Horst Baumann

Responsible for the preparation of this Variable Report:

Petra Brien  
Sebastian Stecker

## Introduction and preliminary remarks

The GESIS Variable Report Series on the International Social Survey Programme Studies offers a comprehensive description of data on study and variable level. For each annual module as well as for the cumulated data sets individual Variable Reports are provided.

The reports are structured into six chapters:

Chapter one gives a brief overview of the worldwide ISSP project as a whole.

Chapter two provides the description of the respective ISSP study including bibliographic information, abstract and methodological specifications.

Chapter three contains information on study related survey materials which are absolutely essential to understand the data properly, followed by general information about the structure of ISSP data sets, documentation standards and variable coding frames in chapter four.

Chapter five provides a short explanation of the variable documentation itself.

Chapter six contains the core variable documentation: the documentation of each variable including complete question texts with all answer categories of the Basic Questionnaire enriched with archival remarks. In addition, this Variable Report presents cross tabulations over countries for all substantial and most of the demographic variables. Archive, protocol and country specific variables are usually shown by descriptive statistics or frequency distributions. All cross tabulations, descriptive statistics and frequency distributions are based on unweighted data.

The appendix usually contains two sorts of survey materials: the Study Descriptions and, if available, the Characteristics of National Population, basic statistics for all the participating countries of the corresponding module. The data for the annual ISSP modules are collected by independent institutions in each country. The country data is integrated into one international data file, which is documented, distributed and long-term archived by the ISSP Archive, institutionally, the GESIS Data Archive for the Social Sciences (Leibniz Institute for the Social Sciences) in Cologne, Germany (<https://www.gesis.org/issp/home/>). In every second year from 1997 on, data and documentation have predominantly been prepared by our partners at JDS/ ASEP in Spain (<http://www.jdsurvey.com>).

## Data access

Data for statistical analysis along with information about this data such as version history and errata are made available by the Data Catalogue (<https://dbk.gesis.org/dbksearch/home.asp>).

The Data Online Platform ZACAT of GESIS (<https://zacat.gesis.org>) provides data documentations and additionally enables users to analyze data online.

Access to the Data Catalogue and ZACAT is free of charge, download of data sets requires registration.

## Anonymized data

According to data regulations in participating countries, only anonymized data are made available. Each national team is responsible for carefully checking the data in this respect before the deposit.

## Usage requirements

To provide funding agencies with essential information about the use of archival resources and to facilitate the exchange of information about related research activities, all users of ISSP data are requested to send bibliographic citations for each completed manuscript or thesis abstracts to [isspservice@gesis.org](mailto:isspservice@gesis.org) or if possible, please directly send a copy of the publication to GESIS (GESIS-Leibniz-Institute for the Social Sciences, Dept. Data Archive - ISSP, Unter Sachsenhausen 6-8, D-50667 Cologne, Germany). Please also observe the general notes on the [usage regulations](#) of GESIS Data Archive.

## Disclaimer

Neither the original collector of the data, nor GESIS or JDS/ ASEP bears any responsibility for the use of ISSP data or any data analyses.

## Citation of this Variable Report

Please, use the following citation for this Variable Report:

GESIS, ed. 2019. ISSP 2010 – Environment III, Variable Report: Documentation release 2019/06/13, related to the international dataset Archive-Study-No. ZA5500 Version 3.0.0, Variable Reports 2019|05. Cologne: GESIS.

## Request

Please, alert us to any errors or problems that you might notice in the data or the documentation. All comments and remarks are very much appreciated to enhance the quality of the data: [isspservice@gesis.org](mailto:isspservice@gesis.org)

# 1 ISSP Series Description

## 1.1 Series name

The International Social Survey Programme (ISSP)

## 1.2 Series information

The ISSP is a cross-national collaboration programme, which has been continuously conducting annual surveys on diverse social science topics since 1985. The topics for each ISSP survey are proposed by delegates from ISSP member countries. Then, a Basic Questionnaire is composed and improved over several years by a committee, elected by the General Assembly before it is pretested in various countries. Starting in 1984 with four founding nations - Australia, Germany, Great Britain and the United States, the ISSP meanwhile has grown up to almost 50 member countries covering various cultures around the globe.

ISSP Modules 1985 – 2022:

- Citizenship: 2004/ 2014
- Environment: 1993/ 2000/ 2010/ 2020
- Family and Changing Gender Roles: 1988/ 1994/ 2002/ 2012/ 2022
- Health and Health Care: 2011, 2021
- Leisure Time and Sports: 2007
- National Identity: 1995/ 2003/ 2013
- Religion: 1991/ 1998/ 2008/ 2018
- Role of Government: 1985/ 1990/ 1996/ 2006/ 2016
- Social Inequality: 1987/ 1992/ 1999/ 2009/ 2019
- Social Networks (no replications): 1986/ 2001/ 2017
- Work Orientations: 1989/ 1997/ 2005/ 2015

All ISSP members agree

1. to jointly develop modules addressing important areas of social science,
2. to field the modules either as an individual survey or as supplements to the regular national surveys and
3. to make the data available to the social science community as quickly as possible.

As the surveys are designed for replication they offer both cross-national and cross-time comparison, creating the base for a vast range of substantive and methodological research. Since there is no external fund agency, ISSP members fund their own surveys. Beyond that, ISSP committee members fund ISSP central coordination, networking, development of source questionnaires, or methodological work.

For more information on the ISSP in general, its working principles, contact addresses of ISSP members and principal investigators, please visit the ISSP web site (<http://www.issp.org>).

## 2 Study Description – International Social Survey Programme 2010

#### 2.1.4 Bibliographic citation

Publications based on ISSP data, which are made available through GESIS, should acknowledge those sources by means of bibliographic citations. To ensure that such source attributions are captured for social science bibliographic utilities, citations should appear in footnotes or in the reference section of publications.

How to cite the data: ISSP Research Group (2019): International Social Survey Programme: Environment III – ISSP 2010. GESIS Data Archive, Cologne. ZA5500 Data file Version 3.0.0, doi: 10.4232/1.13271

## 2.2 Content

### 2.2.1 Abstract

Attitudes to environmental protection. Preferred government measures for environmental protection.

### 2.2.2 Topic classification

Topics: Most important issues for the own country; private entrepreneurs as best possibility to solve economic problems; government's responsibility to reduce income differences among the citizens; postmaterialism scale; trust in people; estimation of people as fair; trust in people in government doing what is right; politicians tend to profit from their position; personal concern about environmental issues; most important environmental problem for the own country; most affecting environmental problem for respondent and his family; estimation of own knowledge about the causes of environmental problems and about the solutions to these environmental problems; attitudes to modern science and to the environment; attitudes to environmental protection and economic or population growth; willingness to pay higher prices and higher taxes or to accept reductions in standard of living in order to protect the environment; self-classification of participation in environmental protection; classification of dangerous effects from air pollution caused by cars, from industry, from chemicals in agriculture, from water pollution, from a rise in the world's temperature caused by the climate change (greenhouse effect), from the modification of genes of certain crops and nuclear power stations; preference for the regulation of environmental protection by the government, the citizens or the economy; estimation of the efforts of the own country to protect the world environment; preferred way of getting national business as well as the citizen to protect the environment; which energy source should be given national priority to meet future energy needs; attitudes towards international agreements for environmental problems; agreement with poorer countries to make less effort than richer countries to protect the environment; economic progress will slow down without better protection of the environment; frequency of special efforts to sort glass or tins or plastic or newspapers for recycling; frequency of special efforts to buy fruit and vegetables grown without pesticides or chemicals; frequency of special efforts in cutting back on driving a car, reducing energy at home and saving water for environmental reasons, avoid buying products for environmental reasons; membership in an environmental protection organization; personal environmental political activities in the last five years through participation in signing petitions, giving donations to environmental groups as well as participating in demonstrations; Optional items - not in all countries: knowledge test: a hole in the earth's atmosphere causes the climate change; knowledge about the relationship between the use of fossil fuels and climate change.

Demography: Sex; birth; age; years in school; country specific education; highest completed degree; work status; hours worked weekly; employment relationship; number of employees; supervise other employees; number of employees supervised; type of organization: for-profit vs. non profit and public vs. private; occupation (ISCO 1988); main employment status; living in steady partnership. Information about spouse and about partner on: work status, hours worked weekly, employment relationship, supervise other employees, occupation (ISCO 1988), main employment status. Union membership; country specific religious affiliation or denomination, groups of religious denominations, attendance of religious services; Top-Bottom self-placement; country specific party affiliation; party affiliation (left-right); vote in last general election; country specific ethnicity; number of children; number of toddlers; size of household; earnings of respondent (country specific); family income (country specific); marital status; place of living: urban – rural; region (country specific); year, month and day of interview. Additionally encoded: Case substitution flag, mode of data collection, weight.

## 2.3 Geographical Coverage

Argentina (AR); Austria (AT); Australia (AU); Belgium/Flanders (BE-FLA); Bulgaria (BG); Canada (CA); Switzerland (CH); Chile (CL); Czech Republic (CZ); Germany (DE); Denmark (DK); Spain (ES); Finland (FI); France (FR); Great Britain (GB-GBN); Croatia (HR); Iceland (IS); Israel (IL); Japan (JP); Korea, Republic of (KR); Lithuania (LT); Latvia (LV); Mexico (MX); Netherlands (NL); Norway (NO); New Zealand (NZ); Philippines (PH); Portugal (PT); Russian

Federation (RU); Sweden (SE); Slovenia (SI); Slovakia (SK); Turkey (TR); Taiwan (TW); United States (US); South Africa (ZA)

## 2.4 Universe

Population aged 18 and over (Austria: 16 and older, Finland: 15 to 74, Japan: 16 and older, Latvia: 18 to 74, Norway: 18 to 79, South Africa: 16 and older, Sweden: 18 to 79).

## 2.5 Sampling procedure

Various sampling procedures; different according to country, mostly as stratified multi-stage random sample.

## 2.6 Fieldwork and sample sizes

Table: Participating countries (regions) and fieldwork information for ISSP 2010

Country (Region)	ISO	Fieldwork start/ end	Fieldwork Institute	Questionnaire-versions	Sample Size (n of cases)
Argentina	AR	10 Jul 10 - 20 Oct 10	Cualitativo y Cuantitativo	AR10	1.130
Australia	AU	01 May 12 - 08 Aug 12	Academic Surveys Australia	AU10	1.946
Austria	AT	21 Jul 10 - 05 Sep10	Institute for Empirical Social Research (IFES), Vienna	AT10	1.019
Belgium (Flanders)	BE-FLA	17 Mar10 - 28 Jul10	TNS Dimarso, Brussels	BE-FLA10	1.142
Bulgaria	BG	16 Aug11 - 20 Sep11	ESI Center, Sofia	BG10	1.003

Total Sample Size	$\Sigma$	21 Sep 09 - 03 Apr13			50.437

## 2.7 Mode of data collection

Mode of interview differs for the individual countries: partly face-to-face interviews (partly CAPI) with standardized questionnaire, partly paper and pencil and postal survey.

### 3 Corresponding survey material

When dealing with international comparative data, data sets and documentation must be seen as two sides of the same coin. Even though ISSP members make huge efforts to produce comparable data in each country, there still remains a remarkable amount of country specific peculiarities in the contributions to the final, international data set. These country specific peculiarities either have to be harmonized or to be documented, as they provide vital information for secondary analysts. Therefore, a set of procedures has been developed to take care for orderly technical preparation of national data sets and to allow for the systematic collection of required context information.

All corresponding survey materials are provided in English, only the national questionnaires are available in the national language(s) of each country.

#### 3.1 Basic Questionnaire

The ISSP General Assembly concludes the design phase of an ISSP module after intensive discussions on the single items of the Basic Questionnaire roughly a year before the module is fielded. Two third of the module questions have to be replications from previous ISSP modules of the same subject. According to this, one third of the questions in each module are new. Subsequent to the mandatory module questions, some pre-selected optional questions can be added. Finally, ISSP member countries translate the British English Basic Questionnaire to their local language as equivalent as possible.

Drafting group for the Basic Questionnaire on the Environment Module 2010:

- Canada
- Chile
- Germany
- Great Britain, convenor: Alison Park
- South Korea
- Spain

#### 3.2 Background Variables Standards and Documentation

Apart from the Basic Questionnaire, covering the substantial module variables, countries also have to collect responses on a defined set of ISSP Standard Background Variables, which predominantly contains demographic information. Since the ISSP often runs with larger national surveys, the background variables are mainly taken from these surveys. Thus, demographic issues cannot be asked in a fixed form over all members of the ISSP. They have to meet the demands of the national studies first. As a result, the demographic variables for the ISSP need to be post-harmonized according to a developed set of common standards.

Over the past 30 years, there have been different Background Variable Standards:

The first set of background variables was established in 1985 with the first ISSP survey. Here countries agreed on collecting the same demographic information. This list of variables underwent a revision in 2001, now providing a coding frame for each background variable. It was valid until 2009.

In 2010 a new revision process of the ISSP Background Variables, planned for a three years period, started.

Beginning with the ISSP module 2010, this first revised version of the ISSP Background Variable Standard concentrating mainly on variables containing work, occupational and partnership status information came into effect. The second round of revisions, coming into effect in 2011, had its focus on the education variables, while the last change is going to be made on the variable measuring ethnicity, effective with the module 2013. The new standard is documented in some guidelines (different documents indicating the intermediate steps of revision), providing detailed information and instructions on the variables measurement goals, coding frames, filters and possible question texts. Additionally, the question texts are summarized in a Master Questionnaire on

## Background Variables.

Since 2004 countries document the post-harmonization processes for each variable in a special documentation template provided by the Archive. This template, always adjusted to the current standard, offers detailed country specific information on administration, derivation, and coding of the ISSP Background Variables. All relevant background variable documents are available from the ISSP webpages at GESIS.

## 3.3 National Study Description

For each country, the original National Study Description is available in the appendix of this Variable Report. The National Study Descriptions are provided by the countries and include information on sample sizes, field dates, modes of data collection, sampling procedures, response rates and weighting processes.

## 3.4 Characteristics of National Population

The appendix of this Variable Report also includes Characteristics of National Populations for all participating countries from 1989 on. These documents provide statistical data on the composition of national populations in terms of gender, age, education and employment rates and, therefore, allow assessing how representative national samples are.

## 3.5 Where to find the survey materials and the data set of the ISSP Module of 2010 – Environment III

In the GESIS Data Catalogue on the GESIS web you find

- the Basic Questionnaire of this module together with
- all country questionnaires in the respective local languages,
- this Codebook (Variable Report) with the National Study Descriptions and the Characteristics of National Populations in its appendix
- detailed National Documentations on phrasing and coding of the Background Variables,
- the Study Monitoring Report and
- the integrated data file ZA5500\_v3.0.0 for download

under the tab "Data and Documents" of: <https://dbk.gesis.org/dbksearch/SDESC2.asp?no=5500>

National data from four further countries could be integrated in this new data release: Australia, Iceland, Portugal and the Netherlands.

Information on fixed errors and resolved problems for this and also former data set versions can be found under the tab "[Errata & Versions](#)".

K. M. Slomczynski, P. Powalko and T. Krauze address the problem of non-unique records in international survey projects. Actually, no such case was found in dataset version v2.0.0 for ISSP 2010. Though, two respondents of the Lithuanian sample seem to have mistakenly been assigned to the same CASEID number. The answers of the two cases however differed from one another. Thus, for one of the two records the CASEID number has been recoded from 20104440000014 into 20104440001025 between dataset version v2.0.0 and v3.0.0.

The GESIS online data portal ZACAT provides the documentation of this integrated data file and also further study-related materials for download:

<http://zacat.gesis.org/webview/index.jsp?object=http://zacat.gesis.org/obj/fStudy/ZA5500>

Beyond this, ZACAT enables users to perform basic online analyses like frequency distributions, cross tabulations or regressions.

## 4 Data set structure and standards

ISSP data sets are processed and documented by the Data Archive of GESIS and by ASEP/ JDS every second year in accordance with agreed standards, which may differ in some details. Despite several changes in the background variables, a certain standard has been established in the course of time.

In order to uniquely identify a data set, to each data set version a GESIS Study No., a Version No., and a Digital Object Identifier (DOI) is assigned. The DOI is linked to the Study Description in the Data Catalogue (<https://dbk.gesis.org/dbksearch/index.asp>). Metadata filled in the Study Description of ISSP 2010 data and associated with a DOI are provided to the registration agency for social science data (da|ra).

The DOI: 10.4232/1.13271 is assigned to the ISSP 2010 (v3.0.0).

### 4.1 Data set structure

Usually, the ISSP data sets are structured as follows:

#### 1. Archive and Identification Variables

Administrative variables are used for identifying data sets, respondents and countries (GESIS Data Archive Study Number, Version Number, DOI, Country Codes, Respondent Number).

The GESIS Archive version variable includes the number of the data set version and the respective release date, composed as a string variable with three numbers:

- The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases).
- The minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels).
- The third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

Country codes identify each case as belonging to one country. The country code variable, which was used according to a scheme leaning on international automobile identification codes in the beginning of the ISSP, was replaced by three country code variables based on the ISO Code 3166. Two of the country code variables are encoded with numerical values, one of which identifies countries as a whole, the other one possible subsamples, such as East and West Germany. The cross tabulations shown in this Variable Report are based on a third, alphanumerical country code variable.

The current standard for the variable names of the Archive and ID variables is 'studyno', 'version', 'doi', 'country', 'c\_sample' and 'c\_alphan'. For new data releases of older ISSP modules the current standard is applied, whenever possible.

#### 2. Substantial Variables

The substantial variables contain the mandatory module questions, often supplemented by optional questions.

Variable labels provide keywords based on the question text; these keywords are applied consistently if questions or question items are repeated over time. All substantial variables include the original question number of the Basic Questionnaire in the variable labels.

Generally, all module variable names consist of the standard prefix 'V' and the consecutive variable number (up to ISSP 2014 beginning with the archive variables).

The current standard for the variable names of the substantial variables (starting with ISSP 2015) is 'v1', 'v2', 'v3', etc. For new data releases of older ISSP modules the current standard is applied, whenever possible. This is however only possible to a limited extent as re-numbering of all substantial variables should be avoided.

### 3. ISSP Background Variables

In the earlier ISSP modules, all variables are numbered consecutively, beginning with the archive variables and followed by substantial and background variables. The last variable of each data set usually is the variable on weighting. Later on, the background variables start with V200 et seq.. Nowadays, these variable numbers are expressed by mnemonics with max. 8 characters (SEX, AGE, ...).

### 4. Country Specific Variables

Variables, which cannot be harmonized for various reasons, are usually presented as country specific variables. As a rule, variable names of country specific variables have country abbreviations as prefixes. In some of the older ISSP studies, the principle of country specific variables is not used. Instead all country specific information is integrated into one variable.

### 5. Protocol Variables

There are five protocol variables in the latest ISSP modules. The variable 'MODE' indicates the mode of data collection, while 'SUBSCASE' indicates whether a respondent in the sample is an original case or a replacement for an originally selected respondent who was not available. The variables 'DATEYR', 'DATEMO' and 'DATEDY' provide information on the dates and periods of fielding.

ISSP surveys prior to ISSP 2010 do not include the three DATE variables for indicating the fielding date and ISSP surveys before ISSP 2007 do not contain the SUBSCASE variable.

### 6. Weight

There is no weight available for the international comparison on the ISSP across countries. Please note that also country subsamples can be over- respectively underrepresented without any weighting factor correcting for the imbalance. This fact has to be taken into account if these countries in question are analyzed as one unit.

## 4.2 Data preparation

On the basis of the Basic Questionnaire covering the substantial variables and the standard core set of background variables the Archive provides a Standard Setup for each individual ISSP module, which defines the variable and value labels for the integrated data file. All country data sets should be processed and prepared to match the structure of the Standard Setup before the material is deposited to the GESIS Data Archive for integration and archiving.

After conducting the national surveys, all collaborators are supposed to deposit their data at the GESIS Data Archive, where all the deposited data sets are prepared, integrated and merged into one single international data set, which is finally published.

During the data preparation process all national data sets are successively controlled for completeness, missing data and duplicate records, for wild codes and for formal consistency of response patterns and question routing. Moreover, national derivation processes from source to target codes in the background variables are controlled. Missing values, especially due to filter instructions are checked and recoded where necessary. Errors, which are discovered during these procedures, are corrected or documented in cooperation with primary investigators.

However, not all inconsistencies are errors. Some inconsistencies might be owed to irrational response behavior or may be a consequence of different modes of data-collection in or across the participating countries during the fieldwork phase. Such inconsistencies are not eliminated during the data preparation process.

Complete machine-readable DDI-XML (see chapter 4.5) compliant documentation is created for all ISSP data sets by GESIS.

### 4.3 Coding frames

By general rule, the variables of the module questions adopt the coding frame as specified in the Basic Questionnaire, except for multiple response questions.

GESIS adds 'Not applicable' (NAP) codes for questions that have filters. NAP indicates that only a subsample and not all of the respondents were asked. Also in the case of country specific variables, all the other countries are coded NAP.

GESIS adds 'Not available' (NAV) for variables which in single countries may not have been conducted for whatever reason.

#### 4.3.1 Country specific answer categories

ISSP data include some questions (variables) which have country specific answer categories such as DEGREE, RESPONDENT'S INCOME, FAMILY INCOME, PARTY AFFILIATION (PARTY VOTED LAST ELECTION), REGION and SIZE OF COMMUNITY (until ISSP 2009).

For country specific income variables with answer categories, the data is recoded to midpoints of the categories.

For occupation, official international occupation codes are used. While in the first years of the ISSP many countries used country specific occupation codes, ISCO 1988 has been established as a standard over the years. Starting with ISSP 2014, ISCO 2008 is used.

Recently additionally provided as country specific variables: RELIGION (since ISSP 2010), ETHNIC GROUP (since ISSP 2013)

#### 4.3.2 Missing values

In general, the missing values are standardised across ISSP modules. For all variables a set of missing values is defined:

0: Not applicable (NAP), Not available (NAV)

7 (97, 997, 9997, ...): Refused

8 (98, 998, 9998, ...): Don't know

9 (99, 999, 9999, ...): No answer

### 4.4 Weighting

Please note, that there is no total weight usable for international comparison. While all ISSP data sets contain a weighting variable, the weights in this variable do not incorporate a common weighting scheme that can be applied to all countries of the same ISSP module.

In the Study Description and/ or in the Background Variables Documentation of each country you will find more detailed information on the kind of weights that are used. You can see, whether

- a design weight
- weights to adjust for non-response bias or
- a combination of these both weights above or
- different weighting procedures

are applied. However, some countries dispense with weighting factors. If no weight is provided, the variable **"Weight"** is coded to 1.0. Otherwise the weighting factor is unequal 1.0 (but greater than 0).

It may be advisable to weight data to increase representativeness in certain cases. For ISSP data we strongly recommend consulting the National Study Descriptions for information on the certain weighting factor composition and maybe even the Characteristics of National Population for more context information. An initial overview of the national weighting procedures is provided in this Variable Report in chapter 6.

#### 4.5 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social sciences, established by the Data Documentation Initiative <DDI>. The Variable Reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the Basic Questionnaire with the variable description (variable name, values, and labels) of the data set. General remarks and comments referring to a certain variable are defined as variable notes. Notes mostly include additional information on country specific deviations from the ISSP standard, information about data problems or other specific characteristics.

## 5 Explanation of the variable documentation

The variable documentation part of this Variable Report describes each variable in the data file including all relevant information for this variable such as the single question components or further notes and statistical distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable 'c\_alphan'. ISO 3166-2 is applied for the UK's subsample Great Britain (GB-GBN). No ISO standard code is available for the subsample Flanders of Belgium; it is labeled 'BE-FLA'.

AR	Argentina	JP	Japan
AT	Austria	KR	South Korea

IS	Iceland	ZA	South Africa

The example explained below shows the information that for a typical substantial variable appears in the variable documentation part of a Variable Report. Results are usually broken down by country or presented as frequency counts in the case of country specific variables. In the case of variables with long lists of coded values (e.g. ISCO/SPISCO) results are not shown or, if appropriate, reflected by descriptive indicators such as mean or median (e.g. AGE, country specific variable RINC and INC). The descriptive parameters mean and/ or median are sometimes **also presented despite the fact that an open answer scale was used** (e.g. WRKHRS code 96 '96 hours or more') to give an idea of the distribution of this variable across countries.

The complete question and answer texts are taken from the final Basic Questionnaire as provided. All deviations are documented in this Variable Report.

As there is neither an international weighting factor nor a national weighting factor which would be comparable for all participating countries, all frequencies and tables are calculated from unweighted data.

Header with **DIGITAL OBJECT IDENTIFIER (DOI)** linked to the Study Description in the GESIS Data Catalogue.

**VARIABLE NAME** (serial number assigned by the archive) and **VARIABLE LABEL** as defined in the data set.

**QUESTION NUMBER** and full **QUESTION TEXT** from the Basic Questionnaire, including interviewer instructions, if applicable. The numbers or letters that may appear together with the original question number, reflect the item order (multiple item or multiple response questions) or indicate if a question was asked only in a single country (country abbreviation).

**CODE VALUES** occurring in the data for this variable and complete **ANSWER TEXT** from the Basic Questionnaire. Abbreviations commonly used in the code definitions are **DK** (don't know), **NA** (no answer), **NAP** (not applicable) and **NAV** (not available).

**DERIVATION** information refers to the construction principle of derived variables.  
  
**NOTE** delineates additional explanatory text or archive remarks on data processing and other issues relevant for the understanding or application of the variable.

**CROSS-TABULATION:** The absolute frequencies base on unweighted data. The relative frequencies (row percent) refer to the valid cases (n valid sum), i.e. the total number of cases (n sum) reduced by the number of cases defined as missing data (M).

**FREQUENCY COUNTS:** For country specific variables relative frequencies are calculated in- and excluding missing data (M), i.e. percent on the basis of all cases (sum) and valid percent on basis of the valid cases.

**DESCRIPTIVE PARAMETERS:** For some interval-scaled variables descriptive parameters such as minimum, maximum, and (if appropriate) median and mean are given on the basis of the valid cases.

## 6 Variable Documentation

(see next page)

Variable, Label  
Question Text (Original Language)

studyno - GESIS Data Archive Study Number

GESIS Data Archive Study number ZA5500 for the ISSP 2010 on 'Environment III'.

Study number of the data set producer and archiving number

5500 GESIS Data Archive Study Number ZA5500

studyno

Value	Label	Missing	Count	Percent	Valid Percent
5500	GESIS Data Archive Study Number ZA5500		50437	100.0	100.0
	Sum		50437	100.0	100.0
	Valid Cases		50437		

version - GESIS Archive Version

VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as a string.

The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

version

Value	Label	Missing	Count	Percent	Valid Percent
3.0.0 (2019-06-13)			50437	100.0	100.0
	Sum		50437	100.0	100.0
	Valid Cases		50437		

doi - Digital Object Identifier

Digital Object Identifier (DOI)

This variable holds the Digital Object Identifier (DOI) for the data set at hand as registered via the DA|RA registration agency for economic and social science data. Each data set version (see the variable 'version') has a unique and persistent DOI.

For direct access to the complete archive dissemination package for this study, including new data set versions, the DOI needs to be appended to the resolver service URL:

<http://dx.doi.org/10.4232/1.13271>

In terms of good scientific practice, the DOI is an important element for the correct citation of a data set.

doi

c\_sample - Country/Sample ISO 3166 Code (see country for codes for whole nation states)

Country/ Sample (see the variable 'country' for codes for whole nation states).

To indicate the subsamples within the ISSP countries a code on the basis of ISO 3166 was constructed. For all countries without subsamples the three digit ISO 3166 Code (as in the variable 'country') was used.

For those with subsamples a five digit numeric code is used. The first three-digits are based on the original ISO code and indicate the country. The following two-digit numeric appendices (01, 02) indicate the subsamples.

32 AR-Argentina  
36 AU-Australia

c\_alphan - Country Prefix ISO 3166 Code - alphanumeric

Country Prefix ISO 3166 Code - Alphanumeric

ISO 3166 Country/ Sample Prefix

This alphanumeric country sample identification variable 'c\_alphan' also includes country codes that are based on ISO 3166.

All countries are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the UK's subsample Great Britain (GB-GBN).

No ISO standard code is available for the subsample Flanders of Belgium; it is labeled 'BE-FLA'.

