Acknowledgements

The Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Long term access to and usability of Eurobarometer primary data and documentation is provided in a cooperative arrangement between the Inter-University Consortium for Political and Social Research (ICPSR) and the GESIS - Leibniz Institute for the Social Sciences.

Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Individual level micro data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS through the data catalogue (https://search.gesis.org/research_data) and through the ZACAT online data portal (<https://zacat.gesis.org>). Access to the Eurobarometer primary data is also provided by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, as well as supported by the Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send bibliographic citations for each completed manuscript or thesis abstract to the providing data archive, GESIS or ICPSR. Please indicate in a cover letter which data (surveys and variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

1.1.4 Bibliographic citation and DOI reference

Publications based on data collections which are made available through ICPSR or GESIS should acknowledge those sources by means of bibliographic citations. To ensure that such source attributions are captured for social science bibliographic utilities, citations must appear in footnotes or in the reference section of publications. The bibliographic citation for this data collection is:

European Commission, Brussels: Eurobarometer 87.2, April 2017.

TNS opinion, Brussels [Producer];

GESIS, Cologne [Publisher]: ZA6862, dataset version 3.0.0, DOI: [10.4232/1.13788](https://doi.org/10.4232/1.13788) (2021).

The registered Digital Object Identifier (DOI) persistently identifies this dataset version with reference to former (or more recent) versions and potential errata and update documentation in the GESIS data catalogue.

1.2 Content

1.2.1 Abstract

Eurobarometer 87.2 covered the following special topics: (1) Designing Europe's Future, and (2) E-Communications and Digital Single Market. Questions regarding the EU future included respondents' opinions regarding the EU budget and policies and trust in institutions. Respondents were also asked about attitudes towards economic policies, globalization, a common foreign and defence policy and future priorities and perspectives. Additionally, respondents were asked about their use of telephones and digital electronics, the importance of specific factors in choosing to subscribe to an Internet connection, experiences with the internet subscription, bundling Internet connection with other services, and switching communication service providers. Further topics included experiences with international calls, consumer protection issues and the knowledge of emergency numbers.

Demographic and other background information collected includes left or right self-placement on political scale, age, gender, nationality, marital status, occupation, age when stopped full-time education, household composition, ownership of a fixed or mobile telephone and other goods, difficulties in paying bills, self-assessed social class, internet use, life satisfaction, political discussion frequency, and opinions on whether their voice counts in their country/EU. Country-specific data includes type and size of locality, region of residence, and language of interview (where applicable).

1.2.2 Topic classification

- International Institutions, Relations, Conditions
- Communication, Public Opinion, Media
- Political Attitudes and Behavior
- Public Expenditures

CESSDA Topic Classification

- 9 Information and communication
- 9.1 Information society
- 11.2 International politics and organisation
- 11.5 Mass political behaviour, attitudes/opinion
- 17 Economics

General for Communication (DG COMM 'Media Monitoring and Analysis' Unit). Brussels, April 2017.

1.3 Universe

In all, Eurobarometer 87.2 interviewed 28.501 citizens in the 28 countries of the European Union after the 2013 enlargement (accession of Croatia in July 2013). All respondents were residents in the respective country, nationals and non-national EU-citizens, and aged 15 and over. They were supposed to have sufficient command of one of the respective national language(s) to answer the questionnaire. Separate samples were drawn for Great Britain and Northern Ireland as well as for East and West Germany.

1.4 Sampling procedure

A multi-stage, random (probability) sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regional units in every country (Statistical Office of the European Community, EUROSTAT NUTS 2 or equivalent). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of starting addresses was selected from each sampled PSU at random. Further addresses were chosen systematically using standard random route procedures as every Nth address from the initial address. In each household, a respondent was drawn, at random, following the closest birthday rule. No more than one interview was conducted in each household.

The regular sample size (in the sense of completed interviews) is 1000 respondents per country, except the United Kingdom with separate samples for Great Britain (1000) and Northern Ireland (300), Germany with separate samples for the Eastern (500) and the Western part (1000), and Luxembourg, Cyprus (Republic) and Malta with 500 interviews each. The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

From April 15 to April 25, 2017, TNS opinion carried out the fieldwork for this Eurobarometer, at the request of the European Commission, Directorate-General for Communication. TNS opinion is based in Brussels, Belgium, and co-ordinates the fieldwork carried out through its network of national institutes:

1.6 Mode of data collection

In all countries, fieldwork was conducted on the basis of detailed and uniform instructions prepared by TNS opinion. Interviews were conducted face-to-face in people's home in the respective national language. As far as the data capture is concerned, CAPI (Computer Assisted Personal Interview) was used in those countries where this technique was available.

Equivalent French and English basic questionnaires were developed for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country. Back-translation procedures were applied for controlling semantic equivalence. Multi-language questionnaires are applied if appropriate (Belgium, Luxembourg, Spain, Finland, Estonia, Latvia, Malta).

In each country only the national language version(s) of the questionnaire is (are) used; in countries with more than one official language, the language version is selected at the beginning of the interview.

1.7 Weighting

In general, the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis, a national weighting procedure, using marginal and intercellular weighting, is applied. As such, in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This post-stratification weighting is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The population size weighting factors correct for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country or lower level area sample (Great Britain and Northern Ireland, East and West Germany) is represented in proportion to its population size within different groupings according to the historical states of European unification (e.g. founder members, new members, Euro zone countries) in the case of the EUROPEAN WEIGHTS, as well as within the United Kingdom (WEIGHT UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31) or Germany as a whole (WEIGHT GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general, all countries or samples which do not belong to the respective group under consideration are excluded from calculation. The special weights for the United Kingdom and Germany do exclude all other countries from calculation starting with Eurobarometer 62. The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2, a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 4) are weighted separately, as documented in the respective study and weight variable description. In some surveys, special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding

e-communication equipment on HOUSEHOLD level.

Eurobarometer 87.2 provides three (post-stratification) NATION WEIGHTS: W1 (WEIGHT RESULT FROM TARGET) for separate analysis or comparison of individual samples (countries or regions on sub-national level), W4 (WEIGHT UNITED KINGDOM ONLY) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole, and W3 (WEIGHT GERMANY ONLY), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. W3 and W4 exclude all other countries from calculation, but include the post-stratification factors for the United Kingdom and Germany respectively.

Starting with Eurobarometer 75.4 and in accordance with former practice up to Eurobarometer 61, the archive started to derive (see 1.8. Data preparation) three additional weights W3A, W4A, W3A_W4A in order to provide for the analysis of the United Kingdom and/or Germany as a whole together with all other samples, as separate countries (samples). W3A (WEIGHT RESULT FROM TARGET – UNITED GERMANY) combines the weighting factors for Germany as a whole (redressment factors plus populations size factors East/West) and the redressment factors for all other countries (Great Britain and Northern Ireland separated). W4A (WEIGHT RESULT FROM TARGET – UNITED KINGDOM) combines the weighting factors for the United Kingdom as a whole (redressment factors plus populations size factors) and the redressment factors for all other countries (Germany East and West separated). W3A_W4A (WEIGHT RESULT FROM TARGET – NATION) combines the weighting factors for the United Kingdom as a whole, the weighting factors for Germany as a whole), and the redressment factors for all other countries. Unlike the originating weights, W4 (WEIGHT UNITED KINGDOM ONLY) and W3 (WEIGHT GERMANY ONLY), all countries are included in calculations.

Additional HOUSEHOLD WEIGHTS (W31 to W79, WEX_HH) are provided for questions informing about the respondent's household in the E-COMMUNICATIONS module and for these data on household level. Their general function is equivalent to the in each case corresponding standard weight, as for example the post-stratification weights W1 (individual level) and W31 (household level).

The EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries, of accession or candidate countries, and of Euro zone countries, representing different historical states of European integration (e.g. EU6 = six founder members) . All post-stratification factors are included.

Table 2: Overview of population size weights on European level

European Weights in Eurobarometer 87.2	Function
W5 to W9, W11, W14, W22, W23, W87; HH: W35 to W39, W41, W44, W52, W53, W67	grouping EU member countries
W10, W13, W24, W94; HH: W40, W43, W54, W74	grouping new member countries
-	grouping candidate/accession countries
-	grouping member + candidate/accession countries
W29, W30, W81, W82, W83, W84, W85, W86, W89, W90, W98, W99; HH: w42 (only HH), W59, W60, W61, W62, W63, W64, W65, W66, W69, W70, W78, W79, W73 (only HH)	grouping (non-)Eurozone countries
wextra / HH: wex_hh	extrapolating population size (15+) for each country

For more detailed information on the individual weights please see the corresponding variable description.

1.8 Data preparation

The data received by the GESIS Eurobarometer Data Service from TNS opinion were checked for completeness, missing data and duplicate records, for illegal (wild) codes and for (formal) consistency of response patterns and question routing. Errors discovered by these procedures are documented or corrected, as a general rule after consulting related additional documentation (e.g. tabular reports) or the data provider. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable DDI-XML compliant documentation was created for this dataset by GESIS.

Starting with Eurobarometer 76.1, the traditional variable naming by serial V-numbers (V1 to Vn) has been replaced by a system based on question and item numbers in the questionnaire and elsewhere on standard mnemo-technicals. The dot used in the original TNS variable names for multiple response dummy variables is replaced by underscore in view of potential software incompatibilities.

The archive identification variables comprise the archive study identification number ('studyno'), the digital object identifier ('doi') of the present dataset version, the version number and date ('version') and the edition type ('edition'). A unique case id ('uniqid') for the complete dataset has been constructed from the TNS country id (digits 1-2) and the TNS case/respondent id (digits 3-8).

Three country/sample identification variables are supplied, maintaining the original country/sample codes ('tncntry'), applying the established archive standard codes for the Eurobarometer series ('country'), and an alphanumerical variable applying the ISO 3166-1 alpha-2 codes ('isocntry') with adaptations for Great Britain and Northern Ireland (ISO 3166-2), for East and West Germany, and for Northern Cyprus (Turkish Cypriot Community).

GESIS added 'Inappropriate' (INAP) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the original questionnaire was adhered to for (almost) every respondent. An additional INAP category was defined whenever a question or group of questions were not surveyed in one or more countries, or if variables refer to country specific items (e.g. region variable P7).

Users should note that answers to multiple-response questions are (originally) represented by a series of binary 'dummy' variables (i.e. variables which take on values of one and zero only), creating separate 'dummy' variables also to explicitly represent 'Don't know', 'No answer/refusal' or other residual responses, such as 'None of the above'. GESIS has recoded these residual responses in the case of uncommon minor inconsistencies in accordance with the series of substantial answers.

GESIS has recoded the missing answers (NA) represented in the original data set by blanks (system missing) to standard values. Their practically complete absence suggests that eventual cases of any not explicitly coded item non-response might be collapsed with the DK (don't know) category.

Question text and contingency text appearing in the variable description is taken from the English language version of the basic (bilingual) questionnaire (master questionnaire). Coding schemes and other documentation are based on the English language version of the basic questionnaire or on the respective SPSS data definition statements as provided by TNS opinion. In case of any discrepancy between questionnaires, SPSS definitions and data regarding the coding scheme of a variable, GESIS, as a general

rule, carried out any correction in agreement with the data provider.

If the documentation for country-specific questions or answer categories is provided in another language than English, the archive documents the original language wording and supplies the English translation in brackets.

Region NUTS 2 categories for Portugal have been edited and adapted to changes as of 2002 (NUTS version 2003) which are reflected in Eurobarometer starting with wave 62 (confirmed by TNS). Region NUTS 1 categories for Greece have been edited correcting for the non-coverage of Ionian and Aegean Islands starting with Eurobarometer 62 (confirmed by TNS).

P7 (REGION – NUTS CODES) – variables ‘nuts’ and ‘nutslv’: The integrated NUTS variable has been derived by GESIS from the original TNS country-wise P7 variables in accordance with NUTS units and (alphanumeric) codes defined in the Nomenclature of Territorial Units for Statistics. For each country the lowest subdivision level has been considered insofar consistent with or clearly mappable to one of the NUTS levels as valid for the relevant time period (<https://ec.europa.eu/eurostat/web/nuts/history>).

W3A/W4A (NATION WEIGHTS) – variables ‘w3a’/‘cntry_de’, ‘w4a’/‘cntry_gb’, ‘w3a4a’/‘nation’: Starting with Eurobarometer 62 the original SPECIAL WEIGHTS for the UNITED GERMANY (East + West) and the UNITED KINGDOM (Great Britain + Northern Ireland) automatically exclude all other samples/countries from the calculation. In accordance with former practice up to Eurobarometer 61, GESIS now started to derive three additional weights (W3A, W4A, W3A_W4A) in order to provide for the analysis of the United Kingdom and/or Germany as a whole together with all other samples, as separate countries (nations). They combine the weights W3 (population size + redressment factor for Germany) or/and W4 (population size + redressment factor for the United Kingdom) with W1 (redressment factor for all other countries).

All INDEX and TOTAL variables have been checked and documented accordingly.

More detailed information on data preparation, harmonization or regarding inconsistencies is noted on variable level, if applicable.

1.9 Further remarks

Question module QA ‘Designing Europe’s future’ is largely based on Standard Eurobarometer waves 86.2 (ZA6788), 84.3 (ZA6643), 83.3 (ZA5998), 79.3 (ZA5689), and 77.3 (ZA5612).

Question module QB ‘E-Communications and Digital Single Market’ is partly based on questions asked in the context of the corresponding module surveyed in the framework of Eurobarometer 84.2 (ZA6642). For parts of the e-communications questions, the respondents are asked to answer for their household. Alternative weighting variables are suited for the descriptive analysis of the corresponding variables on household level (w31 to w79 and wex_hh).

