 phone5; qa1_1 qa1_1r qa1_1t qa1_2 qa1_2r qa1_2t; internet; qa6_1 qa6_2 qa6_3 qa6_4 qa6_5 qa6_6 qa6_7 qa6_8 qa6_9 qa6t_1 qa6t_2; qa12_3; qa16_4.

In the course of a new dataset delivery from TNS the REGION variable for Romania has been corrected for an abnormal frequency distribution in version v3-0-0. Please note that the number of cases changed for the regions "Nord-Est (North-East)", "Sud-Est (South-East)" and "Bucuresti - Ilfov (Bucharest)" in variable p7ro: 75 former cases from "Sud-Est (South-East)" are now coded for "Bucuresti - Ilfov (Bucharest)", 8 former cases from "Sud-Est (South-East)" are now coded for "Nord-Est (North-East)". Accordingly the number of cases also changed for the regions "Macroregion 2" and "Macroregion 3" in variable p7ro_r. As a consequence of this data correction weights referring to Romania have been modified. Please note that official reports and tables may be based on former weights and slight deviations to the current dataset results can exist.

2 Eurobarometer series description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general, they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; 'Attitudes towards Europe' (GESIS study ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He had the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid-nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999, the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papacostas as head of unit between 2003 and 2010.

At present, the Eurobarometer surveys are carried out on the general responsibility of the European Commission Directorate-General Communication, COMM.A.3 'Media Monitoring & Eurobarometer', with Maria Letizia Albergati as head of the unit and David Voidies as head of the Eurobarometer sector.

The special topic modules are requested by the respectively responsible EC Directorate General, as regards the content. Since 2007, the European Parliament is commissioning its own survey ("Parlemeter") through the Public Opinion Monitoring Unit of the European Parliament, in close cooperation with the DG COMM unit and within the same survey framework.

The main survey results are regularly published on the European Commission's Public Opinion website (<http://ec.europa.eu/COMMFrontOffice/PublicOpinion/index.cfm>) in official standard and special topic reports;

detailed tabular reports are published through the European Union Open Data Portal (<https://open-data.europa.eu/en/data/>).

2.4 Development of geographical and population coverage

In all European Union (formerly European Communities) member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics, starting in 1999 (EB51.1). Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001–2004) and then all included in the Standard Eurobarometer series, even before starting the accession process (e.g. Turkey or Macedonia). Further countries are continuously added in accordance with the EU membership application and accession process.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriot Community (Northern Cyprus) since 2004 for selected standard and topical waves.

Table 3: EU enlargement and countries covered by Standard and Special Eurobarometer

EU History	Survey (start)	Country (Sample)	ISO Code Alpha-2	Standard Sample Size	Remarks

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 4: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24, 16-30	17, 28.1, 34.2, 47.2OVR, 55.1OVR, 85.2OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.2OVR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)
Sampling experiment	Non-Nationals	41.0

2.5 Standard question program and special topics

The Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently, Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990), additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues (table 5). Selected subsets of standard trend questions appear in the context of related special topics (e.g. "The Future of Europe" or "European Parliament Eurobarometer").

Table 5: Overview of Eurobarometer surveys with standard EU and trend question modules

Standard and EU trend surveys	Fieldwork	GESIS Study ID	Standard Report	Subset	Special Topic

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <https://www.gesis.org/eurobarometer-data-service/home/>

3 Dataset structure and standards

Archive processing and documentation of the Standard and Special Eurobarometer are based on standards agreed upon between the Inter-university Consortium for Political and Social Research (ICPSR) and the GESIS Data Archive department (formerly Zentralarchiv für Empirische Sozialforschung), which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable, it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structures

In general, the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of administrative/technical variables. These comprise the ARCHIVE and dataset ID variables (studyno1, studyno2, doi, version, edition, survey, split (if applicable), caseid, uniqid), the COUNTRY ID variables with several standard variables identifying the different countries (or sub-national samples) and relevant groups of countries (or sub-national samples) in the dataset, arranged in pairs with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric variable ('isocntry') is provided based on the ISO 3166 country code standard (see 1.8).

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). Starting with Eurobarometer 76.1, the traditional variables naming by serial V-numbers (V1 to Vn) is replaced by a system based on question and item numbers in the questionnaire and elsewhere on standard mnemo-technicals (see 1.8). Likewise, from survey 76.1 onwards, constructed total or index variables, usually as provided by the fieldwork institute, are listed right after the question variables on which they are based. The dataset is concluded by three additional weights and their corresponding NATION country variables 'w3a'/'cntry_de', 'w4a'/'cntry_gb', 'w3a4a'/'nation' (see 1.8).

Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 und up to wave 75 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except for multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49, the integrated variables are retained but complemented by completely labeled country specific variables. The country

specific coding schemes and categories are maintained as a standard over time as long as the category schemes provided in the questionnaire remain comparable.

Starting with Eurobarometer 74.1, an additional standardized REGION variable 'nuts' (REGION – NUTS CODES) is constructed, integrating all participating countries with regional units defined in accordance with the EUROSTAT Nomenclature of Territorial Units for Statistics (NUTS). For each country the lowest available NUTS subdivision level is considered, whereby the hierarchical structure always implies all higher subdivision levels. The official NUTS codes are coded verbatim in accordance with the in each case valid (applicable) NUTS version as documented in the official EUROSTAT classification history (History of NUTS). A second variable indicates the lowest coded NUTS LEVEL 'nutslvl' for each country. All original regional subdivisions and categories remain coded separately and unchanged in the country-wise P7 variables. Details are documented with the respective country specific and/or integrated variable.

3.2.2 Missing values

In general, missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

As noted in chapter 1.8, missing answers (NA) represented in the original dataset by blanks (system missing) have been recoded to standard values by GESIS. Their practically complete absence suggests that eventual cases of any not explicitly coded item non-response might be collapsed with the DK (don't know) category.

3.3 International documentation standard (DDI)

The study and variable level documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The variable level documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (COUNTRY CODE - ISO 3166). In the case of Greece the non-ISO abbreviation EL* is used in parallel, as introduced by EUROSTAT as of NUTS version 2010.

AL	Albania	IE	Ireland
AT	Austria	IT	Italy
BE	Belgium	IS	Iceland
BG	Bulgaria	LT	Lithuania

GB-NIR	Northern Ireland	SI	Slovenia
GR / EL*	Greece	SK	Slovakia
HR	Croatia	TR	Turkey
HU	Hungary		

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded "real" values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission's official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

DERIVATION information refers to the construction principle of indices or other derived variables (not in the example). NOTE delineates additional explanatory text subsuming trend information (last appearance of the question) or archive remarks on data processing and other issues relevant for the understanding or application of the variable.																																																																																																																																																																																																																																																																															
CROSS-TABULATION: The absolute frequencies of the occurrence of values (<i>absolute values</i>) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies (<i>row percent</i>) refer to the valid cases (<i>n valid sum</i>), i.e. the total number of cases (<i>n sum</i>) reduced by the number of cases defined as missing data (<i>M</i>). For display and place saving reasons excluded countries or areas may be completely dropped from the table.																																																																																																																																																																																																																																																																															
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (<i>M</i>), i.e. <i>percent</i> on the basis of all cases (<i>sum</i>) and <i>valid percent</i> on the basis of the <i>valid cases</i> .																																																																																																																																																																																																																																																																															

5 Variable documentation

Variable, Label**Question Text (English Language)**

studyno1 - ARCHIVE STUDY NUMBER - DISTRIBUTOR

Archive study number – distributor

Study number of the distributing data archive.

6642 GESIS STUDY ID ZA6642

studyno1

Value	Label	Missing	Count	Percent	Valid Percent
6642	GESIS STUDY ID ZA6642		27822	100.0	100.0
	Sum		27822	100.0	100.0
	Valid Cases		27822		

studyno2 - ARCHIVE STUDY NUMBER - PUBLISHER

Archive study number – publisher

Study number of the data archive which is publishing this dataset version.

6642 GESIS STUDY ID ZA6642

studyno2

Value	Label	Missing	Count	Percent	Valid Percent
6642	GESIS STUDY ID ZA6642		27822	100.0	100.0
	Sum		27822	100.0	100.0
	Valid Cases		27822		

doi - DIGITAL OBJECT IDENTIFIER

Digital object identifier

This variable holds the Digital Object Identifier (DOI) for the dataset at hand as registered via the da|ra registration agency for economic and social science data. Each dataset version (see variable 'version') has a unique persistent DOI.

For direct access to the complete archive dissemination package for this study, including new dataset versions, the DOI needs to be appended to the resolver service URL: <http://dx.doi.org/doi:10.4232/1.13216>

In terms of good scientific practice, the DOI is an important element for the correct citation of a dataset.

doi

Value	Label	Missing	Count	Percent	Valid Percent
doi:10.4232/1.13216			27822	100.0	100.0
	Sum		27822	100.0	100.0
	Valid Cases		27822		

version - GESIS ARCHIVE VERSION & DATE

GESIS archive version & date

4.0.0 '2019-02-21'

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

For details of the version history and for information on errata in current or former dataset versions, please consult the GESIS data catalogue entry (study description) persistently referenced by the dataset DOI (Digital Object Identifier).

version

Value	Label	Missing	Count	Percent	Valid Percent
4.0.0 (2019-02-21)			27822	100.0	100.0
	Sum		27822	100.0	100.0
	Valid Cases		27822		

edition - DATASET EDITION

Dataset edition

This variable identifies the type of archive release for the dataset at hand.

1 Archive pre-release

2 Archive edition

edition

Value	Label	Missing	Count	Percent	Valid Percent
2	ARCHIVE EDITION		27822	100.0	100.0
	Sum		27822	100.0	100.0
	Valid Cases		27822		

survey - SURVEY IDENTIFICATION

Survey identification

The number identifying the Eurobarometer survey.

842 Eurobarometer 84.2 (October 2015)

survey

Value	Label	Missing	Count	Percent	Valid Percent
842	Eurobarometer 84.2 (October 2015)		27822	100.0	100.0
	Sum		27822	100.0	100.0
	Valid Cases		27822		

caseid - TNS CASE ID (SEE NOTE)

TNS case ID

The original non-unique case (interview) identification numbers as provided by the fieldwork institute (TNS). The unique respondent identification variable uniqid adds the original country identification codes (tnscntry) as a prefix to the original case ID numbers in order to make them unique.