For examining subsamples within Germany (East/ West) and Israel (Jewish/ Arab population) the variable c\_sample can be used as a flag variable.

This alphanumeric identification variable c\_alphan is used for the frequency tables and cross tabulations shown in the Variable Report:

AR = Argentina  
AT = Austria  
AU = Australia  
BE-FLA = Belgium/ Flanders  
BG = Bulgaria  
CA = Canada  
CL = Chile  
CZ = Czech Republic  
TW = Taiwan  
HR = Croatia  
IS = Iceland  
DK = Denmark  
FI = Finland  
FR = France  
DE= Germany  
IL = Israel  
JP = Japan  
KR = Korea (South)  
LV = Latvia  
LT = Lithuania  
MX = Mexico  
NL = Netherlands  
NO = Norway  
NZ = New Zealand  
PH = Philippines  
PT = Portugal  
RU = Russia  
SK = Slovakia  
SI = Slovenia  
ZA = South Africa

ES = Spain

SE = Sweden

CH = Switzerland

TR = Turkey

GB-GBN = Great Britain

US = United States

CASEID - ID Number of Respondent

CASEID - Respondent Identification Number

This variable contains a unique identification number for each respondent holding the year of the ISSP module, the country code modelled on country/ sample (c\_sample) and the original ID number.

## CASEID

v5 - Q1a Most important issues for [R's COUNTRY] today?

Q1a

Which of these issues is the most important for [R's COUNTRY] today?

(Please tick one box only.)

- 1 Health care
- 2 Education
- 3 Crime
- 4 The environment
- 5 Immigration
- 6 The economy
- 7 Terrorism
- 8 Poverty
- 9 None of these
- 98 Can't choose
- 99 No answer

in South Korea (KR):

- 9 Politics
- 10 Getting a job
- 11 Existence of the nation-state
- 12 Thoughts
- 13 National defense
- 14 Religion
- 15 Anticommunist spirit
- 95 Others
- 98 Don't know, refused

v6 - Q1b Next most important issue?

Q1b

Which is the next most important?

(Please tick one box only.)

- 1 Health care
- 2 Education
- 3 Crime
- 4 The environment
- 5 Immigration
- 6 The economy
- 7 Terrorism
- 8 Poverty
- 9 None of these
- 98 Can't choose
- 99 No answer

in Switzerland (CH):

- 9 NAP, none of these

in South Korea (KR):

- 9 Politics
- 10 Getting a job
- 11 Existence of the nation-state
- 12 Thoughts
- 13 National defense
- 14 Religion
- 15 Anticommunist spirit
- 95 Others
- 98 Don't know, refused

v7 - Q2a Solve economic problems: private enterprise

Q2

How much do you agree or disagree with each of these statements?

(Please tick one box on each line)

Q2a Private enterprise is the best way to solve [COUNTRY'S] economic problems.

- 1 Agree strongly
- 2 Agree
- 3 Neither agree nor disagree
- 4 Disagree
- 5 Disagree strongly
- 8 Can't choose
- 9 No answer

Note:

/ JP: The literal translation of 'agree-disagree' scale used in the Japanese questionnaire is: (1) I think so; (2) I rather think so; (3) Can't say one way or the other; (4) I rather don't think so; (5) I don't think so.

v9 - Q3a Highest priority in [R's COUNTRY]?

Q3

Highest priority in [R's COUNTRY]:

(Please tick one box only.)

Q3a Looking at the list below, please tick a box next to the one thing you think should be [COUNTRY'S] highest priority, the most important thing it should do

- 1 Maintain order in the nation
- 2 Give people more say in government decisions
- 3 Fight rising prices
- 4 Protect freedom of speech
- 8 Can't choose
- 9 No answer

in South Korea (KR):

- 8 Don't know, refused

v10 - Q3b Next highest priority in [R's COUNTRY]?

Q3

Next highest priority in [R's COUNTRY]:

(Please tick one box only.)

Q3b And which one do you think should be COUNTRY'S] next highest priority, the second most important thing it should do

- 1 Maintain order in the nation
- 2 Give people more say in government decisions
- 3 Fight rising prices
- 4 Protect freedom of speech
- 8 Can't choose
- 9 No answer

in Switzerland (CH):

- 9 NAP, no next highest priority

in South Korea (KR):

- 8 Don't know, refused

v12 - Q4b Try to take advantage or be fair

Q4b

Generally speaking, do you think that most people would try to take advantage of you if they got the chance, or would they try to be fair?  
Please tick one box to show what you think, where 1 means you where 1 means most people would try to take advantage of you and 5 means that most people would try to be fair

(Please tick one box only.)

- 1 1 Most people would try to take advantage
- 2 2
- 3 3
- 4 4
- 5 5 Most people would try to be fair
- 8 Can't choose
- 9 No answer

in United States of America (US):

- 8 Can't choose, don't know

v13 - Q5a Trust in people in government

Q5

To what extent do you agree or disagree with the following statements?

(Please tick on box on each line)

Q5a Most of the time we can trust people in government to do what is right.

- 1 Agree strongly
- 2 Agree
- 3 Neither agree nor disagree
- 4 Disagree
- 5 Disagree strongly
- 8 Can't choose
- 9 No answer

Note:

/ JP: The literal translation of 'agree-disagree' scale used in the Japanese questionnaire is: (1) I think so; (2) I rather think so; (3) Can't say one way or the other; (4) I rather don't think so; (5) I don't think so.

v15 - Q6 How concerned in environmental issues?

Q6

Generally speaking, how concerned are you about environmental issues?

Please tick one box below to indicate what you think, where 1 means you are not at all concerned and 5 means you are very concerned

(Please tick one box only.)

1 1 Not at all concerned

2 2

3 3

4 4

5 5 Very concerned

8 Can't choose

9 No answer

v16 - Q7a Most important problem for [Country] as a whole?

Q7a

Here is a list of some different environmental problems. a) Which problem, if any, do you think is the most important for [COUNTRY] as a whole?

(Please tick one box only.)

- 1 Air pollution
- 2 Chemicals and pesticides
- 3 Water shortage
- 4 Water pollution
- 5 Nuclear waste
- 6 Domestic waste disposal
- 7 Climate change
- 8 Genetically modified foods
- 9 Using up our natural resources
- 10 None of these
- 98 Can't choose
- 99 No answer

in South Korea (KR):

- 11 Disorderly way of regional development
- 98 Don't know, refused

v17 - Q7b Most important problem which affects you and your family?

Q7b

Which problem, if any, affects you and your family the most?

(Please tick one box only.)

- 1 Air pollution
- 2 Chemicals and pesticides
- 3 Water shortage
- 4 Water pollution
- 5 Nuclear waste
- 6 Domestic waste disposal
- 7 Climate change
- 8 Genetically modified foods
- 9 Using up our natural resources
- 10 None of these
- 98 Can't choose
- 99 No answer

in South Korea (KR):

- 10 Noises
- 98 Don't know, refused

v20 - Q9a Science: believe too often in

Q9

How much do you agree or disagree with each of these statements?

(Please tick one box on each line.)

Q9a We believe too often in science, and not enough in feelings and faith.

- 1 Agree strongly
- 2 Agree
- 3 Neither agree nor disagree
- 4 Disagree
- 5 Disagree strongly
- 8 Can't choose
- 9 No answer

Note:

/ JP: The literal translation of 'agree-disagree' scale used in the Japanese questionnaire is: (1) I think so; (2) I rather think so; (3) Can't say one way or the other; (4) I rather don't think so; (5) I don't think so.

v21 - Q9b Science: more harm than good

Q9

How much do you agree or disagree with each of these statements?

(Please tick one box on each line. )

Q9b Overall, modern science does more harm than good.

- 1 Agree strongly agree
- 2 Agree
- 3 Neither agree nor disagree
- 4 Disagree
- 5 Disagree strongly
- 8 Can't choose
- 9 No answer

Note:

/ JP: The literal translation of 'agree-disagree' scale used in the Japanese questionnaire is: (1) I think so; (2) I rather think so; (3) Can't say one way or the other; (4) I rather don't think so; (5) I don't think so.

v22 - Q9c Science: solve environmental problems

Q9

How much do you agree or disagree with each of these statements?

(Please tick one box on each line.)

Q9c Modern science will solve our environmental problems with little change to our way of life.

- 1 Agree strongly
- 2 Agree
- 3 Neither agree nor disagree
- 4 Disagree
- 5 Disagree strongly
- 8 Can't choose
- 9 No answer

Note:

/ JP: The literal translation of 'agree-disagree' scale used in the Japanese questionnaire is: (1) I think so; (2) I rather think so; (3) Can't say one way or the other; (4) I rather don't think so; (5) I don't think so.

v23 - Q10a Worry about future environment

Q10

And how much do you agree or disagree with each of these statements?

(Please tick one box on each line. )

Q10a We worry too much about the future of the environment and not enough about prices and jobs today.

- 1 Agree strongly
- 2 Agree
- 3 Neither agree nor disagree
- 4 Disagree
- 5 Disagree strongly
- 8 Can't choose
- 9 No answer

Note:

/ JP: The literal translation of 'agree-disagree' scale used in the Japanese questionnaire is: (1) I think so; (2) I rather think so; (3) Can't say one way or the other; (4) I rather don't think so; (5) I don't think so.

v26 - Q11a Environment: protect by economic growth

Q11

And please tick one box for each of these statements to show how much you agree or disagree with it

(Please tick one box on each line.)

Q11a In order to protect the environment [COUNTRY] needs economic growth.

- 1 Agree strongly
- 2 Agree
- 3 Neither agree nor disagree
- 4 Disagree
- 5 Disagree strongly
- 8 Can't choose
- 9 No answer

Note:

/ JP: The literal translation of 'agree-disagree' scale used in the Japanese questionnaire is: (1) I think so; (2) I rather think so; (3) Can't say one way or the other; (4) I rather don't think so; (5) I don't think so.

v29 - Q12a Protect environment: pay much higher prices

Q12

How willing to protect environment

(Please tick one box only.)

Q12a How willing would you be to pay much higher prices in order to protect the environment?

- 1 Very willing
- 2 Fairly willing
- 3 Neither willing nor unwilling
- 4 Fairly unwilling
- 5 Very unwilling
- 8 Can't choose
- 9 No answer

v32 - Q13a To do about environment: too difficult

Q13

How much do you agree or disagree with each of these statements?

(Please tick one box on each line.)

Q13a It is just too difficult for someone like me to do much about the environment.

- 1 Agree strongly
- 2 Agree
- 3 Neither agree nor disagree
- 4 Disagree
- 5 Disagree strongly
- 8 Can't choose
- 9 No answer

v38 - Q13g Environmental problems have a direct effect on my everyday life.

Q13

How much do you agree or disagree with each of these statements?

(Please tick one box on each line.)

Q13g Environmental problems have a direct effect on my everyday life.

- 1 Agree strongly
- 2 Agree
- 3 Neither agree nor disagree
- 4 Disagree
- 5 Disagree strongly
- 8 Can't choose
- 9 No answer

v39 - Q14a Air pollution caused by cars is for environment

Q14a

In general, do you think that air pollution caused by cars is

(Please tick one box only.)

- 1 Extremely dangerous for the environment
- 2 Very dangerous
- 3 Somewhat dangerous
- 4 Not very dangerous
- 5 Not dangerous at all for the environment
- 8 Can't choose
- 9 No answer

v41 - Q14c Pesticides and chemicals used in farming are for environment

Q14c

And do you think that pesticides and chemicals used in farming are

(Please tick one box only.)

- 1 Extremely dangerous for the environment
- 2 Very dangerous
- 3 Somewhat dangerous
- 4 Not very dangerous
- 5 Not dangerous at all for the environment
- 8 Can't choose
- 9 No answer

v44 - Q14f Modifying the genes of certain crops is

Q14f

And do you think that modifying the genes of certain crops is

(Please tick one box only.)

- 1 Extremely dangerous for the environment
- 2 Very dangerous
- 3 Somewhat dangerous
- 4 Not very dangerous
- 5 Not dangerous at all for the environment
- 8 Can't choose
- 9 No answer

v52 - Q19a International agreements for environmental problems should be made

Q19

How much do you agree or disagree with each of these statements?

(Please tick one box on each line)

Q19a For environmental problems, there should be international agreements that [COUNTRY] and other countries should be made to follow.

- 1 Agree strongly
- 2 Agree
- 3 Neither agree nor disagree
- 4 Disagree
- 5 Disagree strongly
- 8 Can't choose
- 9 No answer

SEX - Sex of Respondent

BVQ\_01. SEX

AR: Mark sex of the interviewee

AT AU DK FI IS NO: Are you ...?

BE-FLA NZ: What is your sex (gender)? Note whether the person is a male or a female.

CH: Information automatically taken from sample database

CL CZ DE GB-GBN LV MX RU SK TR US: Sex coded directly by interviewer (without asking respondent)

ES: There is no question text nor explicit instruction to interviewer: he/ she must fill answer without asking

FR: Are you a man or a woman?

KR: Now I would like to ask about the members of your household. Please include all members who are living in your house and who are temporarily living somewhere else. Answer the following question beginning with yourself: Is [Person] male or female?

LT SI: Your sex

NL: Are you a man or a woman?

PT: Sex

SE: Not asked, taken from National Register.

ZA: Copy from contact sheet

- 1 Male
- 2 Female
- 9 No answer

Note:

/ DE: Sex and some other demographic variables taken from ALLBUS 2010 where question was not asked; face-to-face interview; sex coded by interviewer.

/ FR: Only two response categories, always answered

/ NO: Item non-response replaced by data from the Central Register of Persons.

/ SE: Information taken from National Register, not asked in survey.

/ US: Interviewer observation was used instead of asking questions to respondents.

BIRTH - Year of birth

BVQ\_02. BIRTH

When were you born?

(Please, write in the year of your birth, use four digits for the year.)

COMMENT TO BIRTH: The preferred question is to ask BIRTH  
AGE however can be calculated from DATE and BIRTH.

CH: Information automatically taken from sample database

CL US: What is your date of birth?

CZ DK FI LT SE SI: What year were you born?

DE: Please tell me what month and year you were born in.

ES PT SK: In which year were you born?

FR HR IS KR ZA: BIRTH was computed from AGE

GB-GBN: What was your age last birthday?

AU IL LV NL NO PH TW: When were you born?

MX: Year of birth

NZ: Please indicate the year in which you were born.

RU: Not asked directly, computed by DATEYR minus AGE.

TR: May I learn the year of your birth.

1910 1910

9998 Don't know

9999 No answer

Note:

/ NO: Item non-response replaced by data from Central Register of Persons

/ SE: Missing values were later derived from National Register.

## AGE - Age of respondent

### AGE

This question can be asked as an alternative to asking about BIRTH. If AGE is not asked directly, it must be computed be DATEYR 'year of the interview' minus BIRTH 'year of birth'

If your country is free to choose between asking BIRTH or AGE directly, the ISSP prefers BIRTH being asked.

AR: That is, how old are you (last birthday)

AT: Please tell me, what is your age now? In full years.

AU: Calculated as DATEYR 'year of interview' minus BIRTH 'year of birth'.

BE-FLA: What's the year and month of your birth?

CH DK ES FI IL LV LT TW: Computed from BIRTH and year of interview

CL FR HR IS RU SE: How old are you?

CZ DK: What year were/ are you born?

DE SE SI SK TR US: AGE calculated from BIRTH.

ES: How old were you at your last birthday?

GB-GBN: What was your age last birthday?

KR: How old is [Person]?

MX RU: How old are you? (completed years)

NL: Calculated as DATEYR 'year of interview' minus BIRTH 'year of birth'.

NO: When were you born?

NZ: Please indicate the year in which you were born.

PH: Age as of last birthday

PT: Calculated as DATEYR 'year of interview' minus BIRTH 'year of birth'.

SI: When were you born? Please, tell us just the year of your birth.

SK: In what year were you born, please?

TR: May I learn your birth date?

ZA: (Actual) age of respondent

15 15 years

99 99 years

998 Don't know

999 No answer

in United States of America (US):

89 89 and older

Note:

/ DE: In order to calculate AGE, the month of interview was used (as reported by interviewer)

/ FI: Age cannot be computed from variable DATEYR because DATEYR is only available for those who responded online.

EDUCYRS - Education I: years of schooling

BVQ\_03. EDUCYRS

How many full years of schooling or education have you had? Please include primary and secondary schooling, university and full-time vocational training, but do not include repeated years.

Please enter number of years or tick a box as applicable.

AR: How many years have you been in formal education?

AT: Not asked, derived from AT\_DEGR, shows the average number of years necessary to reach the respective level of education.

AU: Are you currently still in school or studying in higher education? How many full years of schooling or education have you had? (Please include primary and secondary schooling, university and full-time vocational training, but do not include repeated years. If you are currently in education count the number of years you have completed so far.)

BE-FLA: Derived from 'At this moment you are not in paid work. What is your situation right now?' and 'At this moment you are still in school. What kind of education do you follow?' and 'How many years of primary education did you complete?' and 'How many years of secondary education did you complete?' and 'How many years higher education of short or long type or university did you complete?'

CH: (Which is the higher education level you finished?) How many years of full-time studies did you achieve since the first primary year and without counting the possible years of apprenticeship? At what age did you stop full time schooling or full time vocational training?

CL: Without taking into account grade repetitions, how many approved years of study do you have?

CZ: How many years of schooling or education have you had? Please include all years of full-time study, even if you did not graduate from that school. Do not forget about primary school. Do not include vocational and requalification courses, part-time study or distance learning. Do not include repeated years.

DE: How many full years of schooling or education have you had in total, including primary and secondary schooling, university and full-time vocational training at school, but not including in-firm training. If you have ever repeated a year, please do NOT include these years.

DK: How many years of full time schooling do you have? Are you still attending a school education? Are you still attending a vocational training or a higher education?

ES: Have you gone to school or taken any kind of courses? How many years were you at school or taking (official) courses with full-time dedication?

FI: How many years have you gone to school or studied altogether? Include primary education, lower secondary education, general upper secondary education, all full-time education aiming at a vocational qualification and higher education.

FR: Derived from 'How old were you when you stopped your studies?'

GB-GBN: Derived from 'How old were you when you completed your continuous fulltime education?'

HR: How many years of formal education do you have?

IL: How many years (full-time equivalent) have you been in formal education?

IS: How many years of schooling have you completed? (If you have never gone to school or are still in education, please tick the corresponding box.) On the other hand, if you have completed your education, write the number of years on the line. (Count all years in basic education, gymnasium, university or in full-time vocational training.)

JP: Please indicate the last school you attended or the school you are currently attending. How many years of education did you receive from the time you entered elementary school to the time you graduated or left your final place of education? Do not include any time spent at higher vocational schools or schools in the miscellaneous category.

KR: Derived from 'What is the highest level of school you have attended?' and 'Did you graduate from this school, or are you currently attending?' and 'In what grade did you drop out?' and 'What grade are you in?'

LV: How many full years of schooling or education have you had? Please include primary and secondary schooling, university and full-time vocational training, but do not include repeated years.

LT: How many full years of schooling or education have you had? Please indicate how many years of schooling or education in primary,

secondary, basic, vocational or gymnasium school, college, university or institute have you completed. If you repeated year or course several times, count only the first year.

MX: Years of schooling (formal school, excluding training for work).

NL: How many years of education have you attended after primary school? (If parttime, recalculate to full-time.)

NO: All in all, how many years of education have you completed? Please include all schooling and education, also compulsory school and apprenticeship.

NZ: Derived from 'Which one of these categories best describes the amount of formal education you have had?'

PH: How many full years of schooling or education have you had? Please include primary and secondary schooling, university and full-time vocational training.

PT: Now I would like to ask you some questions about your education level. Please tell me for how many years did you go to school, including the years that you had to repeat and university studies?

RU: How many years have you completed in all educational institutions including primary, secondary and tertiary school but excluding training courses? If you have a regular day course of study now what kind of educational institution is it?

SE: How many years of full-time education have you had? Include primary school, and, if applicable, gymnasium (=secondary school) and college/university education.

SI: How long lasted your schooling? Consider all types of schooling from primary school to university, including professional education, training period, but do not count class repetitions.

SK: How long did your educational background last? Please count all years of full time schooling if you did not finish the school. Don't forget to count basic school. Don't count evening or distance study. Don't include time spent on professional training or requalification.

TR: What is your education? How many years have you spent in primary, secondary and university education other than professional training?

TW: How many years of formal education do you have?

US: Derived from 'What is the highest grade in elementary school or high school that you finished and got credit for?' and 'Did you ever get a high school diploma or a GED certificate?' and 'Did you ever complete one or more years of college for credit, not including schooling such as business college, technical or vocational school?' and 'How many years did you complete?' and 'Do you have any college degrees? What degree or degrees?'

ZA: How many years of full time education have you completed?

0 No formal schooling, no years at school

1 1 year

70 70 years

95 Still at school

96 Still at college, university, in vocational training

97 Refused

98 Don't know

99 No answer

in New Zealand (NZ):

3 Few years primary

8 Primary

11 Secondary school less than 3 years

13 Secondary school more than 4 years

16 University less than 3 years

18 University more than 4 years

in South Africa (ZA):

95 Still at school, still at college, university

Note:

/ AT: Compulsory school (9 years), Compulsory school + vocational training (10 years), Vocational middle school (11 years), General higher school (12 years), Vocational higher school (13 years), University (17 years).

/ DE: "general school leaving certificate", "vocational training", and details of non-employment taken from ALLBUS 2008.

/ FR: Age Respondent left school minus 6 years.

/ GB-GBN: Derived by subtracting 5 years from the answer to this question, the school starting age in Britain.

/ IS: The Icelandic educational system consists of obligatory education at the primary and lower secondary level (for children 6-16 years of age), gymnasium at the upper secondary level (generally 16-20 years of age) and university level.

/ PT: By mistake, instructions indicated to consider repeated years. Answer categories "Don't know" and "Refused" are not read aloud and do not appear on the accompanying show cards.

/ SE: Usually people enter the school system (the low stadium) at age 6 or 7.

/ SK: Codes 95 and 96 are derived from a separate country specific question on current status, which included the information if the respondent was still at school or at university.

/ TR: Primary school graduate = Code 5, junior high = Code 8, high school = Code 11, university graduate = Code 15, medical school graduate = Code 17, engineer or architect with MS = Code 16 (engineer or architect with an MS degree literally can be translated as high engineer/ architect; so, high engineer/ architect answers are coded as 16).

ES\_DEGR - Country specific highest completed degree of education: Spain

ES\_DEGR - Spain: Country specific education

Have you gone to school or ever taken any kind of courses? Which are the highest level studies that you have done (whether you have finished them or not)? Please specify as much as possible, telling me the level (year) you were in, when you finished (or interrupted them), and also the name those studies had then (if different): (example: 3 years of Primary, Primary, first year of Junior High, Vocational Qualification, last year of High School, 4th year of former Primary Education, College degree, PhD, first level of Vocational training, etc).

- 0 NAP, other countries
- 1 No formal schooling, did not go to school
- 2 Less than 5 years of formal schooling
- 3 Primary School completed
- 4 Low Secondary School, Junior High
- 5 Vocational Training, medium level Professional Training
- 6 High Secondary School completed
- 7 Vocational Training, high level Professional Training
- 8 Technical Architecture, technical Engineering, 3 years Technical School
- 9 3 years completed non-technical University
- 10 Architecture and Engineering, Technical Schools
- 11 College Degree, 4 years
- 12 Official Graduate Studies, PhD, Master
- 99 No answer

Note:

/ ES: The interviewer must write down the last year completed in school by respondent and the name of those studies. Then, he/she will write the appropriate code according to the Studies-Degree-Card. This code and the information given by respondent is revised later on by expert coders.

The amount of examples given for the name of Spanish studies may seem too many, but, in Spain, it is necessary, due to the constant change in study plans in the last 25 years.

Code 07 'Vocational Training, high level', is a degree that gives access only to certain University careers and (University) degrees. Codes 08 and 09 are University degrees, but only 3 years Univ. degree, which is less qualification than a 5 year Univ. degree. For the time being, in Spain, most careers are 5 years, although a few are 4 years, and some (Technical Schools) are more than 5. Bologna system is being applied only three years ago, so there are not students in this sample who may have finished those studies.

Note:

/ NL: 'Basisschool' would refer to various names of primary (and preprimary) education in the past. Whatever its name has been in the past, this type of education has always ended at age 12, i.e. grade 6 in the old system and grade 8 in the new system. The difference is due to the inclusion of pre-primary education in the accounting. However, holding back students in primary school has been common practice, so some will have stayed in 'basisschool' until a later age, including some who have never finished and left at age 14 or 15.

SI\_DEGR - Country specific highest completed degree of education: Slovenia

SI\_DEGR - Slovenia: Country specific education

Name last school that you have finished, regularly or irregularly.

- 0 NAP, other countries
- 1 No education, incomplete primary school
- 2 Primary completed
- 3 Completed 2-3 years vocational school
- 4 Completed 4 years secondary school - technical
- 5 Completed 4 years secondary school - general
- 6 Higher degree completed, 2 years college
- 7 Completed 3 years college, 1st Bologna degree
- 8 University or academy completed
- 9 Specialisation
- 10 Master degree, (also Bologna Master)
- 11 Doctorate degree, Phd
- 95 Other education, not clear
- 98 Don't know
- 99 No answer

Note:

/ SI: Slovenia has been experiencing some changes in school system in last 10 years: from 8-year primary school to 9-year; Bologna reform of university programmes.

- 1 - without formal education (0 to at most 3 grades of 8-year primary school or at most 5 grades of 9-year primary school)
- 1 - incomplete primary school (more than 3 grades of 8-year or more than 5-grades of 9-year primary school)
- 2 - primary school (has a primary school certificate)
- 3 - lower high school or vocational school (2 to 3-year program with certificate)
- 4 - high school (technical school, 4-year program with leaving examination)
- 5 - general high school (gymnasium with leaving examination)
- 6 - higher school (2-year program + degree)
- 7 - college (3-year program, 1st Bologna degree)
- 8 - university degree (4-year program (or 6) + thesis)
- 9 - specialisation (1 year)
- 10 - master degree (also Bologna master)
- 11 - PhD

DEGREE - Education II: Highest education level: categories

Education II - Highest education level: Harmonized categories of country specific degree and/ or years of education variable

AR: How many years have you been in formal education? What was the highest schooling level you had the possibility to reach?

AT: Which is the highest educational level you have finished?

AU: What is the highest year of schooling you have completed?

BE-FLA: What is the highest degree you completed? At this moment you are still in school. What kind of education do you follow?

CH: Which is the higher education level you finished?

CL: Without taking into account grade repetitions, what is your educational level?

CZ: What is your highest achieved level of education?

DE: What general school leaving certificate do you have? (highest certificate) What vocational or professional training do you have?

DK: What school education do you have? What business training or higher education do you have beyond school education?

ES: Have you gone to school or ever taken any kind of courses? Which are the highest level studies that you have done (whether you have finished them or not)? Please specify as much as possible, telling me the level (year) you were in, when you finished (or interrupted them), and also the name those studies had then (if different).

FI: What is your education?

FR: What is your education level?

GB-GBN: Highest educational qualification obtained - Have you passed any of the examinations on this card?

HR: Your highest educational level (school completed regularly or part-time).

IL: What is the highest level of education that you have attained?

IS: What is your highest degree of examination?

JP: Please indicate the last school you attended or the school you are currently attending.

KR: What is the highest level of school you have attended?

LV LT: What is the highest level of education that you have attained?

MX: Higher school level obtained (finished level).

NL: What is your highest completed education? If you are still in education: what is the education in which you are enrolled?

NO: Which general education have you achieved? Which vocational education/training have you achieved? Which tertiary education have you achieved?

NZ: Which of these categories best describes your highest formal qualification?

PH: What is your highest educational attainment?

PT: What is the highest degree of education that you completed? If none of the presented descriptions in the card corresponds to your case, please describe in detail the level of education achieved.

RU: What is your highest educational level that you have attained?

SE: What is your highest level of education that you have attained?

SI: Name last school that you have finished, regularly or irregularly.

SK: What is your highest achieved education level?

TR: Levels of education/ Highest degree being hold by the respondent

TW: What is your highest education level?

US: Derived from US\_DEGR and EDUCYRS.

ZA: What is the highest level of education you have ever completed?