Starting with Eurobarometer 81.3 (with 84.1 for Germany), the category scheme for country specific protocol variables P6 (SIZE OF COMMUNITY) has changed considerably. Categories for all countries have been harmonized among each other to three values (Rural area - Towns and suburbs/small urban area - Cities/large urban areas).

Starting with Eurobarometer 81.3 the category scheme for country specific protocol variables P7 (REGION) has changed for some countries, in particular introducing NUTS categories for Ireland, Estonia, and Croatia.

Please note that gen1 to gen6 are based on age instead of year of birth, which may entail a slightly inaccurate categorization for some respondents. Moreover, additional discrepancy in the categorization might be due to the potential use of years other than the survey year.

Derived variable d43_qb1 has been modified in dataset version v3-0-0 to make consistent with the official tabular report. Respondents who answer DK (code 11) in source variable qb1_1 have been recoded to '9' (Inap. (11 in qb1_1)) in d43_qb1. Furthermore, there are slight implausibilities in the combined answer categories when comparing with the source variables d43a, d43b, and qb1_1. This might be due to the mix of personal and household related questions.

Derived variable qb5t_1 has been modified and corrected by GESIS. Cases coded '98' ('Other combination or unknown combination (1 in qb5_2 to qb5_8 only once and 1 in qb5_9)') and '99' ('No bundle mentioned (1 in qb5_1)') have been constructed in accordance with input variables qb5_1 to qb5_10. Categories 1 and 4 to 9 have been corrected in accordance with input variables qb5_1 to qb5_10 and are consistent with official results.

Derived variable qb12t_4 has been modified and corrected by GESIS in accordance with input variables qb12_1 to qb12_4 and information in the official Excel volume: Respondents coded DK throughout variables qb12_1 to qb12_4 have been coded to '0' (Not mentioned) in qb12t_4. Please note: In contrast to the supplied dataset, the official Excel volumes disregard certain cases with no other (landline or personal mobile) phone in d43a/b (coded 99 in qb12_1 or qb12_2) in qb12t_4.

Derived variable qb12tt_4 has also been modified by GESIS, now corresponding with the Excel volume: Respondents coded DK in variables qb12_5 and qb12_6 have been coded to '0' (Not mentioned) in qb12tt_4.

Derived variable qb12t3_4 has been modified and corrected by GESIS in accordance with input variables qb12_1 to qb12_6 and information in the official Excel volume: Respondents coded DK throughout variables qb12_1 to qb12_6 have been coded to '0' (Not mentioned) in qb12t3_4. Please note: In line with the official Excel volume, the previous version of this variable (up to v2-0-0) disregards certain cases with no other (landline or personal mobile) phone in d43a/b (coded 99 in qb12_1 or qb12_2) in qb12t_4. This was adjusted by GESIS in version v3-0-0 in order to establish conformity with qb12t_4.

Derived variables qb14t_1 and qb14t_2 differ slightly in categories 4 and 5 from the official tabular reports. Cases coded DK in filter variables qb12_1 resp. qb12_2 are included in category 4 in the dataset at hand, whereas in the Excel volumes these cases are assigned to category 5. Please consult the detailed value labels of the categories for further information.

Variable split was derived by GESIS on the basis of qa10_4 and qa10_5.

Module QA is available starting with version v2-0-0 (embargo update).

The end-of-fieldwork dates implied by the values in protocol variable p1 (date of interview) differ slightly from those indicated in the technical specifications provided by TNS for some countries.

Data for protocol variables p8 (postal code), p9 (sample point number) and p10 (interviewer number) have not been made available.

2 Eurobarometer series description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general, they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; 'Attitudes towards Europe' (GESIS study ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He had the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid-nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999, the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papacostas as head of unit between 2003 and 2010.

At present, the Eurobarometer surveys are carried out on the general responsibility of the European Commission Directorate-General Communication, COMM.A.3 'Media Monitoring & Eurobarometer', with Maria Letizia Albergati as head of the unit and David Voidies as head of the Eurobarometer sector.

The special topic modules are requested by the respectively responsible EC Directorate General, as regards the content. Since 2007, the European Parliament is commissioning its own survey ('Parlemeter') through the Public Opinion Monitoring Unit of the European Parliament, in close cooperation with the DG COMM unit and within the same survey framework.

The main survey results are regularly published on the European Commission's Public Opinion website (<https://europa.eu/eurobarometer>) in official standard and special topic reports; detailed tabular reports are published through the European Union Open Data Portal (<https://data.europa.eu/data>).

2.4 Development of geographical and population coverage

In all European Union (formerly European Communities) member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics, starting in 1999 (EB51.1). Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the Standard Eurobarometer series, even before starting the accession process (e.g. Turkey or Macedonia). Further countries are continuously added in accordance with the EU membership application and accession process.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriot Community (Northern Cyprus) since 2004 for selected standard and topical waves.

Table 3: EU enlargement and countries covered by Standard and Special Eurobarometer

	EB 82.3 11/2014	<i>Albania (CC as of June 2014)</i>	<i>AL</i>	<i>1000</i>	<i>Standard modules</i>

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 4: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24, 16-30	17, 28.1, 34.2, 47.2OVR, 55.1OVR, 85.1OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.2OVR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)
Sampling experiment	Non-Nationals	41.0

2.5 Standard question program and special topics

The Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently, Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990), additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues (table 5). Selected subsets of standard trend questions appear in the context of related special topics (e.g. 'The Future of Europe' or 'European Parliament Eurobarometer').

Table 5: Overview of Eurobarometer surveys with standard EU and trend question modules

Standard and EU trend surveys	Fieldwork	GESIS Study ID	Standard Report	Subset	Special Topic

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <https://www.gesis.org/eurobarometer-data-service/home/>

3 Dataset structure and standards

The processing and documentation of the Standard and Special Eurobarometer are based on standards agreed upon between the Inter-university Consortium for Political and Social Research (ICPSR) and the GESIS Eurobarometer Data Service, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable, it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structures

In general, the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of administrative/technical variables. These comprise the ARCHIVE and dataset ID variables (studyno1, studyno2, doi, version, edition, survey, split (if applicable), caseid, uniqid), the COUNTRY ID variables with several standard variables identifying the different countries (or sub-national samples) and relevant groups of countries (or sub-national samples) in the dataset, arranged in pairs with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric variable ('isocntry') is provided based on the ISO 3166 country code standard (see 1.8).

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). Starting with Eurobarometer 76.1, the traditional variables naming by serial V-numbers (V1 to Vn) is replaced by a system based on question and item numbers in the questionnaire and elsewhere on standard mnemo-technicals (see 1.8). Likewise, from survey 76.1 onwards, constructed total or index variables, usually as provided by the fieldwork institute, are listed right after the question variables on which they are based. The dataset is concluded by three additional weights and their corresponding NATION country variables 'w3a'/'cntry_de', 'w4a'/'cntry_gb', 'w3a4a'/'nation' (see 1.8).

Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 und up to wave 75 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except for multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country

specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49, the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes provided in the questionnaire remain comparable.

Starting with Eurobarometer 74.1, an additional standardized REGION variable 'nuts' (REGION - NUTS CODES) is constructed, integrating all participating countries with regional units defined in accordance with the EUROSTAT Nomenclature of Territorial Units for Statistics (NUTS). For each country the lowest available NUTS subdivision level is considered, whereby the hierarchical structure always implies all higher subdivision levels. The official NUTS codes are coded verbatim in accordance with the in each case valid (applicable) NUTS version as documented in the official EUROSTAT classification history (History of NUTS). A second variable indicates the lowest coded NUTS LEVEL 'nutslvl' for each country. All original regional subdivisions and categories remain coded separately and unchanged in the country-wise P7 variables. Details are documented with the respective country specific and/or integrated variable.

3.2.2 Missing values

In general, missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ('don't know') responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. 'not ascertained' resp. 'no answer') and the value 9 (99, 999, ...) for INAP (i.e. 'inappropriate' resp. 'not applicable'). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or 'level', e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

As noted in chapter 1.8, missing answers (NA) represented in the original dataset by blanks (system missing) have been recoded to standard values by GESIS. Their practically complete absence suggests that eventual cases of any not explicitly coded item non-response might be collapsed with the DK (don't know) category.

3.3 International documentation standard (DDI)

The study and variable level documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The variable level documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (COUNTRY CODE - ISO 3166). In the case of Greece the non-ISO abbreviation EL* is used in parallel, as introduced by EUROSTAT as of NUTS version 2010.

AL	Albania	IE	Ireland
AT	Austria	IT	Italy
BE	Belgium	IS	Iceland
BG	Bulgaria	LT	Lithuania
CY	Cyprus	LU	Luxembourg
CY-TCC	Turkish Cypriote Community	LV	Latvia
CZ	Czech Republic	ME	Montenegro
DE	Germany (-1989)	MK	Macedonia FYROM)
DE-W	Germany West (1990 ff.)	MT	Malta
DE-E	Germany East (1990 ff.)	NL	The Netherlands
EE	Estonia	NO	Norway
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	RS	Serbia
GB-GBN	Great Britain	SE	Sweden
GB-NIR	Northern Ireland	SI	Slovenia
GR / EL*	Greece	SK	Slovakia
HR	Croatia	TR	Turkey
HU	Hungary		

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded 'real' values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission's official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

Header with DIGITAL OBJECT IDENTIFIER (DOI) linked to the study description in the GESIS Data Catalogue.	Eurobarometer 67.1 - February-March 2007 GESIS Study No. 4529 (v 3.0.1); doi: 10.4232/1.10983
VARIABLE NAME (serial number assigned by GESIS) and VARIABLE LABEL as defined in the dataset.	v77 - QA1 FEELING FULFILLED: PROFESSIONAL LIFE
QUESTION NUMBER and full QUESTION TEXT from the basic questionnaire, including interviewer instructions. The numbers or letters that may appear together with the original question number reflect the item order (multiple item or multiple response questions), or indicate if a question was recoded (R) or summarized (T), or if asked only in a single country (country abbreviation).	Q.A1 ASK Q.A IN EU27 To what extent would you say that the life you live allows you to feel fulfilled in...? (SHOW CARD WITH SCALE - ONE ANSWER PER LINE) (READ OUT) Q.A1_2 Your professional life 1 Totally fulfilled 2 Fairly fulfilled 3 Not very fulfilled 4 Not at all fulfilled 5 Not applicable (SPONTANEOUS) 6 DK 9 Inap. not EU27 (not coded 1 to 31 in V6) Derivation: ... Note: ...
CODE VALUES occurring in the data for this variable and complete ANSWER TEXT from the basic questionnaire. Code values may differ from the questionnaire specification due to standardization. Abbreviations commonly used in the code definitions are DK (don't know), NA (not ascertained) and INAP (inappropriate).	
DERIVATION information refers to the construction principle of indices or other derived variables (not in the example). NOTE delineates additional explanatory text subsuming trend information (last appearance of the question) or archive remarks on data processing and other issues relevant for the understanding or application of the variable.	
CROSS-TABULATION: The absolute frequencies of the occurrence of values (<i>absolute values</i>) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies (<i>row percent</i>) refer to the valid cases (<i>n valid sum</i>), i.e. the total number of cases (<i>n sum</i>) reduced by the number of cases defined as missing data (<i>M</i>). For display and place saving reasons excluded countries or areas may be completely dropped from the table.	
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (<i>M</i>), i.e. <i>percent</i> on the basis of all cases (<i>sum</i>) and <i>valid percent</i> on the basis of the <i>valid cases</i> .	

5 Variable documentation

Variable, Label

Question Text (English Language)

studyno1 - ARCHIVE STUDY NUMBER - DISTRIBUTOR

Archive study number – distributor

Study number of the distributing data archive.

6862 GESIS STUDY ID ZA6862

studyno1

Value	Label	Missing	Count	Percent	Valid Percent
6862	GESIS STUDY ID ZA6862		28501	100.0	100.0
	Sum		28501	100.0	100.0
	Valid Cases		28501		

studyno2 - ARCHIVE STUDY NUMBER - PUBLISHER

Archive study number – publisher

Study number of the data archive which is publishing this dataset version.

6862 GESIS STUDY ID ZA6862

studyno2

Value	Label	Missing	Count	Percent	Valid Percent
6862	GESIS STUDY ID ZA6862		28501	100.0	100.0
	Sum		28501	100.0	100.0
	Valid Cases		28501		

doi - DIGITAL OBJECT IDENTIFIER

Digital object identifier

This variable holds the Digital Object Identifier (DOI) for the dataset at hand as registered via the da|ra registration agency for economic and social science data. Each dataset version (see variable 'version') has a unique persistent DOI.

For direct access to the complete archive dissemination package for this study, including new dataset versions, the DOI needs to be appended to the resolver service URL: <http://dx.doi.org/doi:10.4232/1.13788>

In terms of good scientific practice, the DOI is an important element for the correct citation of a dataset.

doi

Value	Label	Missing	Count	Percent	Valid Percent
doi:10.4232/1.13788			28501	100.0	100.0
	Sum		28501	100.0	100.0
	Valid Cases		28501		

version - GESIS ARCHIVE VERSION & DATE

GESIS archive version & date

3.0.0 '2021-09-23'

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

For details of the version history and for information on errata in current or former dataset versions, please consult the GESIS data catalogue entry (study description) persistently referenced by the dataset DOI (Digital Object Identifier).

version

Value	Label	Missing	Count	Percent	Valid Percent
3.0.0 (2021-09-23)			28501	100.0	100.0
	Sum		28501	100.0	100.0
	Valid Cases		28501		

edition - DATASET EDITION

Dataset edition

This variable identifies the type of archive release for the dataset at hand.

