<p>Technical Specifications Standard Eurobarometer 56.3</p>

INTRODUCTION

Between January 22 and February 28 2002, the European Opinion Research Group, a consortium of Market and Public Opinion Research agencies, made out of INRA (EUROPE) and GfK Worldwide, carried out wave 56.3 of the standard Eurobarometer, on request of the EUROPEAN COMMISSION, Directorate-General Press and Communication, Opinion Polls.

Standard Eurobarometer surveys cover the population of the respective nationalities of the European Union member states, aged 15 years and over, resident in each of the member states. The basic sample design applied in all member states is a multistage, random (probability) one. In each EU country, a number of sampling points is drawn with probability proportional to population size (for a total coverage of the country) and to population density.

For doing so, points are drawn systematically from each of the "administrative regional units", after stratification by individual unit and type of area. Hence, they represent the whole territory of member states according to EUROSTAT-NUTS 2 (or equivalent) and according to the distribution of resident population of the respective EU-nationalities in terms of metropolitan, urban and rural areas. In each of the selected sampling points, a starting address is drawn at random. Further addresses are selected as every Nth address by standard random route procedures, from the initial address. In each household, respondent is drawn at random. All interviews are face-to-face in the respondent's home and in the appropriate national language.

COMPARISON BETWEEN SAMPLE AND UNIVERSE, AND WEIGHTING

For each Standard Eurobarometer survey, a comparison between sample and universe is carried out, per country. The universe description is derived from EUROSTAT population data.

There are 17 sample areas: one for each country of the European Union, in addition Germany is divided into East and West, and United Kingdom into Great Britain and Northern Ireland.

Each sample area contains a number of interviews, this number may be somewhat above or below that aimed at. The target is 1,000 per sample area, except for Northern Ireland, 300, and Luxembourg, 600.

WEIGHTS DELIVERED WITH THE EUROBAROMETER DATA SET:

There are 15 different weights used in the Eurobarometer survey.

W.1	WEIGHT RESULT FROM TARGET (also WEIGHTP or <u>WSAMPLE</u>)
W.2	DROPPED
W.3	WEIGHT SPECIAL GERMANY (also WEIGHTGER)
W.4	WEIGHT SPECIAL UNITED KINGDOM (also WEIGHT1)
W.5	WEIGHT EURO 6 (also WEIGHT6)
W.6	WEIGHT EURO 9 (also WEIGHT9)
W.7	WEIGHT EURO 10 (also WEIGHT2)
W.8	WEIGHT EURO 12 – EAST GERMANY (also WEIGHT3M)
W.9	WEIGHT EUROPE 12 (also WEIGHT3P)
W.10	WEIGHT EURO +3 (also WEIGHTNEW)
W.11	WEIGHT EUROPE 15 (also WEIGHT15 or <u>WEURO</u>)
W.12	WEIGHT NORWAY (also WEIGHTNOR)
W.13	WEIGHT TOTAL (also WEIGHT15P or <u>WCPLUS</u>)
W.14	WEIGHT STANDARD SIZE – GERMANY AND UNITED KINGDOM EXTRAPOLATED (also WEIGHTC or <u>WNATION</u>)
W.15	WEIGHT EURO 11 (without Greece)
W.16	WEIGHT EURO 12 (with Greece)

For each EU member state, a national weighting procedure, using marginal (RIM) and intercellular weighting (Iterative Proportional Fitting - IPF), is carried out, based on this universe description. As such, in all countries, minimum gender, age, region NUTS 2 are introduced in the iteration procedure (W.1).

An additional factor (extrapolation) is added, to bring East and West Germany together in one entity (W.3). East Germany counts for 20.8% and West Germany counts for 79.2%.

The same principle is used to bring Northern Ireland together with Great Britain, to form the United Kingdom (W.4). Here Northern Ireland counts for 2.5% and Great Britain, for 97.5%.

For the sake of analysis, historical weights were created, bringing countries together, contained in historical entities such as Europe of the 6, 9, 10, and 12. (W.5 from to W.10). Countries not inserted in these weights are set to 0.

In order to make a European 15 weight, the data is extrapolated using population figures for each sample area (15 members = 17 sample areas) (W.11).

Standard Eurobarometer surveys may include data from Norway. A special weight is created only for Norway (W.12).

For international weighting, INRA (EUROPE) applies the official population figures as provided by EUROSTAT in the Regional Statistical Yearbook (data for 1997). Total population figures for input in this post-weighting procedure are listed above. The result is WEIGHT TOTAL (W.13)

W.14 extrapolates the new and old Länder to their respective proportion in the whole of Germany, (East Germany (20.8%), West Germany (79.2%)) and does the same for Great Britain (97.5%) and Northern Ireland (2.5%). The other countries are left untouched.

From Eurobarometer 49 onwards, a new weight (W.15) was created to separate the 11 countries that accepted to introduce the euro, as of 01/01/1999.

From Eurobarometer 54 onwards, a new weight (W.16) was created to add Greece into the group of countries that accepted to introduce the euro. For an analysis of these 12 countries, use W.16.

PRECISION OF WEIGHTS:

Each weight is expressed in 10,000. This means that a person with weight equal to 1 will have the weight 10,000, a person with weight equal to 1.534 will have the weight 15,340. In other words, we use 4 decimal point digits. Hence, you need to divide by 10,000 to have the number of people interviewed contained in the data set.

RESULTS

Eurobarometer surveys results are reported in the form of tables, datafiles and analyses. Analyses are made available through - DG PRESS - Public Opinion Sector of the European Commission, rue de la Loi 200, B-1049 Brussels. Results are published on the Internet server of the European Commission:

<http://europa.eu.int/comm/dg10/epo>

All Eurobarometer datafiles are stored at the Zentral Archiv (Universität Köln, Bachemer Strasse, 40, D-50869 Köln-Lindenthal), available through the CESSDA Database : <http://www.nsd.uib.no/cessda/europe.html>

They are accessible to all institutes which are members of the European Consortium for Political Research (Essex), the Inter-University Consortium for Political and Social Research (Michigan) and all those interested in social science research.
