Q012: Consent for face to face Eurobarometer surveys

Text

Not back

Bonjour Je suis.....de l'institut Kantar/TNS Sofres, et je mène actuellement un entretien pour Kantar, de la part de l'un de nos clients.

Researcher notes: EB92.3 SC0

Q013: We are looking for people aged 15 or over who are willing to share their opinions about current events and political or social issues for a study we are conducting across Europe. We would greatly appreciate your input. It should take no more than [XX] min

Text

Not back

Nous recherchons des personnes âgées de 15 ans et plus, désireuses de partager leurs opinions sur l'actualité et sur des questions politiques ou sociales pour une étude que nous menons dans l'ensemble de l'Europe. Nous apprécierions vraiment votre contribution. L'entretien ne devrait pas durer plus de [XX] minutes.

Researcher notes: EB92.3 SC0

Q014: I would like to reassure you that the interview will take place in compliance to physical distancing rules required by the authorities. I want to confirm that I do not have any coronavirus symptoms, I have not recently returned from a high-risk area,

Text

Not back

I would like to reassure you that the interview will take place in compliance to physical distancing rules required by the authorities. I want to confirm that I do not have any coronavirus symptoms, I have not recently returned from a high-risk area, I have not been advised to self-isolate and I have not been in touch with others who have self-isolated.

Researcher notes: NEW

Q015: Before I start, may I check that in the last 14 days you or anyone in your household

Single coded

Je vous remettrai un dépliant avec les identifiants d'accès à l'enquête en ligne. Sur ce dépliant, vous trouverez des informations sur la manière d'accéder à l'enquête en ligne, sur la manière dont nous traitons vos données personnelles et des réponses aux autres questions que vous pourriez avoir. Nous vous offrirons également un petit cadeau, qui est échangeable si vous répondez à l'enquête.

Scripter notes: HIDESPECIAL CODES - 999

Q088: QA10**Multi coded****Not back | Min = 1 | Max = 2**

What do you think are the main reasons why the EU spends a significant proportion of its budget (around 35% of the total EU budget) on the Common Agricultural Policy (CAP)? (M)

(SHOW SCREEN - READ OUT - MAX. 2 ANSWERS)

Rotated

- 1 Agriculture is a sector financed almost entirely by the EU budget, rather than at national or local level
- 2 Financial aid to farmers makes it possible to guarantee the food supply of Europeans
- 3 Agriculture requires heavy human and financial investments
- 4 Financial aid to farmers makes it possible to ensure sustainable farming
- 5 The production of food products in the EU is more expensive than in other countries, because of stricter standards, e.g. animal welfare
- 6 Addressing the environment and climate change issues in rural areas
- 996 Other (M) **Fixed *Exclusive*
- 998 None, this proportion is not justifiable (M) **Fixed *Exclusive*
- 999 Don't know **Fixed *Exclusive*

Text

Not back

This interview was conducted within the Code of Conduct of the Market Research Society. I would like to remind you that all your replies will be treated in the strictest confidence.

For quality control reasons, we might need to re-contact you. Do you agree to give us your first name and phone number for this purpose? Your personal data, including your address, would be then carefully handled in compliance with the European General Data Protection Regulation (GDPR) and Kantar Privacy Policy, not shared with third parties and deleted at the completion of the quality controls.

Cet entretien a été mené conformément au Code de conduite des études de marché. J'aimerais vous rappeler que toutes vos réponses seront traitées dans la plus stricte confidentialité.

Pour des raisons de contrôle qualité, il se pourrait que nous ayons besoin de vous recontacter. Acceptez-vous de nous donner votre prénom et votre numéro de téléphone à cette fin ? Vos données personnelles, y compris votre adresse, seraient alors traitées avec précaution, conformément au règlement européen général sur la protection des données (RGPD) et à la politique de confidentialité de Kantar. Elles ne seraient communiquées à aucun tiers et seraient supprimées dès la fin des contrôles qualité.

B007 - BBB: Eurobarometer - Recruitment and social demogs from 93.1	End block
--	------------------

TECHNICAL SPECIFICATIONS

Between the 3rd August and 15th September 2020, Kantar carried out the wave 93.2 of the EUROBAROMETER survey, at the request of the European Commission, Directorate-General for Communication, "Media monitoring and Eurobarometer" Unit.

The wave 93.2 covers the population of the respective nationalities of the European Union Member States, resident in each of the 27 Member States and aged 15 years and over.