0 No formal qualification

1 Lowest formal qualification

2 Intermediate secondary completed (qualifications above the lowest qualification)

- 3 Higher secondary completed (usual entry requirements for universities)
- 4 University degree incomplete (qualifications above higher secondary level)
- 5 University degree completed
- 8 Don't know
- 9 No answer, other qualification, education

in Austria (AT):

- 0 Incomplete compulsory education

in Bulgaria (BG):

- 5 Lower tertiary level, upper tertiary level

WORK - Currently, formerly, or never in paid work

BVQ\_05. WORK

Are you currently working for pay, did you work for pay in the past, or have you never been in paid work?

(Please tick one box only.)

AR: About working, are you working for an income, have you ever worked for an income or you never had a paid job.

AT: Please tell me, are you working for payment resp. do you have a paid job? (that is at least 1 hour a week paid work) If you do not work at present because of sickness, maternity leave or being on holiday please think of your general situation.

AU: Are you currently working for pay, did you work for pay in the past, or have you ever been in paid work? (By work we mean doing income-producing work, as an employee, self-employed or working for your own family's business, for at least one hour per week. If you temporarily are not working for pay because of temporary illness/parental leave/vacation/strike etc, please refer to your normal work situation.)

BE-FLA: Are you in paid work at this moment, were you in paid work in the past, or were you never in paid work? With paid work, we mean work for at least an hour a week as an employee or as a self-employed person. This includes GESKO, RVA-internship, PWA, interim, DAC, service cheques, helping in family company. When you are temporarily not working due to sickness, giving birth, parental leave, palliative leave, leave for medical assistance of a sick family member, please consider your normal work routine.

CH: Are you currently working for pay, or did you work for pay in the past? Let me just check: are you currently or did you work in the past for your own family's business?

CL: Which of the following best describe your current situation?

CZ: Are you currently working for pay, did you work for pay in the past, or have you never been in paid work or self-employed?

DE: Are you currently working for pay, did you work for pay in the past, or have you never been in paid work?

DK: Are you currently employed?

ES: Which of the following situations applies to you at present?

FI: Are you currently in paid work?

FR: WORK is computed from the former WRKST and WRKTYPE variables.

GB-GBN: Which of these descriptions applied to what you were doing last week, that is the seven days ending last Sunday? How long ago did you last have a paid job of at least 10 hours a week?

HR: Are you currently employed in paid work?

IS: Are you in paid work, have you been in paid work previously or have you never been in paid work?

KR: Do you have a job that provides income? Have you ever had a paid job?

LT LV MX PH SE SI SK TR TW ZA: Are you currently working for pay, did you work for pay in the past, or have you never been in paid work?

NL: What is at present your main activity?

NO: Are you or have you ever been in paid work?

NZ: Which one of these categories best describes your current employment status?

PT: V228 Which of the following situations applies to your case? Currently working, currently not working, but worked in the past, or never worked?

RU: Are you currently working for pay? Did you work for pay in the past?

US: Last week were you working full time, part time, going to school, keeping house, or what?

1 I am currently in paid work

- 2 I am currently not in paid work, but I had paid work in the past
- 3 I have never had paid work
- 9 No answer

in Argentina (AR):

- 1 I am working now for an income (including if respondent has not recently worked because of temporary illness, vacations, strike), I am working but not for an income (family workers, do not include work for government social program's benefits nor volunteer work)

in Austria (AT):

- 1 I am currently in paid work, including maternity leave

in Switzerland (CH):

- 9 No answer, don't know

in Denmark (DK):

- 1 Full time employed (30 hours or more per week), self-employed (30 hours or more per week), employed part time (10-29 hours per week), self-employed part time (10-29 hours per week), employed less than part time (less than 10 hours per week), employed but temporarily out of work because of illness or maternity leave, parents leave or education leave, helping family member, apprentice or trainee

in Great Britain (GB-GBN):

- 1 In paid work (or away temporarily) for at least 10 hours in week, on government training/ employment programme, waiting to take up paid work already accepted

in Japan (JP):

- 0 Not available

in Norway (NO):

- 1 Yes, I am in paid work now, yes, but temporarily away, due to illness, on leave, or similar

in New Zealand (NZ):

- 1 Employed-full time (35+ hours weekly), employed-part time (15-35 hours weekly), employed-less than 15 hours/temporarily out of work, helping family member
- 3 Not coded

Note:

BY WORK WE MEAN DOING INCOME-PRODUCING WORK, AS AN EMPLOYEE, SELF-EMPLOYED OR WORKING FOR YOUR OWN FAMILY'S BUSINESS, FOR AT LEAST ONE HOUR PER WEEK. IF YOU TEMPORARILY ARE NOT WORKING FOR PAY BECAUSE OF TEMPORARY ILLNESS/PARENTAL LEAVE/VACATION/STRIKE, ETC., PLEASE REFER TO YOUR NORMAL WORK SITUATION.

WRKHRS - Hours worked weekly

BVQ\_06. WRKHRS

How many hours, on average, do you usually work for pay in a normal week, including overtime?

If you work for more than one employer, or if you are both employed and self-employed, please count the total number of working hours that you do.

(Please write in.)

On average, I work ... hours a week, overtime included.

AR: How many hours on average do you work (o used to work) a week in all your jobs? Include regularly worked extra hours

AT: How many hours per week including overtime do you/ did you generally work in your main profession?

AU: How many hours, on average, do you usually work for pay in a normal week, including overtime? (If you work for more than one employer, or if you are both employed and self-employed, please count the total number of working hours that you do.)

BE-FLA: In general, how many hours do you usually work during a week, from Monday until Sunday, with overtime? Work only for your profession.

CH: How many hours, on average, did you usually work for pay in a normal week, including overtime?

CL: Generally, how many hours do you work in a week?

CZ: How many hours weekly, on average, do you work in your employment and, if applicable, in your other paid jobs, including overtime?

DE: (If respondent in full time or part time employment) How many hours per week do you normally work in your main job including overtime?  
(If respondent in less than part ('half') time employment) How many hours per week do you normally work in your less than part ('half') time employment?

DK: How many hours do/ did you normally work in a working week?

ES: How many hours, about, do you (or did you) work for a pay, per week, on average, including overtime work?

FI: How many hours on average do you work in a week, including overtime? If you have more than one employer or if you are both employed and self-employed/ entrepreneur, include all hours.

FR: If you are working, how many hours do you work weekly?

GB-GBN: How many hours do you normally work a week in your main job - including any paid or unpaid overtime?

HR: How many hours you work in a normal week, including overtime?

IL: How many hours, on average, do you usually work for pay in a normal week, including overtime?

IS: On average, for how many hours do you do paid work in a normal working-week, including overtime? If you are working for more than one employer, or if you are both an employee and self-employed, please count in the total number of hours worked. Please fill in: I work .... hours on average per week, including overtime.

KR MX: How many hours per week do you usually work?

LT LV: How many hours, on average, do you usually work for pay in a normal week, including overtime? If you work for more than one employer, or if you are both employed and self-employed, please count the total number of working hours that you do.

NL: How many hours per week do/ did you work on average?

NO: How many hours do/ did you usually work per week in your main job (including paid overtime as well as work hours at home)?

NZ RU: How many hours, on average, do you usually work for pay in a normal week?

PH SE SI TW: How many hours, on average, do you usually work for pay in a normal week, including overtime?

PT: How many hours, on average, do you work, in a week?

SK: How many hours a week including over time do you work on average in any paid job?

TR: How many hours a week do you normally work?

US: How many hours did you work last week, at all jobs? How many hours a week do you usually work, at all jobs?

ZA: How many hours do/ did you normally work a week (in your main job)?

0 Not applicable (Code 2 or 3 in WORK)

1 One hour

96 96 hours and more

98 Don't know

99 No answer

in Denmark (DK):

0 Not applicable (Code 3 in WORK)

in France (FR):

0 Not applicable (Code 2-9 in MAINSTAT)

in Japan (JP):

0 Not applicable (Code 2-9 in MAINSTAT)

Note:

/ ES: Spanish data recoded for ISSP WRHRS variable, however, only include respondents currently in paid work, and excludes respondents coded '9' in question 33.

Spanish data has information on work variables referred, in those cases, to the person who earns most in household.

/ NL: Note that the responses peak at 40, which is the traditional length of the work week, but this has been reduced to 38/36 more than a decade ago!

EMPREL - Employment relationship

BVQ\_07. EMPREL

Are/ were you an employee, self-employed, or working for your own family's business?

(Please tick one box only.)

THE NEXT QUESTIONS DEAL WITH SOME MORE DETAILS ON YOUR WORK SITUATION.

IF YOU WORK FOR MORE THAN ONE EMPLOYER, OR IF YOU ARE BOTH EMPLOYED AND SELF-EMPLOYED, PLEASE REFER TO YOUR MAIN JOB.

IF YOU ARE RETIRED OR NOT CURRENTLY WORKING, PLEASE REFER TO YOUR LAST MAIN JOB.

AU: Are/ were you an employee, self-employed, or working for your own family's business?

DK: Are/ were you in public or private employment or self-employed? Do/did you have any employees?

DE: Please classify your occupational status/ last occupational status according to this card.

ES: Do/did you (or the person who earns more income in your household) work as?

FR: EMPREL is computed from the former variables on WRKST, WRKTYPE and NEMPLOY.

GB-GBN: In your work or business, (do/did/will) you have any employees, or not? In your (main) job (are you/ were you/ will you be).

KR: Are you working for the family, self-employed with no employees, or self-employed with employees? What type of job did you have at that time?

IS: Are/ were you an employee, self-employed or working for your own family's company?

LT LV SE SI SK TR TW ZA: Are you an employee, self-employed, or working for your own family's business? If you work for more than one employer, or if you are both employed and self-employed, please refer to your main job. If you are not currently working, please refer to your last main job.

NL: In which type of organisation do you work at present/ did you work in your current/ last job?

NZ: Which of these categories best describes who you work for (or who you worked for most recently)? If you are self-employed, how many employees do you currently have?

PT: In your professional activity are/ were you: An employee? Self-employed without employees? Self-employed with employees? Working for own family's business? (In case the person is unemployed, retired or permanent disabled, ask in relation to his/her last situation.)

RU: Are you currently working? If so are you working for pay( an employee),or are you self employed with or without employees? What type organization did you work for at your last main job?

US: Did you ever work for as long as one year? Are/were you self-employed or do/did you work for someone else?

0 Not applicable (Code 3 in WORK)

1 An employee

2 Self-employed without employees

3 Self-employed with employees

4 Working for own family's business

9 No answer

in Argentina (AR):

4 Paid and unpaid family worker

in Czech Republic (CZ):

1 employee in a profit-seeking private business (limited liability company, private joint stock company, cooperative etc.), employee in a profit-seeking state-owned business (state enterprise, national enterprise, state- or municipality-owned joint stock company etc.), employee in public administration, local administration, public institution (including the police, the military, public schools etc.), employee in a non-profit organisation, foundation, public benefit corporation

in Denmark (DK):

1 Employed in the public sector (state, county or municipality), employed in a public owned company, employed in private undertaking, including assisting spouse

in Japan (JP):

0 Not applicable (Code 2-9 in MAINSTAT)

in New Zealand (NZ):

0 Not applicable (Code 2 in WORK)

1 Work for government, public owned firm, private firm, others, non-profit/charity/welfare organisation

in Portugal (PT):

8 Don't know

Note:

/ US: The US survey did not ask about family business so it could not assign code 4 ('Working for own family business') to any case on EMPREL.

ISCO88 - Occupation ISCO/ ILO 1988

BVQ\_13. ISCO88

Respondent's Occupation: International Occupation Code 1988

a. What is/was your occupation - i.e., what is/was the name or title of your main job?

(Please write in and describe as clearly as possible.)

b. In your main job, what kind of activities do/did you do most of the time?

(Please write in and describe as clearly as possible.)

c. What does/did the firm/organisation you work/worked for mainly make or do - i.e., what kind of production/function is/was performed at your workplace?

(Please write in and describe as clearly as possible.)

AR: Which is your main current job, or your main when you worked before? What do (did) you do in that job? Which are (were) your main tasks?

AT: Which professional activity are you carrying out in your main job or did you carry out last?

AU: What is/was your occupation – i.e., what is/was the name or title of your main job? In your main job, what kind of activities do/did you do most of the time? What does/ did the firm/ organisation you work/ worked for mainly make or do- i.e., what kind of production/function is/was performed at your workplace? (Please write in and describe as clearly as possible.)

BE-FLA: At this moment you are not in paid work. What is your situation right now? Did you used to be in paid work? (If respondent is in paid work or used to be in paid work) Can you give me the name of your current (former) profession? Can you give me a detailed description what your (former) profession implies (implied)?

CH: What is/was your current/ last occupation (principal employment)? In your main job, what kind of activities do/did you do most of the time?

CL: What is your main activity? What are some of your main duties? These two questions are open-ended. They are recoded using ISCO88.

CZ: (Those who ever been in paid work) What is (was) your current (last) occupation, what kind of activity do (did) you do in it? State your job title and describe briefly the job activity you do (did) in this occupation.

DE: What work do you do in your main job? Does this job, this work have a special name? (If respondent not employed in main job) Until what year were you in full to 'half' time employment or have you never been in full to 'half' time employment? What work did you do in your last main job?

DK: What are/were your accurate occupation?

ES: And which was your last occupation or trade? That is, in what does/ did your work consist of, specifically? We are referring to your main occupation: the one for which you (or the house head) obtains/ obtained your/ his/ her highest earnings.

FI: What is your current or latest occupation?

FR: If you are working, what is your current occupation? If you do not work but if you have already worked, what was your last occupation? (Current and last occupation ISCO88)

GB-GBN: Now I want to ask you about your (present/ last/ future) job. What (is/ was/ will) your job (be)? What (is/ was) the name or title of the job? What kind of work (do/ did/ will) you do most of the time? What training or qualifications (are/ were) needed for that job?

HR: Please state the exact name of your job title and occupation. (Most recent job if respondent currently not employed, retired or unemployed) Describe what you do, what your main tasks are. What are the educational and professional requirements for your job?

IS: What is/ was your main job? What type of tasks do/ did you mainly carry out in your main job? What type of activity goes/ went on in the workplace? Please write in and describe as clearly as possible.

JP: Please give details about the main type of work you are engaged in.

KR: Do you have a job that provides income? (If currently not working) Have you ever worked for pay? What kind of work do you normally do? What do you actually do in that job? If currently not working, tell me about your last job.

LT LV: (If in paid work now or ever) What is your occupation? (Occupation, sector, position according to main source of living and if respondent has no current job - retired, unemployed etc. - most recent occupation.)

MX: What is your current occupation (or last work)? Detailed as much as possible.

NO: (If in paid work now or ever) What is/ was your work title (main job)? Please make a short description of your work tasks. Please describe your work tasks as accurately as possible. What does/did the organisation you work/worked for mainly make or do?

NL: What is or was your current/ last occupation? Please specify your main activities/ responsibilities.

NZ: What is your main occupation (or most recently occupation?) If you have more than one job, business or professional practice, please give the occupation for the job you spend the most time at. Please describe fully, using two words or more.

PH: What is your main job? (If currently unemployed the most recent job)

PT: What is/was your professional activity? Describe in detail (do not use initials or abbreviations).

RU: What is your current occupation? What kind of activities do/did you do most of the time? (Occupation at the most recent work place if no current job)

SE: What is your occupation? If you are retired or not working at the moment, please indicate what your occupation was in your last job. What kind of production/ activity is performed at your current or last workplace?

SI: What kind of work or occupation do you do? If not working at the moment: what was your last (main) occupation before losing your job or becoming retired. Tell detailed name of your position at work and exact profession. What is the main activity of your work organisation?

SK: Please, write the name of your main occupation. Include detailed description of your working activity: what is your principal activity, responsibility etc. If you are not in labour force (retired or unemployed) at the moment, think of your most recent job. If you are self-employed or entrepreneur, please specify the area of your business.

TR: What is/was your occupation? So, what is your title?

TW: What is your main occupation (at present, or prior to retirement)?

US: Last week were you working full time, part time, going to school, keeping house, or what? (If not in labour force) Did you ever work as long as one year? (If in paid work or have ever been in labour force for as long as one year) What kind of work do/ did you normally do? That is, what is/ was your job called? What do/ did you actually do in that job? Tell me what are/ were some of your main duties? What kind of place do/ did you work for? What do/ did they (make/ do)?

ZA: What is your current occupation? (The name and title of your main job).

7300 PRECISION, HANDICRAFT, PRINTING AND RELATED TRADES WORKERS

7310 PRECISION WORKERS IN METAL AND RELATED MATERIALS

7311 Precision-instrument makers and repairers

7312 Musical instrument makers and tuners

7313 Jewellery and precious-metal workers

7320 POTTERS, GLASS-MAKERS AND RELATED TRADES WORKERS

7321 Abrasive wheel formers, potters and related workers

7322 Glass makers, cutters, grinders and finishers

7323 Glass engravers and etchers

7324 Glass, ceramics and related decorative painters

7330 HANDICRAFT WORKERS IN WOOD, TEXTILE, LEATHER AND RELATED MATERIALS

7331 Handicraft workers in wood and related materials

7332 Handicraft workers in textile, leather and related materials

7340 PRINTING AND RELATED TRADES WORKERS

7341 Compositors, typesetters and related workers

7342 Stereotypers and electrotypers

7343 Printing engravers and etchers

7344 Photographic and related workers

7345 Bookbinders and related workers

7346 Silk-screen, block and textile printers

7400 OTHER CRAFT AND RELATED TRADES WORKERS

7410 FOOD PROCESSING AND RELATED TRADES WORKERS

7411 Butchers, fishmongers and related food preparers

7412 Bakers, pastry-cooks and confectionery makers

7413 Dairy-products makers

7414 Fruit, vegetable and related preservers

7415 Food and beverage tasters and graders

7416 Tobacco preparers and tobacco products makers

7420 WOOD TREATERS, CABINET-MAKERS AND RELATED TRADES WORKERS

7421 Wood treaters

7422 Cabinet makers and related workers

7423 Woodworking machine setters and setter-operators

7424 Basketry weavers, brush makers and related workers

7430 TEXTILE, GARMENT AND RELATED TRADES WORKERS

7431 Fibre preparers

7432 Weavers, knitters and related workers

7433 Tailors, dressmakers and hatters  
7434 Furriers and related workers  
7435 Textile, leather and related pattern-makers and cutters  
7436 Sewers, embroiderers and related workers  
7437 Upholsterers and related workers  
7440 PELT, LEATHER AND SHOEMAKING TRADES WORKERS  
7441 Pelt dressers, tanners and fellmongers  
7442 Shoe-makers and related workers  
7500 Metal worker general  
7510 Metal worker not elsewhere classified  
7520 Electronics engineers not elsewhere classified  
7900 Master craftsman, supervisor  
8000 PLANT AND MACHINE OPERATORS AND ASSEMBLERS  
8100 STATIONARY-PLANT AND RELATED OPERATORS  
8110 MINING- AND MINERAL-PROCESSING-PLANT OPERATORS  
8111 Mining-plant operators  
8112 Mineral-ore- and stone-processing-plant operators  
8113 Well drillers and borers and related workers  
8120 METAL-PROCESSING-PLANT OPERATORS  
8121 Ore and metal furnace operators  
8122 Metal melters, casters and rolling-mill operators  
8123 Metal-heat-treating-plant operators  
8124 Metal drawers and extruders  
8130 GLASS, CERAMICS AND RELATED PLANT OPERATORS  
8131 Glass and ceramics kiln and related machine operators  
8139 Glass, ceramics and related plant operators not elsewhere classified  
8140 WOOD-PROCESSING- AND PAPERMAKING-PLANT OPERATORS  
8141 Wood-processing-plant operators  
8142 Paper-pulp plant operators  
8143 Papermaking-plant operators  
8150 CHEMICAL-PROCESSING-PLANT OPERATORS  
8151 Crushing-, grinding- and chemical-mixing-machinery operators  
8152 Chemical-heat-treating-plant operators  
8153 Chemical-filtering- and separating-equipment operators  
8154 Chemical-still and reactor operators (except petroleum and natural gas)  
8155 Petroleum- and natural-gas-refining-plant operators  
8159 Chemical-processing-plant operators not elsewhere classified  
8160 POWER-PRODUCTION AND RELATED PLANT OPERATORS  
8161 Power-production plant operators  
8162 Steam-engine and boiler operators  
8163 Incinerator, water-treatment and related plant operators  
8170 AUTOMATED-ASSEMBLY-LINE AND INDUSTRIAL-ROBOT OPERATORS  
8171 Automated-assembly-line operators  
8172 Industrial-robot operators  
8200 MACHINE OPERATORS AND ASSEMBLERS  
8210 METAL- AND MINERAL-PRODUCTS MACHINE OPERATORS

8211 Machine-tool operators  
8212 Cement and other mineral products machine operators  
8220 CHEMICAL-PRODUCTS MACHINE OPERATORS  
8221 Pharmaceutical- and toiletry-products machine operators  
8222 Ammunition- and explosive-products machine operators  
8223 Metal finishing-, plating- and coating-machine operators  
8224 Photographic-products machine operators  
8229 Chemical-products machine operators not elsewhere classified  
8230 RUBBER- AND PLASTIC-PRODUCTS MACHINE OPERATORS  
8231 Rubber-products machine operators  
8232 Plastic-products machine operators  
8240 WOOD-PRODUCTS MACHINE OPERATORS  
8250 PRINTING-, BINDING- AND PAPER-PRODUCTS MACHINE OPERATORS  
8251 Printing-machine operators  
8252 Bookbinding-machine operators  
8253 Paper-products machine operators  
8260 TEXTILE-, FUR- AND LEATHER-PRODUCTS MACHINE OPERATORS  
8261 Fibre-preparing-, spinning- and winding-machine operators  
8262 Weaving- and knitting-machine operators  
8263 Sewing-machine operators  
8264 Bleaching-, dyeing- and cleaning-machine operators  
8265 Fur and leather-preparing-machine operators  
8266 Shoemaking- and related machine operators  
8269 Textile-, fur- and leather-products machine operators not elsewhere classified  
8270 FOOD AND RELATED PRODUCTS MACHINE OPERATORS  
8271 Meat- and fish-processing-machine operators  
8272 Dairy-products machine operators  
8273 Grain- and spice-milling-machine operators  
8274 Baked-goods, cereal and chocolate-products machine operators  
8275 Fruit-, vegetable- and nut-processing-machine operators  
8276 Sugar production machine operators  
8277 Tea-, coffee-, and cocoa-processing-machine operators  
8278 Brewers, wine and other beverage machine operators  
8279 Tobacco production machine operators  
8280 ASSEMBLERS  
8281 Mechanical-machinery assemblers  
8282 Electrical-equipment assemblers  
8283 Electronic-equipment assemblers  
8284 Metal-, rubber- and plastic-products assemblers  
8285 Wood and related products assemblers  
8286 Paperboard, textile and related products assemblers  
8290 OTHER MACHINE OPERATORS AND ASSEMBLERS  
8300 DRIVERS AND MOBILE-PLANT OPERATORS  
8310 LOCOMOTIVE-ENGINE DRIVERS AND RELATED WORKERS  
8311 Locomotive-engine drivers  
8312 Railway brakemen, signallers and shunters

8320 MOTOR-VEHICLE DRIVERS  
8321 Motor-cycle drivers  
8322 Car, taxi and van drivers  
8323 Bus and tram drivers  
8324 Heavy-truck and lorry drivers  
8330 AGRICULTURAL AND OTHER MOBILE-PLANT OPERATORS  
8331 Motorised farm and forestry plant operators  
8332 Earth-moving- and related plant operators  
8333 Crane, hoist and related plant operators  
8334 Lifting-truck operators  
8340 SHIPS' DECK CREWS AND RELATED WORKERS  
9000 ELEMENTARY OCCUPATIONS  
9100 SALES AND SERVICES ELEMENTARY OCCUPATIONS  
9110 STREET VENDORS AND RELATED WORKERS  
9111 Street food vendors  
9112 Street vendors, non-food products  
9113 Door-to-door and telephone salespersons  
9120 SHOE CLEANING AND OTHER STREET SERVICES ELEMENTARY OCCUPATIONS  
9130 DOMESTIC AND RELATED HELPERS, CLEANERS AND LAUNDERERS  
9131 Domestic helpers and cleaners  
9132 Helpers and cleaners in offices, hotels and other establishments  
9133 Hand-laundrers and pressers  
9140 BUILDING CARETAKERS, WINDOW AND RELATED CLEANERS  
9141 Building caretakers  
9142 Vehicle, window and related cleaners  
9150 MESSENGERS, PORTERS, DOORKEEPERS AND RELATED WORKERS  
9151 Messengers, package and luggage porters and deliverers  
9152 Doorkeepers, watchpersons and related workers  
9153 Vending-machine money collectors, meter readers and related workers  
9160 GARBAGE COLLECTORS AND RELATED LABOURERS  
9161 Garbage collectors  
9162 Sweepers and related labourers  
9200 AGRICULTURAL, FISHERY AND RELATED LABOURERS  
9210 AGRICULTURAL, FISHERY AND RELATED LABOURERS  
9211 Farm-hands and labourers  
9212 Forestry labourers  
9213 Fishery, hunting and trapping labourers  
9300 LABOURERS IN MINING, CONSTRUCTION, MANUFACTURING AND TRANSPORT  
9310 MINING AND CONSTRUCTION LABOURERS  
9311 Mining and quarrying labourers  
9312 Construction and maintenance labourers: roads, dams and similar constructions  
9313 Building construction labourers  
9320 MANUFACTURING LABOURERS  
9321 Assembling labourers  
9322 Hand packers and other manufacturing labourers  
9330 TRANSPORT LABOURERS AND FREIGHT HANDLERS

9331 Hand or pedal vehicle drivers  
9332 Drivers of animal-drawn vehicles and machinery  
9333 Freight handlers  
9997 Refused  
9998 Don't know, inadequately described  
9999 No answer

in Japan (JP):

0 Not applicable (Code 2-9 in MAINSTAT)

Note:

/ AT: The fieldwork/research institute originally used 3-digit-level ISCO88-COM and transformed codes on the 4-digit level, e.g. 111=1110; 221=2210

/ CZ: Modification of KZAM (Czech national ISCO-88 related classification) recoded into ISCO-88 (ILO).

/ DE: ISCO88 taken from ALLBUS 2010 and constructed from respondent's current occupation (main job): If respondent currently not employed or part time employed but employed in the past then last occupation (main job) taken according to ISCO88 (ILO) with some additional codes which are already recoded.

/ ES: Three digits Spanish adaptation of ISCO-88 (CNO-94: National Classification of Occupations)

/ FR: French classification of the occupations and the social categories (PCS 1994) were recoded. Because of incomplete information to describe the occupation, a code with 1 zero at the end corresponds to the 2 digits ISCO code and a code with 2 zeros at the end corresponds to the one digit ISCO code.

/ GB-GBN: ISCO88 (COM) is derived from [XSOC200] using the translation table; where the frequency of any 4 digit ISCO code in the ISSP dataset is less than 5, the code is reduced to 2 digits.

/ NL: ISCO-88 codes are converted from national occupation codes, provided by Statistics Netherlands 1984, which is very close to ISCO-68.

/ NO: STYRK (Standard Classifications of Occupations) based on, but not identical to ISCO88-COM. STYRK codes are recoded into ISCO88 ILO according to the syntax available in the BV documentation.

/ SE: A recoding scheme between the national occupation scheme SSK and ISCO88-COM is available.

/ SK: Slovak national ISCO-88 recoded into ISCO-88 (ILO)

/ TR: Open ended question answers are then coded according to (ISCO) occupation descriptions into ISCO88

/ US: US Occupation Codes OCC80 from GSS are recoded to ISCO88.

MAINSTAT - Main status

BVQ\_14. MAINSTAT

Which of the following best describes your current situation?

If you temporarily are not working because of temporary illness/ parental leave/ vacation/ strike etc., please refer to your normal work situation.

(Please tick one box only.)

AR: Which of the following alternatives better describes your current situation?

AU: Which of the following best describes your current situation? (If you temporarily are not working because of temporary illness/parental leave/vacation/strike etc., please refer to your normal work situation.)

BE-FLA: Which of the possibilities on card 7 describes your current situation?

CL: Please choose one of the following alternatives, depending whether you are working or not working

CZ: Now I would like to learn about what you currently do. What is your current economic status?

DE FI LT LV PH SE SK TW: Which of the following best describes your current situation? If you are temporarily away from paid work because of parental or other leave, unpaid leave or some other similar reason, please answer according to your normal work situation.