Note:

Actual number is coded.

For Eurobarometer 84.2 no country specific TNS case id for DE-W, DE-E and GB-GBN is provided (variable "caseid" is coded "9999999", variable uniqid is coded "999999999"). The dataset does include an original unique serial id across all countries (variable "serialid").

uniqid - UNIQUE RESPONDENT ID (CASEID BY TNS COUNTRY CODE) (SEE NOTE)

Unique respondent ID (caseid by tnsctry)

This unique respondent identification is composed of the original TNS country code and the original TNS interview number. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 04: Greece; 05: Spain; 06: Finland; 07: France; 08: Ireland; 09: Italy; 10: Luxembourg; 11: Netherlands; 12: Austria; 13: Portugal; 14: Sweden; 20: Germany West; 21: Germany East; 22: Great Britain; 23: Northern Ireland; 31: Bulgaria; 32: Cyprus (Republic); 33: Czech Republic; 34: Estonia; 35: Hungary; 36: Latvia; 37: Lithuania; 38: Malta; 39: Poland; 40: Romania; 41: Slovakia; 42: Slovenia; 46: Croatia). The remaining digits contain the country-specific questionnaire numbers.

Note:

Actual number is coded.

For Eurobarometer 84.2 no country specific TNS case id for DE-W, DE-E and GB-GBN is provided (variable "caseid" is coded "9999999", variable uniqid is coded "999999999"). The dataset does include an original unique serial id across all countries (variable "serialid").

serialid - SERIAL CASE ID (PROVIDED BY TNS)

Serial case ID (provided by TNS)

This unique respondent identification number has been provided by TNS. It shows the position of the cases in the dataset, starting with 1 and ending with 27822 (total number of cases).

Note:

Actual number is coded.

tnscntry - ORIGINAL TNS COUNTRY/SAMPLE ID

Original TNS country/sample ID

The original country identification codes as applied by the fieldwork institute (TNS).

isocntry - COUNTRY CODE - ISO 3166

Country code - in accordance with ISO 3166-1-alpha-2 country code

All surveyed countries and regions, i.e. including separate samples for East-/West-Germany, Great Britain/Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East/West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

Note:

Use of weighting factor w1 is optional.

w1 - WEIGHT RESULT FROM TARGET

w1 Weight result from target

This POST-STRATIFICATION WEIGHT is based on a comparison for each sample with the respective universe description. As such in all countries, gender, age, region and size of locality are introduced in the iteration procedure carried out by the fieldwork institutes.

British and Northern Irish as well as East and West German samples are weighted separately. The weight reproduces the real number of cases for each country. In terms of its general function it corresponds to former NATION WEIGHT II (until EUROBAROMETER 31 (March-April 1989)).

w5 - WEIGHT EU6

w5 Weight EU6

This POPULATION SIZE WEIGHT refers to the six EC founder members: France, Belgium, Netherlands, West Germany, Italy, and Luxembourg. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w5 must be applied whenever these six EC founder countries are to be analyzed altogether as a group.

w6 - WEIGHT EU9

w6 Weight EU9

This POPULATION SIZE WEIGHT adds Denmark, Ireland, Great Britain and Northern Ireland to the EU6 countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w6 must be applied whenever these nine countries as of the 1973 enlargement are to be analyzed altogether as a group.

w9 - WEIGHT EU12+DE-E

w9 Weight EU12 + DE-E

This POPULATION SIZE WEIGHT equals WEIGHT EU12 but in addition including East Germany (former German Democratic Republic) after the unification of Germany on October 3, 1990 (Eurobarometer 34 (October-November 1990)). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w9 must be applied whenever these twelve member countries are to be analyzed altogether as a group including the Eastern part of Germany (new German federal states).

w11 - WEIGHT EU15

w11 Weight EU15

This POPULATION SIZE WEIGHT adds Austria, Finland, and Sweden to the EU12+DE-E countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w11 must be applied whenever these 15 countries as of the 1995 enlargement are to be analyzed altogether as a group.

w14 - WEIGHT EU25

w14 Weight EU25

This POPULATION SIZE WEIGHT adds Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia and Slovenia to the EU15 countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) group of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w14 must be applied whenever these 25 countries as of the 2004 enlargement are to be analyzed altogether as a group.

w23 - WEIGHT EU28 (EU27 + HR)

w23 Weight EU28 (EU27 + HR)

WEIGHT EU28 (EU27 + HR) includes all 25 member countries after the 2004 enlargement, the new members as of 2007 Romania and Bulgaria, and Croatia as the new member as of July 2013. This POPULATION SIZE WEIGHT adjusts each national sample in proportion to its share in the total population aged 15 and over, of NATION GROUP EU28 (EU27 + HR). The post-stratification weighting factors are included. Weight w23 must be applied whenever these countries are to be analyzed altogether as a group.

w24 - WEIGHT EU NMS 12

w24 Weight EU NMS 12

This POPULATION SIZE WEIGHT refers to the group of the 12 new member countries as of the enlargement in January 2007: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia, Bulgaria and Romania. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w24 must be applied whenever these 12 countries are to be analyzed altogether as a group.

w29 - WEIGHT EURO ZONE 15 (EU27)

w29 Weight EURO ZONE 15 (EU27)

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2008. These are 15 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w29 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

w81 - WEIGHT EURO ZONE 16 (EU27)

w81 Weight EURO ZONE 16 (EU27)

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2009. These are 16 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008), and Slovakia (introduction as of January 1, 2009). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w81 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

w98 - WEIGHT EURO ZONE 18 (EU28)

w98 Weight EURO ZONE 18 (EU28)

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2014. These are 18 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008), Slovakia (introduction as of January 1, 2009), Estonia (introduction as of January 1, 2011), and Latvia (introduction as of January 1, 2014). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w98 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

w99 - WEIGHT NON-EURO ZONE 18 (EU28)

w99 Weight NON-EURO ZONE 18 (EU28)

This POPULATION SIZE WEIGHT separates the group of countries (Denmark, United Kingdom, Sweden, Czech Republic, Hungary, Lithuania, Poland, Bulgaria, Romania, Croatia) which did not introduce the EURO up to January 1, 2014. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. It refers to the group of the EU28 countries including Croatia. Weight w99 must be applied whenever these countries are to be analyzed altogether as a group.

w84 - WEIGHT NON-EURO ZONE 18 - EU NMS 12 (EU27)

w84 Weight NON-EURO ZONE 18 - EU NMS 12 (EU27)

This POPULATION SIZE WEIGHT separates the group of countries (Czech Republic, Hungary, Lithuania, Poland, Bulgaria, and Romania) belonging to the 12 new members after the enlargement of January 2007 which did not introduce the EURO up to January 1, 2014. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. It refers to the group of the EU27 countries excluding Croatia. Weight w84 must be applied whenever these 6 countries are to be analyzed altogether as a group.

w85 - WEIGHT EURO ZONE 19 (EU28)

w85 Weight EURO ZONE 19 (EU28)

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2015. These are 18 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008), Slovakia (introduction as of January 1, 2009), Estonia (introduction as of January 1, 2011), Latvia (introduction as of January 1, 2014), and Lithuania (introduction as of January 1, 2015). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w85 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

w86 - WEIGHT NON-EURO ZONE 19 (EU28)

w86 Weight NON-EURO ZONE 19 (EU28)

This POPULATION SIZE WEIGHT separates the group of countries (Denmark, United Kingdom, Sweden, Czech Republic, Hungary, Poland, Bulgaria, Romania, Croatia) which did not introduce the EURO up to January 1, 2015. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. It refers to the group of the EU28 countries including Croatia. Weight w86 must be applied whenever these countries are to be analyzed altogether as a group.

w94 - WEIGHT EU NMS 13

w94 Weight EU NMS 13

This POPULATION SIZE WEIGHT refers to the group of the 13 new member countries as of the enlargement in January 2007 and the accession of Croatia in July 2013: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia, Bulgaria, Romania, and Croatia. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w94 must be applied whenever these 13 countries are to be analyzed altogether as a group.

wextra - WEIGHT EXTRAPOLATED POPULATION 15+

wextra Weight extrapolated population 15+

Weight wextra extrapolates the actual universe (population aged 15 or more) for each country (sample), i.e. this weight variable integrates all other available weights, but does not reproduce the number of cases in the dataset.

Note:

For Eurobarometer 84.1 extrapolated population figures as calculated by WEXTRA differ slightly from the population 15+ figures per country indicated in the technical specifications provided by TNS.

w31 - WEIGHT RESULT FROM TARGET - HH

w31 WEIGHT RESULT FROM TARGET – HOUSEHOLD WEIGHT

This POST-STRATIFICATION WEIGHT is based on a comparison for each sample with the respective universe description in terms of households. British and Northern Irish as well as East and West German samples are weighted separately.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QA), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w39 - WEIGHT EU12+DE-E - HH

w39 WEIGHT EU12 + DE-E – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT equals WEIGHT EU12 but in addition including East Germany (former German Democratic Republic) after the unification of Germany on October 3, 1990 (Eurobarometer 34). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. Weight w39 must be applied whenever these twelve member countries are to be analyzed altogether as a group including the Eastern part of Germany (new German federal states).

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QA), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w40 - WEIGHT EU NMS 3 - HH

w40 WEIGHT EU NMS 3 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT only refers to the three new members as of January 1995: Finland, Sweden, and Austria. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. All other samples are excluded from calculation. Weight w40 must be applied whenever these three countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QA), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w41 - WEIGHT EU15 - HH

w41 WEIGHT EU15 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT adds Austria, Finland, and Sweden to the EU12+ countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. Weight w41 must be applied whenever these 15 countries as of the 1995 enlargement are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QA), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w74 - WEIGHT EU NMS 13 - HH

w74 Weight EU NMS 13 - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT refers to the group of the 13 new member countries as of the enlargement in January 2007 and the accession of Croatia in July 2013: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia, Bulgaria, Romania, and Croatia. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. All other samples are excluded from calculation. Weight w74 must be applied whenever these 13 countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QA), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w53 - WEIGHT EU28 (EU27 + HR) - HH

w53 Weight EU28 (EU27 + HR) – HOUSEHOLD WEIGHT

WEIGHT EU27 + HR includes all 25 member countries after the 2004 enlargement, the new members as of 2007 Romania and Bulgaria, and Croatia as the forthcoming member as of July 2013. This POPULATION SIZE WEIGHT adjusts each national sample in proportion to its share in the total population aged 15 and over, of NATION GROUP EU28 (EU27 + HR). Weight w53 must be applied whenever these countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QA), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w42 - WEIGHT EURO ZONE 13 - HH

w42 WEIGHT EURO ZONE 13 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2007. These are 13 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), and Slovenia (introduction as of January 1, 2007). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. Weight w42 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

Note:

WEIGHT EURO ZONE 13 - HH is only available as household version.