The basic sample design applied in all States is a multi-stage, random (probability) one. In each country, a number of sampling points was drawn with probability proportional to population size (for a total coverage of the country) and to population density.

In order to do so, the sampling points were drawn systematically from each of the "administrative regional units", after stratification by individual unit and type of area. They thus represent the whole territory of the countries surveyed according to the EUROSTAT NUTS II (or equivalent) and according to the distribution of the resident population of the respective nationalities in terms of metropolitan, urban and rural areas.

In each of the selected sampling points, a starting address was drawn, at random. Further addresses (every Nth address) were selected by standard "random route" procedures, from the initial address. In each household, the respondent was drawn, at random (following the "closest birthday rule"). If no one answered the interviewer in a household, or if the respondent selected was not available (not present or busy), the interviewer revisited the same household up to three additional times (four contact attempts in total). Interviewers never indicate that the survey is conducted on behalf of the European Commission beforehand; they may give this information once the survey is completed, upon request.

The recruitment phase was slightly different in the Netherlands and Denmark. In these countries, a sample of addresses within each areal sampling point (1km² grid) were selected from the address or population register. The selection of addresses was done in a random manner. Households were then contacted by telephone and recruited to take part in the survey.

CAPI : Computer-Assisted Personal interviewing

CAWI : Computer-Assisted Web interviewing

August – September 2020

Consequences of the coronavirus pandemic on fieldwork

Where feasible, interviews were conducted face-to-face in people's homes or on their doorstep and in the appropriate national language. In all countries where face-to-face interviewing was feasible CAPI (Computer Assisted Personal Interviewing) was used. At the start of the fieldwork it was intended to have interviewers to offer respondents the possibility to answer the question online, if they were reluctant to do it face-to-face. Eventually this option was not needed (except in Denmark and Netherlands), as the number of required interviews could be reached through regular face-to-face interviewing. For all interviews conducted face to face, hygiene and physical distancing measures have always been respected in line with government regulations, and whenever possible, interviews were conducted outside homes, on doorsteps, to remain in open air and maintain social distance.

In **Netherlands** and **Denmark**, face-to-face interviewing was feasible, but it was not possible to reach the target number of interviews within the fieldwork period. Therefore, to hit the target number of interviews within the fieldwork period an online survey was offered to those who refused the face-to-face option at the telephone recruitment stage. As a result, data collection was made through interviews via CAPI and CAWI modes.

Due to the coronavirus pandemic, **face-to-face interviews were not possible in Belgium, Estonia, Finland, Ireland, Luxembourg, Spain, Sweden and the UK**. In these countries, interviews were conducted online with Computer-Assisted Web Interviewing (CAWI) technique. However, at a later stage during the fieldwork, face-to-face interviews became feasible in **Belgium** and **Spain**, where 388 and 302 interviews were conducted with this methodology.

The online design in each country differed based on what was feasible within the fieldwork period. In all but Luxembourg the online sample was based on a probabilistic sample design: in other terms, respondents were recruited in a probabilistic random manner, ensuring that all individuals in this country have an equal chance to be interviewed.

In **Belgium, Ireland and Spain**, respondents were recruited by telephone via a probabilistic dual frame sample of telephone numbers, drawn from national telephone numbering plan.

In **Luxembourg**, the same approach was initiated. However, the response rates were not sufficiently large to achieve the target sample size in the fieldwork period, so this sample was supplemented with a non-probabilistic sample randomly drawn from Kantar's LifePoints panel. In total 155 interviews were conducted via the probabilistic sample and 453 via the LifePoints panel in Luxembourg. The sample for Ireland was also supplemented from the same panel but to a lesser extent (349 interviews).

In **Estonia, Finland, Sweden and the UK** only people randomly selected through a probabilistically drawn sample were interviewed online.

In Estonia and Finland, the respondents are recruited through a telephone survey. In Estonia a dual frame random sample is drawn from the national telephone numbering plan whilst in Finland and Sweden a random sample is drawn from the telephone register.

In UK, recruitment of respondents was made either via a face-to-face CAPI mode of data collection based on a clustered multistage random sample of addresses or via a postal invite to an online survey using a completely un-clustered random sample of addresses.

August – September 2020

Margins of error

Readers are reminded that survey results are estimations, the accuracy of which, everything being equal, rests upon the sample size and upon the observed percentage. With samples of about 1,000 interviews, the real percentages vary within the following confidence limits:

Statistical Margins due to the sampling process
(at the 95% level of confidence)

various sample sizes are in rows						various observed results are in columns