DK: Are you currently employed?

ES: Which of the following situations applies to you at present?

FR: What is your current occupation or your current economic position?

GB-GBN: Which of these descriptions applied to what you were doing last week, that is the seven days ending last Sunday

HR: What is your employment status (which best describes your current situation)?

IS: Which of the options mentioned below best describes your current status? If you are temporarily out of work because of temporary illness/ parental leave/ vacation/ strike or such, please respond according to the status that generally applies to you.

KR: Do you have a job that provides income? (If not working) What is the primary reason for unemployment?

NL: What is at present your main activity?

NO: What do you consider as your current main activity? If you are on sick leave, parental leave etc., refer to your normal situation.

NZ: Which one of these categories best describes your current employment status?

PT: What is your current professional situation?

RU: What is your main status (out of labour force)?

TR: Which of the following does suit you best?

US: Last week were you working full time, part time, going to school, keeping house, or what?

ZA: What is your current employment status?

- 1 In paid work (as an employee, self-employed, or working for your own family's business)
- 2 Unemployed and looking for a job
- 3 In education (not paid for by employer), in school/ student/ pupil even if on vacation
- 4 Apprentice or trainee
- 5 Permanently sick or disabled
- 6 Retired
- 7 Doing housework, looking after the home, children or other persons
- 8 In Compulsory military service or community service
- 9 Other

99 No answer

in Argentina (AR):

- 1 Working full time for an income, working part time for an income, working less than part time or occasional work
- 2 Unemployed, fired, looked for work the last two months, unemployed, fired, did not look for work the last two months
- 6 Retired, pensioner

in Austria (AT):

- 1 Employed, helping family member

in Belgium/ Flanders (BE-FLA):

- 1 Paid work (as employee, self-employed, GESKO, RVA-apprenticeship, interim, DAC, service cheques, helping family member), sick leave, maternity leave, unpaid leave, fulltime career break (also parental break, palliative break, medical support of a sick relative)
- 2 Unemployed with and without benefit, looking for a job

in Chile (CL):

- 1 Employed full time, half time and less than half time
- 2 Unemployed, looking for a job and looking for a job for the first time

in Czech Republic (CZ):

- 1 Full-time employee, part-time employee (half-time or higher), part-time employee (less than half-time), self-employed person without employees, self-employed person with employees, working retired person, on maternal or parental leave
- 9 In family business without formal employment contract (co-working family member)

in Denmark (DK):

- 1 Full time employed (30 hours or more per week), self-employed (30 hours or more per week), employed part time (10-29 hours per week), self-employed part time (10-29 hours per week), employed less than part time (less than 10 hours per week), employed but temporarily out of work because of illness or maternity leave, parents leave or education leave, helping family member
- 6 Old age retirement, job release scheme etc (pension benefits payable between early retirement and normal retirement pension)

in France (FR):

- 1 In paid work (35 hours per week or more), in paid work (15 to 34 hours per week), in paid work (less than 15 hours per week), working for your own family's business

in Lithuania (LT):

- 3 In education (except those cases if the studies are paid by the employer) or I am in academic, summer or similar vacation

in Norway (NO):

- 5 On social security, permanently sick or disabled

in New Zealand (NZ):

- 1 Employed-full time (35+ hours weekly), employed-part time (15-35 hours weekly), employed-less than 15 hours/temporarily out of work, helping family member

in Taiwan (TW):

- 1 Having a full-time job, having a part-time job, doing odd job; temporarily unemployed, working for the family business with and without paid

salary

in South Africa (ZA):

- 1 Employed full time, part time, less than part time (casual work/piecework)
- 3 In education, apprentice or trainee
- 10 Temporarily sick

in DK GB-GBN:

- 8 Not available

Note:

/ AU: 'In Compulsory military service or community service' not asked.

/ FR: By mistake, the french survey fielded the question for the obsolete variable WRKST instead of MAINSTAT. Therefore, the data in this variable had to be reconstructed. Please note that the reconstructed data do not perfectly match the categories for MAINSTAT. Firstly, respondents with dual status (e.g. retired persons who also self-assess as working for pay) cannot be correctly covered. Secondly, category 2 'Unemployed and looking for a job' may also include respondents who are unemployed but not looking for a job. Thirdly, the French data cannot distinguish between category 3 'In education' and 4 'Apprentice or trainee'. Only the more general category 'In education' was coded. Fourthly and finally, it was not possible to construct category 8 'In compulsory military or community service'. Respondents doing military or community service are most probably included in category 9 'Other'.

/ IS: 'In Compulsory military service or community service' not asked.

Category 5 'Disabled' ("öryrki" in original) refers to those receiving benefits from the state after having gone through an official process of being deemed unable to work based on any type of health condition.

PARTLIV - Living in steady partnership

BVQ\_15. PARTLIV

Do you have a spouse or a steady partner and, if yes, do you share the same household?

(Please tick one box only.)

AR PH: Do you have a spouse or a steady partner and if yes, do you share the same household?

AT: Are you married resp. do you have a partner? Do you live together with your partner of life in the same household?

AU: Do you have a spouse or a partner and, if yes, do you share the same household?

BE-FLA: What situation on card 14 describes your own situation?

CH: Now, let's talk about your family. Do you have a spouse/ partner? Do you currently live with your husband (wife)/ your partner?

CL: Do you have a spouse or steady partner?

CZ: Do you have a steady partner?

DE: What is your marital status? Do you have a steady partner? For same-sex, formally legalised civil partnerships.

ES: In which of these situations are you at present?

FI: Are you married, cohabiting or in a registered civil partnership and do you live together?

FR: PARTLIV is computed from several variables.

GB-GBN: Derived variable.

HR: Do you have a husband / wife (are you married) or steady partner (unmarried)? If so, do you live in the same household?

IL LT LV MX NO TR TW ZA: Do you have a spouse or a steady partner and, if yes, do you share the same household?

IS: Do you have a spouse or are you in a steady relationship and if yes, do you live together?

JP: Are you currently living with any person of the opposite gender?

KR: Is [PERSON] now married, widowed, divorced, separated, cohabiting, or never married?

NZ: Which of these categories best describes your current marital status. Do you live together with a partner?

NL: Do you actually live with a stable partner?

PT: Which of the following situations that I will read to you best describes your case?

RU: What is your marital status? Do you live with somebody as a husband or a wife but without legal registration?

SE: Do you have a steady partner and, if yes, do you share the same household?

SI: Are you married, have a steady partner? Do you share common household?

SK: Do you have a steady partner, a husband/ spouse?

US: Derived from 'Are you currently -- married, widowed, divorced, separated, or have you never been married?' and 'What is the (member of the household's) relationship to the head of the household?' and 'What is the (member of the household's) relationship to the spouse of the head of the household?'

- 1 Yes, I have a spouse/ partner and we share the same household
- 2 Yes, I have a spouse/ partner, but we don't share the same household
- 3 No, I don't have a spouse/ partner
- 7 Refused
- 9 No answer

in Belgium/ Flanders (BE-FLA):

- 2 I have a partner, but we don't live together all the time, I have a partner, but we don't live together

in Denmark (DK):

SPWORK - Spouse, partner: Currently, formerly or never in paid work

BVQ\_16. SPWORK

THE NEXT QUESTIONS DEAL WITH THE WORK SITUATION OF YOUR SPOUSE/PARTNER.

BY WORK WE MEAN DOING INCOME-PRODUCING WORK, AS AN EMPLOYEE, SELF-EMPLOYED OR WORKING FOR HIS/HER OWN FAMILY'S BUSINESS, FOR AT LEAST ONE HOUR PER WEEK. IF HE/SHE TEMPORARILY IS NOT WORKING FOR PAY BECAUSE OF TEMPORARY ILLNESS/PARENTAL LEAVE/VACATION/STRIKE, ETC., PLEASE REFER TO HIS/HER NORMAL WORK SITUATION.

(If you have a spouse/ partner)

Is your spouse/partner currently working for pay, did he/she work for pay in the past, or has he/she never been in paid work?

(Please tick one box only.)

AR: About working, is your spouse or partner working for an income, has ever worked for an income or never had a paid job?

AT: Is your spouse or your partner working for payment resp. does he or she has a paid job? (that is at least 1 hour a week paid work) If he or she does not work at present because of sickness, maternity leave or being on holiday please think of his/her general situation.

AU: Is your spouse/partner currently working for pay, did he/she work for pay in the past, or has he/she never been paid work? (By work we mean doing income-producing work, as an employee, self-employed or working for his/her own family's business, for at least one hour per week. If he/she temporarily is not working for pay because of temporary illness/parental leave/vacation/strike, etc., please refer to his/her normal work situation.)

BE-FLA: Is your partner in paid work at this moment, was your partner in paid work in the past, or was your partner never in paid work? With paid work, we mean work for at least an hour a week as an employee or as a self-employed person. This includes GESKO, RVA-internship, PWA, interim, DAC, service cheques, helping in family company. When he/she is temporarily not working due to sickness, giving birth, parental leave, palliative leave, leave for medical assistance of a sick family member, please consider the normal work routine.

CH: Is your spouse/ partner currently working for pay or did he/she work for pay in the past? Is he/she currently or did he/she work in the past for his/her own family's business?

CL: Which of the following best describe your spouse/partner current situation?

CZ: Is your partner currently working for pay, did he/she work for pay in the past, or has he/she never been in paid work?

DE: Is your spouse/partner currently working for pay, did he/she work for pay in the past, or has he/she never been in paid work?

DK: Are you spouse/partner currently employed?

ES: Which of the following situations applies to your spouse/partner at present?

FI: Is your spouse/partner in paid work?

FR: SPWORK is computed from the former variables SPWRKST and SPWRKTYP.

GB-GBN: Which of these descriptions applied to what your (wife/husband/partner) was doing last week, that is the seven days ending last Sunday?

HR: Does your spouse/ steady partner is currently working for an income?

IL LT LV MX PH SE SI SK TR TW ZA: Is your spouse/ partner currently working for pay, did he/she work for pay in the past, or has he/she never been in paid work?

IS: Is he/ she in paid work, has he/ she been in paid work previously or has he/ she never been in paid work?

KR: Does your spouse/partner has a job that provides income? Has he/she ever had a paid job?

NL: What is at present the main activity of your partner?

NO: Is your spouse/partner, or has she/he ever been, in paid work?

NZ: Which one of these following categories best describes your partner's or spouse's current employment status?

PT: Which of the following situations applies to the case of your partner?

RU: Is your spouse (partner) currently working for pay? If no, what is his/her status? Did your spouse/partner work for pay in the past?

US: Last week was your spouse working full time, part time, going to school, keeping house, or what?

0 Not applicable (Code 3 in PARTLIV)

1 He/ she is currently in paid work

2 He/ she is currently in paid work, but in paid work in the past

3 He/ she has never had paid work

9 No answer

in Argentina (AR):

1 He/she is working now for an income (including if spouse, partner has not recently worked because of temporary illness, vacations, strike), he/she is working but not for an income (family workers, do not include work for government social program's benefits nor volunteer work)

in Switzerland (CH):

5 Spouse/ partner living apart, not asked

in Denmark (DK):

1 Full time employed (30 hours or more per week), self-employed (30 hours or more per week), employed part time (10-29 hours per week), self-employed part time (10-29 hours per week), employed less than part time (less than 10 hours per week), employed but temporarily out of work because of illness or maternity leave, parents leave or education leave, helping family member, apprentice or trainee

in Great Britain (GB-GBN):

0 Not applicable (not married in MARITAL)

1 In paid work (or away temporarily) for at least 10 hours in week, on government training/ employment programme, waiting to take up paid work already accepted

in Japan (JP):

0 Not available

in Norway (NO):

1 Yes, she/he is in paid work now; yes, but temporarily away, due to illness, on leave, or similar

in New Zealand (NZ):

1 Employed-full time (35+ hours weekly), employed-part time (15-35 hours weekly), employed-less than 15 hours/temporarily out of work, helping family member

in Russia (RU):

1 In paid work (full time employment: 35 and more hours per week), in paid work (part time employment: (15 - 35 hours per week), in paid work (part time employment: (less than 15 hours per week)

in United States of America (US):

0 Not applicable (Code 2-6 in MARITAL)

2 Currently not in paid work

Note:

/ NL: Derived from SPWRKST; note that the word partner in the context of the questionnaire may refer to someone with whom one is not married or cohabiting!

0 Not applicable (Code 3, 5, 0 in SPWORK)

in Czech Republic (CZ):

1 Full-time employee, part-time employee (half-time or higher), part-time employee (less than half-time)

9 Unemployed, student, working retired person, on maternal or parental leave, permanently sick or disabled, retired, permanent domestic work, other

in Denmark (DK):

1 Employed in the public sector (state, county or municipality), employed in a public owned company, employed in private undertaking, including assisting spouse

in Great Britain (GB-GBN):

5 Self-employed with or without employees

in Portugal (PT):

8 Don't know

in BG ES FR JP NZ RU:

0 Not available

Note:

/ CZ: Due to the mistake the in the questionnaire current economic status (not last job) of partner is recorded! Employment relationship is coded according to the current job, for those currently not economically active answers are coded as 9. No answer

/ DE: Occupational status taken from ALLBUS 2010

/ US: The US survey did not ask if self-employed spouses had any employee or not. Thus, code 2 on SPEMREL identifies whether the spouse was self-employed or not, but nothing about employees. The US survey did not ask about family business, either. Thus, Code 3 and 4 are not used in the US data.

SPISCO88 - Spouse, partner: occupation ISCO/ ILO 1988

BVQ\_20. SPISCO88

Spouse/ partner Occupation: International Occupation Code 1988

a. What is/ was your spouse's/ partner's occupation - i.e., what is/ was the name or title of his/ her main job?

(Please write in and describe as clearly as possible.)

His/ her occupation is/ was:

b. In his/ her main job, what kind of activities does/ did he/ she do most of the time?

(Please write in and describe as clearly as possible.)

c. What does/ did the firm/ organisation he/ she work/ worked for mainly make or do - i.e., what kind of production/ function is/ was performed at his/ her workplace?

(Please write in and describe as clearly as possible.)

AR: Which is your spouse's or partner's main current job, or his/her main job when worked before? What does (did) he/she do in that job?

Which are (were) his/her main tasks? In what kind of enterprise, service or activity do your spouse or partner work (worked)?

AT: Which professional activity is he or she carrying out in his or her main job or did he or she carry out last?

AU: What is/ was your spouse's/ partner's occupation - i.e., what is/ was the name or title of his/ her main job? In his/ her main job, what kind of activities does/ did he/ she do most of the time? What does/ did the firm/ organisation he/ she work/ worked for mainly make or do- i.e., what kind of production/ function is/ was performed at his/her workplace? (Please write in and describe as clearly as possible.)

BE-FLA: (If married or living together with partner) What's your partner's situation right now, what does he do for a living at the moment? (If partner is not in paid work now) Did your partner used to be in paid work? (If partner is in paid work or used to have paid work) Can you give me the name of the present (former) profession of your partner? Can you give me a detailed description what the profession of your partner implies?

CH: (If respondent has a partner - married or not - and lives with him) Which profession does your partner practice? (If partner 'not working for pay') Did your partner have a paid professional activity in the past? Which one was the last one?

CL: (If respondent has spouse or partner) What is your spouse or partner main activity? What are some of your main duties?

CZ: And what is (was) your partner's current (last) occupation, what kind of activity does (did) he/she do in it? Please state his/her job title and describe briefly the job activity he/she does (did) in this occupation.

DE: (If respondent has spouse or steady partner) Which of the categories on the card applies to your husband/ wife/ partner? What work does your spouse/ partner do in his/ her main job? Please describe this work precisely. Does this job, this work have a special name?

DK: What are/ were your spouse/ partner's accurate occupation?

ES: (If married or living with partner) And which is/ was the occupation or trade of your spouse/ partner? That is, in what does/ did his/ her work consist of, specifically? (Please be as precise as possible, describing the tasks he/ she does/ did). (Main occupation)

FI: If you are currently married or cohabiting or in a registered partnership, what is your spouse's current or latest occupation?

FR: What is his/ her occupation or last occupation?

GB-GBN: Now I want to ask you about (husband's/ wife's/ partner's) (present/ future) job. What (is his, her job/ will that job be)? What (is/ was) the name or title of the job? What kind of work (do/ will) (he/ she) do most of the time? What training or qualifications (are/ were) needed for that job?

HR: Please state the exact title of your spouse/ partner's job title and occupation. Describe what he/ she does; what his/ her main tasks are.

What are the educational and professional requirements for the job?

IS: What is/ was his/ her main job? His/ her job title is /was: ..... What type of tasks do/ did you mainly carry out in your main job? What type of activity goes/ went on in the workplace? Please write in and describe as clearly as possible.

JP: Please give details about the main type of work your spouse is engaged in.

KR: Does your spouse have a job that provides income? Has your spouse ever worked for pay? What kind of work does your spouse normally do? (If currently working or ever worked for pay) What does (he/ she) actually do in that job? If currently not working, tell me about (his/ her) last job.

LV: What is your spouse's/ permanent partner's occupation? (Occupation, sector, position according to main source of living and most recent job if spouse/ partner has no current job)

MX: (If married or living with partner) What is your partner's current occupation (or last)?

NL: What exactly is or was your partner's occupation? Please specify his/her main activities / responsibilities.

NO: What is/was your spouse/partner's work title (main job)? Please make a short description of her/his work tasks. Please describe her/his work tasks as accurately as possible. What does/did the organisation he/she work/worked for mainly make or do?

NZ: (If married or respondent has a partner) What is your partner's or spouse's main occupation (or their most recent occupation?) If your partner or spouse has more than one job, business or professional practice, please give the occupation for the job he or she spends the most time at. Please describe fully, using two words or more.

PH: What is the main job of your spouse or partner? (Most recent job if currently unemployed).

PT: What is/ was the professional activity of your partner? Describe in detail (do not use initials or abbreviations).

RU: What is your spouse/ partner's current occupation? (Occupation at most recent work place if spouse/ partner no current job) What kind of activities does/did he/she do most of the time?

SE: What is your husband's/ wife's/ live-in partner's occupation? If he/ she is retired or not working at the moment, please indicate what his/ her occupation was in his/ her last job. Please describe it as clearly as possible. What kind of production/ activity is performed at his/ her current or last workplace?

SI: (If married or living with partner) What kind of work or occupation does your partner do? If not working at the moment: what was his/ her last (main) occupation? Tell detailed name of his/her position at work and exact profession. Describe what does he/she do, what are his/her main duties; What is the main activity of his/her work organisation?

SK: (If married or respondent has got steady partner) Please, write the name of the main occupation of your spouse/ partner. Include detailed description of his/ her working activity: what is his/ her principal activity, responsibility etc. Use two or more words and exclude abbreviations. If your spouse/ partner is not in labour force at the moment (is retired or unemployed etc), think of his/ her most recent job.

TR: What is your spouse or partner's occupation? So, what is his/her title?

TW: What is your spouse's or partner's occupation at present? ( at present, or prior to retirement)

US: (If married and spouse presently in paid work or ever worked as long as one year) What kind of work does/ did your spouse normally do? That is, what is the job called? What does/ did your spouse actually do in that job? Tell me what are some of his/ her main duties? What kind of place does/ did your spouse work for? What do they (make/ do)?

ZA: What is your spouse/ partner's current occupation?

9995 CH: not asked for spouse/partner living apart

9997 Refused

9998 Don't know, not classifiable, inadequately described

9999 No answer

in Japan (JP):

0 Not applicable (Code 3 in PARTLIV, code 2-9 in SPMAINST)

Note:

/ AT: The fieldwork/research institute originally used 3-digit-level ISCO88-COM and transformed codes on the 4-digit level, e.g. 111=1110; 221=2210

/ CZ: Modification of KZAM (Czech national ISCO-88 related classification) recoded into ISCO-88 (ILO).

/ DE: SPISCO88 taken from ALLBUS 2010 and constructed from spouse's current occupation (main job): If spouse currently not employed or part time employed but employed in the past then last occupation (main job) taken according to ISCO88 (ILO) with some additional codes which are already recoded.

/ ES: Three digits Spanish adaptation of ISCO-88 = CNO-94 (National Classification of Occupations)

/ FR: French classification of the occupations and the social categories (PCS 1994) were recoded. Because of incomplete information to describe the occupation, a code with 1 zero at the end corresponds to the 2 digits ISCO code and a code with 2 zeros at the end corresponds to the one digit ISCO code.

/ GB-GBN: ISCO88 (COM) is derived from [XSOC200] using the translation table; where the frequency of any 4 digit ISCO code in the ISSP dataset is less than 5, the code is reduced to 2 digits.

/ NL: ISCO-88 codes are converted from national occupation codes, provided by Statistics Netherlands 1984, which is very close to ISCO-68.

/ NO: STYRK (Standard Classifications of Occupations) based on, but not identical to ISCO88-COM. STYRK codes are recoded into ISCO88 ILO according to the syntax available in the BV documentation.

/ SE: A recoding scheme between the national occupation scheme SSK and ISCO88-COM is available.

/ SK: Slovak national ISCO-88 recoded into ISCO-88 (ILO)

/ TR: Open ended question answers are then coded according to (ISCO) occupation descriptions into ISCO88

/ US: US Occupation Codes SPOCC80 from GSS are recoded to SPISCO88.

SPMAINST - Spouse, partner: Main status

BVQ\_21. SPMAINST

Which of the following best describes your spouse's/partner's current situation? If he/ she temporarily is not working because of temporary illness/ parental leave/ vacation/ strike etc., please refer to his/ her normal work situation.

(Please tick one box only.)

AR: Which of the following alternatives better describes the current situation of your spouse or partner?

AU: Which of the following best describes your spouse's/partner's current situation? (If he/ she temporarily is not working because of temporary illness/ parental leave/ vacation/ strike etc., please refer to his/ her normal work situation.)

BE-FLA: Which of the possibilities on card 20 describes the current situation of your partner?

CH: Which one of the following best describes the current situation of your partner?

CL: Please choose one of the following alternatives, depending on whether your spouse/partner is working or not working

CZ: How would you best describe your partner's current economic status?

DK: Are your spouse/partner currently employed?

ES: Which of the following situations applies to your partner/ spouse at present?

FI: Which of the following best describes your spouse's/partner's current situation? If he/she is temporarily away from paid work on account of parental or other leave, unpaid leave or some other similar reason, please answer according to his/her normal work situation.

FR: If you are married or if you live with a partner, what is its current occupation or economic position? SPMAINST is computed from the former variable SPWRKST.

GB-GBN: Which of these descriptions applied to what your (wife/husband/partner) was doing last week, that is the seven days ending last Sunday?

HR: What is the work status of your spouse/partner (which of following best describes his/her current situation)?

IL LT LV MX PH SE SI SK TW ZA: Which of the following best describes your spouse's/partner's current situation?

IS: What of the options below best describes his/her current status? If he/ she is temporarily out of work because of temporary illness/ parental leave/ vacation/ strike ect. , please respond based on the status that generally applies to him/ her.

KR: Does your spouse/partner have a job that provides income? (If not working) What is the primary reason for unemployment?

NL: What is at present the main activity of your partner?

NO: What is your spouse/partner's current main activity? If she/he is on sick leave, parental leave etc., refer to her/his normal situation.

NZ: Which one of these following categories best describes your partner's or spouse's current employment status?

PT: What is the current professional situation of your partner?

RU: Is your spouse (partner) currently working for pay? If no, what is his/her status? Did your spouse/partner work for pay in the past?

TR: Which of the following does suit you best?

US: Last week was your spouse working full time, part time, going to school, keeping house, or what?

0 Not applicable (Code 3 in PARTLIV)

1 In paid work (as an employee, self-employed, or working for his/ her own family's business)

2 Unemployed and looking for a job

3 In education (not paid for by employer), in school/ student/ pupil even if on vacation

4 Apprentice or trainee

5 Permanently sick or disabled

6 Retired

7 Doing housework, looking after the home, children or other persons

8 In compulsory military service or community service

9 Other

99 No answer

in Argentina (AR):

1 Working full time for an income, working part time for an income, working less than part time or occasional work

in Austria (AT):

1 Employed, helping family member

in Belgium/ Flanders (BE-FLA):

1 Paid work (as employee, self-employed, GESKO, RVA-apprenticeship, interim, DAC, service cheques, helping family member), sick leave, maternity leave, unpaid leave, fulltime career break (also parental break, palliative break, medical support of a sick relative)

2 Unemployed with and without benefit, looking for a job

in Switzerland (CH):

0 Not applicable (Code 3,5 in Partliv)

in Chile (CL):

1 Employed full time, half time and less than half time

2 Unemployed, looking for a job and looking for a job for the first time

in Czech Republic (CZ):

1 Full-time employee, part-time employee (half-time or higher), part-time employee (less than half-time), self-employed person without employees, self-employed person with employees, working retired person, on maternal or parental leave

9 In family business without formal employment contract, other

in Denmark (DK):

1 Full time employed (30 hours or more per week), self-employed (30 hours or more per week), employed part time (10-29 hours per week), self-employed part time (10-29 hours per week), employed less than part time (less than 10 hours per week), employed but temporarily out of work because of illness or maternity leave, parents leave or education leave, helping family member

6 Old age retirement, job release scheme etc (pension benefits payable between early retirement and normal retirement pension)

in France (FR):

1 In paid work (35 hours per week or more), in paid work (15 to 34 hours per week), in paid work (less than 15 hours per week), working for your own

in Great Britain (GB-GBN):

0 Not applicable: not married in MARITAL

in Lithuania (LT):

3 In education (except those cases if the studies are paid by the employer) or is in academic, summer or similar vacation

in Norway (NO):

5 On social security, permanently sick or disabled

in New Zealand (NZ):

1 Employed-full time (35+ hours weekly), employed-part time (15-35 hours weekly), employed-less than 15 hours/temporarily out of work, helping family member

in Taiwan (TW):

1 Having a full-time job, having a part-time job, doing odd job; temporarily unemployed, working for the family business with and without paid salary

in United States of America (US):

0 Not applicable (Code 3-6 in MARITAL)

Note:

/ AU: 'In Compulsory military service or community service' not asked.

/ FR: By mistake, the french survey fielded the question for the obsolete variable SPWRKST instead of SPMAINST. Therefore, the data in this variable had to be reconstructed. Please note that the reconstructed data do not perfectly match the categories for SPMAINST. Firstly, respondents with dual status (e.g. retired persons who also self-assess as working for pay) cannot be correctly covered. Secondly, category 2 'Unemployed and looking for a job' may also include respondents who are unemployed but not looking for a job. Thirdly, the French data cannot distinguish between category 3 'In education' and 4 'Apprentice or trainee'. Only the more general category 'In education' was coded. Fourthly and finally, it was not possible to construct category 8 'In compulsory military or community service'. Respondents doing military or community service are most probably included in category 9 'Other'.

/ IS: 'In Compulsory military service or community service' not asked.

Category 5 'Disabled' ("öryrki" in original) refers to those receiving benefits from the state after having gone through an official process of being deemed unable to work based on any type of health condition.

UNION - Trade union membership

BVQ\_22. UNION

Are you or have you ever been a member of a trade union or similar organisation?

If yes: is that currently or only previously?

(Please tick one box only.)

AR: Are or were you member of a union?

AT: Are you member of a trade union or have you been a member before?

AU: Are you or have you ever been a member of a trade union or similar organisation? If yes: is that currently or only previously?

BE-FLA: Are you currently a member of a union, did you be a member once or have you never been a member of a union?

CH: Are you member of a trade union or of an employers association?

CL: Are you or were you part of a trade union?

CZ: Are you or have you ever been a member of a trade union?

DE: May I ask you whether you are currently a member of a trade union? (If currently no member) Were you once a member of a trade union?

DK FI: Are you or have you been member of a trade union?

ES: Are you currently a member of a trade union or have you been one in the past? And do you belong presently or in the past to a professional association?

FR: Are you or were you unionized?

GB-GBN: (May I just check) are you now a member of a trade union or staff association? Have you ever been a member of a trade union or staff association?

HR: Are you a member of trade union (or were you in the past)?

IL LT LV NO PH SE TW: Are you or have you ever been a member of a trade union or similar organisation?

IS: Are you or have you ever been a member of a labour union? If yes, does that apply to current or previous membership?

JP: Do you belong to any trade union?

KR: (If currently working for pay and for someone else) Are you a union member? (If currently no union member) Were you a member of trade union before?

MX: At the present time you are affiliated to a union?

