Acknowledgements

The Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Long term access to and usability of Eurobarometer primary data and documentation is provided in a cooperative arrangement between the Inter-University Consortium for Political and Social Research (ICPSR) and the GESIS - Leibniz Institute for the Social Sciences.

Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Individual level micro data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS through the data catalogue (https://search.gesis.org/research_data) and through the ZACAT online data portal (<https://zacat.gesis.org>). Access to the Eurobarometer primary data is also provided by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, as well as supported by the Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send bibliographic citations for each completed manuscript or thesis abstract to the providing data archive, GESIS or ICPSR. Please indicate in a cover letter which data (surveys and variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

1.1.4 Bibliographic citation and DOI reference

Publications based on data collections which are made available through ICPSR or GESIS should acknowledge those sources by means of bibliographic citations. To ensure that such source attributions are captured for social science bibliographic utilities, citations must appear in footnotes or in the reference section of publications. The bibliographic citation for this data collection is:

European Commission and European Parliament, Brussels: Eurobarometer 87.1, March 2017.

TNS opinion, Brussels [Producer];

GESIS, Cologne [Publisher]: ZA6861, dataset version 2.0.0, DOI: [10.4232/1.13738](https://doi.org/10.4232/1.13738) (2021).

The registered Digital Object Identifier (DOI) persistently identifies this dataset version with reference to former (or more recent) versions and potential errata and update documentation in the GESIS data catalogue.

1.2 Content

1.2.1 Abstract

Eurobarometer 87.1 covered the following special topics: (1) Two years until the 2019 European elections, (2) Tobacco and electronic cigarettes, (3) Climate change, (4) The impact of digitisation and automation on daily life, and (5) Coach services. Questions regarding the European elections in 2019 included information on and the role of the European Parliament (EP), the knowledge about European institutions and the EP, the present and future of the EP, European values and policies, European identity, and media use. Further questions were asked regarding smoking habits and various tobacco/nicotine products. Respondents were queried about their smoking habits, their efforts to quit smoking, passive smoking inside, and banning advertisements for tobacco products. Respondent's opinions were collected on which world issues they believed were the most serious problems, how serious the issue of climate change was and if the EU should be responsible for addressing it, and what actions they have personally taken to fight climate change. Respondents were also asked regarding their awareness of, usage of, and attitude towards autonomous systems including robots, artificial intelligence, driverless cars, civil drones, cyber security, online social networks, and health services. Lastly, several questions were asked regarding the usage frequency of coach services, the reasons for using coaches, and the appraisal of services.

Demographic and other background information collected includes left or right self-placement on political scale, age, gender, nationality, marital status, occupation, age when stopped full-time education, household composition, ownership of a fixed or mobile telephone and other goods, difficulties in paying bills, self-assessed social class, internet use, life satisfaction, political discussion frequency, and opinions on whether their voice counts in their country/EU. Country-specific data includes type and size of locality, region of residence, and language of interview (select countries).

1.3 Universe

In all, Eurobarometer 87.1 interviewed 27.901 citizens in the 28 countries of the European Union after the 2013 enlargement (accession of Croatia in July 2013). All respondents were residents in the respective country, nationals and non-national EU-citizens, and aged 15 and over. They were supposed to have sufficient command of one of the respective national language(s) to answer the questionnaire. Separate samples were drawn for Great Britain and Northern Ireland as well as for East and West Germany.

1.4 Sampling procedure

A multi-stage, random (probability) sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regional units in every country (Statistical Office of the European Community, EUROSTAT NUTS 2 or equivalent). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of starting addresses was selected from each sampled PSU at random. Further addresses were chosen systematically using standard random route procedures as every Nth address from the initial address. In each household, a respondent was drawn, at random, following the closest birthday rule. No more than one interview was conducted in each household.

The regular sample size (in the sense of completed interviews) is 1000 respondents per country, except the United Kingdom with separate samples for Great Britain (1000) and Northern Ireland (300), Germany with separate samples for the Eastern (500) and the Western part (1000), and Luxembourg, Cyprus (Republic) and

Malta with 500 interviews each. The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

From March 18 to March 27, 2017, TNS opinion carried out the fieldwork for this Eurobarometer, at the request of the European Parliament, Directorate-General for Communication, and at the request of the European Commission, Directorate-General for Communication. TNS opinion is based in Brussels, Belgium, and co-ordinates the fieldwork carried out through its network of national institutes:

1.6 Mode of data collection

In all countries, fieldwork was conducted on the basis of detailed and uniform instructions prepared by TNS opinion. Interviews were conducted face-to-face in people's home in the respective national language. As far as the data capture is concerned, CAPI (Computer Assisted Personal Interview) was used in those countries where this technique was available.

Equivalent French and English basic questionnaires were developed for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country. Back-translation procedures were applied for controlling semantic equivalence. Multi-language questionnaires are applied if appropriate (Belgium, Luxembourg, Spain, Finland, Estonia, Latvia, Malta).

In each country only the national language version(s) of the questionnaire is (are) used; in countries with more than one official language, the language version is selected at the beginning of the interview.

1.7 Weighting

In general, the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis, a national weighting procedure, using marginal and intercellular weighting, is applied. As such, in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This post-stratification weighting is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The population size weighting factors correct for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country or lower level area sample (Great Britain and Northern Ireland, East and West Germany) is represented in proportion to its population size within different groupings according to the historical states of European unification (e.g. founder members, new members, Euro zone countries) in the case of the EUROPEAN WEIGHTS, as well as within the United Kingdom (WEIGHT UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31) or Germany as a whole (WEIGHT GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS

adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general, all countries or samples which do not belong to the respective group under consideration are excluded from calculation. The special weights for the United Kingdom and Germany do exclude all other countries from calculation starting with Eurobarometer 62. The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2, a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 4) are weighted separately, as documented in the respective study and weight variable description. In some surveys, special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

Eurobarometer 87.1 provides three (post-stratification) NATION WEIGHTS: W1 (WEIGHT RESULT FROM TARGET) for separate analysis or comparison of individual samples (countries or regions on sub-national level), W4 (WEIGHT UNITED KINGDOM ONLY) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole, and W3 (WEIGHT GERMANY ONLY), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. W3 and W4 exclude all other countries from calculation, but include the post-stratification factors for the United Kingdom and Germany respectively.

Starting with Eurobarometer 75.4 and in accordance with former practice up to Eurobarometer 61, the archive started to derive (see 1.8. Data preparation) three additional weights W3A, W4A, W3A_W4A in order to provide for the analysis of the United Kingdom and/or Germany as a whole together with all other samples, as separate countries (samples). W3A (WEIGHT RESULT FROM TARGET – UNITED GERMANY) combines the weighting factors for Germany as a whole (redressment factors plus populations size factors East/West) and the redressment factors for all other countries (Great Britain and Northern Ireland separated). W4A (WEIGHT RESULT FROM TARGET – UNITED KINGDOM) combines the weighting factors for the United Kingdom as a whole (redressment factors plus populations size factors) and the redressment factors for all other countries (Germany East and West separated). W3A_W4A (WEIGHT RESULT FROM TARGET – NATION) combines the weighting factors for the United Kingdom as a whole, the weighting factors for Germany as a whole), and the redressment factors for all other countries. Unlike the originating weights, W4 (WEIGHT UNITED KINGDOM ONLY) and W3 (WEIGHT GERMANY ONLY), all countries are included in calculations.

The EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries, of accession or candidate countries, and of Euro zone countries, representing different historical states of European

integration (e.g. EU6 = six founder members) . All post-stratification factors are included.

Table 2: Overview of population size weights on European level

European Weights in Eurobarometer 87.1	Function
W5 to W9, W11, W14, W22, W23, W87	grouping EU member countries
W10, W13, W24, W94	grouping new member countries
-	grouping candidate/accession countries
-	grouping member + candidate/accession countries
W29, W30, W81, W82, W83, W84, W85, W86, W89, W90, W98, W99	grouping (non-)Eurozone countries
wextra	extrapolating population size (15+) for each country

For more detailed information on the individual weights please see the corresponding variable description.

1.8 Data preparation

The data received by the GESIS Eurobarometer Data Service from TNS opinion were checked for completeness, missing data and duplicate records, for illegal (wild) codes and for (formal) consistency of response patterns and question routing. Errors discovered by these procedures are documented or corrected, as a general rule after consulting related additional documentation (e.g. tabular reports) or the data provider. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable DDI-XML compliant documentation was created for this dataset by GESIS.

Starting with Eurobarometer 76.1, the traditional variable naming by serial V-numbers (V1 to Vn) has been replaced by a system based on question and item numbers in the questionnaire and elsewhere on standard mnemo-technical. The dot used in the original TNS variable names for multiple response dummy variables is replaced by underscore in view of potential software incompatibilities.

The archive identification variables comprise the archive study identification number ('studyno'), the digital object identifier ('doi') of the present dataset version, the version number and date ('version') and the edition type ('edition'). A unique case id ('uniqid') for the complete dataset has been constructed from the TNS country id (digits 1-2) and the TNS case/respondent id (digits 3-8).

Three country/sample identification variables are supplied, maintaining the original country/sample codes ('tnscntry'), applying the established archive standard codes for the Eurobarometer series ('country'), and an alphanumerical variable applying the ISO 3166-1 alpha-2 codes ('isocntry') with adaptations for Great Britain and Northern Ireland (ISO 3166-2), for East and West Germany, and for Northern Cyprus (Turkish Cypriot Community).

GESIS added 'Inappropriate' (INAP) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the original questionnaire was adhered to for (almost) every respondent. An additional INAP category was defined whenever a question or group of questions were not surveyed in one or more countries, or if variables refer to country specific items (e.g. region variable P7).

Users should note that answers to multiple-response questions are (originally) represented by a series of binary 'dummy' variables (i.e. variables which take on values of one and zero only), creating separate

'dummy' variables also to explicitly represent 'Don't know', 'No answer/refusal' or other residual responses, such as 'None of the above'. GESIS has recoded these residual responses in the case of uncommon minor inconsistencies in accordance with the series of substantial answers.

GESIS has recoded the missing answers (NA) represented in the original data set by blanks (system missing) to standard values. Their practically complete absence suggests that eventual cases of any not explicitly coded item non-response might be collapsed with the DK (don't know) category.

Question text and contingency text appearing in the variable description is taken from the English language version of the basic (bilingual) questionnaire (master questionnaire). Coding schemes and other documentation are based on the English language version of the basic questionnaire or on the respective SPSS data definition statements as provided by TNS opinion. In case of any discrepancy between questionnaires, SPSS definitions and data regarding the coding scheme of a variable, GESIS, as a general rule, carried out any correction in agreement with the data provider.

If the documentation for country-specific questions or answer categories is provided in another language than English, the archive documents the original language wording and supplies the English translation in brackets.

Region NUTS 2 categories for Portugal have been edited and adapted to changes as of 2002 (NUTS version 2003) which are reflected in Eurobarometer starting with wave 62 (confirmed by TNS). Region NUTS 1 categories for Greece have been edited correcting for the non-coverage of Ionian and Aegean Islands starting with Eurobarometer 62 (confirmed by TNS).

P7 (REGION – NUTS CODES) – variables 'nuts' and 'nutslvl': The integrated NUTS variable has been derived by GESIS from the original TNS country-wise P7 variables in accordance with NUTS units and (alphanumeric) codes defined in the Nomenclature of Territorial Units for Statistics. For each country the lowest subdivision level has been considered insofar consistent with or clearly mappable to one of the NUTS levels as valid for the relevant time period (<https://ec.europa.eu/eurostat/web/nuts/history>).

W3A/W4A (NATION WEIGHTS) – variables 'w3a'/'cntry_de', 'w4a'/'cntry_gb', 'w3a4a'/'nation': Starting with Eurobarometer 62 the original SPECIAL WEIGHTS for the UNITED GERMANY (East + West) and the UNITED KINGDOM (Great Britain + Northern Ireland) automatically exclude all other samples/countries from the calculation. In accordance with former practice up to Eurobarometer 61, GESIS now started to derive three additional weights (W3A, W4A, W3A_W4A) in order to provide for the analysis of the United Kingdom and/or Germany as a whole together with all other samples, as separate countries (nations). They combine the weights W3 (population size + redressment factor for Germany) or/and W4 (population size + redressment factor for the United Kingdom) with W1 (redressment factor for all other countries).

All INDEX and TOTAL variables have been checked and documented accordingly.

More detailed information on data preparation, harmonization or regarding inconsistencies is noted on variable level, if applicable.

1.9 Further remarks

Question module QA 'Two years until the 2019 European elections' was implemented on behalf of and

financed by the European Parliament. It partly replicates questions formerly asked in the framework of Eurobarometer 86.1 (ZA6697) and 84.1 (ZA6596).

Question module QB 'Attitudes of Europeans towards tobacco and electronic cigarettes' is partly based on questions asked in the context of the corresponding module surveyed in the framework of Eurobarometer 82.4 (ZA5933).

Question module QC 'Climate change' is partly based on questions asked in the context of the corresponding module surveyed in the framework of Eurobarometer 83.4 (ZA6595).

Question module QD 'Attitudes towards the impact of digitisation and automation on daily life' is partly based on questions asked in the context of the corresponding module surveyed in the framework of Eurobarometer 82.4 (ZA5933).

Question module QE 'Coach services' was newly introduced.