For the parts of the questionnaire for which respondents were asked to answer for their household (QA), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w59 - WEIGHT EURO ZONE 15 (EU27) - HH

w59 Weight EURO ZONE 15 (EU27) - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2008. These are 15 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w59 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QA), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w73 - WEIGHT NON-EURO ZONE 17 (EU28) - HH

w73 WEIGHT NON-EURO ZONE 17 (EU28) – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT separates the group of countries (Denmark, United Kingdom, Sweden, Czech Republic, Hungary, Latvia, Lithuania, Poland, Bulgaria, Romania, Croatia) which did not introduce the EURO up to January 1, 2011. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. All other samples are excluded from calculation. It refers to the group of the EU28 countries including Croatia. Weight w73 must be applied whenever these countries are to be analyzed altogether as a group.

Note:

WEIGHT NON-EURO ZONE 17 (EU28) - HH is only available as household version.

For the parts of the questionnaire for which respondents were asked to answer for their household (QA), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w78 - WEIGHT EURO ZONE 18 (EU28) - HH

w78 Weight EURO ZONE 18 (EU28) - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2014. These are 18 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008), Slovakia (introduction as of January 1, 2009), Estonia (introduction as of January 1, 2011), and Latvia (introduction as of January 1, 2014). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. All other samples are excluded from calculation. It refers to the group of the EU28 countries including Croatia. Weight w78 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QA), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w64 - WEIGHT NON-EURO ZONE 18 - EU NMS 12 (EU27) - HH

w64 WEIGHT NON-EURO ZONE 18 – EU NMS 12 (EU27) - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT separates the group of countries (Czech Republic, Hungary, Lithuania, Poland, Bulgaria, and Romania) belonging to the 12 new members after the enlargement of January 2007 which did not introduce the EURO up to January 1, 2014. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. It refers to the group of the EU27 countries excluding Croatia. Weight w84 must be applied whenever these 6 countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QA), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

wex_hh - WEIGHT EXTRAPOLATED POPULATION 15+ - HH

wex_hh WEIGHT EXTRA POPULATION – HOUSEHOLD WEIGHT

WEIGHT EXTRA extrapolates the actual universe (population aged 15 or more) for each country (sample), i.e. this weight variable integrates all other available weights, but does not reproduce the number of cases in the dataset.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QA), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

d43t - PHONE AVAILABLE (SUMMARIZED)

Availability of mobile and/or landline phones - summarized

- 1 Mobile only (coded 1 in d43b and coded 2 in d43a)
- 2 Landline only (coded 1 in d43a and coded 2 in d43b)
- 3 Landline and mobile (coded 1 in d43a and coded 1 in d43b)
- 4 No telephone (coded 2 in d43a and coded 2 in d43b)

Derivation:

This variable summarizes answers to question d43a and d43b.

[d43a Do you own a fixed telephone in your household?

d43b Do you own a personal mobile telephone?]

Respondents coded 2 in d43a and 1 in d43b are coded 1 ("Mobile only") in d43t. Respondents coded 1 in d43a and 2 in d43b are coded 2 ("Landline only") in d43t. Respondents coded 1 in d43a and d43b are coded 3 ("Landline and mobile") in d43t. Respondents coded 2 in d43a and d43b are coded 4 ("No telephone") in d43t.

Note:

See d43a and d43b for complete question text.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

d46t5 - OWNERSHIP COMPUTING DEVICE & INTERNET (D46_4+D46_5+D46_6+D46_7 SUM+D46_8)

Ownership of computing devices and internet connection at home - summarized

- 0 Not mentioned
- 1 Mentioned
- 9 Inap. no computing device (not coded 1 in d46t_4 to d46t_7)

Derivation:

This variable summarizes responses to d46_4 to 46_8.

[d46 Which of the following goods do you have?

d46_4 Desk computer

d46_5 Laptop

d46_6 Tablet

d46_7 Smartphone

d46_8 An Internet connection at home]

Note:

See variable d46 for complete question text.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

qa1_1r - MOBILE PHONE ACCESSES HH (RECODED)

Respondents who indicate access to mobile phones in the household - recoded

- 1 None
- 2 1
- 3 2
- 4 3
- 5 4 and more
- 8 DK

Derivation:

This variable groups answers to question qa1_1.

[qa1 Thinking about all household members, including yourself, please indicate for each of the following how many of them are available in your household.

qa1_1 Mobile phone accesses]

Note:

See qa1 for complete question text.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

qa1_2r - MOBILE PHONE INTERNET ACCESSES HH (RECODED)

Respondents who indicate access to the internet by mobile phone subscriptions or pre-paid arrangements in the household - recoded

- 1 None
- 2 1
- 3 2
- 4 3
- 5 4 and more
- 8 DK
- 9 Inap. No mobile phone access in household or DK (coded 10 or 11 in qa1_1)

Derivation:

This variable groups answers to question qa1_2.

[qa1 Thinking about all household members, including yourself, please indicate for each of the following how many of them are available in your household.

qa1_2 Mobile phone subscriptions or pre-paid arrangements giving access to the Internet, e.g. for playing or downloading audio or video content or sending and receiving e-mails]

Note:

See qa1 for complete question text.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

qa1_2t - MOBILE PHONE INTERNET ACCESSES HH (TOTAL)

Respondents who indicate access to the internet by mobile phone subscriptions or pre-paid arrangements in the household - summarized

- 1 Households with mobile Internet access
- 2 Households without mobile Internet access

Derivation:

This variable summarizes codes 1 to 9 in question qa1_2.

[qa1 Thinking about all household members, including yourself, please indicate for each of the following how many of them are available in your household.

qa1_2 Mobile phone subscriptions or pre-paid arrangements giving access to the Internet, e.g. for playing or downloading audio or video content or sending and receiving e-mails]

Note:

See qa1 for complete question text.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

phone2 - FIXED AND MOBILE PHONE COMBINED IN HH (D43T & QA1_1T)

E-Communication equipment in the household: fixed and mobile phone combined (d43t & qa1_1t)

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes respondents with fixed and mobile phone access combined in the household (codes 2 or 3 in d43t and/or code 1 in qa1_1t).

[d43a Do you own a fixed telephone in your household?

d43b Do you own a personal mobile telephone?

d43t Availability of mobile and/or landline phones - summarized

qa1 Thinking about all household members, including yourself, please indicate for each of the following how many of them are available in your household.

qa1_1 Mobile phone accesses

qa1_1t Mobile phone accesses HH (TOTAL)]]

Note:

See d43 & qa1 for complete question text.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

qa2_1 - TV RECEPTION VIA: AERIAL

QA2

ASK QA2 IF "TELEVISION IN THE HOUSEHOLD", CODE 1 IN D46 – OTHERS GO TO QA3

Does your household receive television via...?

(SHOW SCREEN – READ OUT – MULTIPLE ANSWERS POSSIBLE - CODE 8 IS EXCLUSIVE)

QA2_1 An aerial (e.g. on the roof or on the top of the TV set)

0 Not mentioned

1 Mentioned

9 Inap. No television in household (not coded 1 in d46_1)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qa2_7 - TV RECEPTION VIA: OTHER (SPONT)

QA2

ASK QA2 IF "TELEVISION IN THE HOUSEHOLD", CODE 1 IN D46 – OTHERS GO TO QA3

Does your household receive television via...?

(SHOW SCREEN – READ OUT – MULTIPLE ANSWERS POSSIBLE - CODE 8 IS EXCLUSIVE)

QA2_7 Other (SPONTANEOUS)

0 Not mentioned

1 Mentioned

9 Inap. No television in household (not coded 1 in d46_1)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qa2t_1 - TV RECEPTION VIA - CABLE (SUM)

Respondents who indicate a cable TV network for their household - summarized

0 Not mentioned

1 Total 'TV cable'

9 Inap. No television in household (not coded 1 in d46_1)

Derivation:

This variable summarizes answers to qa2_3 and qa2_4.

[qa2 Does your household receive television via...?

qa2_3 A cable TV network (analogue = directly connected to the TV set)

qa2_4 A cable TV network + decoder (digital TV)]

Note:

See qa2 for complete question text.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

Variable qa2t_1 was named qa2t1 in former versions of this dataset.

qa3a - INTERNET SUBSCRIPTION MAIN FACTOR - FIRSTLY

ASK QA3A & QA3B IF "INTERNET CONNECTION IN THE HOUSEHOLD", CODE 8 IN D46 – OTHERS GO TO QA4

QA3A

When subscribing to an Internet connection what are the main factors you consider? Firstly?

(SHOW SCREEN – READ OUT – ONE ANSWER ONLY - ROTATE ANSWERS 1 TO 9)

- 1 The maximum download or upload speed
- 2 The maximum amount of data (MB, GB) you can download or upload
- 3 The price of the Internet subscription
- 4 The notice period to terminate the contract with the provider
- 5 The fact that the Internet subscription is part of a bundle (INT.: IF NEEDED: By bundle, we mean a combined package offering more than one communication service from the same provider at an overall price)
- 6 The customer service
- 7 The cost of the equipment
- 8 The cost of installation
- 9 The ability to use multiple connected devices at the same time without loss of quality
- 10 Other (SPONTANEOUS)
- 11 DK
- 99 Inap. No internet connection in the household (not coded 1 in d46_8)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qa3a_t - INTERNET SUBSCRIPTION MAIN FACTOR - FIRSTLY (SUM A)

Main factors when subscribing to an internet connection - summarized into three categories (QA3A)

- 1 Total 'Costs-related criteria'
- 2 Total 'Quality-related criteria'
- 3 Total 'Service-related criteria'
- 9 Inap. No internet connection in household or Other/DK in qa3a (not coded 1 in d46_8 or coded 10 or 11 in qa3a)

Derivation:

This variable collapses answers to qa3a into three categories. Respondents coded 3, 7 or 8 in qa3a are coded '1' ("Total 'Costs-related criteria'"). Respondents coded 1, 2 or 9 in qa3a are coded '2' ("Total 'Quality-related criteria'"). Respondents coded 4, 5 or 6 in qa3a are coded '3' ("Total 'Service-related criteria'").