1 Archive pre-release

2 Archive edition

edition

Value	Label	Missing	Count	Percent	Valid Percent
2	ARCHIVE EDITION		28501	100.0	100.0
	Sum		28501	100.0	100.0
	Valid Cases		28501		

survey - SURVEY IDENTIFICATION

Survey identification

The number identifying the Eurobarometer survey.

872 Eurobarometer 87.2 (April 2017)

survey

Value	Label	Missing	Count	Percent	Valid Percent
872	Eurobarometer 87.2 (April 2017)		28501	100.0	100.0
	Sum		28501	100.0	100.0
	Valid Cases		28501		

caseid - TNS CASE ID (SEE NOTE)

TNS case ID

The original non-unique case (interview) identification numbers as provided by the fieldwork institute (TNS). The unique respondent identification variable unqid adds the original country identification codes (tnscntry) as a prefix to the original case ID numbers in order to make them unique.

Note:

Actual number is coded.

For Eurobarometer 87.2 no country specific TNS case id for DE-W, DE-E and GB-GBN is provided (variable 'caseid' is coded '9999999', variable unqid is coded '999999999'). The dataset does include an original unique serial id across all countries (variable 'serialid').

uniqid - UNIQUE RESPONDENT ID (CASEID BY TNS COUNTRY CODE) (SEE NOTE)

Unique respondent ID (caseid by tnsctry)

This unique respondent identification is composed of the original TNS country code and the original TNS interview number. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 04: Greece; 05: Spain; 06: Finland; 07: France; 08: Ireland; 09: Italy; 10: Luxembourg; 11: Netherlands; 12: Austria; 13: Portugal; 14: Sweden; 20: Germany West; 21: Germany East; 22: Great Britain; 23: Northern Ireland; 31: Bulgaria; 32: Cyprus (Republic); 33: Czech Republic; 34: Estonia; 35: Hungary; 36: Latvia; 37: Lithuania; 38: Malta; 39: Poland; 40: Romania; 41: Slovakia; 42: Slovenia; 46: Croatia). The remaining digits contain the country-specific questionnaire numbers.

Note:

Actual number is coded.

For Eurobarometer 87.2 no country specific TNS case id for DE-W, DE-E and GB-GBN is provided (variable 'caseid' is coded '9999999', variable uniqid is coded '999999999'). The dataset does include an original unique serial id across all countries (variable 'serialid').

serialid - SERIAL CASE ID (PROVIDED BY TNS)

Serial case ID (provided by TNS)

This unique respondent identification number has been provided by TNS. It shows the position of the cases in the dataset, starting with 1 and ending with 28501 (total number of cases).

Note:

Actual number is coded.

split - QUESTIONNAIRE SPLIT (QA10_4 & QA10_5)

Split ballot

This questionnaire split concerns QA10_4 and QA10_5.

1 SPLIT BALLOT A

2 SPLIT BALLOT B

Note:

Variable split was derived by GESIS on the basis of qa10_4 and qa10_5.

split

Value	Label	Missing	Count	Percent	Valid Percent
1	SPLIT BALLOT A		14345	50.3	50.3
2	SPLIT BALLOT B		14156	49.7	49.7
	Sum		28501	100.0	100.0
	Valid Cases		28501		

tnscntry - ORIGINAL TNS COUNTRY/SAMPLE ID

Original TNS country/sample ID

The original country identification codes as applied by the fieldwork institute (TNS).

isocntry - COUNTRY CODE - ISO 3166

Country code - in accordance with ISO 3166-1-alpha-2 country code

All surveyed countries and regions, i.e. including separate samples for East-/West-Germany, Great Britain/Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the 'historical' East/West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized 'Turkish Republic of Northern Cyprus'.

Note:

Use of weighting factor w1 is optional.

w1 - WEIGHT RESULT FROM TARGET

w1 Weight result from target

This POST-STRATIFICATION WEIGHT is based on a comparison for each sample with the respective universe description. As such in all countries, gender, age, region and size of locality are introduced in the iteration procedure carried out by the fieldwork institutes.

British and Northern Irish as well as East and West German samples are weighted separately. The weight reproduces the real number of cases for each country. In terms of its general function it corresponds to former NATION WEIGHT II (until EUROBAROMETER 31 (March-April 1989)).

w3 - WEIGHT UNITED GERMANY ONLY

w3 Weight United Germany (only)

This POPULATION SIZE WEIGHT adjusts the East and the West German (sub-national) samples to their share in the total population aged 15 and over, of the united Germany. Weight w3 must be applied whenever Germany is to be analyzed as a whole. The post-stratification weighting factors are included for both samples. All other samples are excluded from analysis.

w3

w5 - WEIGHT EU6

w5 Weight EU6

This POPULATION SIZE WEIGHT refers to the six EC founder members: France, Belgium, Netherlands, West Germany, Italy, and Luxembourg. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w5 must be applied whenever these six EC founder countries are to be analyzed altogether as a group.

w9 - WEIGHT EU12+DE-E

w9 Weight EU12 + DE-E

This POPULATION SIZE WEIGHT equals WEIGHT EU12 but in addition including East Germany (former German Democratic Republic) after the unification of Germany on October 3, 1990 (Eurobarometer 34 (October-November 1990)). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w9 must be applied whenever these twelve member countries are to be analyzed altogether as a group including the Eastern part of Germany (new German federal states).

w22 - WEIGHT EU27

w22 Weight EU27

This POPULATION SIZE WEIGHT includes all 25 member countries after the 2004 enlargement, plus the new members as of 2007 Bulgaria and Romania. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of the European Union. The post-stratification weighting factors for all samples/countries are included. Weight w22 must be applied whenever these 27 countries are to be analyzed altogether as a group.

w24 - WEIGHT EU NMS 12

w24 Weight EU NMS 12

This POPULATION SIZE WEIGHT refers to the group of the 12 new member countries as of the enlargement in January 2007: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia, Bulgaria and Romania. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w24 must be applied whenever these 12 countries are to be analyzed altogether as a group.

w29 - WEIGHT EURO ZONE 15 (EU27)

w29 Weight EURO ZONE 15 (EU27)

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2008. These are 15 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w29 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

w89 Weight EURO ZONE 17 (EU27)

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2011. These are 17 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008), Slovakia (introduction as of January 1, 2009), and Estonia (introduction as of January 1, 2011). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w89 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

w84 - WEIGHT NON-EURO ZONE 18 - EU NMS 12 (EU27)

w84 Weight NON-EURO ZONE 18 - EU NMS 12 (EU27)

This POPULATION SIZE WEIGHT separates the group of countries (Czech Republic, Hungary, Lithuania, Poland, Bulgaria, and Romania) belonging to the 12 new members after the enlargement of January 2007 which did not introduce the EURO up to January 1, 2014. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. It refers to the group of the EU27 countries excluding Croatia. Weight w84 must be applied whenever these 6 countries are to be analyzed altogether as a group.

w85 - WEIGHT EURO ZONE 19 (EU28)

w85 Weight EURO ZONE 19 (EU28)

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2015. These are 18 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008), Slovakia (introduction as of January 1, 2009), Estonia (introduction as of January 1, 2011), Latvia (introduction as of January 1, 2014), and Lithuania (introduction as of January 1, 2015). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w85 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

w31 - WEIGHT RESULT FROM TARGET - HH

w31 WEIGHT RESULT FROM TARGET – HOUSEHOLD WEIGHT

This POST-STRATIFICATION WEIGHT is based on a comparison for each sample with the respective universe description in terms of households. British and Northern Irish as well as East and West German samples are weighted separately.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w35 - WEIGHT EU6 - HH

w35 WEIGHT EU6 - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT refers to the six EC founder members: France, Belgium, Netherlands, West Germany, Italy, and Luxembourg. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. Weight w35 must be applied whenever these six EC founder countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB) an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w36 - WEIGHT EU9 - HH

w36 WEIGHT EU9 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT adds Denmark, Ireland, Great Britain and Northern Ireland to the EU6 countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. Weight w36 must be applied whenever these nine countries as of the 1973 enlargement are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w37 - WEIGHT EU10 - HH

w37 WEIGHT EU10 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT adds Greece to the EU9 countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. Weight w37 must be applied whenever these ten countries as of the 1981 enlargement are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. w38 - WEIGHT EU12 - HH

w38 WEIGHT EU12 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT adds Spain and Portugal to the EU10 countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. Weight w38 must be applied whenever these twelve countries as of the 1986 enlargement are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. w39 - WEIGHT EU12+DE-E - HH

w39 WEIGHT EU12 + DE-E – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT equals WEIGHT EU12 but in addition including East Germany (former German Democratic Republic) after the unification of Germany on October 3, 1990 (Eurobarometer 34). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. Weight w39 must be applied whenever these twelve member countries are to be analyzed altogether as a group including the Eastern part of Germany (new German federal states).

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w40 - WEIGHT EU NMS 3 - HH

w40 WEIGHT EU NMS 3 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT only refers to the three new members as of January 1995: Finland, Sweden, and Austria. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. All other samples are excluded from calculation. Weight w40 must be applied whenever these three countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w54 - WEIGHT EU NMS 12 - HH

w54 WEIGHT EU NMS 12 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT refers to the group of the 12 new member countries as of the enlargement in January 2007: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia, Bulgaria and Romania. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. All other samples are excluded from calculation. Weight w54 must be applied whenever these 12 countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w52 - WEIGHT EU27 - HH

w52 WEIGHT EU27 – HOUSEHOLD WEIGHT

WEIGHT EU27 includes all 25 member countries after the 2004 enlargement, plus the remaining Accession Countries Bulgaria and Romania. This POPULATION SIZE WEIGHT adjusts each national sample in proportion to its share in the total population aged 15 and over, of the European Union plus Bulgaria and Romania. Weight w52 must be applied whenever these 27 countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w74 - WEIGHT EU NMS 13 - HH

w74 Weight EU NMS 13 - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT refers to the group of the 13 new member countries as of the enlargement in January 2007 and the accession of Croatia in July 2013: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia, Bulgaria, Romania, and Croatia. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. All other samples are excluded from calculation. Weight w74 must be applied whenever these 13 countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w53 - WEIGHT EU28 (EU27 + HR) - HH

w53 Weight EU28 (EU27 + HR) – HOUSEHOLD WEIGHT

WEIGHT EU27 + HR includes all 25 member countries after the 2004 enlargement, the new members as of 2007 Romania and Bulgaria, and Croatia as the forthcoming member as of July 2013. This POPULATION SIZE WEIGHT adjusts each national sample in proportion to its share in the total population aged 15 and over, of NATION GROUP EU28 (EU27 + HR). Weight w53 must be applied whenever these countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w67 - WEIGHT EU28 (NO UK) - HH

w67 Weight EU28 (NO UK) – HOUSEHOLD WEIGHT

WEIGHT EU28 (NO UK) refers to the EU28 countries but excludes the United Kingdom. This POPULATION SIZE WEIGHT adjusts each national sample in proportion to its share in the total population aged 15 and over, of NATION GROUP EU27B (EU28 NO UK). The post-stratification weighting factors are included. Weight w67 must be applied whenever these countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w42 - WEIGHT EURO ZONE 13 - HH

w42 WEIGHT EURO ZONE 13 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2007. These are 13 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), and Slovenia (introduction as of January 1, 2007). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. Weight w42 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

Note:

WEIGHT EURO ZONE 13 - HH is only available as household version.

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w59 - WEIGHT EURO ZONE 15 (EU27) - HH

w59 Weight EURO ZONE 15 (EU27) - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2008. These are 15 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w59 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w78 - WEIGHT EURO ZONE 18 (EU28) - HH

w78 Weight EURO ZONE 18 (EU28) - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2014. These are 18 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008), Slovakia (introduction as of January 1, 2009), Estonia (introduction as of January 1, 2011), and Latvia (introduction as of January 1, 2014). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. All other samples are excluded from calculation. It refers to the group of the EU28 countries including Croatia. Weight w78 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w63 - WEIGHT NON-EURO ZONE 18 (EU27) - HH

w63 Weight NON-EURO ZONE 18 (EU27) - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT separates the group of countries (Denmark, United Kingdom, Sweden, Czech Republic, Hungary, Lithuania, Poland, Bulgaria, Romania) which did not introduce the EURO up to January 1, 2014. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. All other samples are excluded from calculation. It refers to the group of the EU27 countries excluding Croatia. Weight w63 must be applied whenever these countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w64 - WEIGHT NON-EURO ZONE 18 - EU NMS 12 (EU27) - HH

w64 WEIGHT NON-EURO ZONE 18 – EU NMS 12 (EU27) - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT separates the group of countries (Czech Republic, Hungary, Lithuania, Poland, Bulgaria, and Romania) belonging to the 12 new members after the enlargement of January 2007 which did not introduce the EURO up to January 1, 2014. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. It refers to the group of the EU27 countries excluding Croatia. Weight w84 must be applied whenever these 6 countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w79 - WEIGHT NON-EURO ZONE 18 (EU28) - HH

w79 Weight NON-EURO ZONE 18 (EU28) - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT separates the group of countries (Denmark, United Kingdom, Sweden, Czech Republic, Hungary, Lithuania, Poland, Bulgaria, Romania, Croatia) which did not introduce the EURO up to January 1, 2014. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. All other samples are excluded from calculation. It refers to the group of the EU28 countries including Croatia. Weight w79 must be applied whenever these countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w65 - WEIGHT EURO ZONE 19 (EU28) - HH

w65 Weight EURO ZONE 19 (EU28) - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2015. These are 18 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008), Slovakia (introduction as of January 1, 2009), Estonia (introduction as of January 1, 2011), Latvia (introduction as of January 1, 2014), and Lithuania (introduction as of January 1, 2015). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w65 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

wex_hh - WEIGHT EXTRAPOLATED POPULATION 15+ - HH

wex_hh WEIGHT EXTRA POPULATION – HOUSEHOLD WEIGHT

WEIGHT EXTRA extrapolates the actual universe (population aged 15 or more) for each country (sample), i.e. this weight variable integrates all other available weights, but does not reproduce the number of cases in the dataset.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

qa1 - EU BUDGET - APPRAISAL STATEMENT

A. DESIGNING EUROPE'S FUTURE

Now, lets talk about another topic.