Starting with Eurobarometer 81.3 (with 84.1 for Germany), the category scheme for country specific protocol variables P6 (SIZE OF COMMUNITY) has changed considerably. Categories for all countries have been harmonized among each other to three values (Rural area - Towns and suburbs/small urban area - Cities/large urban areas).

Starting with Eurobarometer 81.3 the category scheme for country specific protocol variables P7 (REGION) has changed for some countries, in particular introducing NUTS categories for Ireland, Estonia, and Croatia.

Extrapolated population figures as calculated by WEXTRA differ slightly from the population 15+ figures indicated in the technical specifications provided by TNS.

Please note that gen1 to gen6 are based on age instead of year of birth, which may entail a slightly inaccurate categorization for some respondents. Moreover, additional discrepancy in the categorization might be due to the potential use of 2016 as reference year instead of 2017.

70 respondents from PT are coded missing in qb4b ("SMOKING HABITS FORMERLY: ...") due to a translation problem. This also affects qb5b ("SMOKING HABITS FORMERLY: CIGARETTES PER DAY") and qb6b ("CIGARETTE CHARS FORMERLY: ..."). Additionally, 65 respondents from Portugal that are coded missing in original source variable qb5b and the archive version are declared as DK in the recoded version of the original variable, which is included in the tabular volumes. Please note that the recoded variable qb5b_r in the archive dataset is corrected referring to qb5b, therefore coding the 65 respondents from PT as 999 "Inap. (not coded 1-5 in qb4b_1 and qb4b_2) [also see note]". Furthermore, an unusually high number of respondents from PT are coded DK in qb6b, which might indicate that these respondents are missing cases, too. The divergent figures in the report could underline this assumption.

Please note that for summarized variable qd3t 'EFFECTIVE REGULATION OF TECHNOLOGIES - COMBINATIONS (TOTAL)' answers to qd3_4 ('EFFECTIVE REGULATION OF TECH: OTHER (SPONT)') are not excluded from summarized categories.

69 respondents from BE indicate that they trust stories published on online social networks (coded 1 (Mentioned) in qd5.1 to qd5.5), and at the same are coded 1 (Mentioned) in qd5.6 (ONLINE SOC NETWORKS

STORY TRUST: GENERALLY DO NOT TRUST) even though code 6 was specified as exclusive in the questionnaire.

Please note the undocumented filter for variables qd6 (FACT CHECKING WEBSITE USE): Data is available only for respondents that report online social network usage in d62_5 (INTERNET USE FREQ: ONLINE SOC NETWORKS).

Please note the undocumented filter for variables qd17 (CYBER SECURITY ACTION LAST 3YRS) and qd18 (BUYING IT PRODUCTS: ROLE OF SECURITY/PRIVACY): Data is available only for respondents that report internet usage in d62 (INTERNET USE FREQ).

The end-of-fieldwork dates implied by the values in protocol variable p1 (date of interview) differ slightly from those indicated in the technical specifications provided by TNS for some countries.

Numerous missing value definitions have been assigned erroneously in version 1.0.0. The variables were corrected in version 1.1.0.

Weighting variable w3a4a has been erroneous for the United Kingdom in version 1.1.0. The variable was corrected in version 1.2.0.

Variables qb4b7 and qb19r are available in the dataset starting with version v2-0-0.

Data for protocol variables p8 (postal code), p9 (sample point number) and p10 (interviewer number) have not been made available.

2 Eurobarometer series description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general, they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; 'Attitudes towards Europe' (GESIS study ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He had the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid-nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999, the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papacostas as head of unit between 2003 and 2010.

At present, the Eurobarometer surveys are carried out on the general responsibility of the European Commission Directorate-General Communication, COMM.A.3 'Media Monitoring & Eurobarometer', with Maria Letizia Albergati as head of the unit and David Voldies as head of the Eurobarometer sector.

The special topic modules are requested by the respectively responsible EC Directorate General, as regards the content. Since 2007, the European Parliament is commissioning its own survey ('Parlemeter') through the Public Opinion Monitoring Unit of the European Parliament, in close cooperation with the DG COMM unit and within the same survey framework.

The main survey results are regularly published on the European Commission's Public Opinion website (<https://europa.eu/eurobarometer>) in official standard and special topic reports; detailed tabular reports are published through the European Union Open Data Portal (<https://data.europa.eu/data>).

2.4 Development of geographical and population coverage

In all European Union (formerly European Communities) member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics, starting in 1999 (EB51.1). Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the Standard Eurobarometer series, even before starting the accession process (e.g. Turkey or Macedonia). Further countries are continuously added in accordance with the EU membership application and accession process.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriot Community (Northern Cyprus) since 2004 for selected standard and topical waves.

Table 3: EU enlargement and countries covered by Standard and Special Eurobarometer

EU History	Survey (start)	Country (Sample)	ISO Code Alpha-2	Standard Sample Size	Remarks

	EB 82.3 11/2014	<i>Albania (CC as of June 2014)</i>	<i>AL</i>	<i>1000</i>	<i>Standard modules</i>

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 4: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24, 16-30	17, 28.1, 34.2, 47.2OVR, 55.1OVR, 85.1OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.2OVR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)
Sampling experiment	Non-Nationals	41.0

2.5 Standard question program and special topics

The Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently, Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990), additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues (table 5). Selected subsets of standard trend questions appear in the context of related special topics (e.g. 'The Future of Europe' or 'European Parliament Eurobarometer').

Table 5: Overview of Eurobarometer surveys with standard EU and trend question modules

Standard and EU trend surveys	Fieldwork	GESIS Study ID	Standard Report	Subset	Special Topic
Eurobarometer 93.1	July-Aug 2020	ZA7649	X

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <https://www.gesis.org/eurobarometer-data-service/home/>

3 Dataset structure and standards

The processing and documentation of the Standard and Special Eurobarometer are based on standards agreed upon between the Inter-university Consortium for Political and Social Research (ICPSR) and the GESIS Eurobarometer Data Service, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable, it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structures

In general, the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of administrative/technical variables. These comprise the ARCHIVE and dataset ID variables (studyno1, studyno2, doi, version, edition, survey, split (if applicable), caseid, uniqid), the COUNTRY ID variables with several standard variables identifying the different countries (or sub-national samples) and relevant groups of countries (or sub-national samples) in the dataset, arranged in pairs with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric variable ('isocntry') is provided based on the ISO 3166 country code standard (see 1.8).

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). Starting with Eurobarometer 76.1, the traditional variables naming by serial V-numbers (V1 to Vn) is replaced by a system based on question and item numbers in the questionnaire and elsewhere on standard mnemo-technicals (see 1.8). Likewise, from survey 76.1 onwards, constructed total or index variables, usually as provided by the fieldwork institute, are listed right after the question variables on which they are based. The dataset is concluded by three additional weights and their corresponding NATION country variables 'w3a'/'cntry_de', 'w4a'/'cntry_gb', 'w3a4a'/'nation' (see 1.8).

Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 und up to wave 75 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except for multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country

specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49, the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes provided in the questionnaire remain comparable.

Starting with Eurobarometer 74.1, an additional standardized REGION variable 'nuts' (REGION - NUTS CODES) is constructed, integrating all participating countries with regional units defined in accordance with the EUROSTAT Nomenclature of Territorial Units for Statistics (NUTS). For each country the lowest available NUTS subdivision level is considered, whereby the hierarchical structure always implies all higher subdivision levels. The official NUTS codes are coded verbatim in accordance with the in each case valid (applicable) NUTS version as documented in the official EUROSTAT classification history (History of NUTS). A second variable indicates the lowest coded NUTS LEVEL 'nutslvl' for each country. All original regional subdivisions and categories remain coded separately and unchanged in the country-wise P7 variables. Details are documented with the respective country specific and/or integrated variable.

3.2.2 Missing values

In general, missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ('don't know') responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. 'not ascertained' resp. 'no answer') and the value 9 (99, 999, ...) for INAP (i.e. 'inappropriate' resp. 'not applicable'). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or 'level', e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

As noted in chapter 1.8, missing answers (NA) represented in the original dataset by blanks (system missing) have been recoded to standard values by GESIS. Their practically complete absence suggests that eventual cases of any not explicitly coded item non-response might be collapsed with the DK (don't know) category.

3.3 International documentation standard (DDI)

The study and variable level documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The variable level documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (COUNTRY CODE - ISO 3166). In the case of Greece the non-ISO abbreviation EL* is used in parallel, as introduced by EUROSTAT as of NUTS version 2010.

AL	Albania	IE	Ireland
AT	Austria	IT	Italy
BE	Belgium	IS	Iceland
BG	Bulgaria	LT	Lithuania
CY	Cyprus	LU	Luxembourg
CY-TCC	Turkish Cypriote Community	LV	Latvia
CZ	Czech Republic	ME	Montenegro
DE	Germany (-1989)	MK	Macedonia FYROM)
DE-W	Germany West (1990 ff.)	MT	Malta
DE-E	Germany East (1990 ff.)	NL	The Netherlands
EE	Estonia	NO	Norway
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	RS	Serbia
GB-GBN	Great Britain	SE	Sweden
GB-NIR	Northern Ireland	SI	Slovenia
GR / EL*	Greece	SK	Slovakia
HR	Croatia	TR	Turkey
HU	Hungary		

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded 'real' values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission's official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

Header with DIGITAL OBJECT IDENTIFIER (DOI) linked to the study description in the GESIS Data Catalogue. CROSS-TABULATION: The absolute frequencies of the occurrence of values (<i>absolute values</i>) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies (<i>row percent</i>) refer to the valid cases (<i>n valid sum</i>), i.e. the total number of cases (<i>n sum</i>) reduced by the number of cases defined as missing data (<i>M</i>). For display and place saving reasons excluded countries or areas may be completely dropped from the table.																																																																																																																																																																																																																																																																															
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (<i>M</i>), i.e. <i>percent</i> on the basis of all cases (<i>sum</i>) and <i>valid percent</i> on the basis of the <i>valid cases</i> .																																																																																																																																																																																																																																																																															

5 Variable documentation

Variable, Label

Question Text (English Language)

studyno1 - ARCHIVE STUDY NUMBER - DISTRIBUTOR

Archive study number – distributor

Study number of the distributing data archive.

6861 GESIS STUDY ID ZA6861

studyno1

Value	Label	Missing	Count	Percent	Valid Percent
6861	GESIS STUDY ID ZA6861		27901	100.0	100.0
	Sum		27901	100.0	100.0
	Valid Cases		27901		

studyno2 - ARCHIVE STUDY NUMBER - PUBLISHER

Archive study number – publisher

Study number of the data archive which is publishing this dataset version.

6861 GESIS STUDY ID ZA6861

studyno2

Value	Label	Missing	Count	Percent	Valid Percent
6861	GESIS STUDY ID ZA6861		27901	100.0	100.0
	Sum		27901	100.0	100.0
	Valid Cases		27901		

doi - DIGITAL OBJECT IDENTIFIER

Digital object identifier

This variable holds the Digital Object Identifier (DOI) for the dataset at hand as registered via the da|ra registration agency for economic and social science data. Each dataset version (see variable 'version') has a unique persistent DOI.

For direct access to the complete archive dissemination package for this study, including new dataset versions, the DOI needs to be appended to the resolver service URL: <http://dx.doi.org/doi:10.4232/1.13738>

In terms of good scientific practice, the DOI is an important element for the correct citation of a dataset.

doi

Value	Label	Missing	Count	Percent	Valid Percent
doi:10.4232/1.13738			27901	100.0	100.0
	Sum		27901	100.0	100.0
	Valid Cases		27901		

version - GESIS ARCHIVE VERSION & DATE

GESIS archive version & date

2.0.0 '2021-06-17'

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

For details of the version history and for information on errata in current or former dataset versions, please consult the GESIS data catalogue entry (study description) persistently referenced by the dataset DOI (Digital Object Identifier).

version

Value	Label	Missing	Count	Percent	Valid Percent
2.0.0 (2021-06-17)			27901	100.0	100.0
	Sum		27901	100.0	100.0
	Valid Cases		27901		

edition - DATASET EDITION

Dataset edition

This variable identifies the type of archive release for the dataset at hand.

1 Archive pre-release

2 Archive edition

edition

Value	Label	Missing	Count	Percent	Valid Percent
2	ARCHIVE EDITION		27901	100.0	100.0
	Sum		27901	100.0	100.0
	Valid Cases		27901		

survey - SURVEY IDENTIFICATION

Survey identification

The number identifying the Eurobarometer survey.

871 Eurobarometer 87.1 (March 2017)

survey

Value	Label	Missing	Count	Percent	Valid Percent
871	Eurobarometer 87.1 (March 2017)		27901	100.0	100.0
	Sum		27901	100.0	100.0
	Valid Cases		27901		

caseid - TNS CASE ID (SEE NOTE)

TNS case ID

The original non-unique case (interview) identification numbers as provided by the fieldwork institute (TNS). The unique respondent identification variable unqid adds the original country identification codes (tnscntry) as a prefix to the original case ID numbers in order to make them unique.

Note:

Actual number is coded.