NL: Are you or have you ever been a member of a trade union or similar organisation?

NZ: Have you ever been a member of a trade union?

PT: Are you a member of a union?

RU: Have you ever been or are you a member of a trade union?

SI: Are you a member of a union?

SK: Are you currently or were you in the past member of a union?

TR: Are you currently member of a trade union? Had you ever been a member of a trade union?

US: Do you (or your spouse) belong to a labor union?

ZA: Are you a paid up member of a trade union?

0 Not applicable (never had a paid job, not in labour force)

1 Yes, currently

2 Yes, previously, but not currently

3 No, never, US: no

7 Refused

9 No answer

in France (FR):

1 Yes, currently or previously

in South Korea (KR):

0 Not applicable (Code 2,3 in WORK)

Note:

/ DE: Current and former union membership taken from ALLBUS 2010

RELIGGRP - Groups of religious affiliations (derived from nat\_RELIG)

Religious main groups: compressed variable derived from NAT\_RELIG

- 0 No religion
- 1 Roman Catholic
- 2 Protestant
- 3 Christian Orthodox
- 4 Other Christian
- 5 Jewish
- 6 Islamic
- 7 Buddhist
- 8 Hindu
- 9 Other Asian Religions
- 10 Other Religions
- 97 Refused
- 98 Information insufficient
- 99 No answer

in Chile (CL):

- 0 None, agnostic, atheist

Note:

/ For detailed country specific question text see NAT\_RELIG

ATTEND - Attendance of religious services

BVQ\_24. ATTEND

Apart from such special occasions as weddings, funerals, etc., how often do you attend religious services?

(Please tick one box only.)

AR AT CL CZ DK KR RU NZ PH SE SI US: How often do you attend a religious service/ religious services?

AU: Apart from such special occasions as weddings, funerals, etc., how often do you attend religious services?

BE-FLA: People tend to participate in religious services due to a marriage, funeral etc. If we do not include these services, how many times do you attend religious services?

CH HR IL LT LV MX SE: Apart from such special occasions as weddings, funerals, etc., how often do you attend religious services?

DE: As a rule, how often do you go to church?

ES: (If catholic or believer in another religion) How often do you go to mass or other religious services, excluding the occasions related to social ceremonies, such as weddings, first communions, or funerals?

FI: How often do you attend worship services or other religious services or church ceremonies?

FR: Except the marriages, the funerals and the baptisms, how often do you attend a religious cult?

GB-GBN: Apart from such special occasions as weddings, funerals and baptisms, how often nowadays do you attend services or meetings connected with your religion?

IS: Disregarding special occasions, such as weddings, funerals ect., how often do you attend religious ceremonies?

JP: How often do you attend a place of worship or prayer? Exclude ceremonial occasions, such as wedding or funerals.

MX: How often do you go to mass or religious services?

NL: How often have you on average over the last years attended a ceremony or service of a religious community?

NO: How often do you attend religious services or other religious meetings? (Do not include weddings, funerals, or baptisms or similar).

PT: Not counting special occasions such as marriages, funerals and baptisms, how often do you take part in religious services?

SK: How often do you participate in religious services (such as masses and church services)?

TR: (Only for Muslims) Taking the last year into account, how often were you able to perform salaat and worship?

TW: How often do you participate in any religious group at present? ( e.g. pilgrim group, practicing Zen, Sunday service, spirit-cultivation meeting, sermon-delivering meeting, volunteer work, etc.)? Please answer this question regardless of whether you have a religious belief or not.

ZA: Apart from special occasions such as weddings, funerals and baptisms, how often do you attend services or meetings connected with your religion?

0 NAP, no religion

1 Several times a week or more often

2 Once a week

3 2 or 3 times a month

4 Once a month

5 Several times a year

6 Once a year

7 Less frequently than once a year

8 Never

97 Refused

98 Don't know

99 No answer

in Austria (AT):

2 Every week, almost every week

in Israel (IL):

1 Several times a week or more, once a day or more

in Turkey (TR):

0 NAP, no Islamic religion

1 From five times a day up to few times a week

Note:

/ DE: Attendance of religious services taken from ALLBUS 2010; ALLBUS 2010 church attendance answer categories deviate from ISSP

ATTEND categories: German category 3 collapses ISSP categories 3 and 4; German category 5 implicitly includes ISSP category 6.

/ LT: Category 5. Several times a year was missed in Lithuanian questionnaire due to translation error.

TOPBOT - Top-Bottom self-placement

BVQ\_25. TOPBOT Top - Bottom self-placement (10 pt scale)

In our society, there are groups which tend to be towards the top and groups which tend to be towards the bottom. Below is a scale that runs from the top to the bottom.

(Please tick one box only.)

AR: In our society there are groups that tend to be at the top and others that tend to be at the bottom. In such scale that goes from 10, at the top, and 1, at the bottom, where would you place yourself today in this scale?

AU: In our society there are groups which tend to be towards the top and groups which tend to be towards the bottom. Below is a scale that runs from the top to bottom. Where would you put yourself on this scale?

BE-FLA: The scale on card 72 represents the place that someone can have in society. The number 1 represents a place on the bottom of society. The number 10 a place on the top of society. Where would you place yourself on this scale? You can give a number from 1 to 10.

CH: In our society there are groups which tend to be towards the top and groups which tend to be towards the bottom. Below is a scale that runs from top to bottom. Where would you put yourself now on this scale?

CL: In our society there are groups that place themselves on the highest levels, and groups that place themselves on the lowest levels. Here is a scale that goes from the lowest to the highest level. Where on this scale would you place yourself?

CZ: In our society, there are groups which tend to be associated with high social status and, in contrast, groups which tend to be associated with low social status. Where would you put yourself on this scale?

DE: In our society there are groups which tend to be towards the top and groups which tend to be towards the bottom. Below is a scale that runs from the top to the bottom. Where would you rank yourself on this scale?

DK: In our society one sometimes talk about, that there are some groups which are perceived as higher ranked in society and other groups which are perceived as lower ranked. Below there is a scale which runs from top to bottom. If you should place yourself on this scale where 1 is bottom of society and 10 is top of society, where would it be?

ES: In our society, there are groups that tend to occupy a high or very high position, while others occupy middle or low positions. In a scale where number 10 represents the highest social class and 1 the lowest, where would you place yourself?

FI: There are different classes in our society. Some social classes are higher and some lower. On a scale from 1 to 10 where 10 is the highest class and 1 the lowest, where would you place yourself? Please circle only one number.

FR: In our society, there are groups which are rather at the top of the society and the others which are rather below. Here is a scale which goes of the highest at the lowest. Where do you think you stand on this scale?

HR: In our society there are groups of people that hold higher or lower social position. Where would you locate yourself on the scale, that ranges from 10 (top) to 1 (bottom)?

IS: In our society there are groups that have a tendency to be close to the top of the social ladder while others tend to be close to the bottom. Here below is a scale that goes from the top to the bottom. Where would you place yourself on this scale?

JP: If current Japanese society were divided into 10 strata (1 being the lowest, and 10 being the highest), to which stratum do you think you belong?

KR LT LV NO SE SI TW ZA: In our society there are groups which tend to be towards the top and groups which tend to be towards the bottom. Below is a scale that runs from the top to bottom. Where would you put yourself on this scale?

MX: If we classified the families of Mexico according to their level of life in a scale from 1 to 10, where level 1 would be the poorest families and level 10 the richest families in the country. You, in that scale in what level would you locate your family?

NL: Her is a picture of the social ladder. At which step do you think you are at the moment?

PH: At present, where will you put yourself on this card regarding your current situation in life?

PT: In general, some people are at the top of our society and other people are at the bottom. The scale of this card represents the top and the bottom. At which scale point do you think you currently are?

RU: In our society there are groups which tend to be towards the top and groups which tend to be towards the bottom. Below is a scale that runs from the top to the bottom. Where would you put yourself on this scale if 1 means highest social position and 10 lowest social position?

SK: In our society there are people who have a higher position but there are also people which are closer to lower positions. The enclosed scale is arranged from top (code 10) to bottom (code 1). Where would you put yourself on this scale?

TR: Some people have a high some others have a low social status in society. Where would you place yourself on a ladder of social status where 1 represents the lowest and 10 the highest social status?

PARTY\_LR - R: Party affiliation: left-right scale

Political party affiliation: left/ right placement - based on and derived from NAT\_PRTY

<Question text see NAT\_PRTY>

Not derived from NAT\_PRTY:

KR: To what degree do you think yourself politically liberal or conservative?

RU: What political forces or party do you support or at least sympathize with (left-right scale)?

- 0 NAP, did not vote, not eligible
- 1 Far left (communist etc.)
- 2 Left, center left
- 3 Center, liberal
- 4 Right, conservative
- 5 Far right (fascist etc.)
- 6 Other, no specification
- 7 No party affiliation, no preference, would not vote
- 97 Refused
- 98 Insufficient information
- 99 No answer

in Israel (IL):

- 0 Not available

in South Korea (KR):

- 1 Very liberal
- 2 Somewhat liberal
- 3 Neither liberal nor conservative
- 4 Somewhat conservative
- 5 Very conservative
- 98 Can't choose

in Taiwan (TW):

- 0 Not available

Note:

/AU: Additionally codes some of the open answers from AU\_PRTY 'Other party'.

/ ES: Data to construct PARTY\_LR come from CIS Study 2799 (2009) and 2829 (2010), as well as from the 2006 Chapel Hill Expert Survey.

See Liesbet Hooghe, Ryan Bakker, Anna Brigevid, Catherine de Vries, Erica Edwards, Gary Marks, Jan Rovny, Marco Steenbergen, Milada Vachudova (2010), Reliability and Validity of Measuring Party Positions: The Chapel Hill Expert Surveys of 2002 and 2006, European Journal of Political Research, 42 (4): 684-703.

Parties with codes 5 to 12 are regionalist/nationalist parties and thus their main axis of identification/electoral competition is not the left-right one, but centre-periphery.

/ IL: The left/ right placement is not available since the traditional left-right issues are not central to most political parties.

/ TW: This kind of party affiliation (left-right) does not fit for Taiwan's political situation.

VOTE\_LE - Did respondent vote in last general election?

BVQ\_27. VOTE\_LE

Some people don't vote nowadays for one reason or another. Did you vote in the last [country] national election in [month/year]?

(Please tick one box only.)

AR: Do you remember for whom did you vote in the 2007 presidential elections?

AT: Last national elections were in September 2008. Did you vote?

AU: Did you vote in Australia's federal election in August 2010?

BE-FLA: Did you vote for the federal (national) elections in June 2007?

CH: For which party did you vote at the last federal elections in October 2007?

CL: Are you registered to vote? (If yes) Did you vote on the last parliamentary elections of December 2009?

CZ: Let's look back at the last elections to the Chamber of Deputies, which took place on May 28 and 29, 2010. Did you vote in those elections?

DE: The last general election took place in September 2009. Did you vote in that election? (If no) Why did you not vote?

DK: Did you vote in the previous election the 13 November 2007, or were there some reason that you didn't have opportunity to or desire to vote?

ES: Could you tell me whether in the past General elections of March the 9th 2008 you did vote?

FI: Did you vote in the last parliamentary elections in 2007?

FR: Did you vote in last first round of the 2007 French Presidential Election?

HR: Some people from various reasons do not vote on elections. Did you vote in last general election which was held in 2007?

IL: Some people do not vote in elections for one reason or another, did you vote last Knesset elections were held in February 2009?

IS: Some people nowadays for one reason or the other do not vote in elections. Did you vote in the last government election in Iceland in April 2009?

JP: Did you vote in the Upper House election in July 2007?

KR: Did you vote in the 5th Nationwide local elections (June 2, 2010)?

LT: Some people don't vote nowadays for one reason or another. Did you vote in the last Seimas election in October 2008?

LV: Did you vote in the elections of 10th Saeima that took place on October 2nd 2011?

MX: Did you vote in the last general election in 2009?

NL: Which party did you vote for in the parliamentary elections of 9 June 2010?

NO: Did you vote in the last parliamentary election in 2009?

NZ: At the 2008 General Election, who did you vote for?

PH: Some people don't vote nowadays for one reason or another. Did you vote in the last Philippine national election in May 2010?

PT: Did you vote in the last elections? (Assembleia da República on 05.06.11)

RU: Did you vote in the last election of the State Duma in December 2007? If yes, what party did you vote for?

SE: Some people don't vote nowadays for one reason or another. Did you vote in the last national election?

SI: Some people don't vote nowadays for one reason or another. Did you vote in the last national election (2008) for the Parliament?

SK: In June 2006, elections to National Council of the Slovak Republic were held. Did you vote?

TR: Were you able to cast your vote in the last election on 22 July 2007?

TW: Did you vote in the last presidential election (March 2008)?

US: In 2008, you remember that Obama ran for President on the Democratic ticket against McCain for the Republicans. Do you remember for sure whether or not you voted in that election?

ZA: For which party did you vote for in the last election, which was held in 2009?

0 NAP, not eligible to vote at last election

1 Yes

2 No

3 Not eligible to vote

7 Refused

8 Don't know

AR\_ETHN - Country specific: origin country/ ethnic group/ ethnic identity/ family origin: Argentina

BVQ\_28. nat\_ETHN

<TN: The aim of this variable is to measure country-specific concepts concerning the respondent's ethnic background or sense of belonging to an ethnic group/community. This can be determined by the respondent's citizenship, family's country of origin, ethnic group, ethnic identity or race, both self-assessed or by interviewer observation. Please focus on the most relevant concept for your country. If several concepts are equally relevant, a multi-dimensional typology based on the relevant concepts should be constructed and coded into one single variable. For more information please see the BV document.>

AR\_ETHN - Argentina: Country specific origin country/ ethnic group/ ethnic identity/ family origin

Where were/was... born? Your father's father, your father's mother, your mother's father, your mother's mother

- 0 NAP, other countries
- 1 3 or 4 Argentine grandparents
- 2 3 or 4 Italian or Spanish grandparents
- 3 2 Argentine and 2 Italian or Spanish grandparents
- 4 2 Argentine and 2 non Italian and Spanish grandparents
- 5 3 or 4 South American neighbouring countries, including Peru
- 6 3 or 4 European but no Italian or Spanish grandparents
- 7 Other combination of grandparents birth place
- 98 3 or 4 DK grandparents birthplace
- 99 No answer

Note:

/ AR: An Ethnic variable was not used. As a proxy, a variable was constructed taking into account only the birth places of the four grandparents. The result is a variable detailing different birth places combinations that were found, which are shown in construction/recording.

AT\_ETHN - Country specific: origin country/ ethnic group/ ethnic identity/ family origin: Austria

AT\_ETHN - Austria: Country specific origin country/ ethnic group/ ethnic identity/ family origin

Do you have the Austrian citizenship?

Which language has been used primarily in your childhood's family?

From which country do your parents come from?

0 NAP, other countries

11 Native citizen - majority member

12 Native citizen- minority member

21 New citizen - German speaker

22 New citizen - non-German speaker, Christian

23 New citizen - non-German speaker, non-Christian

31 Non-citizen - German speaker

32 Non-citizen - non-German speaker, Christian

33 Non-citizen - non-German speaker, non-Christian

Note:

/ AT: Concept of ethnicity: We first distinguish between 'native citizens', 'new citizens' and 'non-citizens'. Due to reasons of differentiations and inequalities also within these groups we further distinguish respondents by family origin (language in parent's home and country of parent's origin) and religious denomination. A multidimensional typology is based on the following four aspects:

a) Citizenship: Yes or No (source variable: f92)

b) Language in parents home: German or other language (source variable: f94)

c) Family origin: Parents are Austrian or from other country (source variable: f93)

d) Religion (see AT\_relig): Christian or other denomination (source variable: f78)

Based on these variables we can construct eight types of ethnic group membership for Austria.

1. Native citizen – majority member: native German speaking Austrian citizens, all religious denominations
2. Native citizen – minority member: non-German speaking Austrian citizens, all religious denominations; members of Austrian minorities (mainly Croatsians, Hungarians, Sinti and Romanies, Slovenians)
3. New citizen – German speaker: Immigrated Austrian citizen with German speaking background, all religious denominations
4. New citizen – non-German speaker, Christian: Immigrated Austrian citizen with non-German speaking background, and Christian denomination
5. New citizen – non-German speaker, non-Christian: Immigrated Austrian citizen with non-German speaking background, and denomination other than Christian
6. Non-citizen – German speaker: No citizen with German speaking background, all religious denominations (Respondents from Germany or from German region of Switzerland mainly)
7. Non-citizen – non-German speaker, Christian: No citizen with non-German speaking background, Christian denomination
8. Non-citizen – non-German speaker, non-Christian: No citizen with non-German speaking background, denomination other than Christian

For defining the three main groups in an easy way, we use two-digit codes. The first digit shows the distinction about citizenship: '1' means Native citizens, '2' means New citizens, and '3' means Non-citizens. The second digit shows the distinctions in the other dimensions.

BE\_ETHN - Country specific: origin country/ ethnic group/ ethnic identity/ family origin: Belgium/ Flanders (BE-FLA)

BE-FLA\_ETHN - Belgium/ Flanders: Country specific origin country/ ethnic group/ ethnic identity/ family origin

Do you have the Belgian nationality? Does your father have the Belgian nationality from birth? Does your mother have the Belgian nationality from birth?

0 NAP, other countries

14 Belgium

98 Other, mixed origin

Note:

/ BE-FLA: In the Flemish Region about 6,5% of the people of 18 years or older do not have the Belgian nationality. People living in Belgium with the Belgian nationality have the right to vote in elections (in fact voting is compulsory), have the right to stand for elections, and last but not least, having the Belgian nationality is a prerequisite for statutory jobs in public office. However, due to the 'snel-Belg-wet' (a law, passed in 2000, which under certain conditions give the right to the Belgian nationality) many people obtained the Belgian nationality in the last decennium.

So, only asking the question whether the respondent has the Belgian nationality or not, does not give an adequate picture of the country/place of origin.

To get an idea of the nationality of the parents of the respondent, questions are asked whether the father and the mother have the Belgian nationality from birth.

Based upon those three questions a distinction is made between only two categories:

- 1) Respondents with the Belgian nationality and parents both born with the Belgian nationality.
- 2) All other respondents. Further detailed and workable distinctions are not possible due to the limited number.

CH\_ETHN - Country specific: origin country/ ethnic group/ ethnic identity/ family origin: Switzerland

CH\_ETHN - Switzerland: Country specific citizenship

What is your nationality? Tell me all countries of which you have the nationality? Several answers possible.

Ethnicity is multiform and not a clear concept in Switzerland. Because the debate on ethnicity is closely related to the concepts of peoples or nations, the citizenship seems important to consider in order to complementing the available background variables on religion.

99995 Two nationalities, non Swiss  
99999 No answer

Note:

/ CH: Informations about nationality (1st, 2nd, 3rd) were first convert in ISO 3166- CODE 3 digit (NATION1, NATION2, NATION3). In case of two nationalities, Switzerland was always recoded first on NATION1.

The 3 variables were then recoded on a single variable (NATION):

- the respondents with two nationalities received some special code (those who are Swiss and have a second nationalities and those who have two nationalities but are not Swiss)
- only a limited number of individuals have three nationalities and all are Swiss, they were recoded as 'Switzerland with a second nationality'

Finally, a code in five digits has been elaborated in order to group some nationalities less represented (first number=continent; second number=geographical region of this continent; the three next digits corresponds to the ISO 3166 digit code of the country)

IS\_ETHN - Country specific: origin country/ ethnic group/ ethnic identity/ family origin: Iceland

IS\_ETHN - Iceland: Country specific origin country/ ethnic group/ ethnic identity/ family origin

Do you belong to an ethnic group or an ethnic minority here in Iceland?

0 NAP, other countries

1 Yes (belong to ethnic minority)

2 No (do not belong to ethnic minority)

98 Don't know

99 No answer

Note:

/ IS: It should be noted that the cultural meaning of "þjóðarbrot"/"ethnic group" in Iceland does not include those from the majority of the population. Meaning that those belonging to the majority group, tracing their ethnicity back to the settlers in Iceland (Norse/Celtic), would not culturally refer to themselves as belonging to a "þjóðarbrot". Thus, those answering "yes" belong to the ethnic majority and those who answer "no" to minorities.

IS\_ETHN

Value	Label	Missing	Count	Percent	Valid Percent

MX\_ETHN - Country specific: origin country/ ethnic group/ ethnic identity/ family origin: Mexico

MX\_ETHN - Mexico: Country specific origin country/ ethnic group/ ethnic identity/ family origin

Do you belong to an indigenous group?

0 NAP, other countries

1 Belonging to an indigenous group

2 Not belonging to an indigenous group

99 No answer

Note:

/ MX: The questionnaire included 2 questions on ethnicity, the first one regarding self-description and the second related to language, which are the two main measurement used by official sources as the General Census Population in Mexico.

It was chosen the first variable, because the second one appears to underestimates the indigenous population within the country.

MX\_ETHN

Value	Label	Missing	Count	Percent	Valid Percent

NZ\_ETHN - Country specific: origin country/ ethnic group/ ethnic identity/ family origin: New Zealand

NZ\_ETHN - New Zealand: Country specific origin country/ ethnic group/ ethnic identity/ family origin

Which of the following categories describes your ethnic origin?

Please tick as many as you need to show which ethnic group(s) you belong to.

- 0 NAP, other countries
- 23 China, Cantonese, Hakka, Mandarin
- 32 Europe, White/ European
- 45 India, Hindi, Urdu, Gujarati, Tamil
- 54 Maori and New Zealand
- 62 Pacific, Polynesian, Chamorro/ Guam
- 98 Other, mixed origin
- 99 No answer

Note:

/ NZ: To create this variable a hierarchy was used. If a respondent ticked NZ Maori, then he or she was classified as such (even if other origins had been ticked). If they ticked Cook Island Maori, Samoan, Tokelauan, Tongan or Niuean, then they were classified as Pacific, Polynesian, Chamorro/Guam. If they ticked any other origin (excluding European), then they were classified as such. They were classified as NZ European if they hadn't ticked Maori, Samoan, Cook Island Maori, Tongan, Niuean, Chinese, Indian or Other, but had ticked Other European. Respondents were only classified in the European categories if they hadn't ticked any of the previously mentioned ethnic groups.

SE\_ETHN - Country specific: origin country/ ethnic group/ ethnic identity/ family origin: Sweden

SE\_ETHN - Sweden: Country specific origin country/ ethnic group/ ethnic identity/ family origin

Where both of your parents Swedish citizens at the time of your birth?

- 0 NAP, other countries
- 1 When R was born, both parents swedish citizens
- 2 When R was born, one parent foreign citizen
- 3 When R was born, both parents foreign citizens
- 99 No answer

Note:

/ SE: The variable used in the Swedish ISSP survey focus on immigration. Immigration has increased during the last decades. A review of public debate shows that potential differences in attitudes/behaviour based on ethnicity may have more to do with being an immigrant or not, compared to the potential cleavages described above (between Swedes and Sami or between Swedes and those from the Meänkieli language area).

In order to have a good and relevant measure of ethnicity in the Swedish context, it seems that a focus on immigration is necessary. The question that is used in the Swedish survey is described above.

SE\_ETHN

Value	Label	Missing	Count	Percent	Valid Percent
1	When R was born, both parents swedish citizens		958	81.1	81.7

SK\_ETHN - Country specific: origin country/ ethnic group/ ethnic identity/ family origin: Slovakia

SK\_ETHN - Slovakia: Country specific origin country/ ethnic group/ ethnic identity/ family origin

What is your nationality?

0 NAP, other countries

1 Slovak

2 Hungarian

3 Roma

4 Other

Note:

/ SK: In Slovakia, the relevant ethnicity concept is the nationality concept. In censuses as well as in surveys, only self declared nationality is asked. The same concept is applied also towards the Roma (under communist rule the term 'Gipsy' was used). Roma can declare themselves as belonging to the Roma nationality - however as can be confirmed by pre 1990s censuses (under the communist regime, it was the census commissars who decided if a person belongs to the Roma ethnicity) and by other methods of estimation of the Roma population in Slovakia, many of them do not describe themselves as Roma and rather declare a belonging to the Slovak or Hungarian nationality (in regions with a Hungarian majority).

The nationality composition of Slovakia according to the 2001 census:

Slovak85.8%

Hungarian9.7%

Roma 1.7%

Czech0.8%

Ruthenian 0.5%

1 Black African

2 Coloured

3 Indian/ Asian

4 White

99 No answer

Note:

/ ZA: Given the apartheid history in South Africa, the race categorisation of white, black (African), Indian and coloured is very commonly understood in South Africa. This is the most common variable used to categorise various the races. Among the African people there are various tribes, and the most common way -although this is seldom used-to ethnicize the African group would be to use the African language that they speak, i.e. Sesotho, Setswana, Sepedi, Siswati, IsiNdebele, IsiXhosa, IsiZulu, Xitsonga, Tshivenda.

In terms of the White groups (Europeans) it is fairly uncommon to ask origin country and the only further distinction is again based on language, that is the Afrikaans speakers and the English speakers. Coloured people and the Indian population are generally treated as a homogenous group with no further distinction.

HHCHILDR - How many children in household: children between school age and 17 years old

BVQ\_30. HHCHILDR

Including yourself, how many people - including children - usually live in your household?

(Please write in.)

How many children in household: children between school age and 17 years old

AR: About the number of people that live in your home (including those who are temporally away), how many are children between 6 and 17 years old.

AT: How many persons - including yourself - live in your household? Children/ young persons from 6-17 years of age

AU: Including yourself, how many people-including children- usually live in your household? Children between 5-17 years of age:

BE-FLA: What year was .. born in?

CH: Would you please indicate the firstname, the year of birth and the sex of each person, children included, living in the household, beginning with the oldest one? Between 1993 and 2005

CL: How many children between 6 years old and 17 years old live in your household?

CZ: Of those, how many dependent children aged 7-17 live in your household?

DE: Please tell me what month and what year (person 1) was born in?

DK: How many persons in your household are under 18 years, i.e. between 0 and 17 years?

ES: Could you tell me: the sex, age and kinship relation that you have with each of those people, beginning by the eldest person?

FI: Including yourself, how many people usually live in your household aged 7 - 17 years?

FR: HHCHILDR is computed from variables of the household list.

GB-GBN: What was (name)'s age last birthday? Asked for all members of household after respondent

HR: How many children from 7 to 17 years old do live in your household

IL: Children between [school age] to 17 years of age

IS: [Yourself included, how many people continually live in your household?] ... Children of the age of 6-17 years old

KR: How old is [PERSON]?

LT LV MX: Including yourself, how many people - including children - usually live in your household: children between 7 and 17 years of age

NL: Please, we want know about all these other persons in your household, other than you and your partner, what is their sex and age, in which relationship they are to you and what their education and main activity are? Start with the oldest person and continue to the youngest person (5-17 years).

NO: Number of children 6-17 years old

NZ: How many children under the age of 18 are in your household?

PH: Number of children 7-17 years old

PT: How many adults, how many underage children (less than 18 years old), and how many children with less than 7 years old, from your family, including you, live in your house? Between 17-7:

RU: How many children in age 18 years old and younger live in your household including temporarily away children?

SE: How many persons are between 7 and 17?

SI: Children and teens from 11 to 17 years; children from 6 to 10 years

SK: How many children between 6 and 17 years live in your household?

TR: Children between school age and 17 years old?

TW: Children between 7 -17 years of age

US: Teens from 13 to 17 years, children from 6 to 12 years

ZA: Derived from household roster: children 6-17 years

- 0 No children

HOMPOP - How many persons in household

BVQ\_29. HOMPOP

Including yourself, how many people - including children - usually live in your household?

Adults of 18 years and older

Children between [school age] - 17 years of age

Children up to the age of [school age - 1] years

This makes a total of how many people?

AR: About the number of people that live in your home (including those who are temporally away), how many are total of people who live at home.

AT: How many persons - including yourself - live in your household? Total number of persons

AU: Including yourself, how many people-including children- usually live in your household? This makes a total of how many people?

BE-FLA: Including yourself, your partner, your children and others, how many people live here as members of this household? Including partly living in household or temporarily absent.

CH: How many persons constantly are living in your household, including yourself?

CL: How many people live in your household?

CZ: Including yourself, how many people live in your household? By household we mean people living in the same apartment or family house and who share resources.

DE: Apart from yourself, are there other people living in your household? Please count toddlers or people who normally live here but are currently absent, e.g. in hospital or on holiday

DK: How many persons live in your household (including yourself)?