QA1

With which of the following two statements do you most agree?

(READ OUT - ONE ANSWER ONLY)

- 1 The EU should have greater financial means given its political objectives
- 2 The EU's political objectives do not justify an increase in the Union's budget
- 3 DK

qa2t_18 - EU BUDGET SPENT ON: DK (QA2A ONLY)

[QA2A

On which of the following do you think most of the EU budget is spent? Firstly?

QA2B

Any others?]

QA2T_18 DK (QA2A only)

0 Not mentioned

1 Mentioned

Derivation:

This variable repeats answers to category '18' (DK) in qa2a, while all other answers to qa2a are summarized with qa2b in variables qa2t_1 to qa2t_17.

Note:

See qa2a and qa2b for complete question text.

qa7a_r - EUROPEAN UNIFICATION SPEED: CURRENT (REC)

Current speed of European unification - recoded to three categories

- 1 Total 'Rather standstill' (coded 1 and 2 in qa7a)
- 2 Total 'Moderate speed' (coded 3 to 5 in qa7a)
- 3 Total 'Rather running' (coded 6 and 7 in qa7a)
- 9 Inap. DK (coded 8 in qa7a)

Derivation:

This variable groups answers to question qa7a.

[qa7a In your opinion, what is the current speed of building Europe? Please look at these figures. N°1 is standing still, N°7 is running as fast as possible. Choose the one which best corresponds with your opinion of the current speed of building Europe.]

Note:

See qa7a for the complete question text.

Variable qa7a_r was named qa7ar in former versions of this dataset.

qa7b_r - EUROPEAN UNIFICATION SPEED: PREFERRED (REC)

Preferred speed of European unification - recoded to three categories

- 1 Total 'Rather standstill' (coded 1 and 2 in qa7b)
- 2 Total 'Moderate speed' (coded 3 to 5 in qa7b)
- 3 Total 'Rather running' (coded 6 and 7 in qa7b)
- 9 Inap. DK (coded 8 in qa7b)

Derivation:

This variable groups answers to question qa7b.

[qa7a In your opinion, what is the current speed of building Europe? Please look at these figures. N°1 is standing still, N°7 is running as fast as possible. Choose the one which best corresponds with your opinion of the current speed of building Europe.

QA7B

And which corresponds best to the speed you would like?]

Note:

See qa7b for the complete question text.

Variable qa7b_r was named qa7br in former versions of this dataset.

d43t - PHONE AVAILABLE (SUMMARIZED)

Availability of mobile and/or landline phones - summarized

- 1 Mobile only (coded 1 in d43b and coded 2 in d43a)
- 2 Landline only (coded 1 in d43a and coded 2 in d43b)
- 3 Landline and mobile (coded 1 in d43a and coded 1 in d43b)
- 4 No telephone (coded 2 in d43a and coded 2 in d43b)

Derivation:

This variable summarizes answers to question d43a and d43b.

[d43a Do you own a fixed telephone in your household?

d43b Do you own a personal mobile telephone?]

Respondents coded 2 in d43a and 1 in d43b are coded 1 ('Mobile only') in d43t. Respondents coded 1 in d43a and 2 in d43b are coded 2 ('Landline only') in d43t. Respondents coded 1 in d43a and d43b are coded 3 ('Landline and mobile') in d43t. Respondents coded 2 in d43a and d43b are coded 4 ('No telephone') in d43t.

Note:

See d43a and d43b for the complete question text.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

d46t1 - OWNERSHIP APARTM/HOUSE (D46_10+D46_11)

Ownership of an apartment or house - summarized

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes responses to d46_10 and d46_11.

[d46 Which of the following goods do you have?

d46_10 An apartment / a house which you have finished paying for

d46_11 An apartment / a house which you are paying for]

Note:

See variable d46 for complete question text.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

d46rm_1 - OWNERSHIP: DESK COMPUTER/LAPTOP & INTERNET (D46_4+D46_5 SUM+D46_8)

Ownership of desk computer/laptop and internet connection at home - summarized

- 0 Not mentioned
- 1 Households with PC having Internet access
- 9 Inap. no computing device (not coded 1 in d46t_4 to d46t_7)

Derivation:

This variable summarizes responses to d46_4, d46_5 and d46_8.

[d46 Which of the following goods do you have?

d46_4 Desk computer

d46_5 Laptop

d46_8 An Internet connection at home]

Note:

See variable d46 for complete question text.

Variable d46rm_1 was named d46rm.1 in former versions of this dataset.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

qb1_1r - MOBILE PHONE ACCESSES HH (RECODED)

Respondents who indicate access to mobile phones including pre or post-paid contracts in the household - recoded

- 1 None
- 2 1
- 3 2
- 4 3
- 5 4 and more
- 8 DK

Derivation:

This variable groups answers to question qb1_1.

[qb1 Thinking about all household members, including yourself, please indicate for each of the following how many of them are available in your household.

qb1_1 Mobile telephones with access to the telephone network. This includes pre and post-paid contracts.]

Note:

See qb1 for complete question text.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

qb1_2t - MOBILE PHONE INTERNET ACCESES HH (SUM)

Respondents who indicate access to the internet by mobile phones including pre or post-paid contracts in the household - summarized

- 1 Households with mobile Internet access
- 2 Households without mobile Internet access

Derivation:

This variable summarizes answers to question qb1_2 in two categories.

[qb1 Thinking about all household members, including yourself, please indicate for each of the following how many of them are available in your household.

qb1_2 Mobile telephone contracts giving access to the Internet. This includes pre and post-paid contracts.]

Note:

See qb1 for complete question text.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

internet - INTERNET ACCESS HH (TOTAL D46_8 & QB1_2)

Respondents who indicate access to the internet in the household - summarized (d46_8 & qb1_2)

- 1 Households with Internet connection at home and mobile Internet
- 2 Households with Internet connection at home and no mobile Internet
- 3 Households with mobile Internet access and no Internet connection at home
- 4 Households without Internet access

Derivation:

Respondents coded 1 in d46_8 and coded 1 to 9 in qb1_2 are coded '1' ('Households with Internet connection at home and mobile Internet').

Respondents coded 1 in d46_8 and not coded 1 to 9 in qb1_2 are coded '2' ('Households with Internet connection at home and no mobile Internet').

Respondents coded 0 in d46_8 and coded 1 to 9 in qb1_2 are coded '3' ('Households with mobile Internet access and no Internet connection at home'). Respondents coded 0 in d46_8 and not coded 1 to 9 in qb1_2 are summarized in category '4' ('Households without Internet access').

[d46 Which of the following goods do you have?

d46_8 An Internet connection at home?

qb1 Thinking about all household members, including yourself, please indicate for each of the following how many of them are available in your household.

qb1_2 Mobile telephone contracts giving access to the Internet. This includes pre and post-paid contracts.]

Note:

See d46 & qb1 for complete question text.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

d43_qb1 - HOUSEHOLD TELEPHONE ACCESS (TOTAL D43T & QB1_1)

Household telephone access - combination of fixed and mobile phones (d43t & qb1_1)

- 1 Households combining a fixed and mobile telephone access
- 2 Households having a fixed telephone access but no mobile telephone
- 3 Households having a mobile telephone access but no fixed telephone
- 4 Households not having a fixed telephone access nor mobile telephone
- 9 Inap. DK (coded 11 in qb1_1)

Derivation:

Code '1' ('Households combining a fixed and mobile telephone access') summarizes respondents with fixed and mobile phone access combined in the household (codes 2 or 3 in d43t and codes 1 to 9 in qa1_1).

Code '2' ('Households having a fixed telephone access but no mobile telephone') summarizes respondents with fixed but no mobile phone access in the household (codes 2 or 3 in d43t and code 10 in qa1_1).

Code '3' ('Households having a mobile telephone access but no fixed telephones') summarizes respondents with mobile but no fixed phone access in the household (codes 1 or 4 in d43t and codes 1 to 9 in qa1_1).

Code '4' ('Households not having a fixed telephone access nor mobile telephone') summarizes respondents with no telephone access in the household (codes 1 or 4 in d43t and code 10 in qa1_1).

[d43a Do you own a fixed telephone in your household?

d43b Do you own a personal mobile telephone?

d43t Availability of mobile and/or landline phones - summarized

qb1 Thinking about all household members, including yourself, please indicate for each of the following how many of them are available in your household.

qb1_1 Mobile telephones with access to the telephone network. This includes pre and post-paid contracts.]

Note:

See d43 & qb1 for complete question text.

Derived variable d43_qb1 has been modified in dataset version v3-0-0 to make consistent with the official tabular report. Respondents who answer DK (code 11) in source variable qb1_1 have been recoded to '9' (Inap. (11 in qb1_1)) in d43_qb1. Furthermore, there are slight implausibilities in the combined answer categories when comparing with the source variables d43a, d43b, and qb1_1. This might be due to the mix of personal and household related questions.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

qb2_1 - TV RECEPTION VIA: AERIAL

QB2

ASK ALL

Does your household receive television ...?

(SHOW SCREEN – READ OUT – MULTIPLE ANSWERS POSSIBLE - CODE 8 AND 10 ARE EXCLUSIVE)

QB2_1 Yes, via an aerial (e.g. on the roof or on the top of the TV set)

0 Not mentioned

1 Mentioned

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qb2_9 - TV RECEPTION VIA: OTHER (SPONT)

QB2

ASK ALL

Does your household receive television ...?

(SHOW SCREEN – READ OUT – MULTIPLE ANSWERS POSSIBLE - CODE 8 AND 10 ARE EXCLUSIVE)

QB2_9 Other (SPONTANEOUS)

0 Not mentioned

1 Mentioned

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qb4_1 - COMMUNICATION STATEMENTS - PHONE NUMBER MORE RELIABLE

In the following question, we would like to compare traditional means of communication that use a telephone number (defined as fixed phone, mobile phone or SMS) and means of communication using Internet (defined as instant messaging, phone call using the Internet applications, e-mails and online social network.)

(READ OUT)

QB4

To what extent do you agree or disagree with the following statements?

(ROTATE STATEMENTS 1 AND 2 - DISPLAY '99' INSTEAD OF 'DK' - SHOW SCREEN - READ OUT - ONE ANSWER PER LINE)

QB4_1 Traditional means of communication that use a telephone number are more reliable when you want to reach someone than means of communication using Internet

- 1 Totally agree
- 2 Tend to agree
- 3 Tend to disagree
- 4 Totally disagree
- 5 DK

qb4_2 - COMMUNICATION STATEMENTS - PHONE NUMBER BETTER CONSUMER PROTECTION

In the following question, we would like to compare traditional means of communication that use a telephone number (defined as fixed phone, mobile phone or SMS) and means of communication using Internet (defined as instant messaging, phone call using the Internet applications, e-mails and online social network.)

(READ OUT)

QB4

To what extent do you agree or disagree with the following statements?

(ROTATE STATEMENTS 1 AND 2 - DISPLAY '99' INSTEAD OF 'DK' - SHOW SCREEN - READ OUT - ONE ANSWER PER LINE)

QB4_2 Traditional means of communication that use a telephone number provide more protection of your consumer rights than means of communication using Internet

- 1 Totally agree
- 2 Tend to agree
- 3 Tend to disagree
- 4 Totally disagree
- 5 DK

qb5t_1 - COMMUNICATION PACKAGE HH - COMBINATIONS (SUM)

Different compositions of communication packages in a household (summarized)

- 1 Fixed telephony +mobile telephony + internet + television
- 2 Fixed telephony +mobile telephony + internet
- 3 Fixed telephony +mobile telephony + television
- 4 Fixed telephony + internet + television
- 5 Mobile telephony + internet + television
- 6 Fixed telephony + mobile telephony
- 7 Fixed telephony + internet
- 8 Fixed telephony and television
- 9 Mobile telephony and internet
- 10 Mobile telephony and television
- 11 Internet and television
- 97 DK
- 98 Other combination or unknown combination (coded 1 in qb5_2 to qb5_8 only once and coded 1 in qb5_9)
- 99 No bundle mentioned (coded 1 in qb5_1)

Derivation:

This variable summarizes answers to qb5 by categorizing the different combinations of services (coded 1 in qb5_2 to qb5_8) contracted in communication packages.

[qb5 Has your household subscribed to two or more of the following services as part of a bundle?

qb5_1 No, we have not bought services as part of a bundle

qb5_2 Yes, fixed line telephone

qb5_3 Yes, mobile telephone

qb5_4 Yes, fixed Internet access

qb5_5 Yes, mobile Internet access

qb5_6 Yes, television channels

qb5_7 Yes, music streaming services

qb5_8 Yes, video streaming or video-on-demand services

qb5_9 Other (SPONTANEOUS)

qb5_10 DK]

Note:

See qb5 for complete question text.