For Eurobarometer 87.1 no country specific TNS case id for DE-W, DE-E and GB-GBN is provided (variable 'caseid' is coded '9999999', variable unqid is coded '999999999'). The dataset does include an original unique serial id across all countries (variable 'serialid').

uniqid - UNIQUE RESPONDENT ID (CASEID BY TNS COUNTRY CODE) (SEE NOTE)

Unique respondent ID (caseid by tnsctry)

This unique respondent identification is composed of the original TNS country code and the original TNS interview number. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 04: Greece; 05: Spain; 06: Finland; 07: France; 08: Ireland; 09: Italy; 10: Luxembourg; 11: Netherlands; 12: Austria; 13: Portugal; 14: Sweden; 20: Germany West; 21: Germany East; 22: Great Britain; 23: Northern Ireland; 31: Bulgaria; 32: Cyprus (Republic); 33: Czech Republic; 34: Estonia; 35: Hungary; 36: Latvia; 37: Lithuania; 38: Malta; 39: Poland; 40: Romania; 41: Slovakia; 42: Slovenia; 46: Croatia). The remaining digits contain the country-specific questionnaire numbers.

Note:

Actual number is coded.

For Eurobarometer 87.1 no country specific TNS case id for DE-W, DE-E and GB-GBN is provided (variable 'caseid' is coded '9999999', variable uniqid is coded '999999999'). The dataset does include an original unique serial id across all countries (variable 'serialid').

serialid - SERIAL CASE ID (APPOINTED BY TNS)

Serial case ID (provided by TNS)

This unique respondent identification number has been provided by TNS. It shows the position of the cases in the dataset, starting with 1 and ending with 27901 (total number of cases).

Note:

Actual number is coded.

tnscntry - ORIGINAL TNS COUNTRY/SAMPLE ID

Original TNS country/sample ID

The original country identification codes as applied by the fieldwork institute (TNS).

isocntry - COUNTRY CODE - ISO 3166

Country code - in accordance with ISO 3166-1-alpha-2 country code

All surveyed countries and regions, i.e. including separate samples for East-/West-Germany, Great Britain/Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the 'historical' East/West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized 'Turkish Republic of Northern Cyprus'.

Note:

Use of weighting factor w1 is optional.

w1 - WEIGHT RESULT FROM TARGET

w1 Weight result from target

This POST-STRATIFICATION WEIGHT is based on a comparison for each sample with the respective universe description. As such in all countries, gender, age, region and size of locality are introduced in the iteration procedure carried out by the fieldwork institutes.

British and Northern Irish as well as East and West German samples are weighted separately. The weight reproduces the real number of cases for each country. In terms of its general function it corresponds to former NATION WEIGHT II (until EUROBAROMETER 31 (March-April 1989)).

w5 - WEIGHT EU6

w5 Weight EU6

This POPULATION SIZE WEIGHT refers to the six EC founder members: France, Belgium, Netherlands, West Germany, Italy, and Luxembourg. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w5 must be applied whenever these six EC founder countries are to be analyzed altogether as a group.

w6 - WEIGHT EU9

w6 Weight EU9

This POPULATION SIZE WEIGHT adds Denmark, Ireland, Great Britain and Northern Ireland to the EU6 countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w6 must be applied whenever these nine countries as of the 1973 enlargement are to be analyzed altogether as a group.

w9 - WEIGHT EU12+DE-E

w9 Weight EU12 + DE-E

This POPULATION SIZE WEIGHT equals WEIGHT EU12 but in addition including East Germany (former German Democratic Republic) after the unification of Germany on October 3, 1990 (Eurobarometer 34 (October-November 1990)). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w9 must be applied whenever these twelve member countries are to be analyzed altogether as a group including the Eastern part of Germany (new German federal states).

w11 - WEIGHT EU15

w11 Weight EU15

This POPULATION SIZE WEIGHT adds Austria, Finland, and Sweden to the EU12+DE-E countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w11 must be applied whenever these 15 countries as of the 1995 enlargement are to be analyzed altogether as a group.

w23 - WEIGHT EU28 (EU27 + HR)

w23 Weight EU28 (EU27 + HR)

WEIGHT EU28 (EU27 + HR) includes all 25 member countries after the 2004 enlargement, the new members as of 2007 Romania and Bulgaria, and Croatia as the new member as of July 2013. This POPULATION SIZE WEIGHT adjusts each national sample in proportion to its share in the total population aged 15 and over, of NATION GROUP EU28 (EU27 + HR). The post-stratification weighting factors are included. Weight w23 must be applied whenever these countries are to be analyzed altogether as a group.

w24 - WEIGHT EU NMS 12

w24 Weight EU NMS 12

This POPULATION SIZE WEIGHT refers to the group of the 12 new member countries as of the enlargement in January 2007: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia, Bulgaria and Romania. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w24 must be applied whenever these 12 countries are to be analyzed altogether as a group.

w29 - WEIGHT EURO ZONE 15 (EU27)

w29 Weight EURO ZONE 15 (EU27)

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2008. These are 15 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w29 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

w30 Weight NON-EURO ZONE 15 (EU27)

This POPULATION SIZE WEIGHT separates the group of countries (Denmark, United Kingdom, Sweden, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Slovakia, Bulgaria, Romania) which did not introduce the EURO up to January 1, 2008. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w30 must be applied whenever these countries are to be analyzed altogether as a group.

w98 - WEIGHT EURO ZONE 18 (EU28)

w98 Weight EURO ZONE 18 (EU28)

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2014. These are 18 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008), Slovakia (introduction as of January 1, 2009), Estonia (introduction as of January 1, 2011), and Latvia (introduction as of January 1, 2014). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w98 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

w85 - WEIGHT EURO ZONE 19 (EU28)

w85 Weight EURO ZONE 19 (EU28)

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2015. These are 18 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008), Slovakia (introduction as of January 1, 2009), Estonia (introduction as of January 1, 2011), Latvia (introduction as of January 1, 2014), and Lithuania (introduction as of January 1, 2015). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w85 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

w86 - WEIGHT NON-EURO ZONE 19 (EU28)

w86 Weight NON-EURO ZONE 19 (EU28)

This POPULATION SIZE WEIGHT separates the group of countries (Denmark, United Kingdom, Sweden, Czech Republic, Hungary, Poland, Bulgaria, Romania, Croatia) which did not introduce the EURO up to January 1, 2015. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. It refers to the group of the EU28 countries including Croatia. Weight w86 must be applied whenever these countries are to be analyzed altogether as a group.

w94 - WEIGHT EU NMS 13

w94 Weight EU NMS 13

This POPULATION SIZE WEIGHT refers to the group of the 13 new member countries as of the enlargement in January 2007 and the accession of Croatia in July 2013: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia, Bulgaria, Romania, and Croatia. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w94 must be applied whenever these 13 countries are to be analyzed altogether as a group.

wextra - WEIGHT EXTRAPOLATED POPULATION 15+

wextra Weight extrapolated population 15+

Weight wextra extrapolates the actual universe (population aged 15 or more) for each country (sample), i.e. this weight variable integrates all other available weights, but does not reproduce the number of cases in the dataset.

Note:

For Eurobarometer 87.1 the extrapolated population figures as calculated by WEXTRA differ slightly from the population 15+ figures per country indicated in the technical specifications provided by TNS.

d11r1 - AGE: 4 GROUPS (RECODED)

Age of respondent - recoded to four categories

- 1 15 - 24 years
- 2 25 - 39 years
- 3 40 - 54 years
- 4 55 years and older [see code 99 in d11]

Derivation:

This variable collapses answers to d11 into four categories.

[d11 How old are you?]

Note:

See d11 for the complete question text.

d11r2 - AGE: 6 GROUPS (RECODED)

Age of respondent - recoded to six categories

- 1 15 - 24 years
- 2 25 - 34 years
- 3 35 - 44 years
- 4 45 - 54 years
- 5 55 - 64 years
- 6 65 years and older [see code 99 in d11]

Derivation:

This variable collapses answers to d11 into six categories.

[d11 How old are you?]

Note:

See d11 for the complete question text.

gen1 - GENERATION BEFORE 1928 (AGE 88 AND OLDER)

Generation born before 1928 (age 88 and older)

0 Not mentioned

1 Mentioned [incl. '99' in d11]

Derivation:

This variable summarizes all respondents born before 1928 and is based on questions d11 ('How old are you?'). Please note that variables gen1 to gen6 are based on age instead of year of birth, which may entail a slightly inaccurate categorization for some respondents. Moreover, additional discrepancy in the categorization might be due to the potential use of 2016 as reference year instead of 2017.

Note:

See d11 for the complete question text.

gen4 - GENERATION 1946-1964 (AGE 51-69)

Generation born between 1946 and 1964 (age 51-69) - "Babyboomer generation"

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes all respondents born between 1946 and 1964 and is based on questions d11 ('How old are you?'). Please note that variables gen1 to gen6 are based on age instead of year of birth, which may entail a slightly inaccurate categorization for some respondents. Moreover, additional discrepancy in the categorization might be due to the potential use of 2016 as reference year instead of 2017.

Note:

See d11 for the complete question text.

d15a - OCCUPATION OF RESPONDENT

D15A

What is your current occupation?

(DO NOT SHOW SCREEN – 'NO ANSWER' NOT ALLOWED - IF D15A=2 THEN D8=00 - IF D15<>2 AND D8=00 THEN CORRECT D8 OR CHANGE THE ANSWER IN D15A)

NON-ACTIVE

- 1 Responsible for ordinary shopping and looking after the home, or without any current occupation, not working
- 2 Student
- 3 Unemployed or temporarily not working
- 4 Retired or unable to work through illness

SELF EMPLOYED

- 5 Farmer
- 6 Fisherman
- 7 Professional (lawyer, medical practitioner, accountant, architect, etc.)
- 8 Owner of a shop, craftsmen, other self-employed person
- 9 Business proprietors, owner (full or partner) of a company

EMPLOYED

- 10 Employed professional (employed doctor, lawyer, accountant, architect)
- 11 General management, director or top management (managing directors, director general, other director)
- 12 Middle management, other management (department head, junior manager, teacher, technician)
- 13 Employed position, working mainly at a desk
- 14 Employed position, not at a desk but travelling (salesmen, driver, etc.)
- 15 Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, etc.)
- 16 Supervisor
- 17 Skilled manual worker
- 18 Other (unskilled) manual worker, servant

Comparability:

d15a_r1 - OCCUPATION OF RESPONDENT (RECODED)

Occupation of respondent - recoded to employment status

- 1 Self-employed (coded 5 to 9 in d15a)
- 2 Employed (coded 10 to 18 in d15a)
- 3 Not working (coded 1 to 4 in d15a)

Derivation:

This variable collapses answers to d15a into three categories.

[d15a What is your current occupation?]

Note:

See d15a for the complete question text.

d15a_r2 - RESPONDENT OCCUPATION SCALE (C14)

Occupation of respondent - scale (C14)

- 1 Self-employed (coded 5 to 9 in d15a)
- 2 Managers (coded 10 to 12 in d15a)
- 3 Other white collars (coded 13 or 14 in d15a)
- 4 Manual workers (coded 15 to 18 in d15a)
- 5 House persons (coded 1 in d15a)
- 6 Unemployed (coded 3 in d15a)
- 7 Retired (coded 4 in d15a)
- 8 Students (coded 2 in d15a)

Derivation:

This scale is based on a combination/selection of answers to variable d15a.

[d15a What is your current occupation?]

Note:

See d15a for the complete question text.

d15b - OCCUPATION OF RESPONDENT - LAST JOB

[D15A

What is your current occupation?]

D15B

ASK D15B IF 'NOT DOING ANY PAID WORK CURRENTLY', CODES 1 TO 4 IN D15A

Did you do any paid work in the past? What was your last occupation?

(DO NOT SHOW SCREEN – 'NO ANSWER' NOT ALLOWED)

SELF EMPLOYED

- 1 Farmer
- 2 Fisherman
- 3 Professional (lawyer, medical practitioner, accountant, architect, etc.)
- 4 Owner of a shop, craftsmen, other self-employed person
- 5 Business proprietors, owner (full or partner) of a company

EMPLOYED

- 6 Employed professional (employed doctor, lawyer, accountant, architect)
- 7 General management, director or top management (managing directors, director general, other director)
- 8 Middle management, other management (department head, junior manager, teacher, technician)
- 9 Employed position, working mainly at a desk
- 10 Employed position, not at a desk but travelling (salesmen, driver, etc.)
- 11 Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, etc.)
- 12 Supervisor
- 13 Skilled manual worker
- 14 Other (unskilled) manual worker, servant

15 Never did any paid work

99 Inap. Currently doing paid work (not coded 1 to 4 in d15a)

Note:

In accordance with former waves coding has been (correctly) shifted compared to the questionnaire.

Comparability:

Last trend: EB86.3, D15B

d15b_r - OCCUPATION OF RESPONDENT - LAST JOB (RECODED)

Occupation of respondent: last job - recoded to employment status

- 1 Self-employed (coded 1 to 5 in d15b)
- 2 Employed (coded 6 to 14 in d15b)
- 3 Never paid work (coded 15 in d15b)
- 9 Inap. Currently doing paid work (not coded 1 to 4 in d15a)

Derivation:

This variable collapses answers to d15b into three categories.

[d15b Did you do any paid work in the past? What was your last occupation?]

Note:

See d15b for the complete question text.

d62_3 - INTERNET USE FREQ: ON MOBILE DEVICE

D62

Could you tell me if you use the internet ...?

(SHOW SCREEN – READ OUT – ONE ANSWER PER LINE - 'NO ANSWER' NOT ALLOWED)

D62_3 You use the Internet on your mobile device (laptop, smartphone, tablet, etc.)