ES: How many people do live in your household, including yourself, and any servants you may have, if they sleep at home?

FI: Including yourself, how many people usually live in your household altogether?

FR: How many persons live in your household, including yourself?

GB-GBN: Including yourself, how many people live here regularly as members of this household?

HR: Including you how many persons (including children) live in your household?

IL: Adults of 18 years and older living in your household

IS: [Yourself included, how many people continually live in your household?] ... How many are that in total?

KR: How many family members, including yourself, presently reside in your home? Do not include those who are temporarily living elsewhere due to schooling, employment, military service, etc.

LT LV MX: Including yourself, how many persons - including children - usually live in your household: persons in household in total?

NL: How many people are in your household, other than you and your partner? (all who use the same kitchen, so also living-in children and other occupants).

NO: Including yourself, how many people live normally in your household, and how are the household members distributed on age groups? Number of people 18 years or more.

NZ TW: Including yourself, how many people are there in your household?

PH: Number of persons in household including servants, transients, or boarders.

PT: How many people live in your house? (including you and people who are not part of your family, for example, guests, employees, etc.)

RU: How many people usually live in your household including yourself, children and temporarily away members?

SE: How many people - children and adults - usually live in your household (include yourself)? How many persons are 18 or older?

SI SK TR: Including yourself, how many people live with you in your household, all people in household?

US: Please tell me the names of the people who usually live in this household.

ZA: Derived from household roster

- 0 Not a private household
- 1 One person (only respondent)
- 2 2 persons
- 3 3 persons
- 4 4 persons
- 5 5 persons
- 6 6 persons
- 7 7 persons
- 8 8 persons

- 14 14 persons
- 15 15 persons
- 16 16 persons
- 17 17 persons
- 18 18 persons
- 19 19 persons
- 20 20 persons
- 21 21 persons
- 22 22 persons
- 99 No answer

in Denmark (DK):

- 13 13 persons or more

in France (FR):

- 9 9 persons or more

in Japan (JP):

- 0 Not available

Note:

/ DE: Number of persons in household taken from ALLBUS 2010; If other people living in household, detailed household list is asked; number of people taken from that household list information, counted during the interview, and prompted.

/ PH: Answers are derived from the Census of Household Members. The Census of Household Members also ask about names of household members, their age, sex, relationship to household head/decision maker, and presence of servants, transients, or boarders.

/ NL: Variable was primarily constructed from household box.

/ SI: Interviewer writes in the number of people in household

/ US: Based on the answers to the question HEF 7, 12 variables of household members' age (OLD1 to OLD12) are created. By using those

12 age variables, the number of household members is constructed using SAS.

AR\_RINC - Country specific personal income: Argentina

BVQ\_32. nat\_RINC

Before taxes and other deductions, what on average is your own total monthly income?

AR\_RINC - Argentina: Country specific personal income

I would like for you to tell me now your monthly net or pocket income, including food stamps, commissions, tips, retirement or pension funds (social security funds), alimony, rents, interests or dividends, and any other income. Try to indicate a global sum of your pocket income.

0 No own income, not in paid work

130 130 ARS, monthly net income

20000 20.000 ARS, monthly net

999990 NAP, other countries

999997 Refused, don't know, no answer

Note:

/ AR: Name of the currency: Peso Argentino / Argentine Peso (1 Dolar = 4 Argentine pesos).

If 'no answer' was obtained, then R was required to choose from the following list of categories

Would you tell me in which of these income segments could be found your net income?

a) less than \$300; b) \$300- less than \$500; c) \$500- less than \$700; d) \$700- less than \$1000; e) \$1000- less than \$1300; f) \$1300- less than \$1600; g) \$1600- less than \$2000; h) \$2000- less than \$2500; i) \$2500- less than \$3000; j) \$3000- less than \$4000; k) \$4000- less than \$5000; l) \$5000- less than \$7000; m) \$7000- less than \$10000; n) \$10000- less than \$15000; o) \$15000 or more.

After that, the mid point of the income class was chosen, and a unique income variable was considered.

AU\_RINC - Country specific personal income: Australia

AU\_RINC - Australia: Country specific personal income

Before taxes and other deductions, what on average is your own total monthly income?

0 No own income, not in paid work

1 1 AUD per month

300000 300.000 AUD per month

999990 NAP, other countries

999999 No answer

Note:

/ AU: Monthly net income in AUD Australian Dollar; exact unclassified amount of income is coded.

This variable was misinterpreted by many people. For example some people put their yearly income. Where it was obvious that a yearly income had been stated, this was corrected. This variable should be used with caution.

BE\_RINC - Country specific personal income: Belgium/ Flanders (BE-FLA)

BE-FLA\_RINC - Belgium/ Flanders: Country specific personal income

It is important that we can get an accurate picture of your income. We make a difference between your personal income and the income of your household. Do you have a personal income through a job, a pension, unemployment benefit, sickness benefit, job as a student, income from capital, from real estates or other incomes?

(If personal income)

By personal net monthly income we mean the total sum of your personal earnings, after tax deduction, everything included such as salary, meal tickets, retirement pay or other incomes from capital or real estates. Is your personal net monthly income higher than 2.000 Euro or 80.000 Belgian Francs?

(If personal income lower than 2.000 Euro)

When you take a look at the categories on card 24, in which category do you place your net monthly income?

(If personal income 2.000 Euro or higher)

When you take a look at the income categories on card 25, in which category do you place your net monthly income?

AR\_INC - Country specific household income: Argentina

BVQ\_33. nat\_INC

Before taxes and other deductions, what on average is the total monthly income of your household?

AR\_INC - Argentina: Country specific household income

I would like for you to tell me now the monthly net income, including all concepts, of your family as a whole

0 No income

200 200 ARS per month, net

40000 40.000 ARS per month

999990 NAP, other countries

999997 Refused, don't know, no answer

Note:

/ AR: Name of the currency: Peso Argentino / Argentine Peso

If 'no answer' was obtained, then R was required to choose from the following list of categories. Would you tell me in which of these income segments could be found your family net income?

a) less than \$500; b) \$500- less than \$700; c) \$700- less than \$1000; d) \$1000- less than \$1500; e) \$1500- less than \$2000; f) \$ 2000- less than \$2500; g) \$2500- less than \$3000; h) \$3000- less than \$4000; i) \$4000- less than \$5000; j) \$5000- less than \$7000; k) \$7000- less than \$9000; l) \$9000- less than \$12000; m) \$12000- less than \$16000; n) \$16000- less than \$20000; o) \$20000 or more.

After that, the mid point of the income class was chosen, and a unique family income variable was considered.

BE\_INC - Country specific household income: Belgium/ Flanders (BE-FLA)

BE-FLA\_INC - Belgium/ Flanders: Country specific household income

Now I want to ask you something about the income of your household. By household we understand the household of married persons or persons living together, a person living alone or someone who still lives with his/ her parents.

By net monthly income of the household we mean the total sum of the earnings, after tax deduction, everything included such as salaries, meal tickets, child benefits, retirement pay or other incomes from capital or real estates. Is the net monthly income of your household larger than 2.000 Euro or 80.000 Belgian Francs?

(If income lower than 2.000 Euro)

When you take a look at the categories on card 26, in which category do you place your net monthly income of the household?

(If income 2.000 Euro or larger)

When you take a look at the income categories on card 27, in which category do you place your net monthly income of your household?

CH\_INC - Switzerland: Country specific household income

Please consider the income of all household members and any income which may be received by the household as a whole. What is the main source of income in your household? Please use this card.

Using this card, if you accumulate all sources of income of all the household members, which letter best describes the total net income of your household? If you do not know the exact figure, please give an estimate/ approximation. Use the part of the card that you know best, weekly, monthly or annual/ yearly income.

Note:

/ CH: Monthly net income in Swiss Francs (CHF); the most recent available personal range has been divided in deciles and rounded to create the 10 categories. The categories are presented on the showcard for the monthly and annual income. Midpoints of the income categories are recoded.

The categories are a merge of the personal and household income categories. In this way, single person households don't have to answer to distinct questions. For the single households, the variable is based on F32s, which combines the codes for the personal and household income.

SK\_INC - Country specific household income: Slovakia

SK\_INC - Slovakia: Country specific household income

Now we would like to ask about the income of your household. (Under household we mean a shared household of spouses or partners, who lives alone, with children, with parents as well as households of singles living alone). Please, what is the average total net income of all household members per month including wages, pensions, scholarships and all other working or non-working incomes? From the following list, choose the option that mostly represents the size of the net income of your household.

- 100 Up to 150 EUR (approx. 4.500 SKK) per month, net  
 225 151-300 EUR (approx. 4.500-9.000 SKK)  
 375 301-450 EUR (approx. 9.000-13.500 SKK)  
 525 451-600 EUR (approx. 13.500-18.000 SKK)  
 675 601-750 EUR (approx. 18.000-22.500 SKK)  
 825 751-900 EUR (approx. 22.300-27.000 SKK)  
 1050 901-1.200 EUR (approx. 27.000-36.000 SKK)  
 1350 1.201-1.500 EUR (approx. 36.000-45.000 SKK)  
 1750 1.501-2.000 EUR (approx. 45.000-60.000 SKK)  
 2500 2.001-3.000 EUR (approx. 60.000-90.000 SKK)  
 3500 More than 3.000 EUR (more than 90.000 SKK) per month

MARITAL - R: Marital status

BVQ\_34. MARITAL

What is your current legal marital status?

(Please tick one box only.)

<The aim of this variable is to measure the current 'legal' marital status 'Living as married' or 'de facto married' is no legal partnership status and therefore not of relevance to this variable

Note that MARITAL must not be filtered by responses to PARTLIV.>

AR: With respect to your marital status, are you ...?

AT: Your legal partnership status - are you ...?

AU: What is your current legal marital status?

CL SK TW ZA: What is your current marital status?

BE-FLA: Are you married, in a civil partnership, widowed, divorced, separated but still married or single (never married)?

CH: Here is a card with possible family situations. Can you please tell me which letter corresponds best to your actual situation?

CZ DE ES RU: What is your marital status?

DK IL LT LV NO PH SE SI: What is your current legal marital status?

FI FR: Are you currently?

GB-GBN: Derived variable, shows the legal marital status.

HR MX: Marital status of respondent (legal status)

IS: What is your current marital status?

KR: Is [PERSON] now married, widowed, divorced, separated, cohabiting, or never married?

NL: What is your official marital status?

NZ: Which of these categories best describes your current marital status?

PT: What is your marital status?

SE: Are you married, living together, or single?

TR: May I learn your marital status? Despite being legally not married, like having only a religious wedding, do you live together with a partner?

US: Are you currently - married, widowed, divorced, separated, or have you never been married?

- 1 Married
- 2 Civil partnership
- 3 Separated from spouse/ civil partner (still legally married/ still legally in a civil partnership)
- 4 Divorced from spouse/ legally separated from civil partner, annulled
- 5 Widowed/ my civil partner died
- 6 I have never been married/ never been in a civil partnership, single
- 7 Refused
- 8 Don't know
- 9 No answer

in Denmark (DK):

- 9 Refused, no answer

in Japan (JP):

0 Not available

Note:

/ AT: Civil partnership ('eingetragene Partnerschaft') not asked because they were legalized as recently as in January 2010.

/ AU: Civil partnership not asked.

/ CL: Up to 2004 there was no law regulating divorce in Chile. The legal way to end up a marriage was thru a process of annulment (code 3 in the question). There is no civil partnership in Chile.

/ FR: Code 2 - French contract of civil partnership

/ HR: It includes civil partnership which is legally defined as living in common household in minimum period of 3 years and/or joint parenthood.

/ IS: Please note that 'civil partnership' does not refer to a same-sex-partnership in the Icelandic context.

/ ZA: Civil partnership not asked.

Would you describe the place where you live as...

(Please tick one box only.)

<Based on self-assessment by Respondent.>

AR: Would you say you live in ...?

AT: How would you describe your living environment?

AU: Would you describe the place where you live as.....

BE-FLA: Which description suits your living environment the best?

CH: Which expression of this card describes best the place where you live?

CL FI LV MX NO: Do you live in?

CZ SI SK: How would you describe the place you live in?

DE: Which of the categories of this list applies best to the place where you are living?

DK: Is the place you live a?

ES: Please, tell me in which type of community do you live?

FR: You would say that you live in

GB-GBN LT NZ PH: (Can I just check,) would you describe the place where you live as ...

HR RU: Where do you live in?

IS: How would you describe the place where you live?

JP: What kind of community do you currently live in?

KR: Which of the categories below comes closest to the type of place you are living in now?

NL: How would you describe your place of residence?

PT: How would you describe the place where you live?

SE: The place where you live, is it ...?

TR: Settlement type where the interview was undertaken.

TW: Do you think of the place you live as an urban or rural area?

US: Derived from US GSS.

ZA: Derived from geotype variable.

- 1 A big city
- 2 The suburbs or outskirts of a big city
- 3 A town or a small city
- 4 A country village
- 5 A farm or home in the country
- 9 No answer, AR, DK: don't know, no answer

in Great Britain (GB-GBN):

- 7 other answer

Note:

/ DE: Type of community is taken from ALLBUS 2010.

/ IS: Iceland is sparsely populated with only one city – the capital Reykjavík. About two thirds of the total population reside in Reykjavík (just over 200.000 inhabitants). The second largest urban area is Akureyri with just under 18.000 inhabitants. When asking the above question, examples of towns of the intended size were used to clarify categories 3 and 4.

/ LV: Not asked to the respondent. No recoding.

/ US: URBURURAL is constructed by using two US GSS variables, NORC size of place (XNORCSIZ) and Survey Research Center New Belt Code (SRCBELT); based on Standard Metropolitan Statistical Areas (SMSAs).

## WEIGHT - Weighting factor

### Weighting factor

No total weight usable for international comparison.

NATIONAL weighting procedures/ variables used for calculation of NATIONAL weights:

AR IS SE SI TR: No weighting.

AT: Weighting variable calculated by the fieldwork/research institute. Weighting factors: Bundesland (province/region), Sex \* Age, Education

AU: Design weight and redressment weight to adjust for non-response bias; variables used for calculating redressment weight: age, sex, highest level of schooling. Weights are rescaled to net sample size.

BE-FLA: The ISSP-questionnaire is an addition to a general face-to-face survey. In a first step weights were computed for this face-to-face survey. Those weights are a combination of design weights, non-response weights and post stratification weights. The design weights compensate for the oversampling of Brussels and some other rural areas.

Non-response weights are then applied to account for unequal probability of response in different subgroups in the population. Age, sex, marital status, type of dwelling, nationality and a geographical classification were used to identify these subgroups. (All these characteristics were known for all sampled units.)

The non-response weights were then adjusted so that respondent sample matched the population in terms of sex and education (population classification based on Labor Force Survey 2009).

In a second step these weights were adjusted to compensate for the non-response to the ISSP-part of the survey. We used the following variables of the general survey for this non-response weighting: age, sex, level of education, nationality, professional status, attitude towards surveys and an assessment by the interviewer of the respondent's aversion towards answering survey questions.

Finally the weights were scaled to make the weighted sample size equal to the unequal sample size.

BG: Weighting variable has been computed and accounts for sex, settlement and age-groups. There are twenty coefficients - 4 groups (male and female for towns and villages) multiplied by five age groups (18-24 years, 25-34 years, 35-44 years, 45-54 years, 55-64 years, 65-84 years, 85 years and over).

CL: Weight to adjust for non-response bias on gender, age and urbanity.

CZ: WEIGHT include total weight, which was constructed from design and post-stratification weights. Design weights based on proportion of household sizes. Post-stratification weight based on region, community size, sex, age and education. The weights were derived from data of the Czech Statistical Office.

DE: Two separate German samples: the sample for eastern Germany deliberately over-samples the five eastern federal states. If all of Germany is taken as the unit of analysis (rather than the eastern and western states), design weight is necessary: weighting factor for Western Germany: 1,16307166\*; weighting factor for Eastern Germany: 0,61416777\*; The two weighting factors are stored in the weight variable.

ES: Weights have been calculated using two variables: Autonomous Communities (ES\_REG), and Size of Municipalities (ES\_SIZE).

FI: Weight used for calculation by calibration method considering gender, age classes, NUTS3 regions with Greater Helsinki as separate region and type of community. Weight doesn't have the expansion property (the mean of the weights is 1 and the sum of the weights is the number of accepted responses, i.e. the size of the data).

FR: Post stratification weighting computed on sex, age (4 groups: 18 to 29 years old, 30 to 39 years old, 40 to 54 years old, 55 years old or more) and occupation (6 groups : Farmers, Tradesmen, Shopkeepers and Business Owners; Managers and Secondary/University Teachers, Intermediate Professions, White Collar Workers, Blue Collar Workers, Unemployed)

GB-GBN: Weights needed to be applied to correct for unequal probability to be selected (one person interviewed at each address independently from household size). Non-response weighting then applied to correct for unequal probability of response in different subgroups in population. The final stage of weighting was to adjust the final non-response weight so that the weighted respondent sample

matched the population in terms of age, sex and region. Very large weights were capped and were scaled to make the weighted sample size equal to the unweighted sample size.

LT: Weight based on age and gender.

MX: Weight to adjust for non-response bias on the variable of gender where the male population was underestimated.

NL: Design weight and redressment weight; redressment was calculated to adjust for age, sex, position in household, education main activity, turnout and results in last national elections. Weights are rescaled to net sample size.

NO: No weighting procedure (in net sample younger people, single (never married) and people with lower education underrepresented).

NZ: The provided weighting variable weights the sample so its age-sex distribution matches that of the New Zealand population according to the 2006 census.

PH: Weighting variable is based on people aged 18 and above and region (NCR, Balance Luzon, Visayas, Mindanao).

PT: Design weight and redressment weight to adjust for non-response bias; variables used for calculating redressment weight: AGE, SEX, PT\_DEGREE. Weights are rescaled to net sample size.

RU: Variables age, sex and education used for calculation of weight.

SK: Weight constructed according the population characteristics sex, age groups, education, ethnicity (nationality), size of community and region (males, younger and low educated respondents underrepresented).

TW: Weighting factor is designed on sex, age, urbanization and education degree groups. Weights were then generated to match the population characteristics of Taiwan area.

US: The weight variable takes into consideration the sub-sampling of non-respondents and the number of adults in the household (men and those under 25/ over 65 undersampled).

ZA: Personal and household weights are benchmarked using the SAS CALMAR macro and province, population group, gender and 5 age groups (i.e. 16-24, 25-34, 35-49, 50-50 and 60 and older) as benchmark variables for persons and province and population group of the respondent in the household for households as benchmark variables.

1 No weighting

## ISSP Study Description Form

***Please use this form for reporting on Module 2006 and later!***

*Study title:* ENVIRONMENT III -ISSP2010- Argentina (Fielded within a study on Health services utilization and expenditures)

*Fieldwork dates:* Start date: 2010-07-10  
End date: 2010-10-20

*Principal investigators:* Jorge Raúl Jorrat, CEDOP-UBA

*Sample type:* **Stratified three-stage probability sampling. Stages: area units, households, persons. (Random selection at all stages).**

*Fieldwork institute:* Cualitativo y Cuantitativo

*Fieldwork methods:* mode of interview: **Paper and pencil, respondent reading questionnaire**

*N. of respondents:* number of respondents in the final ISSP file: **1133**

*Details about issued sample:*

Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: [http://www.aapor.org/uploads/standarddefs\\_4.pdf](http://www.aapor.org/uploads/standarddefs_4.pdf). The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.

1. Total number of starting or issued names/addresses (gross sample size) *	.....4632.....
2. Interviews (1.0)	.....1130. ..
3. Eligible, Non-Interview	2686
A. Refusal/Break-off (2.10)	..... 903.....
B. Non-Contact (2.20)	.....1783 .....
C. Other	0
i. Language Problems (2.33)	..... 0
ii. Miscellaneous Other (2.31, 2.32, 2.35)	0.....
3. Unknown Eligibility, Non-Interview (3.0)	..... 18.....
4. Not Eligible	798
A. Not a Residence (4.50)	765.....
B. Vacant Residence (4.60)	..... 29.....
C. No Eligible Respondent (4.70)	..... 4.....
D. Other (4.10,4.90)	..... 0.....

\* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

*Language(s):* language or languages of the field instrument : **SPANISH**

*Weight present:* yes or no, whether a weighting factor exists in the data-set: **NO**

*Weighting procedure:* exact description of the weighting procedure / algorithm

*Known systematic properties of sample:* description of biases or other deviations of the sample

*Deviations from ISSP questionnaire:* esp. questions omitted, or added, or asked in a different format than the Basic Questionnaire prescribes

*All questions were asked as prescribed. But, unfortunately, we had a*

2011-04-11

*« little accident ». The field work was carried out both for Social Inequality IV and Environment III at the same time. We used different questionnaires for different people within a unique sampling point, although the background part was highly similar for both questionnaires). By mistake, instructions in the background part of the questionnaires asked interviewers to ask background questions 21a and 21b to the Environment interviewees, not to the Social Inequality ones !!*

*However, results showed that they were not –as suspected– productive questions. For 21a, only 19.3% informed about a money range (most were non-owners, or answered DK, or refused). For 21b, only 3.5% informed about a money range.*

*Language(s):* English

*Weight present:* Yes

*Weighting procedure:* A post-stratification or non-response weight was calculated with the aim of rebalancing the Australian sample so the weighted sample frequencies are equal to the expected frequencies in population in a the three-way tabulation by age group (five groups), sex, and highest level of education (five levels) .  
The cross tabulation by age, sex and highest level of education from the Australian population was done using the 2011 Census Table Builder. A table was created using sex and age (single years) in the rows, and Australian Citizenship, and education in the columns. The final table was created by excluding those who did not have Australian citizenship (this included those who did not state their citizenship). Individuals with no stated year of schooling and schooling up to and including year 12 were combined into one category.  
In the sample not all individuals had complete information on both age, sex and year of schooling. However imputations of weight were used to deal so

2010-06-18

that all individuals were assigned a weight even if they had missing data. When age was missing, in some cases, this was imputed from other information available in the questionnaire. If age was missing but the person was retired, the respondent's age was estimated to be equal to the mean for retired people of that sex. For people who were missing on gender, they had a weight allocated to them that was the average of the weights over gender for their level of education and age.

To avoid extreme weights, the weights were trimmed at the 1 per cent and 99 per cent level, before being rescaled so that they averaged to one across all cases in each subsample.

*Known systematic  
properties of sample:*

**Gross sample**

Using a sampling frame derived from the AEC Electoral Roll (2011) excludes permanent and temporary residents of Australia (who are not citizens) and any other adults in Australia who are non-citizens except for British subjects on a Commonwealth electoral roll as at 25 January 1984. These exclusions amount to approximately 8 percent of the adult population. Citizens are able to provisionally enrol at the age of 17 but are unable to vote until they turn 18.

**Net sample**

The sample demographics were compared with statistics available from the Australian Bureau of Statistics (ABS) including the 2011 Census. The major biases are: age (median age is older than the Census population), education (under-representation of persons who had only completed year 10 or below).

*Deviations from ISSP  
questionnaire:*

## ISSP Study Description Form

### ISSP Study Description Form - Flanders (Belgium)

<i>Study title:</i>	Sociaal-culturele verschuivingen in Vlaanderen 2010 (Social-cultural changes in Flanders 2010)
<i>Fieldwork dates:</i>	March 17th - July 28th, 2010
<i>Principal investigators:</i>	Vlaamse Overheid, Studiedienst van de Vlaamse Regering (Research Centre of the Flemish Government) (SVR) (Ann Carton) Supported by a scientific committee: Prof. dr. G. Loosveldt (K.U.Leuven), Prof. dr. J. Lievens (U.Gent), Prof. dr. M. Swyngedouw (K.U.Leuven/H.U.Brussel), Prof. dr. M. Elchardus (V.U.Brussel), Prof. dr. I. Glorieux (V.U.Brussel), Prof. dr. G. Molenberghs (U.Hasselt), Prof. dr. P. Thijssen (U.Antwerpen)
<i>Sample type:</i>	Target population: Persons 18 years or more, Belgian and non-Belgian nationality, resident within private and collective households, in Flanders and Brussels (selection on Dutch addresses in Brussels).  Sampling design: Stratified two-stage random sampling procedure Regional stratification, 5 provinces in Flanders and Brussels 1st stage: PSU are clusters of addresses localized in postcodes. The number of clusters for each postcode is proportional to the population size in each province. 2nd stage: using the National Register N=2.365 addresses (2.267 in Flanders and 98 in Brussels) were randomly selected within the groups born in 1992 or before in the randomly selected postcodes. No substitution but in order to cope with non-response and to reach about 1.500 face-to-face interviews: oversampling within certain postcodes depending on differential regional non-response rates.  The National Register is a national governmental institution that stores data on all residents in Belgium: name, address, gender, date of birth, nationality, and composition of the family.
<i>Fieldwork institute:</i>	TNS Dimarso, Brussels
<i>Fieldwork methods:</i>	<ul style="list-style-type: none"><li>- Survey social-cultural changes in Flanders including the standard background variables: CAPI face-to-face interviews with trained interviewers (1 day training).</li><li>- ISSP-module: drop-off questionnaire arrives with interviewer, self-completion by respondent and mailed back by respondent to Research Centre of the Flemish Government. Follow-up of drop-off questionnaire by Research Centre of the Flemish Government.</li></ul>
<i>N. of respondents:</i>	N=1.440 respondents in Survey social-cultural changes in Flanders of which 1115 respondents completed the drop-off questionnaire.

<i>Details about issued sample:</i>  Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: <a href="http://www.aapor.org/uploads/standarddefs_4.pdf">http://www.aapor.org/uploads/standarddefs_4.pdf</a> . The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.	1. Total number of starting or issued names/addresses (gross sample size) *	2.365
	2. Interviews (1.0)	1.142
	3. Eligible, Non-Interview	
	A. Refusal/Break-off (2.10)	651
	B. Non-Contact (2.20)	262
	C. Other	.....
	i. Language Problems (2.33)	100
	ii. Miscellaneous Other (2.31, 2.32, 2.35)	123
	3. Unknown Eligibility, Non-Interview (3.0)	24
	4. Not Eligible	
	A. Not a Residence (4.50)	.....
	B. Vacant Residence (4.60)	63
	C. No Eligible Respondent (4.70)	.....
	D. Other (4.10,4.90)	.....

\* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

3A=refusal face to face interview by respondent (n=415) + refusal by proxy (n=8) + face to face interview but no drop-off (n=228)

3B=no contact with respondent after minimum 5 attempts (n=174) + holidays during fieldwork period (n=88)

3C ii)= dead (=3) + physically or mentally unable/incompetent (n=112) + bad quality face to face interview (n=3) + technical problems sending data (n=2) + other (n=3)

*Language(s):* Dutch

*Weight present:* Yes

*Weighting procedure:* The ISSP-questionnaire is an addition to a general face-to-face survey. In a first step weights were computed for this face-to-face survey. Those weights are a combination of design weights, non-response weights and post stratification weights. The design weights compensate for the oversampling of Brussels and some other rural areas. Non-response weights are then applied to account for unequal probability of response in different subgroups in the population. Age, sex, marital status, type of dwelling, nationality and a geographical classification were used to identify these subgroups. (All these characteristics were known for all sampled units.) The non-response weights were then adjusted so that respondent sample matched the population in terms of sex and education (population classification based on Labor Force Survey 2009). In a second step these weights were adjusted to compensate for the non-response to the ISSP-part of the survey. We used the following variables of the general survey for this non-response weighting: age, sex, level of education, nationality, professional status, attitude towards surveys and an assessment by the interviewer of the respondent's aversion towards answering survey questions.

Finally the weights were scaled to make the weighted sample size equal to the unequal sample size.

*Known systematic  
properties of sample:*

Realized drop-off versus realized total sample: -The realized drop-off sample (N=1.142) is representative for the realized total face-to-face sample (N=1.370) for the variables age, gender, and level of education.