[qa3a When subscribing to an Internet connection what are the main factors you consider? Firstly?]

Note:

See qa3a for complete question text.

qa3b_1 - INTERNET SUBSCRIP FACTORS 2ND: DOWNLOAD SPEED

ASK QA3A & QA3B IF "INTERNET CONNECTION IN THE HOUSEHOLD", CODE 8 IN D46 – OTHERS GO TO QA4

[QA3A

When subscribing to an Internet connection what are the main factors you consider? Firstly?]

QA3B

And then?

(SHOW SCREEN – READ OUT – MAX. 3 ANSWERS - ROTATE ANSWERS 1 TO 9 - DO NOT ASK IF CODE 11 IN QA3A - EXCLUDE ANSWER GIVEN IN QA3A FROM LIST OF ANSWERS FOR QA3B, EXCEPT FOR ANSWER 10 - CODE 11 IS EXCLUSIVE)

QA3B_1 The maximum download or upload speed

0 Not mentioned

1 Mentioned

9 Inap. No internet connection in household or DK in qa3a (not coded 1 in d46_8 or coded 11 in qa3a)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

(SHOW SCREEN – READ OUT – MAX. 3 ANSWERS - ROTATE ANSWERS 1 TO 9 - DO NOT ASK IF CODE 11 IN QA3A - EXCLUDE ANSWER GIVEN IN QA3A FROM LIST OF ANSWERS FOR QA3B, EXCEPT FOR ANSWER 10 - CODE 11 IS EXCLUSIVE)

QA3B_9 The ability to use multiple connected devices at the same time without loss of quality

0 Not mentioned

1 Mentioned

9 Inap. No internet connection in household or DK in qa3a (not coded 1 in d46_8 or coded 11 in qa3a)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qa3t_t2 - INTERNET SUBSCRIP FACTORS - QUALITY RELATED (SUM A+B)

All factors when subscribing to an internet connection - quality-related criteria summarized (QA3A & QA3B)

- 0 Not mentioned
- 1 Total 'Quality-related criteria'
- 9 Inap. (not coded 1 in d46_8)

Derivation:

This variables summarizes respondents coded 1, 2 or 9 in qa3a and/or coded 1 "Mentioned" in qa3b_1, qa3b_2 and/or qa3b_9.

[qa3a

When subscribing to an Internet connection what are the main factors you consider? Firstly?

qa3b

And then?

qa3b_1 The maximum download or upload speed

qa3b_2 The maximum amount of data (MB, GB) you can download or upload

qa3b_9 The ability to use multiple connected devices at the same time without loss of quality]

Note:

See qa3a and qa3b for complete question text.

qa3t_t3 - INTERNET SUBSCRIP FACTORS - SERVICE RELATED (SUM A+B)

All factors when subscribing to an internet connection - service-related criteria summarized (QA3A & QA3B)

- 0 Not mentioned
- 1 Total 'Service-related criteria'
- 9 Inap. (not coded 1 in d46_8)

Derivation:

This variables summarizes respondents coded 4, 5 or 6 in qa3a and/or coded 1 "Mentioned" in qa3b_4, qa3b_5 and/or qa3b_6.

[qa3a

When subscribing to an Internet connection what are the main factors you consider? Firstly?

qa3b

And then?

qa3b_4 The notice period to terminate the contract with the provider

qa3b_5 The fact that the Internet subscription is part of a bundle (INT.: IF NEEDED: By bundle, we mean a combined package offering more than one communication service from the same provider at an overall price)

qa3b_6 The customer service]

Note:

See qa3a and qa3b for complete question text.

qa5t_t2 - COMM SERVICES OF DAILY IMPORTANCE - INTERNET (SUM A+B)

Most important communication services and applications in daily life - fixed or mobile internet summarized (QA5A & QA5B)

0 Not mentioned

1 Total 'Fixed or mobile Internet'

9 Inap. None or DK in qa5a (coded 11 or 12 in qa5a)

Derivation:

This variable summarizes respondents coded 6 or 7 in qa5a and/or coded 1 "Mentioned" in qa5b_6 or qa5b_7.

[qa5a

Which of the following services and applications do you consider the most important in your daily life? Firstly?

qa5b

And then?

qa5b_6 Fixed line internet

qa5b_7 Mobile internet]

Note:

See qa5a and qa5b for complete question text.

qa6_1 - PAID INTERNET SERVICES USED: MUSIC

QA6

ASK QA6 IF "INTERNET CONNECTION IN THE HOUSEHOLD", CODE 8 IN D46 OR IF "INTERNET MOBILE ACCESS IN THE HOUSEHOLD" CODE 1 TO 9 IN QA1_2

Which of the following paid services that you can access via the Internet, have you used?

(SHOW SCREEN – READ OUT – MAX. 3 ANSWERS - ROTATE ANSWERS 1 TO 6 - CODES 8 AND 9 ARE EXCLUSIVE)

QA6_1 A paid service for accessing music

0 Not mentioned

1 Mentioned

9 Inap. Households without internet access (coded 4 in internet)

Note:

Please note for question qa6 that 127 respondents exceed the maximum number of possible answers.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

9 Inap. Households without internet access (coded 4 in internet)

Note:

Please note for question qa6 that 127 respondents exceed the maximum number of possible answers.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qa6t_1 - PAID INTERNET SERVICES - NUMBER (SUM)

Number of paid internet services used - summarized

- 1 1 service
- 2 2 services
- 3 3 services
- 4 4 services or more
- 6 Only others (Spontaneous)
- 7 None (Spontaneous)
- 8 DK
- 9 Inap. Households without internet access (coded 4 in internet)

Derivation:

This variable summarizes the number of services mentioned in qa6 in four categories.

[qa6 Which of the following paid services that you can access via the Internet, have you used?

qa6_1 A paid service for accessing music

qa6_2 A paid service for accessing movies or documentaries

qa6_3 A paid service for accessing digital books or newspapers

qa6_4 A paid service for watching sports events

qa6_5 A paid service for making phone calls over the Internet

qa6_6 A cloud service for storing content from your computer

qa6_7 Other (SPONTANEOUS)

qa6_8 None (SPONTANEOUS)

qa6_9 DK]

Note:

Please note for question qa6 that 127 respondents exceed the maximum number of possible answers.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Variable qa6t_1 was named qa6t1 in former versions of this dataset.

qa7_1 - COMMUNICATION PACKAGE HH: NONE

QA7

ASK ALL

By bundle, we mean a package offering a combination of electronic communication services (or a combination with other services such as TV channels) from the same provider at an overall price. Has your household subscribed to two or more of the following services as part of a bundle?

(SHOW SCREEN - READ OUT – MIN. 2 ANSWERS - CODES 1 AND 7 ARE EXCLUSIVE)

QA7_1 No, we have not bought services as part of a bundle

0 Not mentioned

1 Mentioned

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

qa7_4 - COMMUNICATION PACKAGE HH: INTERNET

QA7

ASK ALL

By bundle, we mean a package offering a combination of electronic communication services (or a combination with other services such as TV channels) from the same provider at an overall price. Has your household subscribed to two or more of the following services as part of a bundle?

(SHOW SCREEN - READ OUT – MIN. 2 ANSWERS - CODES 1 AND 7 ARE EXCLUSIVE)

QA7_4 Yes, fixed or mobile Internet access

0 Not mentioned

1 Mentioned

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

qa7t_1 - COMMUNICATION PACKAGE HH - COMBINATIONS (SUM)

Different compositions of communication packages in a household (summarized)

- 1 2+3+4+5
- 2 2+3+4
- 3 2+3+5
- 4 2+4+5
- 5 3+4+5
- 6 2+3
- 7 2+4
- 8 2+5
- 9 3+4
- 10 3+5
- 11 4+5
- 98 No combination (coded 1 in qa7_2 to qa7_5 only once and coded 1 in qa7_6)
- 99 Inap. No service mentioned (not coded 1 in qa7_2 to qa7_5)

Derivation:

This variable summarizes answers to qa7 by categorizing the different combinations of services (coded 1 in qa7_2 to qa7_5) contracted in communication packages. All respondents coded 1 only in qa7_1, qa7_6 or to qa7_7 ("No", "Other" and "DK" answers) are coded 99 (No service mentioned). The numbering of the services are based on the numeration of the subquestions (2 "TV channels", 3 "Fixed phone", 4 "Mobile phone", 5 "Internet").

[qa7 By bundle, we mean a combined package offering more than one communication service from the same provider at an overall price. Did your household buy two or more of the following services as part of a bundle?

- qa7_1 No, we have not bought services as part of a bundle
- qa7_2 Yes, fixed line telephone
- qa7_3 Yes, mobile telephone
- qa7_4 Yes, fixed or mobile Internet access
- qa7_5 Yes, television channels
- qa7_6 Other (SPONTANEOUS)
- qa7_7 DK]

Note:

See qa7 for complete question text.

Variable qa7t_1 was named qa7t1 in former versions of this dataset.

Derived variable qa7t_1 has been slightly corrected by the Archive. 69 cases coded 98 („Inap. (1 in qa7_2 to qa7_5 only once and 1 in qa7_6)“) in former versions have been recoded to substantial values in accordance with the input variables qa7_1 to qa7_7.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For

more information see w31 to wex_hh.

qa7t_2 - COMMUNICATION PACKAGE HH - YES (SUM)

Respondents who mention one or more services as part of a bundle - summarized

0 Not mentioned

1 Total 'Yes'

Derivation:

This variable summarizes answers to qa7_2 to qa7_5.

[qa7 By bundle, we mean a combined package offering more than one communication service from the same provider at an overall price. Did your household buy two or more of the following services as part of a bundle?

qa7_2 Yes, fixed line telephone

qa7_3 Yes, mobile telephone

qa7_4 Yes, fixed or mobile Internet access

qa7_5 Yes, television channels]

Note:

See qa7 for complete question text.