- 1 Everyday/Almost everyday
- 2 Two or three times a week
- 3 About once a week
- 4 Two or three times a month
- 5 Less often
- 6 Never
- 7 No Internet access (SPONTANEOUS)

Comparability:

d62t1 - INTERNET USE - INDEX 1 (4 CAT)

Frequency of internet use - index with four categories

- 1 Everyday/Almost everyday (at least once coded 1 in d62_1 to d62_5)
- 2 Often/sometimes (at least once coded 2 to 5 in d62_1 to d62_5)
- 3 Never/No access (coded 6/7 or coded 6 in d62_1 to d62_5)
- 4 No internet access at all (coded 7 in d62_1 to d62_5)

Derivation:

This variable summarizes responses to d62 in four categories.

[d62 Could you tell me if you use the internet ...?

d62_1 You use the Internet at home, in your home

d62_2 You use the Internet on your place of work

d62_3 You use the Internet on your mobile device (laptop, smartphone, tablet, etc.)

d62_4 You use the Internet somewhere else (school, university, cyber-café, etc.)

d62_5 You use online social networks]

Respondents coded 1 at least once in d62_1 to d62_5 are coded 1 in d62t1 ('Everyday/Almost everyday'). Respondents coded 2, 3, 4 or 5 in each variable d62_1 to d62_5 are coded 2 ('Often/sometimes') in d62t1. Respondents coded 6 ('Never') in each variable d62_1 to d62_5 are coded 3 ('Never to all') in d62t1. Respondents coded 6 ('Never') in each variable d62_1 to d62_5, or at least once coded 6 in d62_1 to d62_5 and coded 7 ('No internet access') in the other variable(s), are coded 3 ('Never/No access') in d62t1. Respondents coded 7 ('No internet access') in each variable d62_1 to d62_5 are coded 4 ('No internet access at all') in d62t1.

Note:

See d62 for the complete question text.

Please note that categories 3 and 4 of index variable d62t1 in EB 87.1 might differ from former surveys.

Variable d62t1 was named d62t in former versions of this dataset.

d62t2 - INTERNET USE - INDEX 2 (7 CAT)

Frequency of internet use - index with seven categories

- 1 Everyday/Almost everyday (at least once coded 1 in d62_1 to d62_5)
- 2 Two or three times a week (not coded 1 and at least once coded 2 in d62_1 to d62_5)
- 3 About once a week (not coded 1 to 2 and at least once coded 3 in d62_1 to d62_5)
- 4 Two or three times a month (not coded 1 to 3 and at least once coded 4 in d62_1 to d62_5)
- 5 Less often (not coded 1 to 4 and at least once coded 5 in d62_1 to d62_5)
- 6 Never/No access (coded 6/7 or coded 6 in d62_1 to d62_5)
- 7 No Internet access at all (coded 7 in d62_1 to d62_5)

Derivation:

This variable summarizes responses to d62.

[d62 Could you tell me if you use the internet ...?

d62_1 You use the Internet at home, in your home

d62_2 You use the Internet on your place of work

d62_3 You use the Internet on your mobile device (laptop, smartphone, tablet, etc.)

d62_4 You use the Internet somewhere else (school, university, cyber-café, etc.)

d62_5 You use online social networks]

Respondents coded 1 at least once in d62_1 to d62_5 are coded 1 in d62t2 ('Everyday/Almost everyday'). Respondents coded 2 at least once in d62_1 to d62_5 and not coded 1, are coded 2 in d62t2 ('Two or three times a week'). Respondents coded 3 at least once in d62_1 to d62_5 and not coded 1 or 2, are coded 3 in d62t2 ('About once a week'). Respondents coded 4 at least once in d62_1 to d62_5 and not coded 1 to 3, are coded 4 in d62t2 ('Two or three times a month'). Respondents coded 5 at least once in d62_1 to d62_5 and not coded 1 to 4, are coded 5 in d62t2 ('Less often'). Respondents coded 6 ('Never') in each variable d62_1 to d62_5, or at least once coded 6 in d62_1 to d62_5 and coded 7 ('No internet access') in the other variable(s), are coded 6 ('Never/No access') in d62t2. Respondents coded 7 ('No internet access') in each variable d62_1 to d62_5 are coded 7 ('No internet access at all') in d62t2.

Note:

See d62 for the complete question text.

Generated by GESIS in accordance with former surveys.

Variable d62t2 was named netuse in former versions of this dataset.

qa10t_1 - EP KNOWLEDGE: AT LEAST ONE CORRECT ANSWER

European Parliament knowledge - At least one correct answer

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes answers to qa10_1 to qa10_3. It subsumes respondents who are coded at least one correct answer.

[qa10 For each of the following statements about the EU could you please tell me whether you think it is true or false.

qa10_1 The European Parliament elects the President of the European Commission

qa10_2 In the European Union, legislation is decided jointly by the European parliament and the Member States

qa10_3 Each Member State has the same number of Members of the European Parliament]

Note:

See qa10 for the complete question text.

Variable qa10t_1 was named qa10r.1 in former versions of the dataset.

qa10t_7 - EP KNOWLEDGE: AT LEAST ONE DK ANSWER

European Parliament knowledge - At least one 'DK' answer

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes answers to qa10_1 to qa10_3. It subsumes respondents who are coded at least one 'DK' answer.

[qa10 For each of the following statements about the EU could you please tell me whether you think it is true or false.

qa10_1 The European Parliament elects the President of the European Commission

qa10_2 In the European Union, legislation is decided jointly by the European parliament and the Member States

qa10_3 Each Member State has the same number of Members of the European Parliament]

Note:

See qa10 for the complete question text.

Variable qa10t_7 was named qa10r.7 in former versions of the dataset.

euknowl - OBJECTIVE KNOWLEDGE OF THE EU (SUMMARIZED)

Objective knowledge of the European Union - index

- 1 Bad (no correct answer / DK)
- 2 Average (one or two correct answers)
- 3 Good (three correct answers)

Derivation:

This variable is based on the answers to the following questions:

[qa10 For each of the following statements about the EU could you please tell me whether you think it is true or false.

qa10_1 The European Parliament elects the President of the European Commission

qa10_2 In the European Union, legislation is decided jointly by the European parliament and the Member States

qa10_3 Each Member State has the same number of Members of the European Parliament]

Respondents coded no correct answer or DK in each variable qa10_1 to qa10_3 are coded 1 ('Bad') in index variable euknowl. Respondents coded one or two correct answers in qa10_1 to qa10_3 are coded 2 ('Average') in index variable euknowl. Respondents coded three correct answers in qa10_1 to qa10_3 are coded 3 ('Good') in index variable euknowl.

Note:

See qa10 for the complete question text.

Variable euknowl has been generated by GESIS to make consistent with former waves.

qb2a - SMOKING - AGE WHEN STARTED

QB2A

ASK QB2A IF 'SMOKER OR EX-SMOKER', CODE 1 OR 2 IN QB1

How old were you when you started smoking on a regular basis, i.e at least once a week?

(WRITE DOWN THE ANSWER IN YEARS - IF 'REFUSAL' CODE '98'; IF 'DK' CODE '99' - CANNOT BE LARGER THAN D11 - USE CODE '98' FOR 'REFUSAL' - USE CODE '99' FOR 'DK')

1 One year old

77 77 years old

97 Refusal

98 DK

99 Inap. Never smoked or DK (not coded 1 or 2 in qb1)

Note:

Original code '98' recoded to '97'.

Original code '99' recoded to '98'.

Actual number is coded.

Please note that some respondents stated implausible values in variable qb2a as age when started smoking (e.g. '1', '2', '3').

Comparability:

Last trend: EB82.4, QC2

qb2a_r1 - SMOKING - AGE WHEN STARTED (RECODE 1)

Age when respondent started smoking - recoded (1)

- 1 Less than 15 years old
- 2 Between 15 and 18 years old
- 3 Between 19 and 25 years old
- 4 Older than 25 years old
- 7 Refusal
- 8 DK
- 9 Inap. Never smoked or DK (not coded 1 or 2 in qb1)

Derivation:

This variable groups answers to question qb2a.

[qb2a How old were you when you started smoking on a regular basis, i.e at least once a week?]

Note:

See qb2a for the complete question text.

Please note that some respondents stated implausible values in variable qb2a as age when started smoking (e.g. '1', '2', '3').

qb2b - NON-SMOKERS: SMOKING EXPERIENCE

QB2B

ASK QB2B IF 'NEVER SMOKED'; CODE 3 IN QB1

You said that you have never smoked. Could you please specify what is your experience with cigarettes, cigars, cigarillos or a pipe?

(READ OUT – ONE ANSWER ONLY)

- 1 You have never tried any of these products
- 2 You have tried at least one of these products once or twice
- 3 You used to smoke at least one of them but no longer do so
- 4 You smoke at least one of these products from time to time
- 5 Other (SPONTANEOUS)
- 6 DK
- 9 Inap. Smoker, ex-smoker or DK (not coded 3 in qb1)

qb3 - SMOKING - AGE WHEN STOPPED

QB3

ASK QB3 IF 'USED TO SMOKE'; CODE 2 IN QB1

And how old were you when you stopped smoking?

(CANNOT BE LARGER THAN D11 - CANNOT BE SMALLER THAN QB2A - USE CODE '98' FOR 'REFUSAL' - USE CODE '99' FOR 'DK' - CODE THE ANSWER IN YEARS GIVEN BY THE RESPONDENT - IF 'REFUSAL' CODE '98' - IF 'DK' CODE '99')

8 8 years old

88 88 years old

97 Refusal (SPONTANEOUS)

98 DK

99 Inap. Smoker, never smoked or DK (not coded 2 in qb1)

Note:

Original code '98' recoded to '97'.

Original code '99' recoded to '98'.

Actual number is coded.

qb3r - SMOKING - AGE WHEN STOPPED (RECODE)

Age when respondent stopped smoking - recoded

- 1 Less than 25 years old
- 2 Between 25 and 39 years old
- 3 Between 40 and 54 years old
- 4 Older than 54 years old
- 7 Refusal
- 8 DK
- 9 Inap. Smoker, never smoked or DK (not coded 2 in qb1)

Derivation:

This variable groups answers to question qb3.

[qb3 And how old were you when you stopped smoking?]

Note:

See qb3 for the complete question text.

qb3t1 - SMOKING - LENGTH OF TIME SINCE STOPPED

Length of time since stopped smoking - summarized

- 1 2 or less years
- 2 3-5 years
- 3 6-10 years
- 4 11-20 years
- 5 More than 20 years
- 7 Refusal
- 8 DK
- 9 Inap. Smoker, never smoked or DK (not coded 2 in qb1)

Derivation:

This variable is based on the answers to questions qb3 and d11.

[qb3 And how old were you when you stopped smoking?

d11 How old are you?]

Note:

See qb3 and d11 for the complete question text.

qb3t2 - SMOKING - FORMER LENGTH OF TIME AS SMOKER

Former length of time as a smoker - summarized

- 1 2 or less years
- 2 3-5 years
- 3 6-10 years
- 4 11-20 years
- 5 More than 20 years
- 7 Refusal/DK
- 9 Inap. Smoker, never smoked or DK (not coded 2 in qb1)

Derivation:

This variable is based on the answers to questions qb2a and qb3.

[qb2a How old were you when you started smoking on a regular basis, i.e at least once a week?

qb3 And how old were you when you stopped smoking?]

Note:

See qb2a and qb3 for the complete question text.

qb4a_t - SMOKING HABITS CURRENTLY: AT LEAST ONE (SUM)

Current smoking habits: frequency of use of tobacco products (at least one) summarized

- 1 Every day
- 2 Every week
- 3 Every month
- 4 Less than monthly
- 5 You tried only once or twice
- 6 Never
- 7 Refusal (SPONTANEOUS)
- 9 Inap. Never smoked and do not smoke occasionally (not coded 1 in qb1 and not coded 4 in qb2b)

Derivation:

This variable groups answers to question qb4a.

[qb4a How often do you use the following tobacco products?

qb4a_1 Boxed cigarettes]

qb4a_2 Hand-rolled cigarettes

qb4a_3 Cigarillos (this excludes cigars)

qb4a_4 Cigars (this excludes cigarillos)

qb4a_5 Pipe]

Note:

See qb4a for the complete question text.

qb4b_1 - SMOKING HABITS FORMERLY: BOXED CIGARETTES

QB4B

ASK QB4B IF USED TO 'SMOKE', CODE 2 IN QB1 OR IF 'SMOKED OCCASIONALLY', CODE 3 IN QB2B

How often did you use the following tobacco products?

(SHOW SCREEN – READ OUT – ONE ANSWER PER LINE - DISPLAY '98' INSTEAD OF 'REFUSAL')

QB4B_1 Boxed cigarettes

- 1 Every day
- 2 Every week
- 3 Every month
- 4 Less than monthly
- 5 You have tried only once or twice
- 6 Never
- 7 Refusal (SPONTANEOUS)
- 9 Inap. Smoker, never smoked and never tried occasionally (not coded 2 in qb1 and not coded 3 in qb2b) [also see note]

Note:

70 respondents from PT are coded missing in qb4b ('SMOKING HABITS FORMERLY: ...') due to a translation problem. This also affects qb5b ('SMOKING HABITS FORMERLY: CIGARETTES PER DAY') and qb6b ('CIGARETTE CHARS FORMERLY: ...'). Additionally, 65 respondents from Portugal that are coded missing in original source variable qb5b and the archive version are declared as DK in the recoded version of the original variable, which is included in the tabular volumes. Please note that the recoded variable qb5b_r in the archive dataset is corrected referring to qb5b, therefore coding the 65 respondents from PT as 999 'Inap. (not coded 1-5 in qb4b_1 and qb4b_2) [also see note/errata]'. Furthermore, an unusually high number of respondents from PT are coded DK in qb6b, which might indicate that these respondents are missing cases, too. The divergent figures in the report could underline this assumption.

qb4b_2 - SMOKING HABITS FORMERLY: HAND-ROLLED CIGARETTES

QB4B

ASK QB4B IF USED TO 'SMOKE', CODE 2 IN QB1 OR IF 'SMOKED OCCASIONALLY', CODE 3 IN QB2B

How often did you use the following tobacco products?