Realized drop-off versus population (based on comparison with Labor Force Survey 2009):

Following groups are (slightly) under represented:

- 18-24 years old men non-university higher education
- 45-54 years old men with university higher education
- 75+ years old lower educated men (primary education or no diploma)
- 25-34 years old lower educated women
- 35-44 years old women with lower secondary education
- 55-64 years old lower educated women
- 75+ years old lower educated women

Following groups are (slightly) over represented:

- 35-44 years old men with non-university higher education
- 55-64 years old men with non-university higher education
- 18-24 years old women with higher secondary education
- 35-44 years old women with university higher education
- 45-74 years old women with non-university higher education
- 65-74 years old women with university higher education

## ISSP'2010-2012 Study Description Form

*Study title:* 'official' title of the study/survey in your country  
**Международна програма за социални изследвания  
 (Three ISSP modules were conducted together –  
 Environment'2010, Health'2011 and Gender and family'2012)**

*Fieldwork dates:* start and end dates of field-work, please use format yyyy-mm-dd  
**2011.08.16 – 2011.09.20**

*Principal investigators:* name and institution  
**Agency for Social Analyses (ASA)**

*Sample type:* description of the sampling procedure  
 Three stage random sampling with starting point and random route was used to conduct the survey.  
 The first stage of the sampling procedure was based on the list of electoral sections from the General Election 2009. Electoral sections cover the whole territory of the country and respectively provide access to the whole Bulgarian population aged 18 and over. Selection of units was based on the procedure of systematic random selection. In each of the 100 selected cluster/units, one address was drawn at random, which was an exact address and starting point.  
 The second step was to stand on the street at the starting address facing towards the end of the street. It was chosen the right side of the street and the walking-direction was towards the end of the street. In this direction the third door had to be found. Only dwelling units were chosen.  
 The last step was to select the respondent on the basis of the 'last birthday' approach for respondents who were 18 of age and over.

*Fieldwork institute:* institute which conducted the survey  
**ESI Center did the field work**

*Fieldwork methods:* mode of interview  
**PAPI face-to-face**

*N. of respondents:* number of respondents in the final ISSP file: **1003**

<i>Details about issued sample:</i>  Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: <a href="http://www.aapor.org/uploads/standarddefs_4.pdf">http://www.aapor.org/uploads/standarddefs_4.pdf</a> . The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.	1. Total number of starting or issued names/addresses (gross sample size) *	... <b>2275</b> .....
	2. Interviews (1.0)	... <b>1003</b> .....

## ISSP Study Description Form

***Please use this form for reporting on Module 2006 and later!***

*Study title:* National Public Opinion Study N°34

*Fieldwork dates:* Start date: 2010-11-20  
End date: 2010-12-16

*Principal investigators:* Carolina Segovia / Centro de Estudios Públicos (CEP)

*Sample type:* The guiding methodological principle underlying CEP's public opinion surveys is that effective and accurate survey research must be based on a truly representative sample of the universe in question. For CEP's purpose, this universe is made up of Chilean adults 18 years of age and older. Our studies use a probability multistage cluster sample.

The sample is designed in three stages, such that all adult individuals throughout the country have a calculable probability of being included. The 2002 Census data is consulted to determine the regional population structure of people 18 years of age and older. This makes it possible firstly to establish regional stratification and then each region is stratified by rural and urban zone.

### **Sampling Stages**

#### *First Stage*

The first stage of the sampling process sets the number of completed interviews per cluster at 6; a cluster is defined as a block (*manzana*) or populated entity (*entidad*).<sup>1</sup> The application of 6 interviews per cluster to the total number of interviews targeted in the sample (1,800) yields 300 primary sampling units (PSUs) to be identified in the first stage of sample selection.

The PSUs are proportionally distributed throughout the regions of the country, taking into account the region's contribution to population (both urban and rural).

Using the most reliable digital information on hand, i.e. 2002 census data, a cumulative listing of population by province (*provincia*), borough (*comuna*), district (*distrito*), zone (*zona*) and block (*manzana*) was prepared in the urban case; and by province, borough, district, locality (*localidad*) and entity (*entidad*) in the rural case (geographically arranged).

In both the rural and the urban case a fixed interval is set for each region by dividing the total population for that region by the number of PSU's assigned to it. Within each region, a purely random selection process is followed, such that each individual (as represented by population statistics) has a calculable probability of being selected as the reference point for a PSU.

---

<sup>1</sup> Blocks (*manzanas*) are used in urban areas, while in rural areas the census equivalent is the entity (*entidad*).

This is carried out through a computerised, random, proportionate-to-population process to select blocks in the urban areas and entities in the rural areas. A computer program is developed to select the urban blocks and the rural entities for the sample. All the blocks and entities are identified by number and located on a census map.

#### *Second Stage*

The second stage in the sampling process is to select households (dwellings) within PSUs. Selection rules for households within chosen blocks and entities are provided to interviewers, to enable them to select households randomly within each cluster. After taking a census of each selected block and entity, a random walk or systematic sampling procedure is followed, whereby every *n*th dwelling is included in the sample until a total of 6 households are identified.

#### *Third Stage*

The third stage is to select, within each household, a person to be interviewed. Interviewers are instructed to apply a random selection process (random number table) to identify the person to be interviewed.

*Fieldwork institute:* ICCOM

*Fieldwork methods:* Face to face

*N. of respondents:* 1,436

*Details about issued sample:*

Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: [http://www.aapor.org/uploads/standarddefs\\_4.pdf](http://www.aapor.org/uploads/standarddefs_4.pdf). The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.

**Czech Republic  
ISSP 2010 – Environment III  
Study Description**

## ISSP Study Description Form

*Study title:* ISSP 2010 on Environment III

*Fieldwork dates:* 1.-30. 06. 2010

*Principal investigators:* Michael L. Smith, Ph.D.

*Sample type:* Three stage stratified probability sampling:  
 1. Stratified probability sampling of settlements from official list of settlements in the Czech Republic.  
 2. Probability sampling of addresses from databases of houses and apartments in selected settlements. Databases of addresses were taken from Register of houses and apartments BUDINFO 1.4.  
 3. Sampling of household members based on Kish grid.

*Fieldwork institute:* Factum Invenio

*Fieldwork methods:* Face to face interview

*N. of respondents:* 1428

*Details about issued sample:*

Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: [http://www.aapor.org/uploads/standarddefs\\_4.pdf](http://www.aapor.org/uploads/standarddefs_4.pdf). The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.

1. Total number of starting or issued names/addresses (gross sample size) *	2200
2. Interviews (1.0)	1428
3. Eligible, Non-Interview	
A. Refusal/Break-off (2.10)	513
B. Non-Contact (2.20)	130
C. Other	
i. Language Problems (2.33)	11
ii. Miscellaneous Other (2.31, 2.32, 2.35)	37
3. Unknown Eligibility, Non-Interview (3.0)	44
4. Not Eligible	37

\* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

*Language(s):* Czech

*Weight present:* Yes

*Weighting procedure:* Total weight is constructed from: 1) design weights based on proportion of household sizes 2) post-stratification weights based on region, community size, education, age and sex. The weights were derived from data of the Czech Statistical Office.

*Known systematic properties of sample:* The probability of selection of the member of household depends on the size of the household. Due to response differences the basic socio-demographic characteristics - sex and education - are significantly different from the known population characteristics.

*Deviations from ISSP questionnaire:* Due to the mistake in the questionnaire variable SPEMPREL refers to current job (not last one), therefore not economically active are coded as No answer.

*Publications:* Not yet

Senior Researcher & International Consultant Torben Fridberg

*Sample type:*

Sampling-procedure: A representative sample (simple random sample) was drawn from the Central Population Register (CPR) – which is a national register of all Danish citizens – from which respondent's name and address were identified. Thus, the sampled unit was 'named individuals'. No stratification, clustering etc. was employed.

*Fieldwork institute:*

Rambøll Denmark A/S  
Hannemanns Allé 53

T +45 5161 1000 - F +45 5161 1001  
E [ramboll@ramboll.dk](mailto:ramboll@ramboll.dk)  
W [www.ramboll.dk](http://www.ramboll.dk)

*Fieldwork methods:*

Web based and postal survey (self-completion). If non-response then telephone interviews were used.

For the 18 to 65 years old an introduction letter was posted including a link to a web-enquete and a personal code to activate the survey. For the 66 years and older an introduction letter and a postal enquete was posted.

Follow up by telephone where the respondents were given the choice between CAWI, postal and CATI.

*N. of respondents:*

1297

*Details about issued sample:*

Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: [http://www.aapor.org/uploads/standarddefs\\_4.pdf](http://www.aapor.org/uploads/standarddefs_4.pdf). The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.

1. Total number of starting or issued names/addresses (gross sample size) *	<u>2500</u>
2. Interviews (1.0)	<u>1297</u>
A. Complete Interviews (1.1)	1235
B. Partial interviews (1.2)	62
3. Eligible, Non-Interview	<u>1203</u>
A. Refusal/Break-off (2.10)	657
B. Non-Contact (2.20)	347
C. Other	76
i. Language Problems (2.33)	49
ii. Physically or mentally unable (2.32)	74
iii. Miscellaneous Other (2.31, 2.35)	
3. Unknown Eligibility, Non-Interview (3.0)	.....
4. Not Eligible	
A. Not a Residence (4.50)	.....

B. Vacant Residence (4.60)	.....
C. No Eligible Respondent (4.70)	.....
D. Other (4.10,4.90)	.....

\* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

*Language(s):* Danish

*Weight present:* No

*Weighting procedure:* None

*Known systematic properties of sample:* None

*Deviations from ISSP questionnaire:* The ISSP module was the main part of a larger survey. After question 23 of the ISSP-module an extra question battery was attached with 6 questions and a total of 27 items. Prof. Christian Albrect Larsen and Associate prof. Sanne Lund Clement, Aalborg University, fielded the supplementary questions. The questions were about political consumerism and organic food.

Some questions have been omitted due to some missing questions in the Danish questionnaire. The questions omitted are concerning the following variables: TYPORG1, PARTLIV, SPWRKWHRS, HHTOOD.

Concerning the variables EMPREL and SPEMPREL the questions in the Danish questionnaire are not applicable. They will for that reason not fully cover the international aim.

MODE has been added two options - 50. CAWI, Computer assisted web interview and 60. CATI, Computer assisted telephone interview.

## ISSP Study Description Form

*Study title:* Ympäristökysymykset Suomessa (in Finnish)  
Miljön i Finland (in Swedish)

*Fieldwork dates:* 22.10.2010 - 10.1.2011

*Principal investigators:* Prof. Raimo Blom, University of Tampere  
Prof. Harri Melin, University of Tampere

*Sample type:* Target population: household population aged 15 to 74.  
Sampling design: a systematic random sample of individuals.  
Sampling frame: population register, sorting order: domicile code and birth date. Stratification: implicit geographic stratification. No clustering.

*Fieldwork institute:* Statistics Finland, Social Survey Unit, Helsinki  
Researcher responsible: Markku Nieminen  
(markku.nieminen(at)stat.fi)

*Fieldwork methods:* Postal (both directions), self-completion, paper & pencil OR internet

*N. of respondents:* number of respondents in the final ISSP file: 1211

*Details about issued sample:*

1. Total number of starting or issued names/addresses (gross sample size) *	2500
2. Interviews (1.0)	.....
3. Eligible, Non-Interview	
A. Refusal/Break-off (2.10)	12
B. Non-Contact (2.20)	7
C. Other	
i. Language Problems (2.33)	3
ii. Miscellaneous Other (2.31, 2.32, 2.35)	1260
3. Unknown Eligibility, Non-Interview (3.0)	.....
4. Not Eligible	
A. Not a Residence (4.50)	1
B. Vacant Residence (4.60)	5
C. No Eligible Respondent (4.70)	1
D. Other (4.10,4.90)	

*Language(s):* Finnish (95,0 % of total sample)  
Swedish (5,0 % of total sample)

*Weight present:* Yes

*Weighting procedure:* The design of the survey was systematic sampling. In order to improve the efficiency of estimation and to reduce bias due to non-response a calibration method was used for the creation of the weights.

The following marginal distributions of the population were used:

- 1) gender (male, female),
- 2) age classes (15–24, 25–34,..., 65–74),
- 3) NUTS3 regions with following modifications: the Greater Helsinki Area was dealt as a separate region,
- 4) type of community (urban - semi-urban - rural).

There are two weights available for calculations:

- 1) a weight that expands the results to the population level (the sum of the weights is the size of the population aged 15 to 74) and 2) a weight that doesn't have the expansion property (the mean of the

*Known systematic  
properties of sample:*

weights is 1 and the sum of the weights is the number of accepted responses, i.e. the size of the data). Both of the weights are based on the same calibration process, only the scale differs.

Sampling frame is updated and covers total population with the appropriate language restriction. A cross-sectional sample does not contain attrition by definition.

After having used our standard sampling procedures for over 20 years, we have not encountered any bias due to using systematic sampling. Design effect of the sampling procedure  $\leq 1$  by definition.

*Deviations from ISSP  
questionnaire:*

List of deviations and coding specifications compared to ISSP source questionnaire:

1) AGE (at the end of year 2010)

Age is computed from a variable for year of birth in the Finnish questionnaire.

2) FI\_ETHN

Added from register data on mother tongue. The Finnish questionnaire did not include a question for this.

3) FI\_REG

Added from register data on regions. The Finnish questionnaire did not include a question for this.

4) WEIGHT and WEIGHT \_2

- [weight] is a weight that expands the results to the population level (the sum of the weights is the size of the 15-74 population) and

- [weight\_2] is a weight that doesn't have the expansion property (the mean of the weights is 1 and the sum of the weights is the number of accepted responses, i.e. the size of the data).

B. Vacant Residence (4.60)	.....153.....
C. No Eligible Respondent (4.70)	.....24.....
D. Other (4.10,4.90)	.....12.....

\* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

*Language(s):* English

*Weight present:* yes

*Weighting procedure:* Addresses were selected with equal probability (except in Scotland where allowance was made for MOI – see below) but only one person interviewed at each address. Therefore weights need to be applied to correct for different number of adults at each address. The weights are calculated by the following formula:  
$$\text{Weight} = (\text{number of households at the address} * \text{number of adults in selected household}) / \text{MOI}$$
  
Where MOI is the Multiple Output Indicator (MOI>1 indicates more than one household at the address).

2011-09-01

Non-response weighting was then applied to correct for the unequal probability of response in different sub-groups in the population. The final stage of the weighting was to adjust the final non-response weight so that the weighted respondent sample matched the population in terms of age, sex and region.

Very large weights were capped and the weights were scaled to make the weighted sample size equal to the unweighted sample size.

Sample excludes Scotland north of the Great Glen

**ISSP 2010 – Environment III**  
**Study Description**

**ISSP Study Description Form*****Please use this form for reporting on Module 2006 and later!****Study title:* Environment ISSP2010*Fieldwork dates:* 2011-05-20 – 2011-06-20*Principal investigators:* Dinka Marinović Jerolimov, Institute for Social Research, Zagreb Croatia

*Sample type:* Sampling frame: list of settlements derived from Census 2011. Stratified random multi-staged sample: level of settlements, level of household, level of individual.

Two-way stratification: by 6 regions (defined as the traditional groups of counties) and 4 settlement sizes (defined by the number of residents). The size of each stratum is based on the proportion of the number of 18+ residents within the stratum in the total 18+ population.

Multistage sampling procedure:

1. Selection of primary sampling units (settlements) was conducted by the “probability proportionate to size” method. Each settlement had a probability of being in the sample proportionate to its population size. The selection of settlements was based on a random sampling procedure. All settlements in a stratum were alphabetically ordered and their respective populations were cumulated. Assignment of random numbers from cumulative population of all settlement was conducted. Those settlements under which randomly assigned numbers fell into were chosen. Within each primary sampling unit, the “random starting points method” was used to select starting points. There were 102 starting points in total. On average allocation of 10 respondents was assigned to each starting point.
2. Selection of households within the starting points was conducted by the “random walk method”. Interviewers were instructed to follow a specified route from the starting point, conducting an interview at every 6<sup>th</sup> dwelling/housing unit (systematic sampling). Non-contacts were re-visited 5 times before being declared as non-response.
3. Selection of the respondent within a household was conducted by random selection by last birthday key.

*Fieldwork institute:* Hendl market research*Fieldwork methods:* Face to face interview*N. of respondents:* 1210*Details about issued sample:*

## ISSP Study Description Form

***Please use this form for reporting on Module 2006 and later!***

*Study title:* ISSP Environment

*Fieldwork dates:* November 27 to December 5, 2010

*Principal investigators:* Miwako HARA, Miki MASAKI and Hiroshi ARAMAKI  
(NHK Broadcasting Culture Research Institute)

*Sample type:* Two-stage stratified random sample of Japanese 16 or older.  
First, urban and rural areas are divided into a number of groups (strata) based on similarities in local features and industrial structures. From each of those groups, streets and village-sections are again grouped together to form sampling units. From among such sampling units, 150 survey spots are selected at random. Then, from *the Basic Resident Registers* for these spots, 12 sample individuals aged 16 or over are selected according to a fixed random number.

*Fieldwork institute:* Central Research Services, Inc.

*Fieldwork methods:* Self-completion

*N. of respondents:* Issued 1,800, Achieved 1,307

<i>Details about issued sample:</i>  Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: <a href="http://www.aapor.org/uploads/standarddefs_4.pdf">http://www.aapor.org/uploads/standarddefs_4.pdf</a> . The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.	1. Total number of starting or issued names/addresses (gross sample size) *	1,800
	2. Interviews (1.0)	1,307
	3. Eligible, Non-Interview	
	A. Refusal/Break-off (2.10)	180
	B. Non-Contact (2.20)	207
	C. Other	-
	i. Language Problems (2.33)	
	ii. Miscellaneous Other (2.31, 2.32, 2.35)	29
	3. Unknown Eligibility, Non-Interview (3.0)	26
	4. Not Eligible	
	A. Not a Residence (4.50)	-
	B. Vacant Residence (4.60)	51.
	C. No Eligible Respondent (4.70)	-
	D. Other (4.10,4.90)	-

\* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

Fieldwork dates:	March–December 2011
PI:	Harry B.G. Ganzeboom Heike Schroeder (fieldwork manager)
Sample type	(Step 1:) Simple random address sample, (Step 2:) random date selection of household member (*)
Response:	33.6% (*)
Fieldwork agency	VU University Amsterdam
Fieldwork Methods	Postal survey
Sample size	1472
Language	Dutch
Weights	post-stratification (*)

(\*) See further below.

***The data will appear in the ISSP publicly released data as two independent data-files. The user should be aware that the units are identical between these modules.***

The complete data file (described in this documentation), including all the collected information on demography and social background, as well as the standardized ISSP variables has been archived at DANS [Data Archiving and Networked Services] in The Hague, the successor to the Steinmetz Archive. The appropriate bibliographic reference to this file will be:

**Ganzeboom, Harry B.G. [principal investigator] & Heike Schroeder, “ISSP 2010 + 2011: Environment & Health” [machine-readable data file]. The Hague: DANS. To be archived.**

## Introduction

The modules 2010 (“Environment III”) and 2011 (“Health”) of the International Social Survey Programme in the Netherlands [ISSP-NL] were conducted in 2011 as a stand-alone postal survey at the VU University Amsterdam [VUA] (Faculty of Social Sciences, Department of Social Research Methodology) by Harry B.G. Ganzeboom [principal investigator] and Heike Schroeder [fieldwork manager]. Note that this combined dataset is more elaborate than the Dutch part of the international ISSP file, archived at GESIS - Leibniz Institute for the Social Sciences, Cologne, Germany.

The data-collection followed very much the same methodology as for the ISSP\_NL 2003&2004, ISSP-NL 2005&2006 and ISSP-NL 2007&2008. The data collection process can be summarized as follows:

- The two ISSP modules were combined in one single questionnaire. Data for the two modules share the same social background questions (starting with Z). The Environment III variables start with G, the Health variables with H. Variables are numbered in the same way as the ISSP source questionnaires.
- Translation of the ISSP questionnaire documents was conducted by ourselves, in consultation with our Belgian ISSP colleague Ann Carton. The translation for the items in the Environment module was copied from the earlier versions, when applicable.
- The standard ISSP questions are complemented with a large number of demographic variables, most of them on social mobility.
- A simple random sample was drawn from the complete list of addresses in the Netherlands, maintained by Cendris, a subsidiary of the national postal service. The sampling frame [i.e. the list of addresses] is known to be very accurate and complete.
- All respondents were approached using (A) advance letter, (B) first questionnaire, (C) first postcard reminder, (D) second reminder by letter, (E) second questionnaire.
- All the questionnaires received were screened on completeness and double responses. All alphanumerical information was transferred to a coding file.
- The remaining (numerical) information was keypunched (single punching) by a professional agency (InDat).
- The alphanumerical information for country of origin and occupations was coded using standard international classifications.
- The keypunched data were checked and labelled and merged with the coded alphanumerical information.
- A post-stratification weight was developed using (A) information from the sampling frame, (B) information from the household roster (C) comparison with election results. No other national benchmark was used.

## Respons

Table 1 details the various steps taken to (re)approach the respondents and its results in terms of received questionnaires.

Throughout the fieldwork, respondents could call (in fact: call an answering machine) to ask further information, refuse participation or make comments. Once respondents

had expressed non-willingness to participate, either by phone or (e-)mail, they were not contacted again. General information on the ISSP project and the data-collection was also provided on a website, that was referred to on the questionnaire and all the information sent to the respondent.

<b>Table 1: Mailings and response pattern</b>						
Week	Event Date	Action	Received			
2		Advance letter				
3		First Questionnaire				
4			46.3%			
5		Reminder postcard	60.0%			
6		Reminder letter	68.7%			
7			72.3%			
8			73.1%			
9		Second questionnaire	73.2%			
10			83.5%			
11			90.6%			
12			92.6%			
13			86.4%			
14			97.8%			
18			99.7%			
22			100.0%			

## Sample

The sample was drawn from the national addresses list of Cendris, a subsidiary of TNT, the Dutch national postal agency. The specifications called for a systematic random sample of N=4500. For over 66%, the addresses are associated with a family name – the remaining 34% were addressed as “To main occupant [hoofdbewoner]”.

Sampling within households was conducted by random date selection. The addresses were stratified in 12 random date groups and the addressed was invited to have the questionnaire completed by the household member whose birthday was first after the date specified.

<b>Table 2: Response and non-response</b>						
	2007&2008		2010&2011			
	N	%	N	%		
Initial sample	9000	100.0%	4500	100%		
Undeliverable	289	3.2%	125	2.8%		
Net sample	8711	100.0%	4384	100%		
<b>Valid response</b>	<b>2843</b>	<b>32.6%</b>	<b>1472</b>	<b>33.6%</b>		
Explicit refusal	983	11.3%	552	12.6%		
No response	4885	56.1%	2360	53.8%		

## POST-STRATIFICATION WEIGHTS

There are three sources of information that can inform us about selectivity that occurs because of non-response, and can be used to post-stratify the data.

### Sample-frame information

- Location of the sampled address. It is to be expected that response in urban areas, and in particular in the four major cities (Amsterdam, Rotterdam, The Hague, Utrecht) is lower than elsewhere.
- Name: for about 33.6% of the sample there was no access to a name of the inhabitants. This has decreased the response.
- Phone: for about 72.3% of the sample there was no access to a phone number. Apart from obstructing the opportunity to use the third (phone) reminders, it is to be expected that not being listed in the phone-register is a strong correlate of willingness to participate.
- Foreign family name: Family names in the Netherlands can with considerable accuracy be classified as foreign and non-foreign. In particular Moroccan and Turkish names are easy to recognize, this is much harder for Surinamese and Antillean names. 3.2% of the units in the sample frame were categorized as having foreign name.

In 9 cases, the respondents had removed their identification number from the mailed back questionnaire, although they supplied useable information. These questionnaires cannot be connected to the sample frame information and thus cannot be post-stratified in this respect (and these respondents kept receiving reminders to the very end...)

### Household box information

Selectivity may also occur within responding households. Each respondent was asked to complete a household box, which gives access to information of all household members with respect to:

- Sex
- Age
- Position in household
- Main activity
- Highest completed / current education.

In addition, we have information on:

- Total number of persons in household eligible for the sample (i.e. all household members of 18 and older).

Using this information, a synthetic population can be formed that consists of all household members in the designated age bracket (18-75+). The actual sample should be representative of this synthetic population. All this information was used to develop the post-stratification weight.

The weights have been constructed by taking the inverse of the expected probabilities from a logistic regression that predicted response from (A) sample frame characteristics, (B) constructed sample from household roster

### Election result

Respondents report on their voting behavior at the most recent election, which happened to have been on June 9th 2010. Two exactly known population characteristics can be used as benchmark: turnout (75,4%), and the distribution of voting over parties. As in other surveys, voter turnout is considerably overestimated

by the survey (at 88%), which is assumed to be caused by lower response to surveys among non-voters. Unlike in earlier ISSP-NL issues there was a significant difference between the population benchmark for one party, PVV (Lijst Wilders), which may be due to lower survey participation among the PVV-voters, or misreporting. The former seems the more plausible interpretation. The post-stratification weight `www3` was developed by iterative proportional fitting.