Variable qa7t_2 was named qa7t2 in former versions of this dataset.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

qa10_8 - BUNDLE PROVIDER CHANGE: RISK TO PAY TWICE

ASK QA8 TO QA10 IF "HAS A BUNDLE", CODES 2 TO 5 IN QA7 - OTHERS GO TO QA11

QA10

ASK QA10 IF "DID NOT CHANGE BUNDLE PROVIDER", CODE 5 IN QA9 – OTHERS GO TO QA11

Have you or someone in your household ever considered changing your bundle provider?

(SHOW SCREEN – READ OUT – ROTATE – MULTIPLE ANSWERS POSSIBLE)

QA10_8 Yes, but you don't want to take the risk of having to pay more two providers during the switching process

0 Not mentioned

qa10t - BUNDLE PROVIDER CHANGE: YES CONSIDERED (TOTAL)

Respondents who considered to change the bundle provider (summarized)

0 Not mentioned

1 Total 'Yes'

9 Inap. Bundle provider changed or DK in qa9 (not coded 5 in qa9)

Derivation:

This variable summarizes responses to qa10_2 to qa10_12.

[qa10 Have you or someone in your household ever considered changing your bundle provider?

qa10_2 Yes, but you are satisfied with the service you currently get

qa10_3 Yes, but there are no other bundle providers in the area where you live

qa10_4 Yes, but there are no other bundle providers which would provide good value for money

qa10_5 Yes, but you are currently bound by your contract with your current provider

qa10_6 Yes, but eventually your provider offered you better conditions and you decided not to switch

qa10_7 Yes, but you don't want to take the risk of a temporary loss of service during the switching process

qa10_8 Yes, but you don't want to take the risk of having to pay two providers during the switching process

qa10_9 Yes, but it is not clear what steps you would need to take to switch

qa10_10 Yes, but you do not want to lose your current e-mail address(es) or web page(s) hosted on the provider's server

qa10_11 Yes, but it takes too much effort and time to do it

qa10_12 Yes, but some services of the bundle could not be cancelled at the same time]

Note:

See qa10 for complete question text.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

Variables qa10t and qa10t_4 to qa10t_7 have been added to the dataset starting with version v4-0-0.

qa10t_4 - BUNDLE PROVIDER CHANGE: INERTIAL CONSUMERS - NEVER CHANGED (QA9 & QA10)

Group of inertial consumers with regard to changing bundle providers (qa9 and qa10) (base: households where no one has changed bundle service providers)

- 0 Not mentioned
- 1 Mentioned
- 9 Inap. Bundle provider changed or DK in qa9 (not coded 5 in qa9)

Derivation:

This variable shows the number of respondents who were coded 1 at least once for the following items of qa10: qa10_1, qa10_2, qa10_6, qa10_11.

[qa9 Have you or someone in your household changed service provider?

qa10 Have you or someone in your household ever considered changing your bundle provider?

qa10_1 No, you never considered it

qa10_2 Yes, but you are satisfied with the service you currently get

qa10_6 Yes, but eventually your provider offered you better conditions and you decided not to switch

qa10_11 Yes, but it takes too much effort and time to do it]

Note:

See qa9 and qa10 for complete question text.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

Variables qa10t and qa10t_4 to qa10t_7 have been added to the dataset starting with version v4-0-0.

qa11 - COMMUNICATION SERVICES - SAME CONSUMER PROTECTION FOR ALL

QA11

ASK ALL

Please tell me whether you agree or disagree with the following statement: The same level of consumer protection, including data protection and security, should be applied when using messaging services, e-mail services or phone service applications via the Internet as when using traditional communications services (such as phones or SMS).

(READ OUT – ONE ANSWER ONLY)

- 1 Totally agree
- 2 Tend to agree
- 3 Tend to disagree
- 4 Totally disagree
- 5 DK

qa12_3 - SERVICE PROVIDER CHANGE: YOUR E-MAILS / CONTACTS / CONTENT

QA12

QA12_3: ASK IF "INTERNET CONNECTION IN THE HOUSEHOLD", CODE 8 IN D46 OR IF "INTERNET MOBILE ACCESS IN THE HOUSEHOLD", CODE 1 TO 9 IN QA1_2

If you were to switch your communications service provider, how important would it be to keep each of the following?
(SHOW SCREEN – READ OUT – ONE ANSWER PER LINE)

QA12_3 Your e-mails, contacts, photos and any other personal content stored online by your communications service provider

- 1 Very important
- 2 Fairly important
- 3 Not very important
- 4 Not at all important
- 5 Not applicable (SPONTANEOUS)
- 6 DK
- 9 Inap. Households without internet access (coded 4 in internet)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qa13t - SERVICE CONTRACTS IN LAST 3 YEARS - YES (SUM)

Respondents who signed a new, renewed or amended contract for communication services - summarized

0 Not mentioned

1 Total 'Yes'

Derivation:

This variable summarizes answers to qa13_1 to qa13_6.

[qa13 In the last three years, have you personally signed a new, renewed, or amended contract for any of the following services?

qa13_1 Yes, fixed Internet access

qa13_2 Yes, mobile internet access

qa13_3 Yes, mobile phone

qa13_4 Yes, fixed phone

qa13_5 Yes, television

qa13_6 Yes, a bundle]

Note:

See qa13 for complete question text.

qa14 - SERVICE CONTRACT - READ TERMS OF CONTRACT ON USER RIGHTS

QA14

ASK QA14 AND QA15 IF "HAS SIGNED A COMMUNICATIONS CONTRACT", CODE 1 TO 6 IN QA13 – OTHERS GO TO QA16

The last time you signed a contract for a communications service, did you read the terms of the contract about user rights?

(READ OUT - ONE ANSWER ONLY)

- 1 Yes, entirely
- 2 Yes, partly
- 3 No
- 4 DK
- 9 Inap. Not signed a communication contract or DK in qa13 (not coded 1 in qa13_1 or qa13_6)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qa15_1 - SERVICE CONTRACT: CLEAR INFORMATION ON QUALITY

ASK QA14 AND QA15 IF "HAS SIGNED A COMMUNICATIONS CONTRACT", CODE 1 TO 6 IN QA13 – OTHERS GO TO QA16

QA15

ASK QA15 IF "HAS READ TELECOMMUNICATIONS CONTRACTS BEFORE SIGNING THEM", CODES 1 OR 2 IN QA14 – OTHERS GO TO QA16

Please tell me whether you agree or disagree with each of the following statements. The contract you signed provided sufficient and clear information on...

(SHOW SCREEN – READ OUT – ONE ANSWER PER LINE)

QA15_1 The quality of the services subscribed to

- 1 Totally agree
- 2 Tend to agree
- 3 Tend to disagree
- 4 Totally disagree
- 5 DK
- 9 Inap. Not read telecommunication contract before signing or DK in qa14 (not coded 1 or 2 in qa14)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

- 9 Inap. Not read telecommunication contract before signing or DK in qa14 (not coded 1 or 2 in qa14)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

qa15t - SERVICE CONTRACT - SATISFACTION WITH INFORMATION (SUM)

Level of satisfaction with information in communication contracts

- 1 High satisfaction
- 2 Medium satisfaction
- 3 Low satisfaction
- 4 No satisfaction
- 9 Inap. Not read telecommunication contract before signing or DK in qa14 (not coded 1 or 2 in qa14)

Derivation:

This variable summarizes responses to qa15 in four categories.

[qa15 Please tell me whether you agree or disagree with each of the following statements. The contract you signed provided sufficient and clear information on...

qa15_1 The quality of the services subscribed to

qa15_2 The termination (including possible charges for early cancellation)

qa15_3 Its duration and renewal or roll over conditions]

Respondents coded 1 ("Totally agree") or coded 2 ("Tend to agree") in each variable qa15_1 to qa15_3 are coded 1 ("High satisfaction") in qa15t. Respondents coded 1 ("Totally agree") or coded 2 ("Tend to agree") in two of the variables qa15_1 to qa15_3 are coded 2 ("Medium satisfaction") in qa15t. Respondents coded 1 ("Totally agree") or coded 2 ("Tend to agree") in one of the variables qa15_1 to qa15_3 are coded 3 ("Low satisfaction") in qa15t. Respondents coded 5 ("DK") in each variable qa15_1 to qa15_3 or not coded 1 ("Totally agree") or 2 ("Tend to agree") in qa15_1 to qa15_3 are coded 4 ("No satisfaction") in qa15t.

Note:

See qa15 for complete question text.

qa17 - COMM SERVICE CONTRACT - ENHANCED QUALITY FOR LONGER PERIOD

QA17

ASK QA17 IF "INTERNET CONNECTION IN THE HOUSEHOLD", CODE 8 IN D46 – OTHERS GO TO QA18

The maximum duration of a communication services contract is currently two years. Would you be prepared to sign a contract with a provider for a longer period in exchange for a much higher speed and enhanced quality of service?

(READ OUT – ONE ANSWER ONLY)

- 1 Yes, certainly
- 2 Yes, probably
- 3 No, probably not
- 4 No, certainly not
- 5 DK
- 9 Inap. No internet connection in the household (not coded 1 in d46_8)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qb1t_4 - EU CUSTOMS: PROTECT ENVIRONM / CULT HERITAGE (SUM QB1_11 & QB1_12)

Associations with EU customs - answers with regard to protect European environment and cultural heritage summarized

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes answers to qb1_11 and qb1_12.

[qb1

qb1_11 Protection of the environment (incl. trade in hazardous waste, endangered species)

qb1_12 Protecting cultural heritage (incl. archaeological artefacts from EU Member States or other countries)]

Note:

See qb1 for complete question text.

Variable qb1t_4 was named qb1t4 in former versions of this dataset.

qb2t_4 - EU CUSTOMS KNOWLEDGE: 2 CORRECT ANSWERS

EU customs knowledge - Two correct answers

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes answers to qb2_1 to qb2_4. It subsumes respondents who are coded two correct answers.