(SHOW SCREEN – READ OUT – ONE ANSWER PER LINE - DISPLAY '98' INSTEAD OF 'REFUSAL')

QB4B_2 Hand-rolled cigarettes

- 1 Every day
- 2 Every week
- 3 Every month
- 4 Less than monthly
- 5 You have tried only once or twice
- 6 Never
- 7 Refusal (SPONTANEOUS)
- 9 Inap. Smoker, never smoked and never tried occasionally (not coded 2 in qb1 and not coded 3 in qb2b) [also see note]

Note:

70 respondents from PT are coded missing in qb4b ('SMOKING HABITS FORMERLY: ...') due to a translation problem. This also affects qb5b ('SMOKING HABITS FORMERLY: CIGARETTES PER DAY') and qb6b ('CIGARETTE CHARS FORMERLY: ...'). Additionally, 65 respondents from Portugal that are coded missing in original source variable qb5b and the archive version are declared as DK in the recoded version of the original variable, which is included in the tabular volumes. Please note that the recoded variable qb5b_r in the archive dataset is corrected referring to qb5b, therefore coding the 65 respondents from PT as 999 'Inap. (not coded 1-5 in qb4b_1 and qb4b_2) [also see note/errata]'. Furthermore, an unusually high number of respondents from PT are coded DK in qb6b, which might indicate that these respondents are missing cases, too. The divergent figures in the report could underline this assumption.

qb4b_4 - SMOKING HABITS FORMERLY: CIGARS

QB4B

ASK QB4B IF USED TO 'SMOKE', CODE 2 IN QB1 OR IF 'SMOKED OCCASIONALLY', CODE 3 IN QB2B

How often did you use the following tobacco products?

(SHOW SCREEN – READ OUT – ONE ANSWER PER LINE - DISPLAY '98' INSTEAD OF 'REFUSAL')

QB4B_4 Cigars (this excludes cigarillos)

- 1 Every day
- 2 Every week
- 3 Every month
- 4 Less than monthly
- 5 You have tried only once or twice
- 6 Never
- 7 Refusal (SPONTANEOUS)
- 9 Inap. Smoker, never smoked and never tried occasionally (not coded 2 in qb1 and not coded 3 in qb2b) [also see note]

Note:

70 respondents from PT are coded missing in qb4b ('SMOKING HABITS FORMERLY: ...') due to a translation problem. This also affects qb5b ('SMOKING HABITS FORMERLY: CIGARETTES PER DAY') and qb6b ('CIGARETTE CHARS FORMERLY: ...'). Additionally, 65 respondents from Portugal that are coded missing in original source variable qb5b and the archive version are declared as DK in the recoded version of the original variable, which is included in the tabular volumes. Please note that the recoded variable qb5b_r in the archive dataset is corrected referring to qb5b, therefore coding the 65 respondents from PT as 999 'Inap. (not coded 1-5 in qb4b_1 and qb4b_2) [also see note/errata]'. Furthermore, an unusually high number of respondents from PT are coded DK in qb6b, which might indicate that these respondents are missing cases, too. The divergent figures in the report could underline this assumption.

qb4b_5 - SMOKING HABITS FORMERLY: PIPE

QB4B

ASK QB4B IF USED TO 'SMOKE', CODE 2 IN QB1 OR IF 'SMOKED OCCASIONALLY', CODE 3 IN QB2B

How often did you use the following tobacco products?

(SHOW SCREEN – READ OUT – ONE ANSWER PER LINE - DISPLAY '98' INSTEAD OF 'REFUSAL')

QB4B_5 Pipe

- 1 Every day
- 2 Every week
- 3 Every month
- 4 Less than monthly
- 5 You have tried only once or twice
- 6 Never
- 7 Refusal (SPONTANEOUS)
- 9 Inap. Smoker, never smoked and never tried occasionally (not coded 2 in qb1 and not coded 3 in qb2b) [also see note]

Note:

70 respondents from PT are coded missing in qb4b ('SMOKING HABITS FORMERLY: ...') due to a translation problem. This also affects qb5b ('SMOKING HABITS FORMERLY: CIGARETTES PER DAY') and qb6b ('CIGARETTE CHARS FORMERLY: ...'). Additionally, 65 respondents from Portugal that are coded missing in original source variable qb5b and the archive version are declared as DK in the recoded version of the original variable, which is included in the tabular volumes. Please note that the recoded variable qb5b_r in the archive dataset is corrected referring to qb5b, therefore coding the 65 respondents from PT as 999 'Inap. (not coded 1-5 in qb4b_1 and qb4b_2) [also see note/errata]'. Furthermore, an unusually high number of respondents from PT are coded DK in qb6b, which might indicate that these respondents are missing cases, too. The divergent figures in the report could underline this assumption.

qb4b_t - SMOKING HABITS FORMERLY: AT LEAST ONE (SUM)

Former smoking habits: frequency of use of tobacco products (at least one) summarized

- 1 Every day
- 2 Every week
- 3 Every month
- 4 Less than monthly
- 5 You tried only once or twice
- 6 Never
- 7 Refusal (SPONTANEOUS)
- 9 Inap. Smoker, never smoked and never tried occasionally (not coded 2 in qb1 and not coded 3 in qb2b) [also see note]

Derivation:

This variable groups answers to question qb4b.

[qb4b How often did you use the following tobacco products?

qb4b_1 Boxed cigarettes]

qb4b_2 Hand-rolled cigarettes

qb4b_3 Cigarillos (this excludes cigars)

qb4b_4 Cigars (this excludes cigarillos)

qb4b_5 Pipe]

Note:

See qb4b for the complete question text.

70 respondents from PT are coded missing in qb4b ('SMOKING HABITS FORMERLY: ...') due to a translation problem. This also affects qb5b ('SMOKING HABITS FORMERLY: CIGARETTES PER DAY') and qb6b ('CIGARETTE CHARS FORMERLY: ...'). Additionally, 65 respondents from Portugal that are coded missing in original source variable qb5b and the archive version are declared as DK in the recoded version of the original variable, which is included in the tabular volumes. Please note that the recoded variable qb5b_r in the archive dataset is corrected referring to qb5b, therefore coding the 65 respondents from PT as 999 'Inap. (not coded 1-5 in qb4b_1 and qb4b_2) [also see note/errata]'. Furthermore, an unusually high number of respondents from PT are coded DK in qb6b, which might indicate that these respondents are missing cases, too. The divergent figures in the report could underline this assumption.

qb5a - SMOKING HABITS CURRENTLY: CIGARETTES PER DAY

QB5A

ASK QB5A IF 'CIGARETTE SMOKER', CODE 1 TO 5 IN QB4A_1 or QB4A_2

On average, how many cigarettes do you smoke each day?

(WRITE DOWN THE ANSWER IN NUMBER OF CIGARETTES - IF 'LESS THAN 1 CIGARETTE A DAY' CODE '997' - IF 'REFUSAL' CODE '998' - IF 'DK' CODE '999')

1 One cigarette per day

100 100 cigarettes per day

988 988 cigarettes per day [DUBIOUS]

996 Less than one a day

997 Refusal

998 DK

999 Inap. No cigarette smokers (not coded 1 to 5 in qb4a_1 and qb4a_2)

Note:

Actual number is coded.

Original code '997' recoded to '996'.

Original code '998' recoded to '997'.

Original code '999' recoded to '998'.

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

Comparability:

Last trend modified: EB82.4, QC4

qb5a_r - SMOKING HABITS CURRENTLY: CIGARETTES PER DAY (RECODE)

Current average number of cigarettes per day - recoded

- 1 Less than 1 cigarette
- 2 From 1 to 5 cigarettes
- 3 From 6 to 10 cigarettes
- 4 From 11 to 20 cigarettes
- 5 21 cigarettes or more
- 6 988 cigarettes per day [DUBIOUS]
- 7 Refusal
- 8 DK
- 9 Inap. No cigarette smokers (not coded 1 to 5 in qb4a_1 and qb4a_2)

Derivation:

This variable groups answers to question qb5a.

[qb5a On average, how many cigarettes do you smoke each day?]

Note:

See qb5a for the complete question text.

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

qb5b - SMOKING HABITS FORMERLY: CIGARETTES PER DAY

QB5B

ASK QB5B IF 'EX-CIGARETTE SMOKER', CODE 1 TO 5 IN QB4B_1 or QB4B_2

On average, how many cigarettes did you smoke each day?

(WRITE DOWN THE ANSWER IN NUMBER OF CIGARETTES - IF 'LESS THAN 1 CIGARETTE A DAY' CODE '997' - IF 'REFUSAL' CODE '998' - IF 'DK' CODE '999')

1 One cigarette per day

100 100 cigarettes per day

996 Less than one a day

997 Refusal

998 DK

999 Inap. No ex-cigarette smokers (not coded 1 to 5 in qb4b_1 and qb4b_2) [also see note]

Note:

Actual number is coded.

Original code '997' recoded to '996'.

Original code '998' recoded to '997'.

Original code '999' recoded to '998'.

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

70 respondents from PT are coded missing in qb4b ("SMOKING HABITS FORMERLY: ...") due to a translation problem. This also affects qb5b ("SMOKING HABITS FORMERLY: CIGARETTES PER DAY") and qb6b ("CIGARETTE CHARS FORMERLY: ..."). Additionally, 65 respondents from Portugal that are coded missing in original source variable qb5b and the archive version are declared as DK in the recoded version of the original variable, which is included in the tabular volumes. Please note that the recoded variable qb5b_r in the archive dataset is corrected referring to qb5b, therefore coding the 65 respondents from PT as 999 "Inap. (not coded 1-5 in qb4b_1 and qb4b_2) [also see note]". Furthermore, an unusually high number of respondents from PT are coded DK in qb6b, which might indicate that these respondents are missing cases, too. The divergent figures in the report could underline this assumption.

Comparability:

Last trend modified: EB82.4, QC4

qb5b_r - SMOKING HABITS FORMERLY: CIGARETTES PER DAY (RECODE)

Former average number of cigarettes per day - recoded

- 1 Less than 1 cigarette
- 2 From 1 to 5 cigarettes
- 3 From 6 to 10 cigarettes
- 4 From 11 to 20 cigarettes
- 5 21 cigarettes or more
- 7 Refusal
- 8 DK
- 9 Inap. No ex-cigarette smokers (not coded 1 to 5 in qb4b_1 and qb4b_2) [also see note]

Derivation:

This variable groups answers to question qb5b.

[qb5b On average, how many cigarettes did you smoke each day?]

Note:

See qb5b for the complete question text.

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

70 respondents from PT are coded missing in qb4b ("SMOKING HABITS FORMERLY: ...") due to a translation problem. This also affects qb5b ("SMOKING HABITS FORMERLY: CIGARETTES PER DAY") and qb6b ("CIGARETTE CHARS FORMERLY: ..."). Additionally, 65 respondents from Portugal that are coded missing in original source variable qb5b and the archive version are declared as DK in the recoded version of the original variable, which is included in the tabular volumes. Please note that the recoded variable qb5b_r in the archive dataset is corrected referring to qb5b, therefore coding the 65 respondents from PT as 999 "Inap. (not coded 1-5 in qb4b_1 and qb4b_2) [also see note]". Furthermore, an unusually high number of respondents from PT are coded DK in qb6b, which might indicate that these respondents are missing cases, too. The divergent figures in the report could underline this assumption.

QB6B_1 Menthol flavour

0 Not mentioned

1 Mentioned

9 Inap. Not ex monthly cigarette smoker (not coded 1 to 3 in qb4b_1 and qb4b_2) [also see note]

Note:

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

70 respondents from PT are coded missing in qb4b ('SMOKING HABITS FORMERLY: ...') due to a translation problem. This also affects qb5b ('SMOKING HABITS FORMERLY: CIGARETTES PER DAY') and qb6b ('CIGARETTE CHARS FORMERLY: ...'). Additionally, 65 respondents from Portugal that are coded missing in original source variable qb5b and the archive version are declared as DK in the recoded version of the original variable, which is included in the tabular volumes. Please note that the recoded variable qb5b_r in the archive dataset is corrected referring to qb5b, therefore coding the 65 respondents from PT as 999 'Inap. (not coded 1-5 in qb4b_1 and qb4b_2) [also see note/errata]'. Furthermore, an unusually high number of respondents from PT are coded DK in qb6b, which might indicate that these respondents are missing cases, too. The divergent figures in the report could underline this assumption.

qb6b_4 - CIGARETTE CHARS FORMERLY: LIGHT

QB6B

ASK QB6B IF 'EX MONTHLY CIGARETTE SMOKER'; CODE 1, 2, 3 IN QB4B_1 OR QB4B_2

Did you use to smoke cigarettes with any of the following characteristics on a monthly basis?