Derived variable qb5t_1 has been modified and corrected by GESIS. Cases coded '98' ('Other combination or unknown combination (1 in qb5_2 to qb5_8 only once and 1 in qb5_9)') and '99' ('No bundle mentioned (1 in qb5_1)') have been constructed in accordance with input variables qb5_1 to qb5_10. Categories 1 and 4 to 9 have been corrected in accordance with input variables qb5_1 to qb5_10 and are consistent with official results.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see

w31 to wex_hh.

qb5t_2 - COMMUNICATION PACKAGE HH - BUNDLE TYPE (SUM)

Number of services in communication packages of a household - bundle types (summarized)

- 0 Single play
- 1 Double play
- 2 Triple play
- 3 Quadruple play
- 4 More than quadruple play
- 8 DK

Derivation:

This variable summarizes answers to qb5 by categorizing the number of services (bundle types) in different combinations of services (coded 1 in qb5_2 to qb5_8) contracted in communication packages.

[qb5 Has your household subscribed to two or more of the following services as part of a bundle?

qb5_1 No, we have not bought services as part of a bundle

qb5_2 Yes, fixed line telephone

qb5_3 Yes, mobile telephone

qb5_4 Yes, fixed Internet access

qb5_5 Yes, mobile Internet access

qb5_6 Yes, television channels

qb5_7 Yes, music streaming services

qb5_8 Yes, video streaming or video-on-demand services

qb5_9 Other (SPONTANEOUS)

qb5_10 DK]

Note:

See qb5 for complete question text.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. qb6 - BUNDLE SERVICES - CHANGED PROVIDER IN HH

QB6

ASK QB6 IF 'HAS A BUNDLE'; QB5=2-8

Have you or someone in your household changed bundle service provider?

(READ OUT – ONE ANSWER ONLY)

- 1 Yes, within the last year
- 2 Yes, between one and two years ago
- 3 Yes, between two and five years ago
- 4 Yes, more than five years ago
- 5 No, never
- 6 DK
- 9 Inap. No service mentioned (coded 0 in qb5_2 to qb5_8)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Comparability:

qb6r - BUNDLE SERVICES - CHANGED PROVIDER IN HH (RECODED)

Change of bundle provider in household - recoded

- 1 At least once
- 2 No, never
- 3 DK
- 9 Inap. No service mentioned (coded 0 in qb5_2 to qb5_8)

Derivation:

This variable groups answers to question qb6.

[QB6

Have you or someone in your household changed bundle service provider?]

Note:

See qb6 for complete question text.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

qb7_1 - PROVIDER CHANGE PROBLEMS: TEMP LOSS OF SERVICES

QB7

ASK QB7 IF 'CHANGED BUNDLE SERVICE PROVIDER'; QB6=1-4

When you changed your bundle service provider, did you experience any of the following problems?

(ROTATE ANSWERS 1 TO 6 - SHOW SCREEN - READ OUT - MULTIPLE ANSWERS POSSIBLE)

QB7_1 There was a temporary loss of services of one day or more

0 Not mentioned

1 Mentioned

9 Inap. Did not change bundle service provider, DK or no service/bundle (not 1 to 4 in qb6)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

ASK QB7 IF 'CHANGED BUNDLE SERVICE PROVIDER'; QB6=1-4

When you changed your bundle service provider, did you experience any of the following problems?

(ROTATE ANSWERS 1 TO 6 - SHOW SCREEN - READ OUT - MULTIPLE ANSWERS POSSIBLE)

QB7_5 You had to pay a penalty to your former service provider because you terminated the contract before the end of the fixed duration under the terms of your contract

0 Not mentioned

1 Mentioned

9 Inap. Did not change bundle service provider, DK or no service/bundle (not 1 to 4 in qb6)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qb8a - INTERNET SUBSCRIPTION MAIN FACTOR - FIRSTLY

QB8A

ASK QB8A IF 'INTERNET CONNECTION AT HOME'; D46=8

When subscribing to an Internet connection what are the main factors you consider? Firstly?

(SHOW SCREEN – READ OUT – ONE ANSWER ONLY - ROTATE ANSWERS 1 TO 9)

- 1 The maximum download or upload speed (MBps)
- 2 The maximum amount of data (MB, GB) you can download or upload per month
- 3 The price of the Internet subscription
- 4 The length of the contract
- 5 The fact that the Internet subscription is part of a bundle
- 6 The customer service
- 7 Whether you get devices such as phones, tablets or TV-sets at more convenient prices or better reimbursement conditions
- 8 The reputation of the Internet access provider
- 9 The ability to connect multiple devices at the same time without loss of quality
- 10 Other (SPONTANEOUS)
- 11 None (SPONTANEOUS)
- 12 DK
- 99 Inap. No internet connection at home (not coded 1 in d46_8)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qb8a_t - INTERNET SUBSCRIPTION MAIN FACTOR - FIRSTLY (SUM A)

Main factors when subscribing to an internet connection - summarized into three categories (QB8A)

- 1 Total 'Costs-related criteria'
- 2 Total 'Quality-related criteria'
- 3 Total 'Service-related criteria'
- 9 Inap. No internet connection at home or mentioned Reputation/Other/None/DK in qb8a (not coded 1 in d46_8 or coded 8, 10, 11 or 12 in qb8a)

Derivation:

This variable collapses answers to qb8a into three categories. Respondents coded 3 or 7 in qb8a are coded '1' ('Total 'Costs-related criteria'').

Respondents coded 1, 2 or 9 in qb8a are coded '2' ('Total 'Quality-related criteria''). Respondents coded 4, 5 or 6 in qb8a are coded '3' ('Total 'Service-related criteria'').

[qb8a When subscribing to an Internet connection what are the main factors you consider? Firstly?]

Note:

See qb8a for complete question text.

qb8b_1 - INTERNET SUBSCRIPTION MAIN FACTOR 2ND: DOWNLOAD SPEED

ASK QB8A IF 'INTERNET CONNECTION AT HOME'; D46=8 / QB8B: ASK IF QB8A=1-10

[QB8A

When subscribing to an Internet connection what are the main factors you consider? Firstly?]

QB8B

And then?

(SHOW SCREEN – READ OUT – MAX. 3 ANSWERS - ROTATE ANSWERS 1 TO 9 - EXCLUDE ANSWER GIVEN IN QB8A FROM LIST OF ANSWERS FOR QB8B, EXCEPT FOR ANSWER 10 - CODES 11 AND 12 ARE EXCLUSIVE)

QB8B_1 The maximum download or upload speed (Mbps)

0 Not mentioned

1 Mentioned

9 Inap. No internet connection at home or None/DK in qb8a (not coded 1 to 10 in qb8a)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

Comparability:

qb8b_4 - INTERNET SUBSCRIPTION MAIN FACTOR 2ND: CONTRACT LENGTH

ASK QB8A IF 'INTERNET CONNECTION AT HOME'; D46=8 / QB8B: ASK IF QB8A=1-10

[QB8A

When subscribing to an Internet connection what are the main factors you consider? Firstly?]

QB8B

And then?

(SHOW SCREEN – READ OUT – MAX. 3 ANSWERS - ROTATE ANSWERS 1 TO 9 - EXCLUDE ANSWER GIVEN IN QB8A FROM LIST OF ANSWERS FOR QB8B, EXCEPT FOR ANSWER 10 - CODES 11 AND 12 ARE EXCLUSIVE)

QB8B_4 The length of the contract

0 Not mentioned

1 Mentioned

9 Inap. No internet connection at home or None/DK in qb8a (not coded 1 to 10 in qb8a)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

Comparability:

qb8b_9 - INTERNET SUBSCRIPTION MAIN FACTOR 2ND: MULTIPLE DEVICE QUALITY

ASK QB8A IF 'INTERNET CONNECTION AT HOME'; D46=8 / QB8B: ASK IF QB8A=1-10

[QB8A

When subscribing to an Internet connection what are the main factors you consider? Firstly?]

QB8B

And then?

(SHOW SCREEN – READ OUT – MAX. 3 ANSWERS - ROTATE ANSWERS 1 TO 9 - EXCLUDE ANSWER GIVEN IN QB8A FROM LIST OF ANSWERS FOR QB8B, EXCEPT FOR ANSWER 10 - CODES 11 AND 12 ARE EXCLUSIVE)

QB8B_9 The ability to connect multiple devices at the same time without loss of quality

0 Not mentioned

1 Mentioned

9 Inap. No internet connection at home or None/DK in qb8a (not coded 1 to 10 in qb8a)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

Comparability:

qb8b_t2 - INTERNET SUBSCRIPTION MAIN FACTOR 2ND: QUALITY-RELATED CRITERIA (SUM B)

Factors when subscribing to an internet connection 2nd - quality-related criteria summarized (QB8B)

0 Not mentioned

1 Total 'Quality-related criteria'

9 Inap. No internet connection at home, None/DK in qb8a or Reputation/None/DK in qb8b (coded 11, 12 or 99 in qb8a or coded 0 in qb8b_1 to qb8b_7 and qb8b_9)

Derivation:

This variables summarizes respondents coded 1 'Mentioned' in qb8b_1, qb8b_2 and/or qb8b_9.

[qb8a

When subscribing to an Internet connection what are the main factors you consider? Firstly?

qb8b

And then?

qb8b_1 The maximum download or upload speed (Mbps)

qb8b_2 The maximum amount of data (MB, GB) you can download or upload per month

qb8b_9 The ability to connect multiple devices at the same time without loss of quality]

Note:

See qb8a and qb8b for complete question text.

qb8t_11 - INTERNET SUBSCRIPTION MAIN FACTOR 2ND: NONE (SPONT) (SUM)

[QB8A

When subscribing to an Internet connection what are the main factors you consider? Firstly?]

QB8B

And then?]

QB8T_11 None (SPONTANEOUS)

0 Not mentioned

1 Mentioned

9 Inap. No internet connection at home (not coded 1 in d46_8)

Derivation:

This variable summarizes answers to this item in qb8a and qb8b.

Note:

See qb8a and qb8b for complete question text.

qb9_1 - INTERNET SUBSCRIPTION PROBLEMS - CONNECTION INTERRUPTION

QB9

ASK QB9 IF 'INTERNET CONNECTION IN THE HOUSEHOLD', D46=8

When using your household Internet subscription, have you experienced any of the following problems?

(ROTATE STATEMENTS 1 TO 4 - DISPLAY '99' INSTEAD OF 'DK' - SHOW SCREEN - READ OUT - ONE ANSWER PER LINE)

QB9_1 Interruption of your Internet connection

- 1 Yes, often
- 2 Yes, sometimes
- 3 No, never
- 4 DK
- 9 Inap. No Internet connection in the household (not coded 1 in d46_8)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qb9_2 - INTERNET SUBSCRIPTION PROBLEMS - DOWNLOAD/UPLOAD DELAYS

QB9

ASK QB9 IF 'INTERNET CONNECTION IN THE HOUSEHOLD', D46=8

When using your household Internet subscription, have you experienced any of the following problems?

(ROTATE STATEMENTS 1 TO 4 - DISPLAY '99' INSTEAD OF 'DK' - SHOW SCREEN - READ OUT - ONE ANSWER PER LINE)

QB9_2 Delays in downloading or uploading content

- 1 Yes, often
- 2 Yes, sometimes
- 3 No, never
- 4 DK
- 9 Inap. No Internet connection in the household (not coded 1 in d46_8)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qb11 - USEFULNESS OF CONTRACT SUMMARY WHEN SIGNING NEW CONTRACT

Now we are talking about the contracts for communication services, such as fixed Internet, mobile Internet, mobile phone, fixed phone, television and possibly other services. They can have been sold either separately or in bundles.

(READ OUT)

QB11

ASK ALL

When you sign a new contract for communication services, how useful or not would it be for you to have a summary of the essential features, such as the main characteristics of the different services and their price, the length of the contract and the conditions of termination?

(READ OUT - ONE ANSWER ONLY)

- 1 Very useful
- 2 Fairly useful
- 3 Not very useful
- 4 Not useful at all
- 5 DK

qb12_3 - FREQUENCY OF INT EU COMMUNICATION - INTERNET CALL NOT TO PHONE NUMBER

Now we are talking about international calls or messages within the European Union. With this we mean the calls you make or messages you send from the EU country where you live to another EU country. This implies that you are physically present in the EU country where you live at the time of making the call or sending the message.

qb12_6 - FREQUENCY OF INT EU COMMUNICATION - INSTANT MESSENGER

Now we are talking about international calls or messages within the European Union. With this we mean the calls you make or messages you send from the EU country where you live to another EU country. This implies that you are physically present in the EU country where you live at the time of making the call or sending the message.

(READ OUT)

QB12

ASK QB12_1 IF 'FIXED TELEPHONE IN THE HOUSEHOLD', D43A=1 / ASK QB12_2 IF 'OWNS A PERSONAL MOBILE TELEPHONE', D43B=1

How often do you do any of the following from the country where you live?

QB12_6 Use an instant Internet messaging service to reach people in another EU country

- 1 Several times a day
- 2 Once a day
- 3 Several times a week
- 4 Once a week
- 5 Several times a month
- 6 Once a month
- 7 Less than once a month
- 8 Never
- 9 DK

qb12t_4 - FREQUENCY OF INT EU CALLS - NEVER/DK/NO OTHER PHONE (SUM)

Frequency of international EU calls - never/DK/no other phone (summarized)

0 Not mentioned

1 Never/DK/no other phone

Derivation:

This variable summarizes answers to qb12_1 to qb12_4. It subsumes respondents who are coded answer categories 'Never' and/or 'DK' or additionally do not own a landline or a mobile phone (coded 99 in qb12_1 or qb12_2).

