Note	In 2018, we still had the old format, with the question of writing in the number of employees. Based on this information it was possible to distinguish between the self-employed having less than 10 or more than 10 employees. There were a few cases where the number of employees were missing. These were put in the 1-9 category (it is very unusual that self-employed have more than 10 employees). For detailed information, see the syntax deposited at the ISSP portal.

Interviewer Instruction		
Translation Note		
Note	This is a new version, introduced in 2016, of trying to get correct information regarding the household composition. This is the best solution so far, much less errors compared to previous attempts in former surveys. However, still some respondents do not seem to be able to fill in the right figures. Therefore, the household variables HOMPOP, HHADULT, HHCHILDR, HHTODD may contain some measurement errors.