(SHOW SCREEN - READ OUT - MULTIPLE ANSWERS POSSIBLE - CODES 6 AND 7 ARE EXCLUSIVE)

QB6B_4 Light

0 Not mentioned

1 Mentioned

9 Inap. Not ex monthly cigarette smoker (not coded 1 to 3 in qb4b_1 and qb4b_2) [also see note]

Note:

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

70 respondents from PT are coded missing in qb4b ('SMOKING HABITS FORMERLY: ...') due to a translation problem. This also affects qb5b ('SMOKING HABITS FORMERLY: CIGARETTES PER DAY') and qb6b ('CIGARETTE CHARS FORMERLY: ...'). Additionally, 65 respondents from Portugal that are coded missing in original source variable qb5b and the archive version are declared as DK in the recoded version of the original variable, which is included in the tabular volumes. Please note that the recoded variable qb5b_r in the archive dataset is corrected referring to qb5b, therefore coding the 65 respondents from PT as 999 'Inap. (not coded 1-5 in qb4b_1 and qb4b_2) [also see note/errata]'. Furthermore, an unusually high number of respondents from PT are coded DK in qb6b, which might indicate that these respondents are missing cases, too. The divergent figures in the report could underline this assumption.

qb4b7 - SMOKING HABITS - AT LEAST ONE SUMMARIZED (QB1 & QB4A & QB7)

Smoking habits: overall use of tobacco products summarized

- 1 Daily users
- 2 Occasional users
- 3 Tried these products only once or twice
- 4 Ex-users
- 5 Never tried any of these products
- 6 Refusal

Derivation:

According to the official report this variable is based on the answers to questions qb1, qb4a and qb7.

Source: TNS Opinion & Social: Special Eurobarometer 458 / Wave 87.1: Attitudes of Europeans tobacco and electronic cigarettes. Survey requested by the European Commission, Directorate-General for Health and Food safety and co-ordinated by Directorate-General for Communication (DG COMM 'Strategic Communication' Unit). Brussels, March 2017. p. 73.

[qb1 Regarding smoking cigarettes, cigars, cigarillos or a pipe, which of the following applies to you? In this question and the following questions in this section, smoking cigarettes does not include use of electronic cigarettes.

qb4a How often do you use the following tobacco products?

qb4a_1 Boxed cigarettes

qb4a_2 Hand-rolled cigarettes

qb4a_3 Cigarillos (this excludes cigars)

qb4a_4 Cigars (this excludes cigarillos)

qb4a_5 Pipe

qb7 Have you ever used or tried any of the following products?

qb7_1 Water pipe (shisha, hookah)

qb7_2 Oral tobacco (snus), chewing or nasal tobacco (snuff)]

Note:

See qb1, qb4a and qb7 for the complete question text.

Variable qb4b7 is available in the dataset starting with version v2-0-0.

qb15 - E-CIGARETTES HELP STOP/REDUCE TOBACCO CONSUMPTION

QB15

ASK QB15 IF 'SMOKE OR USED TO SMOKE' AND 'USE OR USED OR TRIED ELECTRONIC CIGARETTES'; (CODE 1, 2 IN QB1) AND (CODE 1, 2, 3 IN QB11)

You said that you smoke or used to smoke tobacco but also use, used or tried electronic cigarettes or a similar device. Did the use of electronic cigarettes or any similar device help you to stop or reduce your tobacco consumption?

(READ OUT – ONE ANSWER ONLY)

- 1 Yes, you stopped smoking tobacco completely
- 2 Yes, you stopped smoking tobacco for a while but then you started again
- 3 Yes, you reduced your tobacco consumption but you did not stop
- 4 No, you did not reduce your tobacco consumption at all
- 5 No, and you actually increased your tobacco consumption
- 6 DK
- 9 Inap. Never smoked or DK or never used/tried electronic cigarettes/similar devices or DK (not coded 1 or 2 in qb1 or not coded 1 to 3 in qb11)

qb16 - SMOKING HABITS - PRODUCT USED FIRST

QB16

ASK QB16 IF 'SMOKE OR USED TO SMOKE' OR 'USE OR USED OR TRIED ELECTRONIC CIGARETTES' OR 'AT LEAST TRIED WATER PIPE OR ORAL TOBACCO', (CODE 1, 2 IN QB1) OR (CODE 2, 3, 4 IN QB2B) OR (CODE 1, 2, 3 IN QB11) OR (CODE 1, 2, 3, 4, 5, 6 IN QB7_1 OR QB7_2)

Which of the following products did you use or try first?

(SHOW SCREEN – READ OUT – ONE ANSWER ONLY - ROTATE ANSWERS 1 TO 10)

- 1 Boxed cigarettes
- 2 Hand-rolled cigarettes
- 3 Cigars
- 4 Cigarillos
- 5 Pipe
- 6 Water pipe (shisha, hookah)
- 7 Oral tobacco (snus)
- 8 Chewing tobacco
- 9 Nasal tobacco (snuff)
- 10 E-cigarettes or similar electronic devices
- 11 Other (SPONTANEOUS)
- 12 DK
- 99 Inap. Never smoked or DK and never used electronic cigarettes/similar devices or DK and never tried water pipe/oral tobacco or DK (not coded 1 to 2 in qb1 and not coded 2 to 4 in qb2b and not coded 1 to 3 in qb11 and not coded 1 to 6 in qb7_1 and qb7_2)

Note:

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

9 Inap. Smoker, who never tried quitting or DK, or never smoked or DK (not coded 1 in qb18_1 and qb18_2 and not coded 2 in qb1)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qb19_2 - QUIT SMOKING AIDS: E-CIGARETTES

QB19

ASK QB19 IF 'TRIED STOPPING', CODE 1, 2 IN QB18 OR IF 'EX SMOKER', CODE 2 IN QB1

Which of the following did you use in order to stop or to try to stop smoking?

(SHOW SCREEN – READ OUT – MULTIPLE ANSWERS POSSIBLE – ROTATE ANSWERS 1 TO 5 – CODE 7 IS EXCLUSIVE)

QB19_2 Electronic cigarettes or any similar device

0 Not mentioned

1 Mentioned

9 Inap. Smoker, who never tried quitting or DK, or never smoked or DK (not coded 1 in qb18_1 and qb18_2 and not coded 2 in qb1)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qb19t - QUIT SMOKING AIDS - SUMMARIZED IF TRIED

Respondents who used at least one aid to stop smoking or stopped/tried to stop without assistance - summarized

1 Total 'At least one aid'

2 Only 'You stopped or you tried to stop without assistance'

9 Inap. DK in qb19 or Smoker, who never tried quitting or DK, or never smoked or DK ((not coded 1 in qb18_1 and qb18_2 and not coded 2 in qb1)) or coded 1 in qb19_7)

Derivation:

This variable summarizes responses to qb19.

[qb19 Which of the following did you use in order to stop or to try to stop smoking?

qb19_1 Nicotine replacement medications (like nicotine gum, patch or inhaler) or other medications

qb19_2 Electronic cigarettes or any similar device

qb19_3 Oral tobacco (snus), chewing tobacco or nasal tobacco (snuff)

qb19_4 Medical support or stop smoking services (such as a quitline)

qb19_5 You stopped or you tried to stop without assistance

qb19_6 Other (SPONTANEOUS)

qb19_7 DK]

Note:

See qb19 for the complete question text.

qc1a - SERIOUS WORLD PROBLEMS - FIRST

A. CLIMATE CHANGE 2017

Let's now talk about another topic.

QC1A

Which of the following do you consider to be the single most serious problem facing the world as a whole?

(SHOW SCREEN – READ OUT – ONE ANSWER ONLY - ROTATE ANSWERS 1 TO 8)

- 1 Climate change
- 2 International terrorism
- 3 Poverty, hunger and lack of drinking water
- 4 Spread of infectious diseases
- 5 The economic situation
- 6 Proliferation of nuclear weapons
- 7 Armed conflicts
- 8 The increasing global population
- 9 Other (SPONTANEOUS)
- 10 None (SPONTANEOUS)
- 11 DK

Comparability:

Last trend: EB83.4, QA1A

qc2r - CLIMATE CHANGE - PERCEPTION (RECODED)

Perception of climate change as a serious problem - recoded to three categories

- 1 Not a serious problem (coded 1 to 4 in qc2)
- 2 A fairly serious problem (coded 5 to 6 in qc2)
- 3 A very serious problem (coded 7 to 10 in qc2)
- 8 DK

Derivation:

This variable collapses answers to qc2 into three categories.

[qc2 And how serious a problem do you think climate change is at this moment? Please use a scale from 1 to 10, with '1' meaning it is 'not at all a serious problem' and '10' meaning it is 'an extremely serious problem'.]

Note:

See qc2 for the complete question text.

qc4_5 - MORE PUB FIN SUPPORT FOR TRANSITION EVEN IF CUT SUBSIDIES FOSSIL FUELS

QC4

To what extent do you agree or disagree with each of the following statements?

(SHOW SCREEN – READ OUT - ONE ANSWER PER LINE - ROTATE STATEMENTS 1 TO 5 - DISPLAY '99' INSTEAD OF 'DK')

QC4_5 More public financial support should be given to the transition to clean energies even if it means subsidies to fossil fuels should be reduced

- 1 Totally agree
- 2 Tend to agree
- 3 Tend to disagree
- 4 Totally disagree
- 5 DK

qc7 - GVRNMNT TARGETS FOR RENEWABLE ENERGY - IMPORTANCE

Now let's look ahead to the future.

(READ OUT)

QC7

How important do you think it is that the (NATIONALITY) government sets targets to increase the amount of renewable energy used, such as wind or solar power, by 2030?

(READ OUT – ONE ANSWER ONLY)

- 1 Very important
- 2 Fairly important
- 3 Not very important
- 4 Not at all important
- 5 DK

qc8 - GVRNMNT SUPPORT FOR ENERGY EFF VIA INSUL HOME OR ELEC CARS - IMPORTANCE

QC8

How important do you think it is that the (NATIONALITY) government provides support for improving energy efficiency by 2030 (e.g. by encouraging people to insulate their home or buy electric cars)?

(READ OUT – ONE ANSWER ONLY)

- 1 Very important
- 2 Fairly important
- 3 Not very important
- 4 Not at all important
- 5 DK

qd3t - EFFECTIVE REGULATION OF TECHNOLOGIES - COMBINATIONS (TOTAL)

Combinations of actors for effective actions to address impacts of digital technologies - summarized

- 1 Only companies
- 2 Only national authorities
- 3 Only EU
- 4 EU and national authorities
- 5 EU and companies
- 6 National authorities and companies
- 7 All three
- 8 Other
- 9 Nobody
- 10 DK

Derivation:

This variable shows different combinations of answers to qd3.

[qd3 In your opinion, which of the following factors is best placed to take effective actions to address the impacts of these most recent digital technologies?

qd3_1 Companies

qd3_2 The (NATIONALITY) public authorities

qd3_3 The European Union

qd3_4 Other (SPONTANEOUS)

qd3_5 None (SPONTANEOUS)

qd3_6 DK]

Note:

Please note that for summarized variable qd3t 'EFFECTIVE REGULATION OF TECHNOLOGIES - COMBINATIONS (TOTAL)' answers to qd3_4 ('EFFECTIVE REGULATION OF TECH: OTHER (SPONT)') are not excluded from summarized categories.

See qd3 for the complete question text.

qd6 - FACT CHECKING WEBSITE USE

QD6

ASK ALL

Have you ever used a fact checking website, for example to check if a story you read on online social networks was trustworthy?

(SHOW SCREEN – READ OUT – ONE ANSWER ONLY)

- 1 Yes, every day or almost every day
- 2 Yes, two or three times a week
- 3 Yes, about once a week
- 4 Yes, two or three times a month
- 5 Yes, less often
- 6 No, never
- 7 You didn't know about the existence of these fact checking websites (SPONTANEOUS)
- 8 DK
- 9 Inap. Do not use online social networks (not coded 1 to 5 in d62_5) [UNDOCUMENTED FILTER]

Note:

Please note the undocumented filter for variables qd6 (FACT CHECKING WEBSITE USE): Data is available only for respondents that report online social network usage in d62_5 (INTERNET USE FREQ: ONLINE SOC NETWORKS).

qd8_1 - ROBOTS USED: AT HOME

A robot is defined as a machine which can assist humans in everyday tasks without constant guidance or instruction, e.g. as a kind of co-worker helping on the factory floor or as a robot cleaner, or in activities which may be dangerous for humans, like search and rescue in disasters. Robots can come in many shapes or sizes and some may be of human appearance. Traditional kitchen appliances, such as a blender or a coffee maker, are not considered as robots.

(READ OUT)

Artificial Intelligence (AI) is a term used to describe systems that, to some extent, can sense, perceive, think and act like humans and behave rationally. Artificial Intelligence is used, for instance, in driverless cars or drones, in our homes to adjust the heating automatically, in healthcare to improve medical diagnoses and in farming to apply pesticides only where they are absolutely necessary.

(READ OUT)

QD8

Have you ever used or do you currently use a robot at home or at work (e.g. a robotic vacuum cleaner at home or an industrial robot at work)?

(READ OUT – MULTIPLE ANSWERS POSSIBLE - CODES 4 AND 5 ARE EXCLUSIVE)

QD8_1 Yes, at home

qd8_2 - ROBOTS USED: AT WORK

A robot is defined as a machine which can assist humans in everyday tasks without constant guidance or instruction, e.g. as a kind of co-worker helping on the factory floor or as a robot cleaner, or in activities which may be dangerous for humans, like search and rescue in disasters. Robots can come in many shapes or sizes and some may be of human appearance. Traditional kitchen appliances, such as a blender or a coffee maker, are not considered as robots.