[qb12 How often do you do any of the following from the country where you live?

qb12_1 Make international phone calls over a landline phone within the EU

qb12_2 Make international phone calls over a mobile phone within the EU

qb12_3 Make international calls using Internet applications, including video calls (VoIP) within the EU. This excludes calling a phone number with the Internet application.

qb12_4 Make international phone calls to a phone number using Internet applications (voice calls) (VoIP) within the EU]

Note:

See qb12 for complete question text.

Variable qb12t_4 was named qb12t.4 in former versions of this dataset.

Derived variable qb12t_4 has been modified and corrected by GESIS in accordance with input variables qb12_1 to qb12_4 and information in the official Excel volume: Respondents coded DK throughout variables qb12_1 to qb12_4 have been coded to '0' (Not mentioned) in qb12t_4. Please note: In contrast to the supplied dataset, the official Excel volumes disregard certain cases with no other (landline or personal mobile) phone in d43a/b (coded 99 in qb12_1 or qb12_2) in qb12t_4.

Derived variable qb12tt_4 has also been modified by GESIS, now corresponding with the Excel volume: Respondents coded DK in variables qb12_5 and qb12_6 have been coded to '0' (Not mentioned) in qb12tt_4.

Derived variable qb12t3_4 has been modified and corrected by GESIS in accordance with input variables qb12_1 to qb12_6 and information in the official Excel volume: Respondents coded DK throughout variables qb12_1 to qb12_6 have been coded to '0' (Not mentioned) in qb12t3_4. Please note: In line with the official Excel volume, the previous version of this variable (up to v2-0-0) disregards certain cases with no other (landline or personal mobile) phone in d43a/b (coded 99 in qb12_1 or qb12_2) in qb12t_4. This was adjusted by GESIS in version v3-0-0 in order to establish conformity with qb12t_4.

qb12t_5 - FREQUENCY OF INT EU CALLS - AT LEAST SEVERAL TIMES A MONTH (SUM)

Frequency of international EU calls - at least several times a month (summarized)

0 Not mentioned

1 At least several times a month

Derivation:

This variable summarizes answers to qb12_1 to qb12_4. It subsumes respondents who are coded at least once answer category 1 'Several times a day' or 2 'Once a day' or 3 'Several times a week' or 4 'Once a week' or 5 'Several times a month'.

[qb12 How often do you do any of the following from the country where you live?

qb12_1 Make international phone calls over a landline phone within the EU

qb12_2 Make international phone calls over a mobile phone within the EU

qb12_3 Make international calls using Internet applications, including video calls (VoIP) within the EU. This excludes calling a phone number with the Internet application.

qb12_4 Make international phone calls to a phone number using Internet applications (voice calls) (VoIP) within the EU]

Note:

See qb12 for complete question text.

qb12tt_4 - FREQUENCY OF INT EU MESSAGES - NEVER/DK (SUM)

Frequency of international EU messages - never/DK (summarized)

0 Not mentioned

1 Never/DK

Derivation:

This variable summarizes answers to qb12_5 and qb12_6. It subsumes respondents who are coded answer categories 'Never' and/or 'DK'.

[qb12 How often do you do any of the following from the country where you live?

qb12_5 Send international SMS within the EU

qb12_6 Use an instant Internet messaging service to reach people in another EU country]

Note:

See qb12 for complete question text.

Variable qb12tt_4 was named qb12tt.4 in former versions of this dataset.

Derived variable qb12t_4 has been modified and corrected by GESIS in accordance with input variables qb12_1 to qb12_4 and information in the official Excel volume: Respondents coded DK throughout variables qb12_1 to qb12_4 have been coded to '0' (Not mentioned) in qb12t_4. Please note: In contrast to the supplied dataset, the official Excel volumes disregard certain cases with no other (landline or personal mobile) phone in d43a/b (coded 99 in qb12_1 or qb12_2) in qb12t_4.

Derived variable qb12tt_4 has also been modified by GESIS, now corresponding with the Excel volume: Respondents coded DK in variables qb12_5 and qb12_6 have been coded to '0' (Not mentioned) in qb12tt_4.

Derived variable qb12t3_4 has been modified and corrected by GESIS in accordance with input variables qb12_1 to qb12_6 and information in the official Excel volume: Respondents coded DK throughout variables qb12_1 to qb12_6 have been coded to '0' (Not mentioned) in qb12t3_4. Please note: In line with the official Excel volume, the previous version of this variable (up to v2-0-0) disregards certain cases with no other (landline or personal mobile) phone in d43a/b (coded 99 in qb12_1 or qb12_2) in qb12t_4. This was adjusted by GESIS in version v3-0-0 in order to establish conformity with qb12t_4.

qb12tt_5 - FREQUENCY OF INT EU MESSAGES - AT LEAST SEVERAL TIMES A MONTH (SUM)

Frequency of international EU messages - at least several times a month (summarized)

0 Not mentioned

1 At least several times a month

Derivation:

This variable summarizes answers to qb12_5 and qb12_6. It subsumes respondents who are coded at least once answer category 1 'Several times a day' or 2 'Once a day' or 3 'Several times a week' or 4 'Once a week' or 5 'Several times a month'.

[qb12 How often do you do any of the following from the country where you live?

qb12t3_4 - FREQUENCY OF INT EU COMMUNICATION - NEVER/DK/NO OTHER PHONE (SUM)

Frequency of international EU communication - never/DK/no other phone (summarized)

0 Not mentioned

1 Never/DK/no other phone

Derivation:

This variable summarizes answers to qb12_1 to qb12_6. It subsumes respondents who are coded answer categories 'Never' and/or 'DK' or additionally do not own a landline or a mobile phone (coded 99 in qb12_1 or qb12_2).

[qb12 How often do you do any of the following from the country where you live?

qb12_1 Make international phone calls over a landline phone within the EU

qb12_2 Make international phone calls over a mobile phone within the EU

qb12_3 Make international calls using Internet applications, including video calls (VoIP) within the EU. This excludes calling a phone number with the Internet application.

qb12_4 Make international phone calls to a phone number using Internet applications (voice calls) (VoIP) within the EU]

qb12_5 Send international SMS within the EU

qb12_6 Use an instant Internet messaging service to reach people in another EU country]

Note:

See qb12 for complete question text.

Variable qb12t3_4 was named qb12t3.4 in former versions of this dataset.

Derived variable qb12t_4 has been modified and corrected by GESIS in accordance with input variables qb12_1 to qb12_4 and information in the official Excel volume: Respondents coded DK throughout variables qb12_1 to qb12_4 have been coded to '0' (Not mentioned) in qb12t_4. Please note: In contrast to the supplied dataset, the official Excel volumes disregard certain cases with no other (landline or personal mobile) phone in d43a/b (coded 99 in qb12_1 or qb12_2) in qb12t_4.

Derived variable qb12tt_4 has also been modified by GESIS, now corresponding with the Excel volume: Respondents coded DK in variables qb12_5 and qb12_6 have been coded to '0' (Not mentioned) in qb12tt_4.

Derived variable qb12t3_4 has been modified and corrected by GESIS in accordance with input variables qb12_1 to qb12_6 and information in the official Excel volume: Respondents coded DK throughout variables qb12_1 to qb12_6 have been coded to '0' (Not mentioned) in qb12t3_4. Please note: In line with the official Excel volume, the previous version of this variable (up to v2-0-0) disregards certain cases with no other (landline or personal mobile) phone in d43a/b (coded 99 in qb12_1 or qb12_2) in qb12t_4. This was adjusted by GESIS in version v3-0-0 in order to establish conformity with qb12t_4.

qb14t_1 - AWARE ABOUT SPECIAL TARIFFS - LANDLINE CALLS (MOD)

Awareness about special landline tariffs for calls to EU countries - modified

- 1 Yes and you use those special tariffs
- 2 Yes but you do not use them
- 3 No
- 4 No international phone calls within the EU over landline phone (coded 8 or 9 in qb12_1)
- 5 DK in qb14_1 or no fixed telephone in d43a

Derivation:

Categories 1 to 3 in modified variable qb14t_1 correspond to the respective categories in qb14_1. In modified variable qb14t_1 respondents who do not make international calls over a landline phone at all (coded 8 or 9 in qb12_1) are coded '4' ('Does not make international calls over a landline phone') in qb14t_1. Respondents who answer DK in qb14_1 or do not own a fixed telephone at all are coded '5' ('DK in qb14_1 or no fixed telephone in d43a') in qb14t_1.

[qb14 Did you know that there are special tariffs which include reduced rates or free calls to one, several or all of the EU countries in exchange of an additional fee for?

qb14_1 International phone calls over a landline phone within the EU]

Note:

See qb14 for complete question text.

Derived variables qb14t_1 and qb14t_2 differ slightly in categories 4 and 5 from the official tabular reports. Cases coded DK in filter variables qb12_1 resp. qb12_2 are included in category 4 in the dataset at hand, whereas in the Excel volumes these cases are assigned to category 5. Please consult the detailed value labels of the categories for further information.

qb14t_2 - AWARE ABOUT SPECIAL TARIFFS - MOBILE CALLS (MOD)

Awareness about special mobile tariffs for calls to EU countries - modified

- 1 Yes and you use those special tariffs
- 2 Yes but you do not use them
- 3 No
- 4 No international phone calls within the EU over mobile phone (coded 8 or 9 in qb12_2)
- 5 DK in qb14_2 or no mobile telephone in d43b

Derivation:

Categories 1 to 3 in modified variable qb14t_2 correspond to the respective categories in qb14_2. In modified variable qb14t_2 respondents who do not make international calls over a mobile phone at all (coded 8 or 9 in qb12_2) are coded '4' ('Does not make international calls over a mobile phone') in qb14t_2. Respondents who answer DK in qb14_2 or do not own a mobile telephone at all are coded '5' ('DK in qb14_2 or no mobile telephone in d43b') in qb14t_2.

[qb14 Did you know that there are special tariffs which include reduced rates or free calls to one, several or all of the EU countries in exchange of an additional fee for?

qb14_2 International phone calls over a mobile phone within the EU]

Note:

See qb14 for complete question text.

Derived variables qb14t_1 and qb14t_2 differ slightly in categories 4 and 5 from the official tabular reports. Cases coded DK in filter variables qb12_1 resp. qb12_2 are included in category 4 in the dataset at hand, whereas in the Excel volumes these cases are assigned to category 5. Please consult the detailed value labels of the categories for further information.

qb14t - AWARE ABOUT SPECIAL TARIFFS - ALL CALLS (SUM)

Awareness about special landline and mobile tariffs for calls to EU countries - summarized

- 1 Only over a landline
- 2 Only over a mobile phone
- 3 Both
- 4 No/DK
- 9 Inap. No international calls within EU over landline and mobile phone (not coded 1 to 4 in qb14_1 and qb14_2)

Derivation:

This variable summarized answers to qb14_1 and qb14_2. Respondents coded 1 or 2 in qb14_1 and 3 or 4 in qb14_2 are coded '1' ('Only over a landline') in qb14t. Respondents coded 1 or 2 in qb14_2 and 3 or 4 in qb14_1 are coded '2' ('Only over a mobile phone') in qb14t. Respondents coded 1 or 2 in both qb14_1 and qb14_2 are coded '3' ('Both') in qb14t. Respondents coded 3 or 4 in both qb14_1 and qb14_2 are coded '4' ('No/DK') in qb14t.

[qb14 Did you know that there are special tariffs which include reduced rates or free calls to one, several or all of the EU countries in exchange of an additional fee for?

qb14_1 International phone calls over a landline phone within the EU

qb14_2 International phone calls over a mobile phone within the EU]

d1r1 - LEFT-RIGHT PLACEMENT: 3 CAT (RECODED)

Left-right placement - recoded to three categories

- 1 (1 - 4) Left
- 2 (5 - 6) Centre
- 3 (7 - 10) Right
- 9 DK/Refusal (Spontaneous)

Derivation:

This variable collapses answers to d1 into three categories.

[d1 In political matters people talk of 'the left' and 'the right'. How would you place your views on this scale?]

Note:

See d1 for the complete question text.

d7 - MARITAL STATUS

D7

Which of the following best corresponds to your own current situation?

(SHOW SCREEN – READ OUT – ONE ANSWER ONLY - CODE 'NO ANSWER' IN CODE 16)

MARRIED OR REMARRIED

- 1 Living without children
- 2 Living with the children of this marriage
- 3 Living with the children of a previous marriage
- 4 Living with the children of this marriage and of a previous marriage

SINGLE LIVING WITH A PARTNER

- 5 Living without children
- 6 Living with the children of this union
- 7 Living with the children of a previous union
- 8 Living with the children of this union and of a previous union

SINGLE

- 9 Living without children
- 10 Living with children

DIVORCED OR SEPARATED

- 11 Living without children
- 12 Living with children

WIDOW/ER

- 13 Living without children
- 14 Living with children

15 Other (SPONTANEOUS)

97 Refusal (SPONTANEOUS)

Note:

Original code '16' recoded to '97'.

d7r1 - MARITAL STATUS: 5 CAT (RECODED)

Marital status recoded to five categories with focus on partnership

- 1 (Re-)Married (coded 1 to 4 in d7)
- 2 Single living with partner (coded 5 to 8 in d7)
- 3 Single (coded 9 to 10 in d7)
- 4 Divorced or separated (coded 11 to 12 in d7)
- 5 Widow (coded 13 to 14 in d7)
- 6 Other (SPONTANEOUS)
- 7 Refusal (SPONTANEOUS)

Derivation:

This variable collapses answers to d7 into five categories.

[d7 Which of the following best corresponds to your own current situation?]