[qb2 For each of the following statements about EU customs, could you please tell me whether you think it is true or false?

qb2_1 EU customs controls passports at borders, whether at airports, sea ports, road or rail crossings

qb2_2 EU customs also acts on behalf of other government agencies such as health and environmental authorities to enforce legislation other than customs legislation at the EU borders

qb2_3 EU customs checks goods crossing the border between EU Member States

qb2_4 Customs duties on goods from outside the EU are only paid once when imported and then they can move freely within the EU]

Note:

See qb2 for complete question text.

Variable qb2t_4 was named qb2t4 in former versions of this dataset.

qb4a - EU CUSTOMS ACTIVITIES MOST IMPORTANT - FIRSTLY

QB4A

In your opinion, which of the following should be EU customs' three most important activities? Firstly?

(SHOW SCREEN – READ OUT – ONE ANSWER ONLY)

- 1 Collect taxes (customs duties, VAT or excise duties)
- 2 Fight against smuggling and fraud (e.g. illegal drugs, contraband cigarettes, avoiding payment of customs duties, VAT, excise duties)
- 3 Protect businesses from illegal or unfair trade (e.g. seizing fake products)
- 4 Protect citizens from security threats (e.g. terrorism, trafficking of illegal weapons or dangerous goods such as nuclear waste)
- 5 Facilitate international trade (cut red tape, compliance costs, etc.)
- 6 Ensure the safety of citizens (enforce rules on animal, plant and public health, product safety, etc.)
- 7 Protect the environment (enforce the rules on protected or endangered species, illegal waste) and control trade in cultural goods (artistic, historic, archaeological goods, etc.)
- 8 Other (SPONTANEOUS)
- 9 None (SPONTANEOUS)
- 10 DK

qc9 - CAP FARMERS INCOME SUPPORT - ASSESSMENT

QC9

The EU gives financial support to farmers to help them to stabilise their incomes. This aid represents around 1% of the combined public expenditure of the 28 Member States of the EU and almost 40% of the total EU budget. Do you think that this support is too low, about right or too high?

(ONE ANSWER ONLY)

- 1 Too low
- 2 About right
- 3 Too high
- 4 DK

qc10_1 - CAP BUDGET REASONS: ALMOST ENTIRELY FINANCED

QC10

What do you think are the main reasons why the EU spends a significant proportion of its budget (almost 40% of the total EU budget) on the Common Agricultural Policy?

(SHOW CARD – READ OUT – MAX. 2 ANSWERS - CODES 7 AND 8 ARE EXCLUSIVE)

QC10_1 Agriculture is a sector financed almost entirely by the EU budget, rather than at national or local level

qc10_2 - CAP BUDGET REASONS: GUARANTEE FOOD SUPPLY

QC10

What do you think are the main reasons why the EU spends a significant proportion of its budget (almost 40% of the total EU budget) on the Common Agricultural Policy?

(SHOW CARD – READ OUT – MAX. 2 ANSWERS - CODES 7 AND 8 ARE EXCLUSIVE)

QC10_2 Financial aid to farmers makes it possible to guarantee the food supply of Europeans

qc10_5 - CAP BUDGET REASONS: COSTS OF STRICT STANDARDS

QC10

What do you think are the main reasons why the EU spends a significant proportion of its budget (almost 40% of the total EU budget) on the Common Agricultural Policy?

(SHOW CARD – READ OUT – MAX. 2 ANSWERS - CODES 7 AND 8 ARE EXCLUSIVE)

QC10_5 The production of food products in the EU is more expensive than in other countries, because of stricter standards, e.g. Animal welfare

qc12t - AWARENESS OF LOGOS - AT LEAST ONE (SUM)

Awareness of logos - at least one logo

0 Not mentioned (NONE/DK)

1 Aware of at least one logo

Derivation:

This variable summarizes answers to qc12_1 to qc12_5. It subsumes respondents who are coded at least one logo.

[qc12 Which of the logos on this card are you aware of?

qc12_1 LOGO 1 [Organic Farming]

qc12_2 LOGO 2 [Fairtrade]

qc12_3 LOGO 3 [Protected Designation of Origin]

qc12_4 LOGO 4 [Protected Geographical Indication]

qc12_5 LOGO 5 [Traditional Speciality Guaranteed]]

Note:

See qc12 for complete question text.

qc14_1 - FARMER PAYMENT PROVISIO: FOOD SAFETY STANDARDS

QC14

Under the rules of the Common Agricultural Policy (CAP), farmers' payments are linked to the requirement to comply with rules for the environment, food safety and animal welfare (so-called "cross compliance"). To what extent do you think that it is justified or unjustified to reduce farmers' subsidy payments to farmers who do not respect...?

(SHOW SCREEN – READ OUT – ONE ANSWER PER LINE)

QC14_1 Food safety standards

- 1 Totally justified
- 2 Somewhat justified
- 3 Somewhat unjustified
- 4 Totally unjustified
- 5 DK

qc14_2 - FARMER PAYMENT PROVISIO: ANIMAL WELFARE STANDARDS

QC14

Under the rules of the Common Agricultural Policy (CAP), farmers' payments are linked to the requirement to comply with rules for the environment, food safety and animal welfare (so-called "cross compliance"). To what extent do you think that it is justified or unjustified to reduce farmers' subsidy payments to farmers who do not respect...?

qc15 - PAYMENTS TO FARMERS FOR GREENING PRACTICES - APPROVAL

QC15

The EU is currently giving payments to farmers for carrying out agricultural practices beneficial to the climate and the environment (so called "greening"), such as crop diversification and maintenance of permanent grassland. Are you in favour or opposed to the EU continuing to do so?

(READ OUT – ONE ANSWER ONLY)

- 1 Totally in favour
- 2 Somewhat in favour
- 3 Somewhat opposed
- 4 Totally opposed
- 5 DK

d1r1 - LEFT-RIGHT PLACEMENT: 3 CAT (RECODED)

Left-right placement - recoded to three categories

- 1 (1 - 4) Left
- 2 (5 - 6) Centre
- 3 (7 -10) Right
- 9 DK/Refusal (Spontaneous)

Derivation:

This variable collapses answers to d1 into three categories.

[d1 In political matters people talk of "the left" and "the right". How would you place your views on this scale?]

Note:

See d1 for complete question text.

d7 - MARITAL STATUS

D7

Which of the following best corresponds to your own current situation?

(SHOW SCREEN – READ OUT – ONE ANSWER ONLY - CODE "NO ANSWER" IN CODE 16)

MARRIED OR REMARRIED

- 1 Living without children
- 2 Living with the children of this marriage
- 3 Living with the children of a previous marriage
- 4 Living with the children of this marriage and of a previous marriage

SINGLE LIVING WITH A PARTNER

- 5 Living without children
- 6 Living with the children of this union
- 7 Living with the children of a previous union
- 8 Living with the children of this union and of a previous union

SINGLE

- 9 Living without children
- 10 Living with children

DIVORCED OR SEPARATED

- 11 Living without children
- 12 Living with children

WIDOW/ER

- 13 Living without children
- 14 Living with children

15 Other (SPONTANEOUS)

97 Refusal (SPONTANEOUS)

d7r1 - MARITAL STATUS: 5 CAT (RECODED)

Marital status recoded to five categories with focus on partnership

- 1 (Re-)Married (coded 1 to 4 in d7)
- 2 Single living with partner (coded 5 to 8 in d7)
- 3 Single (coded 9 to 10 in d7)
- 4 Divorced or separated (coded 11 to 12 in d7)
- 5 Widow (coded 13 to 14 in d7)
- 6 Other (SPONTANEOUS)
- 7 Refusal (SPONTANEOUS)

Derivation:

This variable collapses answers to d7 into five categories.

[d7 Which of the following best corresponds to your own current situation?]

Note:

See d7 for complete question text.

d7r2 - MARITAL STATUS: 4 CAT (RECODED)

Marital status recoded to four categories with focus on marriage

- 1 Unmarried (coded 9 to 10 in d7)
- 2 (Re-)Married/Single with partner (coded 1 to 8 in d7)
- 3 Divorced or separated (coded 11 to 12 in d7)
- 4 Widow (coded 13 to 14 in d7)
- 5 Other (SPONTANEOUS)
- 7 Refusal (SPONTANEOUS)

Derivation:

This variable collapses answers to d7 into four categories.

[d7 Which of the following best corresponds to your own current situation?]

Note:

See d7 for complete question text.

d11r1 - AGE: 4 GROUPS (RECODED)

Age of respondent - recoded to four categories

- 1 15 - 24 years
- 2 25 - 39 years
- 3 40 - 54 years
- 4 55 years and older [including outlier for SI]

Derivation:

This variable collapses answers to d11 into four categories.

[d11 How old are you?]

Note:

See d11 for complete question text.

d11r3 - AGE: 7 GROUPS (RECODED)

Age of respondent - recoded to seven categories

- 1 15 - 24 years
- 2 25 - 34 years
- 3 35 - 44 years
- 4 45 - 54 years
- 5 55 - 64 years
- 6 65 - 74 years
- 7 75 years and older
- 9 NA [see code 99 in d11]

Derivation:

This variable collapses answers to d11 into seven categories.

[d11 How old are you?]

Note:

See d11 for complete question text.

gen1 - GENERATION BEFORE 1928 (AGE 88 AND OLDER)

Generation born before 1928 (age 88 and older)

0 Not mentioned

1 Mentioned [incl. '99' in d11]

Derivation:

This variable summarizes all respondents born before 1928 and is based on questions d11 ("How old are you?"). Please note that variables gen1 to gen6 are based on age instead of year of birth, which may entail a slightly inaccurate categorization for some respondents.

Note:

See d11 for complete question text.

d8 - AGE EDUCATION

D8

How old were you when you stopped full-time education?

(IF "STILL STUDYING", CODE '00' – IF "NO EDUCATION" CODE '01' – IF "REFUSAL" CODE '98' – IF "DK" CODE '99' - CODE "NO ANSWER" IN CODE 98)

(MAKE SURE THE RESPONDENT UNDERSTANDS THAT D8 IS ABOUT FULL-TIME EDUCATION)

0 Refusal

2 2 years

86 86 years

97 No full-time education

98 Still studying

99 DK

Note:

Original code "00" recoded to "98".

Original code "01" recoded to "97".

Original code "98" recoded to "0".

Please note that users might be advised to consider pre-school ages (outliers) as with "no full-time education" or to treat them as missing values.

Actual number is coded.