(READ OUT)

Artificial Intelligence (AI) is a term used to describe systems that, to some extent, can sense, perceive, think and act like humans and behave rationally. Artificial Intelligence is used, for instance, in driverless cars or drones, in our homes to adjust the heating automatically, in healthcare to improve medical diagnoses and in farming to apply pesticides only where they are absolutely necessary.

(READ OUT)

QD8

Have you ever used or do you currently use a robot at home or at work (e.g. a robotic vacuum cleaner at home or an industrial robot at work)?

(READ OUT – MULTIPLE ANSWERS POSSIBLE - CODES 4 AND 5 ARE EXCLUSIVE)

qd11 - CURRENT JOB BE DONE BY A ROBOT IN THE FUTURE

QD11

ASK QD11 IF "CURRENTLY WORKING", CODE 5 TO 18 IN D15A

Do you think your current job could be done by a robot or by artificial intelligence in the future?

(SHOW SCREEN - READ OUT – ONE ANSWER ONLY)

- 1 Yes, entirely
- 2 Yes, mostly
- 3 Yes, but only partially
- 4 No, not at all
- 5 DK
- 9 Inap. Currently not working (not coded 5 to 18 in d15a)

qd13_1 - ROBOTS FEEL ABOUT: MEDICAL OPERATION

QD13

Here is a list of things that could be done by or with robots. For each of them, please tell me, using a scale from 1 to 10, how you would personally feel about it. On this scale, '1' means that you would feel 'totally uncomfortable' and '10' means that you would feel 'totally comfortable' with this situation.

(SHOW SCREEN – READ OUT – ONE ANSWER PER LINE - ROTATE STATEMENTS 1 TO 4 - DISPLAY '96' INSTEAD OF 'IT DEPENDS' - DISPLAY '99' INSTEAD OF 'DK')

QD13_1 Having a medical operation performed on you by a robot

- 1 Box 1 - totally uncomfortable
- 2 Box 2
- 3 Box 3
- 4 Box 4
- 5 Box 5
- 6 Box 6
- 7 Box 7
- 8 Box 8
- 9 Box 9
- 10 Box 10 - totally comfortable
- 11 It depends (SPONTANEOUS)
- 12 DK

qd18 - BUYING IT PRODUCTS: ROLE OF SECURITY/PRIVACY

QD18

When you buy an IT product such as a computer or a smart phone, to what extent do the security and privacy features of the product play a role in your choice?

(SHOW SCREEN - READ OUT - ONE ANSWER ONLY)

- 1 To a great extent, you are ready to pay more for better security and privacy features
- 2 To some extent, but you are not willing to pay more for security and privacy features
- 3 Not really, this is far less important than other features (performance, brand, design, etc.)
- 4 Not at all, you don't take the security and privacy features of the product into account when making your decision
- 5 DK
- 9 Inap. No internet usage (not coded 1 to 5 in d62_1 to d62_5) [UNDOCUMENTED FILTER]

Note:

Please note the undocumented filter for variables qd17 (CYBER SECURITY ACTION LAST 3YRS) and qd18 (BUYING IT PRODUCTS: ROLE OF SECURITY/PRIVACY): Data is available only for respondents that report internet usage in d62 (INTERNET USE FREQ).

qe1_1 - COACH SERVICES IN COUNTRY - HOW OFTEN

E. COACH SERVICES

The next few questions are about coach services. By coach services, we mean scheduled, non-urban services which are open to everyone and have a published timetable, such as those that travel between cities or countries and where, for example, you have the possibility to stow luggage. It does not mean other services such as urban bus services, privately hired services or package tours.

(READ OUT - SHOW SCREEN WITH PICTURE TO THE RESPONDENT)

QE1

ASK ALL

How often do you use coach services to travel ...

(SHOW SCREEN - READ OUT - ONE ANSWER PER LINE - ROTATE STATEMENTS 1 AND 2 - DISPLAY '99' INSTEAD OF 'DK')

QE1_1 ... to other locations in (OUR COUNTRY)?

- 1 Several times a week
- 2 Several times a month
- 3 Several times a year
- 4 Once a year or less
- 5 Never
- 6 DK

qe4_7 - RECENT COACH TRIP RATING: COMFORT OF TRAVEL

ASK QE3, QE4 AND QE5A IF USE COACH SERVICES AT LEAST ONCE A YEAR (CODES 1, 2, 3 OR 4 IN QE1_1 OR QE1_2)

QE4

Thinking about your most recent trips by coach how would you rate it on the following aspects?

(SHOW SCREEN – READ OUT – ONE ANSWER PER LINE - ROTATE STATEMENTS 1 TO 7 - DISPLAY '99' INSTEAD OF 'DK')

QE4_7 Comfort of travel

- 1 Very good
- 2 Good
- 3 Fair
- 4 Poor
- 5 Very poor
- 6 DK
- 9 Inap. Do not use coach services at least once a year or less or DK (not coded 1 to 4 in qe1_1 and qe1_2)

d1r1 - LEFT-RIGHT PLACEMENT: 3 CAT (RECODED)

Left-right placement - recoded to three categories

- 1 (1 - 4) Left
- 2 (5 - 6) Centre
- 3 (7 - 10) Right
- 9 DK/Refusal (Spontaneous)

Derivation:

This variable collapses answers to d1 into three categories.

[d1 In political matters people talk of 'the left' and 'the right'. How would you place your views on this scale?]

Note:

See d1 for the complete question text.

d1r2 - LEFT-RIGHT PLACEMENT: 5 CAT (RECODED)

Left-right placement - recoded to five categories

- 1 (1 - 2) Left
- 2 (3 - 4)
- 3 (5 - 6) Centre
- 4 (7 - 8)
- 5 (9 -10) Right
- 9 DK/Refusal (Spontaneous)

Derivation:

This variable collapses answers to d1 into five categories.

[d1 In political matters people talk of 'the left' and 'the right'. How would you place your views on this scale?]

Note:

See d1 for the complete question text.

d7 - MARITAL STATUS

D7

Which of the following best corresponds to your own current situation?

(SHOW SCREEN – READ OUT – ONE ANSWER ONLY - CODE 'NO ANSWER' IN CODE 16)

MARRIED OR REMARRIED

- 1 Living without children
- 2 Living with the children of this marriage
- 3 Living with the children of a previous marriage
- 4 Living with the children of this marriage and of a previous marriage

SINGLE LIVING WITH A PARTNER

- 5 Living without children
- 6 Living with the children of this union
- 7 Living with the children of a previous union
- 8 Living with the children of this union and of a previous union

SINGLE

- 9 Living without children
- 10 Living with children

DIVORCED OR SEPARATED

- 11 Living without children
- 12 Living with children

WIDOW/ER

- 13 Living without children
- 14 Living with children

15 Other (SPONTANEOUS)

97 Refusal (SPONTANEOUS)

Note:

Original code '16' recoded to '97'.

d7r1 - MARITAL STATUS: 5 CAT (RECODED)

Marital status recoded to five categories with focus on partnership

- 1 (Re-)Married (coded 1 to 4 in d7)
- 2 Single living with partner (coded 5 to 8 in d7)
- 3 Single (coded 9 to 10 in d7)
- 4 Divorced or separated (coded 11 to 12 in d7)
- 5 Widow (coded 13 to 14 in d7)
- 6 Other (SPONTANEOUS)
- 7 Refusal (SPONTANEOUS)

Derivation:

This variable collapses answers to d7 into five categories.

[d7 Which of the following best corresponds to your own current situation?]

Note:

See d7 for the complete question text.

d7r2 - MARITAL STATUS: 4 CAT (RECODED)

Marital status recoded to four categories with focus on marriage

- 1 Unmarried (coded 9 to 10 in d7)
- 2 (Re-)Married/Single with partner (coded 1 to 8 in d7)
- 3 Divorced or separated (coded 11 to 12 in d7)
- 4 Widow (coded 13 to 14 in d7)
- 5 Other (SPONTANEOUS)
- 7 Refusal (SPONTANEOUS)

Derivation:

This variable collapses answers to d7 into four categories.

[d7 Which of the following best corresponds to your own current situation?]

Note:

See d7 for the complete question text.

d7r3 - MARITAL STATUS: HH & CHILDREN (RECODED)

Marital status recoded to four categories with focus on children (family status)

- 1 Single household without children (coded 9, 11, and 13 in d7)
- 2 Single household with children (coded 10, 12, and 14 in d7)
- 3 Multiple occupancy household without children (coded 1 and 5 in d7)
- 4 Multiple occupancy household with children (coded 2 to 4 and 6 to 8 in d7)
- 5 Other (SPONTANEOUS)
- 7 Refusal (SPONTANEOUS)

Derivation:

This variable collapses answers to d7 into four categories.

[d7 Which of the following best corresponds to your own current situation?]

Note:

See d7 for the complete question text.

d8 - AGE EDUCATION

D8

How old were you when you stopped full-time education?

(CANNOT BE LARGER THAN D11 - CODE 'NO ANSWER' IN CODE 98)

(IF 'STILL STUDYING' CODE '00' – IF 'NO EDUCATION' CODE '01' – IF 'REFUSAL' CODE '98' – IF 'DK' CODE '99')

(MAKE SURE THE RESPONDENT UNDERSTANDS THAT D8 IS ABOUT FULL-TIME EDUCATION)

0 Refusal

2 2 years

87 87 years

97 No full-time education

98 Still studying

99 DK

Note:

Original code '00' recoded to '98'.

Original code '01' recoded to '97'.

Original code '98' recoded to '0'.

Please note that users might be advised to consider pre-school ages (outliers) as with 'no full-time education' or to treat them as missing values.

Actual number is coded.

Comparability:

Last trend: EB86.3, D8

d8r1 - AGE EDUCATION: 11 CAT (RECODED)

Age when finished full-time education - recoded to 11 categories

- 1 Up to 14 years
- 2 15 years
- 3 16 years
- 4 17 years
- 5 18 years
- 6 19 years
- 7 20 years
- 8 21 years
- 9 22 years and older
- 10 Still studying
- 11 No full-time education
- 97 Refusal
- 98 DK

Derivation:

This variable collapses answers to question d8 for indicated ages lowest (2) to 14 and 22 to highest (87).

[d8 How old were you when you stopped full-time education?]

Note:

See d8 for the complete question text.

d8r2 - AGE EDUCATION: 5 CAT (RECODED)

Age when finished full-time education - recoded to five categories

- 1 Up to 15 years
- 2 16-19 years
- 3 20 years and older
- 10 Still studying
- 11 No full-time education
- 97 Refusal
- 98 DK

Derivation:

This variable collapses answers to question d8 into three age groups.

[d8 How old were you when you stopped full-time education?]

Note:

See d8 for the complete question text.

d40a_r - HOUSEHOLD COMPOSITION: AGED 15+ (RECODED)

n of people in household aged 15 years or more - recoded to four categories

- 1 One
- 2 Two
- 3 Three
- 4 Four or more
- 9 DK/NA [NOT DOCUMENTED]

Derivation:

This variable groups answers to question d40a.

[d40a Could you tell me how many people aged 15 years or more live in your household, yourself included?]

Note:

See d40a for the complete question text.

d40c_r - HOUSEHOLD COMPOSITION: AGED 10-14 (RECODED)

n of people in household aged 10 to 14 years - recoded to five categories

- 0 None
- 1 One
- 2 Two
- 3 Three
- 4 Four or more
- 9 DK/NA [NOT DOCUMENTED]

Derivation:

This variable groups answers to question d40c.

[d40c Could you tell me how many children aged 10 to 14 years old live in your household?]

Note:

See d40c for the complete question text.

d40t - HOUSEHOLD COMPOSITION: SIZE (SUMMARIZED)

n of people in household - summarized

- 1 One
- 2 Two
- 3 Three
- 4 Four
- 5 Five
- 6 Six
- 7 Seven
- 8 Eight
- 9 Nine
- 10 Ten
- 11 Eleven
- 12 Twelve
- 13 Thirteen
- 14 Fourteen
- 15 Fifteen
- 16 Sixteen
- 17 Seventeen
- 18 Eighteen
- 19 Nineteen
- 20 Twenty
- 21 Twenty-One
- 42 Forty-Two
- 44 Forty-Four
- 99 DK/NA (99 in d40a or d40b or d40c)

Derivation:

This variable summarizes d40a, d40b, and d40c.

[d40a Could you tell me how many people aged 15 years or more live in your household, yourself included?

d40b Could you tell me how many children aged 10 to 14 years old live in your household?

d40c Could you tell me how many children less than 10 years old live in your household?]

Note:

See d40a, d40b, and d40c for the complete question text.

Variable d40t was named d40abc in former versions of this dataset.

Generated by GESIS in accordance with former surveys.

d40t by isocntry, Absolute Values (Row Percent), weighted by w1

d40_d11 - ONE-PERSON HOUSEHOLD COMPOSITION BY AGE

One-person households - recoded to three age categories

- 1 15 - 29 years
- 2 30 - 59 years
- 3 60 years and older [see code 99 in d11]
- 9 Inap. No one-person-household (not coded 1 in d40t)

Derivation:

This variable collapses answers to d11 into three age categories, but only for one-person households.