Note:

See d7 for the complete question text.

d7r3 - MARITAL STATUS: HH & CHILDREN (RECODED)

Marital status recoded to four categories with focus on children (family status)

- 1 Single household without children (coded 9, 11, and 13 in d7)
- 2 Single household with children (coded 10, 12, and 14 in d7)
- 3 Multiple occupancy household without children (coded 1 and 5 in d7)
- 4 Multiple occupancy household with children (coded 2 to 4 and 6 to 8 in d7)
- 5 Other (SPONTANEOUS)
- 7 Refusal (SPONTANEOUS)

Derivation:

This variable collapses answers to d7 into four categories.

[d7 Which of the following best corresponds to your own current situation?]

Note:

See d7 for the complete question text.

d11r3 - AGE: 7 GROUPS (RECODED)

Age of respondent - recoded to seven categories

- 1 15 - 24 years
- 2 25 - 34 years
- 3 35 - 44 years
- 4 45 - 54 years
- 5 55 - 64 years
- 6 65 - 74 years
- 7 75 years and older [see code 99 in d11]

Derivation:

This variable collapses answers to d11 into seven categories.

[d11 How old are you?]

Note:

See d11 for the complete question text.

gen1 - GENERATION BEFORE 1928 (AGE 88 AND OLDER)

Generation born before 1928 (age 88 and older)

0 Not mentioned

1 Mentioned [incl. '99' in d11]

Derivation:

This variable summarizes all respondents born before 1928 and is based on questions d11 ('How old are you?'). Please note that variables gen1 to gen6 are based on age instead of year of birth, which may entail a slightly inaccurate categorization for some respondents. Moreover, additional discrepancy in the categorization might be due to the potential use of years other than the survey year.

Note:

See d11 for the complete question text.

gen4 - GENERATION 1946-1964 (AGE 51-69)

Generation born between 1946 and 1964 (age 51-69) - "Babyboomer generation"

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes all respondents born between 1946 and 1964 and is based on questions d11 ('How old are you?'). Please note that variables gen1 to gen6 are based on age instead of year of birth, which may entail a slightly inaccurate categorization for some respondents. Moreover, additional discrepancy in the categorization might be due to the potential use of years other than the survey year.

Note:

See d11 for the complete question text.

d8 - AGE EDUCATION

D8

How old were you when you stopped full-time education?

(CANNOT BE LARGER THAN D11 - CODE 'NO ANSWER' IN CODE 98)

(IF 'STILL STUDYING' CODE '00' – IF 'NO EDUCATION' CODE '01' – IF 'REFUSAL' CODE '98' – IF 'DK' CODE '99')

(MAKE SURE THE RESPONDENT UNDERSTANDS THAT D8 IS ABOUT FULL-TIME EDUCATION)

0 Refusal

2 2 years

83 83 years

97 No full-time education

98 Still studying

99 DK

Note:

Original code '00' recoded to '98'.

Original code '01' recoded to '97'.

Original code '98' recoded to '0'.

Please note that users might be advised to consider pre-school ages (outliers) as with 'no full-time education' or to treat them as missing values.

Actual number is coded.

Comparability:

Last trend: EB87.1, D8

d8r1 - AGE EDUCATION: 11 CAT (RECODED)

Age when finished full-time education - recoded to 11 categories

- 1 Up to 14 years
- 2 15 years
- 3 16 years
- 4 17 years
- 5 18 years
- 6 19 years
- 7 20 years
- 8 21 years
- 9 22 years and older
- 10 Still studying
- 11 No full-time education
- 97 Refusal
- 98 DK

Derivation:

This variable collapses answers to question d8 for indicated ages lowest (2) to 14 and 22 to highest (83).

[d8 How old were you when you stopped full-time education?]

Note:

See d8 for the complete question text.

d8r2 - AGE EDUCATION: 5 CAT (RECODED)

Age when finished full-time education - recoded to five categories

- 1 Up to 15 years
- 2 16-19 years
- 3 20 years and older
- 10 Still studying
- 11 No full-time education
- 97 Refusal
- 98 DK

Derivation:

This variable collapses answers to question d8 into three age groups.

[d8 How old were you when you stopped full-time education?]

Note:

See d8 for the complete question text.

d15a - OCCUPATION OF RESPONDENT

D15A

What is your current occupation?

(DO NOT SHOW SCREEN – ‘NO ANSWER’ NOT ALLOWED - IF D15A=2 THEN D8=00 - IF D15<>2 AND D8=00 THEN CORRECT D8 OR CHANGE THE ANSWER IN D15A)

NON-ACTIVE

- 1 Responsible for ordinary shopping and looking after the home, or without any current occupation, not working
- 2 Student
- 3 Unemployed or temporarily not working
- 4 Retired or unable to work through illness

SELF EMPLOYED

- 5 Farmer
- 6 Fisherman
- 7 Professional (lawyer, medical practitioner, accountant, architect, etc.)
- 8 Owner of a shop, craftsmen, other self-employed person
- 9 Business proprietors, owner (full or partner) of a company

EMPLOYED

- 10 Employed professional (employed doctor, lawyer, accountant, architect)
- 11 General management, director or top management (managing directors, director general, other director)
- 12 Middle management, other management (department head, junior manager, teacher, technician)
- 13 Employed position, working mainly at a desk
- 14 Employed position, not at a desk but travelling (salesmen, driver, etc.)
- 15 Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, etc.)
- 16 Supervisor
- 17 Skilled manual worker
- 18 Other (unskilled) manual worker, servant

d15a_r1 - OCCUPATION OF RESPONDENT (RECODED)

Occupation of respondent - recoded to employment status

- 1 Self-employed (coded 5 to 9 in d15a)
- 2 Employed (coded 10 to 18 in d15a)
- 3 Not working (coded 1 to 4 in d15a)

Derivation:

This variable collapses answers to d15a into three categories.

[d15a What is your current occupation?]

Note:

See d15a for the complete question text.

d15a_r2 - RESPONDENT OCCUPATION SCALE (C14)

Occupation of respondent - scale (C14)

- 1 Self-employed (coded 5 to 9 in d15a)
- 2 Managers (coded 10 to 12 in d15a)
- 3 Other white collars (coded 13 or 14 in d15a)
- 4 Manual workers (coded 15 to 18 in d15a)
- 5 House persons (coded 1 in d15a)
- 6 Unemployed (coded 3 in d15a)
- 7 Retired (coded 4 in d15a)
- 8 Students (coded 2 in d15a)

Derivation:

This scale is based on a combination/selection of answers to variable d15a.

[d15a What is your current occupation?]

Note:

See d15a for the complete question text.

d15b - OCCUPATION OF RESPONDENT - LAST JOB

[D15A

What is your current occupation?]

D15B

ASK D15B IF 'NOT DOING ANY PAID WORK CURRENTLY', CODES 1 TO 4 IN D15A

Did you do any paid work in the past? What was your last occupation?

(DO NOT SHOW SCREEN – 'NO ANSWER' NOT ALLOWED)

SELF EMPLOYED

- 1 Farmer
- 2 Fisherman
- 3 Professional (lawyer, medical practitioner, accountant, architect, etc.)
- 4 Owner of a shop, craftsmen, other self-employed person
- 5 Business proprietors, owner (full or partner) of a company

EMPLOYED

- 6 Employed professional (employed doctor, lawyer, accountant, architect)
- 7 General management, director or top management (managing directors, director general, other director)
- 8 Middle management, other management (department head, junior manager, teacher, technician)
- 9 Employed position, working mainly at a desk
- 10 Employed position, not at a desk but travelling (salesmen, driver, etc.)
- 11 Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, etc.)
- 12 Supervisor
- 13 Skilled manual worker
- 14 Other (unskilled) manual worker, servant

15 Never did any paid work

99 Inap. Currently doing paid work (not coded 1 to 4 in d15a)

Note:

In accordance with former waves coding has been (correctly) shifted compared to the questionnaire.

d15b_r - OCCUPATION OF RESPONDENT - LAST JOB (RECODED)

Occupation of respondent: last job - recoded to employment status

- 1 Self-employed (coded 1 to 5 in d15b)
- 2 Employed (coded 6 to 14 in d15b)
- 3 Never paid work (coded 15 in d15b)
- 9 Inap. Currently doing paid work (not coded 1 to 4 in d15a)

Derivation:

This variable collapses answers to d15b into three categories.

[d15b Did you do any paid work in the past? What was your last occupation?]

Note:

See d15b for the complete question text.

- 15 Fifteen
- 16 Sixteen
- 18 Eighteen
- 19 Nineteen
- 99 DK/NA (99 in d40a or d40b or d40c)

Derivation:

This variable summarizes d40a, d40b, and d40c.

[d40a Could you tell me how many people aged 15 years or more live in your household, yourself included?

d40b Could you tell me how many children aged 10 to 14 years old live in your household?

d40c Could you tell me how many children less than 10 years old live in your household?]

Note:

See d40a, d40b, and d40c for the complete question text.

Variable d40t was named d40abc in former versions of this dataset.

Generated by GESIS in accordance with former surveys.

d40t_r - HOUSEHOLD COMPOSITION: SIZE A+B+C (RECODED)

n of people in household - recoded to four categories

- 1 One
- 2 Two
- 3 Three
- 4 Four or more
- 9 DK/NA (99 in d40a or d40b or d40c)

Derivation:

This variable groups the summarized variable d40t.

[d40a Could you tell me how many people aged 15 years or more live in your household, yourself included?

d40b Could you tell me how many children aged 10 to 14 years old live in your household?

d40c Could you tell me how many children less than 10 years old live in your household?]

Note:

See d40a, d40b, and d40c for the complete question text.

Variable d40t_r was named d40abc_r in former versions of this dataset.

d40_d11 - ONE-PERSON HOUSEHOLD COMPOSITION BY AGE

One-person households - recoded to three age categories

- 1 15 - 29 years
- 2 30 - 59 years
- 3 60 years and older [see code 99 in d11]
- 9 Inap. No one-person-household (not coded 1 in d40t)

Derivation:

This variable collapses answers to d11 into three age categories, but only for one-person households.

[d11 How old are you?

d40a Could you tell me how many people aged 15 years or more live in your household, yourself included?

d40b Could you tell me how many children aged 10 to 14 years old live in your household?

d40c Could you tell me how many children less than 10 years old live in your household?]

Note:

See d11 and d40a, d40b, and d40c for the complete question text.

d62t1 - INTERNET USE - INDEX 1 (4 CAT)

Frequency of internet use - index with four categories

- 1 Everyday/Almost everyday (at least once coded 1 in d62_1 to d62_4)
- 2 Often/sometimes (at least once coded 2 to 5 in d62_1 to d62_4)
- 3 Never/No access (coded 6/7 or coded 6 in d62_1 to d62_4)
- 4 No internet access at all (coded 7 in d62_1 to d62_4)

Derivation:

This variable summarizes responses to d62 in four categories.

[d62 Could you tell me if you use the internet ...?

d62_1 You use the Internet at home, in your home

d62_2 You use the Internet on your place of work

d62_3 You use the Internet on your mobile device (laptop, smartphone, tablet, etc.)

d62_4 You use the Internet somewhere else (school, university, cyber-café, etc.)]

Respondents coded 1 at least once in d62_1 to d62_4 are coded 1 in d62t1 ('Everyday/Almost everyday'). Respondents coded 2, 3, 4 or 5 in each variable d62_1 to d62_4 are coded 2 ('Often/sometimes') in d62t1. Respondents coded 6 ('Never') in each variable d62_1 to d62_4 are coded 3 ('Never to all') in d62t1. Respondents coded 6 ('Never') in each variable d62_1 to d62_4, or at least once coded 6 in d62_1 to d62_4 and coded 7 ('No internet access') in the other variable(s), are coded 3 ('Never/No access') in d62t1. Respondents coded 7 ('No internet access') in each variable d62_1 to d62_4 are coded 4 ('No internet access at all') in d62t1.

Note:

See d62 for the complete question text.

Please note that categories 3 and 4 of index variable d62t1 in EB 87.2 might differ from former surveys.

Variable d62t1 was named d62t in former versions of this dataset.

d62t2 - INTERNET USE - INDEX 2 (7 CAT)

Frequency of internet use - index with seven categories

- 1 Everyday/Almost everyday (at least once coded 1 in d62_1 to d62_4)
- 2 Two or three times a week (not coded 1 and at least once coded 2 in d62_1 to d62_4)
- 3 About once a week (not coded 1 to 2 and at least once coded 3 in d62_1 to d62_4)
- 4 Two or three times a month (not coded 1 to 3 and at least once coded 4 in d62_1 to d62_4)
- 5 Less often (not coded 1 to 4 and at least once coded 5 in d62_1 to d62_4)
- 6 Never/No access (coded 6/7 or coded 6 in d62_1 to d62_4)
- 7 No Internet access at all (coded 7 in d62_1 to d62_4)

Derivation:

This variable summarizes responses to d62.

[d62 Could you tell me if you use the internet ...?

d62_1 You use the Internet at home, in your home

d62_2 You use the Internet on your place of work

d62_3 You use the Internet on your mobile device (laptop, smartphone, tablet, etc.)

d62_4 You use the Internet somewhere else (school, university, cyber-café, etc.)]