Comparability:

Last trend: EB84.1, D8

d8r1 - AGE EDUCATION: 11 CAT (RECODED)

Age when finished full-time education - recoded to 11 categories

- 1 Up to 14 years
- 2 15 years
- 3 16 years
- 4 17 years
- 5 18 years
- 6 19 years
- 7 20 years
- 8 21 years
- 9 22 years and older
- 10 Still studying
- 11 No full-time education
- 97 Refusal
- 98 DK

Derivation:

This variable collapses answers to question d8 for indicated ages lowest (2) to 14 and 22 to highest (86).

[d8 How old were you when you stopped full-time education?]

Note:

See d8 for complete question text.

d8r2 - AGE EDUCATION: 5 CAT (RECODED)

Age when finished full-time education - recoded to five categories

- 1 Up to 15 years
- 2 16-19 years
- 3 20 years and older
- 10 Still studying
- 11 No full-time education
- 97 Refusal
- 98 DK

Derivation:

This variable collapses answers to question d8 into three age groups.

[d8 How old were you when you stopped full-time education?]

Note:

See d8 for complete question text.

d15a - OCCUPATION OF RESPONDENT

D15A

What is your current occupation?

(DO NOT SHOW SCREEN - "NO ANSWER" NOT ALLOWED - IF D15A=2 THEN D8=00 - IF D15<>2 AND D8=00 THEN CORRECT D8 OR CHANGE THE ANSWER IN D15A)

NON-ACTIVE

- 1 Responsible for ordinary shopping and looking after the home, or without any current occupation, not working
- 2 Student
- 3 Unemployed or temporarily not working
- 4 Retired or unable to work through illness

SELF EMPLOYED

- 5 Farmer
- 6 Fisherman
- 7 Professional (lawyer, medical practitioner, accountant, architect, etc.)
- 8 Owner of a shop, craftsmen, other self-employed person
- 9 Business proprietors, owner (full or partner) of a company

EMPLOYED

- 10 Employed professional (employed doctor, lawyer, accountant, architect)
- 11 General management, director or top management (managing directors, director general, other director)
- 12 Middle management, other management (department head, junior manager, teacher, technician)
- 13 Employed position, working mainly at a desk
- 14 Employed position, not at a desk but travelling (salesmen, driver, etc.)
- 15 Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, etc.)
- 16 Supervisor
- 17 Skilled manual worker
- 18 Other (unskilled) manual worker, servant

d15a_r1 - OCCUPATION OF RESPONDENT (RECODED)

Occupation of respondent - recoded to employment status

- 1 Self-employed (coded 5 to 9 in d15a)
- 2 Employed (coded 10 to 18 in d15a)
- 3 Not working (coded 1 to 4 in d15a)

Derivation:

This variable collapses answers to d15a into three categories.

[d15a What is your current occupation?]

Note:

See d15a for complete question text.

d15a_r2 - RESPONDENT OCCUPATION SCALE (C14)

Occupation of respondent - scale (C14)

- 1 Self-employed (coded 5 to 9 in d15a)
- 2 Managers (coded 10 to 12 in d15a)
- 3 Other white collars (coded 13 or 14 in d15a)
- 4 Manual workers (coded 15 to 18 in d15a)
- 5 House persons (coded 1 in d15a)
- 6 Unemployed (coded 3 in d15a)
- 7 Retired (coded 4 in d15a)
- 8 Students (coded 2 in d15a)

Derivation:

This scale is based on a combination/selection of answers to variable d15a.

[d15a What is your current occupation?]

Note:

See d15a for complete question text.

d15b - OCCUPATION OF RESPONDENT - LAST JOB

[D15A

What is your current occupation?]

D15B

ASK D15B IF "NOT DOING ANY PAID WORK CURRENTLY", CODES 1 TO 4 IN D15A

Did you do any paid work in the past? What was your last occupation?

(DO NOT SHOW SCREEN – "NO ANSWER" NOT ALLOWED)

SELF EMPLOYED

- 1 Farmer
- 2 Fisherman
- 3 Professional (lawyer, medical practitioner, accountant, architect, etc.)
- 4 Owner of a shop, craftsmen, other self-employed person
- 5 Business proprietors, owner (full or partner) of a company

EMPLOYED

- 6 Employed professional (employed doctor, lawyer, accountant, architect)
- 7 General management, director or top management (managing directors, director general, other director)
- 8 Middle management, other management (department head, junior manager, teacher, technician)
- 9 Employed position, working mainly at a desk
- 10 Employed position, not at a desk but travelling (salesmen, driver, etc.)
- 11 Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, etc.)
- 12 Supervisor
- 13 Skilled manual worker
- 14 Other (unskilled) manual worker, servant

15 Never did any paid work

99 Inap. Currently doing paid work (not coded 1 to 4 in d15a)

Note:

In accordance with former waves coding has been (correctly) shifted compared to the questionnaire.

d15b_r - OCCUPATION OF RESPONDENT - LAST JOB (RECODED)

Occupation of respondent: last job - recoded to employment status

- 1 Self-employed (coded 1 to 5 in d15b)
- 2 Employed (coded 6 to 14 in d15b)
- 3 Never paid work (coded 15 in d15b)
- 9 Inap. Currently doing paid work (not coded 1 to 4 in d15a)

Derivation:

This variable collapses answers to d15b into three categories.

[d15b Did you do any paid work in the past? What was your last occupation?]

Note:

See d15b for complete question text.

d40t - HOUSEHOLD COMPOSITION: SIZE (SUMMARIZED)

n of people in household - summarized

- 1 One
- 2 Two
- 3 Three
- 4 Four
- 5 Five
- 6 Six
- 7 Seven
- 8 Eight
- 9 Nine
- 10 Ten
- 11 Eleven
- 12 Twelve
- 13 Thirteen
- 14 Fourteen
- 15 Fifteen
- 16 Sixteen
- 17 Seventeen
- 18 Eighteen
- 19 Nineteen
- 20 Twenty
- 21 Twenty-one
- 22 Twenty-two
- 99 DK/NA (coded 99 in d40c)

Derivation:

This variable summarizes d40a, d40b, and d40c.

[d40a Could you tell me how many people aged 15 years or more live in your household, yourself included?

d40b Could you tell me how many children aged 10 to 14 years old live in your household?

d40c Could you tell me how many children less than 10 years old live in your household?]

Note:

See d40a, d40b, and d40c for complete question text.

Variable d40t was named d40abc in former versions of this dataset.

Generated by the Archive in accordance with former surveys.

d40t_r - HOUSEHOLD COMPOSITION: SIZE A+B+C (RECODED)

n of people in household - recoded to four categories

- 1 One
- 2 Two
- 3 Three
- 4 Four or more
- 9 DK/NA (coded 99 in d40c)

Derivation:

This variable groups the summarized variable d40t.

[d40a Could you tell me how many people aged 15 years or more live in your household, yourself included?

d40b Could you tell me how many children aged 10 to 14 years old live in your household?

d40c Could you tell me how many children less than 10 years old live in your household?]

Note:

See d40a, d40b, and d40c for complete question text.

Variable d40t_r was named d40abc_r in former versions of this dataset.

d40t_r by isocntry, Absolute Values (Row Percent), weighted by w1

d40_d11 - ONE-PERSON HOUSEHOLD COMPOSITION BY AGE

One-person households - recoded to three age categories

- 1 15 - 29 years
- 2 30 - 59 years
- 3 60 years and older [incl. '99' in d11]
- 9 Inap. No one-person-household (not coded 1 in d40t)

Derivation:

This variable collapses answers to d11 into three age categories, but only for one-person households.

[d11 How old are you?

d40a Could you tell me how many people aged 15 years or more live in your household, yourself included?

d40b Could you tell me how many children aged 10 to 14 years old live in your household?

d40c Could you tell me how many children less than 10 years old live in your household?]

Note:

See d11 and d40a, d40b, and d40c for complete question text.

d60 - DIFFICULTIES PAYING BILLS - LAST YEAR

D60

During the last twelve months, would you say you had difficulties to pay your bills at the end of the month...?

(SHOW SCREEN – READ OUT – ONE ANSWER ONLY - CODE "NO ANSWER" IN CODE 4)

- 1 Most of the time
- 2 From time to time
- 3 Almost never/never
- 7 Refusal (SPONTANEOUS)

Note:

Original code "4" recoded to "7".

d62t1 - INTERNET USE - INDEX 1 (4 CAT)

Frequency of internet use - index with four categories

- 1 Everyday/Almost everyday (at least once coded 1 in d62_1 to d62_3)
- 2 Often/sometimes (at least once coded 2 to 5 in d62_1 to d62_3)
- 3 Never/No access (coded 6/7 or coded 6 in d62_1 to d62_3)
- 4 No internet access at all (coded 7 in d62_1 to d62_3)

Derivation:

This variable summarizes responses to d62 in four categories.

[d62 Could you tell me if you use the internet ...?

d62_1 At home, in your home

d62_2 On your place of work

d62_3 Somewhere else (school, university, cyber-café, etc.)]

Respondents coded 1 at least once in d62_1 to d62_3 are coded 1 in d62t1 ("Everyday/Almost everyday"). Respondents coded 2, 3, 4 or 5 in each variable d62_1 to d62_3 are coded 2 ("Often/sometimes") in d62t1. Respondents coded 6 ("Never") in each variable d62_1 to d62_3 are coded 3 ("Never to all") in d62t1. Respondents coded 6 ("Never") in each variable d62_1 to d62_3, or at least once coded 6 in d62_1 to d62_3 and coded 7 ("No internet access") in the other variable(s), are coded 3 ("Never/No access") in d62t1. Respondents coded 7 ("No internet access") in each variable d62_1 to d62_3 are coded 4 ("No internet access at all") in d62t1.

Note:

See d62 for complete question text.

Please note that categories 3 and 4 of index variable d62t1 in EB 84.2 might differ from former surveys.