[d11 How old are you?

d40a Could you tell me how many people aged 15 years or more live in your household, yourself included?

d40b Could you tell me how many children aged 10 to 14 years old live in your household?

d40c Could you tell me how many children less than 10 years old live in your household?]

Note:

See d11 and d40a, d40b, and d40c for the complete question text.

d43t - PHONE AVAILABLE (SUMMARIZED)

Availability of mobile and/or landline phones - summarized

- 1 Mobile only (coded 1 in d43b and coded 2 in d43a)
- 2 Landline only (coded 1 in d43a and coded 2 in d43b)
- 3 Landline and mobile (coded 1 in d43a and coded 1 in d43b)
- 4 No telephone (coded 2 in d43a and coded 2 in d43b)

Derivation:

This variable summarizes answers to question d43a and d43b.

[d43a Do you own a fixed telephone in your household?

d43b Do you own a personal mobile telephone?]

Respondents coded 2 in d43a and 1 in d43b are coded 1 ('Mobile only') in d43t. Respondents coded 1 in d43a and 2 in d43b are coded 2 ('Landline only') in d43t. Respondents coded 1 in d43a and d43b are coded 3 ('Landline and mobile') in d43t. Respondents coded 2 in d43a and d43b are coded 4 ('No telephone') in d43t.

Note:

See d43a and d43b for the complete question text.

d63 - SOCIAL CLASS - SELF-ASSESSMENT (5 CAT)

D63

Do you see yourself and your household belonging to...?

(SHOW SCREEN – READ OUT – ONE ANSWER ONLY - CODE 'NO ANSWER' IN CODE 8)

- 1 The working class of society
- 2 The lower middle class of society
- 3 The middle class of society
- 4 The upper middle class of society
- 5 The higher class of society
- 6 Other (SPONTANEOUS)
- 7 None (SPONTANEOUS)
- 97 Refusal (SPONTANEOUS)
- 98 DK

Note:

Original code '8' recoded to '97'.

Original code '9' recoded to '98'.

Starting with Eurobarometer 82.3 demographic variable d63 'SOCIAL CLASS - SELF-ASSESSMENT (5 CAT)' consists of five categories instead of three categories.

polintr - POLITICAL INTEREST INDEX (D71_1/2/3)

Index of interest in politics

0 DK (coded 4 in d71_1, d71_2 and d71_3)

1 Not at all interested in politics

2 Slightly interested in politics

3 Moderately interested in politics

4 Strongly interested in politics

Derivation:

The POLITICAL INTEREST INDEX is based on the answers to the following question: 'When you get together with friends or relatives, would you say you discuss frequently, occasionally or never about (national/European/local) political matters?' (d71_1, d71_2, and d71_3). According to former studies the index was constructed by first attributing a score to each item in d71 ('Never' = 0; 'Occasionally' = 1; 'Frequently' = 2) and then adding together the three political dimensions (national/European/local). This procedure results in four different index levels ('Not at all interested in politics' if added up score = 0; 'Slightly' if added up score = 1 or 2; 'Moderately' if added up score = 3 or 4; 'Strongly' if added up score = 5 or 6) which have been coded accordingly into the categories 1 to 4. Furthermore combinations with DK responses in maximum two variables (d71_1, d71_2, and d71_3) have been coded as follows: 'DK' and 'Never' = 'Not at all'; 'DK' and 'Never' and 'Occasionally' or 'Frequently' = 'Slightly'; 'DK' and 'Occasionally' and at least one 'Frequently' = 'Moderately'.

Note:

This new POLITICAL INTEREST INDEX is introduced as C2 starting with EB 73.4. Please notice that in former waves up to EB 69.2 the VALUE ORIENTATION - POST-MATERIALISM index was named C2.

Compared to the original variable the scale has been inversed by GESIS in accordance with former practice. Furthermore responses coded 'DK' to all source variables (d71_1, d71_2, and d71_3) have been recoded to '0' (DK).

Modified by GESIS.

See d71 for the complete question text.

p1 - DATE OF INTERVIEW

INTERVIEW PROTOCOLE

p1 Date of the interview

- 1 Saturday, 18th March 2017
- 2 Sunday, 19th March 2017
- 3 Monday, 20th March 2017
- 4 Tuesday, 21st March 2017
- 5 Wednesday, 22nd March 2017
- 6 Thursday, 23rd March 2017
- 7 Friday, 24th March 2017
- 8 Saturday, 25th March 2017
- 9 Sunday, 26th March 2017
- 10 Monday, 27th March 2017

Note:

The end-of-fieldwork dates implied by the values in protocol variable p1 (date of interview) differ slightly from those indicated in the technical specifications provided by TNS.

Comparability:

p3r - DURATION OF INTERVIEW (RECODED)

p3r Duration of interview - number of minutes the interview lasted (recoded)

- 1 Up to 14 minutes
- 2 15 - 29 minutes
- 3 30 - 44 minutes
- 4 45 - 59 minutes
- 5 60 - 74 minutes
- 6 75 - 89 minutes
- 7 90 minutes and more

Derivation:

This variable collapses codes in p3 into seven categories.

Comparability:

Last trend: EB86.3, P3

p7pt - REGION - PORTUGAL NUTS 2

p7pt Portugal (EUROSTAT NUTS 2 LEVEL) – Comissaoes de Coordenação regional + Regioes autonomas

- 1 Norte (North) [PT]
- 2 Centro (Center) [PT]
- 3 Área Metropolitana de Lisboa (Lisbon metropolitan area)
- 4 Alentejo (Alentejo Region)
- 5 Algarve
- 99 Inap. (not PT in isocntry)

Note:

The autonomous regions of the Azores (PT20 - Região Autónoma dos Açores) and of Madeira (PT30 - Região Autónoma da Madeira) are not covered.

Since 2002 the region 'Lisboa e vale do tejo' is split up and the subregion 'Lezíria do Tejo' reinstated to the 'Alentejo' Region and the 'Médio Tejo' and 'Oeste' reinstated to the 'Centro' Region. The relative frequencies for each region indicate that this is reflected in the Eurobarometer P.7 regions starting with Eurobarometer 62.0. The original label for category '3' ('Lisboa e vale do Tejo') has been edited accordingly. According to the NUTS 2 specifications for Portugal this now only includes 'Grande Lisboa' and 'Península de Setúbal'.

Please note that according to the NUTS version 2013 with regular amendment as of January 1, 2015, and starting with Eurobarometer 83.1 category '3' is labelled 'Área Metropolitana de Lisboa'.

The official NUTS categories are coded and documented in the integrated alphanumeric NUTS CODES variable 'nuts'.

Derivation:

This additional alphanumeric NUTS CODES variable is produced by GESIS. It integrates all country specific p7 variables given that the regional units are defined in accordance with the EUROSTAT Nomenclature of Territorial Units for Statistics (NUTS) respectively in accordance with the Statistical Regions for Candidate and EFTA Countries 2010. For each country the lowest available NUTS subdivision level is considered.

Note:

The official NUTS codes are coded verbatim in accordance with the in each case valid (applicable) NUTS version. All version details and changes are

documented in the official EUROSTAT classification history (History of NUTS). A second variable (nuts1vl) indicates the coded NUTS LEVEL for each country.

France:

The territorial unit of Corse (FR83) and the Oversea departments (Départements d'outre-mer: FR9) are not covered.

Italy:

Starting with Eurobarometer wave 77 (NUTS version 2010 with regular amendment as of January 1, 2012) NUTS 1 codes for Italy have changed for North-East (ITH instead of ITD) and Center (ITI instead of ITE). The reason for this are minor boundary shifts on NUTS 2 and 3 level (ITI3: Marche and ITH5: Emilia Romagna).

Ireland:

Starting with EB 81.3 the category scheme for country specific protocol variable P7 (REGION) has changed for Ireland introducing NUTS 3 categories.

Greece:

The Aegean Islands (EL41 - Βόρειο Αιγαίο/Voreio Aigaio and EL42 - Νότιο Αιγαίο/Notio Aigaio) as well as the Ionian Islands (EL22 - Ιόνια Νησιά/Ionia Nisia) are not covered.

Starting with Eurobarometer wave 77 (NUTS version 2010 with regular amendment as of January 1, 2012) the standard country prefix 'GR' is replaced by 'EL'. The remaining numerical part of the codes remains unaffected.

Spain:

The autonomous cities of Ceuta (ES63 - Ciudad Autónoma de Ceuta) and Melilla (ES64 - Ciudad Autónoma de Melilla) are not covered.

Portugal:

The autonomous regions of the Azores (PT20 - Região Autónoma dos Açores) and of Madeira (PT30 - Região Autónoma da Madeira) are not covered. Please note that according to the NUTS version 2013 with regular amendment as of January 1, 2015, and starting with Eurobarometer 83.1 code 'PT17' is labelled 'Área Metropolitana de Lisboa'.

Finland:

Starting with EB 81.3 for Finland only one country specific protocol variable P7 (REGION) is available. The variable p7fi corresponds to the NUTS 2 breakdown in accordance to NUTS 2010 with regular amendment as of January 1, 2012. The NUTS 3 breakdown is no longer available for Finland.

Estonia:

Starting with EB 81.3 the category scheme for country specific protocol variable P7 (REGION) has changed for Estonia introducing the official NUTS 3 categories.

Bulgaria:

Starting with EB 81.3 for Bulgaria only one country specific protocol variable P7 (REGION) is available. The NUTS 3 breakdown is no longer available for Bulgaria.

Croatia:

Starting with EB 81.3 the category scheme for country specific protocol variable P7 (REGION) has changed for Croatia introducing the NUTS 2 and NUTS 3 categories.

Comparability:

nuts (REGION - NUTS CODES) in EB86.3

nutslvl - REGION - NUTS LEVEL

nutslvl REGION - NUTS LEVEL

0 No NUTS units

1 NUTS level 1

2 NUTS level 2

3 NUTS level 3

Derivation:

This variable identifies the lowest available NUTS LEVEL as coded for each country in variable NUTS CODES variable 'nuts'.

Starting with EB 81.3 the category scheme for country specific protocol variables P7 (REGION) have changed for some countries, in particular introducing NUTS categories for Ireland, Estonia and Croatia, and modifying NUTS categories for Finland and Bulgaria.

w3a - WEIGHT RESULT FROM TARGET - UNITED GERMANY

w3a Weight result from target - United Germany

This weight combines the weighting factors for Germany as a whole (redressment factors plus populations size factors East/West) and the redressment factors for all other countries (Great Britain and Northern Ireland separated). This weight has been derived by GESIS from original TNS weights w1 and w3. Unlike weighting variable w3 (WEIGHT UNITED GERMANY (ONLY)) the other countries/samples are not excluded from calculation.

Note:

Starting with Eurobarometer 75.4 and according to available weights up to Eurobarometer 61, GESIS is deriving three additional weights (w3a, w4a, w3a4a) in order to provide for the analysis of the United Kingdom and/or Germany, each as a whole and together with all other countries. Minimal deviations in frequencies for weighted data are possible due to rounding differences.

w4a - WEIGHT RESULT FROM TARGET - UNITED KINGDOM

w4a Weight result from target: UNITED KINGDOM

This weight combines the weighting factors for the United Kingdom as a whole (redressment factors plus populations size factors) and the redressment factors for all other countries (Germany East and West separated). This weight has been derived by GESIS from original TNS weights w1 and w4. Unlike weighting variable w4 (WEIGHT UNITED KINGDOM (ONLY)) the other countries/samples are not excluded from calculation.

Note:

Starting with Eurobarometer 75.4 and according to available weights up to Eurobarometer 61, the GESIS is deriving three additional weights (w3a, w4a, w3a4a) in order to provide for the analysis of the United Kingdom and/or Germany, each as a whole and together with all other countries. Minimal deviations in frequencies for weighted data are possible due to rounding differences.

nation - NATION (UNITED KINGDOM AND UNITED GERMANY) ISO3166

nation (United Kingdom and United Germany) ISO3166

NATION (UNITED KINGDOM AND UNITED GERMANY) ISO3166 equals country/sample identification variable isocntry (COUNTRY CODE - ISO 3166) but coding together both separate samples, Great Britain und Northern Ireland as well as East and West Germany. Unlike variables 'gb' (NATION – UNITED KINGDOM (ONLY)) and 'de' (NATION – UNITED GERMANY (ONLY)) all other countries are included for calculation.

Note:

Use of weighting factor w3a4a is mandatory for descriptive analysis.

Variable nation has been modified for version v2.0.0.

w3a4a - WEIGHT RESULT FROM TARGET - NATION

w3a4a Weight result from target – Nation

This weight combines the weighting factors for the United Kingdom as a whole (redressment factors plus populations size factors), the weighting factors for Germany as a whole (redressment factors plus populations size factors East/West), and the redressment factors for all other countries. This weight has been derived by GESIS from original TNS weights w1, w3 and w4. Unlike weighting variables w4 (WEIGHT UNITED KINGDOM (ONLY)) and w3 (WEIGHT UNITED GERMANY (ONLY)) the other countries are not excluded from calculation.

Note:

Starting with Eurobarometer 75.4 and according to available weights up to Eurobarometer 61, GESIS is deriving three additional weights (w3a, w4a, w3a4a) in order to provide for the analysis of the United Kingdom and/or Germany, each as a whole and together with all other countries. Minimal deviations in frequencies for weighted data are possible due to rounding differences.

Weighting variable w3a4a has been erroneous for the United Kingdom in version 1.1.0. The variable was corrected in version 1.2.0.