Respondents coded 1 at least once in d62_1 to d62_4 are coded 1 in d62t2 ('Everyday/Almost everyday'). Respondents coded 2 at least once in d62_1 to d62_4 and not coded 1, are coded 2 in d62t2 ('Two or three times a week'). Respondents coded 3 at least once in d62_1 to d62_4 and not coded 1 or 2, are coded 5 in d62t2 ('About once a week'). Respondents coded 4 at least once in d62_1 to d62_4 and not coded 1 to 3, are coded 4 in d62t2 ('Two or three times a month'). Respondents coded 5 at least once in d62_1 to d62_4 and not coded 1 to 4, are coded 5 in d62t2 ('Less often'). Respondents coded 6 ('Never') in each variable d62_1 to d62_4, or at least once coded 6 in d62_1 to d62_4 and coded 7 ('No internet access') in the other variable(s), are coded 6 ('Never/No access') in d62t2. Respondents coded 7 ('No internet access') in each variable d62_1 to d62_4 are coded 7 ('No internet access at all') in d62t2.

Note:

See d62 for the complete question text.

Generated by GESIS in accordance with former surveys.

Variable d62t2 was named netuse in former versions of this dataset.

d63 - SOCIAL CLASS - SELF-ASSESSMENT (5 CAT)

D63

Do you see yourself and your household belonging to...?

(SHOW SCREEN – READ OUT – ONE ANSWER ONLY - CODE 'NO ANSWER' IN CODE 8)

- 1 The working class of society
- 2 The lower middle class of society
- 3 The middle class of society
- 4 The upper middle class of society
- 5 The higher class of society
- 6 Other (SPONTANEOUS)
- 7 None (SPONTANEOUS)
- 97 Refusal (SPONTANEOUS)
- 98 DK

Note:

Original code '8' recoded to '97'.

Original code '9' recoded to '98'.

Starting with Eurobarometer 82.3 demographic variable d63 'SOCIAL CLASS - SELF-ASSESSMENT (5 CAT)' consists of five categories instead of three categories.

NO QUESTIONS D64 TO D69

polintr - POLITICAL INTEREST INDEX (D71_1/2/3)

Index of interest in politics

0 DK (coded 4 in d71_1, d71_2 and d71_3)

1 Not at all interested in politics

2 Slightly interested in politics

3 Moderately interested in politics

4 Strongly interested in politics

Derivation:

The POLITICAL INTEREST INDEX is based on the answers to the following question: 'When you get together with friends or relatives, would you say you discuss frequently, occasionally or never about (national/European/local) political matters?' (d71_1, d71_2, and d71_3). According to former studies the index was constructed by first attributing a score to each item in d71 ('Never' = 0; 'Occasionally' = 1; 'Frequently' = 2) and then adding together the three political dimensions (national/European/local). This procedure results in four different index levels ('Not at all interested in politics' if added up score = 0; 'Slightly' if added up score = 1 or 2; 'Moderately' if added up score = 3 or 4; 'Strongly' if added up score = 5 or 6) which have been coded accordingly into the categories 1 to 4. Furthermore combinations with DK responses in maximum two variables (d71_1, d71_2, and d71_3) have been coded as follows: 'DK' and 'Never' = 'Not at all'; 'DK' and 'Never' and 'Occasionally' or 'Frequently' = 'Slightly'; 'DK' and 'Occasionally' and at least one 'Frequently' = 'Moderately'.

Note:

This new POLITICAL INTEREST INDEX is introduced as C2 starting with EB 73.4. Please notice that in former waves up to EB 69.2 the VALUE ORIENTATION - POST-MATERIALISM index was named C2.

Compared to the original variable the scale has been inversed by GESIS in accordance with former practice. Furthermore responses coded 'DK' to all source variables (d71_1, d71_2, and d71_3) have been recoded to '0' (DK).

Modified by GESIS.

See d71 for the complete question text.

opls - OPINION LEADERSHIP INDEX (D71&D77 SUMMARIZED)

Index of Opinion Leadership

0 DK (coded 5 in d77 and coded 0 in polintr)

1 -- low (coded 4 in d77 and coded 0, 1, 2 or 3 in polintr; or coded 5 in d77 and coded 1, 2, 3 or 4 in polintr)

2 - (coded 3 in d77 and coded 0, 1, 2 or 3 in polintr; coded 4 in d77 and coded 4 in polintr)

3 + (coded 3 in d77 and coded 4 in polintr; coded 2 in d77 and coded 0, 1, 2 or 3 in polintr; coded 1 in d77 and coded 0, 1 or 2 in polintr)

4 ++ high (coded 1 in d77 and coded 3 or 4 in polintr; or coded 2 in d77 and coded 4 in polintr)

Derivation:

The OPINION LEADERSHIP INDEX is based on the answers to the following two questions: 'When you hold a strong opinion, do you ever find yourself persuading your friends, relatives or fellow workers to share your views? Does this happen often ...?' (d77) and 'When you get together with friends or relatives, would you say you discuss frequently, occasionally or never about (national/European/local) political matters?' (d71), the latter first being summarized in the POLITICAL INTEREST INDEX (polintr). Interviewees giving affirmative answers to both questions are labelled ++. Interviewees giving negative answers to both questions are labelled --. Middle categories (+ and -) are constituted correspondingly.

This variable forms an indicator of the individual's potential to take an active role in the political process. For a complete discussion of this variable and its correlates see Ronald Inglehart, *The Silent Revolution: Changing Values and Political Styles among Western Publics* (Princeton University Press, 1977).

Note:

Starting with EB 73.4 the OPINION LEADERSHIP INDEX (C1) is constructed via the new POLITICAL INTEREST INDEX. For the background and derivation of this index variable see polintr.

Compared to the original variable the scale has been inversed by GESIS in accordance with former practice. Furthermore responses coded 'DK' to both source variables (d77 and polintr) have been recoded to '0' (DK), if applicable.

See d77 and d71 for complete question text.

p7pt - REGION - PORTUGAL NUTS 2

p7pt Portugal (EUROSTAT NUTS 2 LEVEL) – Comissaoes de Coordenação regional + Regioes autonomas

- 1 Norte (North) [PT]
- 2 Centro (Center) [PT]
- 3 Área Metropolitana de Lisboa (Lisbon metropolitan area)
- 4 Alentejo (Alentejo Region)
- 5 Algarve
- 99 Inap. (not PT in isocntry)

Note:

The autonomous regions of the Azores (PT20 - Região Autónoma dos Açores) and of Madeira (PT30 - Região Autónoma da Madeira) are not covered.

Since 2002 the region 'Lisboa e vale do tejo' is split up and the subregion 'Lezíria do Tejo' reinstated to the 'Alentejo' Region and the 'Médio Tejo' and 'Oeste' reinstated to the 'Centro' Region. The relative frequencies for each region indicate that this is reflected in the Eurobarometer P.7 regions starting with Eurobarometer 62.0. The original label for category '3' ('Lisboa e vale do Tejo') has been edited accordingly. According to the NUTS 2 specifications for Portugal this now only includes 'Grande Lisboa' and 'Península de Setúbal'.

Please note that according to the NUTS version 2013 with regular amendment as of January 1, 2015, and starting with Eurobarometer 83.1 category '3' is labelled 'Área Metropolitana de Lisboa'.

The official NUTS categories are coded and documented in the integrated alphanumeric NUTS CODES variable 'nuts'.

p7fi - REGION - FINLAND NUTS 2

p7fi Finland (EUROSTAT NUTS 2 LEVEL 2010) – Suuralueet / Storområden

- 1 Länsi-Suomi (West Finland)
- 2 Helsinki-Uusimaa
- 3 Etelä-Suomi (South Finland)
- 4 Pohjois- ja Itä-Suomi (North & East Finland)
- 99 Inap. (not FI in isocntry)

Note:

Starting with EB 81.3 for Finland only one country specific protocol variable P7 (REGION) is available. The variable p7fi corresponds to the NUTS 2 breakdown in accordance to NUTS 2010 with regular amendment as of January 1, 2012, and was named p7fi_r2 in former waves, but with a different sequence of the values 1 to 3. Please note the implications for the integrated NUTS CODES variable 'nuts'. The NUTS 3 breakdown is no longer available for Finland.

The official NUTS categories are coded and documented in the integrated alphanumeric NUTS CODES variable 'nuts'.

HR04A Brodsko-posavska županija (Brod-Posavina County)

HR04B Osječko-baranjska županija (Osijek-Baranja County)

HR04C Vukovarsko-srijemska županija (Vukovar-Srijem County)

HR04D Karlovačka županija (Karlovac County)

HR04E Sisacko-moslavačka županija (Sisak-Moslavina County)

Derivation:

This additional alphanumeric NUTS CODES variable is produced by GESIS. It integrates all country specific p7 variables given that the regional units are defined in accordance with the EUROSTAT Nomenclature of Territorial Units for Statistics (NUTS) respectively in accordance with the Statistical Regions for Candidate and EFTA Countries 2010. For each country the lowest available NUTS subdivision level is considered.

Note:

The official NUTS codes are coded verbatim in accordance with the in each case valid (applicable) NUTS version. All version details and changes are

documented in the official EUROSTAT classification history (History of NUTS). A second variable (nutslvl) indicates the coded NUTS LEVEL for each country.

France:

The territorial unit of Corse (FR83) and the Oversea departments (Départements d'outre-mer: FR9) are not covered.

Italy:

Starting with Eurobarometer wave 77 (NUTS version 2010 with regular amendment as of January 1, 2012) NUTS 1 codes for Italy have changed for North-East (ITH instead of ITD) and Center (ITI instead of ITE). The reason for this are minor boundary shifts on NUTS 2 and 3 level (ITI3: Marche and ITH5: Emilia Romagna).

Ireland:

Starting with EB 81.3 the category scheme for country specific protocol variable P7 (REGION) has changed for Ireland introducing NUTS 3 categories.

Greece:

The Aegean Islands (EL41 - Βόρειο Αιγαίο/Voreio Aigaio and EL42 - Νότιο Αιγαίο/Notio Aigaio) as well as the Ionian Islands (EL22 - Ιόνια Νησιά/Ionia Nisia) are not covered.

Starting with Eurobarometer wave 77 (NUTS version 2010 with regular amendment as of January 1, 2012) the standard country prefix 'GR' is replaced by 'EL'. The remaining numerical part of the codes remains unaffected.

Spain:

The autonomous cities of Ceuta (ES63 - Ciudad Autónoma de Ceuta) and Melilla (ES64 - Ciudad Autónoma de Melilla) are not covered.

Portugal:

The autonomous regions of the Azores (PT20 - Região Autónoma dos Açores) and of Madeira (PT30 - Região Autónoma da Madeira) are not covered. Please note that according to the NUTS version 2013 with regular amendment as of January 1, 2015, and starting with Eurobarometer 83.1 code 'PT17' is labelled 'Área Metropolitana de Lisboa'.

Finland:

Starting with EB 81.3 for Finland only one country specific protocol variable P7 (REGION) is available. The variable p7fi corresponds to the NUTS 2 breakdown in accordance to NUTS 2010 with regular amendment as of January 1, 2012. The NUTS 3 breakdown is no longer available for Finland.

Estonia:

Starting with EB 81.3 the category scheme for country specific protocol variable P7 (REGION) has changed for Estonia introducing the official NUTS 3 categories.

Bulgaria:

Starting with EB 81.3 for Bulgaria only one country specific protocol variable P7 (REGION) is available. The NUTS 3 breakdown is no longer available for Bulgaria.

Croatia:

Starting with EB 81.3 the category scheme for country specific protocol variable P7 (REGION) has changed for Croatia introducing the NUTS 2 and NUTS 3 categories.

Comparability:

nuts (REGION - NUTS CODES) in EB87.1

nutslvl - REGION - NUTS LEVEL

nutslvl REGION - NUTS LEVEL

0 No NUTS units

1 NUTS level 1

2 NUTS level 2

3 NUTS level 3

Derivation:

This variable identifies the lowest available NUTS LEVEL as coded for each country in variable NUTS CODES variable 'nuts'.

Starting with EB 81.3 the category scheme for country specific protocol variables P7 (REGION) have changed for some countries, in particular introducing NUTS categories for Ireland, Estonia and Croatia, and modifying NUTS categories for Finland and Bulgaria.

w3a - WEIGHT RESULT FROM TARGET - UNITED GERMANY

w3a Weight result from target - United Germany

This weight combines the weighting factors for Germany as a whole (redressment factors plus populations size factors East/West) and the redressment factors for all other countries (Great Britain and Northern Ireland separated). This weight has been derived by GESIS from original TNS weights w1 and w3. Unlike weighting variable w3 (WEIGHT UNITED GERMANY (ONLY)) the other countries/samples are not excluded from calculation.

Note:

Starting with Eurobarometer 75.4 and according to available weights up to Eurobarometer 61, GESIS is deriving three additional weights (w3a, w4a, w3a4a) in order to provide for the analysis of the United Kingdom and/or Germany, each as a whole and together with all other countries. Minimal deviations in frequencies for weighted data are possible due to rounding differences.

w3a4a - WEIGHT RESULT FROM TARGET - NATION

w3a4a Weight result from target – Nation

This weight combines the weighting factors for the United Kingdom as a whole (redressment factors plus populations size factors), the weighting factors for Germany as a whole (redressment factors plus populations size factors East/West), and the redressment factors for all other countries. This weight has been derived by GESIS from original TNS weights w1, w3 and w4. Unlike weighting variables w4 (WEIGHT UNITED KINGDOM (ONLY)) and w3 (WEIGHT UNITED GERMANY (ONLY)) the other countries are not excluded from calculation.

Note:

Starting with Eurobarometer 75.4 and according to available weights up to Eurobarometer 61, GESIS is deriving three additional weights (w3a, w4a, w3a4a) in order to provide for the analysis of the United Kingdom and/or Germany, each as a whole and together with all other countries. Minimal deviations in frequencies for weighted data are possible due to rounding differences.

w3a4a