<b>Table 4: Benchmark distributions, unweighted sample data and weights</b>

1 Child	1.739	0.934	2.372	1.183	2.769
2 Parent	0.939	0.983	1.061	0.966	1.011
5 Other	1.023	0.963	1.155	1.146	1.292
6 Single hh member	1.050	1.053	0.974	1.036	1.062
7 Partner in couple hh	0.944	0.978	0.907	0.975	0.862

In summary, it can be said that one group was severely underrepresented in our effective sample: young adults, in particular in as far as they live in their parents' households. However, the highest marginal weight (2.7) is generated for respondents with foreign names. Note on the other hand, that the obtained sample is fairly representative with respect to education and main activity, even before post-stratification.

h01 Q01. If you were to consider your life in general these days, how happy or unhappy would you say you are, on the whole?	1461	1	98	3.25	7.509
h02a Q02a. In general, how much confidence do you have in the educational system in [country]?	1449	1	8	2.97	1.144

h02b Q02b. In general, how much confidence do you have in the health care system in [country]?	1452	1	8	2.73	.965
h03 Q03. In general, would you say that the health care system in [country]...	1463	1	8	2.56	1.259
h04 Q04. Is it fair or unfair that people with higher incomes can afford better education for their children than people with lower incomes?	1458	1	8	4.17	1.136
h05 Q05. Is it fair or unfair that people with higher incomes can afford better health care than people with lower incomes?	1451	1	8	4.32	1.082
h06a Q06a. In the next few years the health care system in [country] will improve.	1445	1	8	3.80	1.683
h06b Q06b. People use health care services more than necessary.	1449	1	8	2.87	1.570
h06c Q06c. The government should provide only limited health care services.	1448	1	8	3.85	1.351
h06d Q06d. In general, the health care system in [country] is inefficient.	1447	1	8	3.39	1.707
h07 Q07. How willing would you be to pay higher taxes to improve the level of health care for all people in [country]?	1434	1	8	3.22	1.349
h08a Q08a. Are you in favor of or against public funding of...preventive medical checkups?	1443	1	8	2.32	1.261
h08b Q08b. Are you in favor of or against public funding of...treatment of HIV/AIDS?	1444	1	8	2.60	1.333
h08c Q08c. Are you in favor of or against public funding of...programs to prevent obesity?	1441	1	8	2.92	1.338
h08d Q08d. Are you in favor of or against public funding of...organ transplants?	1442	1	8	2.27	1.337
h09a Q09a. People should have access to publicly funded health care even if they...do not hold citizenship of [country].	1451	1	8	2.66	1.281
h09b Q09b. People should have access to publicly funded health care even if they...behave in ways that damage their health.	1447	1	8	3.09	1.302
h10 Q10. In your opinion, how many people are there in [country] who do not have access to the health care they need?	1441	1	8	3.39	2.296
h11a Q11a. People suffer from severe health problems...because they behaved in ways that damaged their health.	1445	1	8	2.77	1.376
h11b Q11b. People suffer from severe health problems...because of the environment they are exposed to at work or where they live.	1440	1	8	2.75	1.303
h11c Q11c. People suffer from severe health problems...because of their genes.	1446	1	8	2.33	1.307
h11d Q11d. People suffer from severe health problems...because they are poor	1447	1	8	3.24	1.416

h12 Q12. Suppose two equally sick people need the same heart operation. One does not smoke, the other is a heavy smoker . In your opinion who should get the operation first?	1456	1	8	2.23	1.589
h13 Q13. Now, suppose two other equally sick people need the same heart operation. One is aged 30, the other 70. In your opinion who should get the operation first?	1456	1	8	2.43	1.486
h14 Q14. Now, suppose two other equally sick people need the same heart operation. One has young children, the other does not have young children. In your opinion who should get the operation first?	1456	1	8	2.87	1.474
h15a Q15a. [Alternative/traditional/folk] medicine provides better solutions for health problems than [mainstream/western conventional] medicine.	1449	1	8	3.82	1.465
h15b Q15b. [Alternative/traditional /folk] medicine promises more than it is able to deliver.	1446	1	8	3.12	1.819
h16a Q16a. All things considered, doctors can be trusted.	1450	1	8	2.22	.875
h16b Q16b. Doctors discuss all treatment options with their patients.	1450	1	8	3.03	1.441
h16c Q16c. The medical skills of doctors are not as good as they should be.	1449	1	8	3.66	1.572
h16d Q16d. Doctors care more about their earnings than about their patients.	1449	1	8	3.86	1.632
h16e Q16e. Doctors would tell their patients if they made a mistake during treatment.	1449	1	8	4.27	1.839
h17a Q17a. During the past 4 weeks how often...have you had difficulties with work or household activities because of health problems?	1446	1	8	2.25	1.386
h17b Q17b. During the past 4 weeks how often...have you had bodily aches or pains?	1447	1	8	2.58	1.265
h17c Q17c. During the past 4 weeks how often...have you felt unhappy and depressed?	1444	1	8	1.95	1.128
h17d Q17d. During the past 4 weeks how often...have you lost confidence in yourself?	1441	1	8	1.87	1.097
h17e Q17e. During the past 4 weeks how often...have you felt you could not overcome your problems?	1446	1	8	1.85	1.136
h18a Q18a. During the past 12 months, how often did you visit or were visited by...a doctor?	1452	1	8	2.55	1.071
h18b Q18b. During the past 12 months, how often did you visit or were visited by...an [alternative/traditional/folk] health care practitioner?	1415	1	8	1.32	.871
h19 Q19. During the past 12 months, have you been in hospital or a clinic as an inpatient overnight?	1436	1	2	1.88	.326

h20a Q20a. During the past 12 months did it ever happen that you did not get the medical treatment you needed because you could not pay for it?	1324	1	7	3.72	2.397
h20b Q20b. During the past 12 months did it ever happen that you did not get the medical treatment you needed because you could not take the time off work or had other commitments?	1323	1	7	3.60	2.357
h20c Q20c. During the past 12 months did it ever happen that you did not get the medical treatment you needed because the treatment you needed was not available where you live or nearby?	1314	1	7	3.71	2.390
h20d Q20d. During the past 12 months did it ever happen that you did not get the medical treatment you needed because the waiting list was too long	1317	1	7	3.70	2.405
h21a Q21a. How likely is it that if you become seriously ill, you would get or not get...the best treatment available in [country]	1448	1	8	2.52	1.454
h21b Q21b. How likely is it that if you become seriously ill, you would get or not get... treatment from the doctor of your choice	1448	1	8	2.97	1.754
h22 Q22. In general, how satisfied or dissatisfied are you with the health care system in [country]?	1454	1	98	4.00	9.964
h23a Q23a. How satisfied or dissatisfied were you with the treatment you received...when you last visited a doctor?	1449	1	98	7.76	21.523
h23b Q23b. How satisfied or dissatisfied were you with the treatment you received...when you last visited an [alternative var labels/traditional/ folk] health care practitioner?	1408	1	98	77.58	38.239
h23c Q23c. How satisfied or dissatisfied were you with the treatment you received...when you were last in hospital?	1436	1	98	28.95	42.384
h24 Q24. Do you smoke cigarettes, and if so about how many cigarettes a day?	1447	1	98	2.37	5.777
h25a Q25a. How often do you...drink 4 or more alcoholic drinks on the same day?	1449	1	8	1.95	1.163
h25b Q25b. How often do you...do physical activity for at least 20 minutes that makes you sweat or breathe more heavily than usual?	1444	1	8	3.41	1.395
h25c Q25c. How often do you...eat fresh fruit or vegetables?	1445	1	8	4.64	.696
h26 Q26. In general, would you say your health is ...	1454	1	8	2.99	.962
h27 Q27. Do you have a long-standing illness, a chronic condition, or a disability?	1440	1	2	1.65	.479

### **ISSP 2010 Environment III - Norway**

In case of questions about the survey, please contact

Knut Kalgraff Skjåk or Kirstine Kolsrud,  
E-mail: [issp@nsd.uib.no](mailto:issp@nsd.uib.no)

Norwegian Social Science Data Services,  
Harald Hårfagresgt. 29  
N 5007 Bergen  
Norway

In publications (printed and electronic), lectures etc. using data from the survey, please give full reference, and send a printed or electronic copy to the Norwegian Social Science Data Services (NSD).

## ISSP Study Description Form

*Study title:* International survey on Environment

*Fieldwork dates:* 09.03.2011 – 11.05.2011

*Principal investigators:* Kirstine Kolsrud and Knut Kalgraff Skjåk, NSD.

*Sample type:* The sample was a random sample of 3 600 individuals from the Central Register of Persons, born 1932 - 1993.

*Fieldwork institute:* TNS Gallup (contact and paper questionnaire administration) and NSD (web questionnaire administration)

*Fieldwork methods:* The main survey was conducted as a combined mail survey and web survey. A split ballot design testing contact procedures and mode preferences was used. See the SMQ for further details.

*N. of respondents:* 1382; 475 web respondents and 907 pencil and paper.

<i>Details about issued sample:</i>  Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: <a href="http://www.aapor.org/uploads/standarddefs_4.pdf">http://www.aapor.org/uploads/standarddefs_4.pdf</a> . The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.	1. Total number of starting or issued names/addresses (gross sample size) *	3600
	2. Returned questionnaire (1.0)	1382
	3. Eligible, Non-Interview	
	A. Refusal (2.11)	61
	B. Implicit refusal (blank questionnaire) (2.113)	
	C. Break-off questionnaire too incomplete (2.12)	32
	D. Death (2.31)	
	E. Physically or mentally unable (2.32)	5
	F. Other (wrong person answered) (2.30)	13
	4. Unknown Eligibility, Non-Interview	
	G. Nothing ever returned (3.19)	2025
	H. Unknown Whereabouts, Mailing Returned Undelivered (3.30)	80
	I. Other (3.90)	
	5. Not Eligible	
	J. Abroad during fieldwork period (4.70)	2

\* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

*Language(s):* Norwegian

*Weight present:* No

*Weighting procedure:*

*Known systematic properties of sample:* Gross sample:  
No bias with respect to gender, age, marital status and place of living.

Net sample:

Younger people, single (never married) and people with lower education underrepresented.

*Deviations from ISSP  
questionnaire:*

Date and month of interview not provided

*Publications:*

**New Zealand  
ISSP 2010 – Environment III  
Study Description**

### ISSP Study Description Form

Study-Title:	Environment III: New Zealand	
Fieldwork Dates:	19 August 2010 to 30 November 2010	
Principle Investigator:	Professor Philip Gendall, School of Communication, Journalism & Marketing, Massey University, Palmerston North, New Zealand	
Sample Type:	Stratified random sample from electoral rolls (sample stratified by age)	
Fieldwork Methods:	Mail survey in four waves	
Context of ISSP questionnaire:	Dedicated survey, with ISSP questions preceding non-ISSP questions and demographics	
Sample Size:	2520	
Response Rates:	2,520	A – Total issued (total sample)
	98	B – Ineligible (address vacant, wrong ages,)
	2,422	C – (=A-B) Total eligible (in-scope sample)
	1,172	D – Total ISSP questionnaires received
	1,250	E – (=C-D; F+G+H) Total non-response
	51	F – Refusals (refusing to take part)
	-	G – Non-contact (never contacted)
	1,199	H – Other non-response
Language:	English	
Weighted?	No	
Weighting Procedure:	Original data not weighted but weighting variable provided. The weighting variable weights the sample so its age-sex distribution matches that of the New Zealand population according to the 2006 census.	
Known Systematic Properties:		
Deviations from ISSP Questions:	All module questions were asked but some new background variable questions were omitted.	
Literature:		

## **SAMPLING INFORMATION**

### **Sampling Procedure**

The sample was selected from the 2010 New Zealand electoral roll, which contains the names of all registered voters over the age of 18 years. The population was first stratified by age: under 35, 35 to 54, 55 and over; then equal samples of 840 were randomly selected within each age group. The achieved sample is generally representative of the New Zealand population over 18 years of age, but people under 30 are underrepresented in the sample, while those over 60 are overrepresented, and the proportion of women is higher than in the population whereas the proportion of men is lower. The data have **not** been weighted to correct these biases. Comparisons of unweighted survey results with results obtained from the sample weighted so that its age-sex distribution matched that of the New Zealand population over 18, showed only minor differences between many estimates, but weighting by age and sex is likely to produce more accurate estimates for behavioural variables.

### **Survey Administration Procedure**

The questionnaire together with a covering letter was sent to the 25200 selected participants on 19 August 2010. A reminder postcard was mailed to participants whose questionnaires had not been returned by 2 September. A second reminder and another questionnaire were sent to those who had not returned their questionnaires by 16 September. A final reminder letter was sent to all remaining non-respondents on 29 September. The survey was closed off on 30 November, 14 weeks after the initial mailing.

## Response Rate

The response rate achieved was  $1172/(2520-98) = 48.4\%$

	Response from First mailing	Response from Second mailing	Response from Third mailing	Response from Fourth mailing
Issued	2,520	1,933	1,653	1,311
Gone-no-address	16	7	38	16
Ineligible	8	3	8	2
Total eligible	2,496	1,923	1,607	1,293
Refusals	15	12	22	2
Valid responses	548	258	274	92
Other non-response	1,933	1,653	1,311	1,199

## National Population Characteristics

1. Age and Sex distribution of population  
Source: Statistics New Zealand, 2006 Census.
2. Education of population is based on “highest qualification”. The New Zealand Census does not contain any questions about years of schooling and this information is not available from any government source.  
Source: Statistics New Zealand, 2006 Census.
3. Employment rate of population

*Study title:* Inquérito Social Internacional

*Fieldwork dates:* 2012-11-03 to 2013-04-03

*Principal investigators:* Jorge Vala, Instituto de Ciências Sociais-Universidade de Lisboa  
Alice Ramos, Instituto de Ciências Sociais-Universidade de Lisboa

2013-06-25

*Sample type:* description of the sampling procedure

<b>Target Population,</b> Population coverage, Geographic coverage	All persons aged 18 and over who are resident in the mainland of Portugal (this excludes Azores and Madeira) and who are not permanently living in institutions or in similar environments. There are also some population groups that cannot be reached and will be excluded from the target population: <ul style="list-style-type: none"><li>- people living in localities with less than 10 dwellings</li><li>- homeless people,</li><li>- people who are residents of Portugal but work most of time outside the country,</li><li>- people living in institutions and group quarters</li></ul>
<b>Sampling frame</b> (areas, starting points, registers)	<p>For stratification: The frame covers municipalities (these are administrative areas with varying sizes; e.g. Lisboa is one municipality) in all regions of the mainland of Portugal, except municipalities with less than 10 dwellings. For each municipality the number of households and persons 18 years and older is known. For selection of households: list of households included in the street studies. Census 2001 were used because the more recent (2011) were not available at the time of the sampling process. Next samples will be designed from the 2011 Census.</p> <p>Area sampling</p>
<b>Sampling design</b> (sampling stages, clusters, primary/secondary sampling units, selection procedures)	<p>Stage 1: selection of localities</p> <p>Random selection of 101 municipalities (out of 26192). The selection is a probabilistic one, taking into account the region (NUTS II: North, Center, Lisbon, Alentejo, Algarve) and the number of inhabitants (less than 2000, 2000-9999, 10000-19999, 20000-99999, more than 100000). The number of interviews by strata (23 because there are no municipalities with more than 100000 inhabitants in Alentejo and Algarve) is proportional to the distribution of the population.</p> <p>Stage 2: selection of households</p> <p>Since we do not have lists of households or individuals, the selection of households is done according to a street study (random-route method).</p> <p>In each locality starting points were randomly selected (one or more according to the dimension of the locality). Each starting point (323 on the whole) corresponds to a fixed number of interviews.</p> <p>Households are selected following fixed intervals (ranging from 6 in small localities to 20 in big cities).</p> <p>Stage 3: selection of respondent</p> <p>Last birthday method</p> <p>The interview records date of birth of all members of the household, and selects the respondent among the eligible. Are considered non-eligible people with less than 18 years old, people with mental disabilities, people that do not speak Portuguese, people that are away from the household during the fieldwork period, people that are permanently sick.</p>
<b>Remark</b> (problems, deviations, modifications,	Substitutions are not allowed in any stage of the selection.

**Study Description**

2011-10-25

***Please use this form for reporting on Module 2006 and later!***

*Study title:* 'official' title of the study/survey in your country  
Module **2010 "Environment"** has been added to **the regular omnibus "Vestnik"**

*Fieldwork dates:* start and end dates of field-work, please use format yyyy-mm-dd  
start date: 2010-12-01; end date: 2010-12-21

*Principal investigators:* name and institution  
**L.Khakhulina, Levada-Center**

*Sample type:* **Description of the sampling procedure**  
The omnibus survey is based on the nationwide, four-stage, stratified and probability sample (N=1600) that represents the adult population in age 18+ .

**Stratification.** The nationwide sample (N=1600) was divided among:

a) 8 large geographical macro regions (Federal Okrugs) proportionate to the size of the local population aged 18+ of each macro region  
b) 6 types of urban settlements and rural districts \* in each of 8 macro regions proportionate to the size of the local population aged 18+ of each type.

- 1) cities > 1,000 000 residents
- 2) cities > 500 000 - 1,000 000
- 3) cities > 100 000 – 500 000
- 4) cities and small urban settlements < 100 000
- 5) rural districts

If to take into account that in the North-West region there are no cities of 500-1,000 thousands of residents, in the Far East region there are no cities of more then 1,000 thousands of residents, in North Caucasia there are no cities more then 500,000 residents the total number of strata is 36.

**Selection of primary sampling units (PSUs).** On the **first stage** urban settlements and rural administrative regions as primary sampling units were selected.

All cities over 500, 000 inhabitants were included in the sample as self-representative units.

Urban settlements and rural administrative regions were considered as primary sample units (PSUs). In each stratum (except strata of cities over 500,000 and cities over 1,000 000) the number of PSUs was calculated with the limitation of 10-12 interviews per PSU and the PSUs as well were selected with the probability proportionally to its size (PPS). The total number of interviews accounted for a stratum was distributed approximately equally among selected PSUs. Totally **135** PSUs were selected including 96 urban and 39 rural primary sampling points.

**Selection of secondary sampling units (SSUs).** On the **second stage** the secondary sampling units (SSU) were selected from the lists of electoral districts in urban settlements and localities (villages) in rural administrative regions.

In the cities and in the rural administrative regions 1-2 SSUs (electoral districts or localities) were randomly selected from the list of all potential secondary sampling points (electoral districts and localities). 10 SSUs were selected in Moscow, 5 SSUs - in S-Petersburg.

Totally 147 secondary sample points were selected.

**Selection of households.** On the **third stage** the households were selected systematically from the list of addresses. For that addresses has been registered by streets within selected electoral districts. Then the sample of addresses for the selection of households was randomly selected from the full list of registered addresses of sampled electoral districts and sampled rural localities. The sample of households was obtained from the sample of addresses by taking every household at each selected address.

**Selection of respondents.** On the **fourth stage** within a household a respondent was selected among eligible household members by the nearest birthday to the date of interviewing. If nobody at home or a member of a household selected as a respondent refused to participate in the survey, or if a household or a respondent was not achieved for 3 visits, the interviewer was required to visit the next address from the list of addresses. Substitutions of addresses are not allowed.

*Fieldwork institute:* institute which conducted the survey

*Language(s):* language or languages of the field instrument

**Russian**

*Weight present:* yes or no, whether a weighting factor exists in the data-set

**Yes, exists**

*Weighting procedure:* exact description of the weighting procedure / algorithm

The total expected number N of respondents for a certain region being treated equal

$$N = N_0 * P,$$

where  $N_0$  denotes the size of the total sample,

P - share of the region population in the entire population.

As a result of correction, every respondent  $X[k]$  has the definite weight  $W[k]$ ,

within the limits  $0 < W[k] < \sim 10$ ,

so that the following conditions were valid:

1) the value of  $\sum(W[k])$  for the region concerned was equal to N

2) for every controlled group  $G[i]$  the value  $Q[i]$  being equal to

$$Q[i] = \sum(W[k] | X[k].\text{belong to } G[i]) / N,$$

was closed to a proportion  $P[i]$  of group  $G[i]$  in the region population

i.e.  $Q[i] \sim P[i]$ ,  $i=1,2,\dots,8$ .

The value of J being equal to

$$J = \sum((Q[i]-P[i])**2) + (\sum(W[k])/N - 1)**2,$$

was used as the criterion for minimization on the weights` sets variety

## ISSP Study Description Form

*Please use this form for reporting on Module 2006 and later!*

*Study title:* 'official' title of the study/survey in your country  
**Taiwan Social Change Survey: 2010, Questionnaire II**

*Fieldwork dates:* start and end dates of field-work, please use format yyyy-mm-dd  
**2010-07-11~ 2010-09-23**

*Principal investigators:* name and institution  
**Ying-hwa Chang, Institute of Sociology, Academia Sinica**

*Sample type:* description of the sampling procedure  
**Three-stage Stratified PPS Sampling**  
**(1) PSU=township, (2) village or "li" (administrative unit under township), (3) individual person**

*Fieldwork institute:* institute which conducted the survey  
**Center for Survey Research, RCHSS, Academia Sinica**

*Fieldwork methods:* mode of interview  
**Face-to-face interview (pencil and paper)**

*N. of respondents:* number of respondents in the final ISSP file: **2209**

<i>Details about issued sample:</i>  Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: <a href="http://www.aapor.org/uploads/standarddefs_4.pdf">http://www.aapor.org/uploads/standarddefs_4.pdf</a> . The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.	1. Total number of starting or issued names/addresses (gross sample size) *	<b>4602</b>	
	2. Interviews (1.0)	<b>2209</b>	
	3. Eligible, Non-Interview	<b>2199</b>	
	A. Refusal/Break-off (2.10)		613
	B. Non-Contact (2.20)		1491
	C. Other		
	i. Language Problems (2.33)		
	ii. Miscellaneous Other (2.31, 2.32, 2.35)		95
	3. Unknown Eligibility, Non-Interview (3.0)	0	
	4. Not Eligible	<b>194</b>	
	A. Not a Residence (4.50)		13
	B. Vacant Residence (4.60)		42
	C. No Eligible Respondent (4.70)		129
	D. Other (4.10,4.90)		10

\* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

*Language(s):* language or languages of the field instrument  
**Mandarin Chinese, Fukien dialect, or Hakka dialect**

*Weight present:* yes or no, whether a weighting factor exists in the data-set  
**Yes**

*Weighting procedure:* exact description of the weighting procedure / algorithm  
**The data was weighted using an iterative proportional raking scheme. For each respondent, sample data were weighted by sex, age, urbanization and education-degree groups. Weights were then generated to match the population characteristics of Taiwan area**

*Known systematic properties of sample:* description of biases or other deviations of the sample  
**A non-response bias comes from the use of household registration data in which some household members in fact do not live in the household.**

*Deviations from ISSP* esp. questions omitted, or added, or asked in a different format than the Basic Questionnaire prescribes

2007-09-25  
*questionnaire:*  
*Publications:*

**ISSP Study Description Form*****Please use this form for reporting on Module 2006 and later!****Study title:* General Social Survey 2010*Fieldwork dates:* 2010-03-18 to 2010-08-14*Principal investigators:* Tom W. Smith, Peter V. Marsden, Michael Hout*Sample type:* Multi-stage area probability sample*Fieldwork institute:* NORC*Fieldwork methods:* Face-to-face with CAPI*N. of respondents:* 1,430 (randomly selected 2/3 of the total of 2,044 respondents in GSS 2010)

<i>Details about issued sample:</i>  Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: <a href="http://www.aapor.org/uploads/standarddefs_4.pdf">http://www.aapor.org/uploads/standarddefs_4.pdf</a> . The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.	1. Total number of starting or issued names/addresses (gross sample size) *	.....4136
	2. Interviews (1.0)	.....2044
	3. Eligible, Non-Interview	
	A. Refusal/Break-off (2.10)	.....509
	B. Non-Contact (2.20)	.....31
	C. Other	
	i. Language Problems (2.33)	.....61
	ii. Miscellaneous Other (2.31, 2.32, 2.35)	.....20
	3. Unknown Eligibility, Non-Interview (3.0)	.....0
	4. Not Eligible	
	A. Not a Residence (4.50)	.....181
	B. Vacant Residence (4.60)	.....488
	C. No Eligible Respondent (4.70)	.....44
	D. Other (4.10,4.90)	.....758

\* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

*Language(s):* English and Spanish*Weight present:* Yes

*Weighting procedure:* The weight variable takes into consideration 1) the sub-sampling of non-respondents, and 2) the number of adults in the household. The GSS uses a sub-sampling design to focus resources on a smaller set of the difficult cases for further attempts, thereby reducing non-response bias.

*Known systematic properties of sample:* Under-samples men and those under 25 and those over 65

*Deviations from ISSP questionnaire:* No

*Publications:*

**South Africa  
ISSP 2010 – Environment III  
Study Description**

## ISSP Study Description Form

***Please use this form for reporting on Module 2006 and later!***

*Study title:* South African Social Attitudes Survey (SASAS)

*Fieldwork dates:* start dates: 2010-11-01, end date 2010-12-10

*Principal investigators:* Jare Struwig –Human Sciences Research Council

*Sample type:* A sample of 3500 respondents was selected throughout South Africa in 500 census enumerator areas (EAs) as determined in the 2001 census. Each EA was classified in terms of the dominant lifestyle category by the Human Sciences Research Council (HSRC) in its analysis of the 1996 census data. In order to ensure adequate representation in the sample from each province and from each of the four dominant population groups, the sample was stratified by province and by population group. Disproportionately large samples were selected from areas know to be inhabited by the two smallest components of the population, namely (i) areas with dominantly Indian populations and (ii) the Northern Cape. Within the EAs, the households were randomly selected and within the household, the respondent were selected using a Kish grid.

*Fieldwork institute:* Human Sciences Research Council

*Fieldwork methods:* Face to face

*N. of respondents:* 3305:

*Details about issued sample:*

Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: [http://www.aapor.org/uploads/standarddefinitions\\_4.pdf](http://www.aapor.org/uploads/standarddefinitions_4.pdf). The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.

1. Total number of starting or issued names/addresses (gross sample size) *	3500
2. Interviews (1.0)	3112
3. Eligible, Non-Interview	
A. Refusal/Break-off (2.10)	280
B. Non-Contact (2.20)	59
C. Other	.....
i. Language Problems (2.33)	1
ii. Miscellaneous Other (2.31, 2.32, 2.35)	0
3. Unknown Eligibility, Non-Interview (3.0)	0.
4. Not Eligible	
A. Not a Residence (4.50)	0
B. Vacant Residence (4.60)	43
C. No Eligible Respondent (4.70)	5
D. Other (4.10,4.90)	0

\* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10

for further clarification.

<i>Language(s):</i>	English, Afrikaans, Tsonga, Tswana, Xhosa, Zulu
<i>Weight present:</i>	Yes
<i>Weighting procedure:</i>	<p>Explicit stratification variables: Province, population group and geography type (viz. urban formal, urban informal, tribal and rural formal, including commercial farms).</p> <p>The EA (census enumerator area) is used as PSU (primary sampling unit) and the number of households (HHs) in the EA as the MOS (measure of size). EA's are drawn within the explicit strata pps and a fixed number of households drawn per drawn EA. Within each drawn HH one person 16 years or older is drawn at random using Kish's grid.</p> <p>Non-response adjustment = number of drawn HHs per EA / number of responding HHs (i.e. where a person 16+ is successfully interviewed) provided that at least 50% of households responded. Otherwise two similar (i.e. in the same explicit stratum) and neighbouring EAs are combined and a combined adjustment factor calculated.</p> <p>Person and household weights are benchmarked using the SAS CALMAR macro and province, population group, gender and 5 age groups (i.e. 16-24, 25-34, 35-49, 50-59 and 60 and older) as benchmark variables for persons and province and population group of the respondent in the household for households as benchmark variables. The marginal totals for the benchmark variables are obtained from the applicable midyear estimates as published by Statistics South Africa. In other words, the estimated South African population for the applicable year is used as target population.</p> <p>Rescaling not explicitly but only implicitly I assume that this question relates to whether sample sizes are rescaled with the view to do cross-tabulating analyses using STATA. Sub-class analyses are done by using SAS surveymeans, using the "domain" facility.</p>
<i>Known systematic properties of sample:</i>	Disproportionately large samples were selected from areas known to be inhabited by the two smallest components of the population, namely (i) areas with dominantly Indian populations and (ii) the Northern Cape
<i>Deviations from ISSP questionnaire:</i>	No
<i>Publications:</i>	None

## ISSP Characteristics of National Population

Each ISSP member is asked to include to the documentation the following information about known characteristics of its national population, from census or the best available estimates from government surveys or other high-quality data-sources:

- sex distribution of the population
- age distribution of the population
- education (years of schooling) of the population; only groups are available in Austria!
- employment rate of the population

### SEX

Male	49,57 pct.
Female	50,43 pct.
Total inhabitants in DK	5.557.709

### AGE (groups)

0-17	21,82 pct.
18-29	14,17 pct.
30-39	13,23 pct.
40-49	14,64 pct.
50-59	12,88 pct.
60-69	12,24 pct.
70-79	6,92 pct.
80-89	3,42 pct.
90-	0,69 pct.

### HIGHEST YEARS OF SCHOOLING (groups)<sup>1</sup>

Basic school and no answer (10 BASIC SCHOOL 8-10 grade + 90 UNKNOWN)	9 years	34,01 pct.
Gymnasium and basic vocational courses (20 GENERAL UPPER SECONDARY SCHOOL + 25 VOCATIONAL UPPER SECONDARY SCHOOL+ 35 VOCATIONAL EDUCATION)	12 years	40,19 pct.
Short more advanced studies (40 SHORT-CYCLE HIGHER EDUCATION)	14 years	4,83 pct.

<sup>1</sup> Because the table concerns the 15-69 year olds the educational group percentages are calculated according to this number of people (3 929 402) and not the whole population (5 534 738).

Medium length more advanced studies and bachelor (50 MEDIUM-CYCLE HIGHER EDUCATION + 60 BACHELOR)	15 years	14,17pct.
Long more advanced studies (65 LONG-CYCLE HIGHER EDUCATION)	17 years	6,40 pct.

## EMPLOYMENT STATUS

Employed	49,8 pct <sup>2</sup> .
Unemployed	6,1 pct <sup>3</sup> .
Not in labor force	47,0 pct <sup>4</sup> .

## ISSP Characteristics of National Population

Each ISSP member is asked to include to the documentation the following information about known characteristics of its national population, from census or the best available estimates from government surveys or other high-quality data-sources:

- sex distribution of the population
- age distribution of the population
- education (years of schooling) of the population
- employment rate of the population

**Highest Qualification<sup>(1)</sup>**  
for the *Census Usually Resident Population Count*  
Aged 15 Years and Over, 2006

Highest Qualification		Census Usually Resident Population Count
00	No Qualification	708,432
01	Level 1 Certificate	394,593
02	Level 2 Certificate	306,327
03	Level 3 Certificate	247,674
04	Level 4 Certificate	288,599
05	Level 5 Diploma	113,466
06	Level 6 Diploma	157,856
07	Bachelor Degree and Level 7 Qualification	315,849
08	Post-graduate and Honours Degrees	65,458
09	Masters Degree	69,705
10	Doktorate Degree	16,770
11	Overseas Secondary School Qualification	172,500
97	Response Unidentifiable	136,678
99	Not Stated	181,135
Total		3,160,374

(1) In 2006, Highest Qualification data has been output in two different ways.  
The categories in this table show Highest Qualification on the basis of the new  
New Zealand qualifications register

The data in the table shows highest level of qualification gained, regardless of whether  
that qualification was gained at school or post-school.

This data has been randomly rounded to protect confidentiality. Individual figures may not  
add up to totals, and values for the same data may vary in different tables.

## ISSP Characteristics of National Population

Each ISSP member is asked to include to the documentation the following information about known characteristics of its national population, from census or the best available estimates from government surveys or other high-quality data-sources:

- sex distribution of the population
- age distribution of the population
- education (years of schooling) of the population
- employment rate of the population