Variable d62t1 was named d62t in former versions of this dataset.

d62t2 - INTERNET USE - INDEX 2 (7 CAT)

Frequency of internet use - index with seven categories

- 1 Everyday/Almost everyday (at least once coded 1 in d62_1 to d62_3)
- 2 Two or three times a week (not coded 1 and at least once coded 2 in d62_1 to d62_3)
- 3 About once a week (not coded 1 to 2 and at least once coded 3 in d62_1 to d62_3)
- 4 Two or three times a month (not coded 1 to 3 and at least once coded 4 in d62_1 to d62_3)
- 5 Less often (not coded 1 to 4 and at least once coded 5 in d62_1 to d62_3)
- 6 Never/No access (coded 6/7 or coded 6 in d62_1 to d62_3)
- 7 No Internet access at all (coded 7 in d62_1 to d62_3)

Derivation:

This variable summarizes responses to d62.

[d62 Could you tell me if you use the internet ...?

d62_1 At home, in your home

d62_2 On your place of work

d62_3 Somewhere else (school, university, cyber-café, etc.)]

Respondents coded 1 at least once in d62_1 to d62_3 are coded 1 in d62t2 ("Everyday/Almost everyday"). Respondents coded 2 at least once in d62_1 to d62_3 and not coded 1, are coded 2 in d62t2 ("Two or three times a week"). Respondents coded 3 at least once in d62_1 to d62_3 and not coded 1 or 2, are coded 3 in d62t2 ("About once a week"). Respondents coded 4 at least once in d62_1 to d62_3 and not coded 1 to 3, are coded 4 in d62t2 ("Two or three times a month"). Respondents coded 5 at least once in d62_1 to d62_3 and not coded 1 to 4, are coded 5 in d62t2 ("Less often"). Respondents coded 6 ("Never") in each variable d62_1 to d62_3, or at least once coded 6 in d62_1 to d62_3 and coded 7 ("No internet access") in the other variable(s), are coded 6 ("Never/No access") in d62t2. Respondents coded 7 ("No internet access") in each variable d62_1 to d62_3 are coded 7 ("No internet access at all") in d62t2.

Note:

See d62 for complete question text.

Generated by the Archive in accordance with former surveys.

Variable d62t2 was named netuse in former versions of this dataset.

d63 - SOCIAL CLASS - SELF-ASSESSMENT (5 CAT)

D63

Do you see yourself and your household belonging to...?

(SHOW SCREEN – READ OUT – ONE ANSWER ONLY - CODE "NO ANSWER" IN CODE 8)

- 1 The working class of society
- 2 The lower middle class of society
- 3 The middle class of society
- 4 The upper middle class of society
- 5 The higher class of society
- 6 Other (SPONTANEOUS)
- 7 None (SPONTANEOUS)
- 97 Refusal (SPONTANEOUS)
- 98 DK

Note:

Original code "8" recoded to "97".

Original code "9" recoded to "98".

Starting with Eurobarometer 82.3 demographic variable d63 „SOCIAL CLASS - SELF-ASSESSMENT (5 CAT)“ consists of five categories instead of three categories.

polintr - POLITICAL INTEREST INDEX (D71_1/2/3)

Index of interest in politics

- 0 DK (coded 4 in d71_1, d71_2 and d71_3)
- 1 Not at all interested in politics
- 2 Slightly interested in politics
- 3 Moderately interested in politics
- 4 Strongly interested in politics

Derivation:

The POLITICAL INTEREST INDEX is based on the answers to the following question: "When you get together with friends or relatives, would you say you discuss frequently, occasionally or never about (national/European/local) political matters?" (d71_1, d71_2, and d71_3).

According to former studies the index was constructed by first attributing a score to each item in d71 ("Never" = 0; "Occasionally" = 1; "Frequently" = 2) and then adding together the three political dimensions (national/European/local). This procedure results in four different index levels ("Not at all interested in politics" if added up score = 0; "Slightly" if added up score = 1 or 2; "Moderately" if added up score = 3 or 4; "Strongly" if added up score = 5 or 6) which have been coded accordingly into the categories 1 to 4. Furthermore combinations with DK responses in maximum two variables (d71_1, d71_2, and d71_3) have been coded as follows: "DK" and "Never" = "Not at all"; "DK" and "Never" and "Occasionally" or "Frequently" = "Slightly"; "DK" and "Occasionally" and at least one "Frequently" = "Moderately".

Note:

This new POLITICAL INTEREST INDEX is introduced as C2 starting with EB 73.4. Please notice that in former waves up to EB 69.2 the VALUE ORIENTATION - POST-MATERIALISM index was named C2.

Compared to the original variable the scale has been inversed by the archive in accordance with former practice. Furthermore responses coded 'DK' to all source variables (d71_1, d71_2, and d71_3) have been recoded to '0' (DK).

Modified by the Archive.

See d71 for complete question text.

p6fr - SIZE OF COMMUNITY - FRANCE

p6fr Objective size of community: France

- 1 Rural area
- 2 Towns and suburbs/small urban area
- 3 Cities/large urban area
- 99 Inap. (not FR in isocntry)

Note:

Starting with Eurobarometer 81.3 (with 84.1 for Germany), the category scheme for country specific protocol variables P6 (SIZE OF COMMUNITY) has changed considerably. Categories for all countries have been harmonized among each other to three values (Rural area - Towns and suburbs/small urban area - Cities/large urban areas).

p7pt - REGION - PORTUGAL NUTS 2

p7pt Portugal (EUROSTAT NUTS 2 LEVEL) – Comissaoes de Coordenação regional + Regioes autonomas

- 1 Norte (North) [PT]
- 2 Centro (Center) [PT]
- 3 Área Metropolitana de Lisboa (Lisbon metropolitan area)
- 4 Alentejo (Alentejo Region)
- 5 Algarve
- 99 Inap. (not PT in isocntry)

Note:

The autonomous regions of the Azores (PT20 - Região Autónoma dos Açores) and of Madeira (PT30 - Região Autónoma da Madeira) are not covered.

Since 2002 the region "Lisboa e vale do tejo" is split up and the subregion "Lezíria do Tejo" reinstated to the "Alentejo" Region and the "Médio Tejo" and "Oeste" reinstated to the "Centro" Region. The relative frequencies for each region indicate that this is reflected in the Eurobarometer P.7 regions starting with Eurobarometer 62.0. The original label for category '3' ("Lisboa e vale do Tejo") has been edited accordingly. According to the NUTS 2 specifications for Portugal this now only includes "Grande Lisboa" and "Península de Setúbal".

Please note that according to the NUTS version 2013 with regular amendment as of January 1, 2015, and starting with Eurobarometer 83.1 category "3" is labelled "Área Metropolitana de Lisboa".

The official NUTS categories are coded and documented in the integrated alphanumeric NUTS CODES variable 'nuts'.

Derivation:

This additional alphanumeric NUTS CODES variable is produced by the archive. It integrates all country specific p7 variables given that the regional units are defined in accordance with the EUROSTAT Nomenclature of Territorial Units for Statistics (NUTS) respectively in accordance with the Statistical Regions for Candidate and EFTA Countries 2010. For each country the lowest available NUTS subdivision level is considered.

Note:

The official NUTS codes are coded verbatim in accordance with the in each case valid (applicable) NUTS version. All version details and changes are documented in the official EUROSTAT classification history (History of NUTS). A second variable (nutslvl) indicates the coded NUTS LEVEL for each country.

France:

The territorial unit of Corse (FR83) and the Oversea departments (Départements d'outre-mer: FR9) are not covered.

Italy:

Starting with Eurobarometer wave 77 (NUTS version 2010 with regular amendment as of January 1, 2012) NUTS 1 codes for Italy have changed for North-East (ITH instead of ITD) and Center (ITI instead of ITE). The reason for this are minor boundary shifts on NUTS 2 and 3 level (ITI3: Marche and ITH5: Emilia Romagna).

Ireland:

Starting with EB 81.3 the category scheme for country specific protocol variable P7 (REGION) has changed for Ireland introducing NUTS 3 categories.

Greece:

The Aegean Islands (EL41 - Βόρειο Αιγαίο/Voreio Aigaio and EL42 - Νότιο Αιγαίο/Notio Aigaio) as well as the Ionian Islands (EL22 - Ιόνια Νησιά/Ionia Nisia) are not covered.

Starting with Eurobarometer wave 77 (NUTS version 2010 with regular amendment as of January 1, 2012) the standard country prefix 'GR' is replaced by 'EL'. The remaining numerical part of the codes remains unaffected.

Spain:

The autonomous cities of Ceuta (ES63 - Ciudad Autónoma de Ceuta) and Melilla (ES64 - Ciudad Autónoma de Melilla) are not covered.

Portugal:

The autonomous regions of the Azores (PT20 - Região Autónoma dos Açores) and of Madeira (PT30 - Região Autónoma da Madeira) are not covered.

Please note that according to the NUTS version 2013 with regular amendment as of January 1, 2015, and starting with Eurobarometer 83.1 code "PT17" is labelled "Área Metropolitana de Lisboa".

Finland:

Starting with EB 81.3 for Finland only one country specific protocol variable P7 (REGION) is available. The variable p7fi corresponds to the NUTS 2 breakdown in accordance to NUTS 2010 with regular amendment as of January 1, 2012. The NUTS 3 breakdown is no longer available for Finland.

Estonia:

Starting with EB 81.3 the category scheme for country specific protocol variable P7 (REGION) has changed for Estonia introducing the official NUTS 3 categories.

Bulgaria:

Starting with EB 81.3 for Bulgaria only one country specific protocol variable P7 (REGION) is available. The NUTS 3 breakdown is no longer available for Bulgaria.

Croatia:

Starting with EB 81.3 the category scheme for country specific protocol variable P7 (REGION) has changed for Croatia introducing the

NUTS 2 and NUTS 3 categories.

Comparability:

w3a - WEIGHT RESULT FROM TARGET - UNITED GERMANY

w3a Weight result from target - United Germany

This weight combines the weighting factors for Germany as a whole (redressment factors plus populations size factors East/West) and the redressment factors for all other countries (Great Britain and Northern Ireland separated). This weight has been derived by the archive from original TNS weights w1 and w3. Unlike weighting variable w3 (WEIGHT UNITED GERMANY (ONLY)) the other countries/samples are not excluded from calculation.

Note:

Starting with Eurobarometer 75.4 and according to available weights up to Eurobarometer 61, the archive is deriving three additional weights (w3a, w4a, w3a4a) in order to provide for the analysis of the United Kingdom and/or Germany, each as a whole and together with all other countries. Minimal deviations in frequencies for weighted data are possible due to rounding differences.

w3a
